In this year, there were 47 public schools in New York, exclusive of those for coloured children.—6th Ann. Rep., Pub. Sch. Soc. (1841).

The U. S. steam frigate "Missouri" is launched from the Brooklyn Navy Yard.—Ecc. Post, Jb 8, 1841.

A freshet on Croton River carries away the earth embankment forming a portion of the newly constructed dam, causing a great destruction of property, and the loss of three lives. —King, Memoir of the Croton Aqueduct, 188-88; Nat. Com. Coun. (1854), 221.

In the board of aldermen of New York was a report of its special committee to which was referred a petition of the Catholics for a portion of the school funds and denies the petition by a vote of 15 to 1. —Proc., Bd of Ald. (1841), XX: 115; N. Y. Ecc. Post, Jb 20, 1841. Similar action had been taken by the board of assistants the preceding year (see Ap 27, 1840).
THE ICONOGRAPHY OF MANHATTAN ISLAND

Edward Curtis, collector of the port, writes to Thomas Ewing, Apr. 6, of the treasury: "...We are now occupying four stores as a custom-house, and are incessantly exposed to fire. ... The new building is fire-proof, having no wood in its construction.

"If you will give me authority, I will proceed to furnish the building, pursuing the plan proposed by Mr. Frazier, the architect, to the late Secretary. "I can move into the new building if I receive an order to pay the bills for the furniture, etc., in about eight or ten weeks hence. ..." The secretary replied on April 5, giving the proper authorization.

On Nov. 9, the collector sent to the secretary a schedule of the furniture, all of mahogany, procured for the entire building. For the complete list of items, see _House Exp. Docs. (Doc. No. 22)_ (27th cong., 2nd sess., vol. 1 (1841–2).

Just one month after his inauguration, President Wm. H. Harrison dies at "the President's House," in Washington, the first of the presidents to die in office.—_Eve. Post_, Apr. 5, 1841; _N. Y. Mirror_, XIX: 119; Winsor, VII: 293; _Hone's Diary_, II: 73; _Proc., App'd by Mayor_, VIII: 153. See Apr. 10. Hone's observation is: "...President Harrison's illness was brought on, and its severity increased, by the constant labor and deprivation of comfort brought upon him by his new duties. ... The sudden change from the quiet occupations of his life for several years past to the turmoil of public business, and the sacrifice of his personal convenience and comfort to the impracticable task of attending to every man's business, had been too much for the intrepid frame of the venerable statesman.

Vice-President John Tyler takes the oath as president.—_Eve. Post_, Apr. 8, 1841. He was the first vice-president to exercise the executive functions._Hone's Diary_, II: 71.

Bells are tolled in New York and Brooklyn from 12 until 2 o'clock, the time during which the Harrison funeral is held. Minute guns, sixty-eight in number, were fired from the heights at Brooklyn, and from the Battery. The stores generally were closed, and the flags of the shipping were hung at half-mast.—_Eve. Post_, Apr. 8, 1841.

Elaborate ceremonies in honour of the late President Harrison are held, arranged by a joint committee of the common councils of New York and Brooklyn. For the programme, order of the procession, etc., see _Eve. Post_, Apr. 9, 1841; _Hone's Diary_, II: 75; _Mem. Hist. of N. Y._, III: 375. Hone says: ... The arrangements of the committee [of which he was one] were made upon the greatest scale. ... Business of every description was suspended; all the public places, markets, hotels, the shops, and many private houses on the route of the procession, were covered with festoons and hangings of black, and other mournful devices. Minute guns were fired, and the bells tolled during the funeral procession for the funeral parade. ... All order and regularity in the tremendous mass of humanity which formed the greatest civil and military procession ever witnessed in the city, for spectators occupied every window, and the house-tops, or covered the entire streets, leaving only a space sufficient for the passage of the procession.

The Am. Academy of Fine Arts has been for two years "without direction." Notice has been given for a meeting of members and creditors. It has been proposed that the paintings, casts, etc., be merged in the Natl. Acad. of Design and the Atheneum. Sir Thomas Lawrence's portrait of Benjamin West, and Vanderlyn's portrait of Chancellor Livingston are among them.—_N. Y. Mirror_, XIX: 119. The academy was dissolved.—_See Apr. 1839._ Its records were given to the N. Y. Hist. Soc. by Alex. J. Davis, its last secretary. The portrait of West was given to the Wadsworth Atheneum at Hartford. The casts were sold to the Natl. Acad. of Design for $400, and remained in use in the Academy's school. They were almost all destroyed by fire in 1905.—_Hone, Hist. of the Metropolitan Museum of Art_ (1913), 32–34.

Horace Greeley begins the publication of the _New York Tribune_. There is a copy of the first issue in the N. Y. P. L.

The Democratic candidate, is elected mayor. The American Party was in the field with Samuel F. B. Morse as a candidate; he received only a few votes, less than he would have otherwise, because some political opponents printed in the _Express_ without his authorization a letter of withdrawal from the contest.—_N. Y. Eve. Post_, Apr. 14.

1841. Sonderey between the governor and the recorder, the controversy centered about the latter's investigation of the Grafton election frauds of 1838 (see _N. Y. Ev. Post_, Jan. 18, 1841. Although the senate removed Mr. Morris, the people elected him mayor on April 15 (p. v.).

16. Announcement is published in New York of the appointment by Gov Seward of a "young gentleman residing in the interior" as historical agent to be sent to Europe, as proposed by the N. Y. Hist. Soc. two or three years ago. The appointee is, presumably, "Mr. Brodhead, late of Ulster county, and late secretary to Mr. Bleeker, charge in Holland."—_N. Y. Cam. Adv.,_ Ja 16, 1841.

25. Early this morning, the shock of an earthquake is felt in New York City and its vicinity. "It was accompanied by a rumbling sound, and continued for some minutes."—_Eve. Post_, Ja 25, 1841. See also _Ibid._, Ja 26, 1841.

27. The common council directs the committee on arts, sciences, etc., of both boards to "enquire into the cause of the defaced appearance of the Paintings in the Governor's Room," and that they "take immediate measures to prevent their total destruction, and if possible to restore them to their original appearance."—_Proc., App'd by Mayor_, VIII: 93. Feb. The annual report of the governors of the New York Hospital states: "Since the last report to the legislature, the Governors have deemed it necessary and expedient to increase the accommodation for medical and surgical patients at the hospital in the city, and they have accordingly undertaken to erect a new wing to the hospital on the north of the main building, and on a parallel line with the other wing, which is now appropriated to sick and disabled seamen, termed the Marine Department.

The Governors have also made an important improvement in fitting up a building for post mortem examinations, and for the delivery of lectures on facts thus disclosed. ... There are also in the building a gallery and other suitable arrangements for a museum of preserved specimens, for the instruction and information of medical students and others."—_Assemb. Docs._ (1841), V: 153; _Ibid._ (1842), V: 95. The new wing was called the North Hospital.—_Man. Cam. Cen.,_ 1845–66, 257.

About 300 members of the Stanton St. Baptist Church organized on this day what later became the Fifth Avenue Baptist Church. They purchased the building of the Christian Church on Norfolk St., and began their services under the ministry of Rev. Geo. Benedict. For a brief account of the congregation's history, see the _21st Ann. Rep., Am. Scenic & Hist. Pres. Soc._ (1916), 114–46; _Greenleaf_, 148. See, further, _Jc_, 1865.

13. The common council passes resolutions, to be sent to congress, expressing the opinion that it is the duty of "our Senators and Representatives" in congress "to use their exertions in originating and carrying into immediate effect any plan for placing our coast, harbor, and frontier defences, upon a full and efficient war footing."—_Ibid.,_ VIII: 141.

"Assessments are apportioned on certain lots for opening Mt. Morris Square (see _My_, 1836). Further action on assessments was taken on May 6 and 11, July 28, Oct. 7, Nov. 6 and 10, and Dec. 1 and 5.—_Proc., App’d by Mayor_, VIII: 113, 114, 150, 176; IX: 28, 29, 30, 54, 65, 84, 91, 95. See, however, _1835–51_ D: 12, 1861; S: 25, 1865.

8. "On the Report and recommendation of the Building Committee of Trinity Church," it is ordered "that they have power to complete the interior of the new church, without galleries, provided they can arrange with the owners of Pews which were in the galleries of the old Church in respect to their rights as such owners; ..."—_Trin. Min. (MS.).

11. The steamship "President" sails from New York. She was never heard from again; although wreckage was found showing that she had foundered in some way.—_Bullock_, "First Steamships to Cross the Atlantic Ocean," in _Conn. Mag._ (1907), II: 54. See also _Eve. Post, My_, 7, 8, 11, 12, 13, 25; _Jc_; 5, 9, 11; _JI_; 5; _AP_, 18, 1840. The loss of the "President" and the subsidy granted the new Cunard Line brought about the financial collapse of the British and American Steam Navigation Co.—_Bullock_, _op. cit._

An anti-tax paper, _The N. Y. Municipal Gazette_, is first published. There is a file of this journal of protest in the N. Y. P. L.
CHRONOLOGY : INVENTION AND PROSPERITY : 1815–1841

1841. Mayor-elect Morris had been recorder of the city in the previous administration, from which office he was removed by the Senate on recommendation of Gov. Van Rensselaer (see Ja 12). Morris succeeded Isaac L. Varian as mayor (see My 14, 1839). His first message to the common council bears date of May 31.—Ibid., Je 1, 1841. In 1844 (q.v., Ap 9), he was succeeded by James Harper.

17. The legislature incorporates "The St. Nicholas Society of the city of New-York." The incorporators are Peter G. Stuyvesant, Washington Irving, Geo. B. Rulby, Egbert Benson, John Outh-put, Asm. R. Lawrench, and others already a member of a society bearing that name (see F 14, 1835). The objects of the society are "to afford pecuniary relief to indigent or reduced members, and their widows and children; to collect and preserve information respecting the history, settlement, manners and such other matters as may relate thereto, of the city of New-York, and to promote social intercourse among its native citizens."—Laws of N. Y. (1841), chap. 100. See D 5, 1848.

27. The new M. E. Church at No. 44 John St. is dedicated.—Evne. Post, Ap 29, 1841. It was erected between Sept. 24, 1840 (q.v.), and this date, 42 ft. wide and 80 ft. deep.—L. M. R. K., III: 930; Greenleaf, 284; and see Vol. 1, p. 238. It is still standing.—King's Handbook (1893), 373–74.

19. The National Academy of Design celebrates with its annual banquet the opening of "its new rooms, in the building of the Society Library. These rooms are spacious, commodious and elegant, and on this occasion the walls were adorned with the productions of the artists, just ready for the exhibition which will be held on Monday [May 5]."—Evne. Post, My 1, 1841. See also ibid., My 5, 1843. Regarding this building, then known as the Athenæum building (The Knickerbocker, XVII: 445), see Ap 30 and D 5, 1840; L. M. R. K., III: 957; Man. Comm. (1868), 484; Cummings, Historic Annals of the Nat. Acad. of Design.

A recent issue of the N. Am. Rev. contains an account of Laura Bridgman, "the child of one sense. This is supplemented by a letter from Boston, pub'd in the N. Y. Com. Adv. of June 4, 1841.

15. The common council passes a resolution stating the terms for the leasing of Castle Garden.—Proc., App'd by Mayor, VIII: 148–49.

29. The legislature amends the act of May 3, 1842 (q.v.), which provided for supplying the city with pure water. The new act provides for raising the sum of $3,500,000 by the creation of "The Water Stock of the City of New-York," the issuing of certificates of stock, and bonds for short loans. It requires the water commissioners to complete the aqueduct "down to and including the distributing reservoir at Murray's hill, according to the plan adopted by the said commissioners, and ratified by the common council . . ., with such immaterial alterations as may be necessary, and as may be agreed upon by the said water commissioners and the said common council." It gives the commissioners power and authority, with the common council, to change the course of the Harlem river with arches and piers, and instead thereof to carry the water across the said river by means of inverted syphons of iron pipes, until otherwise directed by the legislature, so as not unnecessarily to interrupt the navigation of the said rivers. The commissioners are also authorized, with the same consent, "to alter the plan of constructing the reservoir at or near to Yorkville, or to so much of such reservoir as shall be deemed sufficient for the present purposes of such aqueduct." It is made the duty of the common council "to execute all the work necessary for supplying the said city with water, and for distributing the same for the use of the inhabitants thereof, but to be done according to the directions of the said commissioners, and to such extent as may be determined by the common council, and as the same shall be found necessary by the said commissioners."—Ibid., III: 954; and descrip. of Pl. 123, III: 625; and A. Pl. 26, III: 881. For the consecration, see My 21, 1840. Berrian said that all the monuments and mural tablets formerly in the old church were placed in the rear apartments of the edifice, as directed by the vestry.—Hist. Sketch of Trinity Church, 345.

Hone describes the celebration of the "Fourth" on this day, July 4. Gov. Seward's review of troops in front of the Astor House, the dinner of the State Soc. of the Cincinnati at "Blanchard's Glove Hotel," etc.—Hone's Diary, II: 81.

21. The cornerstone of a new Rutgers St. Presbyterian church is laid, on the site of the old church, at the north-west corner of Rutgers and Henry Sts. It was ordered April 21, 1842.—Evne. Post, Jl 20, 1841; The Great Metropolitan or N. Y. Almanac for 1841, 71–72; Greenleaf, Hist. of the Churches, 132–36; L. M. R. K., III: 931.

22. The Gothic building in Broadway heretofore known as Masonic Hall, has changed owners, and is now called "The Halls of Temperance." It is henceforth to be devoted to "that great and moral cause, and to those rational amusements which are derived from the polite arts, music, poetry, and painting." A grand opening fete will be given on the 26th instant, when the Halls will be dedicated, with appropriate ceremonies. The Library, with a suite of rooms for refreshment, will be open daily to subscribers, from 8 A.M. to 10 P.M.—Evne. Post, Jl 21, 1842; Century Jour. of Comm.

23. A remarkable murder mystery developed in the discovery, on this day, in the Hudson, at "Sibyl's Cave," "the body of a beautiful young woman, named Mary Cecilia Rogers, a well-known employee of a shop in the St. Nicholas Hotel, at Broadway and Spring St., New-York.—Evne. Post, Ag 6, 13, 16–21, 31, S 2, 13, 29, 1841 (and other papers of the period); Haswell, Reminiscences, 389; Welling, Recollections of a N. Y. Chief of Police (1887 & 1890),
THE ICONOGRAPHY OF MANHATTAN ISLAND

1841 26-28. Edgar Allen Poe used the incident as the basis for his detective story, "The Mystery of Marie Rogêt." This is explained by Poe in the introductory paragraphs of the story, and by numerous footnotes in later editions of his collected works, which cite various New York newspapers and give local New York and New Jersey equivalents for places and persons in Paris, where the scenes of his story are laid. For the explanation of the mystery in New York, see N. Y. Com. Adv., N 18, 1842. See also the "Life of Charles Wallace," described in Herald-Tribune, Mr 21, 1926.

July 23 Two groups of trustees convey to the American Tract Society property which they have held in trust for that society. These grants were confirmed, and the title vested in fee simple in the society, by act of the legislature on April 12, 1842. — Laws of N. Y. (1842), chap. 279.

Aug. 22 Henry Brevoort dies in his 94th year. — N. Y. Com. Adv., Ag 25, 1841. Hone records: "He lived all his life upon his farm, now in Broadway, a short distance above my house [Hone was not at Broadway and Great Jones Sts], which cost him a few hundred dollars, and is now worth to his heirs a half million." — Hone's Diary, II: 85.

Sept. 4 A riot caused by rival fire engine companies takes place in Houston St. One man is mortally wounded. — Eve. Post, S 6-8, 1841.

All of the members of Pres. Tyler's cabinet, except Webster, resign on account of his second veto of the national bank bill. New appointees were immediately nominated and their names sent to the Senate — Eve. Post, S 10-17, 1841.

20 The French frigate "La Belle Poule," under the command of the Prince de Joinville, and the brig-of-war "La Cassard" arrive on New York. On Sept. 21, the frigate came up to the Battery. — Eve. Post, S 21, 1841. See also Ibid, S 22, 23, 24, 25, 1841.

22 The N. Y. & Erie R. R. Co. celebrates the opening of the road from Piermont to Goshen. — Eve. Post, S 24, 1841; Hone's Diary, II: 91.

23 "The late Franklin Theatre has received the name of Little Drury, and is appropriated to the performance of pieces in the German language." — Eve. Post, S 23, 1841.

27 The visit of the Prince de Joinville, who recently arrived in the harbour, is marked by a naval reception. — N. Y. Com. Adv., S 27, 1841. See, further, N 37.

Oct. 1 "The First Baptist Church of this city, have erected a beautiful building in Broome street, near the Bowery. It is finished in the Gothic, or old English style of architecture, and is collegiate in its character. . . .

"This elegant edifice is the work of Mr. Minard Le Fevre." — Eve. Post, O 1, 1841. See also L. M. R. K., III: 928.

5 The N. Y. Hist. Soc. meets in rooms provided for it in N. Y. University, having moved its library and collections from the Stuyvesant Institute (see 1837), which has been sold. Here the society remained until it erected its own building on Second Ave. (see O 17, 1855) — Kelby, The N. Y. Hist. Soc. (1900), 48-51.

14 The corner-stone of the Sailors' Home is laid in Cherry St., between Pike and Market Sts. — Eve. Post, O 15, 1841. A rare view in the Eno collection, N. Y. P. L., shows this building. A periodical, called Sailor's Magazine, describes the establishment. In the print collection of the N. Y. P. L. is a cover of one of these magazines, having a view of the building.

27 A short history of No. 1 Broadway, one of the oldest mansions in the city, and now owned and occupied by F. Prince, is published. — N. Y. Com. Adv., O 27, 1841. See also descrip. of PL 98, III: 589-90.

Hone goes to see the distributing reservoir on Murray Hill, newly completed, and describes it in his diary. — Hone's Diary, II: 95-96; and see N. Y. Mirror, XVII: 371 (My 30, 1840).

Jared Sparks begins a course of lectures on the American Revo-

lution in the chapel of N. Y. University, under the auspices of

the N. Y. Hist. Soc. — Eve. Post, N 6, 1841. See also ibid., N 5, 12, 16, 1841.

The Church of the Ascension, at the north-west corner of Fifth Ave. and 10th St. (Rev. Manton Eastburn, D. D., rector, see Ap 6, 1829), is dedicated. It was erected from designs by, and under the superintendence of, Richard Upjohn. The rector's house was in the rear of the church. — N. Y. Com. Adv., N 6, 1841; Hone's Diary, II: 95; Greenleaf, 86-87.

"The ministers are to meet in their new room on the second floor of [the exchange], for the first time, to-day." — N. Y. Com. Adv., N 17, 1841. The rotunda of the Merchants' Exchange in Wall street, the magnificent room in which the merchants of New York are to "congregate," was opened this day for their use. [See also descrip. of PL 118, III: 625.] The façade wants three columns to be complete, and the offices are all occupied by brokers, banks, money-changers, and those who deal in pigeons, if not "those who sell does." — Hone's Diary, II: 98; Eve. Post, N 18, 1841. In the slant of the period, a "pigeon" was a person easily swindled or plucked. — Cent. Dict. See, further, 1842.

The branch post-office, established on the north-west corner of Exchange Place and William St. after the fire of 1835, moved to the merchants' exchange on the completion of that building. —See descrip. of PL 115, III: 618.

Dr. and Mrs. Valentine Mott, "at their elegant house in Bleeker street, formerly the residence of Washington Foster," give an elaborate reception, dance, and supper in honour of the French Prince de Joinville. As described by Hone: "It was a superb, hot-pressed edition of New York's 'good society,' elegantly bound, with gilt edges and rich illuminations." — Hone's Diary, II: 100-4.

The corporation of New York gives a "grand dinner" to the Prince de Joinville at the Astor House, at which there are about 200 guests. It is described by Hone with characteristic frankness. — Hone's Diary, II: 109-12; Eve. Post, N 29, 1841.

The marble statue of Washington, executed in Italy by the Dec. American artist Greenough, is placed in the rotunda of the capital at Washington. — Hone's Diary, II: 104.

"This being the anniversary of the tutelar saint of the New Netherlands, the new ship built for a Hare packet, which bears his name [the "St. Nicholas"], was launched . . . from the ship-yards at the head of Cherry street . . . ." Hone describes the ship, and the ceremony. — Hone's Diary, II: 103-4.

The steam fire-engine is taken to the Battery and put in operation. "A trial was made with it to throw water to the top of the liberty pole in the enclosure, which is considered to be about 175 feet high. When it was finished, a jet from a pipe, whose orifice was an inch and a half in diameter, to the top of the pole, and several jets went several feet above. Afterwards a pipe with an orifice seven-eights of an inch in diameter was added, and the two streams were forced up about thirty feet below the top of the pole." — Eve. Post, D 16, 1841, citing Jour. of Com. See D 12, 1840.

The last of the 18 massive pillars that adorn the front of the merchants' exchange in Wall St. is placed in position on the anniversary of the great fire of 1835. — Eve. Post, D 17, 1841.

The mayor signs a joint resolution "That the Committee on Arts and Sciences be directed to procure a new City Flag or Color, for the City Hall." — Proc., App'd by Mayor, IX: 107. See also Seal and Flag of the City of N. Y. (1915), ed. by John B. Fine.

The contents of the American or Scudder's Museum are pur-

chased by P. T. Barnum for $12,000 and removed to the building at the e. c. cor. of Broadway and Ann St. — Brown, I: 71. For a brief history of the museum from this time and views of the building, see Illus. News, II: 256-38; and a programme of Feb. 7, 1842, in Emmet coll. (item 11467). See also L. M. R. K., III: 928, and descrip. of PL 95-b, III: 584.
CHAPTER VI

PERIOD OF INDUSTRIAL AND EDUCATIONAL DEVELOPMENT

1842-1860
CHAPTER VI

PERIOD OF INDUSTRIAL AND EDUCATIONAL DEVELOPMENT

1842-1860

In this year, gold was first found in California, in the Los Angeles district. — Winsor, *Nar. & Crit. Hist. of Am.,* VIII: 231.

This year, the first-class frigate "Savannah" was launched at New York. — *The Navy of the U. S.,* 1775 to 1853 (Wash., 1853).

The Earl of Carlisle (Lord Morpeth), writing of his travels, remarks: "I cannot refrain from one, I fear rather sensual, allusion to the oyster cellars of New York. In no part of the world have I ever seen places of refreshment as attractive — everyone seems to eat oysters all day long. What signifies more, the public institutions and schools are there extremely well conducted. . . . A real beggar is what you never see . . . ; probably religious extremes are pushed farther than elsewhere; there certainly is a breadth and universality of religious liberty which I do not regard without some degree of envy." — Earl of Carlisle, *Travels in Am.* (N. Y., 1817), 270; and see *Hone's Diary,* II: 99, 248.

In this year, the citizens of Brooklyn, through a committee petitioned the legislature for leave to remove the houses of the prison-ship martyrs (see Jl 4, 1839) "for the purpose of appropriate sepulture." Mr. Benjamin Romine, then 80 years of age, who at the time owned the ground containing the temporary vault which was erected in 1806 (p. v), renounced. He said: " . . . They are my property. I have expended more than nine hundred dollars in and about their protection and preservation. I commend them to the care of the general government. I bequeath them to my country, . . . I suffered with those whose bones I venerate. I fought beside them; I bled with them." In consequence, nothing was then done. — See *Rep. No.* 176, house of reps., 28th cong., 2d sess., written by Henry C. Murphy in 1843 (p. v, F 24).

In this year, a committee was appointed to inquire into the circumstances attending the finishing and furnishing of the New York custom-house. Its report is printed as house report No. 1065, 27th congress, 2d sess. House report No. 669 of the 27th cong., 2d sess., is a report made by Mr. Poinder on the affairs of the custom-house in the city of New York; and house document No. 248 (of the same congress) contains a report from the secretary of the treasury, relative to the late New York custom-house commission. From these it appears that John Frazee was the architect and superintendent of the building, which, after 1845, was known as the "Sub Treasury." An act of April 11, 1866, provided for a payment to the widow of John Frazee "as architect and superintendent of the New York custom-house." — *Statutes at Large,* XII: 815. For earlier appropriations for the construction and furnishing of this building from July 13, 1832, to March 3, 1847, see *ibid.,* IV: 574, 629; V: 24, 346, 379, 428; VI: 899; IX: 167. See also *My* 21, 1842.

In this year, the new merchants' exchange, occupying the entire block bounded by Wall, William, Exchange, and Hanover Sts., was completed, it having been commenced in 1836 (q. v., under Mr. 26), and opened for use in 1841 (q. v., N 17). — Belden, *N. Y. Past, Present, & Future,* 62. O. L. Holley, in *Description of the City of N. Y.* (1847), 24, gives a good description of it. While it is listed in the *City Directory* for 1840 and 1841, its completion was then only partial, as evidenced by Hone's note of Nov. 17, 1841 (q. v.).

Belden (supra) thus describes it: "It is built of beautiful stone from Quincy, Mass., to which the quarries have given the name of 'Quincy granite,' and is entirely fire-proof. It consists of two main stories, with a high basement and an attic. It's principal front on Wallstreet, 100 feet in length, is adorned by a colonnade of twelve Ionic columns. Within these is a range of six smaller columns, supporting the ceiling of a recess for the main entrance to the building. The shafts of these columns, thirty feet in height, are single blocks, weighing thirty-three tons. The Rotunda, the name applied to the Exchange Hall, occupies the centre of the edifice, and is surmounted by a magnificent dome, eighty feet in diameter, resting in part on eight splendid Corinthian columns of Italian marble. A large hall, in the western portion of the building, is devoted to the purposes of a Reading Room, containing files of papers from almost every country of the world. The other apartments are chiefly occupied by the offices of insurance companies, bankers and brokers. The cost of this noble edifice, including the ground on which it stands, which was purchased for $768,000, was about $1,900,000." — *Cf. Hone's Diary,* II: 98. For view of the building, probably prepared from the architect's design, see *Pl. 148,* *Vol. III,* and for description of this, and an outline history of its construction, etc., see III: 623, and L. M. R. K., III: 925. See further, 1862.

In this year, the first important movement toward tenement house reform was made by Dr. John H. Griscom, city inspector, when he called attention to existing conditions, in his annual report to the board of aldermen. He stated that a large part of the diseases and deaths in the city was due to the crowded condition and insufficient ventilation of many of the dwellings, and that these had conditions arose from the sudden increase of the city's population, in 1817 and 1828, by the vast immigration of ignorant, poverty-stricken foreigners, who in the absence of restraining legislation were crowded into quarters unfit for human habitation. This overcrowding led in turn to unsanitary habits and great moral and social evils. Griscom advocated city legislation to prohibit the use of cellars as dwellings, to require the owner or lessee to keep the premises clean, and to forbid crowding in such limited spaces. — De Forest & Veiller, *The Tenement House Problem,* 71-75.

In this year, the National Bank of Commerce, which up to this time had been in the merchants' exchange, leased and occupied, jointly with the Bank of the State of New York, the old building of the Bank of the United States, on the present site of the Assay Office, on Wall St. It remained here until 1853, when it sold the premises to the U. S. government, and moved to the corner of Broad St. and Exchange Place. — Hardenbrook, *Financial New York.* In 1842, the city directories show both the Bank of the State of N. Y. (see 5, 1850) and the Bank of Commerce at this address, No. 15 Wall St. In 1843, the latter bank is given as at 15 Wall St. See, further, 1844.

In this year, the interior of the North Dutch Church (see Jl 2, 1876; L. M. R. K., III: 915) "was remodelled and somewhat modernized." — Greenleaf, 15. For a complete description of the church as it was a few years later, see that written by S. A. Warner, architect, for De Witt's *Discourse* (1857).

In this year, the congregation of the "Tabernacle" Baptist Church bought the Light St. Presbyterian Church, where the abolitionist movement met. — *Life of Wm. Wallace Elliott,* D.D., by his son (Phila., 1891), 14, 18. See 1886.

The *Manual of the Common Council* for 1842-3 bears on its title-page the name of "D. T. Valentine," who for 24 years thereafter continued to be its editor (through the issue of 1866). An item of special interest is a schedule of the number of new buildings erected from 1834 to 1841, as follows: In 1834, there were 877 in 1835, 1,299; 1836, 1,265; 1837, 849; 1838, 781; 1839, 674; 1840, 859; 1841, 971. See also an account of this Manual in *Eve. Post,* O 13, 1842. Regarding Valentine and his *Manuals,* see 1841;
THE ICONOGRAPHY OF MANHATTAN ISLAND

1842 and see summary of principal articles and views under each year,
— 1841 to 1866, and 1868 to 1870, inclusive, in this Chronology.

The "jet" in the Harlem River is shown in a view drawn in this

Jan. 15

Uncle Sam looks out for the nineteenth
package and letter expresses, running from Boston to various
points in New England, and to New York and Albany. From
New York only four runs; of these, two go to Boston, one to Albany,
and one to Philadelphia. The postage of Boston for the year
ending June 30, 1841, was less by $8,102 than the preceding year,
notwithstanding the opening of new and important lines of com-

In the evening of this day, a preliminary meeting of citizens
is held at the Astor House to plan a suitable welcome to Charles
Dickens, who recently arrived in Boston on the Cunard "Britannia."
Resolutions of appreciative compliment are passed, and a
general committee of eighty-eight appointed. Another committee
is appointed "to withdraw and report forthwith a suitable plan for
a Ball to be given to Mr. Dickens," and Philip Hone is requested to
prepare (which he does immediately) a letter, which all the gentle-
men present sign, inviting him and "his Lady" to attend this
"public Ball." The committee on plan present at once a detailed
report of their proposals, and a committee of eighteen as promptly
named to carry it into effect.

The letter contains the following: "To brighten the effect,
and in compliance with the desire universally expressed, it is recom-
manded that the Ball Room represent various compartments of
"Curiosity Shop," in which the productions of 'Boz' may be illus-
trated. In order to add a strikingly novel and agreeable feature to
the intended fête, it is suggested that a number of Tableaux Vivants
be formed by competent Artists in the intervals of the dance, drawn
from the Novels, Sketches, Poems and Dramas of Mr. Dickens, and
shadowing forth, in living pictures, the graphic and glowing deline-
ations of this singularly gifted and original author.

As no ball-room in the city will be large enough, the plan
recommends that the Park Theatre be engaged, and "that the
Ball take place at the earliest date, of which due notice will be given
in the public prints. A complete scheme of "decorations and de
signs for the Ball Room, and arrangements for the floor," is out-
lined; also the "Order of the Dances and Tableaux Vivant." There
are 25 numbers in this programme, in which march, or waltz, or
quadrille, or galoppe alternates with tableaux. These tableaux
bear the titles of Dickens' novels, sketches, and poems; and also the
title "Washington Irving in England and Charles Dickens in Amer-

Feb. 2

A new daily paper, of the smaller kind, has been started in this
city, with the title of the *Commercial Transcript*. It appears dili-
ently to collect the news of the day, and gives ample notices of the

8 The "New-York Museum of Natural History and Science,"
which was incorporated in 1839 (p. 3, Mr. 6), but could not at that
time carry its charter into effect, according to a circular published
by the directors, has now begun to function. They have purchased
the collection of curiosities and art in "Peale's Museum," arranged
them, and, by this circular, invite the public to open its doors on Feb.
8. On this occasion, an address was delivered by Dr. J. H. Gris-
com, in which he traced the history of Peale's Museum (founded by
Chas. Wilson Peale). — *N. Y. Mirror*, XX: 71. According to Valen-
tine, there was a "Lyceum of Natural History" at 563 Broadway in

The "new and splendid" home of Mr. and Mrs. Robert Ray
where a "fancy ball" was given on this evening, is generally con-
sidered the "greatest thing" of the kind in New York. — *Hone's
Diary*, II: 114. For the probable location of the Ray residence,
see II. 19, 1848.

14 The "Boz ball" takes place at the Park Theatre. It is thus
described by Philip Hone: "The agony is over; the 'Boz' ball,
the greatest affair in modern times, the tallest compliment ever
paid to a little man, ... came off last evening [Feb. 14].

The theatre was prepared for the occasion with great splen-
dour. The whole area of the stage and pit was floored over,
and formed an immense saloon. The decorations and ornam-
ents were all "Pickwickian." Shells with scenes painted from
several stories of Dickens, the titles of his works on others sur-
rounded with wreaths, the dome formed of flags, and the side
walls in fresco, representing the panels of an ancient oaklen ball.
A small stage was erected at the extreme end, opposite the main
entrance, before which a curtain was suspended, exhibiting the
principal proportions of the immortal squire, his priuce of valets,
and his bodyguard of choice cronies. This curtain concealed in
the intervals between the cotillions and waltzes, to disclose a stage
on which were exhibited a series of tableaux vivants, forming groups
of the characters in the most striking incidents of 'Pickwick',
'Nicholas Nickleby,' 'Oliver Twist,' 'The Old Curiosity Shop',
'Barnaby Rudge,' etc. The company began to assemble at half-
past three, and the affair lasted two hours, when the committee introduced
Mr. and Mrs. Dickens, the crowd was immense; a little upward of two
thousand tickets were handed in at the door, and, with the members
of the committees and their parties who came in by back ways,
the assembled multitude numbered about two thousand five hun-
dered. Everybody was there, ... Refreshments were provided
in the saloons on the second floor, and in the green room, which
was kept for the members of the committees and their families.
This branch of the business was farmed out to Downing, the great
man of oysters, who received $2,200. On the arrival of the "observed
of all observers," a lane was opened through the crowd, through
which he and his lady were marched to the upper end, where the
committee of reception were stationed. Here, as chairman of that
committee, he received him, and made a short speech, after which they
joined in the dancing.

The author of the "Pickwick Papers" is a small, bright-eyed,
intelligent-looking young fellow, thirty years of age, somewhat of
a dandy in his dress, with "rings and things and fine array," in his
manner, and of a lively conversation. If he does not get his little
head turned by all this, I shall wonder at it. Mrs. Dickens is a little,
fat, English-looking woman of an agreeable countenance, and, I
should think, 'a nice person.' — *Hone's Diary*, II: 117-18. For
accounts of the arrangements made for this event, see II. 16.

For social events which took place during the next few days,
in honour of Dickens, including a great public dinner on Feb. 18,

The Presbyterian Church in Second Ave. is sold to the Roman
Conv.*

The First Baptist Church (formerly of Gold St.), and later at the
corner of Broome and Elizabeth Sts., is opened for public worship.
Part of the building, fronting on Broome St., is occupied by the
American and Foreign Bible Society and the American Home
Mission Society. From this church, since its origin, have sprung
the Second of Bethel, the Zoro, Avarystian, Pechell, North, Stam-
ford, Washington, and Bethesdale. — *Life of Spencer Hought-
ton Cone*, by his son (1856), 271-72. See My 2, 1852.

A patent for a sewing-machine is granted to John J. Gresham
of Washington, D. C. This machine, however, was never intro-
duced to public use.— *Annals of N. Am.*, 587. Howe's machine,
the first practical one, was not patented until 1846 (q. v., S 10).
See My 9, 1845.

The "clerks employed in the custom-house of this city have
removed, with their books, &c., to the new building extending from
Pine to Wall streets." — *Ev. Post*, Feb 23, 1842. See 1842, supra;
and My, infra.

City Despatch Post.— A post for the delivery of city letters
has been established. Its utility and convenience are very obvious;
the time it is in fact arrived when, on account of the growth and ex-
tent of the city, it has become almost a matter of necessity. We are
glad to hear that it is undertaken by persons in whom the public
is not confidence. The deliveries of letters and packages take
place three times a day. It is to be hoped that the undertaking
will meet with sufficient encouragement to the enterprise of
those who have projected it. — *Ev. Post*, Feb 25, 1842. See My 15.

Ralph Waldo Emerson begins a series of six lectures on "The
Times," at the Society Library.— *Ev. Post*, Feb 28, My 3; 4, 7, 9, 16,
1842.

A circular, bearing this date, is published, headed "New-York
& Albany Railroad." It says, in part: "We believe that the im-
mediate construction of a Rail Road, between New-York and
Albany, is absolutely necessary, to the Commercial and Landed
interests of the state and city. The line of a Road can be constructed,
as will not only secure to us the benefits of our heretofore unfertilised
position, but will also produce a large income upon its cost to the
Stockholders. . . ." The agitation awakened by this address,
which was signed by 13 prominent men of New York, resulted in the construction of the N. Y. & Hudson River R. R., which was commenced in 1847 (p. v.), and was finished and equipped in 1851, at a cost of $9,305,571, "thereby connecting New York with a chain of little railways extending westward from Albany to Buffalo. All of the new connecting lines, when completed, were to supply $2,826,600, and the Hudson River line, were finally combined under one corporation ownership. . . ."

The National Academy of Design "has enriched its collection by the purchase of the statuary, lately belonging to the American Academy of Fine Arts, and now undoubtedly possesses the finest gallery of casts to be found in the country, and perhaps equalled by few abroad."  

"—Eve. Post, My 26, 1842.

In this month, the Philharmonic Society of New York was founded.—Krehbiel, The Philharmonic Soc. of N. Y. (1892), 16.

Another society of the same name flourished in 1799 (p. q.).

The legislature extends to New York City and County the provisions of the Revised Statutes in relation to common schools. An act provides for the election in each ward of two commissioners, two inspectors, and five trustees of common schools. The commissioners shall constitute a board of education. Their powers and duties, and other provisions in relation thereto, are defined in this new school law. For educational purposes, each of the city wards "shall be considered as a separate town." The commissioners are to "supply the district with such actual and reasonable expenses while attending to the duties of their office."

"—Laws of N. Y. (1842), chap. 150. This law was extensively amended by ibid. (1843), chap. 216 (see also Man. Com. Coun., 1855, 615); and by ibid. (1844), chap. 320, and later acts, all of which were repealed by the act of July 3, 1851 (p. v.), which consolidated and amended them.

The legislature passes a law authorising the mayor and common council "to pass such by-laws and ordinances, as to them shall seem meet, for the preservation and protection of all or any of the works connected with the supplying of the city of New York with pure and wholesome water, . . . and also to organize a department with full powers for the management of such works and the distribution of water."

"—Laws of N. Y. (1842), chap. 225.

The legislature makes provision for the acquisition of burial places by religious corporations in the city of New York.—Laws of N. Y. (1842), chap. 155.

A large number of men are now actively engaged in laying pipes to extend the waterworks of Broadway which is between Houston and Broome streets. The Commissioner of the Aqueduct has given notice that the water will be let into the distribution pipes on or before the 4th of July next.—Eve. Post, Ap 20, 1842. See Je 13.

Hone observes: "Scarcely a day passes that we do not hear of some steamboat being blown up, . . . or of a locomotive running off the railroad." —Hone's Diary, II: 127.

The common council orders that a fire-alarm bell be placed on the hails of justice (in Centre St.).—Proc, Apd by Mayor, IX: 159.

In this month, the new custom-house was completed and furnished, at a total cost of $98,000. The building is described at length in the N. Y. Com. Adv., Jl 13, 1842. It was commenced in May, 1834 (p. v.).—Ibid.; Hone's Diary, II: 158; descrip. of Pl. 166, III: 848. See 1842; F 23, 1842. See, further, My 21.

The Presbyterian church in Murray St. is being taken down.—Eve. Post, My 5, 1842. It was re-erected on the north side of 8th St., between Lafayette Place—N. Y. Com. Adv., Ap 26, 1842, and The Great Metropolis of N. Y. Almanac for 1851, 64. Greensleeve, Hist. of the Churches, 207-9. The church in Murray St. stood opposite Columbia College, where it was erected in 1812 (p. v.), and was the property of the Third Associate Reformed Presbyterian Church, which had been organized in 1810 under the charge of the Rev. John M. Mason.—Greenleaf. See, further, S 20, 1846.

In its new location it became known as the "Eighth St. Church." On Sept. 20, 1846, it ceased to be occupied as a Presbyterian church, and, after being occupied by several other congregations, it was finally leased to the Church of the Mediator (see My, 1849).—The Great Metropolis . . . for 1851, 64 (with view on p. 62).

Philip Hone writes that the Union Club (see My 27, 1837) "is now pretty well settled in its new quarters,—Mr. William B. Astor's large house in Broadway, higher up the street, and on the opposite side from the former situation. . . . It has been newly cleaned and put in handsome order, including a new building in the rear of $3,000. . . ."—Hone's Diary, II: 149.

Mr. Astor lived at 137 Broadway in 1841, after which he lived at 32 Lafayette Place.—City Directory. See also L. M. R. K., III: 939; and the club's handbook of 1912.

A great public meeting is held in the Park to "remonstrate against the interposition of the United States troops in the political controversies of Rhode Island."—Eve. Post, My 18, 1842.

The services of John Frazee, as architect and superintendent of the N. Y. custom-house, which began March 3, 1841 (see Mr 14, 1835), terminate on this day. This appears in an order of congress directed to the secretary of the treasury, dated April 11, 1860, to pay his widow, Lydia Frazee, $5,368 for such services.—U. S. Stat. at Large. XIII: 335.

A congressional report, dated Aug. 20, 1842, on the subject of the furnishings of the new custom-house, which involved controversies as to the manner of expending the appropriations, states that Mr. Bowne, on Dec. 5, 1840, had dismissed Frazee from office; but that in March, 1841, it was recommended by Mr. Woodbury that Frazee be continued as "superintendent and architect of the building," and that his plan for the interior arrangements he carried out. Frazee consented to superintend the completion of the building, and design its decorations and furniture without compensation.—House Rep. No. 1065, 27th congress (1842). It appears to have been for these services that the Widow Frazee was paid.

The cost of the building was $960,000; and of the furniture, $25,000.—N. Y. Com. Adv., Jl 13, 1842. In 1863 (p. v.), it was converted into the present sub-treasury.—May, L. M. R. K., III: 973 (under "City Hall, second"); and descrip. of Pl. 166, III: 848.

Harper & Bros. publishing-house at 82 Cliff St. is destroyed by fire.—Eve. Post, Je 1, 1842; Costello, Our Firemen, 234, 251. See also 1817; D, 1853.

Charles Dickens and his wife sail for home.—Eve. Post, Je 7, 1842; Harwell's Reminiscences, 285. Mr. and Mrs. James S. King give a parting breakfast at "Highwood". Hone was one of the guests, and wrote of it. He was also invited by Grinnell, Minturn & Co., owners of the ship "George Washington," to be one of a party to accompany Mr. and Mrs. Dickens to Sandy Hook. He describes the scenes on board, including a jolly "collation" with speeches and toasts.—Hone's Diary, II: 131-32. See Ag 17.

The New York State University (now New York University) is chartered, and is incorporated under "City Hall, second" and the City Charter Act of 1834 (p. v.).—Proc., Appd by Mayor, IX: 159. See Aug 12.

The government of the United States purchased the old 12 foot canal for $2,868,000, and the canal was closed to navigation on Dec. 31, 1842. See Aug 16.

The library of the University of Pennsylvania is transferred to its new building at 7th and Chestnut streets, where it is placed in the care of the Curator of the Library, John F. Gibbons.—Eve. Post, Je 9, 1842.

"Messrs. Stevens, Ward, Ring, Birdsell, French, Jarvis and Allen, the commissioners of the Croton Water Works, have just returned from a minute examination of the water [interior of the works]. . . ."—Eve. Post, My 5, 1842. It was re-erected on the north side of 8th St., between Lafayette Place—N. Y. Com. Adv., Ap 26, 1842, and The Great Metropolis of N. Y. Almanac for 1851, 64. Greensleeve, Hist. of the Churches, 207-9. The church in Murray St. stood opposite Columbia College, where it was erected in 1812 (p. v.), and was the property of the Third Associate Reformed Presbyterian Church, which had been organized in 1810 under the charge of the Rev. John M. Mason.—Greenleaf. See, further, S 20, 1846.

"They entered the Aqueduct at its mouth at the Croton river and pursued the examination down to Sing Sing, continuing their examination under ground to Harlem river, a distance of thirty-three miles; which under ground examination employed them three days. In the lowest cut, which is above Sing Sing, they were seventy feet below the surface of the earth; and at the Mill river they concluded they were eighty-five feet above the surface of the earth below. . . ."

"The line of Aqueduct and the Dam will both be so far completed as to introduce the water into the city by the time proposed by the Commissioners—on the 4th of July."
"Croton Water.—Very small exertions are at present made by the citizens to introduce this water into their dwellings. This inactivity seems to proceed from the uncertainty respecting the charge for the water. Whether its use shall be a tax upon the landlord or tenant of the premises to which it is conveyed, or whether it shall be free to all the citizens, and the expenses of the department defrayed by a general tax, seem to be the questions which require a settlement. If the present mode of taxing the premises is permanently adopted it is very certain that the water will be made free to a limited extent, and by only those citizens who can afford to purchase for their residence such an additional convenience. The great mass of the people, who are tenants, will derive no benefits from it, and the health of the city will not be materially improved.

"Again, if the expenses of the department are paid by a tax on the property of the city, and the revenue derived from it is not made free to the citizens, a very general introduction of the pipes into the dwellings may ultimately take place. But tenants must, in this case be particular to select premises having this convenience attached to them before any others. There will still remain a large class whose dwellings are certain to be readily occupied without any consideration of this kind. They would probably derive more benefit from the free use of the water than any others, yet of all others they would have the least access to it. It has been suggested that the regulations of the city should make it the interest of the landlord to furnish a pipe to his premises. Such regulations would have, doubtless much influence; but there are a large number beyond their reach, for whose supply hydrants must be adopted. These questions are beginning to be of pressing importance to the citizens, and a speedy decision of them is required."—Proc., Post, Ag 12, 1842. See also ibid., Ag 19, 20, 22, 23, 1842.

"The Post-Master General has ordered that a City Despatch Post should be established in this city. For that purpose, about one hundred stations have been selected in different places, where letters may be deposited. They will then be delivered three times a day, at three cents each. To effect this arrangement, the gentlemen who have heretofore had in operation a private despatch post [see F 153], have been employed by the Post-Master of this city, and have transferred their whole concern to the Post-Office establishment.—The security of the letters will, doubtless, be as great as in the Post-Office, and the rapidity of their delivery will add much to the convenience of the citizens."—Proc., Post, Ag 13, 1842.

The common council requests the mayor "to tender the use of the Governor's Room to Lord Ashburton, on his arrival, to receive the visits of our citizens," and appoints a committee to "wait on him and welcome him to the City."—Proc., App'd by Mayor, X: 23. He came to the United States on business connected with the treaty of Aug. 9 (q. s.). See, further, S 1.

Hone records in his diary: "A letter has been published in some of our American newspapers, under the name of 'Croton,' dated July 15, and addressed from 'Devonshire Terrace, Parkgate,' to 'The Editor of the Morning Chronicle,' which contains some sentiments so derogatory to our country, in which the writer has been so recently honoured to the full extent of his deserving, that nothing is left for Mr. Dickens but to deny its authenticity, to save himself from the charges of wilful misrepresentation and gross ingratitude. I have written him a letter, calling for his avowal or denial of this unworthy piece of splendid impudence. . . ." He transcribes the alleged Dickens letter into his diary, and hopes that it may prove a forgery. On Oct. 7, he received Dickens' reply, and records: "It turns out as I supposed. The scrupulous remarks on the United States, to which his name is subscribed, and which must so promptly take up the published penny papers and published through the country, were a base forgery, gotten up probably by one of the craft on the side of the water." He enters in his diary the text of Dickeson's reply; this states, in part:

"The letter to which you refer is, from beginning to end, in every word and syllable, the cross of every i and the dot of every j, a specimen forgery and it is not only wicked and inadmissible, but the authors have marvelously succeeded in making one word or line in reference to America, in any quarter whatever, except the copyright circular, and the unhonest socleard who invented that astounding lie knew this as well as I do. It has caused me more pain, and more of a vague desire to take somebody by the throat, than such an event should perhaps have awakened in any honourable man. But I have not contradicted it publicly, deeming that it would not become my character or elevate me in
**ترونيولوجي: الصناعة والتعليم** 1842-1860

1777

- نوبل, ديكنسون, II, 140-42, 147-150.

17. "I am, my dear sir, faithfully yours,"
- نوبل, ديكنسون, II, 140-42, 147-150.

18. "Preparations were commenced yesterday for the erection of a fountain in front of the City Hall, in the Park. Another is to be erected in the rear of the Hall, and one is now nearly completed in Union Square. These, and several others, are designed to grace the several basins of which we have present different views and forms. The cast iron plates already prepared for the centre jet present three changes—first a close column fifty feet in height, called 'The Maid of the Mist'; the second, with a centre and sides, called 'The Croton Plume'; and the third, in an expanded shape, termed 'The Fan.' The outside or subordinate jets, can be modified to throw a stream from fifteen to twenty feet, in any direction desired. They are all regulated by the iron bar above the water in the basin, so as to present a change of appearance, merely by enlarging or narrowing the apertures by valves placed beneath.

19. "The fountain in Union Place, although of smaller size, presents a most beautiful effect when in operation. Our citizens, as well as the numerous strangers who visit the city on Friday (Oct. 14), will then have an opportunity to witness them both in full display." — نوبل, ديكنسون, O 13, 1842; descript. of Pl. 135, III: 702.

20. A great celebration is held in honour of the completion of the Croton aqueduct. Invitations were sent to Pres. Tyler, the living residents, the chief diplomatists, stewards of the city, the state officials, and the cities of Brooklyn, Albany, Troy, Jersey City, Pittsburg, Philadelphia, etc. The day was ushered in by the firing of a national salute, and the bells of all the churches were rung an hour, at sunrise, at noon, and at sunset. At 9 o'clock, a banner was presented, at the mayor's office, to the Fire Department, and at ten o'clock, the great military and civic parade commenced, the procession moving up from the Battery through State St., around Bowling Green, up Broadway to Union Park, around the park and down the Bowery to Grand St., through Grand St. to East Broadway, down East Broadway and through Chatham St. to City Hall Park. As the procession passed the Park and Union Square, the fountains there began to play. The whole line of march was thronged with people. At the city hall, Samuel Stevens, president of the Board of Water Commissioners, made an address, and John L. Law-rence, president of the Croton Aqueduct Board, replied. An original ode, composed for the occasion by George P. Morris, was then sung by about 200 members of the New York Sacred Music Society from a stage erected in the Park, and the ceremonies closed with loud cheers. After the ceremonies, the mayor, members of the common council, and several hundred citizens partook of a "cold collation," which was served in the city hall. To commemorate the celebration, a silver medal was struck, which showed on one side a section of the aqueduct, and on the other a view of the distributing reservoir at 42d St.—King, Memoir of the Croton Aqueduct (1843), 229-156; Hone's Diary, II: 152-53.

21. The first submarine telegraph cable, the invention of Prof. Morse, having been laid between Governor's Island and the Battery, is tested. — Evec Post, O 18, 1842; Harwell's Reminiscences, 492-3.

22. Some restriction on members of the common council in the matter of carriage hire seems desirable, and it is resolved that "no charge for carriage hire shall hereafter be allowed, unless incurred by a committee, or a member of the Common Council, in the performance of official duty." — Proc., App'd by Mayor, II: 152-53. See Ag 7, 1857.

In Oct. or Nov., Dickens published his observations and impressions of America, under the title American Notes (see Ag 17). The book reached New York on Nov. — Hone's Diary, II: 157, 158. Of this city he wrote, in part:

- The great promenade and thoroughfare, as most people know, is Broadway, a wide and bustling thoroughfare, which, from the Battery Gardens to its opposite termination in a country road, may be four miles long. Shall we sit down in an upper floor of the Carlton House Hotel (situated in the best part of this main artery of New York),
1842

and when we are tired of looking down upon the life below, Sally
forth arm-in-arm, and mingle with the stream.

Warm weather! The Sun strikes upon our heads at this open
window, as though its rays were concentrated through a hazing
glass; but the day is in its zenith, and the season an unusual one.

Was there ever such a sunny street as this Broadway? The pav- 
ement stones are polished with the tread of feet until they shine
again; the red bricks of the houses might be yet in the dry, hot
kiln; and the roofs of those omnibus look as though, if water
were poured on them, they would kiss and Smoke, and smell like
half-queachled fires. No stint of omnibuses here! Half-a-dozen
have gone by within as many minutes. Plenty of hackney cabs
and coaches too; gigs, phaetons, large-wheeled tilburyes, and
private carriages rather of a clumsy make, and not very different
from the public vehicles, but built for the heavy roads beyond the
city, with large-wheeled wheels; Negro coachmen and white;
in straw hats, black hats, white hats, glazed caps, fur caps;
in coats of drab, black, brown, green, blue, nankeen, striped jean and linen; and there; in
that one instance (look while it passes, or it will be too late),
in suits of livery. Some southern republican that, who puts his blacks
in uniform, and swells with Sultam pom and power. Yonder,
where that phaeton with the well-clipped pair of gray has stopped
—standing at their heads now—is a Yorkshire groom, who has not
been very long in these parts, and looks sorrowfully round for a
companion pair of top-boots, which he may traverse the city half
a year without meeting. Heaven save the ladies, how they dress!
We have seen more colours in these ten minutes, than we should
have seen elsewhere, in as many days. What various paradisal
walks and seats! What a sight of this stockings, and
pinching of thin shoes, and fluttering of ribbons and silk tassels,
and display of rich cloaks with gaudy hoods and linings! The young
gentlemen are fond, you see, of turning down their shirt-collars
and cultivating their whiskers, especially under the chin; but they
cannot approach the ladies in their dress or bearing, by no means
to say the truth, humanity of quite another sort. . . .” —American

An account of the reception which Dickens’ observations of
America and American society received in this country is found in
Haswell’s Reminiscences, 383-84. See also desc. of Pl. 121,
III: 628.

4 Daniel Webster, now in New York, receives callers in the
governor’s room of the city hall.—Eco. Post, N 5, 1842; Howe’s
 Diary, II: 154.

Mr. John Delmonico, the respectable proprietor of the great
hotel and restaurant in William street [see D 18, 1850], died on
Thursday” (Nov. 10)—Hone’s Diary, II: 158. On Nov. 14, Hone
recorded: “. . . Delmonico Brothers . . . Restaurant, bar-
room, and private dinners No. 2 South William street furnished
rooms No. 3 Broadway, as usual street, as usual.”

6 Jas. WatsonWebch is sentenced to imprisonment for leaving
the state to fight a duel, and for fighting a duel with Thos. Marshall._
Hone’s Diary, II: 160.

Dec.

The common council passes a resolution expressing appreciation
of the proposed railroad between New York and Albany. It is
“indispensable to the welfare of the commercial, mercantile and
mechanical interests of our City. . . .” New York “must be con-
ected to the agricultural districts of our country by railroad. . . .”

Patriotism and self-interest demand “the hearty co-operation
of all citizens, to secure the immediate construction of the New
York and Albany Rail Road, in the shortest possible time,” and this
resolution pledges “our individual assistance in the several wards,
to procure subscriptions.” The company’s capital stock will be “a
safe investment;” “sure and large returns will speedily be realized
from the profits of the road, on its completion.” In the event of
invasion or “internal commotion,” this railroad, by connecting
New York with “the State and United States depot of war in
the interior of our State, and in New England,” will give this city
“an impregnable position.” The road “merits the fostering care of
our Country,” and should be assisted, said City council. —App’d by Mayor, XII: 216.

In this year was published a circular letter urging New York
business men to subscribe toward the building of this road, which
says in part: “We believe that the immediate construction of a
Rail Road, between New York and Albany, is absolutely necessary,
to the Commercial and Landed interests of New York. . . .”

39 See My 12, 1846.

The common council orders that the N. Y. & Harlem R. R. Co.
be required to discontinue the use of steam power on Fourth Ave., Dec.
south of the line of 29th St., on or after Aug. 1, 1845.—Proc.,
App’d by Mayor, XII: 216. The order was not obeyed, and
on March 30, 1846, the corporation council was directed to take legal
measures to stop the use of steam power below 32d St.—Ibid.,
XII: 377. See Mr 30, 1846.

“At the American Museum [Barnum’s], may be seen a dwarf
of the very smallest class, lately brought from England. His
family name is Straton, but he answers to the appellation of General
Tom Thumb. He is said to be eleven years of age, and is twenty
inches high, or about the size of an infant six months old.
He is dressed like a grown person, has a full set of teeth apparently
of the second growth, wals about the room, answers when spoken
to and does as he is directed with perfect dexterity. It is said that
his growth curves with a speed of about six months old.”—Eco. Post, D 14,
1842. See also Brown, Hist. of the N. Y. Stage, I: 71.

The city conveys to the Assn. for the Benefit of Colored Orphans
a plot of ground (20 lots) on the west side of Fifth Ave., between
43d and 44th Sts., extending 250 ft. on each street.—Liber Deeds,
DLCXX: 5923; Jour. & Docs. of the Bd. of Ass’t., XIX: 240, 259.
A condition of the gift was that the association should “maintain,
clothes, and keep, twelve Colored Pauper Children, without any
charge to said City.” —Proc., App’d by Mayor, IX: 166. Here
the association immediately erected an asylum. It was a substi-
tional edifice, accommodating 200 children. It was not only a place
of refuge but also an educational institution where they received
instruction and training (see D 7, 1847); then suitable situations
were found for them. It was supported not only by private munifi-
cence but also by city and state appropriations.—Belden, N. Y.
Past, Present & Future (1849), 351 Phelp’s N. Y. City Guide (1845),
22-24; L. M. R. K., III: 957. This was one of the first buildings
in New York to be heated by hot water in iron pipes.—Eco. Post,
S 8, 1843; and see ibid., D 9 and 12, 1843.

On May 1, 1848, the city added a strip of land 50 ft. wide (4 lots),
ranning from street to street, making the plot 500 ft. deep.—
Liber Deeds, DXXO: 260, 262. See further, the draft riot of 1863.

In this year, 1,965 ships with 74,949 passengers arrived at the
31 port of New York.—Eco. Post, Ja 5, 1845, citing Jour. of Com.
In the course of 1842, 417 commercial houses and 918 mission
houses in New York, with a capital of nearly $64,000,000,
were engaged solely in the foreign trade.—Valentine, Min. Com.
Com. (1842-3), 97.

1843

In this year, Prescott published his Conquest of Mexico, and his—
Peru.—Winsor, II: 423-577.

In this year, Col. Fremont made his second expedition to the
Rocky Mountains.—Winsor, VIII: 260.

In this year, subject to the annexation of Texas was first
agitated.—Winsor, VII: 291.

In this year, the first American clipper, the “Rainbow,” of 750
tons, was built, for the China trade.—New International Ency.,
V: 467.

In this year, the Moravian Church, built in 1829 (q. v., Ag 17)
the south side of Fulton St., between William and Dutch Sts., was
taken down, and the ground sold. A new purchase of
ground was made on the corner of Houston and Mott Sts. Here
a large, substantial, brick church was erected, and was opened for
worship June 29, 1845.—Greenleaf, 278. See also Vol. I, p. 237.

In this year, Sherman & Smith published a map of the city
showing topography and old buildings.—See map No. 812 in real
estate bureau of comptroller’s office.

In this year, an assessment was levied for regulating 23rd St.
between Third and Eighth Ave.—Index to Assessment Rolls, Vol. I.
“As late as 1843 it [the Pitt statue] was in the yard of
the arsenal on the site of the Harlem Railroad Depot near the
in a Century, 1776-1876, 14-15. The next recorded location of
the statue was in 1872 in the New York Historical Society, at
the Museum Hotel, corner West Broadway and Franklin St., on April 26, 1847 (q. v.).

In this year, the Association for Improving the Condition
of the Poor was formed. Incorporated in 1848 (q. v.), it is still main-
tained under the familiar designation of the “A. I. C. P.” For
an account of its early work, see Richmond’s N. Y. and Its Institu-
tions (1871), 395-8; Eco. Post, F 10, 1844. It led to the formation of
the following institutions, societies, etc.: In 1851, the Desmit
Dispensary, and the N. Y. Juvenile Asylum; 1832, the North-
western Dispensary, and a public washing and bathing estab-
lishment; 1833, a legislative act to provide for the care and in-
struction of idle truant children; 1834, the Children's Aid Society; 1835, the erection of a workmen's home; 1863, the Society for the Relief of the Ruptured and Crippled.—Ibid.

In this year, the carpet and rug establishment of W. & J. Sloane was on Broadway. They were then in the Cherry-Tree Building. In 1843, the Sloane Building was in a much better standing. Mr. Sloane, in his report for the year 1843, states a further sum of $117,64 for the completion of the fountain in the Park. —Proc. App'd by Mayor, X: 14, 124.

Holt's Hotel is sold for $100,000.—Eve. Post, Ja 23, 1843. It was re-opened as the United States Hotel, by Braisted & Johnson.—Ibid., F 18, 1843.

Up to this time, 10,000 copies of Kent's Commentaries had been printed, in four editions, and sold at $9 a copy. The author's profits are $50,000 a year, twice his salary as chancellor. "I doubt if any American book has ever produced so much money."—Hone's Diary, II: 171.

Wm. S. Stone, deputy superintendent, reports to the board of education that a new school has been opened in the Twelfth Ward, "under all favorable circumstances," and recommends "the establishment of additional schools in several of the other wards where the wants of the population are most pressing."—Eve. Post, Ja 27, 1843. This was the first ward-school. —Boose, Public Education in the City of New York, 69-70.

Announcement is made that the French Government has ordered fourteen steamers to be built, which are to be employed as packets between that country and the most important ports of this continent and the West Indies. Four of these will compose the line between Havre and New York. The remaining ten will sail from Cherbourg. They are so built as to be swift, and com-
fortable to the passengers, and the rate of fare will be much lower than in the English steamers.—Eve. Post, Ja 3, 1843, citing Courrier des Etats-Unis.

The common council decides to remove the potter's field from 59th St. and Fourth Ave. to the southern part of Randall's Island, and that it be called the city cemetery.—N. Y. Com. Adv., Ja 31, 1843. See also Docs., Bd. of Assts., No. 64. See Ap 28.

"Millenism.—Miller now says that the destruction of the world will take place some time between the 21st of March, 1843, and the 21st of March, 1844. For the effects of Millenism in various places, see ibid., F 8, 9, 13; Mr 9, 10, 17, 20; My 10; S 9, 14, 1843.

The common council directs the comptroller to lease to the N. Y. & Harlem R. R. Co. the lot which they now occupy at the corner of Centre St. and Tryon Row. —Proc., App'd by Mayor, X: 154, 305.

The first number of The Pathfinder, a new weekly, is issued by Paske Godwin.—Eve. Post, F 24 and 25, 1843.

The common council changes the name of Greenwich Lane to Greenwich Avenue. —Proc., App'd by Mayor, X: 184.

Congress appropriates $50,000 "for testing the capacity and usefulness of the system of electro-magnetic telegraphs invented by Mr. T. H. Morse, of New York, for the use of the Govern-
ment of the United States, by constructing a line of said electro-
magnetic telegraphs," under his superintendence. —Acts of Cong. (1843), chap. 84. An experimental line was built in June, 1844, between Washington and Baltimore.

Congress makes appropriations for various fortifications in different parts of the United States, including Fort Schuyler on the East River, Fort Wadsworth, Bedloe's Island, and Fort Hamp-
ten in New York harbour.—Acts of Cong. (1843), chap. 70. See similar appropriations by congress in current years.

"Streets in New-York.—Within a few years there have been introduced among us, a class of people, whose persons, like their occupation, are the most filthy and degraded imaginable, and whose peculiarities demand for them that degree of particularization. These are the clappers, or rags-pickers of Paris, London and other European cities. They may be seen already in considerable num-
bers, in our streets, furnished with their apparatus of labour, con-
sisting of a long-handled iron hook, with which they rake the kennels, and overturn the heaps of rubbish and filth, in search of rags, bones, bits of paper, &c., and a basket on one arm, or a large bag slung across the shoulder, which receives their gatherings, reeking with mud and filth. From early dawn, these degraded hunters after the apparently most worthless of all matters, pursue through the locustations, until night comes, when they are occupying the 6-story building, of stone, brick and iron, at the s. e. cor. of Broadway and 19th St.—King's Handbook (1893), 81. Its next move was to the s. e. cor. of Fifth Ave. and 47th St.

P. T. Barnum purchases the collection of the New York (or Peaseu's) Museum, and removes it to his establishment at Broad-
way and Ann St.—Brown, I: 71.

These 45th editions, of the Diary of the Mayor, of this city, are

"the completion of the fountain in the Park."—Proc. App'd by Mayor, X: 124.

The American Museum in the City of New York, re-opened by Mayor, X: 124.

Hone mentions a dinner with William B. Astor, "in his noble manseion in Lafayette place, one of the finest houses in the city."—Hone's Diary, II: 176.

The common council agrees to give to the Am. Institute a ten-
year's lease of its room in the almshouse, on certain conditions.—Proc. App'd by Mayor, X: 202.

An act of the legislature provides: "It shall not be lawful for a member of the common council of any city. or of any town, or the supervisor of any town, to become a contractor under any contract authorized by the common council, board of trustees, or board of supervisors of which he is a member, or to be in any manner interested directly or indirectly, either as principal or surety, in such contract.

No town, county, city or state officer shall be interested in any contract made by such officer, or be a purchaser or interested in any purchase at any sale made by such officer, or a seller at any purchase made by such officer in the discharge of his official duty.

"Contracts in violation of the provisions of the 1st and 2nd sections of this act, may be declared void at the instance of the city, county, village or town interested, or of any other party interested in such contract except the officers mentioned and prohibited in said sections from making or being interested in such contracts.

"The chairman of committees of common councils and of other public municipal bodies, charged with any investigation or inquiry requiring the taking of testimony, are authorized to administer oaths to such witnesses as may be brought before such committee, and any false swearing in testimony so taken shall be deemed perjury, and subjected to the pains and penalties of perjury and treason."—Eve. Post, I: 23, 1843. This act shall take effect immediately.—Laws of N. Y. (1843), chap. 57.

On April 8, an act was passed making these principles specifically applicable to canal officers, by prohibiting them from be-

coming interested in any canal contracts or hydraulic works.—Ibid., (1843), chap. 184.

No. 1, Vol. I, of The New Mirror, the successor of The N. Y. Mirror, makes its appearance. It is edited by Geo. P. Morris. Later, he was joined by N. P. Willis. The last issue was that of Sept. 28, 1844, in which the editors announced their intention of publishing a newspaper called The Evening Mirror. A prospectus of The New Mirror was published in N. Y. Com. Adv., Mr 4, 1843.

The centennial anniversary of the birth of Thomas Jefferson is celebrated at Tammany Hall by a great dinner. Four hundred people are present.—Eve. Post, Ap 17 and 14, 1843.

The common council orders "That the portion of Madison Square belonging to the Corporation, be levelled, sodded with grass, and enclosed with a suitable fence, under the direction of the Street Commissioner," and that $5,000 be appropriated there-

The "right, title and interest of the Merchants' Exchange Com-
pany in the property called the Merchants' Exchange" are sold at auction under an execution, to John Ward "for $5,600 over the amount of the incumbrances upon it. The indebtedness of the company is $920,528.17, exclusive of the original capital of $87,500."—Eve. Post, Ap 18, 1843, N. Y. Com. Adv., Ap 18, 1843, citing the Tribune.

The legislature authorizes the mayor, recorder, and aldermen
1843 "to order and cause to be raised annually and to be collected, such Apr. eminent money as shall be requisite to defray the interest upon 18 the 'water stock of the city of New-York,' by tax on the estates, real and personal, of the freeholders and inhabitants of and situated within such portions of the said city, as may have been from time to time brought into use by the regulating and grading of the streets and avenues, and the laying down therein the necessary water pipes, and that may be designated the 'water district' by the mayor, aldermen and commonalty." Until such designation is made, the water district is to include all the city lying south of a line commencing on the west side opposite the middle of 23d St., running east to Lexington Ave., then north to 28th St., then east to the East River—Law of N. Y. (1843), chap. 231. This law was amended on March 4, 1846.—Ibid. (1846), chap. 23.

1844 The law incorporates the Washington Monument Assn. for the purpose of erecting a monument to the memory of George Washington. It shall be "competent" for them to acquire ground for the monument and begin to build as soon as $50,000 shall have been collected. If, however, this sum is not collected within three years from this date, they shall refund the contributions.—Law of N. Y. (1843), chap. 203. See also S. 2. On March 31, 1847, an act was passed to revive and amend this act, together with one passed May 7, 1844. This act names a board of trustees.—Ibid. (1847), chap. 49.

1848 The name of the association that forms the "Tontine Coffee House" is changed by the legislature to "Tontine Building."—Law of N. Y. (1843), chap. 322. See, further, My, 1855.

1852 "As to-morrow is the 23d of April, when a great catastrophe may happen, according to Mr. Miller's prediction, expectation is on tiptoe to see every sign that may occur. During this forenoon a singular streak was seen in the western sky of a pale cloudy color which could be traced from the zenith down to the top of some houses on the west side of Broadway. This immediately attracted a general gaze, and speculation was rife as to what it might portend; and apprehension and anxiety were beginning distinctly to appear on many countenances, when it passed away and left the gazers to conclude that it was like many things that had excited wonder before—all smoke."—Even. Post, Ap 22, 1843.

1852 For many years, beginning at this time, the "Plumbe Daguerreotype Gallery," at 211 Broadway, cor. of Murray St., held the distinction of being the largest establishment of the kind in New York, and one of the best in the world.—N. Y. Com. Adrs., Ap 25, 1843; A Picture of N. Y. in 1846, 112. The bronze bust of Washington Irving now in Bryant Park follows the "Plumbe type" of Irving portrait, being from a Plumbe daguerreotype artist. The Daguerreotype artist, who began business at about this time, and afterwards distinguished themselves in photography, were Anthony (see A Picture of N. Y. in 1846, 112 and descript. of Pl. 150-a, Vol. III), and Brady (see N. Y. Post, Present & Future, 1849, under head of "The American Advertiser," 33). See, further, S. 1, 1853.

1852 The common council directs that arrangements be made "for the location of the Keeper of Potters Field in Randall's Island," that hereafter all interments be made "on the southern extremity of said island," that $800 be appropriated "for the erection of a dwelling for the Keeper," and that "that portion of said island be hereafter designated and known as the City Cemetery."—Proc., App'd by Mayor, XI: 246-47. See Ja 30.

1870 In the latter months of May, 1873, a manuscript day-book of events. Its entries extend to May, 1873. This was sold at the Anderson Galleries May 6, 1924, with the Wm. S. Lambert collection, and, as described in the catalogue (item No. 256), represents, apparently, "the whole receipts for admission for some years, and after that the receipts taken at the door, together with the amounts at the bar, and minor expenditures. During this period Jenny Lind, Miss Philpin, Miss Vernon, Miss Augusta, Signor Arlitti, John Nickerson, Signor Botessini, the Havana Opera Company with its stars, etc. During the Jenny Lind concerts a succession of notes tells of attendance of from 7,000 to 10,000, of 300 to 400 tickets left in the hands of the speculators, of a house too full to do any business at the bar, etc. Other notes tell of the visits of the presidents, generals of the Mexican War, the Deniel O'Connell obsequies, the cholera epidemic, the Astor Place riot, opening of Niblo's, balls, etc. The day-book is now M. owned by the N. Y. Hist. Soc.""Grace Church.—We learn that this society has purchased six lots on the east side of Broadway, just above Tenth-street. The price of the lots was $40,000. It is the intention of the Society to erect a beautiful church upon these lots. These lots are just above the point where Broadway inclines to the west of a straight line. The consequence is, that the church will front a line passing down through the centre of Broadway, and will be the most conspicuous object that meets the eye of the spectator, while standing at the Bowing Green and looking up this great thoroughfare."—Even. Post, My 3, 1843; N. Y. Com. Adrs., My 4, 1843; Letters of Henry Brearly to Washington Irving, ed. by Geo. S. Hellman (1916), II: 256. See, further, O 30.

1873 Letters have been received at Castle Garden, supplied from the Croton Aqueduct. The whole place has been renovated and improved, and will be ready to be opened for the reception of visitors as soon as the weather shall be warm enough to attract them to the place."—Even. Post, My 10, 1843.

1875 The Bible has recently been excluded from the district school in the Fourteenth Ward. This is said to be the first public school in New York without the Bible.—N. Y. Com. Adrs., My 16, 1843.

1875 The common council grants permission to Wm. E. Wilmerding and others to erect a fountain in the Bowing Green, under specified restrictions.—Proc., App'd by Mayor, XI: 6. See My 50.

1875 Peter Lorillard dies, in his 80th year, at his seat in Westchester Co., "the last of the three brothers of that name, himself the eldest,—Peter, George, and Jacob,—all rich men; he the richest."—Harv. Dict., II: 183.

1875 Noah Webster dies in New Haven at the age of 85.—N. Y. Com. Adrs., My 30, 1845.

1875 Mayor Morris, in his annual message to the common council, offers a searching criticism of the municipal government from the time the amended charter of 1850 went into effect. After citing several provisions of the charter to prove that "the powers and duties of the Common Council are exclusively legislative," he says further: "The section prohibiting members of the Common Council being directly or indirectly interested in any contract made with, or expenses or considerations paid by, the City Government, also shows that the powers of the Common Council are exclusively legislative. They are intended to have no participation in the action of the executive departments of the city. But to remove all doubt upon this subject, the words of the 21st section are expressive and imperative. The executive business of the Corporation shall be performed by distinct departments: and it is made the duty of the Common Council to organize and appoint those departments. The language of the amended charter could not well be more explicit upon this point, and the whole tenor of that instrument shows that its framers intended to make an absolute and entire separation between the legislative and executive departments of the City Government, that each might perform the duties of its peculiar province without collision with the other, so that the whole might work in harmony. An attentive examination of the amended charter will convince your Honorable Body that it is the result of wisdom, integrity and patriotism, and deep knowledge of the springs of human action. Had the City Government from the commencement of the operation of the new charter been conducted in strict conformity with its provisions, the cost of the City Government would have been trilling compared to what has actually been expended; order would have been established where confusion has prevailed, and honest reputations and unexceptionable characters would have been re-established. These from a deficiency of proper and legal checks and examinations, have been led into deceptions alike disastrous to them and injurious to the public treasury.

"It is deeply to be regretted that upon the organization of the City Government in the month of May, 1831, under the amended Charter, so many gentlemen who had previously been Aldermen and Members of the Council, met together and entered into a habituated to the former practice of the Common Council, gave more weight to precedent than to the Charter under which they were to act, and continued the practices which the amended Charter was expressly intended to destroy. It is true, that in accordance with the amended Charter, the Mayor left the Council as a member of their deliberations. The Common Council, however, continued to make their appointments in Joint Ballot. The effect was to deprive
the Mayor of the participation in the appointments, which before as a member of the Common Council, he had exercised. They continued to perform the executive business of the Corporation by Committees appointed by themselves, thus depriving the Mayor of the participation in the executive business of the City, which he had previously exercised as presiding officer of the Common Council in the appointment of Committees.

"The members continued to participate in contracts with the City, and in the receipt to their own use of the treasure of the City. These precedents have been followed by subsequent Common Councils. Many of them have been farther. They gave to these Executive Committees the legislative power of the City, which had previously exercised as presiding officer of the Common Council; so that in fact the Common Council became sub-divided into a number of sub-legislatures, corresponding with the number of their Committees. These sub-legislatures determined, legislatively, what work was necessary to be done; executively, they made the contract or employed the workmen; in many instances took the contract themselves or were interested in it; executively they determined whether their own work was properly done, and directed payment to themselves out of the City Treasury. Legislative acts of these sub-legislatures were never sent to the Mayor for approval or objection. By such practice the Mayor's limited objecting power was destroyed. He knew nothing of the legislative action until the warrant for payment of the work was sent to him for his signature, and this morning in Chamber, it was met with by the Mayor, and the Corporation had received the benefit of the poor man's labor, and that an action could be sustained against the Corporation for work, labor, services and materials furnished to the use of the Corporation. In this manner many hundreds of dollars of the people's money has been uselessly and extravagantly expended since the organization under the amended charters, and in direct violation of the spirit and letter of that instrument."

In support of this last statement the mayor presents figures furnished by the comptroller showing that during the 12 months just past as much as $185,112.61 had come from the treasury directly to members of the common council, including $6,182.87 to one assistant alderman for printing and stamps, and another assistant alderman "for plumbers' work and hydrants." He adds: "The effect of such practice by numbers of the Common Council is incalculably prejudicial to the interests of the City, and shamefully burdensome to the tax-payer, and that too without even the palliation that the money is distributed to benefit the many. Such practice will lead persons to obtain seats in the Common Council with the express object of making money out of the City Treasury. An election to the Common Council will become a means of trade; a 'drumming for custom.' Such practice would be an inducement to bring into the Common Council members of different business pursuits, who would divide among themselves the whole business of supplying the wants of the City Government, each being desirous to receive from the City Treasury the amount of profit which such a position would authorize them to appropriate to pecuniary interests of the others, that he in turn might not be opposed by them. This would lead to the most extravagant expenditure of money for repairs, and work performed for the Corporation, and to a lavish and unnecessary supply of every article which officers and departments of the Corporation required."

As instances of what the mayor deems "reckless squandering of the public moneys," he says: "Among their last acts they direct a compilation of the laws of the State and a revision of the City Ordinances to be printed at a large expense, both of which would have been useless. They also directed a very expensive work—'The Geological Survey of the State,' to be purchased for the Mayor, each member of the Common Council, and for the Clerks of the two Boards. One of these Committees, also usurping legislative as well as executive powers, directed an essay to be written, and a work to be compiled and published for the members and officers of the Common Council, with additional numbers to be distributed as presents, at an expense to the City of $2,000." The mayor declares that each of the acts above mentioned has been returned by him "with objections," and is now before the common council for consideration. He further says, that "in the extraordinary committee, as in their 'selection of the $64,000 Street Contract to the exclusion of offers to perform the same work for much less money,' in emphasizing the necessity of a "strict conformity to the charter," the mayor offers as his first recommendation the immediate organization of "separate and distinct Departments for the management of the Executive business of the Corporation." He further recommends "concentrating in the City Hall all the offices of the City Government," by making other disposition of the Courts, Clerk's and Sheriff's Offices, and Law Library."

Another recommendation is the establishment of "an Office for the receipt of all moneys paid into the City Treasury," instead of having so much money go through other offices, the mayor's example.

Another recommendation is that "contracts shall in every instance be made for work, performed, or articles furnished the city. A permanent board for making contracts, he thinks, should be the mayor, the presidents of the two boards, the comptroller, and the counsel for the corporation, plus "the Chief of the Department for which the work is to be performed or articles furnished."—Proc., Bd. of Ald. (1843), 61-75. Administrative departments were created finally in the amended charter of April 2, 1849 (p. v.) "The workmen have already commenced on the fountain in Bowling Green [see My 23]. The diameter of the basin will be ninety feet. The jet is expected to rise seventy feet. We regret to see that it was necessary to cut down that beautiful cluster of trees in the centre of the green, to make room for the Fountain."—Eec. Post, My 30, 1841. See Je 30.

"An experiment of sweeping the streets with a machine was tried this morning in Chambers street. The machine used was one that had been imported from England, and the object of the experiment was rather to show the manner of its operation than its capability. The work was done with dispatch, though not quite so thorough and effectually as by the ordinary method."—Eec. Post, Je 6, 1843. President Tyler visits New York, and is given a public reception. 

"The Common, Act Je 13, 1843. The programme of the reception was published in Eec. Post, Je 8 and 10, 1843. He was on his way to Boston to attend the Bunker Hill dedication (see Je 17).—Hone's Diary, II: 184.

President Tyler makes a visit to "the Croton Water Works, the Harlem Aqueduct, Reserve, &c. and the Dead and Dumb Asylum," for the afternoon he sailed for Stonington.—Eec. Post, Je 14 and 15, 1843. "Mr. J. Wise, the celebrated balloonist, gives notice to all the world that he will very shortly make an aerial trip with his balloon across the Atlantic."—Eec. Post, Je 15, 1843.

The Bunker Hill Monument at Charlestown, the corner-stone of which was laid June 17, 1842 (p. v.), is dedicated with imposing ceremonies. Daniel Webster delivers the address, and Pres. Tyler is present.—Eec. Post, Je 19, 1843; Hone's Diary, II: 185.

The common council changes the name of Lumber St. to Trinity Place.—Proc., App'd by Mayor, XI: 13.

Christian Bergh dies, aged 81 years, "the oldest ship-carpen ter in the city, the father of that great system of naval architecture which has rendered the city of New York famous throughout the world. He was the first to send on the great waters the models of packet-ships which have borne the palm from all other commercial nations. . . ."—Hone's Diary, II: 187.

"Another story is just being added to the building known as Tammany Hall."—Eec. Post, Je 28, 1843.

"This morning the fountain in the Bowling Green was made to play for the first time. Many jokes have been cracked at the expense of the shapless mass of stones which the workmen had been piling up at this spot, but the moment the water was let out it became transformed into a beautiful cascade. . . . The design, we understand, was furnished by James Renwicke, Jr. of this city, son of the professor."—Eec. Post, Je 30, 1843. See also N. Y. Com. Act., 115 5 and 6, 1843. As a specimen of ridicule cast upon this rock-fountain, see the comments of "Sophia" in the N. Y. Com. Act., Ag 30, 1844. One of John G. Saxe's poems, "Tom Brown's Day in Gotham," contains the following reference to it: "A fountain that looked like a huge turban Piled up with rocks, and a squint between." See lithographic view in Eno collection, N. Y. Pub. Lib. See, further, S 23.

"Affairs and Men of New Amsterdam, in the time of Governor
THE ICONOGRAPHY OF MANHATTAN ISLAND

1843—Stuyvesant.—A volume of extracts from the old Dutch records of New Amsterdam, bearing this title, has been compiled and translated by J. Paulding, and just published... The volume is to be had at Burgess & Sturgis, 222 Broadway...—*Ev. Post*, Jl 3, 1843.

12—F. B. Tower, of the engineer department, has just issued an exceedingly neat and valuable work, illustrative of the history and present condition of the Croton Aqueduct... what will constitute the attractiveness of the work... are the drawings and engraved views, which illustrate the letterpress. We have fine pictures of all the most picturesque sites of the aqueduct, which in themselves are full of interest...—*Ev. Post*, Jl 12, 1843.

The plates in this book are as follows: "Aqueduct of Spoleto, Italy;" "Sections of the Croton Aqueduct;" "Entance Ventilator;" "Isometrical View of Culvert;" "Tunnel and Gate Opening at the head of the Aqueduct;" "View above the Croton Dam;" "Entablature over the entrance to the Aqueduct;" "View below the Croton Dam;" "Croton Aqueduct at Sing-Sing;" "Aqueduct Bridge at Sing-Sing;" "Aqueduct Bridge for Road-ways;" "Croton Aqueduct at Mill-River;" "Croton Aqueduct at Jewett's Brook;" "Croton Aqueduct at Hastings;" "Croton Aqueduct at Harlem River;" "View of the Jet at Harlem River;" "Croton Aqueduct at Clendenning Valley;" "Aqueduct Bridge at Clendenning Valley;" "Plan of the Receiving Reservoir;" "Isometrical View of the Distributing Reservoir;"—From copy in author's collection. The "View of the Jet at Harlem River" is reproduced as A. Pl. 18-b, Vol. III.

15—The Suicide of New York just now is 'The Alhambra;'—an ice cream resort lately opened a little below Niblo's. This is described.—*New Mirror*, I: 270. It was at 557 Broadway, a few doors from Prince St.—*Ev. Post*, Jl 1, 1843.

29—Philip Hone writes: Dickens has just published, as one of the chapters of 'Martin Chuzzlewit,' an account of the arrival of his hero in New York, and what he saw, and heard, and did, and suffered, in this hole of pugneys, brutes, and idles.—I am sure he has not been ungenerously treated by my countrymen, I have taken his part on most occasions; but he has now written an exceedingly foolish libel upon us, from which he will not obtain credit as an author, nor as a man of wit, any more than as a man of good taste, good nature, or good manners. —*Hone's Diary*, II: 189-90. On Oct. 12, Hone added: "Speaking of the United States, Mr. Dickens says in the story ['Martin Chuzzlewit'] which he is spinning out in one of the London periodicals, 'That republic, but yesterday let loose upon her noble course, and but to-day so manaced and lame, so full of sores and ociers, foul to the eye, and almost hopeless to the sense, that her best friends turn from the loathsome creature with disgust.' If the accamp had no regard for his own character, he ought to be the last to damage one in whom who may have had the sense to do so. —*Ibid.*, II: 196.

Aug. 11—*I notice the introduction of the 17th century verandah curtains to New York—so the strips of striped demi-umbrella, put out from the top of the window with falling sidefolds, which are so common in Venice and Naples. Two or three shops in Broadway have them, and Cozenz has lately fitted them on to the windows of his ladies' dining-room—and most showy and picturesque luxuries they are,—*New Mirror*, I: 287.

14—"I observe that the paviers are at work in the upper part of Broadway, removing the wooden pavement, and substituting the broad flat stones, as are laid in the streets of Florence. The wooden blocks were certainly in a deplorable condition, but I do not think they had fair play as an experiment. They were badly laid, and were left to annoy the public long after they should have been repaired."—*Ibid*.

The design for the Washington Monument (see Ap 18) "is now completed. It is in the form of a pentagon, and is to be erected of granite, in or fronting on Union Square; to be finished in the Gothic style of architecture, richly and elaborately ornamented, with spacious rooms below for a historical library, gallery for painting and sculpture. The rich Gothic windows, columns, friezes, cornices and balustrades—its buttresses, turrets, tower, and pinnacle, partake of all that is sublime in architecture; and when the structure shall have been finished, the crocket of the pinnacle being 420 feet in the air, it will be pronounced the noblest monument in the known world. It is to be built by the voluntary contributions of the People of the United States of one dollar and upward. Some of the wealthy citizens of New York have already headed subscription lists with five and ten thousand dollars, and are joined for the immediate commencement of the enterprise are fast maturing.—*Ev. Post*, Ag 14, 1843, citing *Pennsylvania*. The original subscription list is in the N. Y. Pub. Library.—See O 29, 1843. An engraving and description of the monument was published early in 1844.—See descrip. of A. Pl. 26-c, III: 884, citing the *Ev. Post*, Mr 9, 1844. See, further, S 5, 1844. A French description of the Astor House, translated from a French journal, is published in *The New Mirror*, I: 311. The hotel was finally closed in May, 1913. For recent developments on this site, see *Herald-Tribune*, D 1, 1925.

In this month, Purdy's National Theatre (see D 1839) re-opened as the Chatham Theatre.—Hawell's Reminiscences, 405; L. M. R. K., "*a memorial to Washington, to be erected as a State Monument* (see Ap 18), is projected. The design is one of "unequalled magnificence... Four hundred and twenty-five feet in the proposed height; and this, one of the papers states, will make it the highest building in the world—not quite correctly, as the pyramid of Cheops is six hundred feet high. To realize this prodigious elevation, however, one must remember that the steeple of the new Trinity church, which is to be the tallest in this country, will only reach to two hundred and seventy-five feet. It is not to be merely a monument, but an immense public building, containing halls, libraries, and other appropriate apartments. The shape is to be a pentagon, and the style a florid Gothic. Union-square is named as the site; but the immense size of the base, I should suppose, would require an area greater than an acre, not to mention an area of much more ground...—*Ev. Post*, S 6 and 7, 1843. See Ap 18; Je 17, 1844.

"Lucia di Lammermoor" is sung for the first time in New York, at Niblo's Garden.—N. Y. P. L. *Ballets* (1822), 884.

"The Queen of the West," the newest packet, recently launched from Brown & Bell's yard, for Woodhill & Muntarb, and which "exceeds others in strength, beauty, and convenience, as she does in size...," sails on her first voyage.—*Hone's Diary*, II: 193. See also a mention on Nov. 17 of the "Prince Albert," Grimell, Minturn & Co.'s "splendid new ship," which will sail on her first voyage the first of December.—*Ibid.*, II: 201-2.

"The Public Fountains.—The largest audiences we see in the city assemble nightly at the fountain at the Bowring Fountain of the Bowling Green Fountain. The lower part of the city is rendered completely impassable by the packed assemblages." The writer criticises the fountain, however, which is "a huge heap of rocks," and which, he says, was probably designed by "a well-digger or a mason." He suggests a new design—that of the "Fountain of Lerna at Corinth."—*New Mirror*, I: 399.

The oldest house on Manhattan Island at this time (according to *The Christian Intelligencer*) was the Kip mansion at Kip's Bay, on the 35th St., between First and Second Aves. "It was built for Jacobus Kip in 1655, and rebuilt in 1696, as marked on the front of the house. The house is now occupied, and is still owned, by one of the Kip family. [Mention is made of the previous occupants.]

"The Kip farm was originally 150 acres, and joined the farm of the Stuyveants on the river, and we believe of the De Lacey's in the interior of the island. When the Corporation shall open and regulate Thirty fifth street, it will take off about one third of the house. —"—*N. Y. Com. Adv.*, O 27, 1843. See 1851.

The foundation-stone of the new Grace Church (see Ap 25), at the north-east corner of Broadway and 20th St., is laid. From the church, St. Peter's Church, Oct 27.

The construction of the fountain in the Park is begun. It was
In this year, the Young Men's Christian Association was founded in London, by Sir George Williams.—Encyclo. Brit., XXXIII: 940-41. The first such association in the U. S. was organized at Boston in 1847 (q.v., D 20).

In this year, the N. Y. & Harlem R. R. was finished to William's Bridge on Bronx River, a distance of 14½ miles from the city hall. —Holley, The Picturesque Tourist, 56. See D 1.

In this year, the New York Gallery of the Fine Arts was formed, the purpose of establishing here a permanent collection of paintings, statuary, and other works of art. It received its charter in 1845 (q.v., My 13). The first act of the association was to purchase the gallery of Luman Reed. In 1849, it possessed about 100 paintings, including many by Cole and Durand, with several pieces of statuary and engravings. Prior to 1849, the gallery was in the Rotunda in the Park.—Belden, New-York Past, Present & Future, 116-17. The leading spirits in starting this establishment, besides Luman Reed, a wealthy art patron residing at 15 Greenwich St., were his son-in-law Theodore Allen, and his partner Jonathan Sturges.—Hove, Hist. of the Metropolitan Museum of Art (1912), 62-65.

In this year, the First Mariners' Methodist Episcopal Church, in Cherry St., between Clinton and Montgomery Sts., was founded. For view of this building, see Brown, Book of Old N. Y. (1873), 254. A large lithographic drawing of it was published by Endicott in Jan., 1845.—Eve. Post, Ja 10, 1845. Cf. the Mariners' Church erected in Roosevelt St. in 1819.—L. M. R. K., III: 930. For the floating chapel of the Methodists, see Je, 1845.

In this year, the first hydrostatic establishment in the United States was opened at No. 67 Barclay St., New York. Its proprietor, Campbell, published the Water Cure Journal.—Annals of N. Am., 590.

In this year, the Columbian Magazine made its appearance; it was discontinued in 1848.—North, Newspaper and Periodical Press, 117.

In this year, the Eclectic Magazine was established.—North Newspaper and Periodical Press, 117.

In this year, a volume of poems by Clement C. Moore, containing the first printing, in a book, of his well-known poem: "Twas the Night before Christmas," was published. See also Ag 16, 1750.

"Italian Opera.—Mr. Palmo, one of the most enterprising residents of the city, is pushing his project of a new theatre with great activity. The building which he has selected is in Chamber street, in a quiet and respectable neighborhood and is already in such a state of forwardness that it will be opened as early as the 31st of the present month." The internal arrangements are described.

"Mr. Palmo has very properly determined to number the different seats in the theatre, so that a person or family, when they have purchased a ticket, will be secured the possession of places during the whole evening. This is a decided improvement on the old plan, and will be an added accommodation to the audience."—Eve. Post, Ja 11, 1844. See also ibid., Ja 27, 29, 30, F 3, 1844. It was opened on Feb. 1 (q.v.).

The N. Y. Herald introduces a wood-cut portrait to illustrate a news report of a murder trial. See also ibid., Ja 18, and 22 (Supp.). Later, from time to time, in this year, wood-cut views of places and events, in the news, are appeared. Soon after, such illustrations were discontinued, and the "Herald," which, since 1838, had been published each Saturday.

The U. S. steam war- vessel "Princeton," now at New York, is visited by invited guests of Capt. Stockton. The steamer "is moved by Ericsson's propellers. . . . The machinery is under the water line, out of sight, and rendered impervious to shot by a covering of sheet iron.

"The big gun of Captain Stockton, which he calls the Peace-maker, weighs ten tons. . . . There is a small one on board the same vessel weighing only six tons and a half, which is called the Orangia, from its supposed tutelary spirit. . . ."—Mr. Palmo's theatre opened on Broadway, where the ladies don the Turkish costume, and are taught sparring and climbing in jackets and loose trousers.—"New Mirrors, II: 191.

1844

In this year, the American and British Art Associations were formed. For view of their first exhibitions, see Brown, Art, etc. (1844, 1845, 1846).

In this year, the New York State Library, in Broadway, was opened. It will be of great use as it is the first public library in New York. The library contains about 20,000 volumes. The subscription price is five dollars and the collection consists of fiction, and works on jurisprudence, science, art, and medicine. The library is open from 7 A.M. to 7 P.M. daily. —New York Times, Apr. 1844.

In this year, the New York Historical Society was organized with a capital of $10,000. It was incorporated under the name of the "New York Historical Society."—New York Herald, Apr. 20, 1844.

In this year, Mr. Palmo's theatre was opened on Broadway, where he is engaged in producing "The Devil's Castle," a new play by Mrs. Watts, and "The Pilgrim," a new play by Mr. Palmo. The theatre was managed by Mr. Palmo, and the dress rehearsal was attended by a large number of persons. The theatre was located at 67 Barclay Street. —New York Herald, Apr. 20, 1844.

In this year, the New York Times was founded. It was published by Mr. New York Times Co., a corporation organized under the laws of the State of New York. The first issue was published on April 18, 1845. The circulation of the paper was about 1,500 copies. The paper was published weekly and contained news, local and national, as well as articles on literature and art. The paper was sold for one dollar per year. —New York Times, Apr. 20, 1844.
THE ICONOGRAPHY OF MANHATTAN ISLAND

Philip Hone describes the appearance of the bay as seen from the Henry, Eills's Diary, II. 298: descript. of Pl. 137-9, III. 705.

"There are two buildings, in different parts of the city, in the occupation of the post office. The principal business of the office is conducted at a building [the Rotunda] having three fronts—two on the Park, one to the south and one to the east; and the other on Chamber, near Centre street. Part of this building was originally constructed for the exhibition of a panorama, ball and exhibit, to which a small addition was made, fronting south on the Park. It is in all respects wholly unfitted for the accommodation of the business of the post office, is old and dilapidated, and exceedingly unsafe, both as regards security from loss by fire, or depredation by robbers... This building belongs to the city corporation, to whom a rent is paid of $1,500 per annum, on an annual lease.

The broad post office is situated on the southwest corner of Exchange and William streets—is rented on an annual lease from the Exchange Company of $2,000 per annum. The security against robbers and fire in this building is considered in every respect sufficient. The Exchange is fire proof, and the site and fastenings render it a perfectly safe depository."—Exec. Docs., No. 178, 28th cong., 1st sess., Vol. V. See Ap. 10.

The common council passes resolutions of sympathy for the families and friends of those lost on board the steam-frigate "Princeston" (see F 28).—Proc. App'd by Mayor, XI: 199.

By this time the fish trade at Fulton Market had become so large that one part was called the "Fulton Fish Market," the other being known as the "Fulton Butcher Market." Since 1815, the fishermen and oystermen occupied a single building also used in 1844, were moved again into the same market.—De Voe, Market Road, 508, 512-14. For various structural changes, prior to 1862, for the accommodation of the fish dealers, see ibid., 514-16.

The legislation incorporates the "New-York Vaccine Institution," the purpose of which is the extermination of the small-pox, "especially among sailors, emigrants, indigent persons, those employed in manufactories, and children."—Laws of N. Y. (1844), chap. 145.

The legislation incorporates the "Odd Fellows' Hall Association of the city of New-York." Its object is "to provide suitable premises, by the erection of a conveniently sized edifice, for the accommodation of library and reading-rooms, apartments for natural history, science, and the arts, school, lecture and meeting rooms, and to provide for the education of orphan children" of members.—Laws of N. Y. (1844), chap. 145.

The legislation incorporates the "Protestant Episcopal Church Missionary Society for seamen in the city and port of New-York," the objects of which are "to provide by building, purchase, hiring or otherwise so many floating and other churches for seamen, at different points in the city and port of New York, as they may deem proper..."—Laws of N. Y. (1844), chap. 145. See F 15.

27. Austrian Coventry H. Waddell Sr., buys the plot of ground lying between 37th and 38th Sts., on the west side of Fifth Ave.—Liber Deeds, CDLIII: 80 and 81. See also Perris's Insurance Map, 1854. Here he built a suburban villa which became a famous social centre. The architect's perspective sketch is reproduced as Pl. 129-9, Vol. III, and some particulars are given regarding it, III: 692-94. It was of "yellowish gray stucco with brownstone trimmings," writes Mrs. Lamb. The house "was finished in a style of costly elegance, and a large conservatory and picture gallery were among its attractions. From its broad marble hall a winding staircase led to the tower, from which a charming view was obtained of both the East and Hudson rivers, the intervening semi-rural landscape, and the approaching city..."—Hist. City of N. Y., II: 716. It had "orchards and gardens and a spacious conservatory of plants, native and exotic," says Lossing, adding: "Mr. and Mrs. Waddell were leaders in fashionable society in New York. He was a brilliant man and a confidential friend of President Jackson, who gave him public employments that made him rich. He was frank and generous, and always displayed a princely hospitality. His house was the scene of notable entertainments. At Mrs. Waddell's parties one was sure to meet every celebrity, American and foreign, who chanced to be in the city at the time. The house was superbly furnished. It had a large marble hall and a spacious conservatory..."
The city authorities were reluctant to adopt this act; it was presented in the Board of Aldermen for adoption as an ordinance on the 7th, was passed again on July 30, without success. Then the common council made an ordinance of its own which gained the approval of the mayor on Nov. 29 (q.v.). The legislative act was then amended May 13, 1846, by Laws of N. Y. (1846), chap. 302; and on April 11, 1849, by ibid. (1849), chap. 436.

The legislature passes an act intended to transfer the public buildings to the Washington Monument Association (see Ap 18, 1849) of all the money collected by the trustees, etc. appointed under an act in commemoration of the services and in honor of the memory of George Washington," passed April 26, 1833 (q.v.— Laws of N. Y. (1844), chap. 398.

The legislature incorporated the "Eastern Collegiate Institute of the City of New York," to be located in the Seventh Ward. It "shall be subject to the visitation of the regents of the university."—Laws of N. Y. (1844), chap. 398.

The common council requests ex-Mayor Morris to sit for a portrait, to be placed in the governor's room.—Proc. App'd by Mayor, XI: 166.

The annexation of Texas to the United States is now the question which regulates all our policies. . . .—Hone's Diary, II: 221. It was carried by the senate in Feb., 1845—ibid., II: 243.

See J a 7, Mr 3, 1845.

The "Polka."—This celebrated dance, which seems to have turned the heads of the fashionable people in Paris, is soon to be taught in this country. Mr. Gabriel Korkyany, of Ramouqua, has recently arrived from Europe, and is making preparations to teach our citizens the mysteries of the new movement. He is a Hungarian by birth. . . .—Even. Post, My 25, 1844. See also ibid., Je 18, 1844.

"The Trustees of the 'Washington Monument Association,' for the accomplishment of the object confided to their care, have adopted a plan, prepared by Mr. Calvin Pollard, of this city, architect, and have placed in the hands of respectable individuals, subscribers on lists, from which they hope to obtain funds sufficient to commence the edifice and ensure its completion."—Even. Post, Je 17, 1844. See, further, My 8, 1847; Ja 10, 1848; F 2, 1849.

John Fintard dies at the age of 86.—Even. Post, Je 22, 1844.

"Building in New York.—For many years there has not been observed any thing like such activity in building as now prevails in this city. One of our citizens, recently returned after an absence of seven months, remarked to us this morning that the altered appearance of Broadway quite astonished him. There are many buildings of the largest and most expensive description going up at various points of that thoroughfare, and a greater number of the same character are far advanced to a state of completion. Among the latter the pile of brick and granite, on every warm evening, on every corner and square hundred and sixty feet in front, opposite the Church of the Messiah [probably the New York Hospital—see D J], strikes the attention as an evidence of the very rapid advance in this respect.

Further on, also, at a point which five years ago, was quite out of town—we mean Union Park—begin to appear the splendid shops which have, until lately, been confined to the lower end of the city. The number of auspicious dwellings in this vicinity has much increased during the past winter and spring. There are two edifices now constructing on Broadway, which, when finished, will constitute the finest features in the much admired view it presents. The first is the beautiful Gothic church of the Trinity, at the head of Wall street, the tower of which already has risen to an imposing appearance as you turn the angle of Broadway at two miles distance. The other is Grace Church, in which considerable progress has been made. This structure, being built of white marble, and situated at the turn of the street, will show to great advantage, even some two miles down Broadway."—Even. Post, Je 22, 1844. Regarding Grace and Trinity Churches, see also ibid., Ap 24, 1845.

Woodlawn Cemetery at Manhattenville, extending from Tenth Ave. to the Hudson River, between 153d and 156th Sts. (see S 22, 1842), is advertised as open for use by all denominations. Its rules and regulations are published.—N. Y. Com. Advo., Je 25, 1844.

 Mrs. Tyler arrives at New York for his marriage.—Even. Post, Je 26, 1844. See Je 16.

 John Tyler, president of the United States, is married to Miss Julia Gardiner, eldest daughter of the late Hon. David Gardiner, of New York (see F 28), in the Church of the Ascension, on Fifth Avenue. The marriage service was performed by Bishop Onderdonk.—N. Y. Com. Advo., Je 27, 1844. The Gardiner residence was one of the "Colonnade Row," on Lafayette Place.—Am. Ann. Rep., Am. Scenic & Hist. Pres. Soc. (1917), 140-42. This was the first marriage of a president of the United States during his term of office.

"It appears from an abstract of the report of the Croton Aque- duct Board . . . that there are south of the distributing reservoir in Forty-second street, 150 miles of pipe laid, supplying about 310,000 inhabitants, equal to one mile for every 2000 inhabitants. These pipes supply 600 free hydrants and 1500 fire hydrants. The capacity of latter is such that 200 only will discharge all the water which the pipe over the basin now delivers. It is also probable that there is imminent danger in unrestricted use of the water that the reservoirs will be emptied, and the city exposed to the horrible calamity of a short allowance of water, more especially as the pumps and the means by which they were formerly supplied are rapidly going out of repair. The report states that this danger has already been imminent, on the occasions of extraordinary use of the fire hydrants, the surface of the reservoirs has sunk several feet. When the high bridge is complete the means of supply will increase. Some restraints are, therefore, proposed on the use of the fire hydrants." The revenue from the water for the past year was $324,625.31.—Even. Post, Je 26, 1844. See D 14.

The N. Y. & Harlem R. R. has just been completed from July Williamsbridge to Tickauke Mills, six miles from White Plains.—Even. Post, Jl 2, 1844.

A treaty is signed between the United States and China.—Winnos, VII: 509.

"The heats of summer are upon us, while some are leaving town for shady retreats in the country, others refresh themselves with short excursions to Hoboken or New Brighton, or other places among the beautiful environs of our city. If the public authorities, who expend so much of our money in laying out the city, would do what is in their power, they might give us a vast population an extensive plane of ground for shade and recreation in these sultry afternoons, which we might reach without going out of town.

"On the road to Harlem, between Sixty-eighth street on the south, and Seventy-seventh street on the north, and extending from the Third Avenue to the East River, is a tract of beautiful woodland, comprising sixty or seventy acres, thickly covered with old trees, intermingled with a variety of shrubs. The surface is varied in a very striking and picturesque manner, with craggy eminences, and hollows, and a little stream runs through the midst. The swift tides of the East river sweep its rocky shores, and the fresh Monmouth stream, in its every summer afternoon, over the restless waters. The trees are of almost every species that grows in our woods. . . . There never was a finer situation for a public garden of a great city. Nothing is wanted but to cut winding paths through it, leaving the woods as they now are, and introducing here and there a jet from the Croton aqueduct, the streams from which would make their own waterfalls over the rocks, and keep the brook running through the place always fresh and full. . . ."

"As we are now going on, we are making a belt of muddy docks all round the island. We should be glad to see one small part of the shore without them, one place at least where the tides may be allowed to flow pure, and the ancient brim of rocks which borders the waters left in its original picturesque and romantic condition is devouring inch by inch the coast of the island, and if we would rescue any part of it for health and recreation it must be done now."—Even. Post, Jl 1, 1844.

Washington Hotel, at the south-east corner of Broadway and Reade St., formerly called Washington Hall, is destroyed by fire.—N. Y. Com. Advo., Jl 5, 1844. See Ap 7, 1845.

Second Presbyterian church at the southwest corner of University Place and 17th St. is building.—N. Y. Com. Advo., Jl 13 and 18, 1844; L. M. R. K., III: 932. See, further, Je 12, 1845.

Workmen are making progress in taking down the First Presbyterian Church on Wall St.—Even. Post, Jl 20, 1844. The church having been sold, it is to be re-erected on the highest site in Jersey City.—N. Y. Com. Advo., Jl 24, 1844, and see descrip. of Pl 105, III: 695. It was purchased for $5,000 by a Presbyterian congregation in that city, for re-erection at the corner of Washington and
THE ICONOGRAPHY OF MANHATTAN ISLAND

Sussex St.-The ground, including the cemetery, on which the church stood in Wall St., has since been divided into five lots, and sold for $115,000.—Coun. Courant (Hartford), Jl 27, 1844; L. M. R. K., III: 931; 22 Ann. Rep., Am. Scenic & Hist.Pres. Soc. (1917), 567-667; Greenleaf, 134; Man. Com. Coun. (1866), 559. In 1853, the tall spire of the reconstructed church in Jersey City could be seen from New York, overtopping all other buildings.—The Stranger’s Hand-Book (1853), 110. The congregation at the old First opened its new house of worship on Fifth Ave. on Jan. 11, 1846 (q.v.), the cornerstone of which was laid in Sept. 1844 (q.v.).

The cornerstone of the Church of the Holy Communion, at the north-east cor. of Sixth Ave. and 20th St., is laid. This church is to be built by Mrs. Rogers, widow of John Rogers, on ground belonging to his estate, and it is intended, "to have it secured in perpetuity as a free church."—The Churchman, Jl 27, 1844. The building was "erected in 1845."—A Picture of N. Y. (1846), 139. In May, 1846, it was sufficiently near completion to be used for public worship.—Life and Work of William Augustus Muhlenberg, by Anne Ayres (1889), 177-79. For description and view, see Pl. 129-b, Vol. III; see also a view of 1845, drawn and engraved by T. D. Booth, in the Evergreen, Vol. V, and another in Emmet collection (1835-1850).

The Long Island R., "which is all but completed," is opened to Greenport, "its eastern termination on the Island," for a party of invited guests. It was open for passengers on July 29.—Even. Post, Jl 25, 26, and 29, 1844.

The magnificent new edifice of Trinity Church is nearly complete. It was 246 feet high—twice the height of the old one.—Coun. Courant (Hartford), Jl 27, 1844.

"St. Thomas’ Church, in Broadway, is about to be remodelled in its interior, at an expense of $10,000. $8,000 have already been subscribed."—Even. Post, Ag 8, 1844.

The “Postmaster General has completed arrangements for the occupation, for a post-office building, of the fine lot of ground occupied by the Middle Dutch church—the congregation having built a new church up town. The church ground extends from Liberty to Cedar street, on Nassau, and extends about 200 feet on the two former streets. It is, consequently, open on three sides. If we are correctly informed, the government pays $400 per annum, and an association of merchant pays $1000 to the church per annum for the keeping of property. The church is allowed as a means to make a convenient and handsome edifice for the office. The branch office in the Exchange is not to be discontinued, for a while at least."—Even. Post, Ag 10, 1844. See also Man. Com. Coun. (1844-45), 261; Home’s Diary, II: 241. See, further, Ag 11: Jl 17, 1845.

The Middle Dutch Church, on Nassau St., is used on this Sunday for the last time as a place of worship, after an occupancy of 111 years. The valedictory sermon is preached by Rev. Dr. Knox.—N. Y. Com. Adv., Ag 23, 1844; Great Metropolis for 1846, 58; De Witt, Discourse delivered in the North Reformed Dutch Church . . . in Ags., 1836, 83. See also Vol. I, p. 262. Having been rented to the general government for use as a post-office, the work of transforming the edifice began in this month.—N. Y. Com. Adv., Ag 22, 1844; descr. of Pl. 170-a, I: 655. For its subsequent history, see L. M. R. K., III: 935; Man. Com. Coun. (1858), 616. See Jl 27, 1845.

An engraved view of the old Lawrence monument in Trinity churchyard (see 1813), showing it ruined by the elements, is published in the New Mirror, III: 305. This graphic illustration, after repeated pleas, finally led, in 1847 (q.v.), to the erection of the present bronze monument.

The corner-stone of the First Presbyterian Church is laid on the north-west corner of Fifth Ave. and 11th St. (see Jl 20—22d Ann. Rep., Am. Scenic & Hist. Pres. Soc. (1917), 664. The church was erected during 1845—Greenleaf, 134. For description, see Picture of N. Y. in 1846 (1846), 229; see also L. R. K., III: 931. See for its opening see Jl 11, 1846.

The common council directs a special committee "to inquire into the expediency of establishing a Railroad in and through Broadway, to belong to the City, and the whole profits thereof to be applied to the payment of the public debt, and to that end, into the expediency of prohibiting all stages and omnibuses in Broadway after said Railroad is completed."—Proc. App’d by Mayor, XII: 728. The extension of the N. Y. & Harlem R. R. to White Plains has been completed, and a special train, carrying the officers and directors and their guests, "will go over the track this afternoon."—N. Y. Com. Adv., O. 26, 1844; N. Y. Adv., Reg. 1845. By June 1, 1847, it was extended to Croton Falls, and, by Dec. 31, 1848, to Elmhurst Plain, as its southern limit—The New York Times, July 12, 1847. A great Whig demonstration takes place.—Even. Post, II: 233. John K. Kellogg and George M. Dallas, Democrats, are elected president and vice-president, defeating the Whig candidates, Henry Clay and Theodore Frelinghuysen.—McKee, National Conventions and Platforms, 47-57.

John Quincy Adams, member of congress from Mass., attends the annual meeting and banquet of the N. Y. Hist. Soc.—John Quincy Adams, ed. by Cha. Francis Adams (Phila., 1825), XII: 180; Even. Post, N. 21, 1844. The society’s fortieth anniversary is celebrated, the address being delivered by J. Roney Brodhead.—Even. Post, II: 238.

"The Bohemian Girl" is performed for the first time in America, at the Park Theatre, Brooklyn, Dec. 1844. Mayor Harper approves an ordinance passed by the common council to establish "a Municipal Police, or Night and Day Watch." This differed decidedly from the act passed by the legislature (see My 7). The old "Watch Department" was retained from which 200 "suitable men" were to be drawn for the new establishment. Indeed, the old organization was not to be affected in any way except as "Watch Posts" might need to be altered to "conform to the diminution of that force by transfers into the Municipal Police hereby established."—Proc. Bd. of Ald. (1845), 52-53; Decs., Ed. of Ald. (1844), XII: 249-53. See D 16, 1844; Jl 13, 1845.

The New York Hotel, at 721 Broadway, between Washington Dec. Place and Waverly Place, opens.—N. T. Herald, Mr 10, 1845.

The common council authorizes the committee on public offices and repairs "to have the writing table now at the Alms House, Bellevue, known as General Washington’s writing table placed in the Governor’s Room, City Hall, and such other property and relics as may come to their knowledge as belonging to the City,"—Proc. App’d by Mayor, XII: 200.

The Right Rev. Benjamin T. Onderdonk, Bishop of New York, is brought to trial before a court of Protestant Episcopal bishops, "on charges of irregularity and impiety." The trial was held in the upper room of the Sunday-school building attached to St. John’s Chapel and continued until Jan. 3, 1845. Bishop Onderdonk was found guilty by a majority of the court and suspended from office.—Proceedings of the Court . . . for the Trial of the Right Rev. Benjamin T. Onderdonk, D.D., etc. (N. Y., 1845).

Dwellings to the number of 6,175 are now supplied with Croton water. "The works are in good order, and fully equal the expectations of those who superintended the construction."—Even. Post, D 14, 1844.

The common council orders that the committee on public offices and repairs cause the room in the city hall formerly called the "Tea Room" to be "fitted up with shelves and glass cases, and that the said room be hereafter used as a Library, and place of deposit for the archives, presents, valuable books, and other property of the Common Council of a similar description, and be placed under the care of the Clerk of the Common Council, subject to be used however for a Committee Room;" $30 is appropriated for this purpose.—Proc. App’d by Mayor, XII: 220.

In this year, the Naval Academy at Annapolis was founded. Geo. Bancroft was secretary of the navy.—Winson, VII: 466.

After visiting New York in this year, an English woman published the following observations: " . . . It is very much the custom (originally Dutch, I believe) for all the world to change their residence on the first of May, and consequently the whole city undergoes a thorough purification and cleansing . . . ."
She also observes that "the ferries at New York... are admirably managed, and occasion but very trifling inconvenience to persons living at Brooklyn, or on the opposite shores of New Jersey. The stage from which you enter the ferry boat is loose, and rises and falls with the tide; you enter on foot into shelter, or otherwise drive into the boat in your carriage without the least difficulty, danger, or inconvenience, and are landed on the opposite side of the river, without getting from your carriage, or helpless in any way to the heat or inclemency of the weather."—An English woman in America, by Sarah Maury (London, 1848), 163-66.

Grant Thorburn writes of New York in this year: "Public stores cover the spot where lately towered the weather-beaten spire and the Western church, at the intersection of Broad and Nassau streets, between Nassau and William-streets, where stood the Presbyterian church, are now stores of cotton and bags of wool. The Lutheran, known by the name of Labagh's church, in Nassau, near Maiden-lane, is occupied by Dummer and his tea-ports of China. Already has commerce fixed her Argus-eyes on the Middle Dutch and Scotch Presbyterian churches in Cedar-street..."—Grant Thorburn's Reminiscences (1845), 155, 154.

About 1845, John Jacob Astor built a residence for his daughter, Mrs. Walter Langdon, on a piece of property having a frontage of 250 ft. on Astor Place and the same on Lafayette Place (the south-west corner). Its courtyard, shut off from the latter street by a high wall, was laid out as a garden, with large trees. After Mrs. Langdon's death, the house was occupied by her daughter, Mrs. Matthew Wilks. It was taken down in 1875—Old Buildings of N. Y. City, by Wm. F. Mott (1897), 46. See 1849.

About this time, the Vauxhall Garden had a gate on the Lafayette Place side and one on the Bowery side. A "merry-go-round" was one of its amusements.—Haves, Diary of a little girl in Old New York (1919), 2.

About this year were issued two lithographic views of Broadway hotels, one of the Howard Hotel, corner of Maiden Lane, and the other of the Franklin House, at 197 Broadway, corner of Dey St. These are reproduced and described as A. P. 25, Vol. III. Cf. Jl. 1, 1846.

Valentine's Manual for 1845-6 contains a map of the city, compiled from the latest surveys; a view of the city hall (frontispiece), one of the hospital (p. 257), and others.

In this year, James Lenox began to form his valuable library.—Stevens, Recollections of Jas. Lenox, 2, 18 et seq.

In this year was published a volume of the Laws and Ordinances of the common council.

During 1845-52, the American Whig Review was published by Crow and Whedley.—North, Newspaper and Periodical Press, 118.

In 1845, one could pick blackberries along the highway where now Madison Ave. crosses 35th St. On Fifth Ave., nearly opposite the distributing reservoir, at the e. cor. of 40th St., was a small country-house built of wood painted yellow, and surrounded by trees and shrubbery, where ice-cream and other refreshments were furnished—Leslie's, Hist. of N. Y. City (1884), II: 603; view of the "Croton Cottage" in Man. Com. Cens. (1866), 456; Fifth Avenue (pub. by the Fifth Ave. Bank, 1915), 36, 37.

In this year, Wm. Gowans, of New York, a dealer in rare Americana, began the publication of Gowans' Bibliotheca Americana, a series of reprints of rare old books and pamphlets relating to the early settlement of North America. The series consists of the following books:

- New York: 1854, edifice to be used as a post-office and courthouse, 25th St. (pub'd in 1860), Chas. Woolsey's journal in New York; II (pub'd in 1860), Chas. Woolsey's journal in New York; III (pub'd in 1862), Miller's description of New York; IV (pub'd in 1862), Thomas Budd's Good Order Established in Pennsylvania and New Jersey; V (pub'd in 1866), George Alsop's A Character of the Province of Maryland. Several of Gowans' early trade catalogues are in the N. Y. P. L. In the author's collection is one of 1852, containing a street plan showing the location of his book-store in the Canton Bldg, on the west side of Centre St., bet. Worth and Leonard Sts. The same plan shows the Harlem R. R. depot at the n. cor. of Centre and Franklin Sts.

The editor of the Com. Adv. receives "a large lithographed design for the proposed Washington monument," by Robert Kerr of Boston; plans for building the church in Prospect Park, "a large edifice with towers, a lounge or promenade, to rest on a stylebase of basement steps, to be of a circular form, surrounded by a colonnade with galleries and terraces, an enriched dome and spire." [It is further described.]—"N. Y. Com. Adv.," 4, 1845. The lithograph is reproduced as A. P. 26-b, Vol. III.

"The Broadway Journal.—The first number of a new weekly... has this morning been laid upon our table. It is a sheet of sixteen pages, neatly printed in two broad columns. The articles, which are all original and generally well-written, relate to literature and the stage. Among the contributors we find the names of Mrs. Child and James Russell Lowell."—Eve. Post, 4, 1845.

Gen. Lamar, ex-president of Texas, is in New York. On Jan. 8, he received visitors in the governor's room of the city hall.—Eve. Post, Jan 7, 1845. See Mr. 3.

It is resolved by the common council that measures may be taken immediately "to prevent any interference with the enjoyment of the citizens of this city, and to prevent "encroachments upon the property of this City along the Brooklyn shore," as well as "to remove trespassers therefrom."—Proc., App'd by Mayor, XII: 237-38.

"The New Post Office.—The post office department last summer... (1844), leased the Middle Dutch Church for seven years, at the moderate sum of $5000 per annum. The property is estimated by the Consistory to be worth $200,000. The building has been altered and fitted up in a very handsome and convenient manner, under the direction of our postmaster, Col. Graham, and will be opened the latter part of this or the beginning of the next month, for the transaction of business..."—The New Post Office.

"The post office is situated on a spacious lot, bounded by Liberty and Cedar streets; on the north, by Cedar street; and on the west by Nassau street. The lot which contains a large number of vaults belonging to the congregation of the Middle Dutch Church, is surrounded by a strong iron railing, and iron railings are built around the vaults which protect the tomb stones from being defaced or injured by wanton or sacrilegious hands.

There is a large gateway on Cedar street, which opens the front of the office, in which there are three doors leading to the 'box delivery.' On the front of the office a large and handsome portico, supported by pillars has been erected for the protection of those who have business at the box delivery. On Nassau street there are six gates which afford entrance to the box delivery, general delivery, ladies' window, mail carriers' door and window, newspaper delivery and editors' boxes. A handsome verandah with glass windows extends the whole length of the building on Nassau street, which affords protection from the inclemency of the weather to all who have business at the windows, without excluding the light from the post office. On the east side there is a covered passage enclosed in glass, which leads to the offices of the cashier, postmaster, and transcript office, city despatch, and editors. The building is of stone, exceedingly plain, but substantial,—the architecture having no claim to ornament or beauty. It has been recently painted, and is a tolerably good imitation of granite. Its dimensions are one hundred feet by seventy-five, exclusive of the tower and the two wings which have been added for the reception of the mails. The tower, which is about one hundred feet high, contains a clock, and an alarm bell weighing 2000 lbs., placed there by the corporation of the city. The roof originally shingled is now covered with metal, which renders the exterior of the office nearly fireproof.

"On entering the front of the office you find a spacious hall with a marble floor, in which are placed two large stoves, the pipes of which passing into drums, warm also the Postmaster's room. The cashier's offices in the second story. Here is a range of letter boxes, extending the whole length of the hall, numbering three thousand two hundred and twenty six, from which there are five places of delivery. Over the centre of the boxes, there is a fine clock which runs 375 days, made by A. D. Crane.

"Such an imposing array of boxes shows at once the vast amount of business done in this office, especially when we take into consideration that there are nineteen mail letter carriers, who deliver their letters two or three times a day, besides twelve persons employed in delivering the City Despatch letters.

"In entering the office on the left of the Box Delivery, we approach the Assorting Department, where the letters are separated and delivered to their respective departments, viz: those which belong to the General Delivery, the boxes, and the carriers. There are opposite the General Delivery windows, two large triangular alphabetical boxes, which turn upon a pivot, so as..."
1788

THE ICONOGRAPHY OF MANHATTAN ISLAND

1845
Jan. 17

to face the delivery clerk—one contains the letters from A to J, and the other from J to Z. In these alphabetical boxes are placed all the letters, by which the carriers’ door and delivery is next to this, at which they attend on Sundays for the delivery of their letters. Adjoining this is the Newspaper Delivery, and the editors’ boxes, to which they have access at all times, both by day and by night.

Next to these, and in the centre of the building, there is two long ranges of boxes placed on tables, extending nearly the whole length of the office in which the mail letters are distributed, but to their being mailed, and opposite to them are eight large tables which are appropriated to the assorting and making up of the mails. Here is a partition separating the letter from the newspaper distribution. Also on the other side of the office are three circular tables, surrounded with framework on which three tiers of mail bags may be suspended for the reception of newspapers as they are distributed at the tables. In front of the box delivery are two large tables on which the letters are examined and the rates corrected, previous to their being deposited in the boxes.

“The north end of the building, a portico is erected to shelter the mails which are received and delivered at a large door in the basement of the tower, on either of which there are two wings containing fire proof rooms, where the mails are securely deposited until they are taken into the office for distribution. On the east side there are several rooms enclosed in glass, one of which is devoted to the use of the Despatch Carriers,—another as a wash room—and two entrances, one for the clerks of the office, and another to the cashier’s and postmaster’s rooms in the second story, which are approached by a spiral stair case. In the south end of the building are several fine rooms, which are occupied as the cashier’s office, containing a large iron safe in the massive wall, which is four feet thick; adjoining his is the postmaster’s room for public business, which communicates with his private room, where is also the magnetic telegraph, by which intelligence is conveyed to and from the Branch Post Office in Chatham square, and also to his residence in Eighth street, which is about two miles from the office.

“The west side of the second story has a large room where all letters are rated, stamped, and made ready to be mailed. There are also next to this two rooms devoted to the night clerks, adjoining which is one for the use of the letter mail clerks, and is approached from their lower office by a spiral staircase, by which means the carriers are kept distinct from the other parts of the office to which they have no access. ..

The lights in the building of the Post Office, and for the want of which the clerks have heretofore suffered in all the places occupied in this city, a spacious skylight, fifty-five by fifteen feet has been constructed in the ceiling and roof of the building, which gives ample light for the transaction of the business of the office.

“It may be added that Croton water is brought into each end of the building, and is furnished with hose and pipes, that any fire which might occur could be extinguished by the night clerks in a few minutes. Everything which could be done for the safety of the building has been accomplished, and every part has been fitted up with a view to facilitate the business of the office and afford satisfaction to the community. ..

Congress fixes the first Tuesday after the first Monday in November as “a uniform time for holding elections for president of the United States and Vice President for all the States of the Union.”

1847

The new post-office in the Middle Dutch Church (see Ja 12) and the branch office in Chatham square are opened for business.

The old offices in the Rotunda and the merchants’ exchange are discontinued.—Eov. Post, F 4, 1845; descript. of Pl. 170-b, III: 697; and descript. of Pl. 150-b, III: 725. See also Stone, Hist. of N. Y. City, 516, and Append. IV; Thorburn’s Reminiscences (1845), 258-61.

Fire destroys the building at 158 and 160 Nassau St., including the building at the corner of Spruce St., occupied by the N. T. Tribune—N. T. Tribune, F 6, N. T. Herald, F 6, 1845.

“Graham, the famous lecturer on bran-bread and squashes, lectures to-morrow evening at Clinton Hall, on the water-cure humbug. A glass of branly added to the water neutralizes the humbug completely.” —N. T. Herald, F 6, 1845. See also Je 11, 1845.

A “goodly number of friends of the project of erecting a new and capacious Opera House in the upper part of the city” meet at the New York Hotel. P. G. Stuyvesant having offered “a long lease of a highly eligible site, at an inconceivable yearly rent,” a committee is appointed to accept the offer and to solicit subscriptions.—Eov. Post, F 10, 1845. This probably led to the erection of the Astor Place Opera House.

J. Romeyn Brodhead, who was appointed agent of the state of New York under an act of the legislature, passed May 2, 1839 (9. v.), “to procure and transcribe documents in Europe relative to the Colonial History of this State,” makes his report to the governor. This was transmitted to the senate by the governor on Feb. 21, and published this year. It consists of a Calendar to the Holland Documents, in the office of the secretary of state at Albany, transcribed in 16 vols. (MS,) from the originals, in the “Royal Archives” at The Hague, and the archives of the city of Amsterdam; a Calendar to the London Documents, in the office of the Secretary of State at Amsterdam; a Calendar to the London Documents, in the office of the Privy Council at the British Museum, and the British Library; and the Archbishop of Canterbury at Lambeth (in London); and a Calendar to the Paris Documents, in the office of the secretary of state at Paris, transcribed in 17 vols. (MS,) from the originals in the archives of the “Ministère de la Marine et des Colonies,” of the “Ministère de la Guerre,” and in the “Bibliothèque du Roi,” at Paris.—General Introduction to N. Y. Col. Docs, 1: xi-xii.

These were published, in accordance with the provisions of the act of March 30, 1839 (9. v.), entitled “An act to provide for the publishing of certain documents relating to the Colonial history of the state;" and the act of April 12, 1856, entitled “An act in relation to the Colonial history of the state, and the publication and distribution thereof.” The documents in Dutch and French were translated by E. B. O’Callaghan.—Ibid., 1: title-page (with verso), and alii-ixv. Publication dates and contents are as follows:

II (1858)...

III (1853),...

IV (1854),...

V (1855),...

VI (1856),...

VII (1857),...

VIII (1858),...

IX (1855),...

X (1858),...

XI (1861),...

These were supplemented later by the following:

Vol. XII (1877), comprising Documents relating to the History of the
Dutch and Swedish Settlements on the Delaware River [1642-84], translated and compiled from Original Manuscripts in the Office of the Secretary of State, at Albany, and in the Royal Archives, at Stockholm, By Berthold Fernow, keeper of the historical records.

Vol. XIII (1881), comprising Documents relating to the History and Settlement of the Towns along the Hudson and Mohawk Rivers (with the exception of Albany, from the New-York State Library and the Department of State, New York; and the compilation and editing of the settlers with the Indians, translated, compiled and edited from the Original Records in the Office of the Secretary of State, at Albany, and other sources, under direction of the Honble. Joseph B. Carr, Secretary of State, by B. Fernow.

Vol. XIV (1882), comprising Documents relating to the History of the Dutch Colonial Settlements principally on Long Island (1624-1683), with a map of its Western part, made in 1666; translated, compiled, and edited as Vol. XIII was. (This volume contains records of several land grants, etc., on Manhattan Is.)

Vol. XV (1889), comprising New York in the Revolution, prepared under direction of the Board of Regents, by Berthold Fernow.

This is the date of the last daily issue of the New-York American (see S 15, 1814). The last semi-weekly issue was Feb. 17, after which the paper was closed by the Secretary & Enquirer.—Letter from Clarence S. Brightman to the author. See also description of Pl. 115, III: 618.

The National Hotel opens at No. 5 Cortlandt St., on the site of the old York House. The building is described.—Eve. Post, F 20, 1845.

In a recent report to the house of representatives, Henry C. Murphy, of the committee on military affairs, reviews briefly the martyred

of the prison-ships, and presents the results of an inquiry into the propriety of erecting a proper sepulchre for the bones now lying at the Wallabout. These remains have been preserved for more than 40 years through the care of the late Benjamin Romaine (see J l 4, 1839), who during that time owned the ground which had been given by Samuel Jackson, of Brooklyn, for the purpose of placing there, in 1808, a temporary vault. See 1842. As a result of this report, the committee of congress reported in favour of a joint resolution to give the remains a proper burial.—See Rep. No. 176, House of Rep., 18th cong., 2d seas. The copy of this report in the N. Y. P. L. (catalogued under "United States Military Affairs"), is inscribed: "This report was written by me, H. C. M."

"Progress of the City.—The growth of the city in the upper wards is astonishing. Whole streets of magnificent dwelling houses have been erected in the vicinity of Union Square within the last year, and some half dozen elegant churches are in process of erection near the same neighborhood. The Fifth avenue is rapidly filling up, and in the course of a few years will be one of the finest streets on the continent. Fourteenth street, running from river to river, is a noble thoroughfare and is now nearly the centre of the fashionable faubourgs, whilst a year or two since it was quite the boundary line of the city in that direction. . . . "—N. Y. Herald, F 16, 1845.

M. Mondary Van Schaick addresses to Aldermen James Palmer, Charles Henry Hall, James B. Murray, Henry Meigs, Assistant Alderman Peter S. Titus, "and the other friends of the Croton River project in the Common Council of 1831," a communication entitled "A Relation of the Measures which were Adopted for the purpose of Supplying the City of New York with the Water of the Croton River." See also F 15, 1845.

The legislature continues for five years longer the relief extended by act of April 27, 1840, to the Institution for the Instruction of the Deaf and Dumb.—Laws of N. Y. (1842), chap. 14.

Congress, by joint resolution, which the president confirms, annexes Texas, such resolution going into effect on July 4. In December, Texas was admitted as a state.—Winso, VII: 251, 506. The President, for the erection of fine buildings, on the 5th avenue, as far out as Murray Hill. The whole of the Sixteenth Ward will soon be covered with fine houses, and the time is much closer at hand than we are aware of, when the Distributing Reservoir will be one of the public squares and promenades of the city itself.

"At the present rate of increase, New York with its environs will contain in 1865, a population of one million; and in 1877 . . . it will count up two millions of people.

Who so blind as not to see that New York will always be the

Hudson River, north of Castle Garden, between six o'clock in the evening and six o'clock in the morning.—Laws of N. Y. (1845), chap. 31.

The legislature, by act of April 27, 1840, having granted a loan of $10,000 to the Am. Seaman's Friend Soc., now permits the society to retain the sum without interest so long as its trustees shall use it "to promote the benevolent objects of the Sailors' Home, and the promotion of seamen in this city.—Laws of N. Y. (1845), chap. 37. A letter describing at length and praising the Sailors' Home, on Cherry St., was published in the Com. Adv., Mr 24, 1845; see ibid., Mr 26, and Ap 6, 1845.

Horse's Telegraph.—The room for the exhibition of the electric telegraph presents one of the most attractive and interesting lodgings in this city. Just step up stairs at 115 Broadway, and be delighted, instructed, and astonished by the working of this magical means of communication."—N. Y. Herald, Mr 29, 1845.

The common council orders "That the stone trackways now laid in Broadway be taken up and cut in pieces from two to four feet in length, and re-laid crosswise, and that a sufficient quantity of stone be procured in addition thereto to complete the two most central tracks from three to four feet in width, and the other trackways from two to three feet in width;" the sum of $570 is appropriated for the work.—Proc. App'd by Mayor, XII: 721.

The corner-stone of the burned Washington Hall (see J I 4, 1844), which was laid at the corner of Broadway and Read's St. in 1809 (p. v., J I 4), is removed from the ruins.—Eve. Post, Ap 7 and 8, 1844. This prompts Philip Hone to record: "The site of Washington Hall, in Broadway, between Chambers and Reade streets, was lately sold by the heirs of Mr. John G. Coster to A. T. Stewart, who is preparing to erect on the ground a dry-goods store, spacious and magnificent beyond anything of the kind in the New World, or the Old either, as far as I know. . . . "—Hone's Diary, II: 245. Here Stewart built (see S 10, 1846) the great retail store with marble front, which still stands as the well-known "Stewart Building." Stewart's project supplanted efforts already under way, started by Charles Cushman in 1842, to erect a theatre on the site.—Eve. Post, My 7, 1842. In 1917, the Stewart building was purchased by Frank Munsey as a publishing-house for The Sun.—N. Y. Times, O 10, 1917; O'Brien, The Story of The Sun, 453.

Wm. F. Havemeyer, the Democratic candidate for mayor, is elected.—N. Y. Herald, Ap 9, 1845; Man. Com. Court. (1845-6), 397. He succeeds James Harper.—See Ap 9, 1844. He was succeeded by Andrew H. Mickle.—See Ap 14, 1846.

The legislature appropriates $5,000 annually for five years for the relief of the N. Y. Institution for the Blind.—Laws of N. Y. (1845), chap. 58.

"According to the City Inspector, it appears that 1210 buildings have been erected within the precincts of the city itself during the past year, and 900, as we are credibly informed, in Brooklyn, which is to all intent and purposes as much a part of New York as Southwark and Kensington are of London, or the Faubourgs are of Paris.

"Though the number of houses actually built may have equalled this in former years, the quantity of brick laid and of ground covered is vastly greater than it has been in the same space of time. The houses generally are of a better style of finish; many of them costing from $200,000 to $400,000, and a few, perhaps, as high as $500,000.

"Of the dwellings we have enumerated above, the greater part are owned by individuals, and those built by contract on builders' account, find ready purchasers at an advance upon the actual cost. The number of churches now near completion is unprecedented.

"There are already indications of an increased number of dwellings for the present and ensuing years. Contracts have been entered into for the erection of fine buildings on the 5th avenue, as far out as Murray Hill. The whole of the Sixteenth Ward will soon be covered with fine houses, and the time is much closer at hand than we are aware of, when the Distributing Reservoir will be one of the public squares and promenades of the city itself."

CHRONOLOGY: INDUSTRY AND EDUCATION: 1842-1860

1789
THE ICONOGRAPHY OF MANHATTAN ISLAND

A correspondent writes to one of the papers: "I am informed that the upper Reservoir is dry, and clouds of dust fill the city, where every thing seems as dry as a tinder-box. What will be the effect if we had a large fire, and any accident should happen to the pipes from the lower Reservoir?"

The present Common Council have sold the buildings on Thirtieth street, covering the old reservoirs, and they are being torn down.

"These reservoirs were built on a solid stone foundation, forty feet above the street, on the very highest ground in the city, and only needed fifteen feet additional height of tank to conduct the water to the highest rooms in the Astor House and other high buildings on Broadway and other streets, where the Croton fails to supply the present time during the day.

"I was informed by the Chief Engineer, that in a few years at least six such reservoirs as have been sold in Thirtieth street, will be required in various parts of the city, to keep a full supply of water at all times, and to counteract the friction of the pipes from Forty-second street, and to guard against accident."

"It is to be hoped the new Common Council will ponder on the subject, and remember, when Peter Stuyvesant,—see Pest, Ap 17, 1845.

The Harlem R. R. depot at Fourth Ave. and 27th St. is destroyed by fire.—N. Y. Herald, Ap 26, 1845.

L. M. R. K., III: 582. It was immediately rebuilt and re-opened on Aug. 4.—Brown, I: 121.

May

Though, the Magnetic Telegraph Co. opened its telegraph office at No. 46 Wall St., in a small basement room.—Proceedings of the Magnetic Tel. Co. I: 24. The first meeting of the stockholders in New York was held on Jan. 21, 1846, at Bunker's Mansion House.—Ibid., 26. On May 1, 1851, a branch office of the Magnetic Telegraph Co. was established at 207 Broadway.—Ibid., 195.

On Jan. 1, 1846, the Magnetic Telegraph Co. combined with the Bain Line, hitherto a rival line operating along the same route as the Magnetic Telegraph Co.—Ibid., 290.

Another branch of the Magnetic Telegraph Co. was located at 181 Broadway in 1856.—Ibid., II: 175. See also descrip. of Pl. 147, III: 270.

The "Henry Clay," the largest merchantman in the U. S., owned by Grinnell, Misturn & Co., is ready to sail on her maiden voyage.—Hone's Diary, I: 247.

The 50th anniversary of laying the corner-stone of St. Mark's Church is celebrated, an historical address being delivered by the rector, Dr. Anthon. This was published in a pamphlet.—N. Y. Com. Adv., Je 19, 1845.

Eleven houses on William St., Nos. 111 to 133, are being demolished which is to make way for modern warehouses." In one of them Washington Irving was born; another was the Horse and Cart Tavern, famous in Revolutionary history.—N. Y. Com. Adv., My 5, 1845. For the latter, see L. M. R. K., III: 978-79.

By this time, the total cost of opening Madison Square amounted to $375,000.—Man. Com. Coun. (1857), 537.

The legislature incorporates "The Colored Home," for "the support and comfort of infants and destitute coloured persons of both sexes." For this purpose this corporation is permitted to hold real estate in New York, not exceeding $50,000 in value, and personal property not exceeding $50,000 in value. The home is to be subject to inspection by state and municipal officials, and shall make an annual report to the governor.—Laws of N. Y. (1845), chap. 148. 27th St.; Ap 16, 1858. On May 10, the legislature appropriated a fund, originally intended for a state hospital (see Mr 11, 1839), for "the erection of a permanent building on the real estate belonging to the said colored home . . . , for the support and relief of disabled colored sailors and other infants and destitute colored people."—Ibid., (1845), chap. 175. For a sketch of its later history, see Man. Com. Coun. (1868), 421-25. In 1865, it was situated on 62d St. and 16th St. At the second session of the 48th N. Y. Legislature, 1866-67, the resolutions were adopted and the funds assigned.

The "corner stone of the Alms House, proper, now in process of erection on Randall's Island," is laid with appropriate ceremonies.—Eve. Pest, My 9, 1845.

A cross is decided upon by Trinity vestry for the "termination or Fineal" of the spire.—Trin. Min. (MS.). See Jl 9.

Mayor Havemeyer in his message to the common council May 13 offers the following criticism of that body: "The annual election of thirty-four persons, whose . . . main business is to collect and distribute, through the various forms of patronage, nearly a million and a half of dollars, is an event of no ordinary interest. The nature of man must be radically changed before success in such an election can be prevented from being regarded in some degree as a pecuniary prize to be coveted for; and to the extent to which it is so regarded, it is corrupting in its effects. . . . A change in the political complexion of the Common Council is generally followed by a change in the offices in the government, from the highest to the most subordinate; and this change has now become almost annual."

"The facility with which it is accomplished leads to combinations to effect it—those who win this year hold their offices by the same uncertain tenure as those whom they displaced—are assailed by the same combination of forces in the office of employment to await the changes of the next year's competition. This is a disqualifying process. The man thus ejected from office seldom returns to his original business; or, if he does, it is not with that reliance upon it which commands success."

"He generally becomes a politician by trade, and seeks no other employment. The uncertainty of his chances of success and delays, which generally follow a change, serve only to habits of indolence and irregularity. In proportion as he becomes unfit for office, he grows more dependent upon it, and more unscrupulous in its pursuit."

"A government whose organization does not provide the guards which have universally been found necessary to prevent errors and abuses in administration; which produces incessant fluctuations in the office of public functionaries, with their competency and usefulness; and which itself becomes a mere machinery for the distribution of public favors, ought not to be tolerated where the power to exchange it exists."

The mayor recommends that measures be taken "to procure such alterations in the Charter of the city as will remedy these evils. " Ah, Mr. Mayor!" says the practice denounced by "our constituents, in public meetings," he advises, "of transacting executive business by Committees," and establish the executive departments for which the charter already provides. He condemns the existing police establishment as "complicated and inefficient," and recommends the adoption of the plan of organization passed by the state legislature, May 7, 1844 (g.v.), which "your predecessors did not see fit to enact" as an ordinance. "This law," he says, "appears to contain within itself a complete system; it confers powers and imposes regulations which the city does not possess, and cannot establish under its charter or any former law, and which are essential to the object in view; it is presented to us under circumstances which deserve our respect, and appears to be better calculated to give us an efficient police, than the system now in operation and, with some change, to perpetuity of the Common Council to carry into effect." The appointment of policemen "for a single year," as provided for in the act, he deprecates as involving the whole system "in the incessant strifes and annual changes of parties," and excluding the patronage "from the experience and independence which are indispensable to its usefulness." This evil should be "remedied by the Legislature before its effects are experienced."—Proc., Ed. of Ald., XXVIII: 24-29. The common council adopted the act on May 23 (g.v.).

A state convention having been suggested to revise the constitution, the state legislature recommends "a Convention of the People of this State," and provides that, at the annual election in November (see N.4), the voters shall by ballot read the "convention" or "no convention" decide whether they wish such. In case the decision is favourable, it is provided that the number of delegates to be chosen shall be "the same as the number of members of Assembly from the respective cities and counties in this state," such delegates to be chosen at a special election on the last Tuesday of April next (see Ap 23, 1846), and to assemble at Albany on the first Monday in the first month of June (see Je 1) "for the purpose of considering the constitution of this state, and to make such alterations in the same as the rights of the people demand, and as they may deem proper."

It is further provided that "the amendments to the constitution agreed to by the said convention" shall be submitted to the people "for their adoption or rejection" at the
CATALOGUE OF PLANS

Improvement of the Central Park.

1. Design in ink, accompanied by description.
2. (Proceeded on design for the Park, but failed to continue and is design for a park.
3. Design in sepia, accompanied by description.
4. Two different designs, one in sepia, and one colored, accompanied by description.
5. Design in sepia, illustrated on the border by profiles of the Park, and plans for observatory, grove.
6. Designs in India ink and color, accompanied by description.
7. Design in India ink and color, with description.

No. 8 Design in etchings, accompanied by description and the following illustrations:
A. Municipal and military pavilions.
B. Loos's donation.
C. Channel bridge, lathwork lads, channel aqueduct.
D. Design for railing, Apollo arch bridge, monument. Flow fountain, scientific garden process.
E. Neptune's console.
F. Military entrance.
G. Gate on front of each street.
H. The Central Park in 1878.

No. 9. Design in sepia, with description.

10. Design in sepia and etchings.

11. Design in sepia, accompanied by description and illustrations:
A. Engine-house and reservoir on Summit Rock.
B. Pond Ground and Pentamode.
C. Villa Rock and Aspiration.
D. New York Observatory.

12. Design in sepia, mark D & H, accompanied by description.

No. 13. Design in ink, on white paper, with proposed extensions to 100th street, made "Are Hugo's vita bella est," accompanied by description and the following illustrations:
I. Elevation of one of the water towers.
II. Plan of the inner hall, terraces, &c.
III. North elevation of the music hall.
IV. South.
V. West.
VI. The main hall illustrated.
VII. "' with rock-work.
VIII. Lengthened view of music hall.
IX. Terrazidal sheet.
X. Proposed new street.
XI. Elevation and plan for a marble staircase, with statues from the drivers to the top of the embankment of the present monument.
XII. The garden (each bed planted with flowers of the best sort).
XIII. Duplicate map of roads, &c., showing the present limits of the grounds.

15. Design in ink, accompanied by description, 
A. Working plans of same in portfolio.
B. plaster model of same.
C. Design in ink and sepia, marked with the seal of an agent, accompanied by description and illustrations.
D. Clay model of same.
17. Design in sepia and ink, marked with custom device.
   a. Same in color, and plan for use.

18. Design in ink, with description.

   a. Same in color.

20. Design in ink and sepia, marked "views," accompanied by descriptions.
   a. Same in color.
   b. Marked "views with description and illustrations.
   B. Female pavilion.
   C. Entrance.

21. Design in sepia, accompanied by description.

22. Design in colors, with allegorical epitaph, representing the Central Park, in 1842, 1856, and 1859, and the following illustrations:
   A. Plan and profile of scale for the Central Park.
   B. Entrance gate.
   C. General Entrance Gate.
   D. Concert Hall (side elevation).
   E. "Rockery.
   F. Observation.
   G. Fountain.
   H. Suspension Bridge.

No. 23. Design in sepia, marked "Arabia," accompanied by description.
   a. Same design in colors.

24. Design in sepia, mark "Lesbia," accompanied by description and design:
   a. Architectural floor plan.

25. Design in ink, marked "Flat 6A," accompanied by description and illustration:
   A. View taken northeast corner of Sixth Avenue and 165th Street, looking west (September 1857).
   B. Landscape from same point illustrating a lake and other improvements.
   C. Plan for Church.
   D. Principal entrance.
   E. Granite and limestone.
   F. Contours.
   G. Bridge and Common near Seventeenth street.
   H. Special view bridge near the Common.
   I. View from the side of the principal entrance on Fifty-sixth street, looking northwest (1857).
   J. Landscape from same point illustrating improvements.
   K. Granite and copper bridge.

No. 26. Design in sepia, marked "Manhattan," accompanied by description:
   a. Same in color.
   b. A Topographical map—showing location of roads, water, etc.

27. Design in sepia, with proposed extension to Bowery and Thirty-third street; shown in color and original, accompanied by description.

28. Design in sepia, device, ball and stage, accompanied by description.

30. Design in sepia, with illuminated section, showing contemplated improvements, View from the Park, etc., accompanied by description.

31. Design in sepia and ink, with text and plan of Park, with the present aspect of the Park shown in proposed plan.

A. Working plan of same.
B. Plan drawing of same.
C. Plan for residence.
D. Section.
E. View from corner and near Ninety-seventh street.
F. Interior of the Park near Ninety-sixth street.
G. Balconies.
H. Gates.
I. Winter garden.
J. Bridge.
K. General plan and estimate.
L. Layout control.
M. Large model, 21/4 feet in length, showing the present surface of the Park, and the improvements proposed.

No. 32. Design in sepia and ink, accompanied by description and illustration:
   A. Profiles of Roads.
   B. View of Observatory.

33. Design in sepia, marked "Grandview," accompanied by description and the following illustrations:
   1. View of the Park from Eleven Avenue.
   2. View from the Grandview.
   3. Rift view from the Grandview.
   4. View from the Grandview.
   5. View from the Grandview.
   6. View from the Grandview.
   7. View from the Grandview.
   8. View from the Grandview.
   9. View from the Grandview.
   10. View from the Grandview.
   11. View from the Grandview.
   12. View from the Grandview.
   13. View from the Grandview.
   14. View from the Grandview.
   15. View from the Grandview.
   16. View from the Grandview.
   17. View from the Grandview.
   18. View from the Grandview.
   19. View from the Grandview.
   20. View from the Grandview.

34. Design in sepia, marked "Pilgrim," accompanied by description and illustration. Not entered for competition.

35. Small design in sepia, accompanied by description and illustration. Not entered for competition.
   A. View of the Park.

Drawings and profile maps of the Park from the office of the Chief Engineer are also exhibited.
regular election in November (see N 3, 1846).—Laws of N. Y. (1845), chap. 252; Jur. N. Y. Const. Convention (1846), 4-8.

The legislature authorizes the common council to "to raise money by loan, and to create a public fund or stock, to be called 'Building Loan Stock, No. 1,'" not exceeding $500,000. The money so raised is to be applied "for erecting nursery and almshouse buildings, and also for fencing round Stuyvesant Square," if the common council direct that the fence be made.—Laws of N. Y. (1845), chap. 253. On May 14, 1846, a similar act was passed raising money not exceeding $500,000, for the same purposes.—Ibid. (1846), chap. 253.

"There has never been in this city so magnificent a place of amusement as Castle Garden now is. Under the direction of Messrs. French & Heiser, it has been fitted up into a saloon, and no one who has not seen it can have an idea of its vastness and beauty. . . . The castle on one side commands the view of a bay of unsurpassed beauty, and on the other it is the only place to take in a large part of the city, with its shipping and buildings. . . ."—Sust. Post, My 13, 1845.

Hone describes Castle Garden, where the Italian Opera Co. is performing, as "the most splendid and largest theatre I ever saw,—a place capable of seating comfortably six or eight thousand persons. . . . The pit or area of the pavilion is provided with some hundred small white tables and movable chairs, by which people are enabled to congregate into little squads, and take their boxes among the acts. In front of the stage is a beautiful fountain, which plays when the performers do not. The whole of this area is surrounded by circular benches above and below, from every point of which the view is enchanting. . . ."—Hone's Diary, II, 249. For view of the castle, see "The Castle Garden," S. Post, O 2, 1845.

The legislature reorganizes the almshouse department. It authorizes the common council to appoint a "Commissioner of the Alms House Department," who shall have the same powers and authority as are now conferred upon the "Commissioners of the Alms House and Bridewell." His term of office shall be one year.—Laws of N. Y. (1845), chap. 283.

The legislature, amending the act of May 7, 1840, (p. 7), authorizes the N. Y. & Harlem R. R. Co. to construct a continuation of its railroad through the interior of Putnam, Dutchess, Columbia, and Rensselaer Counties, to some point on the Hudson River opposite Albany, or to some point in Columbia or Rensselaer Co. to form a junction with "any other road leading to a point on the Hudson River opposite . . . Albany."—Laws of N. Y. (1845), chap. 331.

The legislature passes an act "to establish and regulate ferries between the city of New York and Long Island." The governor is to appoint three commissioners who shall have power to grant licenses for establishing and keeping as many ferries and at such places as they think public convenience may require, between these localities; but not to grant a license for any ferry or ferries which shall interfere with the rights, franchises or privilege of the corporation of the city of New York, in ferries already established, for more than ten years at a time.—Laws of N. Y. (1845), chap. 352.

Under this act, the commissioners granted to Benson et al. licenses to establish the Fulton Ferry, the Hamilton Ave. Ferry, and a new ferry from the foot of Wall St., New York, to the foot of Montague St., Brooklyn. These licenses were to commence at the expiration of certain leases of these ferries, which had been granted by the city,—Hoffman, "Terror," 24-67. The power of the legislature to alienate the ferry right, already given by franchise to the city of New York, was thoroughly examined by Hoffman, and also by Judge Barculo in Benson v. The Mayor, &c., of New York (10 Barbour 223).

The legislature discontinues 11th St. between Broadway and The Bowery, as laid down on the "Commissioners' Map of 1867-11. This act, in effect, confirms a city ordinance to the same effect.—Laws of N. Y. (1845), chap. 314.

The common council, after repealing the ordinance of Nov. 29, 1844 (p. 2), establishing the "Municipal Police or Night and Day Watch," adopts the act of the legislature, passed May 7, 1844 (p. 2), establishing a police system.—Proc., App'd by Mayor, XIII, 26.

An ordinance regulating the police was approved by the mayor on June 16 (p. 2). For the appointment of the first chief of police, see J 17.

Fire destroys about 100 buildings on 15th, 19th, and 20th Sts. between Sixth and Seventh Aves.—N. T. Tribune, Je 2, 1845.

Costello, Our Firemen, 235-42.

Passing the head of the Episcopalian (see F 15, 1844), the Methodists put a "floating chapel" into operation. This is moored on the North River, at the foot of Rector St.—Picture of N. Y. in 1846.

Andrew Jackson dies at "The Hermitage" in Nashville, Ten.

Mr. Thomas Fynn is fitting up the old Richmond Hill Theatre [see J 9, 1840], so as to contain 3,000 spectators. He is going to call it the 'National Theatre.'—Proc., Je 9, 1845.

Both Brown, I, 235, and the L. M. R. K., III, 951, erroneously state that this was done in 1843.

Dedication services are held at the unfinished Presbyterian church at the corner of University Place and 10th St. (see J 15, 1844).—N. T. Com. Ad., Je 13, 1845. On Oct. 1, the pews were sold at auction. "This church is built of free-stone, in the Gothic style. The main building is about one hundred and forty six feet long by sixty broad. . . . The spire is about one hundred and forty feet high. . . . The interior is extremely beautiful, being composed entirely of black walnut, oiled. The roof is supported by five columns of free-stone, on either side, with arches. . . . The cost of the building is estimated at eighty thousand dollars.—Proc., O 2, 1845. In J 9, 1845, Sec. of O. K. R., III, 931; descrip. of Pl. 135, III, 704; Picture of N. Y. in 1846, 135

The Bleeker mansion on Broadway, originally a Dutch parsonage house, occupied during the Revolution by the medical staff of the U. S. army, later by Aaron Burr, and then by Win. Duer (father of Win A. and John Duer), is being demolished.—N. T. Com. Ad., Je 14, 1845.

Capt. Zachary Taylor is ordered to march to some suitable place on the Gulf to be in readiness to protect Texas after she accepts annexation. Unless Mexico declares war on the U. S., he is simply to defend Texas. Taylor sailed with 1,500 men from New Orleans in July, and in August he established his headquarters on the Nueces River near Corpus Christi. He remained there until the spring of 1846.—McMaster, Hist. of the People of the U. S., VII, 440.

An ordinance "Regulating the Police of the City of New York" is approved by the mayor. This ordinance divides the city into three districts in each of which there shall be a police court and office, and magistrates and clerks are assigned to these courts and offices. Captains and patrolmen are distributed among the 17 wards, and salaries are fixed. The mayor is empowered to make rules for the government of the force and amount the same from time to time when he deems it necessary.—Proc., App'd by Mayor, XIII, 99-101.

The common council appoints a committee to determine the best mode to testify the board's respect for the late Andrew Jackson.—Proc., App'd by Mayor, XIII, 711; Hone's Diary, II, 350. On June 23, the board voted an appropriation of $2,500 to defray the
1845 expenses of the funeral solemnities in this City in honor of General Andrew Jackson."—Proc., App'd by Mayor, XIII: 110.

George W. Watsell is appointed first chief of police after Mayor Havemeyer's first nomination failed of confirmation in the common council. In the message accompanying the nomination of Watsell the mayor explains his attempt to lift the newly-established police organization out of politics by making an exception to the rule "by which all parties seem inexorably to act in making appointments exclusively from their own ranks."—Proc., Ed. of Ald., XXIX: 267-69.

18 Grace Church, at the corner of Broadway and Rector street [built in 1807-9, 9.1-2], has been sold for $65,000. It is to be converted into stores below, and the upper part into a splendid museum of Chinese curiosities, which are likely to prove a good speculation. Doctor Taylor, the rector, preached the last sermon on Sunday last in the old edifice. The congregation will occupy a temporary place of worship until their splendid new church at the upper end of Broadway is finished. It will be second only to the magnificent Trinity, and will probably be finished about the same time.

Hone's Diary, II: 254. See also a manuscript memorandum to the same effect, under date of June 22, 1845, in the Bayard-Campbell-Pearsall Papers, in the N. Y. P. L. See Mr 7, 1846.

19 A large lithograph has been published recently of a statue of Washington, designed by Catherwood and Crawford. The proposed statue is 75 ft. high on a pedestal 55 ft. high.—N. Y. Com. Adv., Je 19, 1845.

20 Ceremonies in honour of the late Gen. Andrew Jackson are held in New York. A military and civic procession is the feature of the day, arranged by a joint committee of the municipal authorities of New York and Brooklyn. Near the head of the parade, a car drawn by four white horses carries a funeral urn, after which a horse, caparisoned, is led. For the programme, and various features of the event, see N. T. Herald, Je 23, 24, 25, 1845.

July 26 The last part of the noble steeple of Trinity Church. As a mere matter of architecture, it is rather, by contrast, calculated to add to the dignity of the structure below. Whether in this respect it is for the better or the worse, there will probably be a diversity of taste. If the cross is intended as a sign to designate the denomination to whom the building belongs, it will be likely to be misunderstood, unless, indeed, Trinity intends to announce her return in due submission to the bosom of Holy Mother Church of Rome, which we suppose is not the case. If the cross is erected under the notion that it adds any thing to the sanctity of the place, that this cross will be an object of adoration, or veneration even, the design is distinctly idolatrous, and in thorough rejection of Him who died on Calvary upon a cross, as a sacrifice in the place of sinners. . . .—Eve Post, Jl 9, 1845, Gl 17, 1845, Sm 30, 1845.

On July 26, 1845, the last upper part of the steeple of Trinity Church was given as follows: "The upright shaft is fifty and a half feet long and the bar is three feet.—It is made of copper, and gilded."—Ibid., Jl 28, 1845.

Over 300 buildings are lost in a fire that sweeps over nearly the same district as that burned in 1835. All of Broad St., with the exception of five or six tenements on either side nearest Wall St., is in ruins; all of Beaver St. from William St. to the Bowling Green is destroyed nearly the whole of New St., Exchange Place, and South William St., with their immense quantities of merchandise, are ruined.—Hone's Diary, II: 257-59, 260, 261; Great Metropolis for 1845, 60; N. T. Herald, Jl 21, 22, 1845; Eve Post, Jl 19, 1845, et seq. The fire began in the sperm oil establishment of J. L. Van Doren, 35 New St., and extended to Exchange Place and Broad St., and finally to the large house of Catterwood & Warren in Broad St. This was a storage for saltpickle. It blew up, and the explosion shook the city, was felt in Jersey City and Brooklyn, and was heard at Sandy Hook. The Adelphi Hotel on Beaver St., the Waverly House on Broadway, 12 warehouses on both sides of Broad St. between Wall St. and Exchange Place, and from Broadway to William St., were among the buildings destroyed. Houses that "all the buildings down Broadway to Marketfield street, including Abraham Schermherhorn's hotel, at the corner of Beaver street, are gone. Here it [the fire] crossed the widest part of Broadway and burned all the houses from Morris street, including Robert Ray's great granite edifice, Brevoort's house, Gardner Howland's three houses, and all down to Edward Post, Jl 1845, No. 1 Fl., which is saved."—Hone's Diary, II: 259. (In 1847, Mrs. Ray had established a residence at the cor. of Ninth Ave. and 28th St.—Ibid., II: 293.)

The losses in this fire were estimated at $6,000,000. A large part of the property lost consisted of imported goods, on which the duties, already paid, were $600,000.—N. Y. Com. Adv., Mr 17, 1845.

After the fire, N. Currier published a lithographic view entitled "The Bowling Green Fountain. View of the Great Conflagration at New York July 16th 1845 From the Bowling Green. Nearly 300 Buildings destroyed.—Estimated loss of Property $7,000,000."—See view in Eno collection, N. Y. P. L., and see Ag 26. In the same collection is also the Currier view of the explosion.

A great many complaints are made with respect to the various lines of Broadway stages. It would almost seem that, from being a great public convenience, they are becoming public nuisances. There is no particular difference in or about them, except that each line is worse than any other. As to the Bleecker street line, it is said by those who live at and above the site of the ancient and now swallowed up and suburban village of Greenwich, that it is not half sufficient in the number of stages and the frequency of passages, to accommodate the travel between that distant quarter and down town. And this is pretty evidently the fact. Regarding all the lines, it may be generally said that the Corners, for the first six or eight blocks at either end, are considered stations of rest and refreshment for the drivers. If a man of business in Wall and Pine streets desires to reach his dwelling in time for dinner, he must lay his account so as to appropriate one hour to that purpose, which he will generally find sufficient, if he have a favorable passage.

"If the proprietors would direct their drivers to start at certain intervals from each end of the route, and to go through at regular and moderate speed, without stopping, except to let out and take in passengers, all these complaints of vexatious delays would cease."—Eve Post, Jl 19, 1845.

Last evening [July 22] the fourth after the conflagration [see Jl 19] had subsided, the fire was blazing to the height of six or eight feet above the heaps of ruins, in as many as twenty places. The scene was highly picturesque. The sky was illuminated in the manner familiar only to western people accustomed to see the 'Prairies on fire.' Most of the walls and chimneys, which were so insecure as to endanger those passing about them have been thrown down by the firemen. Piles of brick are already forming along Broadway, preparatory to rebuilding. There is such an abundance of capital now lying in wait for any opportunity of safe investment, and the ground burnt over is so valuable, that we have no doubt, all the buildings consumed will be replaced by better ones in the course of six months."—Eve Post, Jl 23, 1845.

Several suggestions have been made regarding the widening and straightening of the avenues and other roads comprised within the limits of the late fire. . . . If it be found practicable, it would be an improvement, we think, to close up altogether such generators of combustion as the narrow lanes of New street and Marketfield street. As a general rule, every proper effort should be made to prevent the population becoming too dense in this part of the city, and there is nothing which so much invites it as these streets and alleys, too narrow and confined for the ordinary purposes of commerce."—Eve Post, Jl 23, 1845.

"Consequences of the Fire [see Jl 19].—Some of these, if the case is viewed with the right spirit, may be highly beneficial to the city. In re-building the burnt district, more care will be taken in rendering such buildings as are called fire-proof, worthy of the name.

"Let a little more rigor be used in excluding from the crowded portion of the city, combustible and explosive materials, and in the prevention of danger from furnaces, engines, carpenters, manufacturers and others.

"The width of a street is of much less consequence as a protection against a large fire than is commonly supposed. This conclusion was drawn by the examination of the builders and the firemen, and was arrested on every side where there was no street at all, except on the southern boundary where Stone street in its narrowest part seemed to be a barrier to the flames.

"They have already commenced rebuilding a portion of the burnt district, but we are sorry to say that on taking a stroll through it yesterday, we could see no evidence of a better or more substantial material than that which is used by the builders. Built which and burn quicker seems to be our order of the day."—Eve Post, Jl 25, 1845. Cf. the fires of S 21, 1776, and D 16, 1835.
The common council permits "the proprietors of Morse's Electro-Magnetic Telegraph to set posts for the purposes of said Telegraph along the line of the side-walks," under the directions of the street commissioner; but "the same shall in no wise obstruct the side-walk or streets otherwise than other posts permitted to be so placed there; and provided that all breaks in either the pavement of side-walk or Streets in the execution of said work be suitably repaired without any expense to the City."—Proc., App'd by Mayor, XIII: 152. See 21, 1845.

The great iron steamer Great Britain, the Leviathan of steam, the monster of the ocean, and unquestionably the largest and most magnificent specimen of naval architecture that ever floated, arrived here yesterday [Aug. 10], at three o'clock, in fifteen days from Liverpool, under . . . Captain Hosken. A deep interest, accompanied by some doubt, awaited her arrival, because she was constructed of iron plates and driven by a screw-propeller. —Hone's Diary, 1845, 1846.

"Les Huguenots" is performed for the first time in New York, at the Park Theatre.—N. Y. P. L. Bulletin (1845), 580.

"The appraisers appointed for the ascertaining the value of the waters of the Croton taken for the use of the city of New York . . . on Friday [Aug. 15] closed the long and laborious session they have been holding in the village of Sing Sing, by giving to the owners of the water, by an agreement, as they are in the judgment of the commissioner, for the complete division of the waters of the Croton River to the control of the Corporation of the city of New York, should all be required for the purposes of that city."—Eve. Post, Aug. 20, 1845.

Deer and swans "add greatly to the charm of the scene" at the Bowling Green fountain, which consists of an irregular pile of rocks.—N. Y. Com. Adv., Aug. 26, 1845. For view, see 19, supra; also A Picture of N. Y. in 1846, 84.

A correspondent calls attention to the fact that "the remains of General the Baron Steuben lie neglected and almost forgotten beneath the Baptist church in Nassau st." Workmen now repairing the church have been unable to find the marble slab which is said to mark the spot "somewhere among the vaults. The writer made diligent search, but could not locate the monument.—N. Y. Com. Adv., Aug. 27, 1845. Steuben, however, was not buried here, but in Oneida Co.—See N 18, 1794. The Nassau St. Baptist Church, between John St. and Maiden Lane, was formerly the German Reformed Church, and was attended by Steuben when he passed his winters in New York. A mural monument to his memory was removed to the new German church in For- my St., when the majestic structure was erected in Nassau St.—Kapp, Life of Steuben, 603-4. For the church's demolition, see 1847.

The "Great Britain" sails from New York "accompanied by a gallant convoy of steamboats and sailing vessels."—Eve. Post, S 1, 1845.

The "magnetic telegraph" line "between this city and Philadelphia" is under contract, and is to be finished in about two months. The postmaster has leased the road to the Harlem railroad, and are continued along that road to Harlem. The line then diverges to Fort Washington, where it is to pass the North River. Whether the wires will be carried under the water or over is not yet determined. The first effort will be to convey the wires in tubes, at a distance so far below the surface of the river as to be out of the way of any passing vessels. —Eve. Post, Aug. 31, 1845.

"The line from Philadelphia to Baltimore is to be constructed by the same association that governs the road between New York and Philadelphia, and it is believed that the whole line from Wash-ington to Buffalo will be ready for use by the 1st of March next."—N. Y. Com. Adv., Aug 30, 1845. See S 10.

The building "on the site of the Old Tammany Hall, No. 164 Nassau street," is being demolished, "for the purpose of erecting on the ground an additional wing to Tammany Hall." A fatal accident occurs by falling walls.—N. Y. Com. Adv., S 4, 1845.

The Knickerbocker Base Ball Club of New York is organized. —By-laws, Regulations and Rules of the Knickerbocker Base-Ball Club of N. Y., in N. Y. P. L. This is believed to be the first base-ball club in America formally organized, and to this club the origin of the "National Game" is traceable.—See "Final Decision of the Special Base Ball Commission," in Spalding's Official Base Ball Guide (1908), 47. Several of the club's "Game Books" (score books), and two volumes of the club's "Correspondence," are also preserved. See 19, 1846.

The first issue of the Scientific American appears. For its early history, see the 70th anniversary issue, June 5, 1915, pp. 514, 540.

"The workmen have been engaged for two days past in putting the wires up for the new electric telegraph. The wires are much smaller than those used by Col. Graham, the late Postmaster, and are neither coated or covered with silk. The posts are laid throughout nearly the whole distance, and it is contemplated to have the telegraph in operation by the 15th of October."—Eve. Post, S 10, 1845. On Sept. 20, the Post stated: "The work on the line of telegraph between Philadelphia and New York is rapidly progressing . . . The work is also in progress between Philadelphia and Baltimore. The line from New York crosses the Delaware at New Hope, and taking a direct line from thence through the borough of Doylestown and Norristown, strikes the Philadelphia and Columbia Railroad at Morgan's Corners, in Delaware County. From this point a branch will be constructed along the railroad to Philadelphia city. The line to Baltimore will be extended along the railroad route, via Lancaster, Columbia and York."—Ibid., S 20, 1845, citing the Tribune. See 21, 1846.

The first issue of a new paper, entitled The Globe, appears. —It is edited by Mr. Levi D. Slannon, and published by Mr. Casper C. Child. At No. 123 Fulton street, on Morse's Diary.—Eve. Post, S 17, 1846.

For the year ending this day (cf. D 31, 1842), 76,514 passengers arrived at the port of N. Y.—Arrivals of Alien Passengers and Immigrants (1841), 64.

The Unitarians, formerly on Chambers St., dedicate a new church, on Broadway between Prince and Spring Sts. (extending back to Crosby St.), known as "The Church of Divine Unity."—Eve. Post, O 23, 1845; Greenleaf, 774-75. For detailed description of it, with wood-cut view, see Picture of N. Y. in 1846, 133-34. A lithographic view of it by D. H. Arnot, in Ensign collection, bears the title "First Congregational Church, Broadway," and the date 1845. See also L. M. R. K., III: 937.

In seven years, this edifice was sold to the Universalists, thus becoming the third site of the "Church of the Divine Paternity," also known as the "Fourth Universalist Church."—O. M. R. K., III: 937; cf. 1853; and the Unitarian congregation built its present church at the south-east corner of Fourth Ave. and 20th St. and took the name "All Souls' Church."—From the church records; also Man. Com. Coun. (1865), 635. See 25, 1855.

The common council orders that a 21-year lease be granted to the United States government "of the outer end of the Pier No. 1, East River, known as the L. of said pier, together with one hundred feet of the easterly side of the pier," with "the privilege of erecting a large office in the angle formed by the L.," at no annual rental of 750. —Proc., App'd by Mayor, XIII: 207.

The common council orders "that the burial ground on Ran- dall's Island, known as Potter's Field, be abandoned as soon as a more suitable place of burial for the poor can be obtained," also that the committee on charities will examine "any and all claims for a suitable location for a burial ground for the poor can be procured . . . ." —Proc., App'd by Mayor, XIII: 214.

At the annual election on this day a ballot is taken as prescribed by act of legislature (see My 13), resulting favourably for a con- vention to amend the state constitution.—Eve. Post, N 8, 1845.

Delegates to this convention were elected on April 28, 1846 (q.v.).

The common council orders "that no trees, posts, chains, or any obstacles whatever, be placed within the ground belonging to the Corporation in Madison Square, and that the Military be permitted to parade within the same, until the ground shall be required for more important purposes." —Proc., App'd Mayor, XIII: 224.

The common council permits the architect of Trinity Church to "set out the iron railing in front of said church three and a half feet upon the side-walk of Broadway, upon condition that the gates be so placed as to open inwardly." —Proc., App'd by Mayor, XIII: 283.

The water revenue this year amounted to $166,532.—Man. Com. (1845), 322.

1846

In this year, Sir Robert Peel carried against bitter opposition the repeal of the Corn Laws, the keystone of the English protective system.—Hazen, Europe since 1815, 450-54.
The trans-Atlantic steamships "Great Britain" and "Great Western" docked at the foot of Clinton St., East River.—Ibid., 75.

The "sectional dock," at the foot of Pike St., for lifting vessels when repairs were to be made to their hulls, is described; also the inclined railway, used for the same purpose at the shipyards.—Ibid., 76-77.

The forts and fortifications of the city and harbour are described.—Ibid., 77-79.

Tattersall's (on Broadway) was the largest horse market in the U. S.—Ibid., 79.

Tompson's ware was used for a parade-ground.—Ibid., 85.

Stage lines to Harlem, Yorkville, and Astoria, started from 23 Chatham St.; those to Bloomington and Manhattanville from Chatham St. and Tryon Row; those to Dover, Morristown, and Powerville, N. J., started from 75 Cortland St.; those to Jamaica, Newtown, Flushing, Kolin, Manhasset, Great Neck, and Little Neck, L. I., from 360 Pearl St.

There were 258 regular omnibuses in the city, 2,898 drays, 201 hackney-coaches, and 231 cabs. Twelve of the omnibus lines ran on Broadway and certain uptown avenues and streets, under various names, such as the Empire Line, Chelsea Line, Fulton Ferry Line, Greenwich Line, Knickerbocker Line, etc.—Ibid., 95-97.

The guide contains a list of "all the Passage Boats built and now running on the Hudson river, between New-York, Albany and Troy." It tells of the names, tonnage, and "remarks" (showing some were "broken up," " sunk," "burnt," etc.). Beginning with the "Clermont" (changed to the "North River"), they total 47.—Ibid., 103-94.

There were several "daguerrean galleries" in successful opera, the most extensive being Plumb's, at 251 Broadway. Another establishment of this kind was Anthony, Edwards & Co. The head of this firm was afterwards a leader in photography. Another, Parkinson, was "celebrated for the beauty and perfection of out-door scenes, buildings, &c." A view of Niagara Falls, and views of public buildings in New York revealed his "unequaled" skill in this department of his art. "The prices for miniatures in the various daguerreotype establishments, vary from one dollar to five dollars, but none that are really good can be obtained for less than three or four dollars."—Ibid., 112.

There were over 500 artists in New York, in various branches of portrait, miniature, landscape, and historical painting. Among portrait painters were Page, Inman, Elliott, Lingham, Huntington, and Mooney. Most conspicuous among landscape painters were Cole, Durand, and Cropsy. Matteson, the historical painter, Boyle, May, Chapman, and Hicks, are mentioned; also the sculptors Kneeland, Colburn, and others. The Knickerbocker Gallery of Art, and the "Eagle Saloon," on Fourth Ave., and the "Gin Mill," were the places most frequented by the artists, and booksellers, Fan- shaw, Hite, Shumway, and McDougall.—Ibid., 112-13.

The Walton house, at 326 Pearl St., was a boarding-house.—Ibid., 116. See Ag 25, 1823 and cf. infra.

The volume contains several vignette wood-cuts of some of the principal churches.

This year was published Annals and Occurrences of N. Y., City and State in the Olden Time, by John F. Watson (Phila., 1846). See also 1832. The following notes are from this source:

The Walton mansion, at 324 Pearl St., built in 1752 (p. 9), "has even now an air of ancient stately grandeur. It has five windows in front, constructed of yellow Holland brick; has a double pitched roof covered with tiles, and a double course of balustrades thereof. Formerly its garden extended down to the river [see 1828]. The front is probably descended of the Walton, who, a century ago, gave the name of Walton's Ship Yard, at the same place. Wm. Walton, who was one of the council, and the first owner of the above house, made his wealth by some preferences in the trade among the Spaniards of South America and Cuba."—Watson's Annals, 359. For fuller account of the family and its affairs, see "Biographical Sketches," by John Austin Stevens, in Colonial Records, City of New York, (1867). For view of the mansion, see Manhattan Com. (1849), 331; Ibid. (1872), 495. See also L. M. R. K., III: 953.

In the rear of No. 48 Frankford street, is now a very ancient tan yard. This street down to Perry street, and from William street over to Jacob's street, is the region of what was formerly tan yards, and originally Beckman's swamp. An old harlem ball near there, said he remembered to have shot ducks there formerly. The father of another had told him he often gathered huckleberries; and fifty to
sixty years ago it was common to exercise there skating."—Watson's Annals (1846), 175.

"Hudson's Square is a beautiful embellishment of New York, redeemed from a former waste, once a sand beach. The large growth of trees and the abundance of graceful shade, make it, in connection with the superiority of the uniform houses which surround it, a place of imposing grandeur. The continuous long lines of iron palisades, both round the square and before the areas of every house, and up the several door steps, give a peculiar aspect of European style and magnificence."—Ibid., 186.

There are at present four or five houses remaining of the ancient Dutch construction, having 'pediment walls' surrounding the roof in front, and having their gable ends to the street; a form once common in New York.

"In broad street is one of those houses marked 1698, occupied by Fergus & Co., No. 41. Another, appearing equally as old, but of lower height, stands at the north-east corner of Broad and Beaver streets. These, with the now standing, of three stories, No. 76 Pearl Street, near Counties slip, are, I think, the only ones now remaining in New York."—Ibid. (1846), 570. For views of buildings of the design referred to, see Man. Com. Council (1850), 143; ibid. (1861), 586.

At this time, there stood on Fifth Ave., near the Institution for the Deaf and Dumb (30th St.), the Roman Catholic Church of St. John the Evangelist, which was founded in 1842, and of which the Rev. Felix Larkin was pastor.—Greenleaf (1846), 341-42.

In this year the number of young men using it regularly at a dinner-resort called "The Woodcock," on East Houston St. near Broadway. Literary and professional men, and men of leisure, formed an acquaintance here. From these informal meetings sprang a permanent organization which resulted in the establishment of the New York Club.—From article on "Clubs" in The Galaxy (1876).

This club has had many migrations. It was originally housed in Chambers St., opposite the court-house. It moved to the corner of Broadway and Walker St.; then to No. 717 Broadway (on the west side between Water St. and Astor Pl.); then to 556 Broadway (east side between Spring and Prince Sts.), where it remained from 1849 to 1871.—King's Handbook of N. Y. City (1893), 546; City Directory. Its next move was to 620 Broadway, on the East side, between Houston and Bleeker Sts., where it remained until 1836. Then it moved to No. 744 Broadway, at the south-east corner of Astor Place, where it leased the large house owned by, and formerly the residence of, John D. Wolfe; here it remained until 1861. The next move was to the Haight mansion, No. 1 E. 15th St., at the north-east corner of Fifth Ave.; the City Directory shows that it was used as a hotel and then occupied, until 1870. From 1871 to 1873, it occupied a residence at No. 31 E. 17th St., between Broadway and Fourth Ave., facing Union Square. Then it moved to 509 Fifth Ave., on the east side, between 31st and 32d St., where it remained until 1874. In the spring of that year, it occupied the large residence at No. 1 W. 25th St., between Fifth Ave. and Broadway, facing the Worth monument; it was here fourteen years. The next move, in 1889, was to the Caswell residence, at No. 350 Fifth Ave., on the south-west corner of 35th St., which had been occupied by the University Club.—Galaxy; King's Handbook; City Directory. It remained there until 1906; then for about two years maintained an office at 7 W. 42d St., until it occupied its own building, on March 16, 1907 (p. v.), at No. 20 W. 40th St., where it still is.—City Directories.

In this year, the Association for Improving the Condition of the Poor called attention to the bad conditions in the tenement-houses of New York and to the relation between poverty and the housing problem.—De Forest & Veiller, The Tenement House Problem, 76.

In this year, the first volume of the History of New Netherland; or, New York under the Dutch, by E. B. O'Callaghan, was published.

In this year was published John Doggett, Jr., at the Directory Establishment, a pamphlet entitled The Cries of New York, with 15 illustrations, poetry by Frances S. Osgood, and text describing landmarks, parks, etc.

In this year, the Home Journal was established by Geo. P. Martin, at 1825 Catharine St., New York. Similar in character to the N. Y. Mirror, which it succeeded, it continued a successful weekly of social, art, and literary import until 1905, when its name and form were changed by new owners to Town & Country, the illustrated weekly of social life which still survives.

In this year, Edgar Allan Poe wrote, for Godey's Magazine and Lady's Book (Philadelphia), a series of critical essays under the title "The Literati of New York City."

In this year, Daguerreotype Miniatures of Life in the Empire City, by A. J. H. Dugan, were published in Philadelphia.

In this year was published A. H. of the Churches of All Denominations in the City of N. Y., by Jonathan Greenleaf.

In this year, Henry Kirke Brown, the sculptor, returned to America from Europe and settled in New York. During his stay here he made some of his best known works, including the statue of Washington in Union Square. At the outbreak of the Civil War, he moved to New York.—Bank of the Artists, p. 76.

"The Magnetic Telegraph.—We learn from an authentic source, says the Baltimore American, that the line of Magnetic Telegraph between Baltimore and Philadelphia may be expected soon to be completed. The posts for the whole line are nearly all delivered, ready for setting up, and many weeks, says a letter before us, "will not elapse before the completion of this line will finish the Telegraph between Washington and New York." Mr. Vail is now in Philadelphia, testing the accuracy of the line between that city and New York, section by section, which will not occupy more than ten days, when the instruments will be put in operation. . . .—N. Y. Daily Tribune, Ja. 5, 1846.

"The Magnetic Telegraph. That portion of the New York and Philadelphia Magnetic Telegraph which is between Philadelphia and Norristown was put in operation on Friday, for the purpose of testing the wires and the working of the machine. There now remain but about seven miles of the line to be completed, in order to form a magnetic connexion between Philadelphia and New York, and this is being rapidly carried forward."—Eve. Post, Ja. 6, 1846.

"Cony Island Telegraph.—The workmen were engaged on Monday in regulating the wires which have, for the third time, been laid in a lead pipe under the river for the Long Island Telegraph. The Tribune says: 'If this latter attempt shall not succeed, it will be carried across in the air at Blackwell's Island, making the telegraph some twelve miles longer. The bottom of the river at the ferry is hard and rocky, instead of muddy as was supposed';—Eve. Post, Ja. 7, 1846.

Hone records: "I dined yesterday with Mr. Peter G. Stuyvesant, in his splendid new house in the Second avenue, near St. Mark's Church."—Hone's Diary, II: 268. See, however, Ag. 17, 1847.

"Magnetic Telegraph. The wires are all placed from Boston to Springfield; thence to Hartford and this place [New Haven], the holes are dug for the reception of the posts, but as yet none of them are erected. . . .—Eve. Post, Ja. 3, 1846, N.Y. New Haven Herald.

"The question of applying to the legislature to pass a law giving the corporation authority to open Madison Square in the manner originally contemplated is before the Common Council. The city has too few public squares, the few it has are of small dimensions, and there is not one, at the present time, which is suitable for the manoeuvres of our military companies. It seems to us so far as we have been able to understand the matter, desirable that the original plan and design of Madison square should be adhered to as nearly as possible, and that it should be left free for the erection of such public buildings as the growth of the city may hereafter render necessary, and for the use of the military companies in their parades and exercises. To turn it into a private square, and assess the property of those who have bought it of the corporation in the faith that no assessment should be made, would be clearly an unjust proceeding and wanting in honesty. It is to be hoped therefore that the plan of applying to the legislature, will be adopted."—Eve. Post, Ja. 9, 1846. See also ibid., Ja. 10, 1846.

The common council orders that "the ground adjoining the Distributing Reservoir, between Forty and Forty-second Streets, and the west side of said Reservoir, and the Sixth Avenue, be granted, solded, and sloped or bedded upon the grounds and streets, and that the same be enclosed by a next ornamental wooden fence . . . ; the same to be used as a public park, until required for reservoir or other purposes."—Proc., App'd by Mayor, XIII: 392.

The First Presbyterian Church, on the west side of Fifth Ave., between 10th and 24th Sts., erected in 1845, is opened for public worship.—N. Y. Com. Adm., Ja. 12, 1846; Greenleaf, 134-35. See Jl 20, and S, 1844.

CHRONOLOGY: INDUSTRY AND EDUCATION: 1842-1860 1795
1846

THE ICONOGRAPHY OF MANHATTAN ISLAND

14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40

"The Second Avenue. The two great avenues for elegant residences are to be the Second and the Fifth. The latter is already well sprinkled with dwellings, up to the vicinity of Twentieth street, and the lots fronting on it are commanding very high prices, from six to ten thousand dollars each. Like the Fifth, the Second has its character established as a good neighborhood, by the number of elegant dwellings erected. But hitherto they have extended only to Nineteenth street. Twelfth street, which (with the Board of Aldermen, by a recent vote, has determined to enclose with a handsome railing and regulate, through which it passes from Fifteenth to Seventeenth street [Stuyvesant Square], will continue to keep up the good character of this avenue. . . ."—

Eve. Post, Jt 14, 1846.

"The Magnetic Telegraph was completed to Lambertville, on the Delaware, in this State, on Monday, when communication was opened with Philadelphia. The battery will be brought to Somerville during the week, and to Newark, on the way to Fort Lee and New York soon thereafter."—Eve. Post, Jt 15, 1846, citing Newark Daily Adv. On Jan. 20, the line was in complete working order between Newark and Philadelphia.—Ibid., Jt 20, 1846. Cf. Jt 26.

"The improvements in the mode of warming dwelling houses, which have been introduced in the city of New York within the last two years, have affected almost an entire revolution in this department of our domestic arrangements. Mr. E. L. Miller, of Brooklyn, was the first to introduce among us the present admirable system of air furnaces. He has recently, however, introduced into his own house, 59 Clark street, an arrangement for warming air by a separate water heated surface only in the form of a hot water furnace of an entirely new construction. The apparatus is placed in the lower basement of the house, occupies no more space than an ordinary hot air furnace, and distributes through the house in the usual way of the common surface [furnaces]; but the effect of the quantity of fuel under ignition, and the character of the heat, are truly astonishing and delightful."—Eve. Post, Jt 17, 1846.

"Magnetic Telegraph. Notice is hereby given, that the Magnetic Telegraph will be opened for the use of the Public on Tuesday morning, the 27th instant, between Newark and Philadelphia, at the rates of charge heretofore published—Communications to be sent by Telegraph will be received, and the postage paid, at the Office of the Telegraph Company, in the basement of No. 10 Wall st., whence messengers will be despatched at 9 and 11 o'clock, A.M., 12 M., 3, 4, and 7 P. M., to convey them to the Station at Newark; and communications will also be received from Philadelphia, via Newark, at the same place, about 8½ and 10 A.M., 12 M., 2½, 5 and 10 P.M. No additional charge will be made on account of these special messengers.

Communications will be Telegraphed in the order in which they shall be received at the office in Newark.

In case the communication by Telegraph shall be interrupted, public notice thereof will be immediately given.

By order of the Board of Directors,

"T. M. Clark, Secretary."—Eve. Post, Jt 26, 1846.

"The common council appropriates $30,000 "for enclosing Stuyvesant Square with an iron railing," and resolves to apply to the legislature for permission "to include this sum with the amount to be funded for the erection of Alms House Buildings, &c." It is to be set out five feet on the sidewalks of 15th and 16th sts., and ten feet on Second Ave.—Proc. App'd by Mayor, XIII: 313; L. M. R., III: 253.

The attention of the public has been called often, of late, to the propriety of opening and widening Anthony [Worth] street, and it has been urged in favor of that it would greatly tend to reform that sink of pollution known as the Five Points. Much as we are opposed to the revival of that system of improvements that has heretofore wrought so much evil in this city, yet if the widening and opening of every street connected with the Five Points would in any wise tend to break up that nest of vipers, and wipe away from the heart of the city that plague spot, we would not only lift both our hands in favor thereof, but would be willing that every man, woman and child should be assessed to pay the damages. We know of no place on the earth where there are more wretched beings congregated together than at the Five Points, and what renders it still more abhorrent to the feelings of every philanthropist is that the number, instead of decreasing, is constantly increasing."

Eve. Post, Jt 14, 1846.

A telegraph is in operation between Albany and Utica.—Eve. Post, F, 3, 1846, citing Albany Atlas.

Hone mentions a dinner at the "magnificent house" of Wm. B. Astor, on Lafayette Place.—Hone's Diary, II: 269.

Hone dines with other guests of Mr. and Mrs. Wm. H. Aspinwall in their new house, University place, one of the palaces which have been lately erected in this part of the city. . . .—Hone's Diary, II: 270.

The legislature creates the Eighteenth Ward by dividing the Sixteenth Ward in two by a line running through the centre of Sixth Ave. from 14th to 40th St. The portion on the east of this line shall be the Eighteenth Ward.—Laws of N. Y. (1846), chap. 16.

"The Racket Court was opened to-day at noon by a déjeuner à la fourchette,—a grand entertainment of music, dancing, eating, and drinking, at which were present the members of the club, with those belonging to the Union and other kindred associations. . . .

The immense Racket Court appeared, from the upper galleries, like a garden of moving flowers. . . ."—Hone's Diary, II: 271.

This was at 796 Broadway.—Man. Com. Coun. (1846), 655.

"Prince Joseph von Bonaparte and quite a line have arrived in town on their way to Boston to embark in the 'Cambria' for Europe. The Prince made a late visit to Washington, where he was received with marked courtesy by the President."—Eve. Post, F, 25, 1846.

In a printed report of over 300 pages, the history of yellow fever in the U. S. is reviewed, in connection with the question of amending the quarantine laws of N. Y.—N. Y. Com. Adv., F, 28, 1846.

Grace Church (see O, 30, 1845) is completed and consecrated. Mar. 1846.—Eve. Post, Mr 4 and 9, 1846; tablet in the church; Greenleaf, 79; L. M. R. K., III: 923; Man. Com. Coun. (1846), 651; Wilson (Jas. Grant), Centennial Hist. of the Protestant Episcopal Church (1846), 242; descript. of Pl. 195: III: 204, and descript. of Pl. 19-6, III: 845. For description of the new church, see Picture of N. Y., in 1846, 179, and Eve. Post, Jt 22, 1846. For an account of records relating to pew rentals at this time, see N. T. Times, O, 2, 1845; Hone's Diary, II: 269.

The corner-stone of Culver Church, at the north-east corner of Fourth Ave. and 21st St., is laid.—Hone's Diary, II: 273; cf. Eve. Post, Mr 10, 1846. The church was built in 1846-7 after designs by Jas. Renwick, Jr. of Broadway. It originally had two open-work wooden spires.—Putnam's Monthly Mag. (1857), II: 248, with wood-cut view, p. 247, showing the spires. It also appears with spires in Pl. 136, Vol. III of the present work; and in Miller's N. T. A ii: 11 (1859), opp. p. 67.

"The chime of bells erected in the tower of Trinity Church was sounded for the first time this morning."—Eve. Post, Mr 11, 1846. See also ibid., Mr 13, 1846.

The Lyceum of Natural History "has removed its splendid museum and valuable Library into the spacious apartments provided for them in the granite building, in Broadway, formerly known as the Stuyvesant Institute."—Eve. Post, Mr 21, 1846.

The board of aldermen grants permission to John Randel, Jr. and Michael Varick De Witt to deposit in the "Office such plans, models and specifications of his elevated railway" as he may "deem necessary to give the requisite information to the parties interested." In the report of a special committee who had the matter in charge at this time, it was stated that "the petitioners [above named] are in possession of a plan for constructing an elevated railway, that combines the very desirable advantages of elevation, strength, lightness of space, and utility, and is, in the opinion of the Committee, well calculated to answer all the purposes for which it is designed. . . ."

In accordance with the permission thus granted, Mr. Randel deposited in the office of the street commissioner plans and models of his elevated railway, which were "advertised for the objections of the parties interested on the line of Broadway." The committee on streets believed that some method should be devised for the relief of Broadway, but in their opinion this purpose would be
1846
Mar. 23

The writer describes in detail the residence of James Penniman, on the south side of Union Square, between Broadway and University Place, of which Mr. French is the architect; and refers to "a new block of buildings opposite Tompkins square, not yet quite finished, erected under the superintendence of Mr. French," which also afford "strong evidence" of "the improvement in architectural science which has begun to manifest itself in this city, in the erection of private as well as public edifices."—N. Y. Com. Adv., Apr. 2, 1846.

The Astor House is damaged by fire.—Eve. Post, Apr. 1, 1846.

The city has completed the new trunk road neighborhood, and a few days ago there was the burning of the "burst district" to the business aspect which it wore previous to the destructive configuration of July last, the expansive Church edifices, such as Trinity, Grace, Rev. Dr. Pott’s, Rev. Dr. Phillips’; the Divine Unity, &c.—the marble palace on the site of Washington Hall, erected for the Stewarts in a fashionable dry goods depot, the New York club house, adjacent to Niblo’s, and many other public buildings of a public nature, will serve to complete these residences “North of Bleeker street and East of Fifth Avenue,” among which are the new homes of Mr. Lenox, Mr. Aspinwall, Mr. Donaldson, and Mr. Brown (of Brown Bros. & Co.). The writer describes in detail the residence of James Penniman, on the south side of Union Square, between Broadway and University Place, of which Mr. French is the architect; and refers to “a new block of buildings opposite Tompkins square, not yet quite finished, erected under the superintendence of Mr. French,” which also afford “strong evidence” of “the improvement in architectural science which has begun to manifest itself in this city, in the erection of private as well as public edifices.”—N. Y. Com. Adv., Apr. 2, 1846.

The Thumb of York is growing.—According to an estimate made by an experienced architect, the number of dwelling houses in this city, compared with the number of inhabitants, falls short of what it was four years ago, by twelve hundred. One reason for the deficiency at this moment is probably the great fire of last summer.

This is still a good deal of enterprise in the way of building in the upper part of the city.—Whoever goes thither no oftener than once a month, sees changes which give a strange face to places once familiar to him.

The neighborhood which bears the name of Chelsea is rapidly covering itself with new buildings.—The arrangements made by the original proprietors of the land in that quarter are such that no buildings can be erected for any purpose which will make the neighborhood disagreeable, and it is becoming a favorite place of residence. We saw yesterday in Twenty-third street, near the Tenth Avenue, an elegant row of three story buildings set back from the street in such a manner as to leave a large garden in front, which we learned was to be ornamented with three fountains. In Twenty-fourth street, immediately beyond it, is a row of houses of a neat but congruous peculiarity of style of building, intended for chemical residences, finished with economy but with great neatness, and with all the attention to convenience... which the modern practice of domestic architecture has introduced. These snug tenements, we learned, were meant to be let at very low rates, and are almost finished. [Cf. Ap. 2, supra.]

“Nothing can witness the arrangements for health, refreshment and convenience which the introduction of the Croton water has enabled builders to introduce into the houses they are erecting, without being satisfied that the benefits of that great enterprise are not greatly appreciated.”—Eve. Post, Apr. 3, 1846.

The Richmond Hill Theatre (or Tivoli Garden) having been rebuilt, is opened at the New Greenwich Theatre.—Eve. Post, Apr. 4, 1846; Brown, I: 235; L. M. R. K., III: 951. See also playbill in Emmet coll., item 1182. On Feb. 19, 1847, the name was changed to the New York Opera House.—Eve. Post, F 19, 1847; Brown, I: 7: 358. See also drawings of the new building.

By order of the common council on April 9, the “City Arms and Flags” were to be displayed on the city hall on this day, to commemorate the birthday of Thomas Jefferson.—Proc., App’d by Mayor, XIII: 386.

Andrew H. Mickel is elected mayor.—N. Y. Herald, Apr. 15, 1846. He succeeds Wm. F. Havemeyer.—See Ap. 6, 1845. He was succeeded by Wm. V. Brady.—See Ap. 15, 1847. Mayor Mickel lived at one time in the Kennedy house at No. 1 Broadway.—Man. Com. Coun. (1846), 513.

The city acquires, by condemnation proceedings, the land comprised in the present Greeley Square, at Broadway, Sixth Ave., and 35th St.—Prendergast, Record of Real Estate (1914), 49. In L. M. R. K., III: 970, the land is given erroneously as 1826.

“The Trinity Church is now open for the inspection of visitors.”

The interior is described.—Eve. Post, Apr. 29, 1846.

The common council has ordered that the committee on arts, sciences, and schools obtain a full-length portrait of William C. Bouck, late governor of the state, to be placed in the governor’s room in the city hall; the cost not to exceed $1,000.—Proc., App’d by Mayor, XIII: 399.

The first hostilities in the Mexican War occur. Capt. Thornton and his scouting party of dragoons are attacked by the Mexicans on the east side of the Rio Grande.—McMaster, VII: 441. For the causes of the war, see May 13.

“Healy’s picture of Mr. Webster came on yesterday from Washington, where it was painted for the Home Club... Mr. Healy is a very able artist sent out to the United States by the King of France to take the portraits, for his gallery, of some of our eminent statesmen.”—Hone’s Diary, II: 276, 280.

“Antony and Cleopatra” is presented for the first time in America, at the Park Theatre.—Brown, I: 65.

As prescribed by acts of legislature of May 13, 1845 (c. 67), and April 22, 1846, delegates are named at a special election to represent the various counties, cities, and towns of the state at the constitutional convention to assemble on June 1 (c. 67).

The legislature provides that when books of record in the office of the clerk of the county and county of New York become mutilated by use, and the supervisors authorize that they be copied, the copies, when certified by the said clerk to be correct copies of the originals, shall have the validity of the originals.—Laws of N. Y. (1846), chap. 122.

The legislature incorporates the Ocean Steam Navigation Co.—Laws of N. Y. (1846), chap. 145.

The legislature passes an act providing for “the calling of a Convention in relation to the Charter of the City of New York. It stipulates that on the first Monday of June, 1846, delegates shall be elected from the various wards ‘according to the usual manner of city elections.’ These delegates shall meet at the chamber of the board of aldermen, and formulate a new charter or such amendments to the existing charter as are deemed necessary, which business must be completed in time to submit the result to the city and county electors on the first Tuesday after the first Monday of November, 1846. If then adopted, it shall be sent for approval to the next session of the legislature. The election and convention expenses are to be paid from the city treasury. The maximum pay for members of the convention is $1.50 per day.—Laws of N. Y. (1846), chap. 172. See Je 1.

The legislature incorporates the Prison Association of New York, the objects of which are: 1. “The amelioration of the condition of prisoners, whether detained for trial or finally convicted, or as witnesses.” 2. “The improvement of prison discipline and the government of prisons, whether for cities, counties or states.” 3. “The support and encouragement of reformed convicts after their dis-
1846 charge, by affording them the means of obtaining an honest livelihood, and sustaining them in their efforts at reform. 'The executive committee is given power to establish a work-house in the county of New York, and to make ordinances and regulations for its operation, etc.—Laws of N. Y. (1846), chap. 163.

10 On March 20, 1847, the legislature, announcing a state of war with Mexico, congress grants him power to call out 50,000 volunteers, and appropriates $10,000,000 "as a small outfit for his military operations. "—Howe's Diary, II: 278; McMaster, VII: 443.

11 The legislature authorizes the N. Y. & New Haven R. R. Co. "to extend their railroad from the Connecticut line to the New York and Harlem Railroad." The next year states that the New Haven road was "chartered by the Legislature of the State of Connecticut, at the May session thereof, 1844, to construct a line in Connecticut and Westchester over a prescribed route. The present act supplement the charter with fuller details regarding organization for the construction of the road.—Laws of N. Y. (1846), chap. 195.

12 The legislature incorporates the Hudson River R. R. Co. and authorizes it to construct "a single, double, or treble railroad or way, between the cities of New-York and Albany. " The road is to be commenced within one year, and a single track road is to be completed within four years. Its location in New York City may be on or west of Eighth Ave. and on or west of Hudson St., if the consent of the city corporation is obtained, but the road shall not infringe on the rights or privileges of the Harlem R. R. Co. "by using any track already laid contiguous to the said road or shall have any part of it" located "east or within one mile of the said Harlem railroad, in the county of Westchester."—Laws of N. Y. (1846), chap. 216. On March 20, 1847, the time for commencing the Hudson River R. R. was extended to Nov. 15, 1847.—Ibid. (1847), chap. 31. See, further, My 4, 1847; also Stevens, The Beginnings of the N. Y. Cent. R. R. (1826).

13 President Polk signs the bill of May 15, (q. v.), and issues a proclamation declaring that a state of war exists between the U. S. and Mexico.—Evee. Post, My 15, 1846; Winsor, VII: 2925; McMaster, VII: 445.

14 "It has long been the fashion to assert that the annexation of Texas was the cause of the Mexican War. No such delusion was held by any persons in 1846. The first meeting in New York attributed the war to 'the aggravated and multiplied wrongs to which our country has been subjected by Mexico during a long series of years;' to the refusal to make reparation after it had been promised; to the recent rejection of our minister sent to make a friendly adjustment; and to the invasion of our soil. At Baltimore one branch of the city council stated the causes of the war to be, 'a systematic and premeditated course of falsehood, and treachery, and on the part of Mexico toward our Government.' A meeting of citizens at Easton, Pennsylvania, declared the causes of the war were the wrongs inflicted upon our citizens and the bloodshed murder of our gallant officers and men. Another at Harrisburg found justification for a resort to arms in Mexico's 'long-continued disregard to our Government and official agents,' in her refusal to adjudge our rightful claims, in her refusal to negotiate on the subjects in dispute, and in her invasion of our soil.—McMaster, VII: 446. See also ibid., VII: 473 (chap. 81).

15 The legislature provides for "the enrolment of the militia and to encourage the formation of uniform companies.—Laws of N. Y. (1846), chap. 270. See, further, My 6, 1847.

16 The legislature passes a new quarantine act providing that the average charge for vessels at quarantine shall be 7 days the Marine Hospital, on Staten Island.—Laws of N. Y. (1846), chap. 30. An act of April 10, 1850 (q. v.), superseded this.

17 The legislature incorporates "The New-York and Offing Magnetic Telegraph Assn.," formed "for the purpose of constructing lines of telegraph from New York city to such points to and from the offing and seaboard as may be deemed expedient for commercial purposes, and saving of human life, and to construct station houses and observatories," etc.—Laws of N. Y. (1846), chap. 335.

18 The common council receives formal notice of the declaration of war between Mexico and the United States (see My 13).—Proc., App'd by Mayor, XIV: 4. See My 15.

19 The common council grants the request of citizens that a public meeting be held in the Park in relation to the existing war with Mexico.—Proc., App'd by Mayor, XIV: 4. See My 25.

21 A great war meeting is held in the Park, declaring for "no com promise" with Mexico.—N. Y. Herald, My 21, 1846. Resolutions are adopted, approving of the war, approving the action of congress and the president in carrying it on, urging promptness and vigor in its prosecution, giving thanks to Gen. Taylor, his officers and men, and resolving upon the appointment of a "committee of safety."—N. Y. Com. Adv. My 21, 1846.

22 Agreeable to a vestry resolution of April 13, the new Trinity Church is consecrated, this being "Ascension Day."—Evee. Post, My 22, 1846; Berrian, Hist. Sketch of Trin. Ch., 316; Dix, Hist. of the Parish of Trin. Ch., IV: 275; Howe's Diary, II: 279. For description, see Great Metropolis for 1846, 81. For various views of the three Trinity Churches, see plate citations in L. M. R. K., III: 714. See also descrip. of Pl. 125, III: 688; and of A. Pl. 26-3, III: 881.

23 "The Messrs. Delmonico have recently erected a large building as a hotel at No. 25 Broadway. The house is handsomely furnished throughout... . The well-earned reputation of Delmonico will no doubt cause it to be much frequented."—Evee. Post, My 26, 1846. This was on the south-west corner of Morris St; it was afterwards well known as the Stevens House (No. 21-27 Broadway). Until 1856, it vied with the Astor House as the finest hotel in the city. It was torn down in 1919 to make way for the new Conard Building—N. Y. Times, Nov. 23, 1919 (Real Estate Section, p. 5); L. M. R. K., III: 978. See 1855.

24 A convention of delegates to consider amendments to the state constitution assembled in Albany, and elects John Tracy of Chenango Co. president.—Jour. N. Y. Const. Convention (1846), 9-12. The sessions of the convention continued until Oct. 9 (q. v.).

25 Elections are held in the eighteen wards to choose "delegates to a county convention for forming a new, or revising and amending the present charter."—Evee. Post, Je 2, 1846. These delegates convened in city hall on July 6 (q. v.).

26 The Howard House, at the corner of Howard St. and Broadway, is opened by Messrs. Stone and Riker.—Evee. Post, Je 16, 1846. This should not be confused with the hotel of the same name on the east side of Broadway between Maiden Lane and John St.—See A. Pl. 25, Vol. III.

27 The N. Y. Herald receives the first telegraphic news from Washington, 18 hours in advance of the mails. This reports the retreat of the Mexicans.—N. Y. Herald, Je 7, 1846.

28 Trinity Church is opened for worship.—Evee. Post, Je 8, 1846.

29 "New Theatre.—Vauxhall Garden, which is an old established place, is opened for theatrical performances."—Evee. Post, Je 10, 1846.

30 The Oregon question is settled by a treaty between the U. S. and Great Britain, signed at Washington by James Buchanan, secretary of state, and Richard Pakenham, British minister. The northern boundary of the U. S. west of the Rocky Mountains is fixed at 49° N. L. and the middle of the channel between Vancouver Island and the continent. The treaty was signed by the president on June 19; ratifications were exchanged on July 17, and it was proclaimed on Aug. 5.—U. S. Treaties, Conventions, etc. (Washington, 1910), I: 656-58; Macdonald, Select Dec., etc., 555-58.

Hone writes: "It makes an interesting item in my journal, that I should have dined with the British Minister on the day on which this joyful event occurred,—an event which restores the prosperity of the nation, sets commerce again upon its legs, makes the husbandman's corn grow higher and his grass more green, and would equally rejoice the manufacturer, if they would let us enjoy this unhappy tariff alone."—Hone's Diary, II: 280.

31 The first match game of base ball on record is played on this day at the grounds of the "Knickerbocker Ball Club" (see S. 3, 1845) in Hoboken. The "New York" Club defeats the "K. B. C." by the score of 23 to 1. Davis, one of the New York nine, was "fixed 6 cts for swearing."—Game Book, 1845-49 (MS.), in N. Y. P. L. See also July 13, 1828.

32 The corner-stone of the new St. George's Church is laid on the corner of Rutherford Pl. and 16th St., on land given by Peter G. Stuyvesant.—Evee. Post, Je 24, 1846. The architects selected were Otto Blesch and Leopold Eidlitz. The building was opened for service on Nov. 19, 1848; it was consecrated Dec. 4, 1849, but was not completed until Nov. 19, 1856, when the spire was erected, and a clock and large bell added. On Nov. 14, 1865 (q. v.), St. George's Church was gutted by fire. It was rebuilt as nearly as possible in conformity with its original plan, and reopened on Sept. 29, 1867.
In 1840, the old spires, which had not been destroyed in the fire of 1839, were found to be unsafe, and were accordingly taken down.—Antice, Hist, of St. George's Church (1911), 167-68, 175-79, 205-21, 234-35, 316. For early history of the church, see Jf 3, 1872. See also L. R. K., III, 933, and descrip, of Pl. 153a, II, 883.

July 4

E. Porter Edden's "Model of New York," an accurate miniature in carved wood, 24 by 20 ft., showing every object in the city and harbour, and surmounted by an ornamental canopy, is exhibited publicly for the first time at the Minerva Rooms, 406 Broadway.

—Eve, Post, Ap 23, Jf 7, and Ag 4, 1846. For complete description, see Edden's "New York, Past, Present, & Future" (1849), appendix, following p. 125. See also 1849.

6 Delegates chosen from the several wards convene in the chamber of the board of aldermen for the purpose of "forming a new or revising and amending the present charter." Deliberations lasting until Oct. 26, 1846 (p. v.), resulted in a document called "Amendments to the Charter of the City of New York."—Journ. of Convent. (1846), 790-97.

July 5

Sloat raises the U. S. flag over Monterey. On July 11, the flag was raised on Sutter's Fort on the Sacramento. "Each flag-raising was followed by the reading of a proclamation in which Sloat claimed California as a part of the United States..."—McMaster, VII, 489. Com. Stockton, succeeding Sloat, took Los Angeles, and was at one time himself governor of California. Fremont was made military commander. This conquest not proving complete, it was necessary for Stockton to recapture the position early in 1847.—McMaster, VII, 489; Winsor, VII, 420.

7 Maps of Bowling Green, and Wall Hall, to profiles State St. bear this date. See maps No. 87 and 872, bureau of topography, borough president's office.

The common council appropriates $250 to procure a portrait of Wm. F. Havemeyer, late mayor.—Proc., App'd by Mayor, XIV, 48.

10 The corner-stone of a new building for the American Tract Society is laid at Spruce and Nassau Sts.—Eve, Post, Jf 21, 1846.

13 The common council permits the N. Y., Albany, and Buffalo Mutual Assurance Society to erect a building on the north side of the street through Eighth Ave. to Bank St., through Bank St. to and through Washington St. to Rector St., thence through Wall St. to the "Merchants' Exchange Buildings," under certain regulations.—Proc., App'd by Mayor, XIV, 55.

A bill having been introduced in congress making an appropriation for improving the fortifications at the Narrows, Henry L. Seaman, speaking in favour of the measure, says: "I ask the members of this House to remember that three-fourths of the revenue of the country is annually collected in the city of New York, and that property, to an immense amount, from different and distant parts of the country, and belonging to citizens of every state in the Union, is continually in store there, to say nothing of the vast amount belonging to her own citizens." The bill provides the sale of exchange of the site and materials of old fort through Gansvoord, and the application of the proceeds to the acquisition by the United States, and the repair, of Fort Tompkins and Fort Richmond on Staten Island. Defences of New York Harbour are also projected at Sandy Hook. Forts Hamilton and Lafayette, on the Long Island side, are not considered sufficient to make the channel secure, even with the assistance of the Hudson and Morton batteries.

It was stated recently in a New York newspaper that: "It is well known to every engineer that there is no spot where the city can be so well defended as at the Narrows, on the Staten Island side, and that, whenever a hostile fleet passes that point, the city must be subjected to the will of the enemy, and may be bombarded or destroyed. During the War of 1812 the State of New York expended nearly half a million dollars to erect fortifications near the Telegraph. As soon as peace was declared the works were abandoned; and they have since become (except materials) utterly worthless. Not a single gun is at present mounted on them. The State has long since agreed to sell all its works and ground for a sum far less than many individuals would be willing to pay for the location. The interval passes the house.—From Seaman's printed speech, Wash., 1846.

18 The common council orders that a grant be made to the Roman Catholic Orphan Asylum Society of the land on the east side of Fifth Ave., between 51st and 52nd Sts., and extending eastward 450 ft. from the avenue, on condition that the society erect within three years a building or buildings upon it, the plan of which shall be approved by the mayor, and with certain other restrictions. The board also orders that a lease be granted to this society for the rest of the block as far east as Fourth Ave., during the pleasure of the common council.—Proc., App'd by Mayor, XIV, 59-60. See Ag 1, and 1841. There is a small wood-cut view of the building in Man. Com. Coun. (1864), 322, and in the Manuals for the following years; see also L. R. K., III, 925.

The common council appropriates $1000 "for constructing free benches on the Beldry."—Proc., App'd by Mayor, XIV, 67.

Aug. 28 The common council orders that Broad St., from Wall to South St., be renumbered.—Proc., App'd by Mayor, XIV, 67.

Congress passes "An Act to provide for the better organization of the Treasury, and for the collection, safe-keeping, transfer, and disbursement of public revenue." Under this act, the sub-treasury of New York (1844), chap. 92; Winsor, Nat. & Civ. Hist. of Am., VII, 289.

The Board Line announces its intention of establishing a line of steamships "between Liverpool and New York direct." The line's New York agent was now D. Brignall, Jr., with an office at Harden & Co.'s, No. 6 Wall St.—Com. Adv., S 8, 1846. Cj 27, 1849; see Jf 23, 1847.

The progress of laying down the Russ pavement, as it is called, between Chambers street and Reade street, has been interrupted by the want of a sufficient number of stone blocks to fill the space. Workmen are now getting them out in the quarry. The pavement is described as follows: The street is first dug down about two feet, a foundation is then laid, consisting of cement intermixed with fragments of stone, the surface of which is made uniform and level, and strewn with a layer of fine gravel. On this are laid the granite blocks which compose the upper part of the pavement; they are about nine inches high and six inches in width each way. The interstices are filled from the top with fine gravel."—Eve, Post, S 406. See also Jf 23, 1846.

"Mr. Stewart's splendid edifice, erected on the site of Washington Hall, in Broadway, between Chambers and Reade streets, is nearly finished, and his stock of dry goods will be exhibited on the shelves in a few days. There is nothing in Paris or London to compare with this dry-goods palace."—"Hone's Diary, II, 284. A full description of the store, after its opening, was published on p. 16—N. Y. Herald, S 18, 1846. See also Eve, Post, S 21 and 22, 1846.

The first practical sewing-machine is patented, by Elias Howe, Jr., who had been working on the invention for about five years.—N. Y., Leading Am. Inventors, 338-68. "Years of disappointment and discouragement followed before he was successful in introducing his invention, and several imitations which infringed his patent, particularly that of Isaac Merritt Singer (1811-1875), had already been successfully introduced and were widely used. His rights were established after much litigation in 1854, and by the date of expiration of his patent (1867) he had realized something over $2,000,000 out of his invention."—Encyclop. Brit., XIII, 815.

The corner-stone of the Church of the Annunciation is laid in 1846 St., between Sixth and Seventh Aves.—Eve, Post, S 11, 1846.

Nikol's Garden, on Broadway between Prince and Houston Sts., is destroyed by fire. For details, see N. Y. Herald, S 19, 1846; L. M. R. K., III, 925.

The corner-stone of the Church of the Puritans, at the southwest corner of Broadway and 14th St., opposite Union Square, is laid, ground having been broken on Sept. 7. James Renwick, Jr., is the architect.—Eve, Post, S 7, 21, 23, 1846. This substantial stone church appears in views of 1849.—See Pls. 15 and 156, Vol. III. The congregation had been organized on April 12 in the chapel of N. Y. University, and its services were temporarily con-
The common council authorizes the chief engineer to procure an alarm-bell of about 4,000 lbs. to be placed in the cupola of Centre Market.—Proc., App’d by Mayer, XIV: 126. Alarm-bells on market-houses came into vogue several years before.—Ibid., passim.

The charter convention delegates (see Jl 6) sign the completed "Amendments to the Charter of the City of New York."—Jour. of Convention (1846), 795-9. Durand says they made amendments that they "proposed more specific provisions for enforcing the separation of powers, and stricter checks upon the common council. But the absorption of popular attention in the beginning of the Mexican War, in the congressional election, and in the state constitutional convention then in session, withdrew interest almost entirely from the city convention. Accordingly, the poll on the adoption of the charter was decisively small and there was a small majority against it. Yet the work of the convention had not been without effect. Many of its proposed measures were copied word for word in the charter actually adopted in 1849 (9 v.), while others were incorporated in the amendments of 1853."—Durand, The Finances of N.Y. City, 67-68.

The release of a runaway slave by order of a New York judge, creates a scene of wild excitement in Nassau St. near Clinton Hall. In recording the incidents, Hon. observes: "How long will the North and South remain a united people?"—Hone’s Diary, II: 286.

Although the electors in New York City vote nearly four to one against the amended constitution, the up-state vote is strongly in its favor, and it is ratified.—Proc., 9, 7; 11, 1846; Leg. Manual (1853), 166.

The common council passes a resolution commending E. Porter Belden’s model of the city (see Jl 4).—Proc., App’d by Mayer, XIV: 142.

The common council requires that the N. Y. & Harlem R. R. Co construct without delay a Bridge of sufficient strength and proportions, and a more direct passage for the transit of vehicles across their deep cut in the Fourth Avenue," at its intersection with 34th St. and another at 35th St.—Proc., App’d by Mayer, XIV: 145.

"The clock in Trinity Church is finished."—Proc., N, 17, 1846.

Gen. Winfield Scott sails from New York to take the chief command of the American armies in Mexico.—Proc., D, 2, 1846; Losing, Harpers’ Popular Cyc. of U. S. Hist. (1853), III: 1451; Historical Register and Dictionary of the U. S. Army (1903), I: 870; Hone’s Diary, II: 288.

At a meeting of the Sketch Club, in this month, John G. Chapman proposed that an association be formed of both artists and men of letters, with others who were interested in the promotion of the arts. On Jan. 9, 1849, a notice was sent to every member of the Sketch Club that "The first general meeting of the association of gentlemen engaged or interested in Letters or the Fine Arts, will be held on Wednesday next, the 13th inst., at 8 P.M., in the Rotunda of the New York Gallery of Fine Arts, in the Park..." Such a meeting was held, and, on motion of Edw. S. Van Winkle, "The Century" was adopted as the name of the association, because of its restricted membership to one hundred persons.

Rooms were taken at No. 495 Broadway. In the spring of 1849, the association removed to 453 Broome St. (not 455 Broadsay, as stated in III: 937). In 1856, it moved to No. 577 Broadway; and, in 1852, to No. 24 Clinton Place, near Greene St. In 1857, it occupied its own building at 109 E. 13th St.; and, in 1859, erected its present building at 7 W. 43d St. from plans by McKim, Mead, and White—Orion and Hist. of the City (1886), 295, 305, 20, 21; Galaxy, Aug., 1876; The Fifteenth Ann. of the Founding of the Century (1879), 97; Losing, Hist. of N. Y. City, II: 507-9; L.M. R. K., III: 937.

The common council appropriated $1,000 to be applied to the organization of the "1st Regiment of N. Y. Volunteers," which has been called into service in the war with Mexico.—Proc., App’d by Mayer, XIV: 178.

The sub-treasury leases a portion of the property at 30-32 Wall St. (see 1844).—Ann. Rep., Supervising Architect, U. S. Treasury Dept. (1875), 19; Hardenbrooke, Financial N. T., 254. See, further, Aug. 21, 1854, at which time the entire building became the assay office.

Mayor Mickle presides at a meeting in Tammany Hall to adopt measures for aiding the famine sufferers in Ireland. A committee is appointed to collect donations.—Proc., D, 28, 1846.
Another meeting for the relief of Ireland was held at the Broadway Dr. Tabernacle on Feb. 15, 1847.—Ibid., F 16, 1847. See also ibid., 26 F18, 22, 24, 27, Mr 13, 3, 6, 8, 11, 15, 20, and My 8, 1847.

1847

The Factory Act, passed by parliament in this year and altered somewhat in 1850, "practically established a ten-hour day for labor, a demand long urged by the laboring class and bitterly opposed by manufacturers."—Hazen, Europe since 1815, 456.

In this year, after much agitation, ministerial responsibility was finally introduced in Canada, by Lord Elgin. It spread rapidly to the other colonies of Great Britain.—Hazen, Europe since 1815, 521.

In this year, the Halkybt Society of London began its long series of historical publications.—Winer, I, xxxvii.

In this year, Richard M. Hoe patented his so-called "lightning" printing-press.—Harper's Engr. of U. S. Hist. (1912); McMaster, Civil, VII: 99.

In this year, the common council of Philadelphia printed, in one volume, its early minutes from 1704 to 1776.—See copy in N. Y. P. L. The early records of New York City were not published until 1897 (q.v.) and 1905 (q.v.). See also J 22, 1848.

In this year, Dr. John W. Francis, of New York City, patented a typewriter, "in which a motion similar to that of a piano hammer was employed to throw up the types, which were arranged in a circle to a common center. It was bulky and intricate, and although capable of good work was too costly for a commercial venture. This machine contained many of the salient features of the typewriter of to-day, such as the carriage traveling from side to side over type basket, a large bell to indicate the end of the line, and blank key for spaces."—Scientific American, Je 5, 1915, p. 512. For the first commercially successful typewriters, in the designing of which Sholes, Soule, Glidden, Dennamore, and the Remingtons collaborated after 1866, see ibid., 514.

In this year, the attempt (see 1823 S 25, 1825 J 28, 1833) was renewed to invade Trinity churchyard by an extension of Albany St. to Broadway. Its advocates claimed that the extension would not disfigure the churchyard. Trinity vestry presented a remonstrance to the board of aldermen. The board of aldermen adopted a report adverse to the scheme, which was an obvious attempt to benefit a small group of property holders, "without regard to the needs of the public or the rights of the dead."—Dix, Hist. of Trinity Church, IV: 333-14, citing Church Records, III: 446. See, further, 1851.

In this year, J. Disturnell published a guide-book entitled A Description of the City of New York, edited by O. L. Holley. It contains historical and descriptive notes regarding parks, squares, public buildings, etc., not found elsewhere, such as the inscriptions on various monuments (pp. 66-71), and a description of the several excursions which may be taken from N. Y. to other points of interest near the city. It is illustrated by two views (one of Castle Garden), drawn by Wade and engraved by Dongal.

In this year, the N. Y. Academy of Medicine was founded, its earliest meetings being held in the Lyceum of Natural History, 561-565 Broadway (q. v. infra). From March 3, 1847 to June 5, 1850, the Academy met in Convention Hall, 175 Wooster St.; and from 1850 to 1880, in N. Y. University on Washington Square.—N. Y. Medical Jour., Jl 21, 1911; Man. Com. Coun. (1851), 415; Eev. Jour., Ja 14, 1847. See My 17, 1875.

In this year, the New York City Hall, the edifice so situated at the southwest corner of Nassau and Beekman Sts., not only provided accommodations for the Mercantile Library, but also was occupied in part as a hotel. (See also 1851.)

The Lyceum of Natural History, at this time, occupied the front rooms in the second storey of the N. Y. University Medical College (originally the Stuyvesant Institute), at 659 Broadway. See also My 15, 1846.

The principal hotels were:
American Hotel, Broadway, n. w. cor. of Barclay St.
Astor House, Broadway, bet. Vesey and Barclay Sts.
Atlantic Hotel, 5 Broadway, near Battery.
Battery Hotel, 8 Battery Place.
Carlton House, Broadway, cor. Leonard St.
City Hotel, Broadway, bet. Cedar and Thames Sts.
Clinton Hotel, Beekman, s. w. cor. Nassau St.
Croton Hotel (a temperance hotel), 142 Broadway.

Delmonico's Hotel, 25 Broadway.
Dunning's Hotel, Cortlandt, cor. Washington St.
Franklin House, Broadway, cor. Dew St.
Globe Hotel, 66 Broadway.
Howard's Hotel, Broadway, cor. Malign Lane.
Judson's Hotel, 69 Broadway.
Lovejoy's Hotel, Park Row, cor. Beekman St.
Manor House (Bunker's), 39 Broadway.
Merchants' Hotel, Cortlandt, near Greenwich St.
National Hotel, 5 Cortlandt St.
New York Hotel, 721 Broadway.
Northern Hotel, Cortlandt, cor. West St.
Pacific Hotel, 162 Greenwich St.
Pearl St. House, 88 Pearl St.
Rathburn's Hotel, 160 Broadway.
United States Hotel, Fulton, bet. Pearl and Water Sts.
Western Hotel, 9 Cortlandt St., near Broadway.

Tammany Hall, at the e. cor. of Nassau and Frankfort Sts., was kept on the New York plan of letting rooms by the day or week, the occupants getting their meals when and where they chose.—Holley, A Description of the City of New York (1847), 39, 33-34, 54-55.

The first church of St. Francis Xavier, in Elizabeth St., was founded in this year. It was destroyed by fire after being in use only about a year. In 1850, land in W. 16th St. was acquired for a new church.—See later history of the church by Harvie, in N. Y. Times, N 23, 1922. For the corner-stone laying, see F 24, 1850.

In this year, the Ladies of the Sacred Heart purchased property of Jacob Lerillard at Manhattanville, and erected the Sacred Heart.—Man. Com. Coun. (1868), 460.

In this year, the old First German Reformed Church, at 64-66 Nassau St., which stood on the site of Hallam's Theatre of 1755 (q.v.), lately occupied by Gosling's cheap "eating house" or "dining saloon," was demolished.—L. M. R. K., III: 915, 915; Picture of N. Y. in 1846, 81. In 1848, two large, well-built stores were erected in its place.—Belden, New York, Past, Present & Future (1851), 78, footnote.

In this year, C. B. & F. B. Nichols published, in two parts, a series of 13 views of New York City. For the list of these, see Andrews's The Journey of the Iconophiles around New York in search of the historical and picturesque, 45. A number of these, to which others were added, were republished by Prall, Lewis & Co. in Belden's New York, Past, Present & Future (1851). For the added ones, see Andrews, 46.

The Columbian, at 450 Broadway; Mechanics' Hall, and the Bulletin church at 472 Broadway; the Church of the Divine Unity (Dr. Bellow's), at 548 Broadway; the Church of St. George the Martyr, 563 Broadway; and Lafayette Hall, at 597 Broadway, all date from this year.—Man. Com. Coun. (1865), 615. Also the Broadway Theatre.—See S 22.

In Valentine's Manual for 1847 were published the following contemporary lithographic map and views map of the city, 1847; almshouses on Blackwell's Island, 225; Columbia College, 291; an old Dutch house (bearing date 1697) in Pearl St. 346; and another (1689) in Broad St., 371.

For view of the old Abbey Hotel, on BloomfieId Road, 1847, see ibid. (1864), 386.

In this year, The Literary World was established. Edited by Hoffman and the Duyckincks, it continued until 1852.—S. D. North, The Newspaper and Periodical Press (1884), 118.

The mode of the period in celebrating New Year's Day is thus described by Howe: "New Year's presents have abounded this year. This is the Parisian mode of celebrating le jour de I'an, and we are getting into it very fast. Some of the houses where I visited yesterday presented the appearance of bazaars, where rich presents were displayed, from the costly cashmere shawls and silver tankard to the toy watch and child's rattle."—Howe's Diary, II: 292.

The Century Association is formally organized and named.— See summary under D, 1846.

Hon. Samuel Cunard and others, contractors with the lords commissioners of the British admiralty for the conveyance of the mails between Liverpool and New York, have arranged to make Jersey City the terminus of their line of steam packets.—Com. Adv., Ja 23, 1847, citing the Newark Daily Adv. For a view of the Cunard dock in Jersey City, built soon after this date, see Illustrated Am. News, Ji 19, 1851. For the arrival of the first Cunarder, see Dec. 29.
THE CONOGRAPHER OF MANHATTAN ISLAND

19. "A large number of the friends of the project of erecting a monument to Washington in this city, have associated for the purpose of procuring a revival of the charter of the late Washington Monument Association. They propose, therefore, to celebrate the approaching anniversary of the birth day of Washington, at Castle Garden." —Eve. Post, F 16, 1847.

23. A great public meeting is held at Vauxhall Garden and a "rapid, strong-handed and decisive prosecution of the war" is urged. —Eve. Post, F 19, 1847. Another meeting was held at Tammany Hall on March 4th. —Lossing, in Harper's Popular Cyc. of U. S. Hist. (1847), 574.

Mar. Subscriptions for the relief of the famished Irish are kept up with undiminished spirit. The Relief Committee have received upwards of $10,000. —Hone's Diary, II: 301. See also Hone's entry of May 31—Ibid., II: 399.

5. The use of adhesive postage stamps on letters is authorized by congress. —U. S. 29th cong., 2d sess., chap. 62. On June 1, 1847, prepayment by stamps was made compulsory. —Encyclopedia Brit., XXII: 195.

Public ceremonies are held, by order of the common council, in honour of Capt. Morris of Albany and Capta. Field and Williams of Buffalo, who fell in the battle of Monterey. The bodies lay in state all day in the city hall. —Eve. Post, Mr 3, 4, 5, and 6, 1847.

15. Lawrence Van Wyck, a civil engineer, opens a manuscript diary relating to progress in the construction of the Hudson River Railroad. Beginning on this date at Spuyten Duyvil, the notes describe the work as far as Dobbs Ferry on April 27. Beginning again, after a lapse, on Jan. 29, 1848, at Livingston, they continue to July 1. They begin again on July 16, 1853, when the writer is working for the Albany and Susquehanna R. R. Co. —See also the author's fair copy of his original diary (MS.), in N. Y. P. L.

A dinner is held in honour of Thos. Butler King, of Georgia, at the Astor House, "by merchants and other citizens of this place, on account of the support given by him in the last Congress to the bill for establishing a line of government steamers between this port and England." —Eve. Post, Mr 24, 1847.

25. "The reproof to our city that the monument of Lawrence was in ruins no longer exists. The vestry of Trinity Church, with a commendable spirit of liberality, have erected in front of that church on the line of Broadway, a new monument of brown free stone, beautifully sculptured, beneath which lie the remains of Lawrence and [his lieutenant] Ludlow.

"The enclosure of the monument is formed by eight cannons, connected by chains. These are naval trophies, captured during the war...."

3. "The cannon bear the initials and crown of the English monarch, and are dated as far back as 1725. It is to be regretted that they could not be so planted in the ground as to exhibit conspicuously the fact that they are the trophies of victory." —Eve. Post, Mr 25, 1847. —N. Y. Herald, My 24, 1847. —Lossing, Picturesque Field Book of the War of 1812, 712-13. See also "Tombs in Old Trinity," by Mrs. Lamb, in Harper's Mag., N, 1876. Regarding the first place of burial and Lawrence monument, see S 16, 1813; Ap 2, 1825; Ap 10, 1826; 1833; Ag 17, 1844.

29. Gen. Morales surrenders Vera Cruz to Gen. Scott, after a bombardment of several days by Commodore Conner, with Scott, who had landed with 12,000 men on March 9, joining in the campaign. —Lossing, in Harper's Popular Cyc. of U. S. Hist. (1847), 1451.

In 1847-48. Maj.-Gen. Worth commanded a division under Gen. Scott, and participated in the capture of Vera Cruz, and in all battles from Cerro Gordo (see Ap 18) to the assault and capture of the city of Mexico.—Ibid., p. 1546.

"We notice that ornamental trees known by the name of the 'Pride of China,' have been placed on the sidewalk in front of the Astor House. This is a great improvement, and we would like to see the sidewalks of Broadway, from the Battery to the upper tenantry, shaded by these beautiful trees." —Eve. Post, Ap 5, 1847.

The Astor House is illuminated "in a brilliant style" in honour of the victory at Buena Vista, and the four centre windows are occupied with transparents bearing the names of Palo Alto, Resaca de la Palma, Monterey, and Buena Vista. At the close of the illumination, on Feb. 23rd, it sent off bearing the name of Gen. Taylor. —Eve. Post, Ap 10, 1847.

Sarah Heywood, widow, conveys to William B. Moffat the property known as "Woodlawn," including the house and land surrounding it between 68th and 107th Sts., West End Ave. and the river, for $20,000. —Liber Deeds, CDLXXXI: 424. This was the former Nicholas Jones house. —See O 12, 1764. Moffat leased the premises to William L. Hidy, who ran the house as the Wood- lawn Hotel. Some time after Moffat's death in 1862, it became the country residence of Courtlandt F. Dixon; and was the first home of the New York Infant Asylum.—Mott, The N. T. of Yesterday, 47. For an earlier description of the estate of "Woodlawn," see ibid., 23. The house is shown, still standing, on Bromley's Atlas of 1847. It does not appear on the Insurance Map of 1909. See also L. R. K., III: 98-92; PL 178, Vol. III.

A national salute is fired in honour of the victory at Vera Cruz. —Eve. Post, Ap 12, 1847.

The legislature authorizes the board of education to establish evening free schools for the education of apprentices and others.—Laws of N. Y. (1847), chap. 74.

Duncan Phyfe sells out his stock of furniture and retires from business. A copy of the sales catalogue is in the possession of Mr. Charles O. Cornelius, author of Furniture Masterpieces of Duncan Phyfe (1912), p. 43.

The mayor approves a resolution in regard to Gen. Taylor's victory at Buena Vista on Feb. 22 and 23 (q. v.), and Gen. Scott's achievements at Vera Cruz in March (q. v., the 29th). It provides that the thanks of the city be extended to them, the men of their commands, and the portion of the navy which cooperated with them; that the freedom of the city be presented to them; that swords be presented to Gen. Scott and his second in command (Gen. Wool), and to Gen. Taylor and his second in command (Gen. Wool); that, on the evening of May 7, all the public buildings in the city be illuminated, and the citizens at large be requested at that time to illuminate their dwellings; that the same day national salutes be fired at the Battery, Washington, and Park Parade Ground, Union Square, and Tompkins Square. At the same time the common council highly commends "the able and skilful manner in which this War has been conducted by the National Administration." —Proc., App'd by the Mayor, XIV: 317-19; N. Y. Hist. Soc. Coll. (1885), 421-24; Hone's Diary, II: 397 (containing an account of U. S. soldiers killed). A news item reads: "Passing through Franklin street the other day, we saw, in front of the Fifth Ward Hotel, the mutilated remains of a marble statute of William Pitt which once ornamented the front of the government house [sic] in Wall Street, when New York was under the dominion of the British crown. . . ." The article tells how the statue, "after lying in the corporation yard for a long time, was sold at auction for a dollar or two, preparatory to the removal of the yard to Gowack street." The buyer "placed it on a pedestal in the yard of his dwelling in Water street. Property, however, soon became too valuable in that vicinity of residences and the homestead was demolished to make room for a row of stores, and in the cellar of one of these, completely buried in rubbish," the statue remained until the owner recently presented it to the keeper of the Fifth Ward Hotel, Mr. Riley.—N. Y. Com. Advo, Ap 26, 1847. —Cf. Stevens, Progress of N. Y. in a Century, 1776-1876, 14-15. The statue had the same location in 1859 (Knickerbocker Mag., LIV: 13), and is pictured in a view of the hotel in 1864 (Man. Com. Coun., 1864, 598). It came into the possession of the N. Y. H. S. in 1864 (q. v., Mr 1).

The legislature passes an act "authorizing an estimate and assessment to be made for a part of the ground on Madison Square.
FIRST MESSAGE SENT OVER THE ATLANTIC CABLE, FROM QUEEN VICTORIA TO PRESIDENT BUCHANAN, ON AUG. 16, 1858, AND THE PRESIDENT'S REPLY. SEE P. 1877 AND ADDENDA, VOL. VI.
in the city of New York, and empowering the corporation of said city to use said square for public purposes."—Laws of N. Y. (1847), chap. 138. See also Proc., App'd by Mayor, XIV: 333; L. M. R. K., III: 970.

The legislature passes a state-wide act "providing for the registry of births, marriages and deaths." In New York City marriages and births are to be reported "direct to the city inspector."—Laws of N. Y. (1847), chap. 152. As no penalty was prescribed in the law, it had no immediate effect in the city. See Ap 15, 1853.

In this month, the Hamburg-American line of steamers was established between New York, Southampton, and Hamburg.—Encyclop. Brit., XXV: 815.

There are now four parties of Engineers engaged in surveys for the purpose of settling the location of the line for the Hudson River Railroad. The progress thus far made, is such, that the location is expected to be settled by the latter part of this month, from this city to Fishkill, a distance of sixty miles. . . .—Even. Post, My 4, 1847.

The legislature modifies the street plan of the commissioners of 1807-11 by extending the line of Broadway northward from 45th to 71st Sts. Part of this route is new, and part the old Bloomingdale Road. The act defines the course of it.—Laws of N. Y. (1847), chap. 203.

The legislature passes an act to supersede earlier acts relating to reports required of masters of vessels arriving at this port, and extending the time for making the same. See also amendments on April 11, 1849, in ibid. (1849), chap. 359, and on July 11, 1851, in ibid. (1851), chap. 523.

The common council permits the Hudson River R. Co. "to construct a double track of rails, with suitable turn-outs along the line of the Hudson River, from the mouth of Devil Creek to nearly Sixty-Eighth Street; occupying so much of the Twelfth Avenue as lies along the shore, thence wending from the shore so as to intersect the Eleventh Avenue, at or near Sixth Street; thence through the middle of the Eleventh Avenue to about Thirty-second Street; thence on a curve across to the Tenth Avenue, intersecting the Tenth Avenue at or near Thirty-Third Street; thence through the Tenth Avenue to the West Hudson Sts., and thence through the middle of West Street to Canal Street." The ordinance also prescribes regulations for grading. The company is required to file with the street com' a map showing the location and intended grades.

Permission is given to the company "to run their locomotives as far south as Thirtieth Street, and no farther." The company is prohibited from running a stated train between any points below Thirty-second Street, for the carrying of passengers between those points, under the penalty of twenty-five dollars for each passenger from whom fare shall be received therefor.—Proc., App'd by Mayor, XIV: 107. The work of construction is commenced immediately.—From chron. supplied by the company. See Je 12, 1848. The line, at its southern end, when constructed, is to be kept clear of Chauncey St., and run through Hudson, Canal, and West Sts., to Tenth Avenue. (according to this authority) ran "thence to the Spuyten Devil's creek."—Man. Com. Coun. (1855), 334.

The common council orders "That the actual opening of Madison Square take place on the first day of June next." A collector of assessments for this purpose is appointed.—Proc., App'd by Mayor, XIV: 305. On May 19, however, this order was rescinded. —ibid., XIV: 333. See, however, Je 3.

The legislature passes an act "for the organization of the first division of the New-York state militia." The counties of New York and Richmond comprise the first division for this purpose.—Laws of N. Y. (1847), chap. 205 and 406. See also My 15, 1846.

Since the administration of the venerated Governor Clinton, it has been customary to procure a full length Portrait of each Chief Magistrate of the State of New York." The common council therefore orders that one of Gov. Wright be procured, at a cost not exceeding $500, to be placed in the governor's room of the city hall.—Proc., App'd by Mayor, XIV: 313.

The common council appropriates $1,800 to introduce hot-air furnaces into the city hall, to heat the first and second stories.—Proc., App'd by Mayor, XIV: 319.

The common council orders "That all Posts in the Sidewalks for the support of Awnings in Broadway, from Marketfield Street and Battery Place to its intersection with Fourteenth Street, be removed therefrom within twenty days after the passage of this Resolution." The owner or occupant of any premises shall be subject to fine if these are not removed within three days after notice.—Proc., App'd by Mayor, XIV: C 11.

New York celebrates the successes of the United States in the Mexican War, by a military parade, illuminations, etc.—N. Y. Herald, My 8, 1847. Hone's Diary, II: 366.

The legislature passes an act authorizing the board of education of the city of New York to establish a free academy. It gives authority to procure a site and erect a building at an expense of $50,000, and authorizes an annual expenditure of $20,000 for its support. It also provides, as a condition precedent to this becoming a law, that the question whether such an academy shall be established be submitted to the people.—Laws of N. Y. (1847), chap. 206. The question was so submitted, and 19,404 votes were given in favour of, and 3,409 against, the measure.—Belden, N. T. Past, Present & Future (1849), 105. For the completion and opening of this building, see Jan. 1849. The act of May 7 was one of several acts absorbed by the consolidated school law of July 3, 1841 (p. 1). See S 22.

The common council authorizes the street commissioner "to have a Fence put around that part of Madison Square that has no Fence."—Proc., App'd by Mayor, XIV: 323. See S 14.

The common council orders that a space of ground, 200 ft. square, be granted to the Washington Monument Association for the erection of a monument to Washington, to revert to the corporation whenever it shall cease to be used for such purpose.—Proc., App'd by Mayor, XIV: 326. See also descrip. of P. L. 100, III: 592. See, further, O 15, 1847.

The common council orders that the "actual opening" of Madison Square take place on this day. A collector of assessments is appointed.—Proc., App'd by Mayor, XIV: 333. According to the prevailing practice, assessments are due and payable on the date fixed for the opening. On this date, or soon after, the work of collection commenced. See, further, Je 3.

The common council orders that Washington Square be enclosed with an iron railing, similar to the one being erected around St. Mark's Square, at a cost not exceeding $25,000.—Proc., App'd by Mayor, XIV: 331.

The city acquires, from Wm. Wright, the land west of the reservoir.—Prendergast, Record of Real Estate (1814), citing Liber Deeds, CDLXXXIII: 479. This now is Wy-ant Park. The corner-stone of the U. S. dry-dock at Brooklyn is laid by Commodore Smith.—Even. Post, My 13, 1847.

The U. S. army, unopposed, enters Puebla, a city of 80,000 inhabitants.—Lossing, in Harper's Popular Cyc. (1893), 1159.

The money received by the New York committee for the relief of Ireland amounts to $144,000. Four ships, five barks, and four brigs have been sent abroad with 21,731 barrels of Indian meal and corn.—Even. Post, My 17, 1847. See also ibid., My 19, Je 28, 29, 1847.

The new Calvary P. E. Church at the n. e. cor. of 21st St. and Eighth Ave. is almost completed. Renowick is the architect.—Even. Post, My 28, 1847. See also L. M. R. K., III: 92.

The steamboat "Washington" sails from New York on her maiden trip to Southampton and Bremen.—Even. Post, Je 2, 1847.

This was the first ship of the Ocean Steam Navigation Company incorporated to operate steam packets from New York to England and the continent, and this company was the first American steamship to receive an annual subsidy from the government for carrying the United States mail.—Morrison, Hist. of Am. Steam Navigation, 408; Hone's Diary, II: 310; N. Y. Herald, My 26, 1847. (The Cunard Co., of Great Britain, on May 15, 1846, had already sent the "Unicorn," the first of its steamships under subsidy to carry the mail, to Halifax, and Boston from Liverpool.—Liverpool Gazette, Ap 22, My 13, 1840.)
1804 THE ICONOGRAPHY OF MANHATTAN ISLAND

The steamboats "Cornelius Vanderbilt," bearing the name of her owner, and "Oregon" (Capt. Law) race to Croton Point and return, 75 miles, in 3½ hours,—"a rate of speed that would carry a vessel to Liverpool in five or six days."—Hone's Diary, II: 310.

3 Between June 3, 1847, and Feb. 18, 1848, the common council passed many resolutions apportioning assessments on certain lots for opening Madison Square.—Proc., App'd by Mayor, XV: 44-46. (In which see index. pp. 490-91, for other page references.)

4 The corner-stone of the new Odd Fellows' Hall, at the corner of Grand and Centre Sts., is laid. For details of the procession in celebration of the event, with description of the building, see N. Y. Herald, Je 6, 1847.

23 A decision is rendered by Judge Lewis H. Sanford, of the court of chancery, in the State of New York, in the voluminous case of "Nathaniel Bogardus and others v. The Rector, Church-wardens and Vestrymen of Trinity Church in the City of New York, William Berrian, and William Johnson." The testimony and pleadings show the boundaries and tenantry of the "Church Farm" alter the Revolution. For these pleadings and the court's opinion dismissing the case, with costs charged to the plaintiff, see Sandford's Chancery Reports, IV: 613-762. In the author's collection is a bound volume of pamphlets relating to Trinity's title to this property. The last of these is an extract from the address delivered by Bishop De Lanecy in the church convention at Oswego, Aug. 19, 1857, in which the various suits brought by claimants under Anneke Jans are briefly reviewed.

He left on June 28.—Eve. Post, Je 29, 1847.

29 The common council grants to the "French Trans-Atlantic Steam Company" the exclusive use of pier No. 4, North River.—Proc., App'd by Mayor, XV: 69.

P. A. and L. Delmonico, proprietors of the cafe in Beaver St., and of the hotel at 25 Broadway, add the new building at 23 Broadway to the latter.—N. Y. Herald, Je 29, 1847.

30 The foundation of the Washington monument is "now in progress in Hamilton Square."—Eve. Post, Je 30, 1847. See Jl 5.

July The common council authorises the owners and occupants of property on Broadway "to erect, in front of their buildings, posts for the purpose of hanging their awnings on." These posts are "to be made of iron—the height thereof to be nine feet, and no higher, from the curb stone to the inner side of the cross rail, and the pattern, in all particulars, to conform to that of a model, to be approved by the Joint Committee on Streets."—Proc., App'd by Mayor, XV: 74.

The corner-stone of the N. Y. State arsenal, on the west side of Fifth Ave., at 66th St., is laid. In the morning, there is a review of the state militia at the Battery. In the afternoon, a large number of ladies and gentlemen set out from the arsenal at the corner of Centre and White Sts. to attend the laying of the corner-stone, and also to witness the ceremony of taking formal possession of the grounds at Hamilton Square, recently appropriated by the common council (see My 8) for the use of the Washington Monument Association.

Commissary-Gen. Storms, chief superintendent of buildings, conducted the arsenal ceremonies. The news of the event refers to a "marble slab bearing an inscription," and the contents of the corner-stone. When the latter was lowered to its place, "the company of Veteran Artillers began to fire the old twelve-pounders which the British left on the Battery on a certain 29th day of November."—N. Y. Herald, Jl 5, 1847, with view of the arsenal; Courier & Enquirer, JI, 1847; descrip. of Pl. 151, 153; descrip. of Pl. 164-b, III: 847. See N 4. For the laying of the corner-stone of the Washington monument at Hamilton Sq., see O 19.

According to the provisions of section 8 of article 14 of the state constitution, adopted Oct. 9, 1846, the court of chancery, which was abolished, was re-established. The common council passed a resolution abolishing on this first Monday in July, 1847. Its powers were vested in the supreme court.—Laws of N. Y. (1847), 17th sess., Vol. II. Hist. of the Bench and Bar (1897), I: 236.

9 The "Keaying," a Chinese junk, arrives at this port from Canton, supposedly the first Chinese vessel to visit the United States. She anchors off Castle Garden. For description of her, and account of her voyage, see N. Y. Herald, JI, 10, 11, 12, 13, 16, 18, 1847. See also a coloured lithographic view, pub. by Currier, showing the boat and her measurements (at N. Y. Hist. Soc.). See Jl 16.

A committee of the common council reports in favour of selling the ground and premises of the Monroe Market (see Jl, 1846) at public auction. Soon after, part of the property was sold (see Proc., App'd by Mayor, XV: 93), but in 1853 that part on the corner of Grand and Centre Sts. was still standing, although in a tumble-down condition.—De Voe, 58; L. M. R., Ill: 999.

13 The trustees of the First Presbyterian Church, on Fifth Ave., near 12th St., "have kindly consented to have the bell, in the cupola of the same, struck for fires, until a new bell is placed in the tower at Jefferson Market."—Proc., App'd by Mayor, XV: 84.

The common council orders that awning-posts in Ann St. be removed immediately.—Proc., App'd by Mayor, XV: 85. Time was extended to Nov. 1.—Ibid., XV: 96.

14 The common council grants to Monsieur Vatteure the use of the governor's room in the city hall "for the purpose of exhibiting the various Books presented by the City of Paris and the French Government to the City of New-York, the State of New-York, the United States, and the several Scientific Institutions of this city."—Proc., App'd by Mayor, XV: 91.

"Whereas, a new era in our commercial intercourse with the Kingdom of France has been opened upon the arrival of the government steamer called the Union, in our port; and also with the Celestial Empire, upon the arrival within our harbor of the first Chinese vessel, known as the Kheygo," the common council appoints a committee to tender to the captains and officers of these vessels "the usual hospitalities of the City."—Proc., App'd by Mayor, XV: 98.

The French steamer "Union" sails from New York. "The Battery, Castle Garden, and the Junk [see Jl 9], were crowded with people."—Eve. Post, Jl 26, 1847.

The name of the Third Regiment is changed to the Eighth Regiment by general orders from Albany.—See "Military History and Opening of the Electrical Exhibition of the First Army Corps," which was the Eighth Regiment which occupied Fort Gansevoort in 1812 (q. v.). After the World War the name was changed to the Eighth Coast Defence Command, N. Y. Coast Artillery, N. G.

"The proposition to erect the free Academy in Madison square meets with strong opposition from the property holders and residents in that neighborhood. They say the authorities would violate their pledged faith by such a proceeding; it would destroy the value of the property, it would be unjust, for they (the property holders) had expended $50,000 towards the formation of the square, and they would not consent to the proposition unless that amount were refunded; they had no right to build school houses on the square, for it would eventually be wanted for a City Hall or other municipal building."—Eve. Post, Jl 30, 1847. See S 1.

12 Christ Church, in Anthony (North) St., opposite the N. Y. Hospital, is destroyed by fire, as its predecessor in Ann St. was in 1834 (q. v.).—Eve. Post, Jl 30, 1847; Mag. of Am. Hist. (1883), XIX: 60-62. See Je 29, 1848.

18 The common council passes an ordinance to fill up "the old reservoir well" on 13th St. between The Bowery and Third Ave.—Proc., App'd by Mayor, XV: 111.
The Greek Slave.—This famous work of art, by our countryman, Mr. Hiram Powers, arrived in this city a few days since, in the ship Hudson, from Leghorn, and was passed through the Custom House to-day. It will be exhibited, we are told, as soon as the necessary arrangements can be made by Mr. Kellogg, to whose care it has been entrusted.—\textit{Even. Post}, Aug 17, 1847.

Peter G. Stuyvesant, "lineal descendant of Gov. Stuyvesant, and next to Mr. Astor the wealthiest individual in the city."—\textit{Even. Post}, Aug 18, 1847; \textit{Hone's Diary}, II: 321.

20. A battle before the city of Mexico occurs, in which Gen. Scott defeats Santa Anna. "Scott and Worth have added new, but blood-stained, laurels to their already over-burdened brow."—\textit{Hone's Diary}, II: 322-3. The fortified camp of Contreras, defended by Gen. Valenica, and the heights of Churubusco, by Santa Anna, which were taken by U. S. troops on Aug. 20, were the battle grounds. "General Scott preferred to bear the olive-branch rather than the palm. As he advanced to Tacuba (Aug. 21), only seven miles from the city, he met a deputation from Santa Aza to ask for an amicable adjustment of the question for peace. It was refused. N. P. Trist, appointed by the United States government to treat for peace, was present. The treacherous Santa Aza had made this only a pretext to gain time to strengthen the defences of the city. When the trick was discovered, Scott declared the arriance at an end, and advanced upon the city." Then followed the battle of Molino del Rey, near Chapultepec, on Sept. 8; the bombardment of the hill of Chapultepec on Sept. 12; the assault and capture of the U. S. troops on Sept. 13 (g.e.).—\textit{Lossing, in Harper's Popular Cyclopaedia of U. S. Hist.} (1891), 875. (It should be noted that, while Lossing wrote "Field Books" of the Revolution, the War of 1812, and the Civil War, he did not write a field-book of the Mexican War. Instead, he embodied in his Cyclopaedia the information relating to this subject in the same manner of condensed and graphic description, under topical heads, with dates, and illustrations, most of which were from his own sketches. The first edition bears copyright date of 1881.)

21. The very extensive improvements which are going on in this city this season furnish the most gratifying evidence of general prosperity. Reference is had more particularly to the buildings erected by private companies and the most material test of the healthy state of our monetary concerns. The most important of these improvements are taking place in Broadway. From Canal street to the Battery extensive buildings are going up. A very extensive building (designed as a store) is in progress on the spot formerly occupied by the New York Garden, etc.

22. Rathbun's hotel is to be greatly enlarged. A very large hotel is going up nearly opposite. The crumbling walls of old Grace church which have so long disgraced the lower part of Broadway, have at length been demolished.

23. In Fulton, Nassau, John, William, and various neighboring streets, elegant blocks are taking the place of dilapidated and miserable dwellings, and all is life and activity. Money is abundant, labor in good demand, and while capitalists are thus investing their surplus, the manufacturers are also reaping their share of the harvest.—\textit{Even. Post}, Aug 21, 1847.

24. By negotiations lasting from Aug. 23 to Sept. 7, an armistice is effected between the armies of the United States and Mexico.—\textit{Wistar}, VII: 412.

The board of education resolves to purchase, for $250,000, ten lots, in the east side of Lexington Ave. at the s.e. cor. of 23d St. as the site for the new College of St. Francis Xavier.—\textit{Even. Post}, S 6, 1847. See II 22, 1848.

25. Father John Larkin, of the Society of Jesus, having purchased property consisting principally of a Protestant church standing in Elizabeth St., a few doors above Walker St. (now Canal St.), once known as the "Bowery Church," and having redecorated this and dedicated it as the Church of the Holy Name, opens here the College of St. Francis Xavier.—\textit{The College of St. Francis Xavier} (1847), 9, 11, 15, 25, 31; \textit{Even. Post}, S 6, 1847. See II 22, 1848.

The "Sisters of Charity" have " lately opened a Seminary for young ladies on 109th street, between 5th and 6th avenues, which they call the "Academy of Mount St. Vincent."—\textit{Even. Post}, S 6, 1847. This later was occupied by Central Park.—See under "McGowen's Tavern," in L. M. R. K., III: 979, and Fifth Avenue (pub. by the Fifth Avenue Bank), 67.

The American flag waves in triumph over the shattered Castle of Chapultepec (see Aug 20). The Mexicans fled into the city, pursued by the Americans to the very gates. That night Santa Aza and his troops, with the civil officers, fled from the city, and, at four o'clock the next morning, a deputation from the municipal authorities waited upon Scott, begging him to spare the town and treat for peace. He would make no terms, but entered the capital of Mexico (Sept. 15, 1847) a conqueror; and from the Grand Plaza he proclaimed the conquest of the Republic of Mexico. —The President of the Mexican Congress assumed provisional authority, and, on Feb. 2, 1848, that body concluded a treaty of peace with the United States commissioners at Guadalupe-Hidalgo.—\textit{Lossing, in Harper's Popular Cyclopaedia of U. S. Hist.}, 785-76. See II 4, 1848.

26. For amnestiy conduct at Molino del Rey (on Sept. 8) and Chapultepec, Grant was promoted to 1st lieutenant.—\textit{Personal Memoirs of U. S. Grant}, I: 126.

The acquisition by the city of the title to lands for Central Park begins. This continued through Sept. 4, 1852. The cost, dates, grants, and liber where recorded, were published by Wm. A. Prendergast in \textit{Record of Real Estate} (1914), 51.

27. The city acquires title to part of the corner of Lexington Ave. and 23d St. (122 x 200 ft.), on which the College of the City of New York was afterwards built; grantor, John La Farge; price $25,000.—\textit{Prendergast, Record of Real Estate} (1914), citing Liber Deed, CDXCV: 759; Proc, \textit{App'd by Mayor}, XV: 191.

The common council orders "That such of the arm chairs now in the rooms of the Aldermen and Assistant Aldermen, as were in use by the members of the first Congress of the United States, be removed to the Governor's Room, and that the Superintendent of Repairs provide other chairs for the use of the Aldermen and Assistant Aldermen."—Proc, \textit{App'd by Mayor}, XV: 142.

28. The common council authorises the committee on lands and places to complete the fence necessary to enclose Madison Square.—Proc, \textit{App'd by Mayor}, XV: 141.

30. New buildings, each 120 x 33 ft., are being erected at Fulton and Washington Markets, respectively, for the better accommodation of country dealers.—\textit{Even. Post}, S 6, 1847.

31. The common council orders "That permission be granted to Horace P. Russ, to pave Broadway with square blocks of granite," from the southerly side of Wall Street to the northerly side of Fulton Street, in the same manner, and not to exceed the expense per square yard, of that recently constructed opposite the New York Hotel." The city is to pay one-third the cost of this pavement.—\textit{Proc, App'd by Mayor}, XV: 154.

32. The common council orders "That the marble piers now standing at the southern entrance of the Park, he sold at auction, under the direction of the Street Commissioner, and that the granite balls presented to the city by one of our worthy fellow-citizens as a specimen of the implements of war at a former period, be placed on the gate piers at Union Pier, and that the spaces now occupied by iron piers, be substituted by an open iron railing, to correspond with those remaining."—\textit{Proc, App'd by Mayor}, XV: 160-61; \textit{Man. Com. Coun.} (1849), 434. See D 1.

John Rauel, Jr., (see Mr 21, 1846) invites the common council to examine "his model railway, which is in operation at No. 413 Broadway. This model, the result of two years labor and an expense of more than $5000, is made entirely of metal, and weighs about three tons; it is more than seventy-six feet long, and nine feet wide. This improvement is calculated to give more room to the travel in Broadway, to enhance the value of property on that fashionable thoroughfare, and afford to the citizens an economical, convenient, and expeditious mode of travel without occupying any space that will interfere with the present commerce and uses of that street, or of those that cross it. Some of the improvements made since the project was first submitted are as follows.
"The railroad is to be erected only twelve feet above the line of curbstones, and extend only six feet each side of the line."

"The passenger cars, which are to be propelled by stationary engines and endless rope, do not stop to take in or let down passengers. This is accomplished by means of a tender, which passes along a track, and by means of a brake pressing upon a brake plate fixed to each car; the speed of the tender is got up to be equal to that of the passenger car, before they are fastened to each other, for the exchange of passengers. To prevent the cars from leaving the railway, each car is confined by sixteen pullies, with vertical shafts, two each side, and is also so provided that if either the axles, the shafts, the car wheels, or the transverse beam, which passes quite across the street, should break, no damage can arise from the breakage.

"Passengers need not walk up the stairway, but ascend by a screw-shaft, containing a sofa, on which they ride from the pavement to the promenade. [This is probably the first reference to a proposed elevator.]"—Eve. Post, O 12, 1847.

The Nut. 1847. "The railroad is described on Nov. 5 (p. v.). It is shown on Pl. 133-a, Vol. III.

"The passenger cars are to be supplied with water, and are provided with sanitary arrangements."

The common council orders "That the Governor's Room be placed at the disposal of the Committee of Arrangements of the Washington Monument Association," under the mayor's direction, on Oct. 19, "for the purpose of receiving the Governors of the different States, of Citizens, and other Gentlemen, invited on the occasion of laying the corner stone of the Washington Monument" (on O 20, p. v.).—Proc., App'd by Mayor, XV: 177. See, further, O 16.

"The common council orders "That it be recommended to the Merchants and Mechanics of the City of New-York, so far as it may be practicable, to unite with the citizens on the 19th instant, in the ceremony of laying the corner stone of the Washington Monument, and that the stores, manufacturers, and other places of business be closed on that day."—Proc., App'd by Mayor, XV: 181-82. See O 19.

"A general convention of the Protestant Episcopal Church (bishops and clergy) has "filled the city."—Hone's Diary, II: 324-25; and current news papers.

"On land in Hamilton Square, conveyed to the Washington Monument Assn. by the city, and which its president assumes possession of in the name of the association on last Fourth of July (see J 5), the corner-stone of the monument is laid,—a block of stone 5 ft. square and 4 ft. thick. In it was placed a box containing the charter of the association, etc. The gathering of citizens at the ceremony consisted of city officials, firemen, and civic associations, which had marched to the spot from down-town. —N. T. Herald, O 20; N. T. Com. Adv., O 20, 1847 Proc., App'd by Mayor, XV: 186. A lithographic view of the ceremonial procession, showing the shot-tower at 53d St. (L. M. R. K., III: 965) in the background, was sold with the Percy Pinx, 2d, collection of N. Y. views. See also descrip. of Pl. 102-3, III: 601, and descrip. of A. Pl. 266-67; III: 882. The account of the procession in the Herald, sp. cit., contains a wood-cut view of the monument, and one of an allegorical float used in the parade. See, further, Ja 10, 1848.

The "New England House" was the name of a hotel standing at this time on the corner of Broadway and Thames St.—Proc., App'd by Mayor, XV: 183.

"In this month, building construction began on the Free Academy, at the corner of Lexington Ave. and 23d St. (see My 7, S. 23)"—Mosenthal and Harte, The College of the City of N. T. (1907). See Ja 3, 1848.

"The report of James E. Serrell, engineer of the state arsenal, at Fifth Ave. and 64th St., bears this date. Accompanied by maps and plans, it was later filed in portfolios 361 and 362 in the secretory of state's office.—See Cat. of Maps, etc. (1853), 33.

"The plans of the elevated railroad, designed by John Randel, Jr., (see Mr 23, 1846) are referred to as "The Broadway Railroad." The model (see O 11) is now on public exhibition. It is "designed to relieve our main street from the crushing pressure of omnibus travel. . . . The rail-tracks are . . . to be supported by iron pillars along the curbstones, and iron cross pieces running across the street, the whole framework to be iron. On this framework are to be laid four railroad tracks from Bowling Green to Union Place, about three miles, and running round the Bowling Green and the Park at Union Place, thus forming an endless road. The two inner tracks are for the main cars, and the two outer tracks for what are called tenders. The cars are to be attached to and moved by endless rope; the motive power to be one or more steam engines at some central point on the road. The main cars are to be in constant motion, without any stoppages during the running hours of the day and evening, at a speed of perhaps six miles an hour.

"At the corner of every cross street, or every second cross street, will be stations where passengers ascend by stair-ways and steps into one of the tenders, which for the time is stationary. But immediately one of the main cars comes up, and when abreast of the tender fastens to it by the operation of the machinery, and takes it along to the next corner or station and there drops it, and fastens to another tender, which it takes along to the next station, and so on. As soon as the tender is attached to a main car, so as to become as it were a part of it, a door is opened by the conductor, and the passengers step from the tender, into the main car, and those in the main car who wish to stop step out into the tender. The door is then closed to prevent accidents, and the main car leaves its tender at the next corner.

"It is calculated to have sixty or seventy of the main cars, so there may not be more than 2 or 3 minutes between them; and as many tenders as there are corners or stations. It is calculated also to have promenades by the side of these tracks, either half the width or the whole width of the sidewalk below; and, in order not to obstruct too much the Government, they will be covered by a semi-transparent glass. Various other appendages are suggested to give more or less the conveniences of a street in this upper story of Broadway . . . ."

"The expense of erecting this railway and putting it in full operation is estimated by the inventor, after careful calculations, at a million and a half to two millions of dollars. If the City Council will sanction this plan, then application will be made to the state Legislature to charter a company for its construction. . . ."

"N. T. Com. Adv., N 5, 1847, citing the National Intelligence; see also Pl. 133-a, Vol. III. See, further, N 8.

"Elevated Railway, &c., above Broadway.—Mr. Randel, the inventor of this magnificent project for the relief of Broadway, has to-day deposited three sections of his model made of iron open work, and at his own cost, in the Street Commissioner's Office, in accordance with a resolution of the Corporation of the 30th March, 1846, the remaining three quarters of the model (about 27 by 9 feet, and comprising the working part of the cars, tender, elevator, &c., being too large to be received into that office, will remain on exhibition at No. 413 Broadway, until Wednesday next, for the examination of those who have not yet seen it."—Eve. Post, N 8, 1847.

"New Freight Depot of the Harlem Railroad Company, Twenty-seventh street.—During a recent ramble in the upper part of the city, our attention was called to the extensive buildings and improvements that are making near the Twenty-seventh street Depot. The City Hall Depot is entirely too contracted for the increasing business of the company, being scarcely sufficient to accommodate the passenger trains.

"The company have erected a spacious freight house at Twenty-seventh street, 118 feet in length, 68 in width with two tracks through the center of the building. On each side are platforms, 21 feet wide, on a level with the floor of the cars, the north side designed for receiving freight, the south side for the delivery of freight and produce. At the main entrance of the building are two commodious offices fitted up for exclusive use of the company, and the building are numerous pens for cattle, sheep, swine, and other kinds of stock that is brought on the road . . . ."

"The company have also erected at 34d street a machine shop one hundred feet by forty, and adjoining are several extensive sheds for storing wood—these are in the rear of the mammoth engine house of brick, one hundred and twenty-five feet in diameter. Just above it, and in the rear of it, is a large iron bridge, wrought iron bridge may be seen spanning the Harlem road . . . ."

"Besides what we have noticed, this part of the city is rapidly filling up with private dwellings, in many places entire blocks are going up, and in a few years this will be one of the most thickly settled parts of the city. The business of the Harlem road has made this place what it is . . . ."—Eve. Post, N 12, 1847.
around the fenced part of Madison Square, and that the other Parks and enclosures be repaired where required,” the sum of $1,500 to be applied for the purpose out of the unexpended balance appropriated for the use of lands and places.—Proc., App’d by Mayor, XI: 209, 244.

18 The Astor Place Opera House, at the junction of Astor Place and 5th St., ground for which was broken in March (Eve. Post, Mr 6, 1847), and a description of which was published on Nov. 12 (ibid, N 12, 1847), is opened to the public.—Brown, 413. On Dec. 4, the opera “Hernani” was presented there.—Eve. Post, D 6, 1847.

The common council passes a resolution of praise and thanks for the conduct of the First Regiment of the N. Y. State Volunteers in the war with Mexico; and causes medals to be struck, commemorative of the recent victories, to be presented to each of the surviving members of the New York regiment, and to the widows, eldest son, father, or mother of each of those who have fallen.—Proc., App’d by Mayor, XV: 228, 405; XVII: 27.

A great opera meeting is held at Broadway Tabernacle “to give a public demonstration of . . . satisfaction at the late returns introduced in the ecclesiastical states by Pope Pius IX, and their sympathy with the noble motives by which he is inspired.”—Eve. Post, N 30, 1847.

A contract is entered into by E. K. Collins with the U. S. government for the building of “an additional line of American steamers between New York and Liverpool,” in accordance with an act of congress, in its last session, authorising the government to make such contract.—N. Y. Com. Adv., N 30, 1847.

The gate-posts of marble blocks, which for 26 yrs. have stood at the southern entrance to the Park, are removed.—N. Y. Com. Adv., D 2, 1847. For a list of the articles deposited within the pillars when they were erected, in October, 1841 (p. 0, I 1), see ibid., D 17, 1847.

5 The legislature incorporates the “New York Society for the Promotion of Education among Colored Children.”—Laws of N. Y. (1847), chap. 425. See Apr 11, 1842.

9 The legislature passes an act “completing the line of Broadway.” This, however, provides merely for the triangular block bounded by Broadway, Fifth Ave., and Madison Ave., and making it clear that it is not to be “a part of one of the streets” also defining more clearly the western boundary of Broadway between 23d and 25th Sts; and making a public place or park of the triangular block bounded by 25th St., Fifth Ave. and Broadway.—Laws of N. Y. (1847), chap. 439.

Chancellor James Kent dies. At the meeting of the common council on the following day, the information was communicated to the members by Mayor Brady, and resolutions were adopted by that body recalling that the deceased, “for upwards of half a century, was identified with the Judiciary of our State, either as Recorder, Judge, Chief Justice or Chancellor,” in all of which positions “he has displayed such purity of character and distinguished ability as to command the confidence of his associates and the respect of those by whom he was surrounded.”—Press, Bd. of Ald. (1847–48), XXXIV: 128–32; Horse’s Diary, II: 331. See, further, D 15.

13 The legislature prescribes the proceedings necessary to enable persons to change their names.—Laws of N. Y. (1847), chap. 464.

The common council passes a resolution, adopting the resolution proposed on Dec. 12, equalizing the character and public services of the late Chancellor Kent, whose funeral occurs on this day. The board “will wear the usual badge of mourning for thirty days, cause the flag of the City to be raised at half mast during the day of the funeral, and will attend the same with their staves of office.” The committee on arts and sciences is required to procure a portrait of Chancellor Kent to be placed in the governor’s room.—Proc., App’d by Mayor, XII: 11, 1847.

The Royal Mail steamship “Hibernia” (Capt. Rhyie), the first Canarder to enter New York harbour, arrives from Boston, and moors at her dock in Jersey City (see J 23). The trans-Atlantic route will not be direct, as was intended, between Liverpool and New York (see S 8, 1846). The recent refusal of the U. S. government to transport the Canada mails through its territory, has compelled the Cunard steamers to stop at Halifax, both going and returning.—N. Y. Com. Adv., D 29, 1847; N. Y. Jour. of Com., J 1847. Capt. Rhyie was given an enthusiastic reception at the merchants’ exchange next day in behalf of the merchants of New York.—N. Y. Com. Adv., D 31, 1847 (which contains a detailed description of the vessel). See Ja 2, 1848.

“Messrs. Murphy & Co, the well known stage proprietors, are about establishing a line of stages to run from the South ferry through Broadway, Astor place, and St. Mark’s place to Tompkin’s square.”—Eve. Post, D 31, 1847. For the stage lines of this period, see 1830.

“We believe that, since the organization of our Government, no one year produced so great a number of vessels as the year just passed. Among them were many elegant and substantial steamers, of great strength and immense capacity, varying in size from 1,000 to 5,000 tons.”

The number of tons launched since January last reaches 39,718; and if we add the 29,870’tons now on the stocks, in course of completion, the whole will amount to 69,588.”—Merchants’ Mag. (1848), XVIII: 310.

In this year, members of the anti-slavery section of the Democratic party, especially in New York State, which separated from the rest of the Democratic national convention in 1846, were called “Barboumers.” Allied with Abolitionists, they consisted of radical or progressive Democrats opposed to the more conservative “Hunkers.”—Winsor, VII: 293. For the origin of the name, see Harper’s Popular Cyc. of U. S. Hist. (by Lossing), 104, 629.

In this year, Abraham Lincoln and Andrew Johnson were in the house of representatives, and Stephen A. Douglas and Jefferson Davis in the senate of the U. S.—U. S. Cong. Directory (1848).

In this year, a new type of magnetic telegraph was installed between Philadelphia and New York, known as “House’s Printing Telegraph.” It was regarded as an improvement on Morse’s telegraph, and President Frish of the Magnetic Telegraph Co., which controlled Morse’s patent, requested the board of directors to institute legal proceedings against the proprietors of the infringing company.—Proc. of the Magnetic Telegraph Co., I: 85.

“The New York papers joined forces with the telegraph people, and in 1848 organized the Associated Press, with Mr. [Gerard] Hallcock as president and Dr. Alexander Jones as manager.”—The Associated Press,” by Manager, Melville E. Stone, in Century Mag., LXX: 302. There had been considerable of newspapers before for the purpose of obtaining news, but this was the most extensive and permanent one. It was composed of the Journal of Commerce, the Courier and Enquirer, the Tribune, Herald, Sun, and Express. In 1851, the Times became a member, and, in 1859, the World.—Annals of N. Am., 609; S. N. D. North, The Newspaper and Periodical Press (1884), 89.

Some features of New York as they appeared in 1848 are described by Jas. Grant Wilson in an illustrated article, entitled “The City of N. Y. in 1848,” in The Independent, LXV (1868): 1402–10. Among the views is a reproduction of a rare one of the Madison Cottage, from an original owned in 1808 by John D. Crimmins.

At this time, the last houses on Madison Ave. were just above 25th St. “A grove of trees were the next block now in, and nothing obstructed the view from our windows, so that we could see as far as Hoboken.” Madison Ave. stopped at 42d St. The fashionable quarters of the city were then Broad St., Washington Square, East Broadway, St. John’s Park, Second Ave, and Chelsea. Handsome residences had been built on lower Fifth Ave., and a very few had reached as far north as Murray Hill. Red brick residences were being replaced by brown stone, high-stoop, structures.—Knapp, A Hist. of the Brick Presby. Church, 278.

John C. Myers describes, with some detail and in architectural terms, the principal buildings in New York in 1848.—Sketches on a Tour through the Northern and Eastern States, the Canadas and Nova Scotia (Harrisburg, 1849), 50, 51–55, 58, 73–74.

In this year, surveys were made of Hell Gate by Davis and Porter, by which a complete knowledge of the hydrography of the pass was obtained.—See S 24, 1876. See also O 20, 1849, and des. of Pls. 82, A, and 82-B, III: 552–53, 554.
From 1848 to 1852 inclusive, the Common Lands were surveyed by John J. Serrell. See maps No. 91, 191, and 199 in real estate bureau of comptroller's office, Municipal Bldg.

In this year, Serrell made a survey of the gore of land made by the intersection of Broadway and Fifth Ave. bet. 25th and 26th Sts.—See map No. 96 in real estate bureau of comptroller's office.

From 1848 to 1852, surveys were made of grants of land to the Manhattan Gas Light Co.—See maps filed as No. 24 in real estate bureau of comptroller's office.

In this year, the N. Y. Ladies' Home Missionary Soc. of the Methodist Episcopal Church laid plans for the reformation of Five Points (see D 19, 1831) by missionary efforts. It was a spot "where vice reigns unchecked."—Lanning, Hist. of N. T. City, II: 627, passim. This led to the founding of the Five Points Mission (see F, 1851; D, 1852; Ja 27, 1853), and the Five Points House of Industry (see F, 1851; 1856).

In this year, the almshouse at Bellevue was appropriated as part of the hospital establishment there (see 1856), the paupers being sent to Blackwell's Island. See table on present hospital and lossing, Hist. of N. T. City, I: 126. For view of the hospital, see Belden's New-York, Past, Present & Future (1849), 56; Man. Com. Cown. (1857), 438.

From 1848 to 1854 (p. v.), the almshouse in the Park was used for public offices.

The Pappull view of New York, "From the steeple of St. Paul's Church, near the East, South, and West," bears this date. It is reproduced and described as Pl. 112, Vol. III.

In this year was issued one of the rarest, and most complete series of New York street views, in coloured lithograph, by Jones, Newman, & J. S. Ewbank, with the title The Illustrated Pedigreary Directory of New York. The views published were all of Broadway. For an account of these, see descrip. of Pl. 147, III: 719. See also 1849.

Between 1848 and 1850, Jns Pinson, a boy of 16 or 17, made a panoramic water-colour view of the east side of Broadway, from Cedar to Bleeker St. It is now owned by the N. Y. P. L.—See descrip. of Pl. 147, III: 719.

In Valentine's Manual for 1848, were published the following contemporary lithographic map and views: map of the city, 1848; the Park fountain; High Bridge; the lunatic asylum on Blackwell's Island, 234; the University of the City of N. Y., 306; an old Dutch house at Kit's Bay, 384.

For view of the Cortelyou mansion, 1848, see ibid. (1850), 456.

In this year, the Houston St. burial-ground of the Society of Friends was discontinued, and the remains were removed to their cemetery just opened on the "Rock Road," Brooklyn, now in Prospect Park, from a catalogue of a series of views published in the year 1863, 675; Cj. L. M. R. K., III: 938.

In this year, Victor Prevost, a French artist, came to America.

In 1853, he established himself as a photographer at 43 John St. His negatives, on waxed paper, are among the very earliest produced in America. Two of his views of N. Y. City are reproduced and described as Pls. 142-a and b, III: 710-12.

In this year was published by the N. Y. Pub. Co., a booklet of biographical sketches entitled The Aristocracy of New York. . . . A concise history of the city for many years. By an old resident (William Armstrong). It was similar to the series of handbooks entitled Wealth and Pedigree of the Wealthy Citizens (1842), and Wealth and Biography of the Wealthy Citizens (1845), which were published "at the Sun Office" at this period.

The Cunarder "Hibernia" leaves New York harbour for Boston and Halifax, the first trans-Atlantic steam packet, carrying the mails, to go from this port on a regular schedule.—N. T. Herald, Ja 3, 1848. The name of "James Lennox" is on the passenger-list.—Morn. Cour. and N. T. Eng., Ja 3, 1848.

"Free Academy—The foundations of this institution are now being laid, at the corner of Lexington avenue and 23d street; but we learn it will be some time before the ceremony of laying the corner stone takes place."—Even. Post, Ja 3, 1848. See Ja 27, 1849.

In this year, a monument to commemorate the battle of New Orleans (see Ja 8, 1815), President Tyler and Mrs. Tyler, who left the city on Jan. 8, wrote a letter of regret on that day, on being obliged to decline an invitation to attend.—See Jan. 10.

"The Washington Monument.—We have received from the Washington Monument Association a handsome lithograph of Mr. Pollard's design for the proposed monument to Washington, which was adopted, we understand, with the prudent reservation that it should be 'subject to an alteration, or the substitution of such approved design, prior to the commencement of the structure.' We are not apprized whether the laying of the corner stone—or rather the celebration thereof—is to be considered as the 'commencement of the structure,' but we suppose the matter is still open.

We confess that the present design seems to us quite as suitable for a monument for any one else as for Washington. Something more characteristic is wanted. A pyramid, for instance, surmounted by a columnar altar, upholding a colossal bust of Washington, would have the elements of simplicity and grandeur. . . . ."—N. T. Com. Adv., Ja 10, 1848. See Je 17, 1844, see, further, Mr 30.

Mayor Brady approves a resolution of the common council authorising the employment of a proper person to translate the Dutch records of the court of burgomasters and schepens, provided the same "can be done at an expense not exceeding fifteen hundred dollars."—Proc., Appd by Mayer (1847-48), XV: 265. The committee on arts and sciences, in its report to the common council recommending this action, said there were in various parts of the city hall "some seventy-three or eighty books in manuscript in the Dutch language, bearing strong evidence of the ravages of time. . . . Fifteen of these books are registers of wills, mortgages, conveyances of real estate, &c., and the remainder are the journals or minutes of our first Common Councils, and extend from the year 1653 (when the City was originally incorporated) to the year 1674, when the records were first regularly kept in the English language. . . ."

"Every public body owes it to itself, and to the citizens whom it represents, to preserve its records as perfect and unbroken as possible. They are the only authentic sources from which a correct knowledge of the past can be obtained, and the loss of which exposes the character and history of the City to misrepresentation, whereby false impressions are or may be formed of the Acts of its public functionaries. So sensible has the Common Council of Philadelphia been of this truth, that it has recently caused its early journals not only to be copied, but, at a great expense, printed the use of the public [see 1847].

"The manuscripts which your Committee have examined are, however, sealed to almost all enquirers, and totally useless for reference, being in a language with which very few indeed of our citizens are acquainted. To render them accessible for any useful purpose they do not, therefore, exist. This Committee, and this possession of an uninterrupted record of its municipal government from its foundation, embracing a period of nearly two hundred years. On the other hand if these records be allowed to remain in their present state, every year will diminish their number, the damp is rotting them away piecemeal, and vermin will soon destroy whatever that space.

"This ancient and wealthy City ought not to allow the destruction of its own official records. Several years ago [see Ap 21, 1837] an effort was made to prevent it, and one volume of these papers was translated, at an expense of about five hundred dollars. Unfortunately, the work was then discontinued."—Proc., Bd. of Ald. (1847-8), XXXIV: 150-58. The committee on arts and sciences (1847) referred to the "History of the City, by E. B. O'Cullahan, the Author of the History of New Netherland, &c., to make such translation. Two volumes had been translated by Feb. 19, 1849 (p. v.), and two more remained to be done.—Ibid. (1849), XXXVI, part 2: 237-38. For a suggestion regarding the publication of these early records, see Ja 2, 1849. For O'Callaghan's translation of the N. Y. Col. Doc., see Fe 12, 1845.

"The subject of a new edition of the College of St. Francis Xavier (see S, 1847) is destroyed by fire. On May 1, the college took new quarters in a dwelling-house, No. 77 Third Ave., between 11th and 12th Sts.—Even. Post, Ja 24, 1848; The College of St. Francis Xavier (1847), 9, 11, 15, 25. See Ap 8, 1850.

Gold is discovered in California. Cf. 1842. This led to the "gold rush" of 1848-49.—McMaster, VII: 585; Rhodes, Hist. of the U. S., I: 31.
The common council orders that the "Russ pavement" be placed on Broadway between the north line of Chambers St. and the south line of Vesey St.—Proc., App'd by Mayor, XV: 335.

The common council orders that the "Russ pavement" be placed on Broadway between the north line of Chambers St. and the south line of Vesey St.—Proc., App'd by Mayor, XV: 335.

The common council orders that the "Russ pavement" be placed on Broadway between the north line of Chambers St. and the south line of Vesey St.—Proc., App'd by Mayor, XV: 335.

The common council orders that the "Russ pavement" be placed on Broadway between the north line of Chambers St. and the south line of Vesey St.—Proc., App'd by Mayor, XV: 335.

The common council orders that the "Russ pavement" be placed on Broadway between the north line of Chambers St. and the south line of Vesey St.—Proc., App'd by Mayor, XV: 335.

The common council orders that the "Russ pavement" be placed on Broadway between the north line of Chambers St. and the south line of Vesey St.—Proc., App'd by Mayor, XV: 335.
The legatees pass an act to simplify and abridge the practice, pleadings, and proceedings of the courts of this state.—Laws of N. Y. (1848), chap. 257.

The legislature passes a general act to provide for the incorporation and regulation of telegraph companies. Among other provisions, it prescribes the proceedings whereby any company now organized and using Morse's telegraph may be incorporated.—Laws of N. Y. (1848), chap. 266.

The legislature passes a general act to provide for the incorporation of benevolent, charitable, scientific, and missionary societies, by the filing of a certificate under prescribed regulations. Certain proceedings, powers, and restrictions, of such corporations are defined.—Laws of N. Y. (1848), chap. 319. Under this act, the Association for Improving the Condition of the Poor, founded in 1843 (p. v.), was incorporated.

The common council orders that the section of Madison Square lying between Fifth and Madison Aves, 23d and 24th Sts., "be levelled up with mould and seeded down to grass," at an expense not exceeding $600, under the direction of the street com'r.—Proc. App'd by Mayor, XV: 144.

"A gang of thirty labourers, under the supervision of Mr. Russ, commenced removing the old cobble-stone pavement before the 'Park,' in Broadway, yesterday [April 24] morning, with a view of re-laying it after Mr. Russ's more durable method. . . . All that portion of the street south of Chambers and north of Vesey is under contract, and is expected to be completed some time in September next. The expense will probably be $30,000."—Even. Post, Apr 25, 1848.

In this month, Croton water commenced to flow over the High Bridge.—Man. Com. Coun. (1854), 222.

The common council orders: "That the actual opening of the 4th Avenue, between 32d and 59th St. as confirmed by the Supreme Court on the 17th day of January, 1848, be, and is hereby, ordered to take place on the 1st day of May, 1849." A collector of assessments is appointed.—Proc. App'd by Mayor, XV: 266; Man. Com. Coun. (1857), 537. See also 1853.

The city's old contract with the Manhattan Gas Light Co. is cancelled, and the common council enters into a new contract with the company, "For the lighting and extinguishing of the public lamps," the company is to receive $15 per lamp per annum, and "for the fitting up of the same" an additional $5, "the cost of posts, lanterns and repairs to be at the expense of the Corporation." The corporation is to have the right "to order the main of the company to be extended to such points as they may direct, commencing at Grand and Canal Streets, . . . to an amount not exceeding the sum of six thousand dollars in any one year."

It has been ascertained that each lamp has been "kept burning during the last five years" an average number of 2,500 hours per year. If at any time the corporation shall "direct the lamps to be kept burning during a greater number of hours than the said average," the company shall be entitled to receive increased compensation.

Another provision is that the company shall "so conduct their manufacturing or manufactories of gas as not to create a nuisance."—Proc. App'd by Mayor (1847-8), XV: 381-8.

An amendment to the ordinance of 1845 regulating the police of New York divides the city into four districts, each with a police-court and office. They are in the "Halls of Justice" on Center St., Jefferson Market, in Essex Market, and in the newly erected police-station-house on 29th St.—Proc. App'd by Mayor, XV: 391-92.

The mayor signs a joint resolution providing that a lease of the North Battery and pier at the foot of Hubert St. be granted to the "Commissioners of Emigration, for the landing of Immigrants, for a period of five years," at an annual rental of $5,000.—Proc. App'd by Mayor, XV: 401.

The common council orders: "That the room [in the city hall] now occupied by the Judges of the Supreme Court as Chambers be united with and form a part of the Governor's Room, as soon as other apartments are provided for the said Judges."—Proc. App'd by Mayor, XV: 410.

The common council orders that Lexington Ave. be opened immediately from its present extent to 42d St.—Proc. App'd by Mayor, XV: 396; Man. Com. Coun. (1857), 53.

Havemeyer, in his message to the common council, says: "The immigration from the over-populated countries of Europe, which our free institutions, and our fertile and unoccupied soils has invited, has received a new impulse from the famine which has been recently added to the evils of misgovernment. The number who have reached the last year sought a new home and a refuge from want and oppression, is scarcely less than 250,000, of which about 160,000 persons, arrived at this port. The regulations recently proposed in Canada, will, if adopted, discourage direct emigration to that country, and increase the resort to this city, and it cannot be doubted that the annual accessions to our population of such persons, are destined rapidly and largely to increase and to form one of the most remarkable characteristics of the age in which we live."

"Aside from the vast increase of the productive power of the
In a description of "the picturesque beauty of the suburbs of New York," the prophecy is made that "Not many years will pass before Harlem, Yorkville and New York will be one city."-

*N. Y. Com. Adv.*, Je 6, 1848.

Gen. Lewis Cass, accompanied by Sen. Houston and others, arrives in New York and is welcomed by Mayor Havemeyer and a great crowd of citizens.—*Even. Post*, Je 9, 1848.

The first annual report of the directors of the Hudson River Railroad (printed in this year) bears this date. It shows the completion of the survey as far as Poughkeepsie. See S 25, 1849.

In closing the old Eastern Post Road between 31st and 42nd Sts., the common council orders that the land in the road be conveyed to any property owner. *App'd by Mayor*, XVII: 33.

The "Board of State Commissioners of Water Supply" is appointed by the governor and confirmed by the senate.—*Man. Cont. Coun.* (1849), 222. This was done under the act of May 2, 1834 (q. v.); but see Ap 11, 1849.

The first effectual steps are taken for establishing a workhouse for employing the able-bodied inmates of the almshouse. A communication on the subject is presented to the board of aldermen, and both the board of aldermen and the board of assistant aldermen appoint special committees to consider it.—*Proc., App’d by Mayor*, XVI: 144. A report was rendered to the board of aldermen Feb. 12, 1849, favouring the project, and the board submitted the draft of an act to be presented to the legislature. The committee returned by the board, and subsequently the act was passed by the legislature (see Ap 11, 1849).—*Man. Cont. Coun.* (1849), 296. The corner-stone of the workhouse was laid on Blackwell’s Island on Nov. 2, 1850.—*Ibid.* (1851), 296; *Harper’s Mag.*, Nov., 1866.

Christ Church, on Anthony’s Street, rebuilt since its destruction by fire on July 30, 1847 (q. v.), is re-consecrated.—*Even. Post*, Je 30, 1848; *Mag. of Am. Hist.* (1888), XIX: 60–62; *L. M. R. K.*, III: 932. For view of the new church, see *The Evergreen* (1849), Vol. V. See, further, Je 30, 1854.

The treaty of peace with Mexico is proclaimed by President Polk, it having been ratified by both governments. It stipulated the evacuation of Mexico by the U. S. troops within three months; the payment of $5,000,000 in cash, and $12,000,000 in four annual installments by the U. S. to Mexico, for New Mexico and California, which had become territory of the U. S. by conquest, and, in addition, the assumption of debts, due certain citizens of the U. S. from Mexico, to the amount of $5,000,000. It also fixed boundaries and otherwise adjusted matters in dispute.—*U. S. Treaties*, etc. (1910), 115–116; *Proc., App’d by Mayor*, XVI: 34.

During the day, there arrived from New Orleans the bodies of five victims of the war in Mexico, which were sent for by the common council.—*N. Y. Com. Adv.*, Je 5, 1848.

The committee reports $300 for a sand of colours for the 10th and 12th Regiments of the Fourth Brigade, N. Y. State Militia.—*Proc., App’d by Mayor*, XVI: 55. A further sum of $500 was appropriated on Aug. 21 for a second sand of colours.—*Ibid.,* XVI: 124.

Mayor Havemeyer approves a resolution authorizing the mayor to pay a bounty not exceeding 50 cents "for each dog found running loose or at large in the City, below Forty-second street, without being properly muzzled, and which may be killed or destroyed."—*Proc., App’d by Mayor* (1848–49), XVI: 63.

The first Woman’s Rights Convention, called by Lucretia Mott, Martha C. Wright, Elizabeth Cady Stanton, and Mary Ann McClintock, assembled at Seneca Falls, N. Y. It adjourned on July 23, after adopting a “Declaration of Sentiments” and resolutions demanding suffrage, preaching, teaching, and property rights. It re-convened in Rochester on Aug. 2 and continued through three
The common council orders that the American Institute, at present occupying premises in the old almshouse building in the Park, shall vacate said premises in the basement of the city hall, he required to vacate these premises on or before Nov. 1; also that the N. Y. Gallery of Fine Arts, at present occupying the "Rotunda" in the Park, be required to vacate within ten days. This is for the purpose of providing suitable rooms for holding the various courts.—Proc., App'd by Mayor, XCVII, 110. On Sept. 14, the board paid the managers of the "American Gallery of Fine Arts" $1,800, in full for repairs and alterations made to the Rotunda.—Ibid., XVI: 140.

A great reception is held upon the arrival of the First Regiment, N. Y. Volunteers from Mexico.—Eve. Post, JI 25, 1845.

The arrival in our harbor of the United States frigate Cumberland, bearing the broad pennant of Commodore [Matthew C.] Perry, offers an appropriate occasion to testify our appreciation of the gallantry and good conduct of our Navy generally, in the late war. With this preamble, the common council passes a resolution of thanks, extends the hospitality of the city to the commodore, his officers and crew, and proposes to present to him the freedom of the city, in recognition of his services while in command of the Gulf squadron; to present to Mexico.—Proc., App'd by Mayor, XVI: 95; N. Y. H. S. Coll. (1885), 474.

Whereas, The neighborhood of St. John's Park is in the night time infested with base and unprincipled persons, who take advantage of the darkness in which it is shrouded, in consequence of the dense foliage of the trees, and the dimness of the ordinary oil lamps, to perpetrate acts of violence upon . . . unprotected persons, who have occasion to pass through Beach, Varick and Lafayette streets. Therefore, be it

Resolved, That the Superintendent of Lamps and Gas be, and he is hereby directed to have Beach, Varick and Lafayette streets, where they front on St. John's Park, lighted with gas, in accordance with a resolution of the Common Council, approved by the Mayor on the 20th March, 1846.—Proc., App'd by Mayor, XVI: 85.

The common council orders that resolutions directing the re-arranging of streets shall be carried into effect each year only in April.—Proc., App'd by Mayor, XVI: 101.

The common council orders that the owner of each building below 40th St. shall "provide a barrel, or tub, or box, of sufficient size to contain all the rubbish, coal ashes and garbage, that may accumulate from day to day, on his or her premises," and shall place it "conveniently in front of each house or tenement, or in such convenient spot as shall be designated by the street inspectors of the several wards."—Proc., App'd by Mayor, XVI: 104.

A common council order appoints Horace Greeley commissioner of common schools for the Twelfth Ward.—Proc., App'd by Mayor, XVI: 110.

The common council orders the "passages and corridors" in the city hall be lighted with gas.—Proc., App'd by Mayor, XVII: 120. Also Centre St.—Ibid., XVII: 121.

The common council appropriates $2,000 to convert the "Rotunda" in the Park for public offices.—Proc., App'd by Mayor, XVII: 122.

The common council appropriates $10,000 for the erection of the new building.—Proc., App'd by Mayor, XCVII, 110. On Oct. 14, a second $10,000 was appropriated for the same purpose, as well as $5,000 for fitting up the building.—Ibid., XVI: 175. On March 9, 1849, $5,000 was again appropriated for the latter purpose.—Ibid., XVI: 370. For the total cost of ground, building, and equipment, see J. 27, 1849.

The common council directs the committee on public offices and repairs to have the flags recently presented to the Corporation by the Volunteers from Mexico, placed in the Governor's room, with suitable inscriptions thereon.—Proc., App'd by Mayor, XCVII, 123.

Most of the commercial part of Albany is destroyed by fire.—N. Y. Com. Adv., Ag 19, 1849.

The gas works at the corner of Centre and Hester Sts. are destroyed by fire.—Eve. Post, Ag 31, 1849.

With the pleasant history of New York, written by Washington Irving, under the name of Diedrich Knickerbocker, is just published by G. Putnam, in this city, in one duodecimo volume, very neatly got up, as the first of a series of "Irving's Works." The edition is revised by the author, who has added a preface, in which he gives an account of the origin and design of the work. We are glad to welcome the reapparance of a work which, in the forty years since it was written, has lost none of its power of entertainment.—Eve. Post, Ag 31, 1848. (The MS. of the preface, which is really an apology for the work, is in N. Y. P. L. See also ID 4, 1849.)

The cracked fire-bell is lowered from the roof of the city hall. Half way down, the guy breaks, and the immense piece of metal falls to the steps and shatters them. A new bell, weighing 6,500 lbs., which was cast at West Troy, arrived yesterday.—N. Y. Com. Adv., S 1, 1848; descrip. of Pl. 143-a, III: 713. See Mr 9, 1849.

For fire covering the last eight city blocks, occurs in the heart of Brooklyn. For a full account, with map of the burnt district, see Com. Adv., S 11, 1848.

Irving Hotel "is the name of the new hotel recently erected at the corner of Chambers street and Broadway for D. D. Howard. . . ."—Eve. Post, S 11, 1848.

The Roofs of the old Grace Church, at the corner of Broadway and Rector street, so long an eyecatcher to good taste, are about to disappear before the spirit of improvement. The lot and ruins in question have been purchased of its late owner, Elhu Townsend, Esq., by John Jay Phelps, of the firm of Phelps, Chittenden & Bliss, with a view of erecting there a magnificent building for stores and offices, which shall amply develop the great advantages of its site. It will extend 76 feet on Broadway, and 223 feet on Rector street . . . The building will be five stories high, constructed in the most substantial and durable manner, with a front facing of free stone. In point of finish and elegance it will rival the large and beautiful free stone structures recently erected by Mr. Phelps in Courtlandt street.—Eve. Post, S 22, 1848.

The common council resolves to present the freedom of the city, in a gold box, to Frederick Jerome, a common seaman on board the American ship "New World," who was the means of saving a number of persons from the wreck of the "Ocean Moarch," which was recently burned at sea on her voyage from Liverpool to New York, when 178 persons were lost; and who also was instrumental in preserving life and property when the packet-ship "Henry Clay" stranded at Baranegut.—Proc., App'd by Mayor, XCVII: 447-49; N. Y. H. S. Coll. (1885), 425-26. The presentation was made at the Mariners' Church, at Roosevet St., on Sept. 29.—Eve. Post, S 30, 1848.

The common council orders that the "wooden pavement" in William St. between Pine and Wall Sts., and in Hanover St. between Wall and Beaver Sts., be taken up and the streets repaired with "round stones."—Proc., App'd by Mayor, XVI: 152.

The lease of the Richmond Hill property (see J. 3, 1846) is surrendered to Trinity Church.—Liber Deeds, DIX: 376; and see Aug. 1849.

The Historical Society will hold a meeting at their rooms, this evening. An important historical document in manuscript, recently discovered at the Hague, will be presented and read. It is an original account of New Netherland, written here in 1636, and transmitted by the Dutch Secretary, De Rodiere, to the authorities in Holland.—Eve. Post, O 2, 1848. The meeting was held on Oct. 7.—Ibid., O 4, 1848. The Dutch document here referred to was the letter written by Isaac de Rasiere to Samuel Blommaert, extracts from which are published in the Chronology under Autumn, 1628. A copy was sent to the Historical Society by John Romey Bridgman, N. Y. N. Y. Har. XCVII, 122-35; 159-63; N. Y. H. S. Collections, 2d ser., II: 257-62.

By this time, Broadway had been widened from 21st to 25th St., at a total cost of $1,571,15;—Man. Com. Coun. (1872), 577.

The common council resolves "That a lease of the square of land bounded by Duane, West, Reade and Washington streets, he made to the 'New York and Erie Railroad Company,' for a term of ten years, at an annual rent of five thousand dollars, be granted to the corporation for the said purpose of a depot for said New York and Erie Railroad Company only."—Proc., App'd by Mayor, XCVII: 154-55.

A great free soil mass meeting is held in the Park.—Eve. Post, O 10, 1848.

A special committee of the common council having been appointed on Sept. 8 to report upon a plan for the enlargement of the Battery, now reported by Mr. Greeley and a map drawn by Daniel Ewen, surveyor, showing the line of the old Battery previous to the last enlargement (1824), the limits
The common council orders "That the iron railing now being constructed around Washington square, be placed on the line where the wooden fence now stands, except that the angles be rounded, and three small gates be placed in each circle of the square."—Proc., App'd by Mayor, XVI: 226.

The Whig candidates, Zachary Taylor and Millard Fillmore, are elected president and vice-president, defeating their Democratic opponents, Lewis Cass and Wm. O. Butler.—McKeen, National Conventions and Platforms, 58-73.

The common council refers to the committee on wharves, piers and slips, with power, a petition of Anson G. Phelps and others, owners of "San Francisco," for a berth on the eastern side of the Battery. They are directed to report their recommendations to the public. The committee reported that the piers and slips were not necessary, nor would it be advisable to have them. The report was referred to the committee on wharves, piers and slips.—Proc., App'd by Mayor, XVI: 232.

The common council authorizes the N. Y. & Harlem R. Co. to lay down rails in Canal street, from their road in Centre street, to a point seventy-five feet east of Broadway, to enable them to afford the increased accommodation for the public, which may be required by the extension of their own road, and by their connection with the New York and New Haven Railroad Companies, for the purpose of establishing a depot for passengers to and from the New York and New Haven Railroad, with permission to cross the side-walk from the rail tracks into any premises which either of said companies may become the lessees or owners of...—Proc., App'd by Mayor, XVI: 234.

By this time, the new state arsenal, at Fifth Ave. and 64th St. (see Jl 5 and N 4, 1847), was erected, though not entirely completed (until 1851). It was the largest building of the kind in the state, an imposing edifice, having a frontage of 200 ft., and depth of 90 ft. A sub-cellar, under the northern wing of the building, is to be occupied by the old Revolutionary pieces. The basement...is for heavy cannon and balls. The principal story...will be tenanted by the small arms. The second story,...by munitions; and the upper story, by gun carriages, etc., etc. In the rear of the main building is a small magazine.—The Great Metropolitan or New-York Almanac for 1850, 77. See also text of the tablet over the entrance, pub. in 19th Ann. Rep., Am. Scenic Atlas, Prof. Soc. (1914), 165-66; ibid. (1915), 45; and L. M. R. K., III: 925. For early views of the building, see: McNeil, Comm. Coun. (1850), 402; Illustrated News, I: 76, 77 (Ja 20, 1853). Some of the paintings for the interior of the building were painted by J. C. Hare, who was one of the early architects of the city and was known for his work on the New York City Hall. He was also responsible for the design of the New York Central Railroad Station, which was completed in 1851. The building was a major landmark of the city and became a symbol of progress and prosperity.
tion relinquish the same . . . . ” The company shall extend the pier on its southerly side, and have permission to “square the block” on the northerly side, as shown on maps accompanying the resolution. Such improvements shall be made at the company’s expense but shall be the property of the city at the expiration of the lease.

—Proc., App’d by Mayor, XVII: 261.

Dec. 29 1848

Emperor Ferdinand of Austria, having been forced to abdicate, is succeeded by his nephew, Francis Joseph I. Hungary refused to recognize the new emperor, and war broke out between the two countries.—Hazen, Europe since 1815, 178-79. See Ap 14, 1849.

Washington Irving presents to the St. Nicholas Society a weather-vane, consisting of an upright rod about 6 ft. high, surrounded by four arms to indicate the points of the compass, above which is a copper cock which revolves. This was given to Irving by Elizabeth Mackie on May 15, 1836, in the belief that it had graced the stadt-huys (the first city hall) of 1656 (p. v.). Irving placed it on “Sunnyside,” his home at Irvington, on the Hudson. Its use by the St. Nicholas Society in later years is thus explained: When the gentlemen met on Feb. 14, 1835 (p. 31), to consider “the expediency of establishing a society to be composed of the old residents of New York and their descendants,” they had in mind the fact that the influx of New England families into New York was encroaching upon the business and social prestige of the older citizens (see Ap 17, 1841). At the society’s banquets, the punning ways of these new-comers would be enlarged upon jocosely. The weather-cock, placed upon the president’s table, and pointing eastward, symbolized this condition which summoned the sons of St. Nicholas to let their voices be heard in honour of Old New York.

—See the 1907 ed. of the society’s Charter, Constitution, By-Laws, and List of Members, opp. p. 29, where a photograph of the weather-vane is reproduced.

It is stated in Vol. I of the present work, p. 234, that there is no “official confirmation” of the alleged “pedigree” of this “wind-vane;” that while it is possible that it was taken from the stadhuys, it seems more likely that it belonged to the city hall (the later “Federal Hall”) on Wll St., “which we know from several contemporary pictures had a vase in the form of a cock.” It is even more likely that it came from one of the early churches. For example, on March 20, 1839, the N. T. Mirror published an engraved view and description of the Middle Dutch Church, and referred to the weather-cock shown in this view as “a correct representation of ‘bright chanciler,’ in the ancient Dutch taste.” The weather-cock was loaned to the N. Y. Hist. Soc. by the St. Nicholas Soc. in 1923, and remains there on exhibition.

The first gold from California is deposited in the U. S. mint, by D. C. Grimes, acting as agent for an outfit of the U. S. Mint. (new ed.), Vol. X.

The common council directs the committee on arts and sciences to report what suitable return shall be made to Pope Pius IX for a present to the city of six medals emblematic of events connected with the Papal dominions. The medals are described in the resolution. The committee is also to take into consideration the subject of international exchanges, as now being conducted by Mons. Alexandre Vattelene.—Proc., App’d by Mayor, XVI: 276-79. A resolution of Jan. 25, 1849 (p. v.) embodies the committee’s recommendations.

Louis Napoleon Bonaparte is elected president of the French Republic.—Hazen, Europe since 1815, 198-200.

The new Grace Church is opened for the first time.—Eve Post, Dec 11, 1848.

The “House of Industry and Home for the Friendless,” on 30th St., west of Fourth Ave., is completed and dedicated.—Eve Post, Dec 14, 1848; and ibid., O 2, N 2, 1848; Man. Com. Coun. (1849), 292.

The Park Theatre is destroyed by fire.—Eve Post, Dec 15, 1848.

This was its second burning.—See May 25, 1820. For its history, see Index of the present work; also Ireland, II: 175, 363, 380, II: 507; Brown, I: 11, 24, 68-69; Costello, 244. See also L. M. R. K., III: 89; and descrip. of Pl. 91, III: 577. It was not rebuilt. See Je 13, 1850. See also Wilson, Mem. Hist. of N. T., VII: 1471: 470-72. On the theatre site, Astor erected five brownstone stores in 1850—N. Y. Com. Adm. O 13, 1850; Man. Com. Coun. (1866), 595.

Numerous projects for the improvement of the city,—particularly the union of New York, Brooklyn, and Williamsburg, subdivision bridges over East River, stone piers, a mint on the site of Columbia College, and a hospital for infectious diseases,—are proposed by one “Gray” in a letter to the press.—N. Y. Com. Adm., Dec. 21, 1848. For the common council’s action regarding a mint, see Ja 17, 1849. Regarding the union of cities, see Ja 29, 1849.

“Bedlow’s Island has been fitted up for the Commissioners of Emigration, at a large expense, and is now occupied by them as a temporary hospital for the use of convalescents from the quarantine, and a ward has also been established for the treatment of surgical and similar cases which may be sent from the city.”—Eve Post, Dec 28, 1848. See also ibid., D 30, 1848.

The full service of the N. Y. & New Haven R. is opened over 77 miles between New Haven and Canal St., New York (see N 15). On June 13, a New Haven to Williams Bridge—From chron. supplied by the company. “Passenger cars of the New Haven line were pulled through the city streets by horses, and assembled into a train on Fourth Avenue, near the southern end of the tunnel.”—Dubart, Hist. of Travel in Am., 997, 1000, with view reproduced from one in the Illustrated News, of Jan. 29, 1853 (not cited by Dubart), showing a scene in Centre St. during a snowstorm, with one of the passenger cars hauled by eight or ten horses past the old “Tomb” (prison).

The common council orders that the street car’s mot nor “the Telegraph Company” to have “the telegraph posts” at the “junction of Sixth avenue and Broadway,” removed “to the side-walk.”—Proc., App’d by Mayor, XVII: 291.

1849

In this year, the Roman Republic, established under the leadership of Joseph Mazzini, was overthrown by France, and Pope Pius IX restored to power.—Hazen, Europe since 1815, 182. See, however, F 26, 1871.

In this year, Thos. Crawford received a commission from the state of Virginia to execute a colossal equestrian statue of Washington, to be erected in the city of Richmond.—Hicks, Thos. Crawford; His Career, Character, and Works, 22-27.

The most notable guide-book describing New York in the middle of the Nineteenth Century, that of E. Porter Bedloe, makes the following observations (selected):

“...The southern portion of the island, including about one fifth of the whole, has been compactly built. The remainder is mostly under tillage. . . . Probably no other city would have evoked the public spirit of New York in widening and straightening its ancient streets. Large piles of valuable buildings have opposed no barrier to the accomplishment of this object. The work of improvement is not yet completed. While we write, the crash of buildings, under the hand of innovation, can be heard, making way for one to one of the principal business streets of the city [William Street].

“Broadway . . . extends from the Battery . . . to Union Place, a distance of 2½ miles. . . . The great promenade for beauty and fashion, it contains the largest and most splendid retail stores in the city. . . . Broadway, though 80 feet wide, is too contracted for the free passage of the numerous vehicles with which it is always thronged. The principal lines of omnibuses pass through this street, but their progress in its lower portion is so slow, that their utility for short distances is much diminished. To obviate this inconvenience an elevated railway has been proposed, but opposition of some of the citizens to this measure has yet to be removed.

Among other streets prominent for width, length or beauty, may be mentioned the Bowery, East and West Broadway, and Chatham, Canal, Hudson and Greenwich streets. Pearl street, one mile and three eighths in length, at the same time the most irregular and the most important business street in the city, commences at State-Street, a short distance from Broadway, and having described a zig-zag curve terminates in Broadway, nearly a mile from the Battery.

“The northern portion of the island, most of which is not yet thickly settled, was laid out in a regular manner, . . . The avenues . . . have been cut through the opposing rocks and hills at great expense. They are intersected by 156 cross streets, numerically designated, which, with the avenues, form oblong rectangles, most of them 200 by 800 feet.

The streets are mostly paved with the common round paving stone. But the ‘Russ Pavement,’ invented by Horace P. Russ, Esq., has during the last two years been introduced into several places in the city . . . It consists of blocks of trap, about 10
1849

1849

inches in depth, laid in ranges, ... [An account of the times and places where this was first laid in New York is given. See also 1852.]

“Although New York is not so well supplied with Public Grounds as might be desired, in consequence of the neglect of the City Fathers to reserve, when the soil was not as valuable as at present, a sufficient portion for this purpose; yet we can boast of several splendid promenades, and one not surpassed, if equalled, in this country.

“The Battery, at the southern extremity of the island, forms an irregular figure, resembling a quarter section of the space included between two concentric circles. ... Extended in its limits, enclosed by an iron railing on the side next the city, and by an open railing with stone posts on a foundation of solid masonry on the water side; laid out with grass plots and gravel walks; planted with many additional trees; and presenting a view enlivened at different times by the sails of every nation; it draws within its precincts by a more irresistible attraction the young men and maidens of our own days.

“Hudson Square, or St. John's Park, is a little ornamental enclosure, of about four acres, situated in front of St. John's Church, and bounded by Hudson, Laight, Varick and Beach streets. It stands in the name of the corporation of Trinity Church, though it is virtually the property of the surrounding owners; and its privileges are no less among other things, to plant the property, and such others as are permitted on their recommendation to hire keys at the annual charge of ten dollars. It is surrounded by an iron fence, contains a most beautiful fountain, and is more abundantly supplied with shrubs and flowers than any other park in the city.

“Washington square, containing nine and a half acres, bounded by Waverly Place, ... and Wooster, Fourth, and McDougal streets, was formed in 1837 by adding to the ground formerly used as the Potter’s Field about one half more purchased of private owners. The houses were collected and deposited in the treches on the sides of the square. Washington Square has been until recently the principal military parade ground in the city.”—Belden, New York, Past, Present & Future (1849), 28-34.

Twenty-one omnibus lines are listed, showing routes and the number of omnibuses belonging to each line. These total 327 licensed omnibuses.—Ibid., 53.

At this time, there were eight railroads having either ferry connection or direct connection with Manhattan Island. Those with tracks on the island were the Hudson River Railroad with terminal at 51st St., soon to be opened as far as Peckskull; the New York & Harlem Railroad, No. 4 Tryon Place, opposite the city hall (which had 12 trains daily to Harlem, 7 to Williamsbridge, 5 to White Plains, 4 to Croton Falls, and 2 to Dover Plains); and the New York & New Haven Railroad, 29 Canal St.—Ibid., 72. Vide infra.

Exhibitions of paintings were numerous in New York at this time. The gallery of the American Art-Union (497 Broadway), and the one in the Fifteenth and the Forty-fourth Streets (now the Rotunda), were opened throughout the year. The exhibition of the National Academy of Design (in the Society Library building, corner Broadway and Leonard St.) was continued during about three months in the spring and early summer. (See, further, Mr 16, 1850). The Lyceum Gallery, at No. 563 Broadway, containing original paintings of the old masters, and the gallery of Goupil, Vibert & Co., at No. 289 Broadway, containing works of European art, were of worth,—Ibid., 116, 119. Vide infra.

At this period, Hoboken was a resort for excursions, its “Sibyl’s Cave” and “Elysian Fields” being two attractive features.—Ibid., 120.

At this time, No. 1 Broadway, formerly the Kennedy mansion and headquarters of Sir Henry Clinton during the British occupation, was a hotel (see 1848).—Ibid., Appendix, (description of the “Model of New York”), 10.

The New York & New Haven R. R. depot was a “marble building near the Gas Works, on Canal-street.”—Ibid., Appendix, 11; and see above list of railroads in the city.

Lady Emmeline Stuart Wortley, after a visit to New York in this year, says that “the first things that struck us on arriving in the city of New York—the Empress City of the West—was, of course, Broadway. It is a noble street, and has a thoroughly bustling, lively, and somewhat democratic air. New York is certainly handsome, and yet there is something about it that gives one the idea of a half-finished city, and this even in Broadway itself; for the street was literally littered with all imaginable rubbish which, we should imagine from appearances, is usually shot in that celebrated thoroughfare; indeed it seems a sort of preserve for this species of game. Piles of timber, mounds of bricks, mountains of packing-cases, pyramids of stones, and stacks of goods, were observable on all sides. The New Yorkers themselves grumble much at the inconvenience, and their newspaper often contain pathetic remembrances with the authorities, for allowing such obstructions to crowd the thoroughfare.

Besides this, it appears from their published complaints, that these streets are very much too often torn up for sewage purposes, &c., and, in short, that this tiresome performance is frequently unnecessarily encroached, without their consent, and certainly to their manifest inconvenience. They ask if their time is to be taken up (as their streets are) continually, by having to stop every two or three steps, and sit down on the next doorstep to take the paving-stones out of their boots? Cart-loads of these same paving-stones, adding to the confusion, were to be seen on all sides, and sometimes felt, as our handsome, heavy, crimson-velvet-lined, hired vehicle (rather a warm-looking lining for New York, near the beginning of June), swayed from side to side, and rolled and rattled ponderously along.

“... On the cupola that surmounts the building [city hall], a view of the whole vast city is commanded; and in this there is a clock; and there is also an apartment constantly occupied, night and day, by a watchman, whose office it is to keep a perpetual look-out for fires, and to give the alarm, by striking an enormous bell which hangs in a belfry in the rear of the cupola, and which is exclusively used for this purpose. By this bell the man watches with a hammer in his hand, ready to give the necessary notice to observe the least indication of fire. The sound can be heard from one end of the city to the other, and is almost instantaneously responded to by a hundred others in every direction. The number of strokes indicates the particular word.

“... Some of the Squares of New York are very handsome. Washington Square is prettily laid out with walks, and shaded by flourishing trees. Union Square has an octave in the centre, and is inclosed with a handsome iron fence. St. John's Park is also embellished with a fountain, and adorned with trees.

“Pearl-street, a labyrinthine street in New York, which is said to have been originally built by the Dutch, along a cow-track, is a very zigzagging thoroughfare indeed. ... It is very narrow, and the houses are very high, like those in Old Edinburgh; waves and billows of merchandise of every description and denomination seem pouring over from the brimming stores and warehouses, into the inconveniently narrow street. ...—[map of the U. S., etc., during 1849 and 1850 (London, 1851), 1: 23, 286-87, 296.

Sidney's Map of 12 miles around New York bears this date:—See map No. 996, bureau of topography, borough president's office.

Near the head of Dovers-street, and at the junction of Pearl and Croissy streets, stands the house of William Franklin, a member of the society of Friends, and an eminent merchant, whose wealth was indicated by the dimensions of his dwelling. The late Governor De Witt Clinton, married one of his daughters, and afterwards occupied his house. But it had previously been rendered more illustrious as the first residence of General Washington in this city after his election as President of the United States. It has since been altered, and the lower part converted into shops. In the rear of this, in Pearl-street, was the Quaker Meeting House; and this quarter of the city, as far as Chatham-street, was principally inhabited by members of that society. But the more wealthy ones had their establishments lower down, as far as Maiden Lane. Here were the Pearalls, the Fyors, the Embre, the Effingham, the Hicles, the Hawkhursts, the Halletts, the Havilands, the Coroless, the Keeneyo, the Townsmen, the Titusses, the Willlets, the Wrights, &c. &c. Interspersed, however, with others equally substantial though not so plain, such as the Waltons and Roosevelts.

The Bank of New York was first kept in the larger Walton House, and its first President, the elder Isaac Roosevelt, had his dwelling nearly opposite.”—Duer, New York as it was during the Latter Part of the Last Century (1852), 2: 483-485.

By this year and the next, the opening up of new streets entailed many ordinances for the laying of sidewalks, and curb- and gutter-stones, the extension of the sewer system, and lighting the streets with gas. Such ordinances were frequent for many years, and continued indefinitely.—See Proc. App'd by Mayor, XV, XVI et seq.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1849

In this year, the Richmond Hill Theatre property (previously known as the N. Y. Opera House—see 1847), was demolished.—Brown, I: 236; Haskell’s Reminiscences, 457; descrip. of Pl. 52, III: 447; Cf. Stone, Hist. of N. Y., Appendix II, and Man. Com. Coun. (1872), 407.

In Dec., 1849, when tearing down old buildings on the east side of Varick St., between Canal and Carmine Sts., the wreckers found remnants of the old “Richmond Hill.” and even the stage of the theatre was pointed out, then used as part of a stable. “On some of the beams were evidences of ancient painting or fresco work.” The proctor of a neighbouring cafe possessed a playbook of 1846, showing that the old theatre at that time was known as “Mrs. Nelson’s Theatre.”

The news report of 1913 continues: “Over the site will soon be the reconstructed Varick Street, 100 feet wide, and at Carmine Street it will connect with the Seventh Avenue extension which will be cut through from Eleventh Street. Within a few months the Seventh Avenue subway diggers will be at work beneath the grounds which Mrs. John Adams admired for their attractive garden and handsome trees.”—N. Y. Times, D 11, 1913. On Sept. 25, 1923, the Greenwich Village Historical Soc. unveiled a memorial tablet on the Butterick building, corner of Spring and Macdoogall Sts., which is near the site of “Richmond Hill.”—ibid., S 17, 1923.

In this year, the International Art Union was established by Mrs. Catherine Durand & Co., at 358 Broadway. One of its undertakings was to send regularly to Europe for a period of two years an American art student, selected through a public exhibition of students’ work. It closed its affairs in 1862.—Howe, Hist. of the Metropolitan Museum of Art (1913), 86.

There was also established, in this year, the Düsseldorf Gallery, in the Düsseldorf Church of the Divine Unity, in Broadway, between Spring and Prince Sts. This was “the first appearance in New York of foreign art on a large scale,” and the beginning of “the eclipse of American art.” For further facts regarding it, including view of the interior, see ibid., 86-88, citing John Durand’s Life and Times of A. B. Durand, 192.

In this year, E. Jones published a lithograph, New York Picturesque Views, Concept of Maiden Lane, showing a panorama of both sides of this street, on one long sheet measuring 8 1/2 by 7 1/2. For an account of the buildings seen in the view, see descrip. of Pl. 147, III: 719. See also 1848.

A lithographic view of New York and the harbour, from the heights above St. George’s, Staten Island, drawn by Burton, bears this date. It is reproduced and described as Pl. 174, Vol. III.

A lithographic view of “Union Park,” from the Head of Broadway, reproduced and described as Pl. 176, Vol. III, bears this date.

A coloured lithograph, showing a bird’s-eye view of New York, looking south, with Union Square in the foreground, bears this date. It is reproduced and described as Pl. 135, Vol. III.

In Valentine’s Manual for 1849 were published a map of the old Union Park and adjoining fountain, 50; the nursery establishment on “Randell’s” (error for Randall’s) Island, 218; the Free Academy, 224; the Walton house on Pearl St., 311. For view of an old house on 45th St. near Fifth Ave., 1849, see ibid. (1862), 581.

The New York Historical Society approves a memorial to the common council “requesting them to publish the unpublished minutes [see Ja 22, 1848] of their Honorable Body, from the first incorporation of New York.” It is contended that this action “would not only provide for their safety against their possible destruction by fire or other casualty, but would be the means of placing within the reach, and thereby securing to the people of the City, the knowledge of the interesting contents of those records, embracing, as they do, among other things, the early municipal legislation of this great and prosperous metropolis.”—Proc., Ed. of Ald. (1848-49), XXXVI: 415-16. See F 19.

The Academy of Design has purchased a lot on Broadway, on which a large building is to be erected for its accommodation. The New York Gallery is also to be accommodated in the same building; the apartments which contain the pictures are to be on the ground floor.”—Evac. Post, Ja 8, 1849. See also ibid., F 15, 1849. See Mr 16, 1850.

The common council appropriates $600 to procure a full-length portrait of Gov. Young, framed, to be placed in the governor’s room.—Proc., App’d by Mayor, XVI: 305.

The common council passes a resolution favouring the establishing of a U.S. mint in this city. The section II: 126 reads: “The magnitude of the discovery of gold in California. The reduction of postage will so enlarge the business of the post-office as to make larger quarters for that also necessary. The report of the special committee on the enlargement of the city hall (see Doc. No. 3) is to be used in negotiations in Washington having that object in view, “provided sufficient provision shall be made in said building for the full accommodation of the General Government, for all such public offices as may be requisite for their purposes in this City.”—Proc., App’d by Mayor, XVI: 309-30; see also ibid., XVI: 351-52.

The legislature incorporates “The Trustees of the Astor Library.” They are the mayor, and Washington Irving, Wm. B. Astor, Daniel Lord, Jas. G. King, Jas. G. Cogswell, Fitz Greene Halleck, Sam. B. Ruggles, Sam. Ward, Chas. A. Bristed, and their successors. The trustees are empowered to receive from the executors of the will of the late John Jacob Astor (who died March 29, 1848, at New York) $400,000 bequeathed by him for the establishment of a public library in this city. This sum includes the price of “the site selected for the said library, on the easterly side of Lafayette Place,” as authorised by the testator. They are to spend not over $100,000 in erecting a building not exceeding 32 feet from the street, and they may be empowered to issue, to the amount of $75,000, to sell, mortgage, or exchange the building. They are to be permitted to sell, mortgage, or exchange the building for the sum of $260,000. It is supposed that by 1853, this building will be reconstructed at a cost of $1,200,000. See Rev. of N. Y. Ch. and C. S., 1853, chap. 1. —The City Library of New York, to be erected in the new building, is expected to contain 10,000 volumes. The first part of the building will be occupied by a law library, and the second part by a museum of public records. The council authorizes the mayor to enter negotiations with foreign artists for a public library, and to defray the necessary expenses of taking care of the same, and of the accommodation of persons consulting the library. . . .” The duties of the trustees are defined in further and fuller details.—Laws of N. Y. (1849), chap. 1. See, further, F 19, 1853. The library was opened on Jan. 9, 1854 (v. 2). For an early description of the projected building, see The Great Metropolis for 1850. See also Lydenberg’s Hist. of the P. T. Public Library for 1864.

Elizabeth Blackwell receives from Geneva Medical College the first degree of M. D. given in the U. S. to a woman.—Blackwell, Pioneer Work in Opening the Medical Profession to Women, 64-91.

In a resolution conveying the city’s thanks to Pope Pius IX for medals, etc. (see D 8, 1848), approved by Mayor Havemeyer, the common council directs the committee on arts and sciences to forward to the Pope a testimonial and a set of medals, etc., now published in reference to the Cotoca Aqueduct, including those of Charles King, Esq., and one of the medals struck [see Je 12, 1848] to commemorate the bravery and good conduct of the first regiment of the New York Volunteers, in the recent contest with Mexico.

The committee is also authorized “to solicit and receive suitable donations of books, prints, &c., to be appropriated and distributed in such a way as may seem proper, towards the purpose of carrying out and extending the system of international exchanges heretofore commenced by Mons. A. Vattémare, and now successfully in progress. . . .” It is further resolved “That when the room now occupied by the Law Institute shall be vacated, the Committee on Arts, Sciences and Schools, cause the same to be suitably arranged for the accommodation of a library, to contain the books now belonging to the Common Council, and which may hereafter belong to them, together with the prints, plates, medals, &c., now in their possession, and cause the same to be collected and arranged so as to be carefully preserved for the use of the City.”—Proc., App’d by the Mayor, XVI: 320-21.

In the report of the aldermanic committee on the basis of which this action was taken, the statement appears that it has long been “a serious inconvenience” to those who have occasion, to consult “the records of legislation, and other works connected with City, State, and National Legislatures, that there is no collection of these works to be found in any of our public libraries, to which the people can at all times have free and uninterrupted access. The present collection connected with the Clerk’s office of the Common Council, is very small and imperfect in the state of the copies lost and cannot be found, while the series of documents and proceedings of the Board are far from being complete. It has long been a subject of reproach that the first commercial city in the Union has no place of resort
The California fever is increasing in violence; thousands are going, among whom are many young men of our best families; the papers are filled with advertisements of vessels for Chagres and San Francisco. Tailors, hatters, grocers, provision merchants, hardware men, and others are employed night and day in fitting out the adventurers."—*Hone's Diary*, II: 355. See Ap 17.

The Free Academy (see My 7, S 22, N, 1847) is opened with appropriate exercises.—*Eve. Post*, Ja 25 and 27, 1849. "The building should be doubly famous from the fact that it cost actually two thousand dollars less than the appropriation of fifty thousand dollars. . . . The cost of the ground was but twenty-five thousand dollars, making a total investment, including furnishing, considerably less than one hundred thousand dollars."—*The City College* (1907), 8, descrip. of Pl. 136, III: 705; *Man. Com. Coun.* (1855), 228. See, further, *July*, 1853.

In a message to the common council, Mayor Havemeyer disapproves of a proposal from a Union of New York and Brooklyn "united in one charter and one government."—*Com. Adm.*, Ja 31, 1849. On April 9, 1849, a motion in the senate to effect such union was lost.—*Hibl.*, Ap 10, 1850. See D 21, 1848.

"The City has been put to considerable expense and inconvenience in consequence of the several fire alarm bells which have been erected on the City Hall having cracked, being thereby rendered useless." This is believed due to their being insufficient in size and weight "to withstand the heavy striking necessary to produce sufficient sound." The common council therefore orders that a bell of 10,000 lbs. be procured, "to be placed on the cupola of the City Hall, if upon proper examination it shall be ascertained that the said cupola is capable of sustaining that weight," and in case it is not, then a tower shall be erected in the vicinity of the Hall.—*Proc., App'd by Mayor*, XVII: 339. See F 22.

The legislature amends the charter of the Washington Monument Ass'n so as to authorize it "to commence the erection of the said monument at any time, with such sum of money in hand as in their discretion they may deem advisable."—*Laws of N. Y.*, (1849), chap. 25.

Nothing further was accomplished toward erecting a monument to Washington in New York City. A subscription-list had already been opened (see Ag 14, 1843), but discontinued. The original list (MS.), 1844-7, is now preserved in the N. Y. Pub. Library. See also descript. of A. Pl. 26-c, III: 882. It is likely that the efforts directed toward building such a monument in the city of Washington (see Mr 30, 1848) supplanted all other efforts here, until the equestrian statue was erected at Union Square in 1856 (q. v., My 9, Jl 4).

Hone mentions being a dinner guest "in Mr. John C. Stevens's palace, College place," adding: "The Palais Bourbon in Paris, Buckingham Palace in London, and Sans-Souci at Berlin, are little grander than this residence of a simple citizen of our republican city, a steamboat builder and proprietor."—*Hone's Diary*, II: 354.

New court rooms have been provided for the Supreme Court in the "New City Hall." "They occupy the centre part and about one-third of the building known as the 'Old Alms House.' In the basement, which was formerly occupied as a mere depository for rubbish, light and airy rooms have been made, in which there is a suite of rooms for the District Attorney, two rooms for the Petit Jury, and a Grand Jury room. These apartments are entered both from the Park and from Chambers street, and communicate with the court rooms above by a private staircase in the rear of the building.

"The main entrance to the court rooms is from the Park . . . Upon entering the main hall . . . on the right is perceived the judge's chambers, consisting of two large rooms. . . ."

"On the left side of the hall is the special term room, in which special motions and law arguments before a single judge will be heard . . . ."

"These four rooms and the main hall occupy the whole of the first floor. . . . On the second floor are two large and very convenient court rooms, which occupy the whole of the second and third stories of the building. On the right is the court room for the Circuit and Oyer and Terminer. . . ."

"On the opposite side of the hall, on this floor, is the General Term room . . . This room is so constructed as to accommodate the Court of Appeals, and a part of it also is railed off for the reporters . . . ."

"We understand that the court moves into the new rooms on Monday next" (Feb. 19).—*Eve. Post*, F 16, 1849.

The board of alderman adopts resolutions declaring it "ine-"
THE ICONOGRAPHY OF MANHATTAN ISLAND

1849 opened, from Frankfort to Chatham St., North William St.—

Mr 16 Proc., App'd by Mayor, XVI: 387.

22 The common council directs the superintendent of repairs to ad-
vertise for proposals "for altering and repairing and fitting up
the west end of the old Ann House building, ... for the use
of the Superior Court and the 'Law Library,' and appropriates
$4,000 for this object.

The board authorizes the committee on public offices and re-
pairs to make the necessary alterations in the rooms "now occupied
by the Mechanics Institute, in the basement of the City Hall, for
the use of the Marine Court."—Proc., App'd by Mayor, XVI: 396.

27 The common council appropriates $1,000 for furnishing the
government with new carpets, painting, cleaning, etc.—Proc.,
App'd by Mayor, XVI: 404.

28 Competition for plans for the Astor Library is authorized by the
trustees, who were incorporated on Jan. 18. The site for the building
on Lafayette Place, 65 ft. front by 120 ft. deep, was acquired in
April. Thirty drawings were submitted May 1, and though none
was wholly satisfactory, the first prize ($500) was awarded
Alexander Sadler and the second ($200) to James Renwick, Jr.
Sadler's plan was adopted provisionally on June 13, and, after
alterations, was finally adopted on Dec. 10, 1849. A contract
for erecting the building was let on Jan. 2, 1850. The corner-stone
was laid March 14, 1850 (q.v.), and the next three years were
required for erection and completion. The building was opened for
public examination Jan. 9, 1854—Lydenberg, Hist. of the

39 The legislature passes an act to provide for the publication
of the colonial and other documents collected by Brodhead, who
was appointed agent for that purpose under the act of May 2, 1839,
and whose work was completed in 1845.—Laws of N. Y. (1849),
chap. 175. The work of publication was begun in 1845 with Vol.
III, and continued in the following order: In 1845, Vol. IV; 1850,
Vols. V, VI and IX; 1856, Vol. I and VII; 1857, Vol. VIII; 1858,
Vols. II and X; 1861, Vol. XI (Gen. Index); 1877, Vol. XII (or
Vol. I of a New Series); 1881, Vol. XIII; 1883, Vol. XIV. See also
F 12, 1845.

Apr. 2 particularly significant are:

1. The term of the mayor— an annual term since the Nicolls
Charter of 1665—is lengthened to two years; so also is the term of
an alderman, although the assistant alderman continues to serve
for one year.

2. Beginning with 1851, the common council "shall annually
hold only three stated sessions, of not exceeding one month each,
commencing on the first Monday of January, May and September;" extra
sessions may be convoked by the mayor.

3. The assistant aldermen are to have the power of impeaching
officials, while the aldermen are to act as the court of impeach-
ment; a vote of two-thirds of the whole board is necessary to
convict. In further imitation of the federal constitution, it is
provided that "Judgment in case of impeachment shall not extend
farther than removal from office, and disqualification to hold
any office under the city charter; but the party convicted shall be
liable to indictment, trial, judgment and punishment according
to law."

5. Executive power is to be vested "in the mayor, the heads of
departments, and such other executive officers as shall be from
time to time created by law." A similar provision had been written
into the revised charter of 1847 (see Ap 7), but the common
council had failed to establish departments, and had continued to
perform executive functions through its own committees (see criti-
cism offered by Mayor Morris in his message of May 29, 1843).
It is now explicitly stated that "neither the common council nor
any committee or member thereof shall perform any executive
business whatever except such as is, or shall be especially imposed
on them by the laws of the state, and except that the board of
aldermen may approve or reject the nominations of the mayor.

Furthermore, detailed plans for the organization of the nine new
departments are given. The police department already organized
(see Je 16, 1845) is continued, the mayor, however, being made
"the head thereof," with the chief-of-police subordinate to him at
the head of a bureau of the department. The department of
finance, as indicated in the charter of 1847 (see Ap 7), is to consist of
a chief of bureau, the board of aldermen, the "receiver of taxes," and
the bureau of the "collector of city revenue." The street department,
headed by the street commissioner, is to have two bureaux, the chief
officers of which are to be designated the "collector of assess-
ments," and the "superintendent of wharves." The department of
repairs and supplies shall have four bureaux, the chief officers
of which shall be respectively denominated the "superintendent
of roads," the "superintendent of public buildings," the "sup-
intendent of pavements," and "chief engineer of the fire depart-
ment." The department of streets and lamps, with the "com-
misssioner of streets and lamps" at the head, shall have a "superin-
tendent of lamps and gas," a "superintendent of streets," and a
"superintendent of markets," presiding over separate bureaux.
The "city inspector's department," which takes its name from its
chief officer, has no subdivisions, matters "relative to the public
health" shall be its concern. This became the health department
later. Another department without bureaux is the "alms house
department," to be controlled by a board of ten governors (the
work of this board was outlined in a special act—see Laws ofN. Y.,
1849, chap. 246). The law department, headed by the "counsel to
the corporation," is planned with two bureaux whose chief officers
shall be the "corporation attorney" and the public administrator.
Finally, there is to be an executive department called the "Croton
aqueduct board," including a bureau for the collection of water
revenues. The three members of the board last named are to be
appointed for a five years' term by the mayor with the consent of
the aldermen. The chamberlain and the receiver of taxes are to be
appointed in the same way. Department heads, however, are to be
elected by the people for a three-years' term; in case of a vacancy
the mayor with the consent of the aldermen is to appoint a person
to fill the position until after the next election.

The common council is empowered "to establish such other
departments and bureaux as they may deem the public interest
may require, and to assign to them, and those herein created, such
duties as they may direct, not inconsistent with this act; but no
expense shall be incurred by any of the departments or officers
thereof ... unless an appropriation shall have been previously
made concerning such expense."

It is further provided, doubtless to correct such malpractice
as was criticized by Mayor Morris (see My 29, 1843), that "no
member of the common council, head of department, chief of bureau,
deputy thereof, or chief therein, or other officer of the corporation,
shall be directly or indirectly interested in any contract, work or
business, or the sale of any article, the expense, price or considera-
tion of which is paid from the city treasury."

6. The election of city officials is to take place hereafter at the
same time as that of state officials, etc., the first Tuesday after the
first Monday in November. Provision is made, however, that the
mayor may be elected this month in the event that no one be
selected by the board on April 29, 1851, and the aldermen and
assistants elected this month shall hold office until Jan. 1, 1850.

7. These amendments are to become effective on June 1, pro-
vided they are approved by the electorate at the polls on the
second Tuesday of April.—Laws of N. Y. (1849), chap. 187.

The amendments were approved by an overwhelming majority
on April 13 (p. 2). Durand says these changes were "destined to
work a revolution in city affairs," and he comments on the "move-
ment of the democratic spirit" as "strikingly illustrated in the
change from the custom of half a century before, when all the
executive officers of the city, including the mayor, were appointive,
to this law, which gave directly to the people the selection of a

"Washington Square.—The iron railing around these grounds
is now nearly completed, making it one of the pleasant promenades
of the city. The old wooden fence is gone, and with it the shabby

See also ibid., Ap 24, 1849.

The legislation authorizes the common council to sell the land
occupied as the state arsenal, bounded by Centre, Etn, Franklin,
and White Sts., and pay into the state treasury $50,000 out of
the returns of the sale, this sum to be full payment for the state's
claims to the property.—Laws of N. Y. (1849), chap. 188. See My
11, 1850. This was in consequence of the completion of the new
arsenal at Fifth Ave. and 46th St. (see N 15, 1848).

The legislation authorizes the common council to sell land to
buy ashes, garbage, salt, or other filthy substances into the streets
of New York.—Laws of N. Y. (1849), chap. 190.—See, however, My 14.
1849

In an act "to designate the holidays to be observed in the accep-
tance and payment of bills of exchange and promissory notes," the
legislature designates Jan. 1, July 4, Dec. 25, and "any day appointed
or recommended by the governor of this state, or the President of
the United States, as a day of fast or thanksgiving."—Laws of N. Y.
(1849), chap. 261. For the next addition to this list, see Ap. 25, 1870.

4 The legislature changes the name of the "Nautilus Insurance
Co." to the "New York Life Insurance Co.," and amends its chart-
er.—Laws of N. Y. (1849), chap. 211.

The common council orders that the grade of Fifth Ave. between
34th and 42d Sts. be amended.—Proc., App'd by Mayor, XVI, 415.
The grade at 37th St. was lowered 6 ft. in., and at 38th St. 9 ft.
in.—From records in Title Guarantee & Trust Co., cited in des-
cription of Pl. 129–3, III: 693. Lassing thus refers to it: "When
Fifth Avenue was graded and the altitude of Murray Hill was
diminished, this noble mansion [the Waddell villa] was left in the
air several feet above the street, to which the lot sloped in a series
of gentle banks. Not long afterward the building was taken down
for O 57, 1861, when it was not more than a dozen years old, and
on its site was erected the massive edifice known as Dr. Spring's
or the Brick Church."

-Hist. of N. Y. City (1884), II: 611–15. For the
acquisition of this corner property by the church, see descrip.

6 The common council passes an ordinance in relation to the er-
copting and raising iron brackets in the public streets for the sup-
port of awnings: "The owners or occupants of property in any
street of this City, exceeding the width of forty feet, and from
which the wooden awning posts have been or may hereafter be
directed to be removed," are permitted "to erect, in front of their
respective buildings thereon, iron posts, and none others, for the
support of awnings, with an iron cross-rail, which shall be nine
feet, and no less than six inches from the curb stone to the top of
said rail; said posts to be placed eight inches within the outer side
of the curb stone, and shall conform in all respects to a pattern or
model now deposited in the office of the Street Commissioner."
Other details of the specifications relate to braces, brackets, etc.
Resolutions heretofore passed, conflicting with this ordinance, are

The legislature incorporates the Panama Railroad Co., a stock
company, for the purpose of constructing and maintaining a rail-
road across the Isthmus of Panama, to the Republic of New
Granada, under a grant made by that republic to three of the incorpo-
rat ors; also for the purpose of purchasing and navigating steam or
sailing vessels in connection with the road. The company's place of
business is in New York City.—Laws of N. Y. (1849), chap. 284.

The legislature makes it a misdemeanour to manufacture slug
shot, and a felony to carry, use, or attempt to use it.—Laws of
N. Y. (1849), chap. 278.

He succeeds Wm. E. Havemeyer.—See Ap. 11, 1848. He was suc-
sceeded by Amrose C. Klagspurg.—See N 5, 1850.

The legislature orders the act of Mar. 29, (1845, p. 577), which
permits the N. Y. & Harlem R. R. to build a bridge across the
Harlem River, by authorising this company to construct an iron
bridge upon piers which shall not be less than 65 ft. apart, and with
a draw of not less than 40 ft. in width for the free passage of ves-
selfs.—Laws of N. Y. (1849), chap. 317.

The legislature incorporates the "Williamsburgh Ferry Co.,
"a stock company, for the purpose of running the ferries between
New York and the village of Williamsburgh on Long Island, known as
the Peck Slip and the Grand St. ferries, and such others as may
be lawfully established between New York and Williamsburgh and
granted to this company. The act safeguards the ferry rights of
20, 1849.

The act of Apr. 12, 1848 (p. v.), "to simplify and abridge the
Practice, Pleadings, and Proceedings of the courts of this state,"is extensively amended throughout, and reprinted in the Session
Laws with a "Table of Contents of Amended Code."—Laws of
N. Y. (1849), chap. 418 (pp. 613–726). This becomes the lawyer's
statutory guide for pleading and practice, and the forerunner of the
present Code of Civil Procedure. It was again printed in full at
the end of the Session Laws for 1851, with its own table of contents
and index.

The legislature creates the "Croton Aqueduct Board" in the
city of New York, repealing the act of May 2, 1834 (p. v.), for the
appointment of water commissioners. The powers and responsi-
bilities of this new department of the city government are fully
defined in the act. The officers or commissioners of the board are
to be nominated by the mayor and appointed with the advice and
consent of the aldermen. One of them shall be a civil engineer.—

On July 18, the board of aldermen appointed, on the nomination
of the mayor: Nicholas Dean, president; Theodore R. De Forest,
commissioner; and Alfred W. Craven, engineer, of this depart-
ment.

The legislature passes an act for the establishment of a work-
house (see J. 26, 1849) "for the employment of persons committed
to the city prisons, penitentiary, and almshouse in the city of New-
The work-house was constructed on Blackwell's Island in 1851,
the corner-stone being laid Nov. 2, 1850 (q. v.).

The amended charter as proposed by the state legislature (see
Ap. 2) is accepted in a referendum, the vote being 19,339 for, and

Omnibuses in New York have increased in number from 255 in

Hungary declares its independence of Austria, and Louis
Kossuth is appointed president. Russia, however, came to Austria's
aid, and subdued the rebellion, after which "Hungary became a
mem. province of Austria, and was crushed beneath the iron heel."
Kossuth and the other leaders were forced to flee.—Hazen, Europe
since 1815, 180–81.

Up to this time, 19,717 citizens of the United States have gone
from this country on gold-seeking expeditions to California. By
far the greater part of this number sailed from the port of New

In the will of the late Gen. Andrew Jackson is a clause leaving
to his son, A. Jackson, Jr., the gold box presented to him by the
city of New York, with directions that, "should our happy country
not be blessed with peace," his son will, at the end of the conflict,
present the gold box "to that patriot" residing in N. Y. State
"who shall be joined by his countrymen or the ladies to have been
the most valiant in defense of his country, and our country's
rights." The common council now passes a resolution averring:
"That contingency has now arrived (the end of the Mexican War),
and a call has been made by A. Jackson, Jr., through the public
press, for claimants. . . ." The board therefore appoints a com-
mittee "to examine and report what individual from New York, is
now deserving of the gold box."—Proc., App'd by Mayor,

"The cross streets between the 4th and 5th avenues above 32d
street, are beginning to be accurately graded, and made ready for

The common council appropriates $1,200 to procure portraits of
Gen. Taylor and Gen. Scott, to be placed in the governor's
rooms.—Proc., App'd by Mayor, XVI, 455.

The American Institute has been removed from the old alms-
house to the corner of Anthony St. and Broadway.—Eve. Post,
Ap. 27, 1849. See also ibid., Ag 8, 1849.

The City Hotel is to be torn down, and a block of stores built
on the site.—N. Y. Com. Adv., Ap. 27, 1849. See also descrip.
of Pl. 125, III: 689, and descrip. of A. Pl. 19–4, III: 876. See, further,
1850.

In this month, the Church of the Mediator (Episcopal) was
organized. The congregation met in the chapel of N. Y. University
until the autumn when it was removed to the Reformed Presbyterian
Church (see 1842), on the north side of 8th St. facing Lafayette
Place, which was ceased to be occupied as a Presbyterian church
on Sept. 20, 1846 (q. v.).—The Great Metropolis or N. Y. Almanac
for 1851, 64.

The preface of A Project for a Railroad to the Pacific, by Asa
Whitney, of New York, bears this date. A paper-covered 8vo vol-
ume of 121 pp., it contains reports of committees of congress,
resolutions of state legislatures, and many facts relating to the sub-
ject, with maps. It is the result of seven years' study, he being the
protector of the plan and its most earnest advocate.

The Delaware & Hudson Canal Co. ceases the "Red Fort" or
"North Battery" at the foot of Hubert St.—From Letter-book

French's Hotel, at the northeast corner of Franklin St. and
City Hall Square, erected by R. French, is opened to the public.
1849 For wood-cut view and description, see The Citizen and Strangers' Pictorial and Business Directory (1851), 96-97. It was seven storeys high, fronting 93 ft. on Chatham St., extending eastward 105 ft. on the Frankfort St. side.

On Frankfort St. it covered the site of St. John's Hall (see J 8, 1803), which stood at No. 8 (L. M. R. K., III: 986), with a depth of 80 ft.—Eve. Post, Ja 20, 1848. The hotel is shown (in 1849) on Pl. 155-5, Vol. III, and its ground-plan on the Perris insurance map of 1851, Pl. 10.

St. John's Hall was demolished at this time. Its corner-stone (see O 13, 1802) was presented to Henry C. Atwood, grand-nephew of St. John's Grand Lodge (scholastic), which, in 1830, united with the Grand Lodge of New York. In 1833, Atwood succeeded from the Grand Lodge, and formed a second St. John's Grand Lodge; this had a feeble existence until 1858.—Proc. of the Grand Lodge of N. Y. (1818), 74-75; Lang, Hist. of Freemasonry in the State of N. Y. (1922). See, however, 1834. Cf. L. M. R. K., III: 98.

A ferry, from the foot of Grand St., East River, to the foot of Grand St., Williamsburgh (see Ap 10), is established; it is to be leased for the term of ten years.—Proc., App'd by Mayor, XVI: 108. For an earlier ferry from Grand St., see J 29, 1805. This ferry is listed in Valentine's Manual for 1849, p. 258, with others, under the head of "Leases of Ferries from the city of New-York to New-Jersey." It there appears that it paid an annual rental of $6,000, which, next to the combined rental of South and Fulton Ferries ($50,000), was the largest rental paid under any of the city's ferry leases. Cf. Valentine's A Compilation of the Existing Ferry Leases and Railroad Grants (1866).

7 "Disgraceful Row at the Opera House.—The Astor-place Opera House was the scene of a most disgraceful row last evening [May 7], on the occasion of Mr. Macready's appearance. The play was Macbeth. . . . As soon as Macduff (Mr. C. W. Clarke) made his appearance, there were 'three cheers for Clarke!'—and when Mr. Macready presented himself, he was received with cheers, waving of handkerchiefs, groans, hisses, . . . rotten eggs, potatoes and pennies were thrown on the stage, and cheers for Forrest and cheers for Macready given. . . . After this, . . . seats were given . . . to the stage, but fortunately injurious results to the public were thus prevented. Mr. Macready, pointing to the fragments strewn around him, bowed to the audience and made his exit. . . ."—N. Y. Daily Tribune, My 8, 1849.

As described by Lossing, the Astor Place riot, of which this was only the beginning, grew out of a personal quarrel between the two actors, Edwin Forrest, an American, and William Charles Macready, of London.

Each player was announced to appear as Macbeth on the same night, Macready at the opera house under the management of Niblo and Hackett, and Forrest at Wallack's Broadway Theatre. "Mr. Niblo, stimulated by the spirit of rivalry, and determined to have a full house, unwisely gave out more tickets than the building would hold, and when, before sunset, they were all taken, he was alarmed by a suspicion that the purchasers might be largely enemies of Macready." Lossing gives a vivid description of the scenes that followed, both before the curtain and on the stage. "With genuine English pluck," Macready "stood his ground until he found his life was in danger, when he too fled behind the curtain, and it fell upon the scene. . . . To the utter dishonor of Mr. Forrest, it must be recorded that he did not utter a word of denunciation of this outrage. The impression was universal that he had countenanced if not incited the disgraceful proceedings.

"Every high-minded person in the community cried 'Shame!' and all felt personally aggrieved by the outrage, which cast disgrace upon the city. When it became known that Macready contemplated throwing up his engagement, many of the best men of New York, in every rank of social life, feeling that the city had been dishonored, addressed to him a letter expressing their extreme regret because of the treatment he had received, promising him protection in the exercise of his rights, requesting him not to yield to the lawless spirit which had assailed him, and asking him to give the city an opportunity to wipe out the disgrace which had been inflicted upon its character. Mr. Macready yielded, and Thursday, the breach was thus patched up, and the play was resumed.

"So soon as placards announced the intended reappearance of Macready, others, proclaiming that Forrest would appear in the same play on the next night at the Broadway, were put up along-
by the police, and in their rage they demolished the street-lamps in the neighborhood. A huge stone hurled through one of the windows shattered the magnificent chandelier and its fragments fell on the frightened occupants of the pit.

The play began. In spite of all precautions, many of the roughs were overpowered when the Seventh Regiment National Guard, furnished with their colonel, Duryée, at their head, appeared on the scene. They had been marching up from their armory in Centre Market, furnished with battle-carriages preceded by the National Guard Troop. The latter turned into Astor Place from Broadway and charged the mob.

In Astor Place the paving-stones had been taken up and piled in heaps while excavating for a sewer. These, with ragged fragments of stones from a marble-yard near by, furnished the rioters with fearful missiles, with which they assailed the mounted men.

"Colonel Duryée had prepared his infantry for the struggle. His men loaded their muskets, but the crowd was so dense they could not move. A few volleys were discharged, with the result that amongst the bystanders, assailed them fiercely with missiles. Forbearance was no longer a virtue, and Recorder Tallmadge, who represented the chief magistracy of the city in the absence of Mayor Woodhull, was told that unless the troops should receive orders to fire they would be withdrawn." Sheriff Westervelt gave the order to fire, but to fire over the heads of the rioters to intimidate them; but the latter, believing blank cartridges had been used, became more furious than ever. General Duryée addressed them, saying unless they desisted, blank cartridges would be used. This was without effect. Then, in self-defense, orders to fire were given, and volley after volley took toll among the rioters.

"It was now eleven o'clock at night. So savagely threatening still appeared the baffled mob that more troops were sent for, with additional reinforcements. In Wall Street.—The famous old buildings formerly known as Nos. 20 and 22 Wall Street, and since the new numbering, 37, 39, 41 and 43, have been torn down, preparatory to the erection of a building or a suite of buildings with a court in the centre and offices on both sides, a little after the manner of Jones's building, nearly opposite the Merchants' Exchange. The second floor of old No. 22 was for years occupied by the brokers' board.

The amount of transactions effected in that room from first to last is doubtless hundreds of millions of dollars.... In the rear was an old brick rookery covered with Dutch tiling, where the Journal of Commerce was printed during the first nine years of its existence, say from 1827 to 1836. Said rookery is also memorable for having stopped the great fire of Dec. 16th, 1815 [p. 63], which nothing else could do."—T. E. Com. Adv., May 26, 1849, citing the Jour. of Com.

On the 1st and 30th of June, Howe refers in his diary to the increase in the choler, not only in New York but also in other cities where immigrants go from Europe.—Howe's Diary, II: 362-63.

The Odd Fellows' Hall, at the junction of Grand, Centre, and Orange Sts., is dedicated.—N. Y. Herald, Je 5, 1849. For description and view, see The Great Metropolis for 1850.

The old "South Church", originally in Garden St., later, until 1848, in Murray St., and temporarily occupying the chapel of the Union Theological Seminary on University Place, is now erecting its new church at the southwest corner of Fifth Ave. and 21st St.—Eve Post, Je 8, 1849. It occupied the building later in this year.—Hist Sketch of the South Dutch Church, 57. For small wood-cut view and a description of this edifice, see The Great Metropolis: or N. Y. Almanac for 1850, 64. The architect was Jas. Renwick, Jr.

News having been received in New York of the death of Maj.-Gen. Worth at San Antonio, Texas, on June 7, the common council passes resolutions of eulogy for his character and services, and of sympathy for his family. "The distinguished and patriotic services of the deceased to his country at Chippewa Plains and Niagara in the last war with Great Britain; at Palaskadaha, in Florida; at Monterey, Vera Cruz, Puebla and Molino del Rey, in the late brilliant campaign in Mexico, have rendered his name dear to the American people, and shed an additional lustre on the American arms...." The board orders that flags be displayed at half-mast on the city hall on Wednesday next, and that the proprietors of public places be requested to do the same.—Proc. App'd by Mayor, XVII: 176-77. See Je 18, S 4, N 15.

The common council refers to the special committee an application of Mayne Reid for the gold box devised by the late Gen. Andrew Jackson (see Ap 21).—Proc. App'd by Mayor, XVII: 175.

Dr. John W. Francis, in a letter of this date, describes the extent and character of "the real Asiatic choler", which, he says, is "among us."—See the original among the Francis papers in the N. Y. P. L. Authorities differ as to the number of deaths from this disease in 1849, but it appears to have been between 3,000 and 5,000.—Cf. Lossing, Hist. of N. Y. City (1884), II: 523; Haskell's
THE ICONOGRAPHY OF MANHATTAN ISLAND

1849

19

"The masons are at work repairing the apartments in the City Hall, for the office of the Chief of Police, which is to be removed from its present location. A door has been cut on the south-west corner of the Hall, and a partition put up dividing the apartments."—Proc. Post, J9 18, 1849. See also ibid, Ag 6, 1849.

20

The Corporation library room (see Ja 25)—room No. 12 in the city hall—being nearly completed, and as it contains "choice and valuable collections requiring care and supervision," the common council resolves that this "be confided to the Clerk of the Common Council under the direction of the Committee of Arts, Sciences and Schools of both Boards."—Proc. App'd by Mayor, XVII: 183; Man. Com. Coun. (1836), 568.

This library has continued to the present time in the city clerk's custody, its quarters having been changed to room 377 in the new Municipal Bldg, in 1914. Its importance has been overshadowed by the organization in recent years of the "Municipal Reference Library," a branch of the New York Public Library, in room 512 in the Municipal Bldg.

The common council orders that curb- and gutter-stones be set around "the public place at the junction of Broadway and Fifth avenue," and trees planted in and around it.—Proc. App'd by Mayor, XVII: 181. This is the plot of ground where the Worth monument now stands.—See D 12.

29

The common council orders that a lease be granted to Grinnell, Mintosh & Co. for three years, from Aug. 1, of the west side of Pier No. 19, and the east side of Pier No. 20, East River, with half the bulkhead adjoining each, and half the end of Pier No. 20, for the exclusive use of their London and Liverpool packets, at a rental of $3,510 for "each of the said premises."—Proc. App'd by Mayor, XVII: 195, 276.

30

The city acquires of Eliza B. Junel, for a consideration of $1,000, the first parcel of the "Jumel Mansion" lands.—Liber Deeds, DXV: 167. By condemnation proceedings, at various times from Nov. 28, 1876 to June 19, 1906, the city acquired the rest of the land now comprised in the High Bridge Park.—Pendergast, Record of Real Estate (1914-53).

July

4

Mr. Niklo has reared upon the ruins of the old establishment [see S 18, 1846], within the space of about three months, a splendid and commodious structure, embosomed in a grove of trees all planted this spring, and all now flourishing as green as if they were resting in their native forest. The saloon is constructed to accommodate three thousand people.—Proc. Post, Ji 5, 1849. See also ibid, Ag 50, Ji 50, and 51, 1849; & 50, 1849; 232-13.

12

The common council permits the New England Telegraph Co. "to erect a line of telegraph posts, under the direction of the Street Commissioner, along Wall street and Broadway, to and through Cedar and Greenwich streets and the Eighth avenue, the same to be removed at any time the Common Council shall direct."—Proc. App'd by Mayor, XVII: 214.

16

The common council orders that the ground known as Fort Gausevoet be filled up, under the direction of the City Inspector, forthwith.—Proc. App'd by Mayor, XVII: 223.

17

The common council directs the street com'r to take the necessary measures "to remove the building known as the 'old Hospital,' and now standing in Twenty-seventh street between First and Second avenues."—Proc. App'd by Mayor, XVII: 222.

18

The council appropriates $750 for building a "three story house, on the corner of Greenwich avenue and Amos street, the upper two stories of which are to be fitted up for the accommodation of the Police and Justices' Courts, and rooms for cells; and the lower or first story thereof to be fitted up for stores."—Proc. App'd by Mayor, XVII: 239.

Aug.

The common council authorizes the comptroller to draw his warrant for a sum not exceeding $7,000, on the requisition of the special committee appointed to make arrangements to bring to New York the remains of the late Maj.-Gen. Worth and Col. Dun- can, for the purpose of defraying the expenses thereof.—Proc. App'd by Mayor, XVII: 249, 270. See N 15.

12

Albert Gallatin dies at Astoria, L.I. Hone records a brief sketch of his life.—Hone's Diary, II: 356-56.

23

The completion of the Free Academy, by the stuccoing of its walls, has imparted to this noble edifice quite an imposing effect; it forms now one of the architectural ornaments of its vicinity."—Proc. Post, S 1, 1849.

Hudson River Railroad. during the present month forty two miles of the road will be opened for travel, the track being already laid for that distance, with the exception of four miles between Fishkill and Poughkeepsie. . .

"The engine and cars, as well as the depot-houses in Thirty-second street are nearly finished, and the track in the city, which it is proposed to extend to Chambers street, is in progress."—Proc. Post, S 7, 1849.

During this month, it was put into operation between New York and Poughkeepsil. On the 13th, the first locomotive ran from 30th St. to Peekskill, a distance of 48 miles. On the 14th, a trip was held over the entire distance. On the 20th, the first train, starting at 7 a.m., ran on Eleventh Ave. north of 30th St. On the 20th, the road was opened for public travel as far as Peekskill.—From chron. supplied by the company. See also Proc. Post, S 14, 28, O 8, 1849. See D 31.

"A railroad station at the city terminus of the New Haven Rail road, is in course of erection in Canal street."—Proc. Post, S 7, 1849.

The common council permits Anson G. Phelps, Heman W. Childs, and S. Russell Childs to build a railroad on the East river, which shall be 450 feet of the eastern side of First Ave., and extend northward from a point of ft. 9 in. north of the northerly side of 28th St. to a point 68 ft. north of 30th St., making the whole length 484 ft. 3 in., "with return bulkhead toward the shore."—Proc. App'd by Mayor, XVII: 300.

"The Astor Library.—It is a matter of public gratulation that the long promised establishment of a Free Public Library on the plan of the British Museum, is at length about to be realized, and on a scale of munificence alike worthy of its founder and the requirements of the age. . . . The plan of the edifice, designed by Mr. Saeltner, is modeled after the plan of the Florentine Palaces, or Byzantine style; it is to be of brown stone, fire-proof, the internal portions of the structure being mainly of iron,—scarcely a particle of wood entering into its composition. . . . Its dimensions are to be one hundred and twenty feet in length, by sixty-five in width, and sixty-seven in height. . . . The library hall, occupying the second floor, will be a truly elegant apartment, measuring one hundred feet in length by sixty in width. . . . On the first floor will be the lecture and reading rooms, with accommodations for five hundred persons. . . ." Prof. Cogswell, the librarian, has recently returned from his bibliographical tour in Europe, and is in possession of many volumes of great rarity and value. . . . These works are to remain in the keeping of Dr. Cogswell, at 32 Bond street, till the Astor library shall be erected, the building of which will occupy between one and two years. It is about to be commenced forthwith on the grounds known as Vauxhall Gardens."—Proc. Post, S 14, 1849.

The common council authorizes the Hudson River R. R. Co. "to lay down a double track of rails, with suitable curves and cuts, from the northerly line of Canal street, at West street, through Canal and Hudson streets to Chambers street, . . ."—Proc. App'd by Mayor, XVII: 322. See D 19 and 31.

The common council gives permission to the "Whig General Committee" to take down a liberty-pole standing on the corner of Broadway and Grand St, and then to move one from Canal St near Broad way to the federal building.—Proc. App'd by Mayor, XVII: 322.

The common council approves the plan to build the new City Hall.—Proc. App'd by Mayor, XVII: 322. See Pls. 113 and 140, Vol. III. See also Proc. Post, O 15, 1849.

The last vestige of olden times in Wall street has at length given place to a series of seven new and commodious brick buildings, intended for lawyers' offices, and offices for insurance companies, railroads, etc. These buildings bear the name of Janeway Court, occupying, as they do, the site of the old Janeway stables, which stood on the estate, we understand, something over a century. Every relic of antiquity in Wall street is now swept away, and the mementoes of past times in this once central locality of our city now exist only in the chronicles of the historian."—Proc. Post, O 8, 1849. Janeway Court covered the land then and now known as 37-43 Broad St. The Perris Atlas, published in 1854, shows the court, occupying on Wall St, on three sides of which the building was built. The Equitable Trust Co. bldg, now covers the site.

The common council appropriates $7,700 to erect a fountain in
The common council grants a petition of the Hudson River R.R. Co. for a lease for ten years of "the triangular piece of ground, bounded by Canal, Hoboken, and West streets, with the building then known as the Clinton country market," at $3,500 per annum.—Proc., App'd by Mayor, XVII: 495.

On Jan. 7, 1850, the board permitted the company to extend one of their tracks around this market at the foot of Canal St., with suitable curves and turnouts, "so as to connect with the track on West and Canal streets, already constructed by them."—Ibid., XVII: 590. See Jl 9, 1850.

The common council, by resolution, starts a movement to secure, through popular demand, an appropriation from the legislature for the erection of a monument in Greenwood Cemetery to the memory of Maj.-Gen. Worth, Col. Duncan, and other gallant soldiers, natives of this state, whose lives have been sacrificed in the service of their country.—Proc., App'd by Mayor, XVII: 492.

The common council directs the Croton aqueduct board to erect a fountain in Bowling Green, and appropriates $2,000 for it.—Proc., App'd by Mayor, XVII: 517. It was finished in 1850, an additional appropriation of $253 having been made.—Ibid., XVIII: 97, 377.

The common council appropriates $2,000 to cover the cost of working Fifth Ave. as "a country road" from 90th to 120th St.—Proc., App'd by Mayor, XVII: 557.

The Hudson River R. R. having been opened on Sept. 30 for public travel between 31st St., New York, and Peekskill (see S 13), on Dec. 31, the entire line was brought into use from Chambers St. to Poughkeepsie.—Third Ann. Report of the Directors (1850), 21.

The company buys land for a passenger station at the terminus in New York, comprising 100 ft. on Chambers St., the same on West St., and 175 ft. on College Place.—Ibid., 9. See D 19, 1849; O 24, 1851.

In this year, there were 22,372 deaths in New York City, 5,072 of which were from cholera.—Eev. Post, Ja 2, 1850.

1850

In this year, Count Camillo di Cavour became the leading minister of King Victor Emmanuel II of Piedmont, and until his death in 1861 worked for the liberation and union of Italy.—Hazen, Europe since 1815, 216 et seq.

The Democratic party's policy of "popular sovereignty" or "squatter sovereignty," as it was called, carried the party through the great struggle of 1850.—Winor, VII: 293.

In this year, 213,796 alien immigrants arrived at the port of New York. Of these, Ireland sent 117,078; Germany, 45,531; England, 28,163; Scotland, 6,772; France, 1,462, and other countries lesser numbers.—Rep. on Emigration by a Special Com. of the Ch. of Commerce, Ja 5, 1865 (N. Y., 1865), 18.

The population of New York City is 215,591. This is an increase of about 144,000 in five years, or nearly 30,000 per annum. "The suburbs of New York, lying within one mile of the boundary of Brooklyn, Williamsburgh, Jersey City, and Hoboken, contain in round numbers 150,000 inhabitants, which, added to the present population, makes a total of at least 600,000."—Man. Com. Coun. (1854), 357. The U. S. Census Bulletin of 1910, gives the population of Manhattan Island for 1850 as 515,547.

In this year, the expenditures for the city government amounted to $3,396,492, and the receipts to $3,108,275. The real estate was assessed at $207,146,776.26 and the personal estate at $78,935,404.48.—Man. Com. Coun. (1851), 205, 209.

During this year, "Uncle Tom's Cabin" was published in the National Era, in Washington. In March, 1852, it appeared complete in book-form.—Rhodes, Hist. of the U. S., II: 279. This book had a powerful influence in crystallizing public opinion in the North on the slavery question.

About this time, the so-called Hudson River school of American landscape painting began to flourish. Among the painters whose technique and other artistic qualities eventually identified them with this school, were John W. Casilear, John F. Kensett, T. Addison Richards, Worthington Whittredge, J. F. Cropsey, John B. Bristol, Sandford R. Gifford, George Inness, F. E. Church, Albert Bierstadt, Jervis McEntier, William Bradford, L. R. Mignot, Samuel Colman, William T. Richards, Homer D. Martin, A. H. Wyant, Thomas Moran, and R. Swain Gifford. Regarding their careers and notable canvases, see Isham's Hist. of Am. Painting, 232-70.

In this year, Henry Hoff, of 180 William St., issued a series of
The most beautiful colored Views, Of the most remarkable and prettiest places, buildings, and streets of New-York and Brooklyn, and that title missing from the Eno list (which mentions only 19) is the Tombs (Halls of Justice). The plates were later republished by Charles Magnus with his imprint.

In this year, C. Lowenstrom published the New-York Pictorial Business Directory of Wall St. (copyrighted, 1849), showing on a series of ten plates, measuring about 8 1/2 by 7 1/2 in., a panorama of Wall St. from Broadway to South St. and East River. See descrip. of Pl. 147, p. 719.

This year, Lowenstrom also published a pictorial directory of William St., showing, block by block, outline sketches of the business houses on both sides of the street, with the names of the firms occupying them. A copy, without date or title-page, is owned by the N. Y. Hist. Soc. See also descrip. of Pl. 147, III: 719.

In Valentine's Manual for 1850 were published a map of the city, 1850, frontispiece; views of Fort Gannavoort (old "White Fort"), 265; a hydrographic map of New York, Westchester, and Putnam Counties (showing the line of the Croton aqueduct), 268; the Croton aqueduct at Mill River, 268, and at High Bridge, 268; the N. Y. State arsenal on Fifth Ave., 402; No. 1 Broadway, 416; No. 120 William St. (the first place of Methodist worship in Am.), 422 (see also descrip. of Pl. 43, I: 345).

For view of Catherine Market, 1850, see Man. Com. Coun. (1857), 312.

For view of Peck Slip, 1850, see ibid. (1857), 329.

For view of Macombs Dam, Harlem River, 1850, see ibid. (1856), 240.

In 1850, of the Peter Goelet residence, at the northeast corner of Broadway and 17th St. and of the Robert Goelet residence, at the northwest corner of Broadway and 17th St., see Brown's Book of Old N. Y. (1917), 241, 245.

In this year, the board of education of the city and county of New York was under the jurisdiction of the secretary of state, who was also superintendent of common schools, with offices in Albany. There were commissioners of common schools, two from each of the 18 wards, who were distributed to serve on 15 standing committees. There were also inspectors of common schools, two for each ward; and trustees of common schools, five for each ward. The ward schools were under the supervision of the trustees of the several wards. There were 23 of these ward schools, numbered from 1 to 25 (schools Nos. 11 and 15 not appearing in the records); also two ward primary schools (Nos. 2 and 4), and two coloured ward schools.

The Public School Society operated through a board of trustees, a president, vice-president, treasurer, secretary, and standing committees. The immediate supervision and care of each public school and its nearest primary schools, were committed to a section of the trustees annually appointed. There were 18 of these corporate public schools; two public schools for coloured children; 33 primary schools; and five public primary schools for coloured children (numbered from 2 to 6 inclusive); also the Manhattanville Free School, and the Hamilton Free School (at Fort Washington).—Man. Com. Coun. (1850), 290-321.

The city had 15 ferries,—South, Fulton, Catherine St., Walnut St., Grand St., Peck Slip and Williamsburgh, Houston St., Hell-Gate, Staten Island, Elizabeth Port, Jersey City, Barclay St., Can. St., Christopher St., and Fort Lee and Bull's Ferries.—Ibid. (1850), 583. For locations, lesser, etc., see ibid.

There were 11 markets,—Washington, Fulton, Centre, Essex, Catherine, Jefferson, Union, Tompkins, Clinton, Gouverneur, and Franklin.—Ibid. (1850), 84.

There were 11 public squares and places,—Abingdon Square, Battery, Bowling Green, Gramercy Park, Hamilton Square (at Yorkville), the Park, Madison Square, St. John's Park, Tompkins' Square, Union Square, and Washington Square.—Ibid. (1850), 84.

There was a police force of 900 men, including captains, assistant captains, and sergeants. The chief of police, appointed by the mayor and board of aldermen, was paid $1,600 a year; captains, $700 each; assistant captains, $600 each; sergeants and policemen, $500 each.—Ibid. (1850), 158-159, 187.

The paid force of the fire department consisted of a chief engineer (at $3,000 a year), and assistant engineers (of $2,000 each). There were 17 fire engines (at $500 each per annum). There were also paid workmen at the public yard (hose makers and greasers) employed by the chief engineer. The officers of the fire department consisted of president, vice-president, secretary, treasurer, and collector; and a board of trustees consisting of president, secretary, and committees on donations, schools, fines and penalties, finance, wood and coal, etc. At all the houses of the engine, hose, and hook-and-ladder companies, and the police stations, bells were kept to receive reports of chimneys being on fire. There were 34 fire-engines in the city, including those at Harlem, Yorkville, Manhattanville, and Hasbrouck; 46 hose companies, and 9 hook-and-ladder trucks. The city was divided into 3 fire districts, each of which had a hydrant committee, whose duty was to see that the hydrants were kept in repair. The number of streets on the district fire-bell guides was such as would lead men to the correct part of the district. There were in this department, 1,553 men; and 53,000 feet of hose.—Ibid. (1850), 172-177, 186, 190.

The highest paid officials of the city and county governments were the corporation counsel and 6 justices of the superior court ($5,500 each); the mayor, recorder, county clerk, register, surrogate, district attorney, and 3 judges of the court of common pleas ($5,000 each); the comptroller, and clerk of the superior court ($5,000 each); the clerk of the board of assessors, receiver of taxes, street commissioner, commissioner of repairs and supplies, chief engineer of the fire department, corporation attorney, 2 justices of the marine court, and the president, assistant commissioner, chief engineers, and engineer of the Croton aqueduct department ($5,000 each). The clerk of the board of aldermen (David T. Valentine) received in this position $1,500 a year; but he was also clerk of the board of supervisors (at $200), received for preparing minutes for publication $150, and was allowed by the common council (by resolution approved July 25, 1848) $500, a total of $2,350.—Ibid. (1850), 179-183.

In this year, Wm. B. Astor erected a five-storey building on the site of the City Hotel, covering the block between Cedar and Thames Sts., and running from Broadway to Trinity Place. The building was divided into four stores, Nos. 113, 115, 117, and 119 Broadway. For the names of the occupants, and a view of the building, see The Great Metropolis for 1851, 59-60. See also L. M. R. K., III: 977.

About this year, Barnum secured the property adjoining his museum at the corner of Broadway and Ann St., "expended about $50,000 in the enlargement of his already immense building, and plans among his world of curiosities the whole of the famous Chinese Collection." Various other attractions were described three years later, including the "tiny lecture room," which was transformed "into a spacious and elegant saloon, capable of seating 3,000 persons with comfort. . . ."—Illustrated News, II: 326-327 (with views of both the interior and exterior of the Am. Museum). See also Je 15.

The city had 15 ferries,—South, Fulton, Catherine St., Walnut St., Grand St., Peck Slip and Williamsburgh, Houston St., Hell-Gate, Staten Island, Elizabeth Port, Jersey City, Barclay St., Can. St., Christopher St., and Fort Lee and Bull's Ferries.—Ibid. (1850), 583. For locations, lesser, etc., see ibid.

1850 -

the Franklin House, at the north-west cor. of Broadway and Dey St., enjoyed popularity. - Man. Com. Coun. (1865), 544. The Franklin House is shown on A. Pl. 25, Vol. III. -

1850 -

his index covers a great variety of subjects, and the present chronology is much indebted to De Voe's painstaking researches and reading, which continued for 40 years, for the guide to many of the items in contemporary newspapers cited in this work. While it was practically impossible for one man to include, in such a page-by-page review, all the newspapers published in New York after 1800, or to index all the events, and new advertisements of important news value in those examined, these two ledger volumes, nevertheless, are a most useful and valuable contribution to the history of New York.

From 1850 to 1860 there is a decade untouched by this or any other similar work. After that, the Times Index offers a somewhat similar guide to the news published in that one New York newspaper. The Tribune in 1875 supplemented this by an index to the news published in its pages, but this was discontinued in 1906. The Times Index is continuous from 1860 to date, with the exception of 1861, 1862, and a hiatus from 1905 to 1912 inclusive.

The N. Y. Hist. Soc. also possesses much data collected by De Voe relating to the military history of New York, he himself having been colonel of the "Washington Greys" (later the 9th Regt.); also a large scrap-book of letters and articles by various individuals, portraits, etc. from contemporary magazines, Valentine's Manuals, etc., which he gathered from about 1840 to about 1890. De Voe published three books: The Market Book (N. Y., 1862), a history of the old markets of New York, frequently cited in the Chronology; The Market Assistant (N. Y., 1867), giving an account of practically every article of human food sold in New York; and Genealogy of the De Trues Family (1885). He died Feb. 1, 1892.

In this year, the International Magazine was first issued, under the editorial control of R. W. Griswold. - S. N. D. North, The New York and Periodical Literature (1884), 117.

In this year was published (in Phila. and N. Y.) a square 12mo entitled City Cries; or, A Peep at Scenes in Town, By an Observer, containing 24 illustrations of town criers. -

A ferry has been established between Manhattanville and Bull's Ferry, a lease for the same having been granted for five years, by the Board of Aldermen. This will be a public convenience, both for the purposes of travel and the transportation to this city, of cattle from the West. - Ext. Post, Ja 4, 1850.

Among the most important of the various series works now in course of publication by Messrs. Tallis, of this city and London, is their "Illustrated Atlas." These beautiful maps are engraved in the best manner from the latest authorities, and are in a convenient and portable form. - Thirty-two numbers, at 25 cents each, containing two maps, will comprise the atlas. Each map is adorned with vignette views of interesting localities; and taken as a whole, this work may be regarded as the most attractive Atlas yet presented to the public. - Ext. Post, Ja 5, 1850.

The common council creates a "Bureau of the City Hall and Park." The term "City Hall," as here used, includes all the public buildings in the Park. The officer in charge shall be called the keeper. His duties are prescribed. He and his family may occupy such rooms in the city hall as may be assigned to him by the comptroller. - Proc., App'd by Mayor, XVII: 380.

The common council resolves to present the freedom of the city, in a gold box, to Capt. David Cook, commander of the bark "Sarah," of Yarmouth, Nova Scotia, who, in a gale of wind and rough sea, went to the rescue of the passengers of the ship "Caleb Grimsom," of New York, which caught fire when near the Azores, in Nov., 1849, and who, after eight days' perseverance and hard labour succeeded in saving nearly 400 persons. - N. Y. H. S. Coll. (1885), 426-27; Proc., App'd by Mayor, XVII: 588-89. The freedom was presented on Jan. 24. - Ext. Post, Ja 15, 1850.

The common council passes a resolution expressing appreciation of "the noble and disinterested efforts of M. Wattemars, in the cause of science, literature and humanity," with thanks for "his valuable donation of books and works of art," which expression of appreciation it is desired he will convey "to the several bureaus of the Republic, the various municipal governments and private individuals, on whose behalf he has presented us with these noble objects -

1850 -

the Boston News Letter (1704 et seq.), the Am. Mercury (Philis., 1721 et seq.), the Boston Gaz. (1724 et seq.), the N. T. Gaz. (1727 et seq.), and many other papers of later date in New York collections.

This is the last year covered by Thos. F. De Voe's manuscript index to the early newspapers of New York and vicinity, contained in two ledger volumes, now owned by the N. Y. Hist. Soc. The entries mention briefly the notable daily events which he collected by a careful page-by-page analysis of the world's news which had been published in The Flying Post in England in 1869, the Boston
THE ICONOGRAPHY OF MANHATTAN ISLAND

1850-1860

5 1850
Monuments of the intellect of France." The resolution also expresses gratitude for "the magnificent statue, emblematical of our sister Republic, presented on behalf of Mons. Gayraud," and requests that M. Vattetemar convey to him a copy of this resolution.

The common council orders that the corporation caused take the necessary legal steps to open, as a public square, "the triangular piece of ground, lying between and contained by the Bowery, Third avenue and Seventh street."--Proc. App'd by Mayor, XVII, 566.

This was at first known as Stuyvesant Square (see Mr 167), but is now Cooper Park.--D. M. R. E., III, 960.

"The splendid range of private dwelling-houses, situated in Twenty-third street, between Lexington and Fourth avenues, now nearly completed, and estimated at the aggregate cost of $250,000, are shortly to be offered on advantageous terms at private sale."--Eve. Post, Ja 5, 1850.

In his second annual message to the board of aldermen, Mayor Woodhull calls attention to the fact that "all the public squares below forty-second street, comprise only in the aggregate, about sixty-three acres, being less, (all together) than one-fourth of the size of one of the large parks in the city of London.

"The advantages of open squares in a populous city, are so apparent and so important, that no well governed city was ever content to be without them. They not only greatly beautify a city, but afford means of promoting industry and health. They are the great breathing places of the toiling masses who have no other resort in the heat of summer or in time of pestilence, for pure air and healthful recreation, either for themselves or children."--Proc. Bd. of Ald., XXXVIII: 19.

The first suggestion for the present Central Park is attributed to Andrew J. Downing, a prominent landscape architect and editor of the Horticulturist.

"In 1839, while Mr. Downing was in London, he wrote a letter to the Horticulturist on the importance of parks in the growing city of New York. The letter attracted a great deal of attention. In 1840 he followed with a series of letters pointing out the lack of open spaces and places for recreation and urging the necessity of a great park. This,' said the late Charles H. Haswell, in his 'Reminiscences of an Octogenarian' [p. 451], 'was the actual beginning of the Central Park, the birth of the idea, and Downing should be forever remembered with gratitude by our people, and his statue should be raised in the place in which they owe to his foresight and trained intelligence.'

"Another strong advocate of a park in the central part of the island was Fernando Wood, who had been abroad and who was impressed with the beauty of the foreign parks, particularly of those in Paris, where he was notably prominent. In May 1839, he introduced the park question one of the issues of the campaign. But he was defeated for the mayorship by Ambrrose C. Kingsland, who took office in January, 1851. Mayor Kingsland then took up the idea of a park, and on May 5, 1851 (q. v.), sent to the common council a message on the subject.--16th Ann. Rep., Am. Scenic & Hist. Pres. Soc. (1911), 449.

"There are in the city 4,524 places where intoxicating drinks are sold, 2,920 of the number are opened on Sundays, and 760 are unlicensed."--Eve. Post, Ja 17, 1850.

The "noble mansion on the Fifth avenue and Ninth street, belonging to the family of the late Henry Brevoort [see 1834], with ninety-two feet of ground on the avenue and one hundred and twenty feet fronting on Ninth street," which he purchased for mayor in 1839, was occupied by the city for a short time to answer the park question.

"Hone mentions in his diary the "superb mansion" of Mr. and Mrs. Vall, at the corner of Fifth Ave. and 15th St., where he is a dinner-guest."--Hone's Diary, II: 376. See F 7.

Hone briefly describes them.--Hone's Diary, II: 371-73.

Henry Clay introduces resolutions in congress as a basis for compromise of the slavery question.--McMaster, Hist. of the People of the U. S., VIII: 15.

The greatest loss of life which ever occurred in any single accident or war in New York City up to this time happened in the so-called "Hague St. disaster" on this day, when an explosion of a steam boiler at Nos. 3 and 5 Hague St. caused the death of 67 persons and the injury of 50 others. The accident was later examined by a committee of aldermen and was reported in Doc. 36, Ed. of AId., II 12, 1850. Proc. App'd by Mayor, XVIII: 21-225. Eve. Post, F 4 et seq., 1850.

The Breevorts give a farewell ball--"a farewell to the house, which has been sold to De Rham" (see Ja 21).--Correspondence of James Fenimore-Cooper (1922), II: 650. The house stood until the summer of 1855, having been occupied last by Mr. and Mrs. Chas. de Rham. For brief history of the house, see 1854 and references there given.

Congress passes a resolution for the purchase of the MS. of Washington's Farewell Address (see S 17, 1796).--Laws of U. S., 31st cong., 1st sess., 197.

Henry Stevens, in his Recollections of Mr. James Lenox and New York and the formation of his Library (1886), 100, explains the acquisition of this MS. by Mr. Lenox as follows: "About 1847 or 1848 [probably error for 1849], it was announced by the administrators of the late David C. Claypoole of Philadelphia, proprietor and editor of the 'Daily Advertiser,' that they were about to sell by auction in that city the original autograph manuscript of Washington's Farewell Address, given to Claypoole by Washington himself in September 1796 [p. 5]. Mr. Lenox bought it against the Congress House No. 2, while seeking a method for competing against the Government Library, where such a national relic ought to find a resting-place. He however offered the library committee not to compete under their limit, if they would tell him how far they intended to go. They declined to tell him their limit, or even if they intended to buy it, so he very properly disregarded them."

"Mr. Stevens further states (p. 101) that Mr. Lenox, in 1850, "had seriously mooted the proposition with variorum notes and other illustrative papers in one of the most sumptuous volumes ever issued in the United States up to that time.""

The MS. of the Farewell Address is now in the N. Y. P. L., having been deposited in the Lenox Library in 1855--Lydenburg, Hist. of the N. Y. Pub. Library (1953), 117.

Hone records: "The dreadful question of slavery, which has cast an indelible stain on this, the Christian world, and which is a stain in the conscience of every free person, is a question which we cannot dismiss from our thoughts."

"The well-born Englishman is the greatest friend of the slave. The best and the greatest of men are the greatest friends of slavery."

"Mr. Hone says: "The abolitionists of the North will not listen to any terms of compromise. Equally regardless of the blessings of union, they prefer to hold it of no value unless the power is conceded to them of restraining the extension of the great moral evil which overshadows the land."--Hone's Diary, II: 371-74. California, which was formed from the territory ceded to the U. S. by Mexico by the treaty of Feb. 2, 1848 (p. v.), was admitted to the Union on Sept. 9. Ibid., II: 389-90; Rhodes, Hist. of the U. S., I: 182; Losing in Harper's Popular Cyc. of U. S. Hist., I: 193.

J. Fenimore Cooper, writing from the Gidle Hotel, New York, to Miss Coop., his sister, June 27, 1842, says: "The society at the old House Hotel is every day better."

"Mr. Brodie told me yesterday that a Mrs. Wetmore appeared at Mrs. Curtis' party, in a dress that cost, including jewels, $5,000--pretty well for New York. Mrs. Philip Rensselaer comes out this winter in great beauty and great magnificence. In a word, the town is a great arena for the women to show off their fine feathers in."--Correspondence of James Fenimore-Cooper (1922), II: 669.

"There is, however, a great garden, "of men of all political parties, to express a determination to stand by the 'Union, the whole Union, and nothing but the Union,' at all hazards, and to support the principles of Mr. Clay's compromise resolutions."

"Hone's Diary, II: 375; and see ibid. under March 5, 6, 12, 14 et seq., regarding the debates in congress.

The common council appropriates $2,000 to purchase a copy of Audubon's The Birds of America.--Proc. App'd by Mayor, XVIII: 22. See also Je 6.
By concessions to the demands of the slaveholders, in a great speech in the U.S. senate on this day, Daniel Webster weakened his influence, in the free-labour states, among anti-slavery men.—Lossing, in *Harper's Popular Cyc. of U.S. Hist.*, II: 1491. Nevertheless, large numbers throughout the Union approved the principles and sentiments which he expressed.—*Hone's Diary*, II: 376-77.

In New York, on March 28, several gentlemen, calling themselves "sons of New England and merchants of New York," presented him with a gold watch and chain in appreciation of this speech for "The Constitution and the Union."—*Private Correspondence of Daniel Webster*, ed. by Fletcher Webster (Boston, 1837), II: 567.

The common council appropriates $15,000 to purchase from the government of the U.S. the "lands claimed to be owned by it at Fort Gannovee."—*Proc., App'd by Mayor*, XVIII: 37.

Steamboat service from Albany to Poughkeepsie is inaugurated by the Hudson River R. R., to connect with trains for New York at the latter point, which is the most northern point to which the railroad has thus far extended (see D 31, 1849).—From chron. supplied by the company.

The legislature alters the Commissioners' Map of 1807-11 by laying out a public place known as "Stuyvesant Square," in the Seventeenth Ward, bounded on the north by 7th St., on the west by Fourth Ave. ("formerly the bowery"), on the south by 6th St., and on the east by Third Ave.—*Laws of N. Y.* (1850), chap. 65. The legislators of this time appear to have been oblivious of the fact that, in 1836, a "Stuyvesant Square" had been laid out in another location.—See My 18, 1856. See also Ja 5, 1870.

An illustration of the principal room of the academy appeared on May 1.—*Ibid.*, 2: 266.

The common council directs the comptroller to draw his warrant for $150 in favour of Calvin Pollard, "in payment for the plans and elevations for a market house on the site of the present Washington market, adopted by the Committee on Markets of the late Board of Aldermen."—*App'd by Mayor*, XVIII: 42; cf. *ibid.*, XVI: 63. See also Market Book, 453. See, further, D 30, 1851.

The mayor signs a joint resolution that Fifth Ave., between 34th and 424 Sts., be regulated and graded, and that curb- and gutter-stones be set therein.—*Proc., App'd by Mayor*, XVIII: 48.

The common council orders the renumbering of houses on Broadway between 10th St. and Union Square.—*Proc., App'd by Mayor*, XVIII: 48.

By special act, the legislature declares that the building law of March 7, 1849 (g. v.), and its amendments, shall not be construed so as to prevent A. T. Stewart "from continuing and completing his store and building on the easterly side of Broadway, from Read to Chambers streets . . . so that the portions already erected, with the additions thereto, may be uniform in structure and material, and in conformity with the plans of said building."—*Laws of N. Y.* (1850), chap. 96.

"Russ & Reid are soon to resume their paving operations in Broadway. What they have done already in this line reaches from Stewart's store on Read street, to the Howard Hotel on Maiden lane, and forms, all things considered, the best specimen of durable pavement in the city. Their next contract is for that part of the street, between Maiden Lane and Wall, which will be begun immediately, and finished as fast as the stones can be obtained from the quarry and laid. . . ."—*Even. Post*, Mr 30, 1850.

The Jesuits obtain title to a plot of ten lots, between Fifth and Sixth Avs., 15th and 16th Sts. Here, at 49 W. 15th St., they erected the first college building built by the Society of Jesus (see S, 1847).—*The College of St. Francis Xavier* (1867), 9, 11, 15, 25; 52; see N 55.

The common council requires that, in all cases of remunerating houses, under the direction of the commissioner of streets, he shall "furnish to the Croton Aqueduct Department, a transcript of all changes made, showing in parallel columns the old and new street numbers."—*Proc., App'd by Mayor*, XVIII: 53.

The legislature divides the Twelfth Ward into two wards by running a line through the centre of 86th St. from river to river. The portion north of it is to retain the name of the Twelfth Ward, and the portion south of it is to constitute the new ward named the Nineteenth Ward.—*Laws of N. Y.* (1850), chap. 187.

By act of the legislature "the office of City Judge in the city and county of New-York" is created. This official is to be elected by the people for a four-year term, his salary to be fixed by the board of supervisors, but at not less than $2,000. "All judicial powers vested by law in the recorder . . . are hereby conferred upon such city judge, and said city judge shall concurrently with said recorder perform and discharge all judicial duties imposed upon such recorder."—*Laws of N. Y.* (1850), chap. 205.

The common council accepts "the proposition from Mrs. Eliza B. Joned, tocede to the Corporation of the city of New York, all the land in One hundred and seventy-third street, from the Tenth avenue to the King's Bridge road, on the condition that the said Corporation open and work the street as a country road, without any expense to her."—*Proc., App'd by Mayor*, XVIII: 86.

The common council orders that the keeper of the city hall "discontinue to furnish hereafter, at the public expense, refreshments of every nature to the members of the Common Council, as well as to all other persons."—*Proc., App'd by Mayor*, XVIII: 84.

Hone mentions dining recently with August Belmont, "the agent of the great house of Rothschilds," at "his splendid mansion in the Fifth avenue."—*Hone's Diary*, II: 378.

The legislature passes a public health law, relating to the city of New York, and involving a revision of quarantine regulations. The common council is constituted the board of health.—*Laws of N. Y.* (1850), chap. 2757; amended Ji 11, 1851, by *ibid.* (1851), chap. 275. In 1790, the quarantine station was at Red Hook (Atlantic Dock); then at Bedloe's Island, until about 1798 when the U. S. government required that location for a fort, and it was moved to Staten Island.—*N. Y. Com. Adm.*, S 15, 1848; F 2, Mr 20, 1849.

In an act "to explain and extend the powers and duties of the governors of the almshouse of the city and county of New-York," the legislature gives them exclusive control of the potter's field, the upkeep of the department's buildings, and the erection of the workhouse authorized on April 11, 1849 (g. 5). While they are given power to enlarge or increase the number of buildings on Rang- dall's Island, or Blackwell's Island, or "within the enclosure of Bellevue Hospital," they are required to obtain the consent of the board of supervisors of New York before the erection or enlargement of any building costing more than $5,000. The act provides for raising money to establish the workhouse through an annual tax to be raised by the board of supervisors; also that minors may be bound out as apprentices.—*Laws of N. Y.* (1850), chap. 319.

By another act of this date, the legislature authorized the common council to raise $75,000 by a loan for erecting the workhouse. —*Ibid.*, (1850), chap. 289.

"My grandfather had ships that went to Holland and he brought skates home to his children, and they used to skate on the Canal that is now Canal Street and on the pond where the Tombs is now, and my mother says the poor people used to get a rib of beef and polish it and drill holes in it and fasten it on their shoes to skate on. The Canal ran from Broadway to the North River, and had a picket fence on both sides of it, and there were only three houses on its side, and they were little white wooden houses with green blinds."

—Haevens, *Diary of a little girl in Old New York*, 77-81.

The mayor approves an act which entitles "stewards and assistants "to receive as compensation for their legislative services, four dollars for each day such member shall sit in the Common Council." Another provision of the same ordinance fixed the stated sessions of the boards for the first Monday of the month at 3 p.m.,
1850 such sessions to “continue by adjournment from day to day at
Apr. the said hour until the public business shall be disposed of.” 13
Proe., Apr. 29 by Mayor, XVIII: 130. Never before had the mem-
bers of the common council received pay for their services (see P
15, 1858). The second provision of the ordinance was repealed on
Dec. 7 (ibid., XVIII: 476), probably because the amended charter
(see Ap 2, 1849) was to become effective the following month.

19 The Clayton-Bulwer treaty is signed at Washington. It
pro-
vides that neither Great Britain nor the U. S. shall obtain exclusive
control over the inter-ocean ship-canal to be constructed through
Nicaragua, or erect any fortification in that country.—Macdonald,
Select Doc., etc., 373-77.

20 The “Atlantic,” the first ship of the Collins Line (an American
line), sails from New York on its first voyage to Liverpool.—Ev.
Post, Ap 27; N. Y. Daily Tribune, Ap 29, 1850; Hone’s Diary, II:
381. See Ag 14, 1851.

May St. Luke’s Hospital is incorporated under the provisions of the
act of April 12, 1858 (q. v.), which was the general act “for the incor-
poration of such scientific and medical societies.” This fact, except the date, is specifically stated in an amend-
ment to its charter, passed March 28, 1851, and recorded in
Laws of N. Y. (1851), chap. 64. The day, May 1, is found in the
certificate of incorporation, and in the inscribed tablet in the
hospital, Amsterdam Ave. and 115th St. See also Richmond’s N. Y.
& Its Institutions, 367, 370. See My 24 and N 20, 1851.

21 The “Weekly Messenger of Philadelphia” presents to the common council,
through Mayor Woodhull, a “Map of the progress of his Majesty’s
army in New York.”—Proe., Bd. of Ald., XXXIX: 43-44.

22 The Bowling Green fountain is undergoing quite a metam-
phosis, and promises to present a more inviting aspect than the
former gloomy attempt at rustic beauty.”—Ev. Post, My 4, 1850.

23 The American Anti-Slavery Society holds its annual an-
cerversy at Independence Hall, Philadelphia, presents to the common council,
through Mayor Woodhull, a “Map of the progress of his Majesty’s
army in New York.”—Proe., Bd. of Ald., XXXIX: 43-44.

24 “The Bowling Green fountain is undergoing quite a metam-
phosis, and promises to present a more inviting aspect than the
former gloomy attempt at rustic beauty.”—Ev. Post, My 4, 1850.

25 The American Anti-Slavery Society holds its annual an-
cerversy at Independence Hall, Philadelphia, presents to the common council,
through Mayor Woodhull, a “Map of the progress of his Majesty’s
army in New York.”—Proe., Bd. of Ald., XXXIX: 43-44.

26 The American Anti-Slavery Society holds its annual an-
cerversy at Independence Hall, Philadelphia, presents to the common council,
through Mayor Woodhull, a “Map of the progress of his Majesty’s
army in New York.”—Proe., Bd. of Ald., XXXIX: 43-44.

27 The “Weekly Messenger of Philadelphia” presents to the common council,
through Mayor Woodhull, a “Map of the progress of his Majesty’s
army in New York.”—Proe., Bd. of Ald., XXXIX: 43-44.

28 The American Anti-Slavery Society holds its annual an-
cerversy at Independence Hall, Philadelphia, presents to the common council,
through Mayor Woodhull, a “Map of the progress of his Majesty’s
army in New York.”—Proe., Bd. of Ald., XXXIX: 43-44.
the city of New York, through Mons. A. Vattaremi, to the city of Paris, and to defer other incidental expenses connected with the subject of international exchanges. . .—Proc, App’d by Mayor, XVIII: 174-75.

7. The common council requests the mayor, the president of the board of aldermen, and the president of the board of assistant aldermen, "to tender the hospitalities of this city to such of the authorities of the city of Boston as are now in this city."—Proc, App’d by Mayor, XVIII: 185.

8. A map of Stuyvesant Square, at Third and Fourth Aves. and 9th Sts., bears this date.—See map No. 1047 in bureau of topography, borough president’s office.

9. The ruins of the Park Theatre are being demolished.—Com. Adv., Je 15, 1850.

10. The so-called Jenny Lind Concert Hall, on the La Farge property in 21st St. adjoining the "Bond street House" which "stands on Broadway," is under construction. A description of it mentions rosewood seats, sofas cushioned with crimson velvet or damask, frescoes, and many other details. The architect and builder is John M. Timble; the cost is estimated at $85,000. The building is being erected and owned by A. P. Tripler, with the understanding that Mr. Barnum will lease the hall for a certain number of nights.—N.Y. Com. Adv., Je 14, 1850. It was eventually named Tripler Hall, and had a notable career.—L. M. R. K., III: 986. See O 17.

11. Barnum’s new theatre is opened.—Eve. Post, Je 15 and 17, 1850. See also 1850, supra.

July

2. The common council permits the industrial convention, now in session in this city, to use the supreme court room in "the new City Hall."—Proc, App’d by Mayor, XVIII: 220.

3. President Zacheus J. Taft dies in Washington. The next day, Vice-President Millard Fillmore took the oath of office as president.—N. Y. Herald, Jl 11, 1850.

4. The common council appoints a committee to confer with the General Government, relative to selecting a site and erecting a suitable building in the city of New York, for the accommodation of the Post office and United States Courts, Marshal’s office, &c.—Proc, App’d by Mayor, XVIII: 234.

5. The common council permits the Hudson River R. Co. "to run their dumb engine to Chambers street, to test its power and probable safety for conducting their cars to Chambers street."—Proc, App’d by Mayor, XVIII: 227. On Aug. 9, the board accepted an invitation from the railroad company "to witness the operation of their street locomotive engine." The company is to be allowed to run and a half hour is to be given. The common council orders that the commissioner of repairs and supplies remove the "bow window now projecting from one of the upper windows of the front of the City Hall," and "that the window be restored to its original form, and similar to the other windows of the Hall."—Proc, App’d by Mayor, XVIII: 233.

6. The common council passes resolutions of grief and sympathy on the account of the death of President Taylor. It appoints a committee to arrange a suitable demonstration of respect for his memory, and orders that the members of the board shall wear mourning, and cause their respective meeting-places to be hung with it, for 30 days.—Proc, App’d by Mayor, XVIII: 261-64.

7. The common council gives permission to James Hall, a contractor, "to lay down a railroad from the rail of the Harlem railroad in Centre street, at Chambers street, through said Chambers street to 150 ft. west of Centre street," to convey marble or granite for the new building of A. T. Stewart & Co., at the north-east corner of Broadway and Chambers St. The permission is not to extend beyond six months, when Hall is to restore the street to as good condition as when the railroad was laid.—Proc, App’d by Mayor, XVIII: 259. On June 13, 1851, the board ordered that the track be taken up.—Herald, Jl 27.

8. New York is made an arch-episcopal see (Roman Catholic), the suffragans of it being the dioceses of Albany, Brooklyn, Buffalo, Ogdensburg, Rochester, Syracuse, Newark, and Trenton.—Cath. Encycl., XII: 20.

An elaborate funeral pageant is held in honour of the memory of the late President Taylor (see Jl 9). For full particulars, see N. Y. Herald, Jl 24, 1850; Holme’s Diary, II: 356. On Aug. 9, the common council appropriated $3,500 to pay for this.—Proc, App’d by Mayor, XVIII: 284.

Gen. Paez, ex-president of the Republic of Venezuela, is welcomed to the city by the mayor, common council, and citizens.—Eve. Post, Ag 3, 1850. On Nov. 9, Gen. Paez presented to the city his sword.—Proc, App’d by Mayor, XVIII: 425.

There are at this time 19 public parks in the city, containing in all 170 acres of land. This is considered very disproportionate to the size of New York and the number of its inhabitants.—Eve. Post, Ag 5, 1850.

On the corner of Fifteenth Street next to Spingler Institute is the Church of the Puritans. Dr. Cheever is the minister, and he and the church people are called a long name, which means that they think slavery is wicked, and that they help the black slaves that come from the South, to get to Canada where they will be free."—Havens, Diary of a little girl in Old New York, 93-94. See Pl. 156, Vol. III.

The common council orders that the N. Y. & Harlem R. R. Co. erect parapet walls and arches along their railroad in Fourth Ave. between 23d and 42d Sts., according to stated specifications and in conformity to a plan drawn by Edwin Smith, city surveyor, dated May 15, 1850. The work shall be commenced by Oct. 1, 1850, and completed by May 1, 1851.—Proc, App’d by Mayor, XVIII: 274-75. For other improvements which this road was allowed to make in New York this year, see ibid., XVIII: 44, 244, 246, 259, 338, 361. The open cut was bricked over, and converted into the present arched tunnel at that time.

The common council orders that the com’r of repairs and supplies "cause the City Hall to be thoroughly repaired, the court rooms ventilated, its interior repainted, and a new roof placed on the same; also the dials of the clock regulated," for all which the sum of $18,000 is appropriated.—Proc, App’d by Mayor, XVIII: 284-85.

The common council appropriates $50,000 for erecting workhouse buildings on Blackwell’s Island.—Proc, App’d by Mayor, XVIII: 289.

"Mr. Silas Wood has in course of erection in Cherry street, between Roosevelt street and Franklin Square, a large house which when completed will have no less than one hundred and forty-four residences. It is built with the design of supplying the laboring people with cheap lodgings, and will have many advantages over the cellars and other miserable abodes, which too many are forced to inhabit. The depth of the building is two hundred and forty feet, with a front of thirty-five feet. Each tenement containing two rooms, a parlor, a bed room and a half; 100 feet in width, and about twenty feet in length; giving twenty-four residences to each floor. "This is a praiseworthy enterprise and well worthy of imitation."—Proc, App’d Mr. Washington, 1850. This seems to be the start of the "improved dwellings" movement in New York.

The old rail on the Harlem Railroad, between Twenty-first and Twenty-fifth streets has been taken up and given place to a heavier and better one. The remainder of the road from Twenty-first street to the depot at the Park will shortly be laid."—Proc, App’d Ag 26, and N 20, 1850.

The corner-stone of the N. Y. Medical College is laid on 13th St., east of Fourth Ave.—Proc, App’d Ag 30, 1850. The building was completed in September, the clinics were opened in October, and lectures commenced in November. The building occupied the site of the circular reservoir in East 13th St. between Third and Fourth Aves. (see 1851). For names of its officers and faculty, and other information, with wood-cut view of the façade, see The Great Metropolitan or New York Almanac for 1851, 57, and N. Y. Herald, Ag 30, 1850. Cf. 1851.

Jenny Lind arrives at New York from Liverpool. For an account of her voyage, reception, etc., see N. Y. Herald, S 2, 3, 5 et seq., 1850; Holme’s Diary, II: 359. For her first appearance before an American audience, see S 11.

Mayor Woodball transmits to the board of aldermen a communication from a comm’tee of the Brooklyn board stating that they have been appointed "a Select Committee to examine and report
1830

THE ICONOGRAPHY OF MANHATTAN ISLAND

Aug

2

The common council resolves to lease to the N. Y., New Haven, & Hartford R. R., for 21 years, at an annual rent of $6,000 plus taxes and assessments, the block bounded by Centre, Franklin, Elm, and White Sts. The arsenal buildings on Elm and Franklin Sts. are to remain for the use of the military until May 1, 1851. The company is to improve the premises within a year from the date of the lease. The lease shall contain covenants for renewal at the expiration of the term. The premises are "to continue during said leases for a railroad depot." The lease shall not be construed as a consent by the city for the company to use any street or avenue "for the purpose of running cars thereon, by virtue of an agreement with the Harlem Railroad Company," or as a waiver of the city's right "to regulate and control the said New York and New Haven Railroad Company, to the same extent it can now control the New York and Harlem Railroad Company,"—Proc., App'd by Mayor, XVIII: 299-300. A freight depot was erected here, which was abandoned in 1885.—L. M. R. K., III: 975.

The common council orders that curb- and gutter-stones be set on 42d St., between Fifth and Tenth Aves., that the sidewalks be 70 ft. wide between Fifth and Eighth Aves., and that a space 4 ft. wide be flagged through this sidewalk.—Proc., App'd by Mayor, XVII: 399-400.

The common council directs the clerk of the board to cause to be published 500 copies of "Kent's charter, with notes, as published, and the amended charter of 1849," and appropriates $1,000 for the purpose.—Proc., App'd by Mayor, XVIII: 313.

Jenny Lind gives her first concert in America, at Castle Garden, the seats having been sold at auction by her manager.—"N. Y. Herald, S. 16, 1851." See also Brown, Hist. of the N. Y. Stage, I: 911; Howe's Diary, II: 389, 390, 391; Lossing, Hist. of N. T. City, II: 678, 680. There is an engraving of the "First Appearance of Jenny Lind in America" in the Emmet coll., item No. 15143, in N. Y. P. L. The scene in Castle Garden during her famous concert on this occasion is also shown in a lithographic view by N. Currier, in Enou collection, N. Y. P. L. Other Castle Garden views, sketched during her concerts in New York, were published May 17, 1851, in Giesta's Pictorial, I: 40, 41.

Shearing, under a contract with Barnum, after deducting the large expenses of her first concert, amounted to $12,500, all of which she distributed among the charitable and benevolent institutions of New York City.—How's Diary, II: 391-92.

The official ambassador from the U. S. is publicly welcomed to New York.—Ex. Post, S 14, 1850. On Sept. 16, he received visitors at the city hall.—Ibid, S 16, 1850.

The common council authorises the N. Y. & Harlem R. R. Co. to take up their double track, from the corner of Grand and Centre streets, to the Bowery, and lay down a single track in the centre of the street, from the corner of Grand street, through Centre and Bowem streets to the Bowery, down the Bowery to Grand street, and through Grand street to Centre street.—Proc., App'd by Mayor, XVIII: 338.

A committee of congress reports strongly in favour of establishing a branch mint at New York.—Reports, 31st cong., 1st sess., No. 430.

Peale's Fillmore signs the Fugitive Slave Law.—Macdonald, Sert Doc., etc., 385-89.

"Stewart is making a palace of a store." He takes in the whole front of the block on Broadway, with fifteen windows in front, and all of marble."—Correspondence of James Fenimore-Cooper (1922), II: 687. The building still stands, on the east side of Broadway between Chambers and Reade Sts., the northern portion, at the Reade St. corner, occupying the site of Washington Hall.—See L. M. R. K., III: 466, under "Washington Hall," where, however, the situation of this hall is erroneously given as on the "N. E. cor."—Hone's Diary, II: 392. This was 691 Broadway. City Directory, Wilson, Mem. Hiss., IV: 236; Union Club List (1912), 2; L. M. R. K., Sept 1853: 939. In 1855 (p. 9), the club moved into its own building, at the north-west cor. of Fifth Ave. and 21st St.

Under an act of congress of Aug. 8, 1848, the city now acquires title by government grant to part of the land at West, Washington, and Gansevoort Sts., on which Gansevoort Market was afterwards built. Another part of the ground was already vested in the city by the original charter grants, and a third parcel was acquired, by purchase, of a private owner.—Prendergast, Record of Real Estate (1914), citing liber of conveyances.

Tripler Hall is publicly opened for the first time.—Ex. Post, O 18, 1850; see also handbill in Emmet coll., item No. 11872. It was originally to be called Jenny Lind Hall, as it was planned for the great Swedish singer.—Ex. Post, S 7, 27, O 10 and 15, 1850. It was sold under foreclosure, Nov. 25, 1851, to John L. Farge.—Ibid., N 26, 1851. For the later changes in name, see L. M. R. K., III: 986, and King's Handbook, 580. A handbill of April 13, 1864, when it was the Winter Garden, is in the Emmet coll, item No. 11875.

The common council orders that the commissioner of repairs and supplies "have a suitable building erected on the northeast corner of Elm and White streets, for the use of first division of the New York and New Haven Railroad Company,"—Proc., App'd by Mayor, XVII: 406. On Mar. 24, 1851, $8,000 was added to the appropriation.—Ibid., XIX: 104.

The common council appropriates $2,000 for constructing a fountain in Washington Square, the amount to be taken from the balance of the appropriation now remaining for the purpose of erecting an iron railing around the square.—Proc., App'd by Mayor, XVIII: 415; 70-71.

---

The growth of the town is incredible. Brooklyn has 120,000 souls; Williamsburg 30,000 and Manhattan 550,000, it is said.—Correspondence of James Fenimore-Cooper (1923), II: 663.

"The amount of real estate owned by the city, in markets alone, is valued at $1,116,000, from which is derived an annual revenue of $25,900. There are at present not more than eleven markets in New York—a very inconsiderable number for the size and demands of the city."—Ex. Post, N 25, 1850.

The common council reserves the right of Williams Paris to survey a part of Manhattan Island, extending from the Harlem River.—Proc., App'd by Mayor, XVIII: 421. See D 10.

The College of St. Francis Xavier opens at 49 W. 15th St. (see Ap 5.)—The College of St. Francis Xavier (1897), 9, 11, 15, 25, 32. See J 10 and O 15, 1861.
In this year, Ather Taylor, the “First Marshal” in the mayor’s office, compiled and published A hand book of streets & distances, their length, and intervals, of all the streets in the city of New York. Compiled for use in the Mayor’s office. One of its uses was to determine distances travelled by cartmen and hackmen, so that persons employing them might verify the charges for service.

In this year, the first (and only) issue of Daggett's New York City Street Directory appeared, a directory arranged according to the streets and house numbers, instead of alphabetically by names. The territory covered by the volume extended from the Battery to 25th St. and included about 85,000 names. This directory is now very scarce. There is a copy in the N. Y. P. L.

The Great Metropolis or New York Almanac for 1851, by H. Wilson, contains, among other new information, an account of the city's daily newspapers of the time, which is particularly interesting (pp. 88-89, 125), and a well-digested catalogue of the secret societies, lodges, etc., in New York (pp. 18-25). Among the advertisements is a wood-cut view of the interior of W. H. Dibrown's riding-school, at 20 Fourth Ave.

In this year, H. A. Jones made a map of the city north of 30th St.—See map No. 1733 in bureau of topography, borough president’s office, Mayor, 54th St.

In Valentine’s Manual for 1851, were published a map of the city, 1851; map of N. Y. State, with population based on census of 1850; and views of the Quarantine, Staten Island, 262 workshop on Blackwell’s Island, 296 house of Gen. Striker at foot of 122d St. (error for 52d St.—see L. R. K., III: 952), North River, 450.

In this year, the old homestead of Jacob Kip, at Kip’s Bay, overlooking the East River (first erected in 1654, 4½, or 1655, partially destroyed by fire in 1666 and rebuilt), was demolished on the 25th St. for the exact site of the house.—Post, Abstract of Title of Kip’s Bay Farm, II: 1173; Man. Com. Coun. (1852), 472; “New York Society in the Olden Time,” by Bishop Kip, in Putnam’s Mag., 5, 1850, reprinted in Stone’s Hist. of N. Y. City, Appendix XVI (p. 100). On April 30, 1930, the Kip’s Bay Neighbourhood Assn. celebrated with pageant and fête some of the noted incidents that happened on and near this property. These are described in the N. Y. Times, Apr 18, 1930. See also L. R. K., III: 950; Proc., App’d by Mayor, XIX: 328. For exact location of the house in relation to the old roads, see map No. 142 in the loc. of engineering, div. of design, municipal bldg.

It stood on the north side of a cross-road leading from the Kingsbridge Road to East River north of Kip’s Bay. See also O 27, 1843.

In this year, the N. Y. & New Haven R. R. Co. erected a depot at the south-east corner of Broadway and Canal St.—From chron. supplied by the company; L. R. K., III: 975; Dripp’s Map of 1851.

In this year, the Roman Catholic Orphan Asylum (see JI 28, 1851) was built, on the east side of Fifth Ave. between 51st and 53d Sts. For building developments in this connection, see King’s Handbook (1851), 439; L. R. K., III: 955; Lossing, Hist. of N. Y. City, II: 701; Perris’s Insurance Map, 1859; Bromley’s Atlas, 1879. See, further, Apr 15, 1852.

In this year, the De Milt Dispensary was established.—King’s Handbook of N. Y., 488.

The Union Hotel, at 496 Broadway; the Collamore House, cor. of Spring St. on the east side of Broadway; the Philharmonic Soc. (see 1853), at 439 Broadway; Braham’s Lyceum, at 485 Broadway; the College of Pharmacy, at 511 Broadway; the Tripler Hall (see, further, 1853), at 677 Broadway; the Eoden Hotel, at 834 Broadway, all date from this year.—Man. Com. Coun. (1865), 655-656, 659a. For the Metropolitan Hotel, see S 13. Braham’s Lyceum was opened Dec. 27, 1850 (p. 16). In this year, Barum’s Hotel was named the Howard House.

See also A. Pl. 25, Vol. III. It stood at No. 434 Broadway, east side.—Man. Com. Coun. (1865), 644, 505.

In this year, the city had 239 churches, divided as follows: 50 Baptist; 9 Congregational; 17 Dutch Reformed; 5 Friends; 10 Jewish Synagogues; 6 Lutherans; 14 Methodist Episcopal; 3 Methodist Protestant; 40 Protestant Episcopal; 2 New Jerusalem; 36 Presbyterian; 5 Associate Presbyterian; 2 Associate Reformed Presbyterian; 4 Reformed Presbyterian; 3 Primitive Christians; 20 Roman Catholics; 2 Unitarian; 4 Universalists; 1 Wesleyan Methodist; 7 miscellaneous.—Man. Com. Coun. (1851), 537.

In this year, the medical faculty of New York University sold...
the Stuyvesant Institute (see 1841), bought a lot on 14th St., the
site of the present Tammany Hall, and erected there a new building for the use of the school. This was used until the spring of 1866.

In this year, the Kennedy mansion, at No. 1 Broadway, became "The Washington." It continued under this name until 1881. —See description of pl. 98, III., 550. See also L. M. R. K., III., 530, where, however, an error occurs in the statement that this hotel is shown in the view by C. Burton in the Bourne Series of N. Y. views. It was a view of "Washington Hotel," at the s.e. cor. of Broadway and Reade St., which Bourne published.

In this year, Trinity Chapel, on west 23d St., near Broadway, was commenced; it was completed in 1856, having been conserved April 17, 1855—Trinity Church Biennial Celebration, My 5, 1857.

In this year was published the first of the series of guide-books, issued by C. S. Francis & Co., entitled (on cover) Francis' Picture of New-York and Strangers' Guide. It bears copyright date of 1845. Later issues owned by the N. Y. H. S. are those of 1854, 1857, and 1859. H.C., Cat. of N. Y. P. L., title "N. Y. City," subiv. "Guide Books."

Gosling's popular-priced restaurant, occupying the former German church on Nassau St., "dines over a thousand people every day," including Sundays.—The Stranger's Handbook (1841), 81. "The Park contains the largest fountain in the city. The basin is one hundred feet in diameter, and the circumference is sometimes entirely filled by the various jets of the Holiday fountain. The machinery of the fountain is so arranged as to supply a variety of forms in the jets..."

In the summer season the [rock] fountain [in Bowling Green] is occasionally illuminated with coloured lights... The enclosure is now made to hold some deer, geese and other live animals.

Hudson Square, or St. John's Park, is accessible to the people in its neighbourhood who have keys... It contains a very tasty fountain, and is by far the most beautiful public square in the city..."

"Tomkin's" Square, which is used for a parade ground, is one of the largest squares in the city. It is not yet much frequented, as the trees are young, and the place not finished. It is between Avenue A and B, and between Sixth and Tenth streets....—Ibid., 35-39.

In this year, the 69th New York (Irish Brigade) was organized.—Chas. S. Clark in The Eve. Post, F 26, 1851.

By this time, Lexington Ave. had been opened from 42d to 66th St., at a total cost of $63,500.84.—Man. Com. Coun. (1857), 538. See Ap 24, 1848.

As it "has been the custom of the Common Council... for nearly half a century, to obtain a portrait of the Chief Magistrate of the state," the board now orders that the com'r of repairs and supplies, under the direction of the com. on arts and sciences, be instructed to obtain a full-length portrait of Gov. Hamilton Fish, to be placed in the governor's room; $500 is appropriated for it, and $100 for framing it.—Proc., App'd by Mayor, XVII, 538.

The common council directs the commissioner of repairs and supplies, acting under the direction of the committee on arts and sciences, to procure a portrait of Mayor Caleb S. Woodhull, to be suitably framed and placed in the governor's room and it appropriates $50 for this object.—Proc., App'd by Mayor, XIX, 4.

Henry James delivers a lecture on "Democracy," before the Mechanics Institute, at Hope Chapel.—Eve. Post, Ja 14, 1851.

On Jan. 21, he began a series of lectures on art at Stuyvesant Institute.—Ibid., Ja 22, 1851. Hope Chapel was at 218 Broadway, and dated from 1850.—Man. Com. Coun. (1856), 615.

Six buildings, in course of erection in 21st St. between Fifth and Sixth Aves., collapse and kill or injure 30 workmen.—Eve. Post, Ja 16, 1851.

The operations in the building line, during the present year, will exhibit a long series of contracts, which have been already entered into, exceed those even of 1850, when near two thousand houses were erected. It is rumored that one of the Astor family has contracted for the erection of two hundred buildings, from three to five stories high, Forty-fourth, Forty-fifth, Forty-sixth and Forty-seventh streets, the foundations of which will be laid as soon as the contract is completed. These buildings will be situated mainly between Broadway and the Ninth avenue. The property on which they are to be erected, is at present occupied by several small frame houses and shanties...—Eve. Post, Ja 17, 1851.

The common council orders that the commissioner of repairs and supplies "contract with Richard H. Bull for the immediate completion of the telegraph wire and apparatus to all the fire alarm stations in the city;" also that he "cause them to be connected with the astronomical observatory, on the corner of Eleventh street and Second avenue, and the bell rings be instructed to strike at 9 o'clock in the evening, upon a signal to be given from said observatory;" $500 is appropriated for these objects.—Proc., App'd by Mayor, XIX, 26.

By this time, the missionary work of Rev. L. M. Pease (see 1848) was well under way at Five Points, where he had established in rented houses various branches of a work which later developed into the Five Points Mission and House of Industry. For an account of this, see Lossing's Hist. of N. Y. City, II, 672, passim. See Mr. 1852.

In view of the recent annual report of the Croton aqueduct dept., "that the means of storing a larger supply of water upon this island cannot be secured at the present outlay," the common council directs that department "to purchase and construct a reservoir, or a station, ... for exclusive use and purpose of running their city line of small passenger cars upon, to that point..." The rails shall not be laid within 20 ft. of the line at the corner of Broadway and the southern end of the park.—Proc., App'd by Mayor, XIX, 60-61.

The real estate and other property owned by the city consisting of parks and other public grounds, school houses and lots, markets, ferry property, municipal institutions, offices, etc., is valued at $19,050, 310.88. The amount expended for the Croton Aqueduct and Receiving and Distributing Reservoirs has been calculated at $14,527, 578.95.—Eve. Post, F 7, 1851.

That there was a "city flag" at this time is shown by an order of the common council for a new one, the present one being "so out of repair as to be unfit for use."—Proc., App'd by Mayor, XIX, 76.

Washington's birthday is celebrated with unusual demonstrations. Among the principal features are the decorations and illumination of the city hall, which included a "colossal, full-length portrait" of Washington, and a dinner to 500 guests at Tiffany's Garden, at which Edward Everett was the principal speaker. Everett "drew a picture of the past half century, and of the progress of the United States, and contrasted the position which, in the nature of things, the country would occupy in case of a dissolution of the confederacy, in a masterly manner." For full description, and reports of the speeches, see N. T. Herald, F 23, 24, 1851.

There is a "Grand demonstration" of the Order of United Americans (see 1857) in Tripler Hall. This organization appears to have had over 50 local chapters at this time.—From program of the meeting, filed in room 319, N. Y. P. L.; Eve. Post, F 24, 1851.

The first commencement of the N. Y. Medical College is held in the college building on 13th St. near Broadway.—Eve. Post, Mr 1, 1851.

In this month begins The Republic, a Monthly Magazine of American Literature, Politics and Art, edited by Thomas R. Whitney, and published at 120 Nassau St. This publication served the interests of the Order of United Americans (see F 32), of which Editor Whitney was the secretary, and was declared to be "a purely American Journal for the parlor and fireside."—From prospectus of first issue, in room 319, N. Y. P. L. The first issue in the N. Y. P. L. is that of Dec. 1851.

Home. Home, the painting from the mural which he had been "reading a book, ... called "Reveries of a Bachelor," by a very clever, ingenious writer, under the assumed name of Mr. Marvul," which, representing "imaginary scenes in life," and "written in an easy, unpretending style, of deep pathos, "causes "tears to flow," and is "alternately bright with the radiant sunshine of life."—Hone's Diary, II, 399-400. This is

The message was referred to the committee on lands and places, and this committee recommended that the 160 acres lying between the East River, Third Ave., 66th and 75th Sts., belonging principally to Jones and Schermerhorn, be taken for a park. —Ibid., 451.

See J. 5, 1851; Je 6, 1851.

Philip Hone, former mayor and for many years a prominent citizen of New York, dies at the age of 70. —Even. Post, My 5, 1851.

Jenny Lind begins her final engagement in New York with a concert at Castle Garden. —Even. Post, My 7 and 8, 1851.

President Fillmore and his cabinet come to New York to participate in the celebration on the opening of the Erie Railroad (see My 14). —N. Y. Herald, My 14, 1851; Proc., App'd by Mayor, XIX: 111-12.

For views of the president's landing at Castle Garden, the procession up Broadway to the city hall, etc., see Gleason's Pictorial, I: 88-89.

The completion of the Erie Railroad (see Ap 22) is celebrated along the entire route. President Fillmore and his cabinet proceed up the road from the foot of Duane St., the site of the old City of New-York, to the city of the county of New-York. The latter shall arrange them for convenient reference in his office. —Laws of N. Y. (1851), chap. 156.

The legislature lays out a "new street" (not laid down in the Commissioners' Map of 1807-11), by extending Broadway from 71st to 66th St., this section of the (later) Broadway being part of the old Bloomingdale Road. —Laws of N. Y. (1851), chap. 189.

The estimated cost of this improvement was found, a year later, to be $37,152,587. —Man. Com. Coun. (1857), 259. Cf. Mr 31, 1849.

The Erie Railroad, which was chartered on April 24, 1832 (q. v.), is completed and opened to Dunkirk on Lake Erie from Piermont on the Hudson (opposite Dobbs's Ferry). —N. Y. Tribune, Ap 25, 1832.

See Mr 14, 1851.

The first number of Gleason's Pictorial makes its appearance, in Boston. Ballow's Pictorial succeeded it. Both series were profusely illustrated with American and foreign scenes and portraits.

The citizens of New York recently presented to Daniel Webster, secretary of state, as a token of respect for his defence of the Constitution, a handsome carriage, made to order by Wood, Tomlinson & Co. of New York, and a span of horses, the total cost of which was $5,500. —Gleason's Pictorial, I: 8 (My 3, 1851), with illustration.

In a message to the common council, Mayor Kingsland calls attention to the need of recreation spaces up town: "It seems obvious to me that the entire tongue of land south of the line drawn across the Park [the present City Hall Park], is destined to be devoted entirely and solely, to commercial purposes; and the Park and Battery, which were formerly favorite places of resort for pleasure and recreation for citizens whose residences were below that line, are now deserted. The tide of population is rapidly flowing to the northern section of the island, and it is here that provision should be made for the thousands whose dwellings will, ere long, fill up the vacant streets and avenues north of Union Park. . . . There are thousands who pass the day of rest among the idle and dissolute, in porter-houses, or in places more objectionable, who would rejoice in having such as one in our midst. I think that the expenditure of a sum necessary to procure and lay out a park of sufficient magnitude to answer the purposes above noted would be well and wisely appropriated, and would be returned to us fourfold, in the health, happiness and comfort of those whose interests are specially intrusted to our keeping—the poorer classes.

The city pays John Vanderlyn $100 to cover his expenses in going to Washington to paint the portrait of Geo. Taylor, late president of the U. S.

It also pays Chas. Jarvis $200 in full payment of his portrait of
The common council directs the corporation to apply to the legislature for the appointment of commissioners to take for use as a public park the land between 64th and 75th Sts., Third Ave. and East River, and the portion of the Schermerhorn estate lying adjacent to it between 64th and 66th Sts., Third Ave. and East River; also that the comptroller and mayor authorised to negotiate for the purchase of this land any time before the appointment of such commissioners.—Prec., Appd by Mayor, XIX: 241–42. This was Jones's Wood, so named from the fact that about 90 acres of the proposed tract was covered with trees and belonged to John Jones, whose house stood on the line of 68th St., east of Avenue A—16th Ann. Rep., Am. Scenic & Hist. Pers. Soc. (1911), 451.

John Flavel Mines ("Felix Oldboy"), writing in 1886–90, said of Jones's Wood: "It was the last fortress of the forest primavera that once covered the rocky shores of the East river, and its wildness was almost savage. . . . Later, its shores were renowned for fishing parties under the shadow of its rocky bluff and over-hanging oaks the youth of a former generation cast their lines. . . . The ninety acres which composed the wooded farm was known in olden time as the Louvre."—Ibid., L. M. R. K., III: 966. See, further, J. 11.

The first of the annual firemen's parades is held in New-York—N. Y. Herald, July 20, 1851. The second was held on June 14, 1852, and the third, the most imposing, on Oct. 13, 1856.

During this year, the work of completing the Hudson River R. R. from Poughkeepsie to Albany was under way. On June 12, an experimental trip was made from Albany to Hudson. On the 14th, there was an excursion from Albany to Hudson for the benefit of the Hudson Orphan Asylum. On the 16th, the road was opened for traffic between these points. On July 7, it was opened for business from Albany to Catskills; and, on Aug. 7, from Albany to Tivoli.—From chron. supplied by the company. See O 1.

The common council directs the street commissioner to procure a plan for laying out streets and avenues in the city north of 155th St.—Prec., Appd by Mayor, XIX: 250.

The common council passes resolutions of appreciation in connection with the completion of the N.Y. & Erie Railroad, which it calls "emphatically the work of the age."—Prec., Appd by Mayor, XIX: 265–66.

The common council directs the N.Y. & Harlem R.R. "to erect, without delay, bridges across their road" at 83d, 84th, and 88th Sts., like the one at 87th St.—Prec., Appd by Mayor, XIX: 253.

The legislature appropriates $50,000 for the use of the Society for the Relief of Juvenile Delinquents to enable it to erect new buildings.—Laws of N. Y. (1851), chap. 254. See S 25.

The yacht "America" sails from New York for England. For description, see N. Y. Herald, Je 21, 22, 1851; Gleason's Pictorial, I: 76. Regarding the race, see Ag 22.

The "Fourteenth Street Presbyterian Church," on the southwest corner of Second Ave. and 14th St., is dedicated.—For woodcut view and description, see The Citizen and Stranger's Pictorial and Business Directory (1853), 57; see also Perris, N. Y. City Insurance Maps (1853), Vol. IV.

The legislature incorporates the N. Y. Academy of Medicine.—Laws of N. Y. (1851), chap. 274.

The common council directs the comptroller "to collect and place in his office all of the original charters of the Corporation, and that he procure a suitable fire-proof box or safe in which the same may be kept."—Prec., Appd by Mayor, XIX: 274.

The legislature authorises the common council to raise money by loans, and to create a public fund, to be called "Public Building Stock, No. 3" for the purpose of reimbursing the city treasury for amounts already expended and to be expended for erecting public buildings.—Laws of N. Y. (1851), chap. 394. See, for example, D 12.

The legislature incorporates the N. Y. Juvenile Asylum. Among the incorporators are Robt. B. Minturn, Myrndt Van Schael, Benj. F. Butler, Luther Bradish, Charles O'Conor, John Duer, and Peter Cooper. Its object is to care for, support, and educate children between five and fourteen years of age, voluntarily intrusted to them by their parents or guardians, or committed to their charge by competent authority.—Laws of N. Y. (1851), chap. 373. For an account of this society's work in later years, see the N. Y. Times, Je 31, 1865; Lossing, Hist. of N. Y. City, III: 689.

The legislature passes an act "to amend, consolidate, and reduce to one act, the various acts relative to the Common Schools of the city of New-York."—Laws of N. Y. (1851), chap. 386. See Ap 11, 1842; My 7, 1847; Mr 25, 1848.

The legislature appropriates $1,500 for the erection of a three-story building in the Park, fronting on Chambers street, and
to extend from Centre street to near the Rutunda;..; said building to be occupied by engine company No. 22, hose company No. 28, and book and ladder company No. 1, and for such other public purposes as may be designated by the Common Council. The comr of repairs and supplies is directed to advertise for proposals. —Proc., App'd by Mayor, XIX: 274.

The property of old St. George's Church in Beekman St. is conveyed to the Church of the Holy Evangelists, in accordance with articles of agreement between it and Trinity vestry dated Nov. 30, 1850. The latter church was to Vanderswater St., having been established by the City Mission Society, and was now in embar- rassed circumstances because of its undesirable location. Among the conditions of the agreement was a provision that the name St. George's Chapel, or Old St. George's Chapel, should be maintained, and that Trinity should be allowed to place a marble slab in front of the tower, inscribed with that name, and bearing dates of erection, construction by fire, and rebuilding. —Anstic, Hist. St. George's Church, 189-193; descrip. of Pl. 133-b, III: 774. Regarding the end of the tenure of this property by the Church of the Holy Evangelists, see Anstic, 211-14. The property was conveyed to the firm of Phelps, Dodge & Co. in 1868.—Ibid., 214.

"Rathbun's Hotel like the City Hotel, Franklin House, and many other popular hotels down town, has been turned into stores. The proprietors of these new hotels have formed hotels up town; and the result must be, that business will follow." —Ev. Post, Jl 24, 1851.

A high wooden fire-bell tower, at the intersection of Madison Ave. and W. 10th St., is destroyed by fire. The bell, weighing 9,000 lbs., falls. Soon after, another wooden tower was erected at the northwestern end of the market ground, adjoining the country and fish market-stall (see Mr. 1856).—Market Book, 570-71; Haswell's Reminiscences, 477. See also contemporary photographs of this tower in De Veo's scrap-book of N. Y. views by N. Y. Hist. Soc.

The common council grants permission to the Eighth Ave. Railroad Co. to lay a double track in the following streets: From the intersection of West Broadway and Chambers St.; through West Broadway, down Canal St. and along Hudson St. and Eighth Ave. to the Harlem River. It grants permission to the Sixth Ave. Railroad Co. to lay a double track in the following streets: Commencing at the intersection of West Broadway and Chambers St.; thence through Chambers to Church St.; Church to Canal, Canal to Wooster, and Wooster to Fourth St., with a single track; thence through Fourth St. to Sixth Ave., and through Sixth Ave. to Harlem, with a double track; also to lay a single track in Thompson St. from Fulton to Canan St., to connect with the Eighth Ave. Railroad. This route was slightly altered the following year. —Proc., App'd by Mayor, XIX: 277-80; and XXI: 323. See also Man. Com. Coun. (1860), 413; The Metropolitan City of Am., a guide-book (1859), 209, See S 5.

When constructed, the Eighth Ave. R. R. started, at its southern end, near the present 51st St., and ran through Chauch, Chambers, West Broadway, Canal, and Hudson Sts., and Eighth Ave., to 59th St.; returning by the same route, with a single track through College Place. The Sixth Ave. R. R. started from the corner of Barclay and Church Sts., and ran through Church and Chambers Sts., West Broadway, Canal, Varick, and Corinie Sts., and Sixth Ave. to 44th St.; returning by the same route, with a single track through College Place. —Man. Com. Coun. (1857), 334.

"This morning, the attachés of the Custom House were thrown into a state of great excitement by the appearance among them of a lady dressed in the Bloomer costume..." This is described.—Ev. Post, Ag 9, 1851. It was in this year that the Bloomer costume, originated by Mr. Elizabeth Smith Miller, was adopted and made famous by Mrs. Amelia Bloomer and received her name.—D. C. Bloomer, Life and Writings of Amelia Bloomer, 65-81. See also McMaster, Hist. of the People of the U. S., VIII: 121-22. See Ag 9.

The common council orders that benches be placed in "Madison Park" under the direction of the street comm. —Proc., App'd by Mayor, XIX: 320.

The common council passes the following resolution in commendation of the Collins Line of steamships (see Ap 27, 1850): "Whereas, In the establishment of a line of steamers between this city and Liverpool, our citizens have exhibited their enterprise and embarked a large capital in the building and equipment of a line of vessels, the most magnificent of their class on the ocean, excelling in speed and accommodation for travelers all ships heretofore constructed; and whereas, The success attendant upon the voyages of these vessels reflects great credit upon our artisans by whom they were constructed, and upon the professional skill which guides them on the ocean, as well as upon E. K. Collis, Esq., and other public spirited individuals who have, by the expenditure of their time and capital, succeeded in establishing an American line of steamers between this port and Liverpool; and whereas, It is deemed proper that the common council, on the part of the citizens of New York, should express the gratification so generally felt at the success attendant upon the voyages of the steamers referred to; therefore "Resolved, That in the establishment and successful operation of the United States Mail line of steamers between this port and Liverpool,—this city and country have cause to feel a deep gratification, and to cherish and foster the interests of the company by means of whose capital and influence we are indebted for this additional exhibition of American skill and enterprise. "Resolved, That this common council would commend the steamers of the New York and Liverpool U. S. Mail line, to the support and confidence of their fellow citizens, as well as to the liberal encouragement of the General Government." —Proc., App'd by Mayor, XIX: 311-12.

The common council adopts an ordinance for paving Madison Ave. from 26th to 40th St.—Proc., App'd by Mayor, XIX: 295. On Sept. 23, the board directed that the sidewalks on Madison Ave., from 23rd to 40th St., be flagged for a space four feet wide through the centre of, where not already flagged, and repaired where necessary.—Ibid., XIX: 387.

The common council passes a resolution approving an effort now being made by enterprising citizens of New York to establish steam communication between New York and Galway.—Proc., App'd by Mayor, XIX: 330.

The common council grants a lease to Henry Conchohn to establish the foot of 60th St. New York, and also a point at or near Bull's Ferry.—Proc., App'd by Mayor, XIX: 335.

The common council directs that 23d St. between Fourth and Fifth Aves. be paved and the sidewalks flagged.—Proc., App'd by Mayor, XIX: 334. This is only one of the many operations recorded during this period in the process of laying out or improving streets during the northward growth of the city.

"Since the erection of the new iron bell tower in Thirty-third street, which was completed but a few days ago, a bell larger at present than any in this city, and said to be much superior in tone to that suspended in the belfry of the City Hall, has been cast in Boston, and will most probably arrive here sometime this afternoon. Some conception may be formed of its size, when it is known that fourteen tons of metal were used in its casting, and that its weight when cast is fifteen tons and thirty pounds. The ball outside of the bell are the arms of the city, the date of casting, and the following inscription: "Sigillum Civitatis Novi Eboraci." —Ev. Post, Ag 21, 1851.

This was the first iron fire-tower in the city. It was ten-sided, seven storeys (about 100 ft.) high, and the floors were supported by ten iron columns. A circular iron stairway led from the base to a look-out on top. The cost of this tower was $6,000. Its bell was the largest bell on the continent, and fifth heaviest in the world. —Illustrated News, Ja 22, 1853; It 61, with view of the tower. For the second fire-tower, see Ja 22, 1853.

The "America" (see Je 21), a schooner of 170 tons, built in this year by Geo. Steers, New York, and owned by five members of the N. Y. Yacht Club, defeats all comers in a regatta of the Royal Yacht Squadron at Cowes, England.—N. Y. Herald, Ag 29, S 4 and 6, 1851. These owners won a cup which was offered by the Squadron as the prize to be competed for by yachts of all nations, without regard to difference in tonnage, sailing round the Isle of Wight, the usual course for the annual regatta of the Royal Yacht Squadron. The "America" beat eight cutters and seven schooners. Everett, hence, with the cup it has been known as "The America's cup," and, although British challengers have tried repeatedly to win it back, it remains (1926) in undisturbed possession of the N. Y. Yacht Club, to which the winning owners of 1851 presented it on July 8, 1867.—Thompson & Lawson, The Lawson Hist. of the America's Cup (1902).
THE ICONOGRAPHY OF MANHATTAN ISLAND

1851
For full account of the subsequent races, in all of which the cup has been uniformly defended, see ibid., and The American "Cup Races," by Herbert L. Stone, ed. of Yachting (1914).

Pot Rock, in the East River, is being blasted away under the supervision of Monsieur Maillier. — *Evict. Post*, Aug 22, 1851. See also S 18.

A meeting in favour of the present revolution in Cuba is held in City Hall Park. — *Evict. Post*, Aug 23, 1851.

The common council adopts a form of agreement permitting the building of the Eighth Avenue Railroad (see J 50), and directs that one be prepared by the corporation counsel for constructing the Sixth Avenue Railroad. — *Proc., App'd by Mayor*, XIX: 357.

"Mutilating the Park." — The city authorities, who are so slow in providing a place to breathe in up town, are swift to deface and curtail whatever small open plots of ground may have been reserved for the public benefit. They have ordered the northeastern corner of the Park to be given up to engine houses, so that this promenade, already sufficiently circumscribed, is to be encroached upon still more. There is surely room enough in that neighborhood for engine houses, or any other buildings of the kind, without trespassing upon the rights of the people. We suppose that it is too late to arrest the Vandalism, but, at the same time, we should like to know by whose order the iniquity is about to be perpetrated. — *Evict. Post*, S 11, 1851.

An illustration of "The Celebrated Niblo's Hotel, New York City," is published. A description states: "Mid the many and splendid edifices on Broadway, N. York, the magnificent hotel now in progress of erection on the former site of Niblo's Garden, at Prince Street, is one of the most conspicuous and imposing. With a frontage of 300 feet on Broadway, six stories in height, built of the finest brown freestone so much in use for fronts, with heavy carved cornices over the almost innumerable windows, and withal standing on the highest ground in that neighborhood, it is at once a noble and imposing structure." — *Gleason's Pictorial*, I: 397. The new hotel was the Metropolitan Hotel, at the north-east corner of Broadway and Prince St. — L. M. K., III: 979. Niblo's Theatre had its entrance there. — *King's Handbook*, 233, 604. See also S 18.

James Fenimore Cooper died at Cooperstown. — *Evict. Post*, S 16, 1851. On Sept. 24 a meeting of literary men was held at the city hall and a committee appointed to make arrangements for honouring his memory. — *Ibid.*, S 25, 1851.

Diamond Reef, about midway between the Battery and Governor's Island, is being blasted away by Monsieur Maillier. — *Evict. Post*, S 19, 1851.

The first issue of the *New York Daily Times* appears, its publishers being Henry J. Raymond, George Jones, E. B. Morgan, D. St. John, and E. R. Wesley. The firm afterwards was styled Henry J. Raymond & Co. Raymond was editor. A complete facsimile of the first issue was published, on its 70th anniversary, in *The New York Tribune* of Mar 18, 1921.

The common council orders "That all the papers relating to the enlargement of the Battery, together with the opinion of the Counsel to the Corporation, be taken from the table and placed on file, and that the Clerk of this Board be directed to furnish the Street Commissioner with a certified copy of all said papers." — *Proc., App'd by Mayor*, XIX: 649-48. Later in the year, the common council placed a contract with a Mr. Conkling for the extension of the Battery. The work was undertaken and carried on slowly. In 1853, the contract was transferred to George Law, and thereafter the work still progressed slowly until 1865 (q.c., F 6), when the legislature placed the control of this improvement in the hands of the city's pilot commissioners and provided for its early completion. — *Rep. of a Special Committee of the Chamber of Commerce & on the Battery Extension* (1865).

The common council orders that Dey St., from Broadway to Greenwich St., be regulated, that curbs and gutter-stones be set there, and that the carriage-way be repaired. — *Proc., App'd by Mayor*, XIX: 387-58. Valentine says it was widened. — *Man. Com. Coun.* (1865), 544.

The common council appropriates part of Randall's Island (6/3 acres) for the use of the Soc. for the Reformation of Juvenile Delinquents for a new and enlarged house of refuge. It requires that the society shall erect a wall at least ten feet high, and shall convey to the city land purchased by them for a location on Ward's Island. — *Proc., App'd by Mayor*, XIX: 394; *Man. Com. Coun.* (1859), 785; *ibid.* (1874), 762; L. M. R. K., III: 954.

Corner-stone, see N 24, 1852. Permission to sell the premises on the river, between 23d and 24th Sts., and more to other premises, had been given by the board on Feb. 18, 1853. — *Proc., App'd by Mayor*, XVIII: 14-15.

The common council appoints a committee to extend the Hungarian patriot Kosuth a hospitable welcome on his arrival in this city, "in order to show to the world our admiration of the man and of the principles for which he struggled." — *Proc., App'd by Mayor*, XIX: 405.

The common council grants a lease to Alex. H. Schultz, permitting him to run a ferry from the foot of 14th St., East River, to Greenpoint, L. I. — *Proc., App'd by Mayor*, XIX: 400.

The excavations which have been made in the square of land bounded by Centre, Franklin, Elm and White streets, are preparatory to laying the foundation of a structure which will probably be the largest in the city. It is intended for the depot of the New Haven and New York, and New York and Harlem railroad lines, and will cover the whole block. The building will be four stories high and the shape of a hod with columns, pro- piorated to cars and freight, and the upper to offices. The walls above the first story will rest on large granite piers with arches, at the centre wall interspersed with iron pillars crossed by heavy girders, thus leaving the spacious lower story unincumbered by partitions, and well lighted at the sides, and from the windows of the first floor. The cost of the building will not probably be less than $76,000. The architect is Mr. R. G. Hatfield. — *Evict. Post*, O 2, 1851. This was formerly the state arsenal site. — L. M. R. K., III: 923.

The common council resolves that a space forty feet in width, and extending through the middle of the Fourth Avenue, from Thirty-fourth to Thirty-eighth street, be, and the same is hereby, appropriated for the purpose of a public park or pleasure ground, and that the same be laid out, under the direction of the Street Commissioner, in accordance with the general plan herewith accompanied, and that the same be carried into effect, as soon as the Harlem Railroad Company shall have completed the arching of the Fourth Avenue. — *Proc., App'd by Mayor*, XIX: 406-7. The arching of the tunnel was evidently in progress.

The completion of the Hudson River R. R. over the entire route, from N. Y. to Albany, is celebrated. — *Evict. Post*, O 9, 1851. See also O 24.

The common council accepts from Gossip & Co. the gift of a picture of Kosuth, and others identified with him in the Hungarian revolution, and orders that it be placed in the governor's room. — *Proc., App'd by Mayor*, XIX: 427.

The common council orders that the commissioner of repairs and supplies procure "a stone of Eastchester marble," 8 ft. long, 5 ft. wide, and at least 12 in. thick, that it be "sculptured in accordance with the accompanying design," and when completed presented by the mayor in behalf of the city "to the Washington National Monument Association, to be placed in the monument now being erected to the memory of Washington" (in the city of Washington). — *Ibid.*, S 4, 1853; see S 5, 1853. The city appropriated to pay the cost of it. — *Proc., App'd by Mayor*, XIX: 438-39. See O 29.

The common council passes a resolution stating "That in the construction of the important and magnificent work of the Hudson River Railroad [see O 8], the citizens of New York have great cause of congratulation, from the increased travel and additional prosperity, which this great enterprise promises to contribute to the commercial emporium of our state and country." and thanking the officials, engineers, etc. of the company on behalf of the municipal authorities for "the zeal, time and devotion bestowed by them towards the successful prosecution of the enterprise . . . the construction of a direct line of railroad between the cities of New York and Albany." — *Proc., App'd by Mayor*, XIX: 453-54. See also *Daily N. Y. Post*, "Railroad in Am.," 993.

The Hudson River R. R. ran along the west shore of Manhattan Island (see My 6, 1847; S 25 and 29, and D 19, 1849; J 9 and D 4, 1850). Its southern terminus was at College Place (now West Broadway) and Chambers St. (see S 25 and 29; J 9 and D 4, 1850). Here a station stood in 1851 for a view of this, on site of the Gorken building, see the "New Terminal Supplement"
The common council accepts an invitation from Goupil & Co. to attend their exhibition of the picture of "Washington Crossing the Delaware." —Proc., App'd by Mayor, XIX: 457.

The common council orders that 42d St. be lighted with oil, from Fifth to Third Ave.—Proc., App'd by Mayor, XIX: 458.

The common council passes the following resolution: "Whereas, The efforts of a society established in the city of Washington [see O 22], to honor the name of the Father of his country, by the erection of a magnificent national monument to his memory, deserves the thanks, and should receive the cordial co-operation of every American, and corporate body throughout the Union, anewly.

Whereas, The grand structure now in progress is intended to do honor not only to the great patriot to whose memory it is to be dedicated, but is calculated to do honor to the patriotic and grateful feelings of those by whose contributions it is to be erected; therefore

Resolved, That we commend the work undertaken by the Washington National Monument Society [see O 22], to our fellow-citizens, as one peculiarly deserving of liberal aid and generous patronage, and recommend Mr. Daniel Douglass, the authorized agent of the Society, to receive donations for said object, to every inhabitant of this city. . . . —Proc., App'd by Mayor, XIX: 474. See, further, 1857.

We perceive that the Sixth Avenue Railroad Company have already commenced the construction of their road. The pavement has been taken up in Canal street, and in a few days more than a hundred yards of rail will be laid. The rails to be used will be on a level with the surface of the streets, and set between granite blocks similar to those used in the Russ pavement." —Eve. Post, N 7, 1851.

A false cry of fire in Ward School No. 26, in Greenwich Ave., north of Jefferson Market, creates a panic among the children, and causes the death of 50 of them, by their falling from the upper stories down a stairway shaft. The outer doors, swinging inward could not be opened. —Eve. Post, N 21, 1851. This shocking occurrence led to the passage of an act, on Jan. 2, 1852 (q.v.), compelling doors of public buildings to be made to swing outward.

De Voce, in this connection, mentions the public buildings in the immediate vicinity of this market.—Market Book, 571. There is a survey of Jefferson Market, dated 1852, filed as map No. 94 in the real estate bureau of the comptroller's office; and contemporary photographs of it in De Voce's scrap-book of views, at the N. Y. Hist. Soc.

The common council orders that the land on Fifth Ave., between 45th and 56th Sts., heretofore granted to the corporation of the Church of St. Peter, be once more transferred to the corporation of St. Luke's Hospital (see My 1, 1850), when the latter shall procure the written assent of the corporation of Trinity Church, under seal, and deposit it with the city comptroller, and shall also make an agreement with the common council to complete the building of its hospital within two years from this date.—Proc., App'd by Mayor, XIX: 512.

The corner-stone of the "Marble Collegiate Church" is laid at the north-west corner of Fifth Ave. and 29th St.—De Witt's Discourse (1857), 91, where the church is fully described. For its dedication, see O 11, 1854.

Louis Napoleon executes a remarkable coup d'etat, by which he abolishes all opposing leadership and makes himself, though nominally president, an absolute sovereign. He dissolved the assembly, with changes in the ministry, and transferred the law court of first instance from Paris to Coram, and gave him more power. The troops were called out to put down all opposition and on Dec. 4, occurred the famous "massacre of the boulevards," in which over 150 were killed and a large number wounded. All who appeared dangerous to him were either exiled or imprisoned.—Hazen, Europe since 1815, 203-5, 350.

The eastern and western gates of the Park are in a dilapidated condition, and not sufficient width for the transit of the passage of the military and other bodies, on occasions of public processions." It is resolved by the common council "That the Commissioner of Repairs and Supplies, cause new gates to be built, at least thirty feet in width between the columns at the eastern and western sides of the Park, and that the expense thereof be taken from the appropriation for the...—Proc., App'd by Mayor, XIX: 512.

The U. S. mail steamship "Humboldt" reaches Staten Island at 2 o'clock this morning, having on board the Hungarian patriot, ex-Gov. Louis Kossuth, Madame Kossuth, M. and Madame Pulszky, an aide-de-camp, and secretaries. Kossuth is greeted amidst the...—Proc., App'd by Mayor, XIX: 512.
This was printed in 1852. It reviews the principal changes and important events.

The common council orders that Washington Market be rebuilt on its present site, after plans **therefore prepared by Frederick A. Peterson.** The board adopts these plans with amendments. One of these is **"That the tower . . . be changed from the Washington street to the West street front."** The sum of $375,000 is appropriated for this improvement, to be raised by loan in accordance with the act of June 28 (g. v.), which created the fund called **"Public Building Stock No. 3.** The new market is to be commenced in Feb., 1852.—*Proc., App'd by Mayor, XIX: 583. See, however, 1852.

The common council directs the clerk to purchase from John Doughtet, Jr., 100 copies of the reprint of **"The Directory of 1768"** provided the cost is not over 37½ cents a copy.—*Proc., App'd by Mayor, XIX: 583-86.

**1852**

During 1852-1853 and 1854-1856, Gladsome was chancellor of the exchequer, and **"in this capacity was winning the name of the greatest finance minister since Peel, and was laying deep the foundations of his later power."**—*Hazen, Europe since 1815,* 459.

In this year, Henry Giffard built a cigar-shaped dirigible airship, the forerunner of the modern **"dirigible."**—*Scientific American,* Je 5, 1865.

In this year, Merritweather, a California gold miner, invented the hydraulic system of mining gold.—*Ibid.*

In this year, the first power elevator was installed by Elisha Graves Otis. In 1853 (q. v., Jl 14), he exhibited at the Crystal Palace the first elevator with a safety device to prevent the car from falling if the cable should break.—*Ibid.*

In this year, William Perris published the first of a series of maps of New York City, from surveys made under the directions of the insurance companies of the city. They show, from year to year, not only the progress of the city in its northward growth, but also the character of the building construction, different water-colour tints indicating the type of construction, and the consequent degree of fire hazard. They continued in 1854-5, 1857, 1859, 1862. See also descrip. of Pls. 138 and 138A, III: 706-7.

A map of the city’s parks, squares, places, etc., showing areas, bears this date.—See map No. 1291 bureau of topography, borough president’s office.

In this year, John J. Serrell made three surveys of as many sections of the Common Lands.—See map No. 150 in real estate bureau of comptroller’s office. See, further, XIX: L. E. I.

In this year was published by T. C. Fanning *Phelps’s New York City Guide: being a pocket directory for strangers and citizens to the prominent objects of interest in the great commercial metropolis, and conductor to its environs. With engravings [wood-cuts] of public buildings. It contains a large folding map. Later issues appeared in 1854 and 1857.

In this year John F. Tow wrote the publication of the *N. Y. City Directory* with which his name has since been connected.—*Derby, Fifty Years among Authors, Books and Publishers* (1884), 659.

In this year, the brownstone building on Chambers St., at the north-east corner of City Hall Park, now known as the city court house, was completed.—See date in the stone-work on the front of the building. For its origin, see resolution of Je 5, 1852; L. M. R. K. III: 937. It appears in views: Pl. 155-a, and A. Pl. 28-c, Vol. III.

In this year, the cobble-stone pavements were being extensively removed to be replaced by the Russ pavement or Belgian blocks.—*Haswell, Reminiscences of an Octogenarian,* 482. See also 1849.

The report of the comptroller for this year shows 17 municipal ferries in operation, all leased to some individual or company for a period of years at a fixed rental per year. The largest rental is $25,000, paid by the lessee of the Fulton Ferry between Fulton and Whitehall Sts. Jacob Sharp, whose name became infamous in connection with his attempts to secure street railway franchises by corrupt methods, is the lessee of the Wall St. Ferry, at $5200 per year. The comptroller feels that ferry privileges ought to hold a larger revenue, and that the ratio of increase ought "at least to keep pace with the growth of the city, and the surrounding country having intercourse with it, through the medium of the ferries." Unfortunately, he says, the ferry leases which he has examined "do not contain any provision for making reports to the Corporation in regard to the amount received annually for ferriage, or any particulars respecting the operations of the ferry, which would enable the Corporation to fix a value to its property, or the amount of rent to be exacted on a renewal of the lease. The sums received at the several ferries, which are connected with this city, indicating the number of persons passing to and from the city, would be interesting and valuable as a statistical fact merely; and as the sure means of ascertaining the value of the city property, these returns are indispensable," and should always be required. **"In all cases where the ferry services have been reserved or are owned by the city, the rents when leased, or on renewal of a lease, ought to be fixed by a sale of the ferry privilege at public auction. The provision in the lease to have the boats valued at the close of the term, would secure all the equitable rights of the original lessees, and the competition would protect the interest of the city. The revenue arising from ferries is pledged to the public creditors for the payment of interest, and it is incumbent on the Trustees of the Sinking Fund to use every effort in their power to improve this source of revenue."**—*Comptroller’s Report* (1852), 11-12.

The Metropolitan Hotel (see S 1), on part of the site of Niblo’s Garden, at the cor. of Broadway and Prince St.; the City Hotel, at 429 Broadway; the Am. Art Union, at 479 Broadway; the St. Nicholas Hotel, at the south-west corner of Broadway and Spring St.; the Prescott House at the north-west cor. of Broadway and Spring St., the Albion Hotel, at 769 Broadway; and the St. Denis Hotel, at the south-west cor. of Broadway and 11th St., all date from this year.—*Man. Com. Coun.* (1865), 655, 652. The Metropolitan Hotel was under construction in Sept., 1851 (g. v.).

In this year, Corporal Thompson’s road-house, known as Madison Cottage (see 1850), at the north-west cor. of Broadway and 254 St., was demolished.—L. M. R. K., III: 978. There is a rare lithographic view of it in this year, in the collection of Edw. W. C. Arnold. For the next building on this site, see Mr. 19, My 2, 1853.

In 1852-3, "Chelsea," where, in 1822, Clement C. Moore wrote **"Twas the night before Christmas"** (see Ag 16, 1759; D 23, 1853), was torn down when the bluffs along the river were being levelled and the water lots filled in.—*Landmarks of N. Y.* ed. by Peterson (pub. by The City History Club, 1857), 705 cf. *Man. Com. Coun.* (1854), 576.

In this year, an effort was commenced, which extended over many years, to obtain rapid transit in New York City. This first attempt was by the introduction of a bill in the legislature by John Schuyler.—*The Great Need,* pub. by the N. Y. Rapid Transit Assoc., 1856 (in N. Y. P. L.).

In this year, the Am. Geographical and Statistical Society was organized. The legislature gave it a special charter on May 12, 1854. It occupied rooms in the N. Y. University, in University Place.—*Man. Com. Coun.* (1856), 676. See Ap 1854.

In this year, Albany St. was extended from Greenwich St. to Trinity Place, in the rear of Trinity Church, at a total cost of $1, 862,634.—*Man. Com. Coun.* (1854), 590. This extension gave encouragement to the attempts, begun in previous years (see 1813 S 25, 1823; Ja 28, 1831; 1847), to extend Albany St. through Trinity churchyard to Broadway. **"It was the determined purpose of a few property owners in the neighborhood, to agitate for the extension. . . . The public sentiment was as strongly against this invasion of a churchyard as twenty years before. Many of the city officials were opposed to the project. So high ran the state of feeling upon this matter that a public meeting was held"** on June 8 (g. v.) to oppose it.—*Dis. Hist. of Trinity Church,* IV: 173-74.

An oil painting, depicting Broadway at Grand St. in 1854, owned by the N. Y. Hist. Soc., is reproduced and described as Pl. 149, Vol. III.

A Currier & Ives lithographic view of the Harlem River, reproduced and described as Pl. 157-b, Vol. III, bears this date.

In this year, J. W. Hill drew a view of New York, which is reproduced as Pl. 144, Vol. III. In 1855, it was engraved by Sigmund Himly and also by C. Mortram.

In Valentine’s *Manual for 1852* were published a map of the city, 1851, and a view of Castle Garden, p. 125.

For view, in 1852, of the old stone house at Turtle Bay, where the Liberty Boys, led by Willet, seized the king’s stores, see *ibid.,* (1857), 192.

In this year, a new Gouverneur market-house, the third on the —
CHRONOLOGY: INDUSTRY AND EDUCATION: 1832-1860

Mr. Riddle and his associates the use of Reservoir Square, about 400 feet square, for the erection of a Crystal Palace, in which to make their contemplated exhibition of the Industry of all Nations. They have also appropriated funds for flagging the square, and to sustain a complete constabulary and fire department during the period of the exhibition. The lease runs for five years, at the annual rent of one dollar a year.—Eve Post, Ja 28, 1852.

"The fountains in Washington Parade Ground and Tremont Park are both completed, and make a great improvement in the appearance of both those places. The borders of the basins of both fountains are constructed of blue stone, and not of white marble, like that of the Park fountain, over which, however, they have the advantage of a larger number of jets... The diameter of the basin of the Washington Square fountain is one hundred feet, twenty feet less than that in Tremont Square. The amount expended in its construction was $2,000."—Eve Post, Ja 31, 1852. The fountain in Washington Square was begun in Aug., 1851.—Ibid., Ag, 1851.

Gleason publishes a plan of the building about to be erected in New York for the purpose of holding a World's Fair, similar to the recent exhibition in the Crystal Palace, London. He says: "The locality is not yet definitely settled upon, but it will be in one of the up-town squares of the city. Its length is to be 660 feet, its width 150 feet, its height 100 feet. The materials employed will be glass and iron, but the roof will be brick."—Gleason's Pictorial, II: 101. See also desc., of Pl. 141-a, III: 709.

In his annual report to the common council Comptroller Flagg offers suggestions in regard to the propriety of requiring the city railways "to give to the public, in some form, an equivalent for the very valuable privileges secured to them by the agreements under which they enjoy a monopoly, so far as railroad travel is concerned, of the most important portion of an avenue. For this privilege, the company might be required to keep the entire avenue paved between the curb stones, and clean the street. This would be a moderate compensation to the public for furnishing to the company not only a graded line for the road, but a thoroughfare already filled with more passengers than they can accommodate. In all cases of extending the street to the Park, each railroad company, as a condition of its extension, ought to be required to pay the expense of grading and paving the avenue, in proportion to the number of feet occupied by its double track. And the public ought to have the benefit of all revenue beyond ten per cent., in a reduction of fare; or, a direct annual revenue might be exacted, which would go to lessen taxation on the city.

The great avenues of the city, render valuable equivalents to the public for the privilege of laying their rails on the graded avenues. And yet these roads, affording such great facilities to the trade and commerce of the city, are placed on a different footing from the city railroads. Take for example the Hudson river railroad; at an expense of ten millions and a half of dollars, its stockholders have prepared a road which brings the commercial and political capital of the state within four hours of the Hudson river, each railroad company, as a condition of its extension, ought to be required to pay the expense of grading and paving the avenue, in proportion to the number of feet occupied by its double track. And the public ought to have the benefit of all revenue beyond ten per cent., in a reduction of fare; or, a direct annual revenue might be exacted, which would go to lessen taxation on the city.

Accordingly, the legislature passed, on 23d [error for 21st] of July, 1853 [pl. 9], an act for taking the ground now known as the Central Park,—1st Ann. Rep. on the Improvement of the Central Park (1853). The common council appropriates $500 to procure a portrait of David T. Valentine, clerk of the board, to be placed in the city hall. Valentine, for nearly a quarter of a century, has "devoted his superior energies and talent to the service of the city,...”—Proc., App'd by Mayor, XIX: 604-5.

The common council directs the corporation council to prepare a memorial to the legislative assembly for the passage of a law which shall provide "that all outside doors to school houses, and other buildings used or frequented by the public... shall open outward, and that all the inner doors to every building used as a public school, shall also open outward from the room of the same; and for such other restrictions as may be deemed, by said Legislature, proper and necessary, for the protection of the lives of those who may frequent said buildings, in case of alarm by fire or other cause." This is prompted by the calamity in the "Greenwich avenue school building" (see No 29, 1851).—Proc., App'd by Mayor, XIX: 610.

The common council orders the closing of the old Eastern Post Road "from the point where it is now closed," at 23d St, to "the point where said road intersects with Third avenue" at 66th St.—Proc., App'd by Mayor, XIX: 695.

A view of Castle Garden from the river is published in Gleason's Pictorial, II: 74.

"We understand that the Common Council have granted to

400 feet square, for the erection of a Crystal Palace, in which to make their contemplated exhibition of the Industry of all Nations. They have also appropriated funds for flagging the square, and to sustain a complete constabulary and fire department during the period of the exhibition. The lease runs for five years, at the annual rent of one dollar a year."—Eve Post, Ja 28, 1852.

"The fountains in Washington Parade Ground and Tremont Park are both completed, and make a great improvement in the appearance of both those places. The borders of the basins of both fountains are constructed of blue stone, and not of white marble, like that of the Park fountain, over which, however, they have the advantage of a larger number of jets... The diameter of the basin of the Washington Square fountain is one hundred feet, twenty feet less than that in Tremont Square. The amount expended in its construction was $2,000."—Eve Post, Ja 31, 1852. The fountain in Washington Square was begun in Aug., 1851.—Ibid., Ag, 1851.

The common council orders the closing of the old Eastern Post Road "from the point where it is now closed," at 23d St, to "the point where said road intersects with Third avenue" at 66th St.—Proc., App'd by Mayor, XIX: 695.

A view of Castle Garden from the river is published in Gleason's Pictorial, II: 74.

"We understand that the Common Council have granted to
THE ICONOGRAPHY OF MANHATTAN ISLAND

1840

(1852) chap. 56. See Ag 26.

The estimated cost of extending Liberty St. from Broadway to Greenwich St. is $195,216.92.—Man. Com. Cown. (1857), 539

"It appears that during the past eleven months, there have been erected in the Sixth and Tenth Wards, 1,500 new buildings in the Seventeenth and Eighteenth, 500; and in the remaining wards, 600, making a total of 2,600."—Even. Post, Mr 22, 1852.

The legislature incorporates "The New York Exchange Co." Among the incorporators are Jas. Boorman, Moses Taylor, Wm. W. De Forest, Robert B. Minturn, Wm. H. Astor, John Ward, Wm. S. Underhill, etc. Among the powers granted to them, they "may purchase, hold and convey the parcel of land and buildings situate in the city of New York, now known as the Merchants' Exchange, bounded by Wall, William and Hanover Sts. and Exchange Place, for the purpose of an exchange, and, when they have purchased the same, may receive the rents and profits thereof, and divide the same among the stockholders." The capital stock, divided into shares of $100 each, shall not exceed $1,000,000. Stockholders in the present "Merchants' Exchange Co." are to be given preference in making subscriptions to the stock of the new company.—Laws of N. Y. (1852), chap. 104. See D 14, 1850. This was evidently an organization supplanting the earlier "Merchants' Exchange Co." which, on July 10, 1851, was authorized by the legislature to reduce its capital stock, and to borrow money to pay its debts.—Ibid. (1852), chap. 477.

A new St. Thomas's Church on the site of the old (see Mr 2, 1821) is consecrated.—N. Y. Herald, Ap 4, 1852. See also N. Y. Times, N 25, 1852; L. M. R. K., III: 934. On Aug. 2, 1863, the church was reported as sold for $775,000 to a Broadway clothing-house, which intended, after May 6, 1866, to erect a large store there.—N. Y. Times, Ag 2, 1865. The Cable building now covers the site.

The legislature incorporates the N. Y. Academy of Music, the purpose of which is to encourage and cultivate a taste for music "by concerts, operas and other entertainments which shall be accessible to the public at a moderate charge, by furnishing facilities for instruction in music, and by rewards or prizes for the best musical compositions." Its capital stock shall be $200,000, which may be increased to $300,000. The stock is to be divided into shares of $1,000 each.—Laws of N. Y. (1852), chap. 212.

"The valuable estate at Harlem, known as the 'Milledoler property,' is to be sold at the merchants' Exchange, by A. J. Bleeker, on Wednesday next, 14th inst. This is the first large parcel of land that has been offered for sale as a small and finely cultivated garden for the purposes of promenade and the partaking of refreshment. Niblo's Theatre has always been a popular and fashionable resort. The theatre has a light and graceful appearance, the interior columns and tier fronts being of iron, and is well finished and tastefully decorated. Instead of the old fashioned pit, it has a parquet which has become the favorite part of the house for gentlemen, and is much frequented by ladies. There are seats in the whole house for about three thousand persons, and the means of egress are the best of any public saloon in town; all the doors are spacious, and open outward, and the lobbies are roomy and cool." The dimensions of the theatre are length, 140 ft.; breadth, 84 ft.; height, 45 ft. An engraving shows the interior of the garden.—Glenzow's Pictorial, II: 145. For brief summary of the description of this property, see "Niblo's Garden," L. M. R. K., III: 989, and "Metropolitan Hotel," ibid., III: 979.

The capital stock, at $100 a share, is not to exceed $500,000.

The purpose is to erect a building at a cost not to exceed $200,000; to enter into contracts with persons desiring to make exhibits; to charge an admission fee of not over 50 cents; to distribute among the most eminent artists to "sell the building when the object of the corporation is attained; and to distribute equally among the stockholders the net proceeds from entrance fees and the sale of the building. The corporation shall continue not over five years.—Laws of N. Y. (1852), chap. 56.
CHRONOLOGY: INDUSTRY AND EDUCATION: 1842–1860

1841

May

In May, the city council ordered the demolition of the five-storey building that housed the Theatre Royal on the corner of Elm and White streets. This building would cost, when completed, $8,900. It is intended, particularly, as a rendezvous for the military in time of riot, and will be capable of containing three thousand men, although it will be so constructed that fifty men may be sufficient to defend it in case of attack. The Armory will cover a space of ground 130 feet by 84, will be defended by four towers, and covered by atrusted iron roof.—*Even. Post*, Ap 23, 1852.

The common council accepts a proposal from Sherry & Byram to furnish a clock for the cupola of the city hall.—*Proc., App'd by Mayor*, XX: 213. A warrant for $745 in favour of this firm was ordered drawn, Oct. 25, 1852.—*Ibid.*, XXI: 467.

The N. Y. & New Haven R. R. is opened for business throughout its entire length.—From chart, supplied by the company.

**Lyceum Theatre.**—Adeline Patti, the child, who at eight years of age, sings Jenny Lind's songs, note for note, with the fair nightingale herself, and executes the most brilliant vocal passages in perfect style, is to sing at this beautiful theatre to-morrow evening [May 12]. The most accomplished musicians and critics have confessed their wonder and admiration of this gifted child, and we have no doubt her success will be commensurate with her great ability.—*Even. Post*, My 11, 1852.

"A Bird's Eye View of the City of New York" is printed in *Gleason's Pictorial*, II: 308.

**Mr. Brady,** the postmaster of this city, has obtained a renewal of the lease of the premises now occupied by the Post Office, for a period of four years from May last, for the yearly rent of $200.—*Even. Post*, My 22, 1852.

A public meeting is held at the city hall, presided over by Mayor Kingland, at which addresses are made showing why a proposal to extend Albany St. through Trinity churchyard to Broadway should be approved. The latter use of the ground for burial purposes for over two hundred years, especially during the Revolution, is mentioned. A preamble and resolution are adopted, setting forth these facts and requesting the corporation of Trinity Church to erect "a becoming monument, with appropriate inscriptions, to the memory of those great and good men," who suffered imprisonment and death from neglect in the old sugarhouse prison on Liberty St.

An attested copy of these proceedings being communicated to the vestry, a committee of the vestry was appointed on June 14 to consider the subject. A favourable report was made on Nov. 8 (p. 2).—*Dix, Hist. of Trinity Church*, IV: 372-75.

**Frances Tavern,** a five-storey building now called the Broad Street house, kept by E. Beaumeyer as a hotel, is seriously damaged by fire. The building was destroyed, the intention was almost completely burnt out, and the walls on the Pearl Street side crumbled down so far as the top of the second story. The old floor beams of the lower two stories were not destroyed. One man was burnt to death, others jumped from windows, or were rescued by firemen.—*Ann. Rep.*., Am. Scenic & Hist. Pres. Soc. (1897), 71, citing the *Com. Adv.* and *Even. Post*. See 1854.

Albini makes her American debut, in a concert at Metropolitan Hall. She is ranked second only to Jenny Lind.—*Even. Post*, Je 24, 1852; *Brown, Hist.*, IV: 425. Her first appearance here in opera took place at the Broadway Theatre on Dec. 27.—*Ibid.*, I: 394.

The corner-stone of the new American Bible House is laid at Fourth Ave. and 9th St.—*Even. Post*, Je 24 and 25, 1852; L. M. R., III: 925.

The common council is convened, and hears a special message from Mayor Kingland, regarding the death of Henry Clay. Eulogies are delivered by several aldermen, including Wm. M. Tweed, at this time the youngest member of the board.—*Obsequies of Henry Clay* (1852).

The New York branch of the Young Men's Christian Association is established.—14th Ann. Report of the T. M. C. A. (1905), 2. For a brief account of its initial development, see *Man. Com. Coun.* (1856), 56-54. The president was Prof. Howard Crosby, the librarian, Benjamin Lord. For the association's American origin (in Montreal), see D 29, 1851. The parent association had been formed in London. For names of several of its first members in New York, see *Lossing's Hist. of N. Y. City*, 626.

The cenotaph anniversary of the opening of St. George's Church, in Beeemank St., is celebrated.—*Even. Post*, Ji 2, 1852.

The body of Henry Clay is brought to New York from Philadelphia. The coffin, shrouded in cape, is exposed to view in an open hearse drawn by eight grey horses, appropriately caparisoned with black plumes, etc. It is deposited upon a cenotaph in the governor's room in the city hall, and left in care of the Washington Greys, who acted as guard of honour from Philadelphia. On Sunday, the 4th, over 30,000 persons visited the city hall to view the remains, where a few years before Clay held a popular levee. The next morning, the coffin was taken on board a boat at the foot of Murray St. and conveyed to Albany; thence it was taken by way of Buffalo and Cincinnati to Kentucky.—*Gleason's Pictorial*, III: 76, 104-5; *Obsequies of Henry Clay Report of the Committee of Arrangements* (pub. by the board of ald., 1852). See also Ji 20; descript. of Pl. 140, III: 708; and *N. Y. Times*, Ji 21, 1852.

Kossuth leaves America by steamship from N.Y. —*N. Y. Times*, Ji 15, 1852.

Thos. Sharp and others petition the board of aldermen "for the privilege of laying down a railroad in Broadway, from the South Ferry, through Whitehall street, Broadway, to and through the Bloomingdale road to Manhattanville." Instead of being referred to the committee on streets, as would be natural, the petition is referred to a "Special Committee" of five, which the president of the board appointed.—*Proc., Bd. of Ald.*, XLVII: 117-19. Under the caption "Another Railroad Job On Hand," the *Tribune* editor warns "tax payers and other sufferers" to "lookout for tricks." Hardly had the clerk completed the reading of the document, says he, "when a violent strife arose as to who should boss the job." This "eager interest" on the part of the board "develops the idea of reward, &c., and it is impossible that the concern will go through with Eight-av. speed."—*N. Y. Tribune*, Ji 17, 1852.

When the matter was under consideration, the board was met with petitions both for and against the presence of a railway in the city's most crowded thoroughfare. Resolutions granting the original petition were adopted, on Nov. 19 (p. v.), and returned with Mayor Kingland's veto on Dec. 18 (p. v.).

Funeral ceremonies, consisting of a great civic and military procession and an oration by an N. B. Blunt, are held in honour of Henry Clay. The lower part of the city is draped in mourning.—*Even. Post*, Ji 20 and 21, 1852. See also descript. of Pl. 140, III: 708.

A Tribune editorial reads in part: "The corruption of the Common Council, we are sure, never before approached its present depth and magnitude. The care of the public health is neglected for the sake of a wretched political intrigue; bribes are offered and taken with an openness of unblushing impudence for which the records of municipal dishonesty, though ample, can offer no parallel; the public treasury is held to exist only that it may be drained by the most outrageous jobs; the Aldermen, sworn officers of the law, magistrates even, who sit upon the bench of justice, are leagued with the lowest ruffians, and screen their friendly bullies from the inflictions of justice; and all sense of decency, and the control of public opinion, and the exposures of the press are mocked by our municipal rulers with a reckless and hardened contempt worthy only of depravity the most abandoned."—*N. Y. Tribune*, Ji 28, 1852.

By this time, "Stuyvesant Square" (Cooper Park) had been opened, between Third and Fourth Aves. at 7th St., at an estimated cost of $1,965.12. —*Man. Com. Coun.* (1857), 359.

The *Tribune* editor makes a strong appeal for reform in the "Primary Meetings." At present, he says, they "destroy genuine democracy (no matter in what party) and give us as their mistresses of blackguards. The great mass of honest, quiet, industrious, thrifty citizens have only the dudiluse semblance of a voice in the choice of their municipal rulers. Long before the Election, a set of birching bullies and grog-shop rowdies have carried the Primary
Elections of both parties for those who bid highest for their services, and have so 'fixed things' that one of their two sets of candidates must be elected. If you undertake to kick against the candidates they have massed in your own party, you find that the set up on one side are no better, and may be even worse so you gain nothing by voting for them but the odium of having defeated your party. And so we drag on from year to year, sinking deeper and deeper into the ooze of corruption, the slime of profligacy, until our City has become a byword for misgovernment and the scandal of Republican institutions." He declares that the present common council is "universally regarded as the most corrupt and profligate ever known even in the annals of this sorely misguided and plunderedemporium. We doubt whether its equal in profligacy, vileness and general rottenness could be found on the face of the earth. Everybody executes it, no one but its paid organs, the sharers of its plunder, thinks of defending it, and even these do it as gieagly as an ass eats thistles."

The remedy proposed was a party registration book in each ward and a direct primary election by ballot on the basis of that registration.—N. Y. Tribune, Aug 2, 1852. This editorial is remarkable for its suggestion of the direct primary program which has become quite fundamental in our political life of the twentieth century.

The common council orders that the curb of streets and lamps canals be removed, to be lighted with gas without delay.—Proc. App'd by Mayor, XXI: 404.

The Sixth Ave. surface railroad is completed to 50th St., and the first cars are run thereon. This is "the first exclusively City Railroad ever built in New-York."—N. Y. Tribune, Aug 11, 1852.

Stage drivers on Sixth Ave. show their dislike for the new street cars; they "seriously hinder the cars by purposely driving across the track, or stopping upon it in such a manner as to make it almost impossible to prevent a collision." The Tribune "cannot believe that such conduct is sanctioned by stage proprietors, since it tends materially to injure the side of any new railroad controversy."—N. Y. Tribune, Aug 21, 1852.

"The City Fathers," says the Tribune, are "brushing up for the September session"; they will appear in a few days "upon the broad tops of the City Hall and of the sacred porches of the Room from [see J. G. 5, 1851], the scenes of their moral and physical glory. The corridors of the Hall have been remarkably silent for the past three weeks, and the hangers about there complain that the place is intolerably dull; there is no bribery, no bullying, no vote-buying, no juggling of contracts, no fun whatsoever to enliven the sultry hours. . . . Probably the most important business of the session will be that in relation to the coming election; and will be transacted over the champagne and game of the Tea Room."—N. Y. Tribune, Aug 23, 1852.

The "Assn. for the Exhibition of the Industry of all Nations" (see Mr 12) begins to enter into contracts for the construction of the "Crystal Palace" on Reservoir Square (now Bryant Park). The contracts for masonry were given out Sept. 4; and the iron work as completed for Sept. 15. New York Crystal Palace, Geo. Carstensen & Chas. Gilde.meister, the archits. (N. Y., 1854), 12; descrip. of Pl. 141-a, III: 709. See O 30.

The Autor Place Opera House, whose prestige suffered from the riots of 1849 (q. u., My 7 and 10), is rechristened the New York Theatre.—Eve Post, Ag 30 and 31, 1852; King's Handbook, 579-80.

The Eighth Ave. surface railroad is opened from Chambers to 51st St.—Eve Post, Ag 27 and S 1, 1852.

The Metropolitan Hotel is opened on the north-east corner of Broadway and Prince Sta., formerly the site of Niblo's Garden (1828). It cost $1,000,000, and is said to stand at the head of all hotels in the world in point of elegance, comfort, and convenience.—N. Y. Herald, S 1, 1852; Haswell's Reminiscences, 481; Man. Com. Coun. (1863), 631; M. R. K., III: 979. It is described in Eve Post, Ag 21, 1852.

Brougham's Lyceum, at 48h Broadway (see D 23, 1850), is opened by James W. Wallack as Wallack's Lyceum, having been renovated and refitted.—Eve Post, S 9, 1852; Brown's Hist. of the N. Y. Stage, I: 477.

The Legislature.-These are ordered to be removed from Broadway.—Eve Post, S 9, 1852.

"A number of gentlemen of this city, of social character and standing, not partisans, have organized a City Reform League, with the avowed object of securing the election of honest and capable men to the several branches of our municipal government." Sept.

John Harper of Harper & Bros. is president.—Eve Post, S 24, 1852.

"Billy Bowlegs," the celebrated Seminole chief, is in town with several other chiefs of his nation.—Eve Post, S 24.

Mme. Henriette Sontag, the great German singer, gives her first concert in America, at Metropolitan Hall.—Eve Post, S 27 and 28, 1852; Lossing, Hist. of N. Y. City, 11: 682. At this period, Youle's shot-tower, at the foot of 54th St, East River, was in active operation. For a contemporary view and detailed description of it, see Gibson's Pictorial, III: 224 (O 2, 1852). It had been purchased in 1849 by Thos. Ouy Le Roy & Co. from Commodore Vanderbilt, according to a letter of Sept. 12, 1852, from E. A. Le Roy, of Greenwich, Conn., formerly a partner in that firm. See also descrip. of Pl. 102-a, III: 599; L. M. R. K., III: 983.

"During the last twelve months several hundred square feet have been taken from the green spaces of the Park for so-called improvements. The grass plots immediately in front of the City Hall, have been diminished one-half their former area, on the pretense that there was not sufficient room for military review; and the iron railings on the east side are in process of demolition to widen the street by a further innovation on our public pleasure ground. The Park, in fact, is rapidly becoming a public thoroughfare for ever so many uses, and for every kind of vehicle whatever. A number of carriages which are to be seen almost every day before the City Hall, it will soon be converted into a regular backstreet."

"The first outrage that was committed on the public was the erection of the little free-stone temple, which nothing but the worst taste could have suggested. . . ."

"The space at the rear of the Hall of Records is occupied by building material, which have been lying there now for a period of twelve months, and still the day of their removal seems as distant as ever; and, in addition to all these grievances, it appears that the Common Council intend widening Broadway, by taking a still more extensive slice off the western side. Is there no power that can put a stop to these disgraceful encroachments?"—Eve Post, O 12, 1852.

Daniel Webster dies at "Marshfield," his home in Massach.utes.—N. Y. Herald, O 25, 1852, and passim.

The first iron column of the Crystal Palace (see Ag 26) is erected, with appropriate ceremonies.—Eve Post, O 28, 1852; N. Y. Crystal Palace, by Carstensen & Gilde Meister, 12; Leslie's Weekly, VII: 305-9 (O 9, 1859); descrip. of Pl. 141-a, III: 709.

In this month, Commodore M. C. Perry (a brother of the victor on Lake Erie), sailed with ships-of-war on an expedition to Japan, and, after instructions from Pres. Fillmore, to open friendly negotiations leading to a treaty of amity and commerce with that country. The mission was successful, and the treaty was signed on March 31, 1854 (q. u.).—Lossing, in Harper's Popular Cyc. of U. S. Hist., 1: 710.

"Martha" is produced for the first time in America, at Niblo's Garden.—Brown, I: 185; N. Y. P. L. Bulletin (1957), 887.

Franklin Pierce and Wm. R. King, Democrats, are elected president and vice-president over the Whig candidates, Winfield Scott and Wm. A. Graham.—McKee, National Conventions and Platforms, 74-86.

Jacob A. Westervelt is elected mayor.—N. Y. Herald, N 5, 1852. He succeeded Ambrose C. Kingsland (see N 5, 1850), taking office on Jan. 1, 1853. He was succeeded by Fernando Wood.—See N 7, 1854.

The 100th anniversary of the initiation of Washington into the Masonic Order is celebrated by the Masons at Metropolitan Hall.—Eve Post, N 5, 1852.

"Trinity vestry (see Je 8) adopts a resolution declaring the intention of the corporation 'to erect a suitable monument in memory of the officers and soldiers of the Revolution who died in British captivity in the City of New York, many of whom are buried in the north part of Trinity Churchyard opposite to Pine Street.' Plans and estimates were obtained, and $5,000 voted for the purpose.—Dis, Hist. of Trinity Church, IV: 374-75. See, however, D, 1852. The monument was not erected until 1850 (q. u.), after repeated attempts were made by interested speculators to extend Albany St. through the north end of the churchyard to Broadway opposite Pine St."

". . . The entire length of Broadway seems to have been measured for a new suit of marble and freestone—six and seven
1852
Nov.

Story buildings going up on its whole length, of most magnificent elegance in style. The far-famed Metropolitan Hotel [see S 1] with its multiplied splendors of furniture and luxurious elegance, is to be outdone by still another Broadway hotel, now half constructed, and already presenting, with its snowy front of white marble, a most striking architectural picture—we refer to the St. Nicholas [cor. of Spring St.—Man. Com. Coun., 1865, 621]. Indeed public and private buildings are going up in all directions (and especially in the Fifth Avenue) with Aladdin-like splendor and celerity. —Gleason’s Pictorial, III: 317 (N 1, 1852).

A special committee of the board of aldermen reports in favour of permitting a horse-car to run down Broadway. At this time the omnibuses on Broadway numbered two-fifths of all the vehicles moving on the street.—Doc. 57, Bd. of Ald., N 15, 1852.

A funeral pageant, with military and civil procession, and religious ceremonies at Metropolitan Hall, including an oration by Jas. T. Brady, is held in honour of the late Daniel Webster (see O 24).—N. Y. Herald, N 17, 1853; Rep. of the Com. of Arrangements, etc. (parh. by resolution of the Bd. of Ald., Jl, 1853). See also descrip. of Pl. 149, III: 708.

"Mr. Thackera—This gentleman will arrive here this evening, and begin his lectures on Friday [Nov. 19, 7 p.m.], at Mr. Bellow’s church. A London paper states that he is to be paid two thousand dollars for his course, by the Mercantile Library Association.—Eve. Post, N 16, 1852.—Wid. Eyre Crowe.—Mr. Crowe, who was Thackera’s amanuensis on his American tour, has illustrated this volume of reminiscences with numerous pen-sketches, after the manner of Thackera himself. Among them are the following little views of places and events in New York: Mr. Bancroft lecturing before the N. Y. Hist. Soc., dated “Dec. 52” (p. 79); Rev. Theodore Parker preaching "the Tabernacle" (the Broadway Tabernacle), Jan. 25, 1853 (p. 41); the unfinished front of the Lafayette Hotel, Nov. 1852 (p. 53); Broadway, at the upper corners of Chambers St., showing the Irving House on the west side and Stewart’s store on the east side (p. 53); the south-east corner of the iron fence of the Park, and Barnum’s Museum (p. 58); Wall St., Dec. 19, 1852 (p. 78); sleighing-stages, drawn by four horses, and having a plate report from where the conductor may stand when collecting fares (pp. 88 and 89); the Tombs Prison (pp. 90 and 91); the entrance front of Clinton Hall (p. 96); Broadway fashions, April 6, 1853 (p. 163); etc. These and many other features of New York and other cities are described. While in New York, Thackera stopped at the Clarendon Hotel, at the s.e. cor. of Fourth Ave. and 18th St.

The common council passed a vote of commendation on the western side, between the Bowling Green and State street, so as to make the street seventy feet wide, in those places...—Proc., App’d by Mayor, XX: 564; descrip. of Pl. 156-a, III: 839.

The special committee appointed to consider the petition of Jacob Sharp and others for a railway franchise in Broadway (see Jl 16) presented the report of their investigation subscribed by one member being made at the same time. After a rather lengthy consideration of some of the provisions, the majority report as amended was adopted and sent to the aldermen for concurrence.—Proc., Bd. of Ald., XLVIII: 399-414. For serious objections to this grant as seen by Mayor Kingsland, see his veto message of Dec. 18 (q.v.).

A newspaper editorial reads: “The compositor with which the people of this city submit to be robbed by the Common Council reminds one of Punch’s eels that loved to be skinned. Within the past two years, city franchises of sufficient value in railroads and ferries have been given away, to pay a very large share of our city expenses and to reduce the taxes at least a half, and yet the tax payers take the loss as kindly as if the taxes collected, all went into their own pockets. Within the year, three new railroads have been charted in our most populous thoroughfares, from which the city should have derived at least six hundred thousand dollars revenue. It was quite a thousand from the last alone.

"Last night, the Board of Aldermen gave a right of way to a fourth, and by extending, greatly added to the value of one already built. None of these grants are subjected to any scrutiny, none of them provoke any debate. They pass with less opposition than an offer to give hundreds of thousands of dollars for the privileges which are thus granted for a song, but their proposals are regarded with about as much consideration as the Spanish brigand bestowed upon the Cross at his breast, when he is crying ‘Staad and deliver.’...

"It has been suggested to us that there is a secret financial committee, composed partly of members of the Common Council, to whom every lucrative project is first referred. If these gentlemen approve of it, it is passed; if their thumb goes down, nothing more is heard of it, except, perhaps, a little snarring in the newspapers. All the debating or negotiating—for that we believe is the more suitable term—is done in or with this secret committee, before the contemplated project is even mentioned in the Common Council. The arrangements concluded here, render every public debate unnecessary. Sufficent "consideration," as it is said, is always given to the go-betweens, if not to the measure, before the board are troubled with it, and the committee share their "consideration" with the Council so equitably, that it is said they are all in the end just as well off as if they had participated in the secret discussions.

"Now, if there be such a wheel within a wheel, about the City Hall—about which there is an organization into which the power of the Common Council has been condensed—and which has, in fact, made a majority of that body can be made to listen to the appeals of justice, of reason, or of right, is it not about time the public knew their names? We have heard some strange stories of large sums divided by this committee, among a portion of their associates in the two boards, about the time certain ferry privileges and railroad grants were conferred; of extensive investments made and made by members of both boards, who had to borrow the money with which they paid the expenses of their election, &c. If these things be true; if there be such a commercial committee, supplementary to the chartered government of the city, the mystery of the railroad movement is solved, and we may expect, before the term of office of the present board expires, that provision will be made for railroads in the city, and we shall consider ourselves lucky if they do not grant the use of the City Hall, and other buildings in the Park, without rent, for boarding-houses, and surrender all the public parks to butchers and drapers.—Eve. Post, N 23, 1852.

The corner-stone of the house of refuge on Randall’s Island is laid. The building was opened N 24, 1852.—N. Y. Herald, N 25, 1852; Man. Com. Coun., 1852, 618. A view of the building was published in Illustrated News, I: 124 (F 19, 1853).

A contract is signed between Street Commissioner John T. Dodge and Henry R. Condlin for enlarging the Battery. "The enlargement is to be made in accordance with what is termed Ewen’s plan. Eleven and a half acres are to be filled in outside of the present sea-wall, which will make the whole area about twenty-four acres. It will take in the outer edge of Castle Garden, going out two hundred feet in the East River, and on the North River to the line of West street.—Eve. Post, N 27, 1852.

In this month, the "Old Brewery" at Five Points (see Mr) was demolished to make room for a new mission-house to be erected on its site (see Jl 27, 1853). "What no legal enactment, what no machinery of municipal government could effect [see D 19, 1831]. Christian women have brought about quietly, but thoroughly and triumphantly... The great problem of how to remove the Five Points had engaged the attention of both the legislative and executive branches of the city government, and both had abandoned the task in despair. It is to the credit of the Methodist Episcopal Church that they were the first to enter the then unpromising field, and it will be an imperishable honor to the Ladies’ Home Missionary Society of that Church that with them the idea originated, and by them has been so successfully carried out."—Lossing, Hist. of N. Y. City, II: 630, and citations; Eve. Post, N 30, 1852.

A view entitled "The Old Brewery At The Five Points N. Y.," and with sub-title "As it appeared Dec° 15 1832 previous to its being torn down by the Ladies Home Missionary Soc'y of the M. E. Church," was drawn by C. Parsons, and lithographed (in colour) by Endicott & Co.—See Pye Cat. (1912), 25.

Louis Napoleon is proclaimed emperor of France, under the title of Napoleon III, and the "Second Empire" is established.—Hazen, Europe since 1815, 205-6.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1852 The common council permits the Second Ave. Railroad to lay a grooved track commencing at a point in Second Ave. at or near 42d St.; running through Second Ave. and 25d St. with a single track to First Ave., and thence through Allen St., Grand St., Bowery, Chatham, Oliver, South, Rivington, and Front Sts. to Peck Slip, the terms: returning with a single track through Pearl and Chatham Sts., Bowery, Grand St., Christie St., and Second Ave. to 25d St., where it intersects the double track, and thence to its terminus opposite the Harlem River with a double track; no motive power except horses to be used beyond 42d St. This permission is granted on condition that the road shall be completed to 42d St., within one year, and from 42d St. to Harlem River within three years from this date.—Proc. App'd by Mayor, XX: 63-86; Man. Com. Counc. (1855), 334.

18 Mayor Kingland retoes the aldermanic resolution granting to Jacob Sharp and others a street railway privilege in the city (see Jl 16 and N 19). In his veto message he expresses his belief that the aldermen have failed "to consult the true interest of the city." He calls to their attention four other petitions for the same franchise while the Sharp petition was under consideration, all of which were more advantageous to the city and the public than the one under consideration. He insists that the city net least $20 per annum from the license fee of $20 per year for each car the company runs ($5,000 per year if 150 cars are used), and the company is permitted to charge a five cent fare. One of the other petitions, if granted, would bring to the city "an annual income of one hundred and fifty thousand dollars, and the public would be benefited by being charged only three cents passenger fare." The mayor declares he "cannot think that the community would tacitly submit to such a perversion of their rights." Furthermore, he questions the wisdom of a railway in a thoroughfare so crowded already as Broadway is, reminding the aldermen that the principal main of the Croton aqueduct is laid in the centre of that street. In case of a break that would necessitate tearing up the street, "the cars could not, like the omnibuses, be turned off from Broadway by one street, to return to it through another."—Proc. Ed. of Ald., XLVIII: 530-36. Commenting on the veto message favourably, the Tribune says: "We believe there is not a man in town, not personally interested in this great scheme of plunder, who will not condemn, in unsparing terms, the shameless rascality of those Common councillors who voted for the project, and we hope, though without much confidence, that this may prevent its execution."—N. Y. Tribune, D 29, 1852.

1853 A side light on the veto appears in the following newspaper advertisement: "Mr. Kingland, the late Mayor, was presented by the omnibus proprietors of New York, with a magnificent clock, valued at $300, as a mark of their approval of his conduct in the case of the proposed Broadway Railroad."—Even. Post, Ja 4, 1853. The measure was passed over the veto by the aldermen on Dec. 29 (p.r.), despite a temporary injunction issued by the court on the preceding day, Dec. 28 (p.r.).

18 The Society Library disposes of its property at the south-east corner of Broadway and Leonard St., which it first occupied in 1840 (p.r., Ap 30). It moved into temporary quarters in the Bible House at Fourth Ave. and 8th St. before occupying its new building at 109 University Place.—Keep, Hist. of the N. Y. Society Lib., 434; L. M. R. K., III: 957. See also Even. Post, D 21, 1852.

18 Gentin, the butcher, whose shop was at 214 Broadway, at the north-east corner of Fulton St., has applied to the common council for permission to erect an iron bridge over Broadway for foot passengers, in front of his shop, to enable them to pass over Broadway without danger from vehicles. For view of the proposed bridge, see Gleason's Pictorial, III: 416 (D 25). Such a bridge was not built until 1865 (p.r., Ap 15).

28 A temporary injunction is issued against the city magistracy, forbidding them "to charter a Railroad in Broadway," and requiring them to show cause "why the injunction should not be made perpetual." The complaint on the basis of which the injunction was issued reiterates the objections stated by the mayor in his veto message (see D 18), and adds a number of others. "A majority of the aldermen," it states, "have passed to again adopt such grant to Sharp, notwithstanding the Mayor's veto, and for that purpose are keeping the Boards now in session, frequently adjourning for want of a quorum; and the session is protracted, notwithstanding the per diem allowance for the first eight meetings of each session [see Jl 11, 1851] has long since ceased; and the plaintiffs are apprehensive that they will again pass such a grant as soon as they can by law act on the same." The fact that the aldermen "are at present interfering with the liberty of the common council to create.—N. Y. Tribune, D 29, 1852.

29 By a vote of 15 to 3, the board of aldermen overrides Mayor Kingland's veto and grants to Jacob Sharp and others "the privilege of laying a railroad in Broadway." Furthermore, resolutions are passed to erect a building for "properly disregarding" the injunction issued by the court on Dec. 28 (p.r.). The common council has, they declare, "an equal authority and right to suspect and impute improper motives to any intended judicial decision of any judge, and consequently to attempt to arrest his action on the bench, as such judge has in regard to the legislative action of the Common Council." As to the measure against which the injunction in question is directed, they say it was adopted "in grounds of public expediency, justice and right, for the best good of the city, both in regard to the accommodation and service of the public, and in regard to the interest of the City Treasury; and also on petitions from more than thirty thousand citizens, and that nothing has yet appeared which shakes the ground on which they are founded." They also refer to the "proceedings for investigation, judicial or otherwise, into the foundations of these petitions, and the reasons of our action, collective or individual."—Proc. Ed. of Ald., XLVIII: 642-45; Proc. App'd by Mayor, XX: 631-37; N. Y. Tribune, D 30; N. Y. Herald, D 29-31, 1852.

Haswell in his Reminiscences says: "In consequence of the corruption existing in the Municipal Departments, and especially in the Boards of Aldermen and Assistants, they, from the facility, extent, and conditions with which they granted leases of city railroads, ferries, etc., despite the vetoes of the mayor, were designated the Forty Thieves; the boards consisting each of twenty members."

—Haswell, Reminiscences, 487. Alderman "Bill" Tweed, destined to become notorious later (see D 16, 1871), is quoted by the Tribune as offering at the board meeting an explanation of the press siding with "the Mayor and his Friends." But he adds: "I have the virtue of a $50 bill when it is wisely employed, and the echo that it will produce." Retorting, the editor says: "Certainly! The Alderman knows the value of a $50 bill and of any number of fifities; if he didn't how would he ever have been an Alderman and a Congressman elect!"—N. Y. Tribune, D 31, 1852.

The franchise thus acquired by "the associates of the Broadway railroad" gave them the right to lay a double track with grooved rails for a railway in Broadway and Whitehall or State St., from South Ferry to 59th St., and from time to time to continue it along Bloomfield Avenue to Manhattanville. No motive power except horses was to be used below 59th St. The cars with the horses attached were not to exceed 45 ft. in length. At Bowling Green the associates was permitted to divide the tracks, one of them to extend down Whitehall St. Whenever, on the route, the road should pass through the public square, it might be carried with a single track round both sides of the square. The company was required to procure a depot at or near the lower part of the route, for the purpose of storing such cars coming down in the morning as would not be required for the accommodation of the return travel until the afternoon. The cars were to be so constructed "as not to make provision intended for standing passengers to expand upon the conductors;" and, when all the seats were full the cars were not to be stopped to take more passengers "to be crowded into the said seats, a flag being displayed in front of the car to give notice that all the seats are full." There were also provisions about stopping, and the duties of conductors. The "associates" were required to keep their lines in readiness, adequate to accommodate the public when the operation of the cars was obstructed by snow; and they were to cause the streets to be swept. The fare was not to exceed five cents.—See Proc. of the Citizens of N. Y. in Opposition to the Project of a Railroad in Broadway (pamphlet, in N. Y. P. L.).

The common council permits the Third Ave. Railroad Co. to lay a double track with grooved rails for a railroad in the following manner: From the southeast corner of Third Ave. and Frout and thence through Broadway, near the south-westerly corner of the Park; thence along Park Row to Chatham St.; thence along Chatham St. to The Bowery; thence along The Bowery to Third Ave., and thence along
1853

In this year, John Romey Brodhead published Vol. I of his \textit{Hist. of the State of N. Y.}. The second volume appeared in 1871.

In this year was published \textit{A Treatise upon the Estate and Rights of the Corporation of the City of New York} as Proprietors, by Murray Hoffman. See also \textit{ibid.} in 2 vols., 1862.

In this year, C. S. Francis & Co. issued \textit{The Stranger's Handbook for the City of New York, or, What to See, and How to See It.} Among its interesting observations are the following:

"... Four bridges cross the Harlem River: via, the Croton High Bridge, Macomb's Bridge, the Harlem Railroad and the Harlem turnpike bridge. The Hudson River Railroad is carried over Span, by a wooden pier.

"The city population extends more than four miles on each river, and the compact part has a circumference of over ten miles.

"Twelve noble avenues, each 100 feet wide, run parallel and lengthwise of the island, giving access to the city, and these are cut at right angles by numerous streets, every tenth one of which is also 100 feet wide, while the narrow streets are 60 feet in width."

"There are upon Broadway alone some twenty-five hotels, all elegant in their appointments, and varying in the extent of their accommodations from 100 to 1,000 guests."

"The Metropolitan, a new hotel, on the corner of Broadway and Prince street, is considered by many the largest and most magnificent edifice of the kind in New York. It is built of brown stone, six stories high, and the building alone cost over half a million of dollars.

"The building is warmed by steam furnished by large boilers, and is provided with the most thorough ventilation."

"There are upwards of two miles of halls in this establishment, and twelve miles of gas and water pipes. There are more than 15,000 yards of carpeting laid down, which cost, with the superb drapery, $40,000. The cabinet furniture cost $50,000; the mirrors, (some of them the largest ever imported,) about $18,000; the silver ware, $14,000. The cost of the whole establishment, including value of the ground, ($300,000) was $350,000.

"Visitors who desire to form an accurate idea of the progress of house-building in New York during the last twenty years, should compare the view taken by remaining at Lafayette Place, on the west side of which are seen the houses known as La Grande Terrasse, or Lafayette Row—a colonnade erected eighteen or twenty years since, by Mr. Seth Gair. At the time of their erection, they were esteemed the most elegant private residences in New-York, but have since been, as we shall see, both far and frequently surpassed. A single house built at about the same time with these, is that formerly the residence of the late Henry Brevoort, on the corner of Fifth Avenue and Ninth street, and which was one of the first buildings erected in this luxurious neighborhood.

"Taking Washington Square as our starting-point, let us pass up the avenue, surveying at our leisure the stately mansions that rise on either hand. On the corner of Tenth Street is a house in the style of a French chateau, an agreeable departure from the uniformity of our city residences, owned and occupied by Mr. Schiiff. Diagonally opposite is the residence of Mr. Cottenten.

"On the right-hand side of the avenue, on the corner of Twelfth street, is the princely mansion of James Lenox, Esq. On the west side, between Thirtieth and Fourteenth streets, a house with heavy stone balcony is occupied by August Belmont, Esq.

"On the north-east corner of Fourteenth street is the spacious residence of Mr. Moses H. Grinnell, well known as an enterprising and liberal merchant.

"On the lower corner of Fifteenth street, east side is the house of Mr. R. K. Haight; opposite to which is that of Charles Parker, Esq. At this point we advise our friends to turn the corner of Sixteenth street to the left, and observe the elegant abode of Col. Thorn, conspicuous from being surrounded by a court-yard, affording room for windows on every side. Returning to the avenue, we have on the right upper corner of Sixteenth street the house of Captain [Lorillard] Spencer, late of the U. S. Navy. This house, though without distinctive beauty, cost, together with the site, $500,000.

"On the northeast corner of Twentieth street, we have a very elegant house, recently erected by R. L. Stuart, Esq. The house at the northeast corner, having a porte cochère at the side, is the residence of Mr. Nicholson, formerly of New Orleans, and one of the firm of Brown Brothers & Co.

"At the north-west corner of Thirty-fourth street is the elegant mansion of Dr. Townsend, widely known as the commodore of the famous sarsaparilla syrup. There are besides many other elegant houses upon this avenue, which deserve a separate notice, but our limits forbid.

"There are in New-York no less than 273 congregations. ...

"There are in New York twenty daily papers, with a circulation of above 200,000, and the yearly value must exceed half a million of dollars.

"... Passing down the Fifth Avenue [from the Crystal Palace] the most magnificent street on this continent, and likely to become the finest perhaps in the world—we reach Madison Square, not long since a rude field—now the centre of the fashion and wealth of the city. ... It has been suggested that Madison Square would be an admirable site for the erection of a public observatory,—somewhat on the plan of the celebrated Kew, Kensington and Chelsea, in London. We hope the projected scheme may be speedily carried into effect—for nothing could be a greater ornament to the Metropolis, or afford a more delightful place of resort and promenade for its residents. The cost is computed at the sum of $5,000. ... A general movement is making upward and northward—old established societies are surrendering their former positions down town, to the eager demands of increasing commerce; and Broadway itself, which has ever been in process of completion, exhibits now but here and there remnants of its modest aspect in days of yore. Even Columbia College—the most venerable of our seats of learning, is, it is said, soon to bid adieu to the classic shades of Park Place, and be translocated to the Hosack Botanic grounds, about three miles north of the city. It has been completed that about 1,800 new edifices—many of them of costly magnificence—are now in process of erection, the value of which, when completed, will be over $75,000,000.

Dr. Townsend's residence, corner of 34th Street and Fifth Avenue, is to cost, with the grounds, upwards of $200,000. The Union Club contemplate erecting a splendid house, which will be worthy of them and the City, somewhat on the model of the Athenaeum Club of London."—Saunders, \textit{N. Y. In a Nutshell} (1853), 94-109.

Still another description states: "... New-York of the future, while its central seat will still be on Manhattan Island, will reach out vast arms and take in the whole western end of Long Island, the whole of Staten Island, a vast extent of the coast of New-Jersey, and a considerable portion of Westchester County beyond Harlem River; and within this space is found every variety of surface, soil, and physical configuration. Already these places are becoming the seats of villages, built by capital from the city, and occupied by a
In this year, Victor Prevost, a French artist, made a photograph of the battery and another of Columbia College, the negatives on oiled or waxed paper, being among the very earliest produced in America and, so far as is known, with the exception of the series, the only early paper negatives in existence in this country. These are reproduced and described, and the titles of the other photographs in the series given, as Pls. 142-2 and b, Vol. III.

In Valentine’s Manual for 1853, were published; a map of the city, 1853, frontispieces: almshouse buildings on Blackwell’s Island, 54; Washington Institute and city reservoir, 134; Five Points mission (“Old Brewery”), 180; Washington Hall, cor. Broadway and Reade St., 480; Cato’s old road-house (built in 1712), 490.

About this time, Cato’s, the well-known tavern of the period, in 54th St., east of Second Ave., was demolished.—Libor Deeds, CCLII: 584; L. M. R. K., III: 977. See also 1850.

In this year, 624 hack licenses were issued, the large number probably being on account of the Crystal Palace exposition.—Man. Com. Coun. (1854), 340.

For view of Turtle Bay, East River, 1853 (drawn by B. J. Lossing), see ibid. (1858), 600.

The Howard House (cf. 1851), at 414 Broadway; the City Assembly Rooms, at 444 Broadway; The Philharmonic Soc. (see 1851), at 217 and 219 Broadway; at 722 Broadway; Wallack’s Theatre (formerly Brougham’s Lyceum) at 453 Broadway, and the American Mutual Fund Soc., at 493 Broadway; and the Astor Place Hotel, at 733 Broadway, all date from this year.—Ibid. (1865), 635-36.

The N. Y. Juvenile Asylum (see Je 30, 1851) goes into active operation, occupying temporary quarters in Bank St. and absorbing the Society for Homeless Children. It subsequently moved to 53rd St. and First Ave., and finally, in 1855 (Gr. t.), erected its own buildings near High Bridge, and St. Ann’s, Lyceum Coot. (1870), 429; Lossing, Hist. of N. Y. City, II: 687-88. In 1905 (Gr. t., My!) it removed to a splendid site at Chauncy, N.Y., overlooking the Hudson River.

The building of the New York Crystal Palace (see 03, 1853) is progressing so rapidly that the place will be opened to the public on May 2.—Illus. News, I: 11. An engraving showing the grounds and foundation is in ibid., I: 5. A later view appeared on Jan. 22.—Ibid., I: 61, 64. See also view in Gleaner’s Pictorial, IV: 9, and Pls. 141-2 and 145, Vol. III. See Mr 19.

Putnam’s Monthly is established; it continued to 1857. It was revived in 1867 and ran until 1869, when it was merged in Scribner’s Monthly.—Haswell’s Reminiscences, 486; North, Hist. & Present Cond. of the Newspaper and Periodical Press, 117; Wilson, Misc. Hist. N. Y., 7, 1167. Also in Gleaner’s Pictorial.

The Illustrated News, the first illustrated newspaper in New York, makes its appearance. At the end of the year, it was merged in Gleaner’s Pictorial.—North, Hist. & Present Cond. of the Newspaper & Periodical Press, 125; Annals of N. Y., 604.

A second injunction against “the Broadway railroad speculators” is granted by Judge James J. Roosevelt of the supreme court, even though he was a prominent petitioner for the railroad.—Eve. Post, Ja 4, 1853.

An attempt at political reform is to be noted in the following resolution introduced into the board of aldermen by one of its members: “Resolved, That the Keeper of the City Hall be, and he is hereby directed not to furnish any refreshments to any person, whereby the expense of the same shall come out of the city treasury.” By a vote of 9 to 8 the resolution was tabled. —Proc. Bd. of Ald., XLIX: 37. “A resolution to abolish the Tea-table was rejected,” is the Tribune’s brief comment.—N. Y. Tribune, Ja 6, 1853.

The extravagances of this “Tea-table” or “Tea-room,” as it was variously called, were the subject of much attention in Comptroller Flagg’s report to the common council for the year 1852. (Flagg succeeded Jan. Taylor, Jan, 1, 1853.) He pointed out expenses “for refreshments” for Citizens’ Board of Aldermen” during the past year, either through “the Bureau of the City Hall and Park,” or “the Street Department,” to the amount of $190, 220.42. Such expenditures in the “Tea-room” have no justifiable basis to rest on,” he declares; “the last account paid, before I en-
5 Corporation of New York

To Jas. Taylor, Dr.

To refreshments furnished Common Council,

for month of Dec., 1852, viz:

Best, pork, vegetables, bread, butter, tea, coffee, milk, sugar, chickens, eggs, and “egg-getters,” pepper, mustard, salt, vinegar and help.

COMMENTS: The comptroller remarks that such “accounts for refreshments at the City Hall” are “a novelty in the history of auditing accounts for disbursements of public money.”

—Comptroller’s report (1852), 32–33. A news item in the Times speaks of the propriety of the member of the Common Council going to “the corporation: ‘Tea Room’ to get their supper,” and declares that one member last evening called it an outrage “to make the people pay $1,000 per annum, for what was consumed in that ‘Tea Room,’ and proceeded to Sherwood’s Saloon, ‘took supper, and paid for it out of his own purse.” Such action, the writer believes, will eventually result in the abandonment of Mr. Taylor’s department, the “Tea Room.”

—N. Y. Tribune, Ja 13, 1853.

Hayward in his Reminiscences declares that in this year the “vandalism of some members of the Common Council and some members of the Department was so extensive and so manifest that the tenure of the office of member was held to be more of a reproach than an honor. The fraternity and cohesiveness of common plunder, the auri sacra fames, was superior to all consideration of political and party affiliations and discipline. Reformean and Democratic newspapers of this I write from observation, for after two years of service in 1858, presided over one of these boards” (the board of councilmen).—Hayward, Reminiscences, 488.

“According to the group of New York city" embraces 585 men, of whom 530 are infantry, 129 cavalry, and 12 artillery.”—Gleason’s Pictorial, IV.

“Corporation of New York are now erecting a second fire tower [for the first, see 1851] near the corner of Macdougal and Spring streets.”—Illus. News, I: 61.

Alboni appears at the Broadway Theatre in “Norma,” and draws such a crowd as never before was congregate within its walls. Five dollars is offered for reserved seats either in boxes or parquet.—N. Y. Herald, Ja 28, 1853.

“Corner-stone of a new Five Points Mission building is laid at 61 Park St, on the site of the ‘Old Brewery,’ heretofore occupied by the mission and deeded (see D. 1852) to make room for the new edifice. The mission includes an employment bureau, a day school, and a Sunday school.—N. Y. Herald, Ja 26, 1853.

Thackeray delivers a lecture on “Humor and Charity,” in the Church of the Messiah, for the benefit of the Society for Employment and Relief for the Poor.—N. Y. Daily Times, E 1, 1853.

In this month, the Children’s Aid Society was formed. Its work began in a small office on the corner of Amity St. and Broadway. Charles Loring Brace was the founder. In March, a circular was sent out announcing the unique plan, which has since become general, of placing homeless orphans by adoption in private homes. In 1854 (q. v., Mr 18), the society opened the first lodging-house for “newsboys,” in an old lot of the Sen building corner Nassau and Fulton Sts. The society was incorporated Jan. 9, 1853, under the general act of April 12, 1848, for the incorporation of benevolent societies.—1st Ann. Rep., Children’s Aid Soc. (1844); 20th Ann. Rep. (1872). See also Lossing, Hist. of N. Y. City, II: 634-40.

L. M. Gottschalk, pianist, makes his début in New York at Niblo’s Garden.—N. Y. Daily Times, F 11 and 12, 1853.

In his report for the year 1852, T. J. Daullotter Flagg calls attention to the item of carriage hire for members of the common council, which amounted to $4,267. He says: “In regard to carriage-hire, so much as is necessary for the public service, on being properly authenticated, as required by the resolution of 1842, may be allowable. The accounts for carriage-hire, which have been presented to me, do not conform, in any respect, to the requirements of the resolution.”—Comptroller’s Report (1852), 32-33. See Ag 27.

The Astor Library (see Ja 18, 1849) in Lafayette Place (on the site formerly occupied by Sperry’s Gardens and Delacour’s Vauxhall) has been completed during the past year. It is “deemed advisable” not to put in the books until April next, so that they will not be injured by any currents of air from the walls. The new building will be ready for use by May 1. The amount expended on the building, beside the cost of the site, up to Jan. 1, 1853, was $79,000. The total expenditure up to that date for books was $75,364.40. The library now comprises between 60,000 and 65,000 volumes, and the superintendent, Dr. Cogswell, has gone to Europe to make further purchases. “On the return of Dr. Cogswell from Europe with his next instalment of books, the Astor Library will be the largest in America.”—Illus. News, I: 125; L. M. R. K., III: 956, 981; Gleason’s Pictorial, IV: 301. See also Francis, Stranger’s Hand-Book (1853), 46-48, and Lydenberg, Hist. of N. T. Pub. Library, 16. The library was not opened until Jan. 9, 1854 (q. v.). See also Je 29, 1853.

Congress authorizes the establishment of an assay office at Mar. New York City.—N. Y. Daily Times, Mr 5 and 9, 1853. On Aug. 21, 1854 (q. v.), the old U. S. Bank building was bought for this.
Franklin Pierce was inaugurated president of the U. S.—N. Y. Daily Times, Mar 5, 1853; Rhodes, Hist. of U. S., I: 384-86.

And citizens of all classes assembled "to effect a reform in the city government." Peter Cooper is elected chairman, and one of the speakers enumerates the following causes for such a mass demonstration: "The absence of all economy in the expenses of the city—the disposition to add to its permanent debt, and that with a new feature for annual repairs—the frequent discharge without trial, by aldermen, of persons arrested for crime—the grant of valuable franchises and property without adequate compensation—and the evidences of extravagance, abuse of power, favoritism, and mismanagement which appear in our municipal government."

Resolutions were adopted expressive of changes desired in the charter, and a "Committee on Legislation and Reform" was appointed to solicit such amendments from the legislature.—Even. Post, Mar 7, 1853. For the amended charter adopted by the legislature, see Ap 12.

Francois' Hippodrome is being erected at Madison Square.

"The enclosure which covers an area of nearly two acres of ground, is to be surrounded by a brick wall twenty feet in height. . . . Upon the angles formed by the intersection of Broadway and Twenty-third and Twenty-fourth streets, jut out two octagonal towers thirty feet high. . . . The interior is to be surrounded with rows of conveniently constructed seats for the spectators, rising one above the other to a proper elevation around the entire circuit of the Hippodrome, presenting an oblong form, and of sufficient capacity to accommodate, quite comfortably . . . . The covering of this immense enclosure will be one of the most attractive features of the Hippodrome, the canopy, consisting of light water-proof canvas . . . with alternate stripes of rich and variegated colors, throwing, by means of numberless jets of gas, a soft and effective light around the interior."—Illus. News, I: 185, 184, which contains view. See also N. Y. Times, Mar 25, 1853; Francon's Hand-Book (1853), 83; L. M. R. K., III: 5984; Pl. 141-b, Vol. III. See, further, My 2.

The Crystal Palace (see Ja 1) is assuming a "tangible shape."—Illus. News, I: 185, which contains view. See also ibid., I: 313, 314. It was opened on July 14 (q. v.).

The Demiltn Dispensary, founded by George T. Trimble in memory of Elizabeth and Sarah Demilt, is opened at Second Ave. and 23d St.—Lossing, Hist. of N. Y. City, II: 689-90. See also Francis, Stranger's Hand-Book (1853), 67.

All New York south of the line from the North River through 50th St. to Fifth Ave., and through that avenue to 74th St., and through that street to the East River, comprised six dispensary districts, occupied and cared for, respectively, as follows: The New York Dispensary, incorporated in 1831 by the Northern, and the Eastern, in 1832; the Demilt, in 1852; the Northwestern, in 1853; and the Northeastern, in 1852.—Lossing, op. cit. (1884), II: 690. See also descriptions and views of these in the later Valentine's Manuals.

The new Essex Market, a large brick building erected on the site of the old, is opened for business. The upper storeys are used by the police court, justice's court, a police station, and a post office. 

Speculation is active in running up buildings of every description—intended as places of amusement, of refreshment, or lodging for the expected influx of visitors. The prospect at present does not present the most inviting appearance—vacant lots, ragged rocks, and deep pits, with relics of country shanties. It will require brick work to transform the scene to something worthy the occasion of our 'World's Fair.'

"The massive reservoir presents a strong contrast to the light aerial structure [the Crystal Palace] erecting under its heavy shadow, and dwarfing substantial buildings, springing up around it."

"Among other speculations we noticed a large wooden tower [the Latting Observatory] which is in course of erection opposite the northern entrance to the Palace. Its shape is Octagon, each corner being firmly secured in the rock foundation. The base is 75 feet in diameter, and it is intended to run to a height of 300 feet—5 feet diameter at the apex. A well 15 feet in diameter will be carried the whole way up through which persons will be hoisted to the different levels in the tower, another 200, and a third at an elevation of 270 feet. There will be also a spiral stair case. The proprietors are Mr. W. Latting and others. An extensive view of New-York, the noble rivers, the bay, and adjoining cities will be obtained from this tower, the largest wooden structure of the kind."—N. Y. Times, Mar 25, 1853. See also ibid., Ap 25, Je 23, 24, 29, Ji 1 and 12, 1853. See, further, Je 30 and Ji 14.

Contracts have been entered into for the erection of a new Washington Market at Washington, West, Vesey, and Fulton Sts. "The contract price for the erection and complete finishing of this gigantic structure, is $375,000." An engraving made from a drawing by the architect, Frederick A. Peterson, shows the exterior.—Illus. News, Ji 205. A survey of the market property, made in this year by J. Serrell, is filed as map No. 94 in real estate bureau, comptroller's office. These contracts were never carried out, and the "old dilapidated market-houses" were still standing in 1862, when De Voe wrote his Market Book, q. v., pp. 457-58. L. M. R. K., III: 960, is in error in stating that the new market was erected in 1852. See also Ji 16, 1867.

The Society Library, having sold its building on Broadway (see D 18, 1851; Ji 18, 1851) at a loss of $27,500, has purchased the second story of the new building of the American Bible Society, at the corner of Third Ave. and Astor Place. The books of the library were removed to their new location in this month.—Keep, Hist. of N. Y. Soc. Library, 4251 N. Y. Daily Times, Ap 12, 1853. See My, The New York Corn Exchange is incorporated.—Law of N. Y. (1853), chap. 74.

There have been important changes in the municipal government are made by the state legislature, subject to a referendum at an election to be held on June 7 (q. v.).

The legislative powers of the corporation of the city of New York shall be vested in a board of aldermen and a board of councilmen [previously called assistant aldermen], who together shall form the common council of the city." As formerly, the board of aldermen must consist of one alderman from each ward (at this date 20 in number, but increased to 22 a few weeks later—see My 27 and Je 22). The newly designated board is to consist of 60 members to be elected from as many districts. These districts are to "be of contiguous territory, and as near as may be of equal population." Like the assistant aldermen, the members of this new board were to be elected annually. Measures involving the appropriation of money were to originate in this board, "but the board of aldermen may propose or concur with amendments, as in other cases." It is further provided that "a vote of two-thirds of all the members elected to each board" shall be necessary to pass any measure over the mayor's veto.

In the board of aldermen only one half the membership shall retire from office every two years, or by the end of any other term of office from wards having an odd numerical designation shall be elected one year, and those from the even numbered wards, the next year (see Je 14, 1853).

"No alderman shall hereafter sit or act as judge in the court of oyer or terminer or in the courts of general or special sessions . . . but this section shall not prevent his exercising the power of a magistrate in the arrest, commitment or bailing of offenders."

"All ferries, docks, piers and slips shall be leased, and all leases and sales of public property and franchises (other than the grants of land under water to which the owner of the upland shall have a pre-emption right) shall be made by public auction, and to the highest bidder who will give adequate security." It is further provided that hereafter leases shall not be "for a longer period than ten years."

"No money shall be expended by the corporation for any celebration, procession, or entertainment of any kind, or on any occasion, except for the celebration of the anniversary of the national independence [see Ji 4, 1854], the twenty-fifth of November, 'evacuation day,' and the anniversary of the birthday of Washington" (see F 22, 1854), unless by a three-fourths vote of all the members present at the meeting.

"The officers of the police and policemen shall hereafter be appointed by a board of commissioners, consisting of the mayor, recorder and city judge."

"All work to be done and all supplies to be furnished for the corporation, involving an expenditure of more than two hundred
and fifty dollars, shall be by contract founded on sealed bids, or on proposals made in compliance with public notice for the period of thirty days, all such contracts to be given to the lowest bidder with adequate security.

8. A new bureau is established in the department of finance (for the other bureaux, see Ap 2, 1849) to be called the "auditing bureau," and the chief officer thereof is to be called the "auditor of accounts." This bureau "shall revise, audit and settle all accounts in which the city is concerned as debtor or creditor; it shall keep an account of each claim for or against the corporation, and of the sums allowed upon each, and certify the same, with reasons therefor, to the comptroller."

9. Appropriations required for the almshouse and for the board of education must be submitted in the future to "a board of commissioners, consisting of the mayor, recorder, comptroller, the president of the board of aldermen, and the president of the board of councilmen."

"Laws of N. Y. (1853), chap. 217. The electorate approved these amendments on June 7 (p. 56). Durand says: "Considerable but apparently unwarranted expectation of reform was based on an increase in the number of the lower board of the common council."

"Durand, The Finances of N. Y. City, 73."

Two bureaux within the city inspector's department are created by an ordinance of the common council. One is "for the registry of births, marriages and deaths," the chief officer being called the "Registrar of Records;" the other is a bureau of sanitary inspection headed by the "Superintendent of Sanitary Inspection."— Proc. App'd by Mayor (1853-54), XXII: 141-46. The city inspector had presented to the common council quite regularly, since 1813, an annual general report of the mayor and inspector. In his report for the year 1852, City Inspector Downing alludes to the law of 1847 (p. 26, Ap 58), providing for the "Registration of Births and Marriages," and declares it is "hardly possible to conceive of any measure more needed than this." However, as there was "no penal clause to launch it into compulsory practice," it had a "vital deficiency." A "reverend clergyman or two, who justly take pride in doing 'as in duty bound,' but 'with good intent,'" he stated, "are few marriages. And once in a while some professional accoucheur will bend in an evidence of his obedience; but seldom are we thus honored. Without a 'perfect register of births and marriages in connection with that of deaths ... how can we truly obtain a knowledge of relative mortality?"—Ann. Report of City Inspector (1853), 275-80. The report for the next year gives monthly returns of births and marriages for the last six months of the year.— Ibid. (1854), 155-57. See Ja 6, 1854.

The Astor Place Opera House, at the intersection of Astor Place and 8th St.—the scene of the riots of May 7 and 8, 1849 (p. 12)—is purchased by the Clinton Hall Assn. of Edmund Coffin and Wilson G. Hunt.— Libr. Deeds, DCXIX: 677; Ibid, DCXLVII: 969. The opening took place on May 1, 1849. For the opening of the building as Clinton Hall, see Ap 19, 1854.

Thackeray, after a tour of nearly six months in the United States, sails from New York on the Cunard liner "Europe."—Crowe, With Thackery in Am., 171-73. Writing in May from Kennington to a friend, he said: "It is a whole fortnight since I saw 2nd Avenue ... and do know nothing. I haven't the heart to move my watch from New York time! I pulled it out last night and showed it to the people at the ball, and said there that's the real time—they said 'Isn't this a beautiful ball and says I—fish this is nothing—go to New York if you want to see what a ball is ... as if there could be any balls after New York.'"—From letter said at Anderson's, Jan. 9, 1852.

"The new building is purchased by the Society Library (see Ap) on the east side of University Place.—Keep, Hist. of N. Y. Soc. Library, 442. See Ap 28, 1856.

"Fraconie's Hippodrome (see Mr 19) is opened with a performance including a tournament called 'The Field of the Cloth of Gold,' trapese feats, a horse race, a chariot race, etc. The audience numbers about 9,000 or 10,000.—N. Y. Herald, My 3, 1853. See also for Pictorial, IV: 306. For sketches showing the various acts on this and later dates, see Illus. News, I: 395; II: 313-14, 372, 412, 413. The performances continued for only two seasons, 1853 and 1854. The Fifth Avenue Hotel was later built on the Hippodrome site and opened in 1859 (p. 75, Ag 23).— Brown, Hist. of N. Y. Stage, II: 19-20; L. M. R. K., III: 984. The Hippodrome is shown on Pl. 141-6, Vol. III. See also lithographic views in Eno coll., N. Y. P. L.

"The contractors have commenced in earnest the gigantic undertaking of enlarging the Battery. Piles have been driven into the river on both sides of Castle Garden, and the pile-driver is at work, docking out from the south side of the Battery. From the bridge to Battery place a fence has been erected, and on the outside of it part of the railings and sea-wall have been removed, and cartmen are constantly depositing the refuse earth into the river. If the filling up is carried on from the present place, it will not interfere with this most desirable promenade."—Eve. Post, My 3, 1853; descrip. of Pl. 142-3, III: 711. See also Francis, Stranger's Handbook. The line of enlargement "commences at the westerly side of West-street, and thence runs in a direct line until it strikes the north-westerly angle of the block on which Castle Garden is erected; thence along the block to its westerly angle; and thence in a curve line, until it strikes the new Pier No. 1, East River, at a point two hundred feet distant from the southern exterior of the Battery."— The Battery when thus enlarged will contain 24 acres. — Illus. News, II: 27, and views in ibid. See also Gleason's Pictorial, V: 127. See, further, Ag 11, 1857.

The Jewish synagogue belonging to the congregation of "Rudolph Schén," in Clinton St. between Stanton and Houston Sts., is consecrated with the usual pomp, rites, and ceremonies. An engraving which appeared on May 7 showed the exterior of the synagogue.— Illus. News, I: 297. A view of the interior appeared on May 14—Ibid, I: 316.

"Willard's Hotel on the corner of Broadway and 12th St. is opened.—N. Y. Daily Times, My 11, 1853."— Mr. and Mrs. Vanderbilt, with about 25 guests, sail in their steamer yacht "North Star" for the Mediterranean and the principal seaports of Europe.—Choules, The Cruise of the Steam Yacht North Star (1854). See also Illus. News, I: 233-34.

The scenery, chairs, curtains, plumbing work, carpets, gas fixtures, etc. of the Astor Place Opera House are sold at auction, prior to the demolition of the building and the erection of the new Mercantile Library on the site.—N. Y. Daily Times, My 21, 1853.

"A colossal bronze statue of De Witt Clinton, 100 feet high, is placed temporarily in front of the city hall, looking toward the Battery, on an ornamental bronze base 81 feet high.— N. Y. Herald, My 25, 1853. It is to be placed permanently in Greenwood Cemetery.—Ibid., My 24, 1853."— John McComb dies in his 90th year. Besides the city hall, many notable buildings were erected by him as architect. Among them were "St. John's Church, Dr. Mason's Church in Murray-street, Washington Hall, on the ground where now stands Stewart's store; Bleeker-street Church, Bible and Tract houses, ... Castle Garden," etc.— Illus. News, Je 11, 1853. The statement that he was architect of Castle Garden is evidently erroneous.—See O 9, 1858; see also descrip. of Pl. 25, Vol. I. A daguerreotype portrait taken in this year is also shown in N. Y. Hist. Soc.

"The New Law Building in the Park, fronting on Chambers street, has been nearly completed. ... There are two entrances—one on the side of the Park and the other in Chambers street."—N. Y. Com. Adv., My 25, 1853.

"The legislature passes an act creating the Twenty-first ward out of that portion of the Eighteenth Ward lying northerly of a line running through the centre of 26th St.—Laws of N. Y. (1853), chs. 282, 248."

The editor of the Tribune makes the following comment on the refusal of the comptroller to pay a bill of W. B. Reynolds "for a month's services on his contract for the removal of dead animals, butchers' blood, and other refuse from the streets." The reason for the refusal is, says the editor, "that the contract is not legal and binding on the City, having been made privately, without any opportunity being given for competition, and that the compensation is exorbitant and unjust. The presumption, of course, is that Mr. Flagg is in the right, for he is known to be an honest man, while nobody will pretend that honesty belongs to the Board of Aldermen under whose auspices this contract was made, and made at a price which involves the appearance if not the reality of official corruption."

"The facts in the case are given elsewhere at length in our columns, and are sufficiently remarkable. It seems that Mr. Reynolds removes in a month some 500 dead horses and cows at the rate of $2.50 each, or $1,250 per month. That for carrying off dogs, cats and other animals, some 100 to 200 in number monthly, he gets $100 a month. That for removing blood and offal from sham-
bles, nuisances from soap-boilers, and garbage and bones he receives $2,500 per annum, with $300 monthly for lime used in disinfecting. And that, in addition, he requires for carrying all these to the docks—a job which we are told employees in winter 28 horses, and 40 men, and in summer 40 horses and 100 men—the sum of $95 daily, or $114 per week. The yearly payments made by the City on this contract amount to $51,000, and it has four years to run from the 24th of April last. The offer and refusal is carried by Mr. Reynolds to Barren Island, just beyond Sandy Hook, where he manufactures from it prossian blue, glue, bone-dust, and manure on a large scale. He employs a steamboat and two sailing vessels in transportation to and from the island, and has $60,000 invested in the enterprise."—N. Y. Tribune, May 28, 1853.

For some weeks past workmen have been engaged on the city hall "in tearing up and laying down a new roof, which is now nearly completed, and operations have been commenced upon the capitol which is also to be renewed and painted."—N. Y. Daily Tribune, May 28, 1853.

Dr. Kane, in the "Advance," sets out upon his second expedition to the Arctic regions in search of the lost Arctic explorer, Sir John Franklin. A sketch of the "Advance" passing the Battery appeared in a paper of June 18.—N. Y. News, June 18, 55-69. See also N. Y. Daily Tribune, June 18, 1853. For further news see Arctic Explorations, Vol. I, and Winsor, 1853, 99-110, 125.

The state legislature passes a law providing for the transfer by the Public School Society of "all their corporate property to the mayor, Aldermen and commonality of the city of New-York.

The headquarters of the society, "Trustees' Hall, situated at the corner of Grand and Elm streets," is to be used and occupied by the board of education as long as they may think advisable for the meetings and business thereof. The city is to assume the debts of the society, creating "the public education stock" for that purpose. The society may appoint 15 of their trustees to be members of the board of education and to hold office through 1854, also three trustees of common schools for each ward of said city in which one or more of the schools of the society are now established, designating the school in which each person is appointed. The common schools will be known henceforth as "the public education stock" by the board of education.—Laws of N. Y. (1853), chap. 301. Cf. Boeae, Hist. of Pub. Ed. in the City of N. Y., 80-81; Man. Com. Coun. (1853), 615. The estimated value of the real and personal property of the Public School Society, in 1853, was $652,521.—Dissolution of the Pub. School Soc. (1853).

A mass meeting of citizens in favour of the proposed amendments to the city charter (see Ap 12) is held in Metropolitan Hall. A reformed committee is named with Peter Cooper as president, and speeches are made denouncing the corruption of the common council and favouring the amendments to the charter.—N. Y. Herald, June 27, 1853. Another meeting for the same purpose was held in City Hall Park two days later under the auspices of the young men of the Democratic Club.—Daily N. Y. Tribune, June 29, 1853.

The editor of the Tribune expresses himself in favour of increased pay for policemen, but at the same time offers the following comment: "Much has been publicly said the last few months respecting the manner of appointing policemen in New-York, and a great deal of righteous indignation has fallen upon the heads of the City Fathers, who have been instrumental in too many cases, in nominating and securing the appointment of men as policemen merely for the political services they have rendered the Aldermen in their respective Wards, and apparently without the least consideration as to their capabilities and disposition to serve the public as conservators of the peace. Notwithstanding, as we said before, too many political hangers have been appointed policemen, and by their misconduct a stigma has been cast upon the whole department, we presume that a decided majority of the policemen in our City are men of fair character and well calculated to fill the positions which they now occupy. Under the present mode of appointment, however, the Police Commissioners seem to be filling vacancies with men who are intelligent and possessed of the necessary education for the discharge of their duties, and of quite a different class from many who preceded them."—N. Y. Tribune, June 4, 1853.

By a provision of the amended charter, which met with the approbation of the voters three days later (see Je 7), policemen were to be appointed by a board of commissioners consisting of the mayor, recorder, and city judge.

The amendments to the city charter, passed by the legislature on April 12 (q. v.), are approved at a special election by a vote of 36,679 to 3,351.—N. Y. Herald, Je 8, 1853. In a final appeal to the voters, appending the morning paper and subscribed by Peter Cooper to support the proposed amendments, it is stated that the taxes have increased "from $31,800,511.05 in 1852 to $91,744,802.79 for 1853, . . . more than fifty per cent, besides a large addition to the permanent debt. And this large increase has brought no benefit to the city. Life and property remain with inadequate security; the streets are in a deplorable condition; the public health is in constant danger, and discomfort pursues us even to our houses. These things affect every one of you the poorest as well as the richest. Each one of you must pay your share of the increased tax. You pay it in your rents, which are growing higher and higher every year, and you pay it in the larger price of every article bought in any place which pays a rent. But you have now a chance to secure a larger piece of reform, by voting on Tuesday, the 9th of June, in favor of the City Amendments."—Ibid, Je 7, 1853. 

"The effect of the Election," says the Tribune editor, "was noticed last night by the extinction of all the lights in the City Hall, even to the clock. It was supposed to be Aldermanic Mourning."—N. Y. Tribuns, Je 8, 1853. Pres. Brown of the board of alculmen, in his opening address to that body (Je 5, 1854), made this reference to the election: "No election has taken place in this city in respect to the interests of any living man, when the people have exercised the right of suffrage with so much discrimination; in many cases, strong party difficulties have been impotent to defeat the will of the masses."—Proc., Bd. of Councilmen (1851), III: 34.

The Association for Improving the Condition of the Poor appoints a special committee "to inquire into the sanitary condition of the laboring classes, and the practicability of devising measures for improving the comfort and healthiness of their habitations." The committee's report was made about four months later and constituted the first tenement house report made in America. It called attention to the fact that most of the tenement houses were poorly constructed, much overcrowded, ill-ventilated, dirty, and unsanitary, and many lived in this condition with a high death rate, and lack of thrift. The committee recommended that capitalists and owners of real estate build model tenements and urged that legislative action be taken to regulate tenement conditions and to close up, or cause to be remodeled, those houses which were unfit for human habitation.—De Forest & Veller, The Tenement House Problem, 56-58. See 1854.

The legislature passes an act to supplement the charter amend-act of April 12, 1853 (q. v.). It provides that the city clerk, "in the presence of the mayor, recorder and comptroller, or a majority of them," shall decide by lot whether, at the coming election, the Aldermen chosen from the odd or even numbered wards shall have the longer term (two years).—Laws of N. Y. (1853), chap. 352.

The new Five Points Mission House on the site of the Old Borough (see Je 27), in Daulton Ave., is dedicated.—Daily N. Y. Tribune, Je 17, 1853. See also Lossing, Hist. of N. Y. City, III: 626-71; and L. M. R. K., III: 932.

The "tea-room" (see Ja 3) is abolished. It is resolved by the board of Aldermen that the "room lately occupied by the Common Council, and known as the tea room, be set apart for the use of the clerk of the Common Council, and that the room of rooms now in use, together with the tea room, be appropriately fitted up. It is observed that one reason for this change is greater "security to the official papers" filed in the clerk's office.—Proc., Bd. of Ald., June 17, 1853, 667-68. Cf. N. Y. Times, O 5, 1853.

The Nineteenth Ward is divided by a line running through the centre of Sixth Ave., from 40th St. to 80th St. The western portion is hereafter to be known as the Twenty-second Ward.—Laws of N. Y. (1853), chap. 448. The Twenty-first Ward had been created on May 27 (q. v.). For a complete description of all the wards at this time, see Hoffman's Laws Relating to the City and County of N. Y., I: 15.

Abbott's famous Egyptian collection is being exhibited at Stuy-vesant Institute.—N. Y. Daily Times, Je 14, 1853. See also views in N. Y. Daily Tribune, June 14, 1853, and Cecilia, the Egyptian in Francis, Strange's Hand-Book (1853), 82-83. The collection was later purchased by the N. Y. Hist. Soc. (see Je 30, 1860).

The Astor Library being completed (see F 19), the removal of books from No. 62 Bond St., where they had been hitherto de-posited, to the new building is commenced.—N. Y. Daily Times,
The City and Stranger's Pictorial and Business Directory for the City of New York, and its Vicinity, the first pictorial and business directory published in New York, is issued by Chas. Spalding & Co. of 305 Broadway. It is occasioned by the World's Fair (see J1 14). Besides numerous advertisements, wood-cut views, and descriptions of important buildings, it contains the following observations:

The spirit of progress seriously contemplates the immediate enlargement of the Battery. The old 'Fortress of the Orient' was never regarded as anything but a vestige of the seaport, and the people, in order to divert its military aspect, have recently commenced building a new one of stone, the foundations having already been laid. The new Battery will be the widest of the world, and will be approached by a long, low arch, rising its granite wall to the utmost verge of Castle Garden, . . . connected with the Battery by a wooden bridge. Along each side of this bridge Floating Baths are moored during the summer months, and removed in winter to places of greater safety. Until latter years the Battery was long the only promenade of any interest in the city. The Park proper has never been used as a promenade because the ladies, passing through it, were observed by the Brideswell and the City Jail, and partly because it was generally thronged to overflowing with police officers, lawyers and loafer attendant upon the courts of law. St. John's Park, the only other pleasure ground besides the Park and Battery, below Canal street, has always been controlled by private owners who have kept the keys. But the noble Battery has been free to all from immemorial time, and many are the homeless wanderers who make it, of a summer night, their only home and castle of repose.

"At the Southern extremity of this park are the busy Ferries of South Brooklyn and Staten Island, and at its North Western angle the steam-boat dock of the Cunard and Amboy Railroad, while in its centre rises the flag-staff of the port, bearing the floating banner of the stripes and stars." (p. 61.)

City Hall Park "is situated at the focal point of the business energies and travelling movements of the Metropolis. . . . In, and around this Park are now clustered the courts of law, municipal, state and federal; the great steam-urged printing and publishing establishments; several first-rate hotels; and some of the finest stores in the world. . . . As a necessary consequence, property in this locality is assuming an almost incredible value. Many of the new stores are held at a hundred thousand Dollars; one of them cost two hundred and fifty thousand; and a single building within eighty rods of the Park, rents this year at Sixty-five thousand Dollars, the principal material of which was transported by river, canal and lakes, from the remote brick-yards of Milwaukee.

"The City-Hall Park is, in form, a right-angled triangle, the longest side being that on Chatham-street, and its rectangle at Stewart's marble mercantile palace, and the Irving-House. It contains, besides a marble fountain 80 feet in diameter, with a jet sixty feet in height, the City-Hall, the Hall of Records, the New City-Hall, and the Rotunda. The Commissioners of the Alms-House and the Commissioners of Emigration have their offices in the Park, while the headquarters of the Police. Its shady Avenues, formed by venerable Elms, are favorite resorts for military parade, where many a "jeu de pie" and booming cannonade have celebrated the triumphs of liberty in the New World. Here too the popular orators of the Republic, mounted on temporary platforms, swayed the multitudes. . . ." (p. 63.)

"Union Square . . . derives its name from the circumstance that a greater number of principal streets and avenues unite here, than at any other square in the city. . . . Should Brooklyn and Williamsburg, at some future time, choose to coalesce with the metropolis, and the East River become to New-York what the Thames is to London, a bond of union rather than a dividing limit, then the City-Hall Park will have the permanent preference as the business centre of the whole. On the other hand, if the tardy of commerce and the mania for Mammoth streets should overrule their own true interests, and force the great hotels to abandon the southern Wards, and climb towards the Highlands and Harlem River, then would Union or Madison square, or both united as a double centre, form the future focus of the Metropolis.

"As Union Park now is, it presents to the wealthy citizen an elegant site for his residence, and to enterprising landlords a favorite position for hotels. In the very heart of the metropolis, and but a few minutes by street-car from the two clay-hill pleasure grounds, and a few distinguished boarding schools all sides of it are now completely occupied." (p. 69.)

Madison Square "has a very central position on the Island, indicating, perhaps, the municipal distinction to which it may ultimately arrive, in case the City of New-York should be confined to its present area for a century to come. Elegant mansions are rising rapidly around it, in all the splendor of recent Metropolitan
improvements. For the coming year its most attractive feature is the Hippodrome [see My 2]."

1 "Gramercy Park "has a substantial and ornamental iron railing, and a hedge of sweet privetone, with gravel walks, shade trees and a view, by a lovely fount," (p. 73.)

2 "New York has at last become fully awake to the commercial importance of rail-road conveyance by land, as she has been from the beginning of steamboat navigation by sea. Eight important rail-road lines converge in the metropolis, at the present time, occupying all the routes indicated by nature as either necessary or useful. These eight lines are continuous to the remotest parts of the country, in every direction. One crosses Long Island on the route to New England, whilst another takes the same general direction through Westchester County along the Sound. The former is known as the Long Island, and the latter as the New Haven Railroad. Two also proceed to the Capital of the State, and thence to Boston on the east, Canada on the north, and to all the greater or lesser lakes on the west. Three others meet at Jersey City, one from Lake Erie, one from Easton, Pa., and one from Washington, Baltimore, and Philadelphia, and delivers its freight and passengers at South Amboy, on the way from the southern states. Thus has been completed, within a few years, the entire system of rail-road access to the City, which its social, political, or commercial interests can demand. Independently of these general lines, three others trace a route from North to South. Of these the Harlem Line has its southern terminals at the City-Hall Park, directly opposite the Astor-House.

2 "Two others, the Sixth and Eighth Avenue lines have their common terminus at the junction of Church and Barclay-street, directly in the rear of St. Paul's Church and the Astor; and the Sixth Avenue line has a branch track through Canal-street to Broadway. All these lines of cars relieve Broadway effectually above Fulton-street, whereas South of that street the throng of pedestrians, Carts, Wagons, Carriages, Hacks and Omnibuses, is sometimes not merely impassable, but absolutely immovable.

3 "The means of relieving this part of Broadway, which is the principal route to all the important ferries, have not as yet been devised. The extension of the Bowery to Pearl street, and a railroad by that route to the Battery, would effectually do away the necessary reform; but this would require the latter street to be remodelled, and its breadth increased at least 50 feet, at an expense of millions of dollars. Excepting on the Avenues, or in Broadway, and Greenwhich street, few more railways are either practicable or desirable in the city. The Greenwich-street line has already assigned to a company incorporated for its construction.

3 "The Eighth Avenue of the New Haven and North Road is in Canal-street, opening into Broadway. The Depot of the Hudson River Rail-Road is at the junction of Chamber-street and West Broadway. That of the Erie Rail-Road is at the foot of Duane-street." (p. 205.)

4 The Third Avenue R.R., from City Hall Park to 61st St., is formally opened, and the event is celebrated by a dinner at Van Cott's Four Mile House. Nineteen passenger horse-cars commenced running on July 4.—N. Y. Daily Times, Je 29, and Jl 4, 1853.

5 The corner-stone of the first Madison Square Presbyterian Church is laid at the southeast corner of Madison Ave. and 24th St.—Unpub. records of the church (courtesy of Rev. Charles H. Parkhurst, D.D.). The church was dedicated in 1854 (q.v. D 24).

6 Pres. Pierce arrives in New York to open the World's Fair at the Crystal Palace. At about 10:30 a.m. he landed at Castle Garden, and was received by the mayor and common council, military and naval officers, and private citizens. After reviewing the troops on the Battery, he proceeded on horseback up Broadway through lines of cheering throngs, flag-decked buildings, and welcoming banners.—N. T. Herald, Jl 15, 1853; Proc. App'd by Mayor, XXI: 267. For sketch of the president during his review of the troops, see Illus. News, III: 41.

7 The Crystal Palace is opened with the first World's Fair, distinguished guests being present from all parts of Europe, South America, Canada, and the U.S. The ceremonies include prayer by Bishop Wainwright, a chorale by the N. Y. Harmonic Society, and addresses by Pres. Pierce and the Hon. Theodore Sedgwick. Between 6,000 and 8,000 people are present.—N. T. Herald, Jl 15, 1853; The Palace in its completed form was thus described: "It is probably well known that the only essential materials which enter into the construction of the edifice, are iron and glass. . . . The ground plan of the building is in the form of a Greek cross, the diameter of which is three hundred and sixty-five feet five inches. There are three entrances into the main building . . . These entrances are on Sixth Avenue, on Fortieth and on Forty-second streets. . . . The arch of the nave is semi-circular, and has a foundation for feet one hundred feet wide and twenty-four feet in height. . . . On each side of the central nave . . . extends an aisle fifty feet wide, and reaching to a height of forty-five feet. . . . Over each aisle extends a gallery its equal in width, and which is elevated twenty-four feet above the floor. The crowning feature of the whole edifice is the dome. It is in diameter one hundred feet. . . . The angles made by the cross-form, on the exterior of the building, are seven hundred and five feet. . . . The latter rises twenty-four feet in height, and they give the shape of an octagon to the building. A tower of the same shape rises at each angle. . . . Upon these towers are erected flag-staffs for the display of national colors. The gallery is reached by ten large stair-cases; and there are also eight winding stair-cases. . . . The structure occupies, on the ground, a space of 11,000 square feet. . . . The dome is lighted through the lantern which surmounts it, and also through the windows extending around its sides. Here may be seen thirty-two equestrethons, in colored glass, exhibiting the arms of the Federal Union, and, respectively, of the sister states which compose the Union. Combined also in the appropriate decoration may be seen various national figures and emblems. The amount of iron consumed in the building will not vary far from twelve hundred and fifty tons. The expenses used in the building were twenty thousand square feet."—Illus. News, Jl 15: 70-40. See also Francis's Handbook (1853), 173-35, N. Y. Daily Times, Jl 14 et seq., 1853, and Putnam's Mag., III: 121-29, 376-93.

8 For views of inaugural ceremonies, parts of the building, and many of the exhibits contributed by foreign countries, see Illus. News, II: 35: 40, 41: 45, 51, 76: 77, 116-17, 131, 134, 158-57, 164-95, 188: 81, 199: 97-98; R. H. Dana's Pictorial, 53: 109, 117, 136-37, 144, 152-53, 168, 184-85, 212-13, 223-24, 248-49, 260-61, 288, 304, 320, 373, 411; VI: 52-53, 68-72, 77-80, 100-101, 180-81, 238-29, 243-25. See also Official Cat. of N. Y. Exhibition (1853), and N. Y. Crystal Palace, by Carstenesen and Gildemeister (erroneously spelled "Geldemeister" in Vol. III, p. 709), the architects were denied a place on the panel of architects which rises, "was the first elevator wherein provision was made for stopping the fall of the car in the contingency of the breaking of the hoisting cables." The modern elevator is said to be "a direct evolution" from this machine.—Encyclopedia Am., XI: 225. The palace is shown on Pls. 141-a and 145; Vol. III. Other views of it were sold with the Pyne collection.—Pyne sales catalogue (1847), items 237-40.

9 The Crystal Palace was destroyed by fire on Oct. 5, 1858 (q.v.). See also L. M. R. K., III: 982, and D 15, 1855.

10 Pres. Pierce and his suite take an excursion around the harbour and bay of New York. In the afternoon the president was daguerreotyped at Brady's gallery and received visitors at the Astor House. He attended a banquet in the evening given at the Metropolitan Hotel by the directors of the World's Fair, and later went to Castle Garden to hear Madame Sougat in "Robert Le Jeune." He was also serenaded by the Democratic Union Club at the Astor House.—N. T. Herald, Jl 16, 1853; N. Y. Daily Times, Jl 16, 1853.

11 "The old Manhattan Reservoir, situated in Chambers-street at the rear of the City Hall, is now in course of demolition."—N. Y. Daily Times, Jl 16, 1853; The reservoir is one of the last monuments of the old United States, and only part of the structure was removed, for the reservoir remained standing until 1914.—See L. M. R. K., III: 975.

12 The legislature authorizes the city "to grant the free use of such a portion or portions of any public park or parks that may hereafter be created, made, or laid out in said city, as may not interfere with the general design and utility of any such park or parks, for the purpose of founding a garden for horticultural purposes which shall be under the direction of the New-York Horticultural Society during its existence, and which shall be subject to the free admission of the public at all times, with only such restrictions as may be necessary and proper for the preservation of the gardens and the maintenance of order."—Laws of N. Y. (1857), chap. 552. A similar Act was passed in England in 1833. A "Children's Hall" is performed at the National Theatre in Chatham St. It achieved no commercial success and was played successively more than 200 times.—N. T. Herald, Jl 18, 1853; Ireland, Records of the N. Y. Stage, I: 608. On
Chronicology: Industry and Education: 1842-1860

1853

Nov. 7, Conway's version was produced here.—Brown, Hist. of N. Y. State, I: 73.

An act of the legislature forbids New York, or any other city within the state, hereafter to "loan or give its credit to or in aid of any individual, association, corporation, or incorporation," unless it is "in the aggregate valuation of the real estate within its bounds."—Laws of N. Y. (1853), chap. 639.

The legislature passes an act declaring the land now known as Central Park, bounded by 59th and 106th Sts., Fifth and Eighth Ave., to be a public place, and authorizes the city to take said land for the public uses. N. Y. (1853), chap. 636. See also Gleason's Rep., Am. Scien. & Hist. Pres. Soc. (1911), 458, and L. M. R. K., III: 969. See N. 17.

The legislature directs the city to proceed with the acquisition of the Jones' Wood site for a public park (see Jl 11, 1851).—Laws of N. Y. (1853), chap. 618—622. See also Gleason's Rep., Am. Scien. & Hist. Pres. Soc. (1911), 458—529. A diagram showing the comparative positions and sizes of Central Park and Jones Park is in Illus. News, I: 499. This law was repealed on April 13, 1854 (p. v.).

"There are in the city of New York nineteen parks, valued at $8,000,000."—Gleason's Pictorial, V: 61.

The N. Y. & Harlem R. R. purchases the Port Morris Branch, which was built in 1849 by Gouverneur Morris from the N. Y. & Harlem tracks at 182d St. to Long Island Sound. From chronology supplemented by the company.

The Prescott House at the corner of Spring St. and Broadway is opened. It is owned by Capt. De Groot.—N. Y. Daily Times, Jl 29, 1853. For description and view, see Citizen and Stranger's Pictorial and Business Directory for the City of N. Y. (1853), 20, 21.

The Public School Society ceases to exist as a corporation, and its property is transferred to the city.—N. Y. Daily Times, Ag 1, 1853.

Aug.

"The number of exhibitors who have already displayed their wares in the New York Crystal Palace [see Jl 14], is six thousand."—Gleason's Pictorial, V: 93.

The cornerstone of Zion P. E. Church is laid at Madison Ave. and 38th St.—N. Y. Daily Times, Ag 8, 1853. See also L. M. R. K., III: 934.

"A club house is to be built on the corner of 6th avenue and 25th street, New York, to cost $200,000."—Gleason's Pictorial, V: III. This was the Union Club; it was opened on April 25, 1855 (p. v.).

The total expense for carriage hire for members of the common council, Aug. 8, 1852, to Aug. 8, 1853, was $3,186.25.—Almanac Tweed's bill ($438.50) was by far the largest, exceeding the average bill by $203.90. His nearest competitor's bill was for $266.75.—Comptroller's Report (1853), 57-59.

Julien begins his series of "promenade concerts" at Castle Garden.—N. Y. Daily Times, Ag 29 and 30, 1853; Gleason's Pictorial, IV: 141.

Sept.

The "Whole World's Temperance Convention" assembles at Metropolitan Hall. It adjourned on Sept. 8—N. Y. Daily Times, S: 119, 1853.

The twentieth anniversary of the publication of The Sun is celebrated "in a manner quite novel among the editorial fraternity." During the afternoon, the large printing rooms were thrown open to public inspection, and the "monstrous steam printing press of eight cylinders, the largest and only one of the kind in New York," was put in operation. In the evening the entire establishment was illuminated with from 1,000 to 2,000 lights—one for each window glass. Later, a banquet was served to the employees of The Sun and the "distinguished editors and gentlemen" of the city.—Illus. News, II: 125, which contains a view of the illuminated building. See also N. Y. Daily Times, S: 5, 1853.

A woman's rights convention is held at the Broadway Tabernacle. Lucretia Mott, Lucy Stone, Susan B. Anthony, Lloyd Garrison, and Wendell Phillips are prominent in the movement.—N. Y. Daily Times, S: 8, 1853.

The corner-stone of Cooper Institute is laid.—N. Y. Daily Times, S: 19, 1853. See O 29.

The Clearing House Association is formed and opens its offices at No. 14 Wall St. It moved to 82 Broadway in May, 1854, and to the New York Building, 48 Wall St., in May, 1858.—Losing, Hist. of N. Y. City, II: 698; The New York Clearing House: Laying of the Corner-stone and Opening Ceremonies of the New Building in Cedar St. (New York, 1896). See, further, Je 17, 1875.

St. Michael's Church, erected in 1806 at the corner of 99th St. and Broadway, is destroyed by fire.—N. Y. Daily Times, O 18, 1853; L. M. R. K., III: 934.

Mr. Dion Boucicault, the eminent dramatic author, is in our city. This gentleman has not, like many of his contemporaries, preceded his fame. He has been long and favorably known to our theatrical audiences."—N. Y. Daily Times, O 19, 1853. See also Moses, Famous Actor-Families in Am., 115-40.

The construction of Cooper Institute (see S 17) is progressing rapidly, all the foundations having been laid. "Peter Cooper, Esq., the well known merchant, is the donor, and we understand has chosen as the title of the institution—The Union, for the Mental and Physical Improvement of the Youth of this City, of the State, the Country, and the World." The site chosen for the edifice is opposite the New Bible House, at the corner of Astor place and Fourth avenue. The building will occupy the entire block bounded by Fourth avenue, Astor place, Third avenue, and South street. In the basement will be a hall 155 feet long and 949 wide, intended mainly for a lecture room. The institution will be under the government of a board of trustees.

To become a member and a student of this institution, requires no other credentials than a good moral character."—Illus. News, II: 240-41, which contains a view of the proposed building. Regarding the institute, see also N. Y. Daily Times, S 6, 1853. See, further, F 5 and N 4, 1857.

By this time (cf. Ja 17, 1848), Fourth Ave. from 58th to 110th St. had been opened, at a total cost of $65,602.54.—Man. Com. Coun. (1857), 539.

Another elevated railroad is proposed for Broadway. It is Nov. suggested by one Swett and is thus described: "This railway, when adopted, is to be erected on arms branching out from strong single pillars. The locomotive is to run on the rails, and carry a suspended car, which shall pass between the spaces of the supporting arms. Elevated stations, as shown, will be erected at different cross streets, to let out and take in passengers. This road is to be high enough to be out of the reach of all vehicles below, and thus give no annoyance. The posts can be erected near the curb stone, so as to allow the track to occupy the least used portion of the street."—Illus. News, II: 257-74, which also contains a view. See also Gleason's Pictorial, VI: 200, 201. Elevated roads had been proposed as early as 1832 (q. v., Ja 18) and 1846 (q. v., Mr 23), but the first one was not built until 1867 (p. v., Jl 2).

The first election of members of the board of aldermen and board of councilmen under the amended charter (see Ap 12) takes place. The membership of the board of aldermen is entirely changed as a result of the election, and the new board of councilmen that is now to supersede the board of assistants does not contain a single member of the former board. The amended charter, therefore, has accomplished its purpose so far as the personnel of the common council is concerned.—Proc., Bd. of Ald., LII: 724-729; N. Y. Tribune, N 9, 1853.

There are ninety-two hotels in New York, and they are all full to overflowing. This is an indication of the growth of the city."—Gleason's Pictorial, V: 317.

"New York has one hundred and twelve piers, of which fifty-five are on the North River, and fifty-seven on the East. Some of them extend out nearly an eighth of a mile into the river."—Gleason's Pictorial, V: 319. See D 31, 1867.

The supreme court appoints five commissioners of estimate and appportionment to acquire the lands for Central Park (see Jl 21) (q. v., Mr 21).—Ann. Rep., Com's of Cent. Pk. (1857), 7, 99-101; descrip. of Pl. 149a-4, III: 723. The commissioners completed their work on July 2, 1855 (p. v.).

Two extensive fires, one in East 23d St. and the other in the block bounded by Washington, Troy, and Jane Sts., result in a $600,000 loss of property.—N. Y. Daily Times, N 8, 1853.

The N. Y. Institution for the Instruction of the Deaf and Dumb having purchased Col. James Monroe's country-seat, "Fanwood," on the Hudson just below West 165th St., the corner-stone of a new building (the present one) is laid on that estate on this day.—N. Y. Daily Times, N 25, 1853; Hist. of N. Y. Inst. for Instruction of Deaf and Dumb (1853); Man. Com. Coun. (1857), 671. The new building on 59th St. (see S 30, 1839) was sold to Columbia College. See also L. M. R. K., III: 955.

The corner-stone of the Jews' Hospital (see F 25, 1853) is laid 24
1854

THE ICONOGRAPHY OF MANHATTAN ISLAND

1853 on West 28th St. between Seventh and Eighth Aves.—Tablet in Nov. entrance of present building L. M. R. K., III: 934. The building was

24 land for the building was donated by Sampson Louison, founder of the hospital.—Lossing, Hist. of N. Y. City, II: 690-91. In 1866 (q. v., Ap 17), the name was changed to Mount Sinai Hospital.

Dec. At the close of 1853, the scheme of extending Albany St. through Trinity churchyard to Broadway was again revived. Articles appeared in several newspapers, and meetings of those interested were held. The matter came again before the board of aldermen (see 1847, and later references), and at their last session in 1853 an amendment was offered and carried that Albany Street be extended to Broadway. Prompt action was taken by the vestry (see 1A 9, 1854)—Dia, Hist. of Trinity Church, IV: 88.

5 France, England, Austria, and Prussia unite for the reestablishment of peace between Russia and Turkey and the maintenance of the integrity of the Ottoman Empire as an essential condition of the balance of European power.—Ann. Reg. (1854), 487-88.

10 Harper & Bros. publishing house in Franklin Square is burned again (see 1842). The fire extends across Pearl St., where the historic Walton house, a residence built in 1754, at No. 326, is burned (except for the front wall and the lower storey), together with the Metropolitan Square Hotel and the adjoining house of George F. Coeledge & Bros. next to Harper’s on Perry St. Twenty buildings in all are destroyed.—N. Y. Herald, D 11, 1853.

Costello, Our Firemen, 429.

15 The catalogue of the first (which is also the last) annual sale of paintings by the American Art Union (see My 7, 1849; Ja 29, 1844) contains the following note: “A competent legal tribunal [see 1859; D 3, 1853], being decided that the plan hitherto pursued of distributing works of art by lot was in conflict with the provisions of the Constitution, the committee have deemed it expedient to adopt a new medium of communication between the artist and the public.” —Howe, Hist. of the Metropolitan Museum of Art (1913), 61. To show the influence of the Art Union, despite its legality (as a lottery), upon the progress of art, Miss Howe quotes the following facts gleaned by John Durand: “In 1836 they [artists] could be counted on one’s fingers; in 1851 when the Art Union fell under the ban of the law [cf. 1859; D 31, 1853], American artists formed a large body. The collection of paintings that was to have been distributed this year, and sold at auction in 1853 to close up the institution, numbered three hundred and forty-six works of the public and fifty artists, most of them born on the soil. During the period of the Art Union’s existence it distributed two thousand four hundred works, besides numerous original engravings. The institution, if not the creator of a taste for art in the community, disseminated a knowledge of it and largely stimulated its growth. Through it the people awoke to the fact that art was one of the forces of society.”—Ibid., 61-62, citing Life and Times of J. A. Durand, 172.

16 Gideon Lee Knapp is granted permission to run a ferry from the foot of roth St., East River, to Greenpoint, L.—Proc., App’d by Mayor, XXII: 548. See also L. M. R. K., III: 943.

24 A fire starting in a store in Front St., spreads to the docks and burns several vessels including the “stupendous new ship Great Republic,” designed and built by Donald McKay. The total loss of thesampsons is estimated at $8,500.—N. Y. Herald, D 27 and 28, 1853; Costello, Our Firemen, 325.

28 The boards of aldermen and assistants, notwithstanding the objections of aldermen, adopt resolutions granting the Ninth Avenue Railroad Co. the right to lay a double track from 51st St. through the Ninth Ave. to Gansevoort St.; thence by a single track through Gansevoort St. to Washington St.; and through Washington St. to the Battery, and through Battery Place, between Greenwich and Washington Sts.—Proc., Bd. of Ald., XXII: 44; LII: 398-99; Proc. & Doc., Bd. of Ass’t. Ald., XLVIII: 410-32.

30 The boundary between Mexico and the U. S. is fixed by treaty, the former ceding to the latter about 45,000 square miles of territory in consideration of $10,000,000. This is generally known as the “Gadsden Purchase.”—Winsor, VII: 5351; Macdonald, Select Docs., etc., 390-95.

34 Charles Jarvis, Esq., is commissioned by the corporation to paint a full-length portrait of the late Henry Clay, for $250.—Proc., App’d by Mayor, XXII: 568.

The whole length of water pipe on Manhattan Island, for supply and distribution, amounts to 316 miles and 2053 feet.—Man. Com. Coun. (1854), 223-25, 217.

1854

The New Republican party in the United States is formed.—

Winsor, VII: 282.

Wm. Chambers, an Englishman who visited New York in this year, thus described the city: “Reaching the city by a back-way, as it may be called, we have the opportunity of seeing the worst side first,—straggling half-built streets, with shabby stores, lumber-yards, heaps of rubbish, petty wooden houses, and a general aspect of disorder. At an assigned point the train stopped, and I imagined we had reached the principal terminus. No such thing. The delay was only to detach the locomotive, and to take the train piece-meal into town by horses. And so, drawn by a team of four horses at a trot, the car in which I was seated went smartly up one street and down another,—the rails being laid in the causeway—till we reached the heart of the busy metropolis. . . .

“At the first look, we see that New York very much resembles the most densely-built parts of London. The houses, tall, and principally of brick, are crowded into narrow streets, such as are seen in the neighbourhood of Chelsaide, with the single difference, that many of the buildings are occupied in doors by different kinds of business, with a profusion of large sign-boards in front. . . .

“Hampered as to space, New York has no room for villas; and in this respect there is a marked difference between it and our English cities. . . .

“The principal object of curiosity in or about New York, is the Croton Aqueduct, which few strangers miss seeing. . . .

“Some traveler speaks of the buildings of Broadway as being a mixture of poor wooden structures and splendid edifices. There may be a few houses of an antiquated class, but any such general description is totally inadmissible in the present day. We see for the greater part of its length, a series of high and handsome buildings, of brown sandstone or brick, with several of white marble and granite. Some of these stores and hotels astonish by their size and grandeur. . . . New York, it seems, is celebrated for its extensive dealings in ‘dry goods.’ . . . Stewart’s Store, a huge building of white marble, adjoining the Park, on Broadway, is pointed out as the largest of these concerns; and the amount of business done in it is stated to be above $7,000,000 of dollars per annum. . . .

“Advancing northwards from the more busy parts of the town, the buildings are regular and by over two hundred and fifty artists, most of them born on the soil. During the period of the Art Union’s existence it distributed two thousand four hundred works, besides numerous original engravings. The institution, if not the creator of a taste for art in the community, disseminated a knowledge of it and largely stimulated its growth. Through it the people awoke to the fact that art was one of the forces of society.”

Passing over any notice of the churches of New York—some of them with handsome spires, and generally picturesque in effect—and also the banks, theatres, and other public structures, the edifices most worthy of attention are the hotels. . . .

“In recollection, I am this moment arriving at the Astor House, one of the most respectable hotels in New York, though outdone in decoration and adornments by some of the newer establishments. Before me is a high building of whitish granite, with a front on Broadway of 200 feet, a height of six stories, and forming altogether an independent block, with rows of windows on every side. The ground-floor consists entirely of retail stores of various kinds, and ascending by a central flight of steps, we reach a spacious lobby with marble flooring and pillars. . . . The number of apartments in the house extends far beyond the usual capacity of them. . . .

“Such a place for the Astor, to which there are now many rival up and equal or larger dimensions—the Irving House, the Prescott House, and numerous others, including the two more recently established and peculiarly splendid establishments—the Metropolitan and St. Nicholas, both situated considerably up town in Broadway. The Metropolitan, an edifice of brown sand-stone in the Italian manner, of 300 feet, is superbly furnished, and laid out with 100 suites of family apartments, and can accommodate altogether 600 guests, whose
A. LETTER FROM PRESIDENT LINCOLN TO HORACE GREELEY ANTICIPATING EMANCIPATION PROCLAMATION. SEE P. 1903 (WHERE DATE IS ERRONEOUSLY GIVEN AS MARCH 29).

B. NEW YORK BROADSIDE OF LINCOLN'S PRELIMINARY EMANCIPATION PROCLAMATION ON SEPT. 22, 1862. SEE P. 1905.
wants are ministered to by 250 servants. The cost of building and furnishing this prodigiously large house, is said to have been 1,000,000 dollars. The St. Nicholas, I believe, aspires to stand at the head of its order. It is a splendid structure of white marble, containing 150 suites of family apartments, and with accommodation for nearly 800 guests; I understood, indeed, that preparations were made for the accommodation of at least 1,000 persons. The cost of this establishment has been spoken of as 1,050,000 dollars; but doubtless this is below the mark.

"Standing on the steps of the Astor House, we have the thoroughfare of Broadway right and left, with the Park in front—Barrow's theatre, covered with great gaudy paintings, across the walk; and one would perhaps see better than anywhere else, observe the concourse of passengers and vehicles. ... That which appears most novel, is the running to and fro of railway-cars on East Broadway. ... The cars on these street-railways are hung low, seated like an omnibus, and will stop at any point to take up or set down passengers.

"The necessity for seeking vehicular conveyance arises not more from the extreme length of the city, than the condition of the principal thoroughfares. I am indeed sorry to hint that New York is, or at least was during my visit, not so cleanly as it might be. Statists assure us that it possesses 1500 dirt-carts, and in 1853 cost the sum of 250,000 dollars for cleaning. Where these carts were, and how all this money was expended, I cannot imagine. The mere idea of such an emolument, and the amount of this expense, were barely palatable. ... All along the foot-pavements there stood, night and day, as if fixtures, boxes, buckets, lidless flour-bards, baskets, decayed tea-chesest, rusty iron pans, and earthenware jars full of coal-ashes. There they rested, some close to the houses, some leaning over into the gutter, some on the doorsteps, some knocked over and split, and to get forward you required to take constant care not to fall over them. Odd as this spectacle seemed on Saturday at noon, it was still more strange on Sunday, when bells were ringing, and people were streaming along to church. Passing up Broadway on this occasion, and looking into a side-street, the scene of confused débris was of a kind not to be easily forgotten—ashes, vegetable refuse, old hats without crowns, worn-out shoes, and other household wrecks, lay scattered about as a field of agreeable inquiry for a number of long-legged and industrious pigs. ...—Chambers, Things as they are in America, (London & Edinburgh, 1857), 172 et seq.

Alfred Fairpoint, an Englishman, describing a trip through the U. S. during 1844-1845, makes the following comments on New York, to which he paid two visits:

"My attention, on landing, was first of all attracted by the great height of many houses, which rose from seven to nine and even ten stories above the street. ... Another peculiarity that cannot fail to strike a stranger on his first arrival, is the clearness and dryness of the atmosphere; for, as the coal in general use is anthracite, from which there is little or no smoke, the blue sky is almost always visible, and the houses, built either of brown freestone or bright red bricks, look as clean and fresh as if they had just been remodeled with paint or varnish. Marble, however, is now coming much into fashion for the erection of new houses, as it is quarried in large quantities in several of the neighbouring States. ... Another peculiarity in New York, and, indeed, in most American cities, and one that strikes a domiciled Englishman as being absolutely uncomfortable, is the very general habit of living in boarding-houses instead of keeping private houses or living in lodgings. ... Nearly opposite Astor House, in what is called the Park (but which to my idea is more like a small square), stands the City Hall. ... The cupola, that crowns this hall, commands a noble view of the whole city and its three hundred churches, as well as of the foreparts of most belonging to the city, and the ships that crowd its wharfs, and show the vast commercial activity in New York. ... The system of Fire-engine Companies, or guilds, is another very remarkable peculiarity of New York, and well deserving of notice. The engines are large and powerful machines, capable of throwing large bodies of water with great force to the top of the very highest buildings; and the Fire-companies (for there are many) are formed by some fifty or sixty young men, who elect from among themselves a foreman or captain, a second foreman, steward, and clerk. These men do precisely the duties performed by the Fire-brigade in London, and that, too, without compensation. They usually live together; and, night and day, in all weathers, are ready at their posts; nor is it unfrequent that these men pay the penalty of death from their unnatural exertion; for the engines are propelled solely by hand-labour. Long ropes are fastened to them, and they are dragged by the men assisted by boys to the scene of action. ... The Washington and Fulton Markets of New York are of great extent, and supplied with an almost endless variety of the choicest articles of food. ... Among the many handsome and extensive stores in the Broadway, Taylor's-Saloon carries off the palm from all the rest, by the splendour of its furniture and appointments, which seem rather suited to a fairy palace than a sublunary café and restaurant. ... The principal new buildings, which command the stranger's notice, are the New City Hall, now in progress of erection—a marble edifice, which, when complete, will have cost 2,500,000 dollars; and Cooper's Institute, a very handsome structure, set apart for the cultivation of learning and science. ... Whatever may be said in disparagement of the sewerage and street régime of New York, there has been at all events a most ample supply of water since the completion, in 1848, of the Croton Aqueduct and Waterworks, which may vie in magnificence with the noble hydraulic structures of any age, ancient or modern. ... It is close to Reservoir-square that the Crystal Palace for the New York Exhibition was erected. ... My next visit was to the Academy of Music, the largest and most elegant theatre of New York, where an Italian troupe were performing. ... The University of New York, situated in Washington Square, is one of the finest buildings in the whole city. It is built of marble, in the English collegiate style, and has a frontage 180 feet long, with wings, and flanked at each end with towers; the centre being occupied by the chapel, which, though small, is beautifully decorated somewhat in the style of Kings College. ... During my stay I visited Harlem ... it is one of the pleasantest suburbs of the capital, from which it is separated by the Harlem River. ... I crossed the river by the fine, modern stone bridge, of many arches, the design of which does great credit to its architect. ...—Fairpoint, Uncle Sam and his Country (London, 1857), 25-35, 122-25. ... Hardly one of the landmarks of fifteen years ago [Broadway] remains; the Hospital, with its greenery, St. Paul's and the Astor, with the Museum, the City Hall, the Stuyvesant Institute, and one or two at least, among the many curious bits of antiquity remain to matronize the young newcomers. ... Eight years ago [see My 21, 1846] Trinity Church was finished, and in spite of all its defects, it was a valuable gift to the city. It took the place of a meagre, ugly structure, far inferior in its proportions and attractiveness to its two churches, St. Paul's and St. John's, whose spires have never been surpassed by any structures of the kind in the country. (The Park Street Church, in Boston, Mass., has a very beautiful spire, well worthy of distinguished mention.) It has cost a very large sum of money, and if it had only been allowed to cost a little more, so that the whole interior could have been constructed of stone, instead of plaster, it would have effected infinitely more good for the community. ... between Waverly Place and Tenth street. Sometime ago, they showed themselves between Tenth street and Union Square, and it cannot be doubted, that in ten years, a dwelling-house will be as
rare a sight in Broadway, as a wholesale grocer's shop in Fifth Avenue.

... If the back of the City Hall is cheap freestone, because unimaginative Aldermen thought it never would be seen [It was so constructed as a measure of economy, and for no other reason. — See summary of 1882 et seq.], so also the side of the Metropolitan Hotel is brick, because nobody ever goes into Prince Street; and Mr. Renwick puts a wooden cornice, and wooden ornaments painted white, on his La Farge Hotel, because no one will ever find it out, and a wooden spire on Grace Church because it saves a little money, and a fresh coat of paint makes marble of it any day. ... — The U. S. Illustrated (n. d.), by Chas. A. Dana, the volume described "The East; or, The Seaboard States," pp. 159-173, 159. (The Lib. of Cong. catalogue assigns the date 1853 to this work, with query; but the reference, supra, to the completion of Trinity Church "eight years ago" would place the date of Dana's text in 1845.)

"From 1854 to 1856 the Board [N. Y. Stock and Exchange Board] occupied the top floor of the old Corn Exchange Bank building, which stood on the corner of William and Beaver Streets, on the site of the present [1894] building of the same name." — Eames, N. Y. Stock Exchange, 37.

In this year, the Five Points House of Industry was incorporated, on the application of 30 prominent citizens of New York.

-Lossing, Hist. of N. Y. City, 635; King's Handbook (1893), 427.

In this year, the Association for Improving the Condition of the Poor continued its studies in behalf of better tenements (see Je 13, 1853), comparing the number of deaths in each ward with the wealth, population, character of the dwellings, and proportion of foreign to native element. It made a minute economic and statistical examination of the Eleventh Ward — the first scientific sociological study of conditions in New York City. It also organized "The Workmen's Home Association" for the purpose of "erecting one or more model tenement houses for the laboring classes in order to solve the problem of providing commodious and well ventilated apartments supplied with modern conveniences at a price within the means of the poorer classes, which should, if practicable, defy the expenses of the outlay, repairs, insurance, and keep good the capital invested." — De Forest & Velten, The Tenement House Problem, 84-85.

About 1854-55, Samuel P. Townsend, who had been a contractor, but who made his fortune in the manufacture and sale of a sanarapilla syrup, which he advertised extensively (see Belden, N. Y. Past, Present & Future, 1849, etc. and Pl. 133-3, Vol. III), built, on the north-west corner of Fifth Ave. and 34th St., a tall brownstone dwelling, said to be the first (for the purpose of detention, etc.), to be used as "the hospital for the insane," and from which the patients were removed to the hospital for the insane in Bedloe's Island (ibid., HI: 1), on Jan. 1, 1854. But, alas! it was to cost the city $7500 in the first year alone.

—- In this year, Henry C. Atwood (see 1847) began the construction of a St. John's Masonic Hall at Delancey St. and the Bowery, using the cornerstone of Oct. 13, 1854 (A, B. C.), which, had it been reposed until 1847 (p. 2), in the foundation of the Barbadoes St. Hall. In Jan., 1906, when workmen were digging for the subway, this stone was unearthed, 100 ft. east of The Bowery, on Delancey St.— Proc. of the Grand Lodge of N. Y. (1908), 74-75.

— Two years after the fire which almost completely destroyed Fraunces Tavern (see Je 15, 1852), Valentine's Manual showed a view of the building, which had at that time "three and half stories below the roof line," and "with an attic beneath the roof." The roof is "an ordinary gabled roof, with the gable end on Pearl street. This is the first complete and authentic contemporary picture of the building known to exist,—St. Mémín's drawing of 1798 showing only the roof." Later changes are thus described:

"At some time between 1854 and 1879, the attic story was squared down, thus making one story, with a flat roof, as shown in an illustration opposite page 144 of volume VIII of the Magazine of American History. Alterations were also made in the number of doors and windows of the first story.

In this year, Wall St. was widened, from Broadway to Nassau St., to a total cost of $1735,3-5—Man. Com. Coun. (1857), 540.

In this year, Bloomingdale Square was opened.—Man. Com. Coun. (1857), 541.

By this time, 125th St., from Eighth Ave. to the Bloomingdale Road, had been opened.—Man. Com. Coun. (1857), 540. See Ap 5, 1857.

In this year, Alfred Tallis began to issue a series of views entitled Tallis's New-York Pictorial Directory, And Street Views of All The Principal Cities And Towns In the United States & Canada, etc. For an account of these, see the descrip. of Pl. 147, III: 719 (note). See, further, 1865.

In this year, a set of four lithographic views, entitled "The Life of a Fireman," drawn by L. Maurer and printed by N. Currier, lithographer, was published. (See further, Vol. I, 1857-8.)

-The Perris insurance map of this year, Vol. VI, Pl. 82, shows, on the block-front on the west side of Fourth Ave., between 32d and 33d Sts., the "Locomotive House" (round-house), "Smith shop," and "Machinist's Shop," also a "Wood Yard" which occupies the western half of this block on the Madison Ave. side. These are designated the shops and yards of the N. Y. & Harlem R. R. A view of Fourth Ave. showing the round-house and a small station at the north-west corner of 32d St., horse-drawn cars, with the words "New York, Springfield and Boston Express" on one of them, and the entrance to the tunnel at 34th St. in the distance (centre), is reproduced in the N. Y. Eve. Post Supp., F 1, 1913. This block front on Fourth Ave. is now occupied by the Park Ave. Hotel. Opposite it, on the east side of Fourth Ave., in 1854 (see Perris Map, Vol. VI, 1857-8) were the stables of the Harlem R. R.

A map of New York City and adjacent islands was made by J. F. Harrison and published by M. F. Dripps in this year; a copy is filed as Map No. 1571, in bureau of topography, borough president's office.

In Valentine's Manual for 1854, there were published a map of the city, 1854; view of the Jumel mansion (Morris house), 366; residence of the late Col. Marinos Willett (mayor, 1807-8), 436; former Gov. Clinton's residence in Pearl St. (opp. Cedar St.), 446; the Abraham Van Nest residence (on Bleeker St., bet. Charles and Perry Sts.), 538; the residence of the late Bishop Moore (bet. Ninth and Tenth Aves., 22d and 23d Sts.), 536; the Beekman mansion (near East River and 24d St.), 544.

For Jacob A. Westervelt, in a message to the common council, Jan. 1, 1854, states that "The pavement of Messrs. Russ & Reid as laid in Broadway, from the South ferry to Union square, is undeniably the best, the most durable and the most serviceable of any ever tested in our city. . . . In a portion of the Bowery, a species of pavement, claimed to be of Belgian invention, has been laid down about a year, and has proved, thus far, adequate to sustain the traffic on that thoroughfare. A contract has recently been entered into, with Messrs. Cook & Co., to pave Grand Street, from Broadway to the East River, and the entire length of Fulton Street, with this species of pavement." — Annual Message from the Mayor, Ja 2, 1854, p. 9.

A record of the city's "vital statistics" begins with the annual report of the city inspector to the common council. For the first time this report includes a record of births and marriages (see Ap 15, 1853), as well as of deaths; the former are reported for the last six months of the year 1853, viz., 10,157 births, 3,203 marriages.—Ann. Rep. City Inspector (1854), 155-57.
House (about to be opened on Broadway between Bleecker and Amity Sts.) are destroyed by fire. The loss is about $1,000,000. — N. T. Daily Times, Jan. 9, 1854.

Lydenberg, Hist. N. T. Pub. Library (1825), 17, 22-23; L. M. R. K., III: 936. See also Mrs. Lamb's account of the Library in Mag. Am. Hist. (1886); XVI: 19-21, and Man. Com. Coun. (1856), 544-45. The interior and exterior of the building are shown in Gleason's Pictorial, VII: 124. The library also appears on the border of PL 113, Vol. III. The building was erected in 1859 (q. v., S. 1) and 1883 (q. v.).

Trinity vests appoint a committee to oppose the measure, passed by the board of aldermen (see D, 1853), which aimed to extend Albany St. through Trinity churchyard. This committee was directed to call to its aid "any persons whose co-operation they may deem useful in carrying out the objects of their appointment. This repeated attempt to consecrate this ancient burial-ground was a subject of general discussion. Indignant comments were made upon the motives of the aldermen. On Sunday, Feb. 5, the Rev. Sullivan H. Weston preached a sermon in Trinity Church on the "Sanctity of the Grave," which was repeated by request, on Feb. 12, in St. Paul's Chapel, and afterwards printed.

A hearing before the street committee of the board of aldermen was held the same day,adjourned from time to time, while arguments were made in favour of the alleged improvement by the Hon. Edward Sanford, and against it by Mr. Peter Y. Cuyler. The execution of the resolution was then deferred. In January, 1855, a new board of aldermen at its first meeting passed an ordinance "to stay all proceedings in the matter." This was fortified by an order of the supreme court that all proceedings be discontinued. It had been a "resolute and bitter conflict." — Dit., Hist. of Trinity Church, IV: 388-89. Another, final, attempt to join Albany and Pine Sts. was begun on Dec. 31, 1857 (q. v.).

The almshouse erected in the Park in 1795, subsequently known as the "New York Institution," and at this time called the "New City Hall" and used for courts and public offices, is destroyed by fire. The public documents, however, as well as most of the books in the law library, are saved. The loss is estimated at more than $100,000. — Ev. Post, Jan. 20; N. Y. Herald, Jan. 20; Com. Adv., Jan. 20, 1854; Docs. Bd. of Councilmen, I: 496-98; II: Dec. No. 4, p. 27. See also L. M. R. K., III: 973, and describ. of PL 95-b, III: 835. See also Jan. 25 and Feb. 8.

The "Freedom of the City in a gold box" is formally presented to the Queen of the British ship "Three Bells," by a joint committee of the common council, at the Astor House, for rescuing the passengers and crew of the steamship "San Francisco," which was wrecked in the Gulf Stream, while bound from New York to San Francisco in the month of January, 1854. — N. T. Daily Times, Jan. 27, 1854. See also N. Y. H. S. Collections (1883), 427-29, 558-61.

"Real estate in this City is experiencing a decided advance in value. After a few months of quiet, in which few transactions have taken place, the fever of speculation seems to have revived."

"The natural result of this excitement is obvious. As property in the lower section of the City, the purely business locality, increases in value, in consequence of the demand for enlarged accommodations, the value of real estate upon the riverfront is increased. A minimum of prices for dwelling-house sites is probably existing at the present moment. The demand for all species of down-town property, indicates a general desire among our merchants to secure eligible localities for trade, and a determination to defer the purchase of more sumptuous dwellings. Hence the present disparity in prices in property on the upper and lower extremities of the City. Good dwellings can be obtained within two or three miles of the City Hall, for sums scarcely one-fourth of the amount required for the purchase of an ordinary store lot below Canal-street. Lots of 100 feet by 28, situated on Fifth avenue, have lately sold for $10,000 to $20,000. Others, on the Eighth-avenue, 26 by 100 feet, were disposed of a few days since, at $14,500."

The moment, however, that we look below the line of Canal and Water streets, we find an amazing difference. The house and lease of Lot No. 185 Broadway, sold last week for the very considerable sum of $76,550. Property in Chambers-street rendered valuable by the improvements now in progress in that thoroughfare, is held at rates which a few years since would have been deemed exorbitant. A lot of considerable depth, held upon a lease, with a modern-built freestone store is held at $52,000. . . .

"Of Broadway, it is needless that anything he said. The indomitable enterprise of the wealthy merchants, whose steadily established firms lend it an air of richness and prosperity, is enhanced by a resolution that tells wonders of the amounts of capital yearly expended there, will always make that avenue an ornament to the City." — N. T. Daily Times, Jan. 26, 1854.

The supreme and superior courts are assigned quarters in "the stone building lately erected in the Park, for the use of the courts." — Proc., App'd by Mayor, XXII: 20, 16.

The common council (as permitted by the new charter of April 12, 1853, q. v.) celebrates Washington's birthday by giving a collation to the "Veterans of 1812." Comptroller Flagg refused to pay James Taylor's bill of $541.42 for this collation, and suit was brought against the city to recover the amount. — Comptroller's Report (1854), 1666-67.

The board of councilmen considers a resolution that, as the "former flagroom in the City Hall" is now occupied by "telegraphic signals," a suitable place be fitted up in the city hall to be used as a flag room; also that two national flags and one city flag for the city hall be procured, as those heretofore used are worn out. — Proc., Bd. of Councilmen, III: 456-57. A joint resolution to this effect was approved by the mayor on April 13. — Proc., App'd by Mayor, XXIII: 77.

"Mr. Waddell's residence [see Ap 27, 1844], at the corner of Mar. Fifth Avenue and Thirty-eighth-street, may be called a suburban villa, and is remarkable for being enclosed in its own garden ground, which is as high as the original level of the island, and descends by sloping grass banks to the grade of the street. . . . The general composition and effect is picturesque and commendable, notwithstanding an occasional want of character and correctness in the details. It is built of brick stuccoed, with brown sand-stone dressing, the color of which does not quite harmonize with the yellowish gray of the walls. . . . A conservatory, and various offices extend to the left; there is also a Gothic cottage lodge on the north side of the garden, of which, and of the whole ground, a fine view is obtained from the terrace of the Croton Reservoir; while two or three old trees still standing in the garden on that side add to the semi-rural character of the edifice." — Putnam's Monthly, Mr. 1854. See also Ellet, The Queens of Am. Society. The house is shown on PL 293-a, Vol. III. The property was sold in 1855 (q. v., Ap 12).

An alliance is signed between England and France in behalf of Turkey and against Russia. — Croes, Hist. of Eng. and Great Brit., 960-61.

The Newboys' Lodging House opens, under the direction of the Children's Aid Society (see F, 1853), at 128 Fulton St. in the top story of the Sun building. — N. T. Daily Times, Mr 20 and 22, 1854. See further, Ap 29, 1858.

France, as an ally of Turkey, declares war on Russia. — Maced. Hist. of France, 323-24.

31-32. The first treaty between the U. S. and Japan is signed at Kanagawa and provides that the ports of Simoda and Hakodate shall be open to American. Ratifications were exchanged on Feb. 21, 1855, and the treaty was proclaimed on June 22, 1855. — U. S. Treaties, etc., (Washington, 1910), I: 599-98. This treaty was negotiated by Commodore M. C. Perry (see N, 1852).

The salary of the corporation counsel is fixed at $6,500, with the Ap
1854 THE ICONOGRAPHY OF MANHATTAN ISLAND

understanding that "no costs, fees or charges," shall be hereafter allowed him.—Laws of N. Y. (1854), chap. 122.

2 The Northwester Reformed Dutch Church on 23d St. between Sixth and Seventh Avenues is consecrated.—N. T. Daily Times, Ap 3, 1854. See also L. M. R. K., III: 936.

3 An act is passed to regulate stage routes in New York and to provide for the formation of companies to operate them.—Laws of N. Y. (1854), chap. 142.

4 The mayor and common council direct the counsel of the corporation to prepare an act to be presented to the legislature authorising the city to raise, by the creation of public stock, the sum of $600,000 for the erection of a "new City Hall."—Prev., App'd by Mayor, XXII: 39. See My 13.

5 "The number of public lamps in New York city is 6,906; and the amount of maims, two hundred and fifty six miles and a half."—Gleason's Pictorial, VI: 223.

7 The legislature incorporates the American Geographical and Statistical Society for the purpose of "collecting and diffusing geographical and statistical information."—Laws of N. Y. (1854), chap. 221; Lossing, Hist. of N. Y. City, II: 644. See Ap 8, 1872.

8 Delmonico's restaurant at the corner of Broadway and Morris St. is sold at auction.—N. T. Daily Times, Ap 15, 1854. It was reopened as the Stevens House (see Je 21, 1856).

9 An act authorises the city to borrow $200,000 "for the purpose of building a new reservoir [see Je 70, 1853], purchasing lands, and extending the Croton water-works."—Laws of N. Y. (1854), chap. 342. See Ap 14, 1856.

10 The first Clinton Hall, at the south-west corner of Nassau and Beekman St. (see N 2, 1870), having been sold, and the Opera House, at the intersection of Astor Place and 8th St., having been purchased April 16, 1853 (p. v.), by the Clinton Hall Assn., and remodelled, it is named Clinton Hall, and opened on this day by the Mercantile Library Assn.—13th Ann. Rep., Merc. Library Assn. (1854), Brown, Hist. N. T. Stage, I: 413, 422. Cf. N. T. Daily Times, II 8 and 10, 1854. At this time, the books of this library numbered 43,000.—N. T. Times, N 7, 1850. The building was demolished in 1890 (p. v., My).

11 "The improvement of property in Barclay-street is not inferior to that of any other thoroughfare in town. . . . The aspect of Beekman-street is totally changed. The iron railing of Dr. Springs [the Brick] Church is set back to the new line of the Street, leaving a clear space of fifteen feet to be thrown into the carriage-way uninterrupted from Park-row to Pearl-street. The new green-streets which the newly built house at the corner of the Church-yard, on Beekman-street, have completely disappeared. Workmen were busily engaged yesterday in laying the new sidewalks, removing the gas lamp posts from the old lines, and regrading where the improvement has taken place. The vaults at the corner of Nassau and Beekman are going forward as rapidly as weather will permit. The new range of stores between Nassau and William are nearly finished."—N. Y. Daily Times, Ap 19, 1854.

25 A fire occurs at No. 231 Broadway a few doors above the Astor House. About 13 men are killed and 21 injured, and property to the amount of $143,000 is destroyed.—N. T. Daily Times, Ap 26 et seq., 1854.

May

Licenses for 23 two-horse omnibus lines have been issued since July, 1853. The large number is evidently due to the Crystal Palace exhibition, and the demands of sight-seers. Each line operates from one to 36 stages.—Man. Com. Coun. (1854), 3t-40.

There were in this year, seven "city railroads" or street-car lines.—Man. Com. Coun. (1854), 141.

The demolition of old Clinton Hall at Nassau and Beekman Sts. is begun. The Nassau Bank building is to be erected on the site.—N. T. Daily Times, My 6, 1854; L. M. R. K., III: 936.

The corner-stone of St. Luke's Hospital is laid on the north-west corner of Fifth Ave. and 54th St. It was founded by Rev. Wm. Augustus Muhlenberg, D.D.—N. Y. Daily Times, My 8, 1854; tablet at St. Luke's Hosp., 113th St. & Amsterdam Ave. See also

Richardson, N. Y. & its Institutions, 167, 370, and L. M. R. K., III: 955. The building was opened on May 11, 1858 (p. v.).

The "Ericsson" (see Ap 27) is successfully raised.—N. T. Daily Times, My 12, 1854.

A mass meeting of about 5,000 people is held in City Hall Park to protest against the Kansas-Nebraska Bill and the proposed repeal of the Missouri Compromise. Joseph Simpson, Benjamin F. Butler, Thos. F. Fessenden, and others make addresses.—N. T. Daily Times, My 15, 1854. See also Lossing, Hist. of N. Y. City, II: 653-54. The bill, however, was passed by the house of representatives on May 22, and by the senate on May 25, and was signed by Pres. Pierce on May 30.—Rhodes, Hist. of U. S., I: 480-90.

Mayor Westervelt approves a resolution of the common council to advertise for plans for a new city hall. See Ap 29, 1854; of stone, and brick, 500 by 150 feet, and to cost $600,000. It is to be erected 25 feet from the new building now known as the new court house.—Prev., App'd by Mayor, XXII: 109. Later the time for receiving plans was extended to July 10.—Ibid., XXII: 142. A plan was chosen on Dec. 15 (p. v.).

The "United States Inebriate Asylum" is organized, after its incorporation on April 15 (Laws of N. Y. 1854, chap. 247).—The Hist. of the First Inebriate Asylum in the World, by its founder, J. E. Turner (1888).

Upon the invitation of the common council, ex-Pres. Fillmore arrives on a visit to New York. During his stay, he dined with the city officials at the St. Nicholas Hotel, attended the exhibition at the Crystal Palace, and visited the public institutions. At his request, there were no popular demonstrations.—N. T. Daily Times, My 18-20, 1854.

Nible's Garden and the grounds around it "have just undergone a thorough repair and are vastly improved thereby. The dimensions of the house have been so increased, by the addition of a new tier of upper boxes, that thirty-two hundred persons can now be accommodated with seats."—Gleason's Pictorial, VII: 532.

A commercial reciprocity treaty with Great Britain is signed at June Washington. It provides for the use of the sea fisheries of the British provinces by Americans, by enlarging the rights accorded them under the convention of Oct. 20, 1818, and grants to British subjects of British rights along the coast southward to 36° N. L. It establishes a free intercourse between the British provinces and the U. S. of flour, breadstuffs, fruit, fish, animals, lumber, and manufactured articles. Ratifications were exchanged on Sept. 9, and the treaty was proclaimed on Sept. 11.—U. S. Treaties, etc. (Washington, 1819), I: 668-72.

Cholera having appeared in the city, the first choler hospital is opened at No. 165 Franklin St. On July 24, another hospital was opened in Mott St.—N. T. Daily Times, Ja 1, 1855.

A new 6-story Church built by the Anthony St. congregation (see Je 29, 1848) on the north side of 18th St., west of Fifth Ave., is consecrated, the congregation worshipping some time previously in the chapel of the N. Y. University on Washington Square.—N. T. Daily Times, II 1, 1854; Mag. of Am. Hist. (1888), XII: 60-63; L. M. R. K., III: 92. See Ap 6 and 5, 1858.

The bill presented to the comptroller by Timothy Garrick throws July an interesting light on the celebration of the Fourth by the common council, as authorised in the charter of April 12, 1853 (p. v.):—"To Timothy Garrick, Dr.

To 15 baskets Heidelick wine, at $25 . . . . . $225 0
10 gallons Otard brandy, at $6 . . . . . . . $60 0
1 barrel lemonade . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $40 0

Total $325 0"—Comptroller's Report (1854), 1068.

The Presbyterian congregation which formerly worshipped in Bleecker St. lays the corner-stone of a new church at Fourth Ave. and 22d St. The stone is the one used in the Bleecker St. church.—N. T. Daily Times, II 8, 1854. See also L. M. R. K., III: 930 and 931.

The new theatre in New York, on the site of Metropolitan Hall leased to J. A. Sullivan, when completed, will have one hundred per cent. of sand dollars. It will comfortably hold four thousand persons. There will be three rows of boxes, as well as the parquette. The main entrance will be next the Bond street House, and there will be eight other means of exit in Mercer street, six for the public and two for the stage. There are to be twenty-eight private boxes, each holding ten persons, in front of the first and second tiers. The proscenium will be twenty-eight feet in width, and on either side will
have ten private boxes, each containing seats for ten persons. The stage itself will be fifty-five feet deep and ninety-six feet wide.

5 . . . the season will probably commence in September."—Gleason's Pictorial, VII: 79. See S 18.

7 The common council resolves that the remains of Maj.-Gen. Wm. J. Worth be interred in the ground bounded by Broadway, Fifth Ave., and 25th St., and that a monument to his memory be erected thereon. The council directs to advertise for plans for a granite monument.—Reports on the Erection of a Monument to the Memory of Wm. J. Worth, late Major-General of the U. S. Army, by the Special Committees appointed by the Common Council of the City of N. Y. (N. Y., 1857) 10. See also descript. of Pl. 148-3, II: 760. See, further, D 5.

9 The Circular Presbyterian Church in Broome St., erected in 1821 (q. s., S 19), is destroyed by fire.—N. Y. Daily Times, Ag 10, 1854. It was rebuilt on the same site. The new church was opened on May 6, 1856.—Ibld., My 7, 1857.

There are now in New York city 33 lines of omnibuses, with 231 vehicles; also five city railroads, with 164 cars.—Gleason’s Pictorial, VII: 111.

The corner-stone of Firemen’s Hall at 117 Mercer St. is laid.—Proc., App’d by Mayor, XXII: 201; N. Y. Daily Times, Ag 22, 1854.

For description and view of the building, see Man. Com. Coun. (1856), 179. This building became the headquarters of the fire department when the paid organization was established in 1865 (q. s., N 3).

26 "Operations on the floating battery for harbor defense, at Ho-hoken, opposite New York, have been resumed."—Gleason’s Pictorial, VII: 125.

Sept. The theatre built on the site of Metropolitan Hall (see Ja 8 and Ag 5) is opened as the "Great Metropolitan Theatre and New York Opera House."—N. Y. Herald, S 19, 1854. See also L. M. R. K., III: 986. See, further, D 27, 1855.

20 The comptroller, in his report for the year ending June 30, 1854, compares the carriage hire (see Ag 27, 1853) of the old board of aldermen for the six months to Jan. 1, 1854, with that of the new "reform" board for six months to July 1, 1854.

In the old board 8 did not ride, in the new, 13. In the old board average hire was $72 per member, with Tweed high man at $144.90, in the new, the average is $20.50 (Tweed was not a member of this board).

Twenty-six of the sixty members of the new board of 60 commissioners put in no bills for carriage hire.—Comptroller’s Report (1854), 1019-20. While the "friends of frugal government may take courage" at this retrenchment, the comptroller expresses concern over "the lavish expenditures which prevail generally in the use of stationery." He observes that this expenditure for the 123 members of the state assembly, in 1853 (Mr. Flagg was state comptroller then), was only $1,192, while the city board of aldermen in the past 12 months has spent $4,379.90. The purchases in a single month included 287 reams paper, 12,500 envelopes, 82 boxes quill pens, 82 pieces "patent rubber," and the same number of "pieces silk; braid, "bottles Hart’s cambric ink," "pints Hadley’s fluid," "three key openers," "messengers’ letters on the side—three lines each," "tin diaries" with lettering on the side—"one line each," "Congress holders," and "ivory letter stamps."

In the board of councilmen, the comptroller adds, "they have an inhale at twelve dollars; seven and a half dozen at $78.75, and three dozen at $41.50, and other articles equally extravagant." He is satisfied these expenditures for stationery "might be retrenched one half," and asks for permission to supply the public serve by the public service.

Oct. The Academy of Music on the corner of 14th St. and Irving Place is opened.—N. Y. Daily Times, O 3, 1854. See also Brown, Hist. of the N. Y. Stage, II: 24—25, 55, 102; Lossing, Hist. of N. Y. City, 11: 68; and L. M. R. K., III: 982. It was destroyed by fire on May 21, 1866 (q. s.).

England and France begin the siege of Sebastopol, the chief naval station and arsenal of the Russians in Crimea.—Cross, Hist. of Eng. & Greater Brit., 961-62.

The corner-stone of the Fifth Avenue Baptist Church, at the south-east corner of 35th St., is laid.—N. Y. Daily Times, O 20, 1854. It was dedicated on June 8, 1856 (q. s.).

The Russians under Menschikoff are defeated at Balalava in the Crimea. The battle was for the charge of the Light Brigade.—Innes, Eng. and the Brit. Empire, IV: 260-61.

Columbia College celebrates the centennial of its founding at King’s College.—N. Y. Daily Times, N 1, 1854.

The "Exhibition of the Industry of All Nations" comes to an end, and the Crystal Palace closes.—N. Y. Daily Times, N 1, 1854.

Fernando Wood, "Soft" Democrat, is elected mayor of New York City. The election was a close one, and for several days there was doubt as to which candidate had been successful. The election was attended by frauds and followed by such serious disturbances that the military had to be called out.—N. Y. Daily Times, N 10—13, 1854. Wood followed Jacob A. Westervelt (see N 2, 1852) and, after being succeeded by Daniel Tilden in 1857 (q. s., D 1), he was again elected mayor in 1859 (q. s., D 6).

The New York Historical Society celebrates its semi-centennial anniversary. In the afternoon a large audience assembled at Niblo’s Garden, where George Bancroft delivered the anniversary address, and in the evening there was a dinner at the Astor House.—N. Y. Daily Times, N 21, 1854.

The new house of refuge on Randall’s Island is dedicated.—N. Y. Daily Times, N 25, 1854.

The common council appoints the ground at Broadway and Fifth Ave. between 24th and 25th Sts. for the monument to the memory of Gen. Worth (see Ag 7) and adopts the plans and drawings made by James G. Batterson. Estimates for a 50 foot monument are to be solicited.—Reports on the Erection of a Monument to the Memory of Wm. J. Worth, et al. (N. Y., 1857), 10—11; descript. of Pl. 148-5, III: 710. See also Proc., App’d by Mayor, XXIII: 265—78, 285—329.

The board of aldermen adopts the plan of Martin E. Thompson for a "new city hall" (see My 13). This contemplates the erection of two buildings in the rear of the present hall, at equal distances apart and connected by wide passages.—N. Y. Daily Times, D 19, 1854. See, however, F 17, 1855.

The R. C. Church of the Holy Cross in 424 St. between Eighth and Ninth Aves. is dedicated.—N. Y. Daily Times, D 19, 1854.

The city assembly rooms on the east side of Broadway between Howard and Grand Sts. and Wood’s Minstrel Hall are destroyed by fire. The loss is about $200,000.—N. Y. Daily Times, D 21, 1854. See also L. M. R. K., III: 981.

The Madison Square Presbyterian Church (see Ji 12, 1853) is opened and dedicated.—N. Y. Daily Times, D 25, 1854. See also L. M. R. K., III: 951.

The N. Y. & Harlem R. R. is required by ordinance to discontinue the use of steam in Fourth Ave. south of 42d St., after Jan. 27, 1856.—From chronology supplied by the company.

Parc Place is opened through the grounds of Columbia College to College Place.—Proc., App’d by Mayor, XXII: 375.

The name of Orange St. is changed to Baxter St.—Proc., App’d by Mayor, XXII: 375.

Expenditures by the city in 1854 include $24,972 for the Battery enlargement; $7,202.53 for rebuilding Essex Market; $5,718.19 for the extension of the new city hall; $40,000 for the south wing of the workhouse on Blackwell’s Is.; $2,699 for rebuilding Catharine Market; $50,000 for rebuilding Union Market; and $22,043.05 for building Firemen’s Hall (see Ag 21).—Man. Com. Coun. (1855), 199, 200, 206, 213.

1855

The Free Soil party is formed in the U. S.—Winson, VII: 288.

In this year, Henry Bessemer invented his process for the direct conversion of molten cast iron into steel by blowing air into the molten mass.—Scientific American, Je 5, 1857.
In this year, when the shaft of the Washington Monument at
Washington, D. C. (see J a 31, J l 4, 1848) had attained a height of
152 ft., work on it had to be suspended for lack of funds. The
advent of the Civil War later interfered with the public interest in
the enterprise, and the funds of the society were but little aug-
mented. In 1876 (q. v., Ag 2), congress appropriated money for
the continuation of the work.—Harvev, Monograph of the Wash-
ington Nat'l Monument (1855), 11; Harvey, Hist. of Washington
Nat'l Monument and Washington Nat'l Monument Soc. (1902), 56
et seq. See also Ap 20, 1871.

In this year, 161,490 immigrants arrived at New York.—
Arrivals of Alien Passengers and Immigrants (1891), table 7.

In this year, the first "model" tenement-house in New York
City was erected, by the Workmen's Home Association (see 1848),
on Elizabeth and Mott Sts. It was six stories high, contained 87
three-room apartments, and was supplied with Croton water and
lighted with gas. The ground plan of the building, however, was
very defective, two-thirds of the rooms being dark and unventi-
lated. In a few years, the house degenerated into one of the worst
in the city.—De Forest & Veiller, The Tenement House Problem,
86-87.

In this year, the U. S. assy office first occupied the old U. S.
Bank building at 30-32 Wall St., which the government had pur-
chased in 1854 (q. v., Ag 21). The sub-tenure was in the same
building.—N. Y. City directories. The sub-tenure moved in 1861
(q. v.), but the assy office remained here until 1912, when it
was moved to the building on Pine St.—Ann. Rep., N. Y. At-
ternating-tire, U. S. treas. dept. (1912), 119; ibid. (1913), 270. The
old building on Wall St. was demolished in 1915, but the historic
façade was carefully taken down and is now preserved in the
Metropolitan Museum of Art. The present building was erected
on the site as a wing of the Pine St. office.—Verplanck, The Site of
the Assay Office (1921); descript. of Pl. 57, I: 430 (footnote) and

In this year, the College of Physicians and Surgeons (see Mr
12, 1807) began the erection of a new building at the north-east
cor. of Fourth Ave. and 23rd St.; when it was ready for occupancy
in 1856, the college moved from the old building in Crosby St.
(see 1856). The new building was completed in 1858.—Man. Com.
Conn. (1856), 657; L. M. R. K., III: 924-975. See also Je 1860 and 1886.

In this year, George Higgins erected, opposite the Croton
reservoir on Fifth Ave., a row of dwellings known as "The House
of Mansions" or "The Spanish Row." The project, however, was
not a success, and in 1860 (q.v., Je 18) the Rutgers Female College
moved to the neglected buildings.—Maurice, Fifth Ave., 251. See
also Pl. 148-149, Vol. III.

The New Bowery was being cut through and, part of the old
Jerrold property (near Oliver St.) being taken for the street,
permission is given to remove some of the bodies buried here.—
Proc., App'd by Mayor, XXIII: 284. The bodies were removed to
the Jewish cemetery on 21st St., and the New Bowery was opened
in 1856.—Pubi., Am. Jewish Hist. Soc., No. 6, p. 135 and 137;
L. M. R. K., III: 1006. See Ag 3, 1728.

In this year, Canal St. was extended from Centre St. across
Broadway to Murray St.; Park Place and Duane St. were also
widened, and the Bowery and Chambers St. extended.—Stone,
Hist. of N. Y. City, 559.

In this year, Wm. Perris published an interesting map of New
York City below 40th St., containing a vignette view of the Crystal
Palace and a key to the most important public buildings, markets,
hotels, places of amusement, etc.—Descrip. of Pl. 156, III: 707.

In this year, a view of the city, entitled "New York, 1855;
From the Lattin Observatory," looking south, drawn by B. F.
Smith, Jr., and engraved by W. Wellwood, was published. It is
reproduced as Pl. 145, Vol. III.

In this year, F. Heppenheimer made a lithographic "View
of Broadway, New York from Exchange Alley to Morris Street,
West Side." It is reproduced as A. Pl. 27-28, Vol. III.

In this year, Egbert C. Vioke made, for the commissioners
appointed on Nov. 17, 1853 (q. v.), a map of the lands included
in Central Park. It is reproduced as Pl. 169-A, Vol. III.

Topographical maps in 42 sheets bearing this date and showing
Central Park laid out into building lots are filed as map No. 1653
in topographical bureau, borough president's office.

A coloured lithograph giving a bird's eye view of the Park in
this year and containing eight inset views was sold with the Pyne
collection.—Pyne sales catalogue (1817), item 187.

In this year, Th. Benecke made a coloured lithograph depicting
a characteristic winter scene in Broadway, opposite Barum's and
St. Paul's, and showing a large six-horse sleigh. A similar sleighing
scene in New York was painted in 1857 by H. Sebron and engraved
by P. Girardet.—Pyne sales catalogue (1817), items 164 and 177.
A crude, unsigned, but very interesting, oil painting of "Clare-
mont" was made, it is said, about this time by a tramp artist in
return for hospitality. It includes pleasure vehicles and equestrians;
and the Church of St. Mary's, Manhattanville, and the Convent
of the Sacred Heart are shown.—Pyne sales catalogue (1817), item
270.

In Valentine's Manual for 1855 were published, besides
the articles and references cited elsewhere in the Chronology, the
following historical data:

A list of the public markets and their locations at this time,
217.

A list of the paintings and busts in various rooms of the city
city hall, 347-49.

A list of the members of the city government, from its incorpo-
ration (1653) to 1855, alphabetically arranged, with the offices held
by them in the common council, 391-495; also the names of recor-
ders, sheriffs, and corporation counsel, 413-42.

An account of the origin and changes in the names of streets,

An account of the notable women of the Dutch period in New
York, 517-53.

The value of certain town lots in early colonial times, 545-46.

A description and history of the currency of New Amsterdam,
547-48.

The Manual for 1855 also contains a view of the Apthorp
mansion (owned by Col. Thorn), 391; and one of an old house,
on the corner of Cherry and Roosevelt Sts., 591.

A copy of the city directory for 1853, with an index, see ibid. (1858), 12.

For the first time the city inspector includes in his annual report
to the common council vital statistics (see J a 6, 1854) for a full
year. Deaths in 1854, 25,668; births, 17,079; marriages,

The mayor and common council again resolve to build a new
Feb. city hall (see Ap 4 and My 13, 1854)—Proc., App'd by Mayor,

Verdi's "Rigoletto" is performed for the first time in America,
in the Academy of Music.—N. Y. P. L. Bulletin (1855), 86.

The common council passes a resolution recommending the
Mar. elimination from Central Park (see J l 21, 1853) of the area south
of 72d St. and the reduction of the remainder by 400 feet on each
side. This was emphatically vetoed by Mayor Wood on March 23.

A large mass meeting is held at the Broadway Tabernacle to
protest against the bill-now before the legislature proposing to take
the appointment of policemen out of the hands of the mayor,
the recorder, and the city judge, and to put it into the hands of four
commissioners to be elected by the people. Robert B. Minturn
and W. Gerhard make the principal addresses.—N. Y. Daily Tim-
es, Mr 22, 1855.

The Children's Aid Society, in appealing for aid in establishing
an industrial school in the section of the city called "Dutch Hill,"
thus describes conditions there: "It is a droll-looking hamlet, that
at the foot of Forty-first and Forty-second streets, near East
River. The houses are little board or mud shanties, scattered
around like the wigwams of an Indian village, with most perplexing
paths winding among them.

1865
Mar. 21

"Some are of the primitive block form, with a hole in the roof for a chimney; others are arched, others with a sharp Gothic gable.

Occasionally, something entirely new in architectural style will meet you in the shape of a rectangular box with diamond lattice work, which, on nearer approach, you discover to be a Railroad car banked in, and made into a house. . . . Each house has a retinue of large dogs and goats and pigs. All the inhabitants of these buildings are squatters—they have found a plot of ground and have built their log-cabin on it, to remain until the rightful owner turns them away. When they move they sell their house to some new comer for $5 or $10. They are all Irish and German laborers; many working in the quarries near by, and others especially the German women, living on the side of the rags and boxes which are left behind and their children gather all the day long through the streets of the City.

"The village called ‘Dutch Hill,’ which with the neighbouring shanties must contain thousands of people, is almost precisely like the poorest Irish villages; and poorer than most German peasant hamlets."—*N. Y. Daily Times*, Mr 21, 1855.

The legislature passes an act for the election of five fire commissioners.—*Laws of New York* (1855), chap. 112. See also Costello, *Our Firemen."

In this month a new building (the present one) for the Society Library was commenced on the east side of University Pl., bet. 12th and 13th Sts. (see My, 1855).—*Man. Com. Couns.* (1856), 247.

The new building was opened in 1856.—*Ibid., Keep., Hist. of N. Y.* See Nov. 10

It is resolved by the board of aldermen concurs, the plans and specifications for a new city hall (see F 17), presented by Albert Gilbert, Thomas R. Jackson, and Henry L. Stuart, be approved, and the commissioner of repairs and supplies be instructed to advertise for proposals for the erection of the building. The specifications are printed with the Report of the Committee on Repairs and Supplies, Doc. No. 30, Bd. of Councilmen, Ap 8, 1855. See Ap 16.

The city is authorized to remove so much of the old bridge, commonly known as the Hadley bridge, as forms an obstruction to the navigation of the Harlem River; and is directed, upon the removal of said old bridge, to erect and construct a new bridge on said Harlem River, of a width not less than that of the old bridge, and upon its present site, to connect the city of New Yorke with the county of Westchester; said new bridge to be constructed with a suitable draw of not less than 36 feet in width."—*Laws of N.Y.* (1855), chap. 423.

The special committee to whom was referred so much of the mayor’s message as relates to the building of a new city hall, together with the resolutions asking that it be built at Madison Square, etc., make their report in favour of the Madison Square site; the other site considered is the Park, where the old almshouse stood.—*Doc., Bd. of Ald.* (1855), No. 112. *N. Y. Daily Times*, Ap 17, 1855. On May 15, however, a majority of this committee reported in favour of the Park site in the rear of the present city hall.

*Doc., Bd. of Ald.* (1855), No. 23. See further, F 18, 1857.

17 Trinity Chapel on the north side of West 25th St. near Fifth Ave. is consecrated.—*N. Y. Daily Times*, Ap 19 and 20, 1855.

20 "The extension of Park-place through the grounds of Columbia College, is proceeded with rapidly. Large bodies of workmen are digging, grading and carting, every clear day."—*N. Y. Daily Times*, Ap 20, 1855. See also ibid., Ap 27, 1855.

25 The Union Club (see S 20, 1859) opens its new building at the northeast corner of Fifth Ave. and Madison St.—*N. Y. Daily Times*, Ap 26, 1855; Club Book (1912); L. M. R. K., III: 939.

May 1861

The old Tontine Building *[see 1843], on the corner of Wall and Water-streets, at present occupied by stores and offices, is to be torn down, to make way for a larger and finer structure."—*N. Y. Daily Times*, My 1, 1855. The old coffee house was demolished in this month, and the ground left is parceled by W. H. Aspinwall, with the stipulation that he should pay to the Tontine Association, as rent, the sum of $5,700 per annum, and should pay all taxes and assessments levied by the city upon the ground, and upon such buildings as should be upon it; also, that the said lease should expire and all the buildings upon the ground should revert to the association when by death the nominees should be reduced to seven. Mr. Aspinwall bought the erection of the present [1872] building, soon after he obtained the lease.

"The walls are of Massachusetts yellow free-stone, the keystones in the arches of the windows and doors being of the same material. On the left of the picture [see view accompanying the description] on the Wall Street front, is seen the narrow alley mentioned in the title deeds, showing that the heirs of Francis Clark had the right of way in 1791."

"The interior is cut up into offices, a large shaft near the rear of the hall-way giving room for the main staircase and the facilities for ventilation."—*Stone, Hist. of N. Y. City* (1872), citing *Jour. of Com.*, Jl 25, 1871. See also De Peyster, *Hist. of the Tontine Bldg.* (N. Y., 1852) and L. M. R. K., III: 983.

"II Trovatore" is produced for the first time in New York, at the Academy of Music.—*N. Y. Daily Times*, My 3, 1855.

The commissioners of immigration take possession of Castle Garden on a lease for four years; the historic garden is to be used as an immigrant landing-place.—*N. Y. Daily Times*, My 8, 1855; L. M. R. K., III: 983. See Jl 14 and Ag 3.

The Woman’s Hospital, the first of its kind in New York, is formally inaugurated as a charity at 83 Madison Ave. It has been open for about a month.—*N. Y. Daily Times*, Je 2 and 4, 1855.

A great ‘Know-Nothing’ demonstration is held in City Hall Park. About 20,000 people are present.—*N. Y. Daily Times*, Je 19, 1855.

A "Nursery for Children of Poor Women" has been opened at 15th St. and Sixth Ave.—*N. Y. Daily Times*, Je 23, 1855.

The commissioners of estimate and apportionment for taking the tax-sheets for Central Park (see N 17, 1853) complete their report. The amount awarded to the owners of the lands and for expenses is $351,390,90 of which the sum of $1,657,590 is assessed on adjacent owners. The report was confirmed on Feb. 5, 1856.—*1st Ann. Rep., Com’y of Cent. Pk* (1857), 7, 103-11. See also 16th Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1911), 400-61, and descrip. of Pl. 119b-11, III: 723.

The Battery is lighted with gas for the first time.—*N. Y. Daily Times*, Jl 9, 1855.

Progress has been made in fitting up Castle Garden as an immigrant depot (see My 7). "About 1,000 feet of fencing has been put up round the building, with the exception of that portion of it which faces the water. . . ."

"Internally, the galleries and permanent seating remain as heretofore. Under the dome, the fountain which formerly existed has been restored. . . ."

"A quadrangular range of enclosed desks is in process of erection almost in the center, where it is intended to station clergies to elicit information from all passengers as to their destination and their means of supporting themselves. They there will receive such instructions as they may need in regard to routes and the cost of passage, as well as the freights of extra baggage. The old refreshment rooms to the right and left of the main entrance have been converted into bath rooms. . . ."

"The buildings, formerly used as residences, near the gate, have been converted into offices. Ticket offices for sale of passage tickets, cashier’s office for the receipt of freight money; an office for the examining physician; a police station; suitable accommodation for the United States Revenue officers and offices for the use of the Commissioners."—*N. Y. Daily Times*, Jl 14, 1855. See Ag 3.

The first immigrants to land at Castle Garden (see My 7 and Jl 14) arrive on this day.—*N. Y. Times*, Ag 4, 1855.

Never before have there been so many improvements under way in our City as at present. There is scarcely a street in which one or more new and substantial buildings are not being erected in the place of others too old or too small to meet the requirements of advancing trade; and many downtouon streets are being widened and straightened to accommodate their constantly increasing commerce. . . .

The greatest and most extended of these improvements is the extension of Canal and the widening of Walker street. . . ."

"The work is progressing with great rapidity. The cost will be $480,000. Nearly all the houses beyond the line have been cut or removed back, and many new buildings are being erected."

"When completed, Walker-street, or (as it will then be called) Canal-street, will be one of the finest avenues in the City—100 feet abroad from the Hudson to Centre, and 75 feet for the remaining distance extending almost in a straight line from the west to the east. . . ."

"Considerable improvements are just now being made in the
THE ICONOGRAPHY OF MANHATTAN ISLAND

1855

upper part of the City, between Thirty-eighth and Fifty-fourth 
Aug. streets, both by the Corporation and by private individuals. Fifty- 
third street is being extended from the Seventh-avenue to the East 
River. . . .

“The four lower streets [38th to 42d St.] are yet open on the west side only to the Seventh-avenue. It will take immense labor to extend them through the rocky barriers to the east of this. . . .

The extension of Forty-ninth street, from the Seventh-avenue eastward, is also progressing pretty rapidly, considering the formidable impediments to be overcome. Forty-eighth street has only been opened to the Sixth-avenue on the Hudson side—Forty- 
seventh street only to the Seventh-avenue. . . .

“The several rocky lots east of Sixth-avenue, between Forty- 
second and Fifty-fourth streets, are being cleared away to make 
room or various kinds of buildings.

“One Forty-second and Forty-third streets, between the Sixth 
and Seventh avenues, several new buildings are in progress of erec-
tion—some of them nearly finished. Others are about being com-
menced on the east side of Sixth-avenue, in the vicinity of the 
Crystal Palace. . . .”—N. Y. Daily Times, Ag 11, 1855.

Mlle. Rachel, the French tragicdienne, arrives in New York on a visit to the United States.—N. Y. Daily Times, Ag 23, 1855. 

See S. 5.

Sept.

Rachel (as Ag 22) makes her first appearance in America, at the 
Metropolitan Theatre (see S 18, 1855). The play is Corneille’s 
tragedy “Horace.”—N. Y. Daily Times, S 3-5, 1855. See also 
Rachel and the New World, 117. The Metropolitan later became 
Luntzetheatres (see D 27).

9. The allied French and British finally take Sebastopol after a 
siege of almost a year.—Innes, Eng. and the Brit. Empires, IV, 284.

The name of Walker St., between Centre St. and East Broadway, 
is changed to Canal St.—Proc., Appd by Mayor, XCVII: 318.

Oct.

By this month, Ninth Ave., from Bloomingdale Road to 125th 
St., had been opened at a total cost of $15,025.39.—Man. Com. 
Constr. (1857), 541.

“A new iron shot tower is going up in the Sixth Ward. It has 
already reached its ninth story, and two more will finish the struc-
ture—each story in height is eleven feet and six inches, making the 
tower, when completed, over one hundred and seventy feet high. 
One story, not included in the eleven, is entirely under-ground— 
this also is of solid iron. The tower runs through the rear of a 
building which faces on Centre, between Duane and Elm streets. 
Mr. Bogardus adds new credit to his high reputation by the design 
and character of this novel and unique structure. It was com-
menced on Aug. 15.”—N. T. Daily Times, O 1, 1855. The shot-
tower, originally owned by Richard McCollough, was at 63-65 
Centre St., and was erected by Bogardus & Co., who had previously 
built the Bogardus Building on Duane St., off Centre St., the first 
built of its kind in New York. The shot-tower is to be the 
first building having an iron frame-work enclosing and partly 
supporting its floors and walls. It was octagonal in shape, and 
supported on iron columns bolted together end to end at the angles 
of the structure. The panels between columns (which inclined 
 inward) and the tie-bars (which were horizontal) were filled with the 
brick of the walls. The width at the base of the tower was 24 feet 
and at the top 12 feet, the height being 157 feet. It was demolished in 1908 (v.c.)—Data supplied by Mr. Christopher C. Tracy, of 
Bellerose, L. I., supt. of the tower for over 35 years, and Mr. Wm. 
W. Tracy, of Brooklyn, his brother. See also descrip. of Pl. 153-4, 
III: 777. Another tower was built in 1836 (q.v., D 18).

“The old Dutch Church, which Government thrust has con-
verted into a Post-Office, is experiencing extensive repairs. Not 
long since it was resolved to dissolve the swallow and owls from the 
antique tower and throw in a detachment of clerks to occupy it; and 
accordingly a corps of sappers and miners might have been ob-
erved creating a breach in the wall where now the words "Regis-
tered Letters," indicate that there is the entrance to that funny 
Assurance Office where the Department, for a handsome premium, 
insures letters against itself on condition of paying for no losses. 
To the east of the tower, and to the southwest of the position, a 
large structure of brick ascends slowly, designed to enlarge facilities for 
the receipt and dispatch of mail-bags. . . .”—N. Y. Daily Times, 
O 6, 1855. A view of the church in 1856 is contained in Groteores, 
Old N. Y., opp. p. 58. See O 29, 1860.

17. The corner-stone of the first building erected by the N. Y. 
Historical Society is laid at the corner of Second Ave. and 11th St.—

N. Y. Daily Times, O 17 and 18, 1855; Kelby, N. Y. Hist. Soc. 
Oct. (1905); and the unpublished records of the society. See also 

The New York Corn Exchange “is just completing a noble 
building at No. 17 South-street, for its future accommodation.”— 
N. Y. Daily Times, O 17, 1855.

“The Lattering Observatory [see Je 30, 1853] is converted into a 
shot-tower.”—N. Y. Daily Times, O 20, 1855.

Thackeray begins a series of lectures on the “Four Georges” 
Now at Dr. Chapin’s Church.—N. Y. Daily Times, N 2, 1855. See also 
ibid., N. 9, 14, 15, and 23, 1855. See D 1.

Thackeray (see N 1) delivers his farewell lecture in New York 
to about 2,000 people at the Metropolitan Theatre. The subject is 
“Charity and Humor.” Also in the public benefit of the St. George’s 
Society.—N. Y. Daily Times, D 3, 1855.

“The project of uniting Brooklyn and New York together is 
a good deal talked of in some quarters.”—N. Y. Daily Times, 
D 3, 1855.

“The American Institute has bought the Crystal Palace, for 
$125,000, and taken possession. The debts of the Palace amount 
to about $175,000.”—N. Y. Daily Times, D 3, 1855. See also 
Levis’s Weekly, L 11.

The Vauxhall Garden, at Broadway and the Bowery, is being 
4 demolished. Stores are to be built on the site.—N. Y. Daily 
Times, D 4, 1855; Man. Com. Constr. (1856), 4705; ibid. (1866), 
586. See also L. M. R. K., III: 981.

Frank Leslie’s Illustrated Newspaper makes its first appearance. 

15

All Souls’ (Unitarian) Church, on the south-east corner of 
25 Fourth Ave. and 20th St., is dedicated. It was modelled after 
the Basilica San Giovanni Battista, at Monza (north of Milan on 
the way to Como), Italy. The layers of stone in the walls are 
imported Caen stone.—N. Y. Daily Times, D 26 and 21, 1855; All 
Souls’ Church Records (by courtesy of George R. Bishop, Esq., 
trustee); L. M. R. K., III: 976. See also O 22, 1845.

The Metropolitan Theatre (see S 3), having been renovated, is 
27 re-opened under the management of Laura Keens, and becomes 
the “Varieties.”—N. Y. Daily Times, D 27 and 28, 1855. See also 
L. M. R. K., III: 986. It was later Burton’s New Theatre, the 
New Metropolitian, and finally the Winter Garden (see S 14, 1859).

—Brown, Hist. of the N. Y. Stage, 1: 426-67; L. M. R. K., III: 
30, 1857, is in Emmet coll, No. 1185.

1856

In this year, Gov. Bradford’s History of Plymouth Plantation 
was first published, from his manuscript.—Winson, III: 293.

In this year, the house erected on Pearl St. in 1853 (g.v.) by 
Alphonse De Peyster was demolished.—Man. Com. Constr. (1861), 
65.

In this year, Columbia College bought the property of the 
Deaf and Dumb Asylum, on Fourth Ave. between 49th and 50th 
Sts. (see S 30, 1825). The buildings were at once repaired, and the 
college moved into them in 1857 (q.v., Ap 1 and My 12).—Hist. of 
Columbia Univ., 150; L. M. R. K., III: 940. The old college 
buildings on Church St. were sold and demolished (see Ja and Ap 
14, 1857).

In this year, the 27th St. meeting-house of the Society of 
Friends (Hicksite) was built. It was demolished after 1881 when 
this meeting was attached to the 15th St. meeting on Stuyvesant 
Square.—John Cox, Jr.’s MS. Cat. of the Records of the Soc. of 
Friends. In this year, the North German Lloyd S.S. Co. was formed by 
H. H. Meier, “who amalgamated the shipping interests of Bremen, 
and its five maritime companies, into one powerful union.”—King’s 
Handbook (1893), 84.

In this year, the Five Points House of Industry was completed 
on a plot of ground purchased by the trustees in Anthony (now 
Ward), N. of near Centre St. In fifteen years, 1857-79, over 20,000 
children were taught in the school established here.—Losing, Hist. 
of N. Y. City, II: 613, passim; L. M. R. K., III: 951. For the 
changed appearance of Five Points between 1827 and 1859, cf. 

As a result of the disclosures made by the Association for Im-
proving the Condition of the Poor in regard to tenement-houses in 
New York City, the state legislature in this year appointed a com-

In this year, the girt-mill built at Kingsbridge by Alexander Macomb shortly after 1800 (p. n., D 22) was blown down during a severe wind-storm.—Descriptive Plan, 157-3, III: 706.

The Y. Gas Light Co. with works situated between 21st and 22nd Sts., 1st Ave. to East River, furnished gas for all portions of the city south of Grand St., supplying about 3,000 public lights. The Manhattan Gas Light Co. supplied the region north of Grand St., which had 7,000 public gas lights. Its headquarters were at the foot of the Brooklyn Bridge, and it was composed of the Williamsburg and East River.—Man. Gas. Com., (1856), 334-36. See also views of Manhattan Gas Works in Illus. News, II: 29. 31. It was the region around the foot of 42nd St. which gangs of ruffians made notorious in later years as the "Gas House District".

In this year, the triangle bounded by Grove, Fourth, and Christopher Sts. was designated Greenwich Park.—Proc., App'd by Mayor, XVII: 121. L. M. R. K., III: 970.

For a statement of the dates and cost of street opening from 1820 to this year, inclusive, see Man. Com. Comm. (1857), 230-41.

A wood engraving of the North Dutch Church, the frontispiece of De Witt's Discourse (1857), shows the church as it was about this time. It is reproduced and described as Pl. 146-b, Vol. III.

An engraved view of Wall St., looking from William St. to Trinity Church, shows that street as it appeared in 1856-7. This view, the only copy known, is owned by Edward W. C. Arnold, Esq., is reproduced and described as Pl. 145, Vol. III.

In this year, a lithograph, made by Boell & Michelin, entitled "Brooklyn, N. Y. 1856, West Side from Fulton to Courtland Street," was published by W. Stephenson, being one of a series of lithographs of views of New York, now scarce. It is reproduced and described (with the titles of the other views in the series) as A. Pl. 27-b, Vol. III.

In Valentine's Manual for 1856, were published: A map of the city, 1856. frontispiece. A view of Coffee House Slip, and New York Coffee House, 132. A view and description of the new "Firemen's Hall," at 123-125 Mercer St., where the old "Firemen's Hall" and the "City Oil House" formerly stood, 179-80. A plan of the city, showing the made and swamp land, 202.

A prophetic description of the city and harbour as they will be in 25 years, 423-25.

A view of "Woodlawn," formerly "Strawberry Hill Hotel," on the Bloomingdale Road overlooking the Hudson (see p. 514), which, about 1845, came into possession of Wm. B. Mifflin, who, in this year, still owned it. It stood between 126th and 127th Sts., 300 ft. west of West End Ave.—L. M. R. K., III: 981.

A view of the Varian homestead (p. 519) which stood on a farm of 274 acres extending along the Bloomingdale road to Seventh Ave., between 27th and 37th Sts. The house was demolished in the early Forty-Firsts. See all L. M. R. K., III: 955.

View of the "tower overlooking Manhattanville," now in Central Park, 456. A view of Broadway, east side, looking north from Anthony (Worth) St., 520.

For view of the remains of Fort Washington, 1836, see ibid. (1857), 72.

For view of the equestrian statue of Washington, Union Sq., 1866, see ibid. (1857), 120. See also L. M. R. K., III: 945.
1856. Among the permanent institutions of our city, none has, for man yeares past, attracted more attention than the Book Tride
sales, so ably and honorably conducted by Bangs, Brothers & Co.
. . . The amount of business transacted at these book sales is enormous,
. . . An idea may be obtained from the fact, that the
house of Harper & Brother have at one sale disposed of books to the
amount of seventy-five thousand dollars every year. . . ."—
Leslie's Weekly, II: 263. Regarding these booksales, see Je 1, 7,
and 11, 1862.

The city acquires by condemnation proceedings the land compris-
ing the new Central Park reservoir, between Fifth and Seventh
Aves., 87th and 96th Sts. (see Je 10, 1853)—Prendergast, Record
of Real Estate (1914). See Ap 17, 1858, and Jl 31, 1860.

James Buchanan, U. S. minister at the Court of St. James, is
welcomed by the common council as the city's guest, on his return
from England. He remained until April 25.—N. Y. Daily Times,
Ap 24-26, 1856.

The building of the Eye and Ear Infirmary on the corner of
15th St. and Second Ave. is formally inaugurated.—N. Y. Daily

"The work of clearing the rocks from the Sixth avenue, above
34th street, is rapidly progressing, and the avenue will be graded as
far as 49th street in a few months. The cars will then run to that
point. A large number of buildings are going up in the vicinity of
47th, 48th, 49th, 51st and other streets. The selection of the site
for the Central Park has given an impetus to the work."—Leslie's
Weekly, I: 334.

"The workmen are preparing to erect the Washington Monu-
ment, which will decorate the open space formed by the junction
of Fourth-avenue and Fourteenth-street at Union-square.—
N. Y. Daily Times, My 9, 1856. See also Ibid, My 29, 1856,
and A. Pl. 27 B-2, Vol. III. See, further, Jl 4.

The Brick Church property on Beckman St. is sold at auction for
$720,000.—N. Y. Daily Times, My 12 and 15, 1856; Leslie's
Weekly, I: 347, 382. See also Man. Com. Coun. (1870), 761. The
congregation and the church building around 25th St. May 4—
Pres. Soc. (1918), 600; descrip. of A. Pl. 27 A-3, III: 882. See
also the church at this time reproduced as A. Pl. 27 A-3, Vol. III.
See, further, S 15, 1867, and Mr 15, 1857.

The ferry from Whitehall to Staten Island is leased to Jacob L.
Smith for 10 years at an annual rent of $5,100 upon certain specified
conditions.—Valentine, Compilation of Existing Ferry Leases &

Mayor Wood signs an ordinance placing the control of Central
Park in the hands of a board of commissioners consisting of the
mayor and the street commissioner, Joseph S. Taylor. Before
proceeding upon any course of action, these commissioners are to
be joined by eight prominent citizens to act with them as a consulting-board.—

The old building of the Union Bank in Wall St. is being demol-

Gothic Hall, in Broadway, formerly Masonic Hall (see Je 24,
1846), is being torn down, to make way for a mercantile establish-
ment.—N. Y. Daily Times, My 26, 1856; Leslie's Weekly, I: 29-

The Franklin waterhouse, at No. 3 Cherry St., the residence of
Washington in 1789-90, is now being demolished.—Leslie's
Weekly, II: 414; L. M. R. K., III: 949. See also Custis, Recol-

The Broadway Tabernacle is crowded to capacity by a mass
meeting held to express New York's denunciation of Rep.
Preston S. Brooks of South Carolina for his violent assault upon Sen.
Chas. S. Sumner of Massachusetts because of Sumner's speech
against slavery and against Sen. Butler, a kinman of Brooks.
Daniel Lord, Chas. King, Henry Ward Beecher and others make
stirring addresses, and resolutions are adopted.—N. Y. Daily
Times, My 29, 1856. For an account of the Brooks-Sumner affair,
see Rhodus, Hist. of U. S., II: 151-50.

"In the summer of 1856 the Board [the N. Y. Stock and Ex-
change Board] moved into a room in what was known as Lord's
Court, with the main approach at 25 William Street, another at
53 Beaver Street, and a third at 50 Exchange Place . . . The
Board remained here throughout the war, and until its removal to
Broad Street in 1862."—Eames, N. Y. Stock Exchange, 38. "The
Board Room in Lord's Court was about sixty feet long by forty feet
wide, and was approached by such intricate passages that a stranger
required a guide to reach it."—Ibid., 43. A view of the board in
session is given in Harper's Weekly, Jl 1, 1857.

A preliminary plan for the improvement of Central Park is
drawn by Egbert L. Viele, engineer-in-chief, is adopted by the
commissioners (see My 21). On June 17, a map of the lands in-
cluded in the park was made by Viele from a topographical survey.
These are both published in the 1st Ann. Rep., Comts. of Cent. Pk.
Viele's plan was never carried out, for the new commissioners
appointed in 1857 (My. Ap 17) soon after advertised for new ones
and chose the one submitted by Vaux and Olmsted (see Ap 28,
67.

The news that Buchanan and Breckinridge have been
nominated for president and vice-president respectively by the Democratic
national convention at Cincinnati is celebrated by the Tammany
Society with hon-fires, illuminations, and the firing of guns.—N. Y.
Daily Times, Jl 7, 1856. The nominations were ratified by a Demo-
cratic mass meeting held in City Hall Park on June 11—Ibid. Je
12 and 13, 1856.

The new Baptist church at the s.e. cor. of Fifth Ave. and 35th
St. (see 189, 1854) is dedicated.—N. Y. Daily Times, Je 7, 1856.
This was later purchased by Christ P. E. Church (see Ap 6, 1858).

A mass meeting is held at the Broadway Tabernacle to take
measures for aiding the anti-slavery settlers of Kansas to defend
themselves against the "lawless outrages of the invading Missouri
mob" of pro-slavery men. The sum of $2,715 is subscribed, and a
committee is appointed to solicit further contributions.—N. Y.
Daily Times, Je 10, 1856.

The new Lafarge House, erected on Broadway on the site of
the one destroyed by fire in 1845 (My. Jl 8), is opened for the recep-
tion of guests.—N. Y. Daily Times, Je 18, 1856. See Mr 23, 1867.

Millard Fillmore, ex-president and present nominee of the
"Know-Nothing" party, arrives at New York from a European tour
and is welcomed by a committee of the common council and
escorted to the St. Nicholas Hotel. On June 23, he received visitors
at the hotel and was daguerreotypied by all the photographic estab-
ishments on Broadway. On June 24, he was officially received at
the Grand Hall by the municipality, and attended with an encoraged
copy of the complimentary resolutions adopted by the common council.
After visiting Brooklyn, he left for Albany.—N. Y. Daily Times,
Je 23-26, 1856.

The nominations of John C. Frémont and Wm. L. Dayton for
president and vice-president respectively are ratified by the Republicans
of New York at the Broadway Tabernacle.—N. Y. Daily Times,
Je 26, 1856.

Trinity M. E. Church on 34th St. between Seventh and Eighth
Aves. is dedicated.—N. Y. Daily Times, Je 30, 1856. Its corner-
stone was laid on July 12, 1855—Ibid., Jl 13, 1855.

The bronze equestrian statue of Washington, by Heery Kir-
bow and J. Q. A. Ward, is unveiled in Union Square (see My 9).
—N. Y. Daily Times, Jl 5 and 9, 1856. See also Cat. of Works of
Art Belonging to the City, 1857: Francis' New Guide to the Gentes
The statue is shown on A. Pl. 27 B-2, Vol. III.

By this time, Seventh Ave. from 42d St. to the Harlem River
had been completed at a total cost of $9,000,061.—Man. Com.
Coun. (1857), 541.

The mayor approves a joint resolution awarding a contract for
building a monument to the memory of Maj.-Gen. Worth.—Proc.
App'd by Mayor, XXIV: 311.

Congress appropriates $261,585 for the purchase of a post-office
Dept. (1876), 18; descrip. of Pl. 161, III: 845. See also Senate Ex.
Dut., 34th cong., 1st sess., Vol. XVI, No. 106. See Mr 10, 1857.

Buckley's new music hall at No. 538 Broadway is opened to a

Dec. 18

large audience.—N. Y. Daily Times, Ag 26, 1856; L. M. R. K., III: 925.

An interesting and instructive feature owned by the Society is its weekly column in the New York Times, which is devoted to the subject of education. Each week a new paper is published containing articles on various topics related to education, such as the latest developments in teaching methods, educational policies, and the role of schools in society. This column, titled "Education," is authored by a team of educators and experts in the field, ensuring that the content is both informative and relevant to the current educational landscape. It is an excellent resource for those interested in the latest trends and issues in education. The column is also available online, allowing readers to access it from anywhere at any time. This initiative by the Society demonstrates its commitment to fostering a community of learning and growth, and its dedication to spreading knowledge and understanding about education.
The peculiar check would the 158. the author opened. portion discussion 1857.

For view of the remains of Fort George, 1857, with Harlem River and Kingfisher in the distance, see ibid. (1857), 444.

For view of the Provost tomb, 1857, see ibid. (1858), 550.

For view of the country residence of David Provost, East River and 57th St., 1857, see ibid. (1858), 540.

For view of the Union House, cor. Broadway and 21st St., occupied for many years as a justice’s court, see ibid. (1860), 444.

Mayor Fernando Wood sends a communication to the council on the subject of official corruption and the need of a revision of the charter.—Communications of Mayor Wood, Ja 5, 1857.

Wm. Allen Butler is author of a satirical poem, “Nothing to Wear.” It immortalized “Miss Flora M’Flimsey, of Madison Square.” It was first published in Harper’s Weekly (q. v., I: 84). In the same year the book was issued in book form by the firm of Wood & Carleton, with illustrations by Augustus Hoppin. The satire at once became popular, and had a large and continued sale.

A curious claim was made by a Miss Peck, a daughter of an Episcopal clergyman, of Greenwich, Conn., as to the authorship. She asserted in the public prints and elsewhere that she herself was the authoress of the celebrated poem, that she lost it during a shipwreck, and that it was written on the back and front of a prayer book. A check for eight hundred dollars, for eight lines, making four times as much material as the poem in question, having as its title ‘Nothing to Say,’ which was something of a misnomer. The book was illustrated by John McLenan, who, at that time, was one of our most popular comic artists. It is hardly necessary to add that this book also had an immense sale. —Derby, Fifty Years Among Authors, 236-28.

The legislature authorises the city to raise a sum not exceeding $500,000 by the creation of stock to be called “the water stock of the city of New-York,” and also to borrow an additional sum of $1,450,000 “for purchasing land and constructing the new reservoir.”—Laws of N. Y. (1857), chap. 24.

The Peter Cooper Union for the Advancement of Science and Art, and conveys to trustees the ground and building (with its equipment) bounded by Astor Place, Third and Fourth Aves., and 7th St. —Laws of N. Y. (1857), chap. 31 and 149. See also ibid. (1859), chap. 279; Losing, Hist. of N. Y. City, II: 670; and L. M. R. K., III: 956.

13. To relieve the pressure of traffic in Broadway, Mayor Wood recommends in a message to the council that an avenue parallel to Broadway be built, and that Broadway be widened “by withdrawing the permission granted to the owners of property to occupy a portion of the highway with areas, steps, porticoes, &c.” “By removing all obstructions of these or any other kinds,” he explains, “and flagging the sidewalks flush up to the line of the street, even with the houses, an average of upward of six feet would be gained on either side of the street—the curbs could then be set that distance further from the center of the street, and thus give twelve feet additional width.” He also says: “The condition of the Russ pavement is also a subject of frequent complaint; this pavement should be grooved or removed altogether. The iron pavement opposite the Post Office in Nassau Street, meets general public approval, but it is not yet determined whether it would not be advantageous laid in Broadway.”

Mayor Wood also urges the need of a new city hall. The possibility of building a court-house in “Madison Park” (see Ap 16, 1857) is being considered, as it is believed that Chambers St. is too far down town.—Communication of Mayor Wood, F 18, 1857. A law for the erection of a new city hall was passed on April 15 (q. v.).

The Broadway Tabernacle has been sold to John J. Phelps for $125,000. It is to be replaced by business buildings.—N. Y. Daily Times, F 25, 1857. The last service was held in the Tabernacle on April 26.—Ibid., Ap 25, 1857. See also L. M. R. K., III: 928. A new Tabernacle was erected at 34th St. and Sixth Ave. (see D 25).

The New York Arcade, in Broadway just above the Metropoli
tan Hotel and running through to Crosby St., is opened. It is “something of a success in New-York,” and is “filled into 32 stores or stalls, each of which will be occupied by a retailer in a different line of trade.”—N. Y. Eve. Times, Mr 3, 1857.

James Buchanan is inaugurated president and John C. Breckinridge vice-president.—N. Y. Eve. Times, Mr 5, 1857.

The Dred Scott decision is handed down by the supreme court.

Broadway Square (see D 10, 1859), laid out on the Commissions’ Map between 53d and 57th Sts., Eighth and Ninth Aves., is discontinued, and 54th, 55th, and 56th Sts. are extended through this land.—Laws of N. Y. (1857), chap. 73; L. M. R. K., Hisl, 968.

“A New Yorker proposes to purchase milk in large quantities of farmers living near railroads, and condensing it at the time and place of receipt, by a mode known to him, in such manner that he takes it from the eighty-eight parts of water it contains, and retains only the nutritious portions. This remedium, which will, of course, occupy but about one-eighth of the space of the original milk, he proposes to then place in large air-tight cans, in which it can be transported to any part of the Madison Carnegie stage, where it was probably found by Mr. Butler. [See ibid., I: 498.] A controversy ensued, which of course increased the sale of the book. In order to add fuel to the flame Mr. Carleton offered Morti
er M. Thomson, who had become a very popular writer under the nom de plume of ‘Docteet,’ one dollar a line for a humorous poem on the subject in question; the offer was accepted, and in less than ten days the author received from the publisher a check for eight hundred dollars, for eight lines, making four times as much material as the poem in question, having as its title ‘Nothing to Say,’ which was something of a misnomer. The book was illustrated by John McLenan, who, at that time, was one of our most popular comic artists. It is hardly necessary to add that this book also had an immense sale.”—Derby, Fifty Years Among Authors, 236-28.

13. The legislature authorises the city to raise a sum not exceeding $500,000 by the creation of stock to be called “the water stock of the city of New-York,” and also to borrow an additional sum of $1,450,000 “for purchasing land and constructing the new reservoir.”—Laws of N. Y. (1857), chap. 24.

The Peter Cooper Union for the Advancement of Science and Art, and conveys to trustees the ground and building (with its equipment) bounded by Astor Place, Third and Fourth Aves., and 7th St. —Laws of N. Y. (1857), chap. 31 and 149. See also ibid. (1859), chap. 279; Losing, Hist. of N. Y. City, II: 670; and L. M. R. K., III: 956.

13. To relieve the pressure of traffic in Broadway, Mayor Wood recommends in a message to the council that an avenue parallel to Broadway be built, and that Broadway be widened “by withdrawing the permission granted to the owners of property to occupy a portion of the highway with areas, steps, porticoes, &c.” “By removing all obstructions of these or any other kinds,” he explains, “and flagging the sidewalks flush up to the line of the street, even with the houses, an average of upward of six feet would be gained on either side of the street—the curbs could then be set that distance further from the center of the street, and thus give twelve feet additional width.” He also says: “The condition of the Russ pavement is also a subject of frequent complaint; this pavement should be grooved or removed altogether. The iron pavement opposite the Post Office in Nassau Street, meets general public approval, but it is not yet determined whether it would not be advantageous laid in Broadway.”

Mayor Wood also urges the need of a new city hall. The possibility of building a court-house in “Madison Park” (see Ap 16, 1857) is being considered, as it is believed that Chambers St. is too far down town.—Communication of Mayor Wood, F 18, 1857. A law for the erection of a new city hall was passed on April 15 (q. v.).
The demolition of the old brick Church in Beekman St. (see My 14, 1856) is begun.—N. Y. Daily Times, Mr 16, 1857. See also ibid., Mr 19, Ap 2 and 13, 1857, and Harper's Weekly, I: 262. There are views showing the demolition, in ibid., I: 292-93, and Emmet Coll., No. 11535. The new Brick Church was dedicated on Oct. 31, 1856 (q.v.). The Times building was erected on the site of the old church. The Times building was erected on the site of the old church.

People living in the West, in New England, in Pennsylvania, and the South may not be aware that this city of New York is about to undergo the penalty which, in monarchial countries, has been often inflicted on revolted districts or conquered places. We are about to be deprived of that right of self-government which is generally, though it seems erroneously, supposed to be the essential incident of all political institutions in the United States.

"Our crime is to have held different opinions on political matters from the rural constituencies of the State. We have had the misfortune to give Buchanan a round majority when the State was overwhelmingly carried by Frement. It has been our unhappiness to disapprove and nullify a liquor prohibition act which was much esteemed in the rural districts."

"For these manifest sins, it is proposed to punish us in this wise:

"Our city charter, and our municipal institutions generally, are to be recast and transformed. We are to have an independent comptroller, elected for a longer term than the mayor, not responsible to him, and holding the city purse in his hand. We are to have an independent counsel, also elected by the people, and not responsible to the mayor. This mayor—who understands too long to be opposed to the politicians of the rural districts—will not be able to enforce a single prosecution, or to pay a single dollar of the city money.

"But this is only the beginning. The appointment of the police has usually been vested in functionaries elected by the people of the city. This is now to be altered, and the appointment of the police of the city is to be taken from the commissioners and vested in a new board, of which the majority will be appointed by the Governor, and elected by the counties of Kings, Westchester, and Richmond."

"Within the next few years several millions of money will be spent in this city on the construction of a City Hall, and on laying out the Central Park. That money will come out of our pockets or be borrowed on our credit. Not a dollar will be obtained from the State. How many millions will be spent can not yet be safely stated; perhaps twenty—all our money. It is the design of our masters to use this money in future elections, and they therefore propose to place it in such hands that the Citizens of New York shall have no control over any portion of it. It is to be intrusted to and expended by commissioners appointed by the Governor."

Our master in the rural districts cripple our mayor... secure for themselves the patronage of our police force... and lay hands on twenty millions of our money as sines of war for the next ten years' elections. We submit that the scheme is equally ingenuous, oppressive and unprincipled."—Harper's Weekly, I: 194. See My 2. The police law was passed on April 15 (q.v.).

The N. Y. & Harlem R. R. Co. is required before Dec. 31 to remove from Harlem River the old railroad bridge or as much of it as obstructs the river. The building of the new bridge of this company, from Mott Haven to Harlem, is legalized.—Laws of N. Y. (1857), chap. 207.

A bill is now before the Legislature to throw a suspension bridge over the East River from New York to Brooklyn, with a span higher than the sky sail of the tallest clipper, with one terminus near the Park on the New York side, and the other far enough back in Brooklyn to secure an easy grade of ascent. The plan is pronounced feasible and within the cost of a profitable investment, by Mr. Roebling, the architect of the Niagara suspension bridge."—Harper's Weekly, I: 214. The Brooklyn Bridge was not begun until 1872. N. Y. R. R., III: 955.

A new county, viz., Queens County, is proposed. On the board of councillers to increase the compensation of the members of both chambers of the common council from $4 to $8 per meeting does not meet the concurrence of the board of aldermen. They declare that the members, when elected, "understood the salary which they would receive for their services; no change has been made, either in the mode or time of meeting; the sessions of both Boards are the same, in every respect, as heretofore, and no additional labor has been imposed upon the members by law, which would warrant or justify an increase in their pay."—Proc. Bd. of Ald., LXVI: 37-38. A newspaper comment reads: "The unanimity with which the report was adopted reflects credit upon the aldermen. When the measure passed the Board of Councilmen it received only sixteen votes, although that body consists of sixty members and the presumption therefore is, that the scheme was buried in a meeting but thinly attended, and that it does not represent the sentiment of the majority."—Evening Post, Ap 10, 1857.

The assembly appoints a committee "to enquire into the practicability and propriety of constructing a wrought iron tunnel under the East river between New-York and Brooklyn for the accommodation of travel, upon the plan and principle proposed by John W. C. Cochran."—Laws of N. Y. (1857), II: 19.

A committee of the aldermen reports that "the public necessities imperatively demand" the immediate erection of "a new City Hall," and they advise Madison Square as a central location. It is further recommended that negotiations be opened with the federal government for the sale of the present buildings in City Hall Park together with such land there as may be wanted by that government.—Proc. Bd. of Ald., LXVI: 30-37.

A contract is awarded to Jones & Hitchcock, at 40 cents per pound, for a bell to be placed in the Mt. Morris bell-tower (see F 19, 1856).—Proc. App'd by Mayor, XXV: 20, 93. See Ap 25, 1860, and S 25, 1864.

Important amendments to the city charter are adopted by the state legislature:

The aldermen are reduced in number from 22 to 17 and are to be elected from "aldermanic districts" instead of wards, and these new districts are defined (they are made identical with assembly districts—see Legislative Manual, 1858, 517). Aldermen first elected under this act from districts with "an odd numerical designation" shall serve for one year, those from districts with even number, for two years, and subsequently shall have two-year terms.

The number of councilmen is reduced from 60 to 24, six from each of the four senatorial districts, with one-year terms.

The election day for mayor and members of both boards is changed from the first Tuesday after the first Monday in November to the first Tuesday in December.

Whereas previously measures involving the appropriation of money had to originate in the board of councilmen (see Ap 12, 1857), now any ordinance may originate in either board.

The numerous executive offices that were established, and, in general, made elective by charter amendments eight years earlier (see Ap 26, 1849) are reduced in number and made appointive, with the exception of the mayor, comptroller, and corporation counsel. The comptroller's office is given added importance in that he is "voted for on the state ballot" and "in the state election" (the mayor continuing to be elected biennially). All three officers may be "removed by the governor for cause." In addition to the department of finance and the law department, headed respectively by the comptroller and the corporation counsel, there are to be only four other departments, namely, the street department, the almshouse department, the city inspector's department, and the Croton aqueduct board, heads of the same to be appointed by the mayor "with the advice and consent of the board of aldermen." The term for these appointees is to be two years except in the case of the aqueduct board, and, with the same exception, they are removable by a two-thirds vote of the board of aldermen; they may also be removed by the mayor with the consent of the aldermen, and they may be suspended by him "during any recess of the common council." These amendments were to take effect on May 1, and were not subject to a referendum, as was the amended charter of 1853 (q.v., April 12).—Laws of N. Y. (1857), chap. 446. It is to be observed that the control of the police department passed to the state at this time (see Ap 15). At the time when the officers elected under this amended charter assumed office the editor of the Herald expressed the hope that the city might some day have a "framed for the public interest, and not for political adventurers." He pleaded for a machine to which the mayor alone "would possess the key," and declared that, "with the imperium in imperio created by the new charter, in the independent powers granted to the Comptroller and the Corporation Counsel, it is evident that the present system must work unsatisfactorily both for the public and the Mayor."—N. Y. Herald, Ja 4, 1858. For the first city election under the amended charter, see D 1.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1857 The demolition of old Columbia College on Church St. is begun.

15 "The Metropolitan Police District of the state of New-York" is created by the legislature. The counties of New York, Kings, Westchester, and Richmond, make up the district over which five commissioners of police are placed. These commissioners are to be appointed by the governor with the consent of the senate, three from New York County, one from Kings, and one from Richmond or Westchester; together with the mayors of New York and Brooklyn *ex officio* they shall form "the board of police for the said district." Local authority is thus displaced by state authority. The common councils of New York City and Brooklyn respectively are to provide "all necessary accommodations" within their precincts for station-houses, "for the lodging of vagrants and disorderly persons, and for the temporary detention of persons arrested for offences," and are to "warm and light the same by day and night."

The treasurer of the board, selected by the members from their own number, shall receive an annual salary of $5,000, and each other commissioner shall receive $8 for each day of actual service. The expenses of the board are to be met by local taxation for this special purpose, and the fund derived therefrom "shall be styled the police fund" and be paid into the state treasury to be disbursed by the treasurer of the police board. —*Laws of N. Y. (1857),* chap. 276, Secs. 1-3. Under the beaten path much confusion in New York and caused dissensions between the new and old police departments.—Harper's Weekly, I: 65, 280. See Ap 26.

The legislature creates a separate board of 12 supervisors for the county of New York (the common council of the city had served as supervisors of the county since 1813). Ap 3. These officers are to be voted for annually "upon a separate general ticket, but each name or names for supervisors shall be upon one ticket." The six having "the highest number of votes" are elected, but subsequently the six having the next highest number of votes shall be appointed as supervisors by the mayor. A board as thus created is dominated by no one political party. Acts of this board are subject to the mayor's veto, but, after a lapse of ten days, a majority vote may override the veto. Supervisors are to render service without compensation. —*Laws of N. Y. (1857),* chap. 590. Inasmuch as this board was subordinate to the state legislature in the levying of taxes, and subject to the city comptroller in its expenditures, "Tweed Ring" politicians cooperated under such an arrangement subsequently to fleece the city. Six Republican supervisors were elected, on Dec. 1 (q.v.), but the six defeated Democrats were reapportioned in accordance with this new law and Wm. M. Tweed was one of them.

The legislature directs the commissioners of the land office to sell the state arsenal, in Central Park opposite E. 64th St., and to purchase other land in the city for a new arsenal. If the mayor and aldermen, or the Central Park commissioners, desire to buy the arsenal property for incorporation with the park, they are authorized to do so for $275,000. —*Laws of N. Y. (1857),* chap. 670. See also ibid. (1859), chap. 205 and L. M. R. K., III, 925. See Je 6.

An act is passed to establish regulations for the port of New York; and, on April 17, another to establish bulkhead and pier lines for this port. —*Laws of N. Y. (1857),* chap. 670 and 761. The law regarding pier and bulkhead lines was amended on April 24, 1862. —Ibid. (1862), chap. 491.

17 The legislature appoints five commissioners for erecting a new city hall (see F 18) "up on that portion of the park lying on the rear of the present city hall, bounded by Broadway, Chambers and Centre streets, or so much thereof as may be found necessary." Before deciding upon the plans or specifications the commissioners are to offer "to conform any portion of the interior plans of said building to the purpose of a post office, and the accommodation of thirty mail offices for the United States, and to convey to the United States government the portion of ground covered by said building so occupied." The mayor and aldermen are authorized to raise, by creation of public stock, a sum not exceeding $10,000,000 for the erection of the city hall. —*Laws of N. Y. (1857),* chap. 770. N. Y. Ev. Times, Ap 24, 1857. The common council opposed this law and sought to have it repealed. —Proc., App'd by Mayor, XXV: 7, 1859; XXVII: 58. See also My 2 and 9. It was repealed on April 17, 1858 (q.v.), and another law for the purpose passed.

Central Park (see My 21, 1856) is placed under the exclusive control of a board of 11 members, to be known as "the Commissioner of the Central Park," and the city is authorised to issue corporate stock to provide funds for building the park. —*Laws of N. Y. (1857),* chap. 771; 16th Ann. Rep., Am. Scn. & Hist. Pres. Soc. (1917), 465; descript. of Pl. 149-b-8, III: 724. The new commissioners advertised for plans for the improvement of the park, and out of the 33 submitted, chose the one by Olmsted and Vaux (see Ap 28, 1858). See illustration in this volume.

Out the legislature passes an act providing that on April 1, 1858, "the present toll bridge, built by John B. Coles, and his assignees, over the Harlem river at the terminus of the Third avenue, in the county of New-York, connecting it with the county of Westchester, shall become the property of the state and "forever thereafter be a free bridge and public highway." The counties of New York and Westchester are to appoint bridge tenders to make any necessary repairs and to open the draw, and the counties are to bear all expenses. The mayor and street commissioner of New York City and the county judge and chairman of the board of supervisors of Westchester are constituted the commissioners of the Harlem bridge, and are authorised to determine when the bridge requires rebuilding. —*Laws of N. Y. (1857),* chap. 774. On April 17, 1861, other commissioners were appointed, and it was ordered that "no plan for the rebuilding and reconstruction of said bridge shall be adopted which, in the opinion of the majority of the commissioners, shall obstruct the proper navigation of the Harlem river, provided that the commissioners shall have the power to determine herein that one of the two bridges or the balance of the bridge or any bridge which will require a change in the grade of Third avenue and the streets and avenues adjacent thereto...." —Ibid. (1861), chap. 291.

The legislature authorises the street commissioner to open Battery Place in accordance with a plan adopted by the common council on Dec. 31, 1853. It also provides that a ferry slip may be constructed at each of Battery Place Wharves, not nearer than 119 feet from pier No. 1, North River, and that thereafter no pier shall be built between the two. —*Laws of N. Y. (1857),* chap. 785.

The Woman's Hospital (see Je 2, 1857) is incorporated by act of the legislature. —*Laws of N. Y. (1857),* chap. 801. See Ap 17, 1858.

The board of aldermen adopts the following resolution: "Whereas, in the opinion of this Board, the act of the legislature, known as the Police Bill [see Ap 15] is unconstitutional and void; therefore be it resolved, that his Honor the Mayor, the Recorder and City Judge be, and are hereby directed to retain possession of all the property belonging to or under the Police Department, and refuse to acknowledge or obey the Police Commissioners (so called) in said act, but to continue in the discharge of their duties as heretofore imposed on them by virtue of the laws appointing them as commissioners. —Proc., Bd. of Ald., LXVI: 129. Subsequently this position of the common council was held to be untenable, and the legislative act constitutional. —Ibid., XVII: 102-2.

Jones’ Woods, which was so long retained as a place sacred to the enjoyment of long-haired people, then for three years struggled over as the site for our great Park, and then suddenly dropped when the Central Park was hit upon, fairly comes into market to-day for City lots . . . at least 350 lots, scattered over and through the famous ‘Woods,’ are to be offered by Mr. Bleeker to-day, at the Exchange, to the highest bidder. —N. Y. Ev. Times, Ap 21, 1857. City and Common Council are taking measures to May nullify the newly-passed Charter and Police Acts [see Ap 15]. Two injunctions . . . have been obtained, restraining the new Police Commissioners from entering upon the discharge of their duties. The liquor-dealers have taken measures to test the constitutionality of the new Excise law. The merchants have done the same with regard to the Post-Warden Act . . . said the Central Park and City Hall acts are to the knowledge of the legislature of the day. —Harper’s Weekly, I: 278. See also N. Y. Ev. Times, Ap 23, 1857. See further, My 9.

A remarkable application of science to the domestic purposes of life will be made in a few days at one of our most popular theatres. It is intended to light up the innumerable burners before and behind the scenes entirely by electricity. Instead of a dummy
gasman staggering beneath the weight of a long pole and a taper, two wires will be touched, and instantly every light in the house will be illumined. The effect is in the highest degree satisfying and beautiful, and the process by which it is produced will doubtless come into general use. The lighting of public buildings as at present conducted is a slow and troublesome job. After the introduction of electricity it will be effected with the rapidity of thought."—*N. Y. Eve. Times*, My 8, 1857. The experiment was made at the Broadway Theatre on May 25 with an apparatus patented by Mr. Gardiner. It was, however, defective, for it failed to ignite all the burners and it was "far from being instantaneous in its operation." Also, the escape of gas which occurred before all the burners were lighted "created anything but a pleasant sensation." A similar experiment was made "many years ago" at the Polytechnic Institution, London.—*Ibid.*, My 28, 1857.

9. A proposal has been made to divide the State of New York into two new States, drawing the line north of the Island of Manhattan, so as to include in the southern division the counties of Westchester, New York, and Richmond, with Long Island. The ground for the proposal is that the metropolitan ideas of the city and its suburbs clash so violently with the rural ideas of the northern part of the State, that a continuance under the same government is certain to bring endless confusion, strife, and conflict between the Judiciary and the Legislature. A convention is proposed to take the matter into serious consideration.

"It need hardly be said that the division of a State into two or more States is no new thing. Massachusetts and Virginia have both undergone the operation with manifest gain. Nor can there be doubt but the two States-Manhattan and Orange—which would spring out of the bisection of New York, would be well qualified to take a position among the greatest members of the confederacy. We presume that the population of the State of Manhattan would not be less than 1,500,000, while the State of Orange might contain 2,500,000 souls. The former would become a sort of Venice or Hamburg, on a new and enormously increased scale."—*Harper’s Weekly*, I: 298.

10. The City Charter has gone into effect, though the Aldermen resolved to contest its constitutionality, and Mr. Selah, Commissioner of Repairs and Supplies, whose office is abolished by it, refuses to vacate his apartments. The contest on the Police Act continues [see My 2]. . . . The Central Park Act has gone into effect. The Excise Act is to be resisted by the liquor dealers. The new City Hall Commissioners [see Ap 17] have been sworn in.—*Harper’s Weekly*, I: 325.

11. Final exercises are held in old Columbia College in Church St. (see Ap 14) prior to the removal of the college to the Daff and Dumb Asylum buildings. During the day, the corner-stone of the first building was disinterred.—*Eve. Post*, My 9, 1857. It was built into the east wall of the college chapel on 49th St. and remained there until it was removed in 1897 and inserted in the mantelepiece of the daily. The chapel was used as a museum, and later as offices of the police dept.—*16th Ann. Rep., Am. Scien. & Hist. Pres. Soc. (1911), 477-58; L. M. R. K., III: 623. The arrow is shown and described in *Gleason’s Pictorial*, VII: 135.

13. The governor appoints D. D. Conover street commissioner to fill the vacancy caused by the death of Commissioner Taylor. This appointment was made on the basis of existing law, but "as the new charter [see Ap 14] makes the vacancy to be filled by the mayor, by and with the advice and consent of the Board of Aldermen, this proceeding of the Governor is likely to lead to some trouble and an appeal to the law courts."—*N. Y. Herald*, Je 14, 1857. For the trouble that resulted, see Je 16.

14. The corner-stone of the R. C. Church of St. Vincent de Paul is laid in 23rd St. between Sixth and Seventh Aves.—*N. Y. Daily Times*, Je 15, 1857.

15. "Civil War in the Metropolitan." Under this headline is described in the *Herald* the controversy over the new incumbent in the office of street commissioner (see Je 13). Conover, the governor’s appointee, is forcibly ejected from the office in the hall of records when he endeavors to assume his duties. Upon his complaint to Recorder Smith, the latter issued an order for the arrest of Mayor Wood. An altercation followed on the steps of city hall, between the "Metropolitans" supporting Conover and the "Municipals" supporting the mayor, with much bloodshed. The Seventh Regiment, marching down Broadway to embark for the Bunker Hill celebration in Boston, was called upon to quell the riot. Immediately the mayor nominated, and the common council confirmed, Charles Devlin as street commissioner, and it remained for the courts to decide who was the legal incumbent.—*N. Y. Herald*, Je 17, 1857. For the decision of the court of appeals, see Ap 9, 1858.

Gen. Wm. Walker, "the champion of republican liberty in Nicaragua," "arrives in New York and is welcomed with great enthusiasm."—*N. Y. Daily Times*, Je 12-17, 1857. See also *ibid.*, Je 18-21, 23, 29, and 36, 1857.

A riot occurs in the Bowery as a result of a gang feud between...
1870 THE ICONOGRAPHY OF MANHATTAN ISLAND

1857 the “Bowery Boys” and the “Dead Rabbits,” precipitated by pro-
July fessional bullies of the Sixth Ward. It is carried on in Bayard,
4 Elizabeth, Mott, Worth, Centre, and neighbouring streets, and is
finally quelled by the militia, including the 4th, 7th, 9th, 55th,
and 71st Regiments.—N. Y. Tribune, Jl 6, 1857. Another riot

11 “Extensive improvements are making at Bellevue Hospital.
An additional story is adding to the main building and to each of
the wings. The cupola on the main building... is to be
moved back so as to surmount the westerly part of the edifice.
Where it now stands a large glass dome will be erected, through
which daylight will be admitted into a new and commodious apartment
that is to occupy the entire fourth story. This chamber will be
used for a lecture-room and operating theatre... Therefore
will be Hospital accommodations at Bellevue for 1,200 patients when
the present alterations are completed...—N. Y. Daily Times,
Jl 11, 1857.

Aug. The first attempt to lay the Atlantic cable, projected by Cyrus
6 W. Field of New York, is begun at Valencia Bay, Ireland. After
335 miles had been laid, the cable broke, and the expedition had to
return. There was another unsuccessful expedition in the spring of
1858, and the cable was not completed until the summer of
the same year (see Ag 5, 1858). It broke, however, soon after and was
not permanently laid until 1866 (q. v., Jl 6).—Mullady, Laying of the
Cable (1858); Field, Hist. of the Atlan. Telegraph (1886). See also
140, 637.

11 The work of filling in the Battery, which was begun six years ago,
was now to occupy two or three years longer before it is
completed... Some portion of the outer wall has settled on
account of being laid upon a soft bottom; the water, is, in some places,
three fathoms deep, and requires a large amount of material to fill it
up. Eleven acres in all have now been filled, and two more remain
to be filled. Trees will then be planted, walks laid out, and in the
course of time there will be twenty-six acres of fine promenades.
—N. Y. Daily Times, Ag 11, 1857. See also Jl 11, 1858.

The panic of 1857 begins with the suspension in New York of
the Ohio Life and Mutual Trust Co. It spreads through the country
and resulted in a general suspension of specie payments (see O 13).
Many business firms failed, and thousands of men were out of
employment. United States troops were placed in charge of the New
York custom-house and assay office to protect them from mob
violence (see N 2)—N. Y. Daily Times, Ag 24, 27, S 2-4, 10, 14-
16, 28, 30, O 10, 12, 15-17, 19-24, 26, 28, 30, 31, N 6, 7, 14, and
17, 1857; Gibbons, Banks of N. Y., their dealers, the clearing house
and the panic of 1857, 340; Eames, N. Y. Stock Exchange, 38; Harper’s
Weekly, I: 646; Lossing, Hist. of N. Y. City, II: 663-64. The New York
banks resumed specie payments on Dec. 12 (q. v.). See also O 15.

Sept. The name of The New York Daily Times is changed to The
New-York Times—See issue of this date in N. Y. P. L.

17 “At last ground has been broken for the new Tompkins Market
[see D 31, 1856], at the junction of Third and Fourth-avenues,
and the iron building is in progress of erection. The plan of
the market includes a large hall, the use of which has been given by the
Common Council to the Seventh Regiment as a drill-room and
armory” —see O 1, 1856.—N. Y. Daily Times, S 17, 1857. See
also Ibid., Je 2, 1858. N. Y. Daily Tribune, O 28, 1859; De Voe,
Market Book, 566. The market was opened on Aug. 8, 1860 (q. v.).

23 The “Fulton St. prayer-meeting” of the Reformed Dutch
Church is started in the consistory-room in the three-storey building
in the rear of the North Dutch Church, at 103 Fulton St., which
was erected in the summer of 1844.—Chambers, Nos Prayers
Prayer Meeting (1857), 43; Lossing, Hist. of N. Y. City, II: 664.

Oct. All the banks of New York City, except the Chemical Bank,
unanimously agree to suspend specie payments.—Harper’s Weekly,
I: 646, 674; N. Y. Times, O 14, 1857. See also Eames, N. Y. Stock
Exchange, 39.

15 A new theatre is opened on Broadway, “in Wood’s new marble
building, on the site of the old Lyceum of Natural History.”—
N. Y. Times, O 16, 1852. The theatre was closed in 1859, and the
premises became the Merchants’ and Manufacturers’ Bank—

22 Because of the large number of unemployed, Mayor Wood, in
a message to the common council, recommends further public
works, including Central Park, a new reservoir, and the construc-
tion of new streets. He also urges that the comptroller be author-
ized to advertise for estimates for furnishing the corporation with
50,000 bbls. of flour and a corresponding quantity of corn meal
and potatoes, to be paid for “by the issue of a public construction
stock, redeemable in fifty years, and bearing seven per cent. inter-
est; these provisions to be disposed of to laborers to be employed
upon the public works referred to, in lieu of money, at its cost
price to the Corporation. ... Twenty-five per cent. could be
paid in cash.”—Proc., Bd. of Ald., LXVIII: 158-59. For action
taken by board of aldermen, see N 9.

A special session of the supreme court an injunction is issued
in behalf of D. D. Conover, commanding Charles Devlin “abso-
lutely to desist and refrain from performing or attempting to
perform any of the duties of Street Commissioner [see Je 16]... and
from interfering with the plaintiff in the performance of duties
as such Street Commissioner, until some right in the said Devlin
be established by the proper action in the nature of quo warranto,
bring forth for that purpose.” A temporary injunction had
been issued on Aug. 17—Proc., Bd. of Ald., LXIX: 101-2. While this
injunction served to give Conover possession of the commissioner’s
office and access to the records and documents therein, neither
Mayor Wood nor the common council gave Devlin official recog-
nition; furthermore, litigation was commenced resulting in the
granting of another injunction restraining Conover from making
contracts “for opening and regulating sundry streets.”—Ibid.,
LXIX: 82-83.

It is stated that from thirty to forty thousand labourers have
been thrown out of work in New York City as a result of the hard
times. Numerous hunger meetings have been held throughout the city,
and the people marched through the streets calling for bread and
work. At Mayor Wood’s request the city corporation voted $250,-
000 to give work in Central Park to the unemployed. The unrest
was so great that troops were called out to guard the custom-house
and the sub-treasury.—McMaster, Hist. of the People of the U. S.,
VIII: 298-99, 300, 302; N. Y. Times, O 23, N 5, 6, 7, 10, 11, 12,
W 9, 10; Harper’s Weekly, O 25, 1857.

The new building of the New York Historical Society, on
Second Ave. and 10th St. (see O 17, 1859), is opened with appro-
It is described in Harper’s Weekly, I: 562-63.

Reporting upon the petition of the unemployed and the com-
munication from Mayor Wood (see O 22), the finance committee
presents to the board of aldermen the following resolutions which
are adopted:

"Resolved, That it is inexpressible at this time to adopt the sug-
gestions contained in the message of his Honor the Mayor,...
relative to a proposed issue of stock to procure large supplies of
food, to be furnished at cost prices to the laborers employed on the
public works.

"Resolved, That the Comptroller be, and he is hereby directed
to expedite, as much as possible, the contemplated grading of
Hammond square, and that, upon the passage of the Central Park
Improvement appropriation, he take immediate steps to realize the
money contemplated to be raised by the passage of the ordinance.

"Resolved, That in making up the annual tax levy for the year
1858, the Comptroller be, and he is hereby authorized and directed
to insert therein, in addition to the annual appropriation for roads,
the sum of fifty thousand dollars, to be expended in Macadamizing
the Second avenue, from Forty-second to Eighty-sixth street, and
such other streets and avenues as the Common Council may, from
time to time, direct.

The committee states that the aldermen “have passed an ordi-
nance appropriating two hundred and fifty thousand dollars for the
Central Park Improvement, which now only awaits the action of
the Board of Councilmen, and the approval of the Mayor, to meet
in part, the demand for labor by the unemployed. It will, no
doubt, be made available and applied to the purpose intended
during the present week.”

It is impossible for the common council to do anything about
commencing the "New Reservoir," because of "litigation growing
out of the award of contract, made by the Croton Aqueduct
Department.

Matters connected with street improvements, repairing wharves
and bridges, and repair of public buildings are no longer under the
control of the common council, because of the interference of
the state and the appointment by the governor of the head of the

FIRST NEW YORK TELEPHONE DIRECTORY; DATED OCT. 23, 1878. SEE P. 1968.
The city government passes an ordinance repealing that of 1855 (see summary under J a 9, 1854), when all proceedings in the efforts of interested property owners to extend Albany St. through Trinity churchyard were stayed. This new ordinance permits the street to be cut through. In the course of the hearings in opposition to it, the Rev. Dr. Vinton made a notable and effective plea. "That ended the matter and the scheme has not been revived."—Dix, Hist. of Trinity Church, IV: 449-50. See also 1853.

1858

In this year, Jews were first admitted to the house of commons.

—Haen, Europe since 1815, 458.

The General Regulations for the Military Forces of the State of N. Y., for 1858, prescribe that every pipe-pole or staff to which the flag, standards, guidons, or colours are to be attached shall be accompanied with a flag eagle—Preble, Hist. of the Flag of the U. S. of Am., etc. (1880), 616.

In this year, Daniel Huntington, the painter, after several extended visits abroad, returned to New York, where he resided and continued his profession. He held a leading position among the artists of America. He was for many years president of the Century Association, and the National Academy of Design. He was an expert in the art of painting portraits, but he produced, also, landscape, genre, allegory, and still-life.—Isham, Hist. of Am. Painting, 281-86. See also Tuckerman, Book of the Artists, 231-32.

In this year, James Lenox presented to the N. Y. Historical Society a large collection of Nineveh sculptures, which the society named the "Lenox Marbles." These had been purchased, largely, by Henry Stevens in 1853, and were bought from him by Mr. Lenox for $5,000. "They consisted of 13 slabs, about a foot thick, with sculptures in bas-relief, generally about 2' feet high, and averaging 6 feet in width, the whole, ranged side by side, measuring 72 feet 2 inches."—Stevens, Recollections of Mr. James Lenox, 118-27.

A new and well-illustrated guide-book was published this year and the next, entitled Nelson's Guide to the City of New York and its Neighborhood.

In this year, "Macy's" was founded at the s. e. cor. of Sixth Ave. and 14th St., by Rowland H. Macy, a retired sea-captain. For view of this store, see Brown's Book of Old N. Y. (1913), 317.

In 1902, the business moved into its new building "up town," occupying the block front on the west side of Broadway between 34th and 35th Sts., exclusive of the lot at the 34th St. corner. In 1924, a 19-story addition on the west was added.—From letter to the author by courtesy of R. H. Macy & Co.

In this year, the Chamber of Commerce moved from the Merchants' Bank to rooms in the building at the southwest corner of William and Cedar Sts.—25th Ann. Rep., Ch. of Com. (1885-84), xvi. It remained here until 1883 (q. v., j6).

In this year, the "Palace Garden" was opened on the north side of 14th Ave. west of Broadway, by the same stockholders. The results are summarized, a list of six Democrats (actually appointees of the mayor under the new law) as well as one of six Republicans appears under the caption "Supervisors Elected."—Wm. M. Tweed heads the list of Democrats.—Eve Post, D 2, 1857. See also Harper's Weekly, I: 785.

Funeral services for Thomas Crawford, the sculptor, are held in St. John's Chapel, the body having arrived from London, where he died on Oct. 16. He was buried in Greenwood Cemetery.—Eve Post, D 5, 1857; Tuckerman, Book of the Artists, 307, 318-20. For a brief account of his life and works, see ibid., 306-20. See, further, D 18, 1861.

A contributor to Harper's Weekly suggests the arcing of the blocks on both sides of Broadway to relieve congestion.—Harper's Weekly, I: 808-9.

The cornerstone of a new church for the worshippers at the late Broadway Tabernacle (see F 15) is laid at the n. c. cor. of 14th St. and Sixth Ave.—N. Y. Times, D 26, 1857; L. M. R. K., III: 928. The church was dedicated on April 24, 1859 (q. v.).

The board of aldermen votes to sell the lower end of City Hall Park to the U. S. as a site for a post-office—N. Y. Times, D 30, 1857. See Ap 2, 1861.

1871

For a brief account of his life and works, see ibid., 306-20. See, further, D 18, 1861.
In Valentine’s *Manual* for 1858 were published: map of the city, 1858; Mayor Daniel F. Tiemann’s residence, 88; Chatham St., looking south from Chatham Sq., 108; the Boerum mansion, 123; the residence of Judge Kingham, Harlem, 159; “The Hermitage,” the home of Sam. L. Norton’s residence, on 43d St., bet. Eighth and Ninth Aves., 212; old house, n. w. cor. Peck Slip and Water St., 248; residence of W. B. Crosby, Rutgers Pl., bet. Jefferson and Clinton Sts. (see also Pl. 109, Vol. III), 268; “The Nursery,” Sixth Ave., cor. 15th St., 304; N. Y. Savings Bank, Bleecker St., 323; room at No. 1 Broadway, where Sir Henry Clinton gave his last instructions to Major André; and the Remsen farmhouse (2 views), 464, 470; “The Grange,” Hamilton’s residence near Kingsbridge Road, 468; the Atlantic Garden house, opp. Bowling Green, 588; and the old sugar-house, Rose St., 624.

For view of the quarantine grounds and buildings, Staten Island, May, 1858, see *ibid.* (1859), 324.

For view of Pearl St., looking from State St., 1858, see *ibid.* (1859), 384.

For view of the squatting settlement, bet. First and Second Aves., near 38th St., in 1858, see *ibid.* (1859), 420.

For view of old residences on Murray Hill, on the old Boston Post Road, at Lexington Ave., near 37th St., in 1858, see *ibid.* (1859), 428.

For view of remains of Fort Tryon, 1858, see *ibid.* (1859), 444.

For view of the remains of Cock Hill Fort, 1858, see *ibid.* (1859), 460.

For three views in Central Park, June, 1858, see *ibid.* (1859), 504, 516, 540.

For view of the “Niagara,” “Valorous,” “Gordon,” and “Agamemnon,” laying the Atlantic cable at mid-ocean, in this year, see *ibid.* (1861), 134.

For view of old cottages on Lawrence and Crosby Sts., in this year, see *ibid.* (1864), 88.

In about this year, a coloured lithographic panorama of the west side of Broadway from No. 1 to about No. 203 was made in four sections.—*Pyne sales catalogue*, item 178.

Mayor Tiemann, in his message to the common council, shows that taxation “for the support of the city government” has increased **149%** since 1850, an increase far in excess of the growth in population. Among his proposals to check this expenditure is that of placing the schools of the 22 wards, which are now controlled largely by local boards, “under the control and government of a single Board of intelligent and educated citizens.”

He cites the expenditure of a considerable amount “for the purpose of causing the records and other papers in the County Clerk’s, Surrogates’ and Register’s offices, to be indexed and printed.”

Salaries having increased over **50%** during the past year, a revision of salaries, “based upon the consideration of the labor and responsibilities involved,” is recommended. He also advises that the city treasury have the advantage of the excess of sinking fund interest.

The much debated question as to whether the streets may best be cleaned “by contract or by persons employed directly by the department,” the mayor declares for the contract method, with “the contractors held to a strict accountability.”

He prophesies that none of the cities of Europe will have parks, walks, and drives to exceed Central Park, “when time has been afforded for its improvement,” and he recommends, in this connection, that all streets between 42d and 125th be “opened by one and the same proceeding” as a measure of economy and one that will tend to build up New York rather than “cities adjacent.”

The mayor deplores the condition in the street department caused by rival claimants for the office of street commissioner each involving the aid of the courts “to determine his title,” and declares he will refuse his signature “to all warrants for the payment of their salaries or for the payment of any work which either may undertake” until a decision is reached. The mayor also declares for an executive council, i. e., regular meetings of heads of departments with the mayor “for the purpose of consultation, in relation to the business and interests of the city, and each of the departments of its government, to prevent the conflict of the departments with each other and save the expense of the insular government,” he maintains, however, that even this arrangement cannot produce the best results until all department heads are nominated by the mayor and “removable at his pleasure.”

In regard to the new arrangement for a police force, he declares his belief that it is “decidedly objectionable that the state government, besides creating the Board and appointing its officers [see Ap 15, 1857,] have also fixed their compensation, to be paid out of the city treasury, without a right on the part of the people of the city to regulate or control them in any degree.” The mayor says he considers the police of a metropolis to be “an army for preserving domestic order in time of peace, just as the regular army protects us from foreign invasion in time of war,” and he recommends that “our police, ‘in the designation of its men and officers, and also in their appointment, suspension, trial and removal,’ be organized and governed ‘according to like features in our military system, the mayor being considered the head of the force.’” However, he believes the force as now organized has done its work “with commendable fidelity,” and has been “rapidly gaining the public confidence,” despite its “hasty organization and the excitement of the public mind.”—*Proc. Bd. of Ald., LXIX: 10-14.*

In the day’s issue, the editor of the *Herald* declared the message “pregnant with reforms, some of them quite possible of accomplishment, but some of a character for which the times are not, perhaps, quite ripe.”—*N. Y. Herald*, Ja 6, 1858.

D. D. Conover, who was appointed street commissioner by the governor on June 13, 1857 (q.f.), and in whose favour an injunction was issued on Oct. 26, 1857 (q.n.) against Charles Devlin, Mayor’s Wood’s appointee (June 16, 1857), reports to the board numerous irregularities and abuses in the street department chargeable to Devlin in collusion with the comptroller and corporation counsel. In this way he claims the city treasury has been “defrauded of thousands of dollars.” The business of contracting for public work is described as having been “reduced to quite a manageable system, confined to a few parties, who serve as sureties for each other, and back out or sell out among themselves the occasion requires or opportunity afforded to do so at the expense of the property owners. . . . The gross and wholesale violation of law and ordinance, disregarding concealment even; the utter contempt displayed for the action and sanction of the Common Council and Mayor; the bribery which must have bought the election of parties whose legal rights were so summarily set aside, and which, if the whole truth were known, would be doubtless known, was brought to bureaux outside of the Street Department; the deliberate and systematic alteration of contracts, thereby fraudulently overtaxing citizens for unnecessary work, performed at monstrous rates of charge, all go to prove, most conclusively, that the separation of the several departments from the control and supervision of the Mayor and Common Council, and the making their respective heads elective and responsible for their actions, the late charter, has increased the political corruption of the day to a point, destructive alike to the honor of the man and the obligations of the citizen.”—*Proc. Bd. of Ald., LXIX: 97-100.*

At the same meeting Mayor Tiemann communicates to the common council the fact that whereas the enlargement of the Battery was not expected to cost more than $27,140, the contract was made in such a way to cost more than $31,500 has already been paid out, “and but little, apparently, has been done to show for it. The filling in has been a source of profit to the contractor—it is supposed to a large amount—while the most expensive portion of the improvement remains yet to be done.”—*Ibid.*, LXIX: 124-25. These communications, says the *Herald,* “are calculated to satisfy every taxpayer that the charges of fraud and corruption which have been so frequently brought against the Corporation of this city, are not only well founded, but actually fall short of the truth.”—*N. Y. Herald*, Ja 13, 1858. Devlin made answer to Conover’s charges on Jan. 21 (q.v.).

The board of aldermen votes to add to its standing committees a new “Committee on Frauds.”—*Proc. Bd. of Ald., LXIX: 141.*

The membership of that committee was announced at the next meeting.—*Ibid.*, LXIX: 105. The *Herald* comments: “So thoroughly has the principle of spoliation in the administration of the City revenues become part and parcel of the system that the Boards have recognized its permanent character by nominating a Standing Committee on Frauds. The only purpose of this Committee is, we are satisfied, to formalize and perpetuate existing abuses with a gain to the public treasury. The all too numerous committees, in connection with charges of corruption, so far, at least, as the Corporation is concerned. . . . We are, therefore, compelled to arrive at the conclusion that the appointment of this
Standing Committee on Frauds is only a sham, intended to cheat our citizens into the belief that our city sheriffs are keeping strict watch and ward over the public wool."—N. T. Herald, Jan. 21, 1858. See editorial on the frauds occupying the attention of the committee in ibid., Feb. 17, 1858. In a subsequent editorial this is termed "a standing committee of humbug, got up, not for the purpose of exposing crime, but of shielding it."—Ibid., March 1, 1858.

In a communication to the common council, Devlin defends himself against the charges of Conover (see J. 1). "I have never sought," he says, "to pocket a penny dishonestly or dishonestly earned, and I have never kept a penny honestly due, from the pocket it belonged to me.

"When this Street Commissioner controversy shall be ended, I shall then give you a full account of my stewardship, which I am confident will satisfy the reasonable expectations of my fellow-citizens. I could not if I would, and would not, if I could, satisfy that eminent "public piety" with which Mr. Conover has surrounded himself. It is long used and well skilled in that school of tactics which raises the cry of wrong, only to divert attention away from its own doings. It knows well how to trump up charges for fraud against those who stand in its way, to a place where its genius for plunder can germinate, blossom, and fruitify." He announces that he will no longer keep silent regarding the charges against him. "The press, which I hold with every good citizen, to be the palladium of freedom, has shown me no mercy; of this I do not complain. I am some of the time, as Judges of several of the courts, generally right, and I have no fears but that it will vindicate my character, as one by one, I meet the charges as they shall be made definite against me; and truth shall yet rise radiant and serene from the dust in which her enemies had temporarily crushed her, in their unprincipled crusade against me."—Proc. Bd. of Ald., LXIX: 213-14. For additional charges against Devlin by Conover, see J. 24.

D. C. Conover reports to the common council "additional cases [for earlier charges, see J. 11], illustrative of the loose and irregular system under which fraud and other illegal transactions have heretofore been practiced upon the public treasury and individual property owners." In some of these cases Charles Devlin was shown to be implicated. These frauds consist, he says, "mainly in falsely certifying the terms and specifications of recorded contracts," and bring losses to property owners or to the city treasury of amounts "varying from hundreds to thousands of dollars." Means and opportunity have been found in the street department "to inspect the bids for the benefit of favorites, before the regular opening of them for award." Many of the cases of over payment made in consequence of the misrepresentation and fraud practiced upon the public treasury are "an important premium of the parties of the amounts so wrongfully obtained from the treasury and property owners," and all "clearly indicate that some further checks and guards by ordinance or otherwise" are necessary, and he offers definite suggestions for the common council's action.

The attitudes of the aldermen in the matter is evidenced by the following excerpt from the minutes: "While the same was being read, Alderman Stephens moved that the further reading thereof be dispensed with, and that the communication be laid on the table. Which was carried."—Proc. Bd. of Ald., LXIX: 251-58. At the next meeting of the aldermen, on Jan. 28, Conover submitted another report of a piece of work, "done under contract by Charles Devlin," in which the surveyor's original return of work done was 1,828 cubic yards, earth excavation 579 cubic yards, rock 509 cubic yards, earth filling 579 cubic yards, rock 509 cubic yards, earth filling 579 cubic yards. This return had been altered (with the alterations "clearly manifest"), prior to the payment for the job to Devlin by the comptroller, to read as follows: 1,628 cubic yards, earth excavation 579 cubic yards, rock 509 cubic yards, earth filling 579 cubic yards. This communication, tabled for the time being, was referred to a "Committee on Frauds," on Feb. 4.—Ibid., LXIX: 354. Conover submitted an additional report on March 1 (p. v.)

The editor of the Herald raises his voice against the proposal to erect a post-office in the Park (see D. 29, 1857). "Since the Battery has been spoiled by the so-called improvements," he says, "the Park is the only public ground in the city below Fourth street. We would have it still farther improved by the removal of all the buildings, except the City Hall, in which there should be a public free gallery of pictures and statuary and a great reception room for the guests of the city. Then let the city buy up the property on the Points, between Centre street and Chatham square, and erect thereon buildings for the Post Office, the United States Courts, the public offices of all kinds, the criminal and civil courts of the State, all within a stone's throw of each other. The convenience and importance of such a movement is obvious. A dangerous district would be purified, all the property in the vicinity would be doubled in value, while the public would be better served than at present. But, at all events, no Post Office in the Park."—N. T. Herald, Jan. 20, 1858.

The aldermen pass a resolution seeking an amendment to the city charter that will allow a member of the common council to receive a compensation of $1,000 per annum.—Proc. Bd. of Ald., LXIX: 308-9. The resolution was vetoed by Mayor Tiemann on Feb. 15 (p. v.).

Mayor Tiemann vetoes the resolution of the aldermen seeking an annual salary for the members of the common council (see F 1). His message is interesting historically in the statement: "Under all the charters prior to that of 1849 [p. v., Ap 2], the members of the Common Council received no pay for their services, in respect to the legislative duties performed by them. It is true that there were duties which, under previous charters devolved on the members of the council, and the services were performed by them by virtue of their offices, for which they were paid, and that the Aldermen and Assistants, as Commissioners of Excise, received a certain rate for each day they acted as such. But . . . in their legislative capacity, they were never paid until the year 1850 [p. v., Ap 13], when an ordinance was passed, that each member should be entitled to receive for his legislative services, four dollars for each day he should sit in Common Council. The policy, as well as the right, of the Common Council to pass such an ordinance, was doubted and strongly opposed by several of its members at that time, but the pay was continued until the succeeding year [see J. 11, 1851], when an act was passed by the legislature, amendatory of the charter of 1849, which, after fixing the sessions monthly, provided that 'at no session shall the members be entitled to draw any per diem allowance for a longer period than eight days.' . . . Each member . . . received pay for his services at the rate of three hundred and eighty-four dollars per annum, until the adoption of the present charter [see Ap 14, 1874], when . . . such pay ceased on the first day of May last . . . ."

"The position of a member of the Common Council prior to the ordinance of 1850, had been sought by the citizens singly and collectively, as the important premium of the trust it imposed . . . the most prominent citizens were those who were connected with that Honorable Board. Whether it was the change that the salary given by the ordinance of 1850 introduced, by bringing forward candidates for the position who looked more to the compensation than to the great interests to be served as legislators of the city, I cannot say, but that after that period, extravagance and recklessness in the expenditures of the city government greatly prevailed, is evident from the fact that while in 1850 the expenditures were but three millions two hundred thousand dollars, they had increased the last year to upward of eight millions two hundred thousand dollars, and it, therefore, may have been this startling fact, so prominent, which induced the legislature, and satisfied the public, that a return to the old system of no pay was best for the public interests."

The mayor reminds the members that they were elected under this new charter and therefore "implicitly assented thereto, and accepted the responsible and important trust . . . with the understanding that they were to be performed without compensation." Furthermore, such action would increase the expenses of the city government, and they were elected "with a view to a reduction of the expenses of government." Again, there was more reason for paying members under the former charters than now, because "various executive and other duties were then performed, which the present charter strips the members of." The time now required for their official duties "need not interfere with the ordinary, or regular occupations or business, which they may respectively follow or carry on." Like many other "offices of trust and honor, in the city," this is one which citizens may gladly accept "for the interest and desire they feel to contribute their share of their talents
and their time, to the public or private good.”—Proc. Bd. of Ald., Feb. LXIX, 415-21. By a two-thirds vote the board repassed the measure on March 3rd.—N. Y. Herald, Mar. 6, 1858. See Sec. 15.

17 The editor of the Herald again (for an earlier protest, see Ja 29) protests against a post-office being erected in City Hall Park. “Instead of putting any more buildings in the Park,” he says, “all that there are should be removed except the City Hall.” He recommends again that the “Five Points and its dependencies,” now a “nest of drunkenness, rogues, debauchers, vice and pand- lence,” be acquired for a “new set of Corporation buildings . . . upon a scale and in a style worthy of this great metropolis.” A surrounding margin of this area “might be made to pay to the city all expenses, if cut up into lots of twenty-five feet front for lawyers’ offices, stores and hotels.”—N. Y. Herald, F 17, 1858.

21 The editor of the Herald declares: “There probably never was a time when an increased cost to the public and so utter a failure as it is now. No one seems to be arrested; burglaries increase frightful; assaults abound every night; almost every law is broken; the police seem to be asleep. There is every reason to believe that they are not only inattentive to their duties, and unfit for the station they fill, but also that in many instances—as, for instance, in the case of the gambling houses and the model artist clubs—that there has been open connivance by the officers with the proprietors.” A pretty change we have made in getting rid of the old force, and substituting the Metropoli-tans!”—N. Y. Herald, F 21, 1858.

26 Mayor Tiemann signs a resolution passed by the common council seeking the repeal of the “Metropolitan Police bill” (see Ap 15, 1857) on the ground that the measure “was passed against the feel- ings and wishes of the citizens of the city of New York, entailing upon them added taxation and support of an inefficient police without their deriving a corresponding benefit from the force in the matter of the general good government of the city than was derived from the former police at a much less expense of money.”—N. Y. Herald, F 27, 1858.

Irregularities in the street commissioner’s office are alleged by D. D. Conover in another communication to the common council (see Ja 11 and note). Many assessment lists have been confirmed for amounts in excess of contract figures varying from $1,002.92 to $4,042.45. There are many other cases, he adds, “in which the allowances and gratuities range in amounts less than $100.” Any “extra allowances” made to contractors by the street commissioner he shows to have been in violation of sec. 10 of the late charter: “No additional allowance beyond the legal claim under any contract with the corporation, or for any service on its account, or in its employment, shall ever be allowed.” He concludes: “How all these illegal, and even fraudulent allowances, could be passed over and confirmed by the Committees on Assessments, and more particularly admitted and liquidated in the Comptroller’s Department, passes comprehension, and may justly cause a doubt of the utility and integrity of this powerful department of the city government making up one-third of the city’s expenses, and in which the city is concerned in that department.”—Proc. Bd. of Ald., LXIX: 535-56; N. Y. Herald, Mr 2, 1858. “The total amount of the excessive assessments in the foregoing list is $29,452.03; and in addition to the excesses which we have been able to obtain in the cases already examined by the committees of the Common Council would swell the amount of fraud in the Street Department to the nice sum of $52,052.80. This affords some clue to the largely increased taxation of the city.”—Ibid., Mr 7, 1858. Further irregularities were alleged by Conover in another communication, on March 11.—Proc. Bd. of Ald., LXIX: 624-31. See Mr 7.

The circulation of the Herald for the last year has averaged 62,000 copies per day. The editor declares this to be according to “the sworn statements placed before the Post Office Department,” and that “the combined issue of all the morning journals put to- gether” does not equal it. This editorial was provoked by a reso- lution of the common council ordering the publication of the proceedings of that body in some daily journals including the Herald “at the usual advertising rates.” Warning is given that the rates of the Herald are not “the usual advertising rates of the evening journals,” and “the Sunday papers,” which have “hit upon a new circum- stance,” and “are glad to get the city advertisements at any price to fill up their vacant spaces.”—N. Y. Herald, Mr 4, 1858.

7 Rear-admiral Mohammed Pasha, Turkish envoy to the U. S., arrives at New York and is welcomed by a committee of the common council.—N. Y. Times, Mr 9-16, 1858.

The supreme court renders a decision declaring Charles Devin entitled to the office of street commissioner instead of D. D. Conover (see Mr 15, 1857; Ja 5, 1858). Conover refused to yield the office to the court of appeals decided, and a “free fight” between the factions resulted. Mayor Tiemann personally entered the office with a squad of police and ordered both claimants to leave. He then locked the door and retained the key himself.—N. Y. Herald, Mr 7, 1858. For the decision of the higher court, see Ap 12.

“arrested people” (see 1857). At 215 Broadway, is raided and closed by a body of police officers from Mayor Tiemann’s office. This and other activities brings an unaccustomed word of praise from the columns of the Herald: “Mayor Tiemann, like all his predecessors, has commenced an onslaught upon the gambling houses, lottery policy shops, &c, &c. He has stumbled on several occasions, but will improve as he goes on. It seems probable that the Mayor is a conscientious man, that he does not attack the gamblers for outside effect, but that he is a sincere believer in his reform measures, which he will probably make more stringent as he proceeds.”—N. Y. Herald, Mr 15 and 16, 1858.

In a message to the aldermen Mayor Tiemann argues against another attempt that is being made in the legislature to lay a rail- road track in Broadway. The city should control such an act, he says, and it should go to the highest bidder, like ferries and other franchises. Furthermore, proposals have been lodged with him “offering $100,000, and more for the right of a railway, subject to certain restrictions.”—N. Y. Herald, Mr 20, 1858. Subsequently, in an editorial, the Herald declared: “The Eighth, Sixth, Fourth, Third and Second avenue roads amply suffice for the public wants. If the Legislators seeks the public good, and not the furtherance of private interests, no new railroad scheme will be tolerated.”—Ibid., Ap 4, 1858.

“The great wave of religious excitement which is now sweeping over this nation, is one of the most remarkable movements since the Reformation. . . . In this city we have beheld a sight which not the most enthusiastic fanatic for church-observances could ever have hoped to see. Contractors, from every part of the City, in the busiest hours, assemblies of merchants, clerks and working-men, to the number of some 5,000, gathered day after day for a simple and solemn worship. Similar assemblies we find in other portions of the City; a theatre [Burton’s] is turned into a Chapel; churches of all sects are open and crowded by day and night. . . .”—N. Y. Times, Mr 20, 1858. See also ibid., Mr 22, 23 and 29, 1858.

Burton’s old Chambers-street Theatre, which has been leased by the United States Government for fifteen years at a rent of $16,000 per annum, will be immediately fitted up for the use of the United States Courts and offices of the Government in this City. The property which has been leased includes three dwelling houses on Read-street, the right of the theatre, and a plot of land 75 feet by a depth of 160 feet. The building will be divided into two stories connected by iron staircases. The hall will be 50 feet wide. On the first floor will be the United States Marshall’s and other offices, and on the second floor will be the rooms of the United States Circuit and United States District Courts, each 60 feet deep, lighted from above. The United States District Attorney will have four rooms in the second story, and on the same floor will be the Judges’ private apartments, and petit jury rooms. $20,000 is the estimated cost of altering and refitting the building.”—N. Y. Times, Ap 5, 1858. See also L. M. R., III: 982-3.

The Baptist Church at Fifth Ave. and 35th St. (see Je 8, 1856) has been sold to Christ P. E. Church, now in 18th St. near Fifth Ave. (see Je 30, 1854).—N. Y. Times, Ap 6, 1858. See S 26.

A grand charity ball is held at the Crystal Palace. About 20,000 people are present.—N. Y. Times, Ap 9, and 10, 1858. The receipts were over $9,000.—Ibid., Ap 23, 1858.

The court of appeals affirms the decision of the supreme court (see Mr 7) that the governor “had no authority to appoint D. D. Conover street commissioner in place of Joseph S. Taylor, deceased” (see 1857; Ap 11). The decision is regretted by the Legislature.
had not been entitled to further compensation ($4 per day for the first eight days of each month) after May 1, 1857—Laws of N. Y. 1858, chap. 159; Proc. Bd. of Ald., LXIII: 485. By the same act the board of supervisors for 1857 were "to be entitled to compensation at the same rate per diem as the supervisors of the other counties of the state."—Laws of N. Y. 1858, chap. 159.

A day of much excitement in municipal politics. Attorneys of Charles Devlin (see Mr. J) serve Mayor Tiemann with "a judgment of ouster and a writ of possession for the Street Commissioner's Department" on the basis of the judgment of the court of appeals in affirming the decision of the supreme court that Devlin was the legal incumbent of the office. The mayor was informed by Devlin that he was "suspended from the performance of any duties of Street Commissioner" and that he (the mayor) was about to "communicate the cause thereof to the Common Council." During the afternoon, says the Herald, between 500 and 600 people "congregated about the City Hall, talking over the Devlin case. . . . At the opening of the Board there was a tremendous rush to get inside the chamber, and it was with the greatest difficulty the members of the Board, the Clerk and reporters could gain admittance." The communication from the mayor and a letter from Devlin demanding a hearing were both referred by the board to a special committee.—Proc. Bd. of Ald., LXX: 99-101; N. Y. Herald, Apr. 13, 1858. At the next meeting of the board (see Apr. 15), the mayor transmitted his charges against Devlin. See My 16.

1858. A hospital.
Apr.
24
17
28
1875.

"The remains of 100,000 paupers and strangers were transferred from the city limits to Ward's Island, where seventy-five acres had been set apart for a pauper cemetery."—Lossing, Hist. of N. Y.'s City, II: 668.

"Ground for the new reservoir in Central Park (see Apr. 14, 1856) is broken, at 86th St. and Fifth Ave., with appropriate ceremonies..."A reservoir will be egg-shaped, so as to give it the appearance of a lake, and has for its ground a natural basin, with an area of 106 acres. When completed, it will have a capacity of 1,029,880,145 New York standard gallons, which, in the event of a cut-off in the supply, would give water to the City for thirty-one days. The work, it is supposed, will hardly be completed within three years, though the contract limits the time to 400 working days from the 1st May, 1857, to Apr. 19, 1858. See also 2d Ann. Rep., Com'rs of Cent. Pl. (1859), 591. descript. of Pl. 151; III: 771. See, further, Jl 31, 1860.

The aldermen concur with Mayor Tiemann in removing Charles Devlin (see Apr. 12) from the office of street commissioner. A number of petitions had been received by the board urging such action. The special committee on the subject reports that a thorough examination of the charges "would occupy several weeks, if not months, thereby opening a lengthy controversy, and causing an unnecessary interruption of the public business of that department," which has been for nearly a year "paralyzed and inoperative." They deprecate further delay and "submit the whole matter back to the Board, for such action may be considered necessary, and for the best interests of the city," with the result as above stated. The mayor is immediately informed of this action and nominates Edward Cooper, son of Peter Cooper, to succeed Devlin; the board unanimously concurs.—Proc., Bd. of Ald., LXX: 171-74. Mr. Cooper took formal possession of the office on the following day; "he has determined," says the Herald, "to entirely change the personnel of the office, and have no one around that he cannot fully confide in upon..."—N. Y. Times, Apr. 21, 1858.

A funeral torchlight procession, composed of about 2,000 Germans, Italians, and Frenchmen, takes place in memory of Orsini and Pierri, recently guillotined in Paris for the attempted assassination of Emperor Napoleon. The line of march is from Union Square to City Hall Park, where addresses are made and resolutions adopted.—N. Y. Times, Apr. 23, 1858.

Lucy Stone's lecture on "Woman's Right to Suffrage" was "attended by a large portion of the city magistracy and many leading citizens." The editor of the Herald believes that public impression is "in favor of the confinement of the fair lecturer..." in some wholesome retreat, where proper care and mild regimen may subdue the undue excitement of her imagination."—N. Y. Herald, Apr. 25, 1858.

The city is authorized to build a free bridge, with a turn-table draw, across the Harlem River from a point at or near the terminus of Eighth Ave., not east of Seventh Ave, nor west of Eighth Ave., to a point in Westchester County at or near the terminus of the road leading to Macomb's dam. The act requires the removal of Macomb's dam (built in 1813), and that the new bridge shall be completed by 1854.—Laws of N. Y. (1858), chap. 291; (1859), chap. 359. See also descript. of Pl. 137-b, Ill: 706.

The legislature appoints commissioners to superintend the erection, in the Park, in the rear of the city hall, of a building of suitable dimensions and arrangement, to accommodate the supreme court, superior court, court of common pleas, courts of oyer and terminer, general and special sessions, surrogate's court, marine court, their officers, and clerks of the various branches of justice, including sheriffs, clerks of those courts, commissioners of jurors, district attorney, and law institute. A similar act of April 17, 1857 (p. 79) is repealed.—Laws of N. Y. (1858), chap. 318; N. Y. Times, Apr. 22, 1858. The building here authorized eventually became the county court house.—L. M. R. K., III: 974. This marks the end of the attempt to build a new city hall in the Park. See, further, Apr. 19, 1861.

The legislature authorizes the city to convey to the Woman's Hospital (see Apr. 18, 1857) the block of ground bounded by Fourth and Lexington Aves., 49th and 50th Sts., containing 32 lots, the conveyance to remain in force only as long as the ground shall be used for the purposes of a hospital.—Laws of N. Y. (1858), chap. 324. The grant was made on Jan. 4, 1859.—Man. Com. Con. (1870), 762. Potter's field previously occupied this site.—L. M. R. K., III: 92, 936. The corner-stone of the hospital was laid in May, 1866 (p. 79).

Chronology: Industry and Education: 1842-1860

1842-1860 (1850) the legislature passes a law providing for the establishment of the New York School of Design, which is later renamed the Cooper Union for the Advancement of Science and Art. The school offers free education in art, science, and engineering to anyone, regardless of race or gender.

1855 - The New York Times launches the first successful subscription-style newspaper, allowing readers to pay for the paper in installments.

1857 - The American Civil War begins, leading to significant changes in the economy and society of New York City.

1858 - The first Pony Express riders make their way through New York City on their way to California, beginning a new era of faster communication.

1860 - The first public health regulations are established in New York City, setting the stage for modern public health policies.

1861 - The Civil War escalates, leading to increased industrial production and economic growth in New York City.

1865 - The Civil War ends, leading to a significant transformation in the city's economy and society.

1866 - The New York Stock Exchange is founded, becoming one of the world's leading financial centers.

1867 - The first public library, the New York Public Library, opens its doors in New York City, providing access to books and information for all.
which are signed with the designers' names and some with pseudonyms. The annotations on the catalogue and these explanations of the successful and unsuccessful competitions, as follows: Richard Dolben, of Allegheny City, Pa.; Wm. Rogers, of Cleveland; Ohio; J. Lachaine, of Yonkers, N. Y.; John B. Deutsch and Charles Lyon, of Tarrytown; Phylis Miles, of England; R. Copeland, Charles Follen, and P. Schultz, of Boston; Lewis Masquerier, of Newton, L. I.; and J. Rink, Adam Gmigh, H. Noury, Augustus Fitch, Hepp & Vogel, Wm. (1) Parish, Grahm & Bagley, John Hughes, R. Graess, E. L. Viere, G. E. Waring, Hoffman & Wohls, and Warner, of N. Y. City. See illustration in this volume.

Plan No. 33 submitted by Olmsted and Vaux, and plan No. 30, submitted by Samuel I. Gustin, are now in the possession of the Park Department. The former is reproduced and described as Pl. 149-a, Vol. III.

May 28. The Times building (see My 12, 1857) on Park Row, at the head of Nassau St., is completed and first used by that newspaper. —N. Y. Times, Ap 30, My 1 and 3, 1858. See also ibid., My 26, 1858. It was erected on the site of the Brick Presbyterian Church grounds. See also L. M. R. K., III: 968; and descrip. of Pl. 152-b, III: 722. For detailed account, see Maverick, H. J. Raymond and the N. Y. Press, 154-59. The building was demolished in 1888 (q.v., My 13).

9. The Romanesque Church, at the n. cor. of Fourth Ave. and 22d St., is dedicated. "The church is built of white marble, in what has been called the Romanesque style. . . . The top of the spire is two hundred and ten feet from the ground." A picture of the church accompanies this description.—Harper's Weekly, II: 509-10; N. Y. Times, My 8, 1858.

10. Cooper Institute is opened for the first time for the celebration, in the "Hall of the Union," of the 144th anniversary of the Ladies' Home Missionary Society. The institute is not yet completed, and its use is only temporary.—N. Y. Times, My 6 and 11, 1858. See also Harper's Weekly, II: 725.

11. St. Luke's Hospital, at the north-west corner of Fifth Ave. and 54th St. (see My 6, 1854), is opened.—Tablet in St. Luke's Hospital, 113th St. and Amsterdam Ave. See also Richmond, N. Y. and Its Vicinity, III: 793, 1858.

12. The new building of the Nursery and Child's Hospital, on Lexington Ave. between 50th and 51st Sts., is opened.—N. Y. Times, My 25, 1858. The property had been leased to the hospital by the city on April 1, 1857, and the corner-stone laid on June 22, 1857.—Man. Com. Coun. (1872), 761; N. Y. Daily Times, Je 16 and 23, 1857. Regarding the organization of the society, see Losing, Hist. of N. Y. City, II: 673-74.

14. Andrew H. Green, president of the board of Central Park commissioners, presents to the corporation a report of the progress of work since Jan. 1, and takes occasion therein to defend the com commissioners against criticism. They are not unconcerned, he says, of the general desire that the Park should be rendered enjoyable by the public, as soon as practically possible, but the selection of rocks, trees, and the character of ground can scarcely be changed to be a garden, with full grown trees, in one year. . . . Some large trees will be transplanted, but the hundreds of thousands must make their own growth on the ground; considerations of the permanency of their growth, of their perfect development, as well as economy, demand this.

"An especial interest has been manifested in securing the roads for drives and rides at an early period; and while the Board sympathize with this interest, it is not to be forgotten, that for every ten who ride or drive, there are one hundred who walk; and, that one or two thousand men at work, some excavating, some removing earth, and others blasting rocks continually, it is neither a very desirable or desirable place for the pedestrian or equestrian. They are proceeding "with all the promptness consistent with the dictates of sound judgment, and the practice of true economy," —Proc., Bd. of Ald., LXX: 547-52.

25. The superintendent of police arouses the ire of the editor of the Herald by ordering that newboys shall not cry their papers on Sunday. Sarcastically, it is termed "one of the greatest reforms that has been effected in any city or country since the expulsion of the Jews from Egypt," is not the claim that has been made by the editors, for they are still in full blast; nor a finishing edict against the houses of ill-fame; nor any curtailment of the privileges of the Cyprians on Broadway; nor any general ventilation of the receivers of stolen goods; nor any decisive work among the suspicious grog shops; nor any grand haul of burglars, counterfeiters, emigrant swindlers, pickpockets, or incendiaries. All these professions still flourish like the green bay tree and may be regarded as embodying our privileged classes. What, then, can be this great and glorious reform? Nothing more nor less than the gagging of two or three dozen poor ragged newboys, who have been in the habit of profaning the blessed Sabbath by crying aloud for their bread in the public streets on that holy day, while blundering office-holders, swindling hypocrites and common thieves were on their way, with honest people, to church. These ragged newboys, with their Sabbath-day music, have been gagged—they are dumb—they may fail to raise the penalties which have heretofore supplied their destitute mothers and sisters with a meal or two; but the horrid profanations of these boys in singing out their Sunday papers on Sunday, is stopped. The next raid of the Metropolitan Board will probably be upon the apple women or the Chinese segar vendors on the Park. Well, if our city leaders cannot muster the courage to grapple with full grown vagabonds, let us at least be thankful that they are a match for the poor ragged outcast children in the streets."—N. Y. Herald, My 25, 1858. This same order im-pels the aldermen, who are always ready to take issue with the "Metropolitans," to introduce a resolution requesting the police commissioners "to direct the trustees of the different churches in the city, and the police, in singing their bells on Sunday."—Proc., Ed. of Ald., LXXII: 619.

The city authorities take possession of the Crystal Palace,—N. Y. Times, Je 2, 1858.

The Herald advocates a "Taxpayers' Party" in municipal politics. The argument is offered that, during the past decade, when taxes have increased from three to ten millions, out of all proportion to the increase of population, every taxpayer must sue for justice. See Lost in the "power" in the attempt to put an end to the "system of plunder," without avail. All parties "use the same low machinery, and work with the smallest and meanest ward politicians; men without means, character, credit, or lawful employment. They pay no taxes, and in no way contribute to the support of the government—only tax the depraved and dishonest. . . . We are credibly informed that of the two hundred and fifty employes of the Corporation at the City Hall, not fifty pay any taxes whatever. . . . The liberty-pole, which for 26 years has stood at the junction of Fifth St. and Forty-second, is taken down. It is "too advanced a state of decay to allow it to stand longer."—N. Y. Times, Je 5, 1858.

The liberty-pole was erected on the same site (see D 9).

The piers of the bridge connecting Ward's Island with Man-hattan (see F 20, 1857) still remain and a resolution is passed by the board of aldermen aiming at their removal.—Proc., Bd. of Ald., LXXI: 716. The removal was ordered on July 26.—Ibid., LXXI: 166-68.

28. The police captain of the 16th ward reports that "The small-box is raging fearfully on the west side of Tenth-avenue, between Twenty-fifth and Twenty-sixth streets."—N. Y. Times, Je 25, 1858.

The entire collection of works of art belonging to the New York Gallery of the Fine Arts, until 1854 at least in the rooms of the Natl. Acad. of Design, is transferred to the N. Y. Hist. Soc. as a perma-nent deposit.—Howe, Hist. of the Metropolitan Museum of Art (1913), 38, 67. See also 1844: O 5, 1846.

Palace Garden, a "place of open-air recreation" on 14th St. and Sixth Ave., is opened.—N. Y. Times, Jl 1, 1858. See also L. M. R. K., III: 965.

The body of ex-Pre. Monroe is exhumed from the Second Street Cemetery (see Jl 18, 1811), and taken to the Church of the Annu-ciation, in 14th St. From there it was carried to the city hall, where it lay in state all day. On July 5, it was put on board the "James-town," which carried it to Richmond. Engravings show the exhum-ing of the body, the scene in the city hall, the landing at Rich mond, and the burial in Hollywood Cemetery, Richmond, Virginia.
The display of fireworks on the roof of the city hall during the Atlantic Cable celebration (see Ag 17), destroys the cupola, the greater part of the dome, the roof, and almost the entire upper storey of the building, and does much damage to the governor's room. The bell-cupola is also injured, but the heavy frame work remains sufficiently strong to sustain the bell. The gravedigger and Cornwall, near Flushing, on Tuesday, 15th instant, at 2 o'clock, P.M.—Proc., Bd. of Ald., LXII: 22. This is an early attempt to arouse interest in the present "National Game." For the beginning of base ball in New York, see S 3, 1845; Je 19, 1846.

Napoleon III and Cavour hold their famous secret interview at Plombières, and whilst agree that France and Piedmont shall go to war in 1859, but only upon such pretext as shall appear justifiable. In case of success, Austria is to be expelled from Italy, France is to receive Savoy, and possibly Nice, and the northern Italian kingdoms are to be united with Piedmont.—Hazen n Europe since 1815, 222-24.

There are 1,500 laborers employed at the Central Park at present, of whom 100 are graving, 100 draining, 170 with 25 carts removing dirt, and the rest making roads. Since the work on the Park commenced, 287 houses and shanties have been removed from the grounds; thirteen acres of the skating-pond have been excavated; forty acres of land have been grubbed; sixty acres of the lower pond have been drained; sixty-third-street has been leveled; considerable blasting has been done, and a great deal of rock removed. The work has been built around Jonetboro. About five-sixths of the promenade is graded, and the drive for half a mile will be graded in a few weeks.—N. Y. Times, Jl 26, 1858. See also ibid, N 11, 1858. See, further, Ja 1, 1859.

The Atlantic cable is landed at Trinity Bay, Newfoundland, and the news of its completion causes the "greatest excitement in New York.—Harper's Weekly, II: 513, 518; N. Y. Times, Ag 6, 1858. Upon the view of the event, see Man. Com. Coun. (1860), 637. A history of the enterprise is given in Harper's Weekly, II: 517-14, 520-21, 529-30, 532-33, 548-49, with engravings of the instruments and ships used in accomplishing the feat and a biography of Cyrus W. Field. See also N. Y. Times, Ag 7, 1858. The event was celebrated in New York on Aug. 6 (p. v.), Aug. 17 (p. v.), and Sept. 1 (p. v.). The cable, however, broke almost immediately, and another was not successfully laid until 1866 (p. v., Jl 6).

An impromptu celebration of the success of the Atlantic telegraph is held in New York. The mayor orders 100 guns to be fired in the Park, two telegraph-offices in Wall St. and one in Madison Square are illuminated, and the merchants' exchange exhibits a transparency with the following inscription: 'The triumph of the Ocean cable is a union with the city arms, a honor to the energy and perseverance of Cyrus W. Field.' The telegraph is the all-absorbing topic of conversation everywhere.—N. Y. Times, Ag 7, 1858. See also ibid, Ag 9, 11, 12, and 16, 1858. See, further, Ag 9 and 16.

The board of aldermen resolves to request Cyrus W. Field to sit for his portrait, and to celebrate the success of the telegraph by illuminating the city hall.—N. Y. Times, Ag 16, 1858.

The cornerstone of St. Patrick's Cathedral, on Fifth Ave. between 50th and 51st Sts., is laid. James Renwick is the architect. The cathedral was dedicated May 25, 1859 (p. v.).—N. Y. Times, Ag 11, 1858; Farley, Hist. of St. Pat's Cath., 123, 130; Man. Com. Coun. (1868), 461-64; Loring, Hist. of N. Y. City, II: 677-78. For an abstract of the title to the cathedral site, see Catholic News, F 1858.

The first message is sent over the Atlantic telegraph from Queen Victoria to Pres. Buchanan. The president's answer was sent back on Aug. 19. This caused great enthusiasm in New York.—N. Y. Times, Ag 17, 18, and 20, 1858. On Aug. 17, Mayor Tiemann sent a message of congratulations to the Lord Mayor of London.—See ibid. The laying of the Atlantic cable (see Ag 5) is celebrated by the ringing of bells, the firing of cannon, the illumination of the city hall, and the letting off of magnificent fireworks (see Ag 18). An engraving shows the scene at the city hall.—Harper's Weekly, II: 548, 549, 550; N. Y. Times, Ag 18-19, 1858; McClennan's Rep. of Proc., &c. commemorating the laying of the Atlantic Cable. See also view, in Man. Com. Coun. (1861), 154, 140. A more elaborate celebration was held on Sept. 1 (p. v.).

In the early morning of this day, a fire, probably resulting from the display of fireworks on the roof of the city hall during the Atlantic Cable celebration (see Ag 17), destroys the cupola, the greater part of the dome, the roof, and almost the entire upper storey of the building, and does much damage to the governor's room. The bell-cupola is also injured, but the heavy frame work remains sufficiently strong to sustain the bell. The gravedigger and Cornwall, near Flushing, on Tuesday, 15th instant, at 2 o'clock, P.M.—Proc., Bd. of Ald., LXII: 22. This is an early attempt to arouse interest in the present "National Game." For the beginning of base ball in New York, see S 3, 1845; Je 19, 1846.

The special committee appointed on Aug. 18 (p. v.) to investigate the burning of the city hall makes a report recommending "that the dome and cupola be rebuilt, and also that the present half storey of the central building, be raised a full story, in order to provide office room for one or more of the departments of the city government." Plans accompanied the report, drawn to meet the above proposals, but these plans cannot now be found.—Proc., Bd. of Ald., LXII: 301. See S 25.

Cyrus W. Field and the crew of the "Niagara" are given an ovation at Cooper Institute.—N. Y. Times, Ag 26, 1858.

A monster celebration in honour of the laying of the Atlantic cable (see Ag 5) is held in New York. Cyrus W. Field and the British officers who aided the accomplishment were ceremoniously received at Castle Garden in the morning, and special services were held in Trinity Church. Later an elaborate procession of about 15,000 people paraded through City Hall Park and up Broadway to the Crystal Palace, the whole line of march being decorated with inscriptions, flags, etc. Field received an ovation at the palace where he was presented, by Mayor Tiemann, with a gold engraved presentation sword, a torch-light procession, and there were elaborate fireworks.—N. Y. Herald, S 2, 1858; McClennan's Rep. of Proc. &c. commemorating the laying of the Atlantic Cable; Atlantic Telegraph celebration. Order of exercises at the Crystal Palace on the occasion of the celebration of the successful laying of the Atlantic telegraph, Sept. 1, 1858 (N. Y., 1858). See also views in Harper's Weekly, II: 577, 584-86, and Man. Com. Coun. (1861), 140, 144, 148, 179, 180. A stereographic photograph of the procession on Broadway was made by E. Anthony. It is one of the earliest extant photographs of New York. For a brief account of Cyrus W. Field, see Stephen Fiske's Off-Hand Portraits of Prominent New Yorkers (1884), 140 et seq.

The common council gives a dinner at the Metropolitan Hotel to Cyrus W. Field, the officers of H. M. S. "Gorgon," and the officers of the U. S. frigate "Niagara."—N. Y. Times, S 3, 1858.

The quarantine buildings at Tompkinsville, Staten Island, are destroyed by fire by a mob.—N. Y. Herald, S 3, 1858; N. Y. Times, S 2 et seq., 1858. They had been burned twice before.—Ibid, My 7, 1857, and Ap 27, 1858. Because of the burning, the island was put under martial law, and the 8th regiment was stationed there.—Harper's Weekly, II: 578, 595, 610, and views in ibid, S 581, 612.

The mayor and common council direct the street commissioner "to procure the necessary plans and specifications which may be required to carry out the contemplated alterations and repairs to the City Hall" (see Ap 24), and appropriate $405,000 for the work.—Proc., App'd by Mayor, XXVI: 239. See D 31.

The church at 35th St. and Fifth Ave., formerly a Baptist edifice (see Ag 6), is opened as Christ P. E. Church.—N. Y. Times, S 27, 1858-1860.
The Crystal Palace, which was opened in 1853 (8th, p. 14), is designed by fire, the loss being over $1,000,000. All the statuary and paintings in the palace, including the famous Thorwalden group, as well as other articles placed on exhibition by 3,960 exhibitors, are consumed.—*N. Y. Herald*, O, 6, 1858; *N. Y. Times*, O 6-9, 1858; *Leslie’s Weekly*, V: 205-243; descrip. of Pl. 141-183, III, 709. See also views in *Herald’s Weekly*, II: 660-661, and Peace River Catalogue, item 246.

The new brick Church at the north-west corner of 37th St. and Fifth Ave., erected by the congregation of the “Old Brick Church” (see S 15, 1865), is dedicated.—*Harpers’s Weekly*, II: 706; 23d Ann. Rep., Am. Sc. & Hist. Rep. Soc. (1818), 600. “The new church is a massive building. The ground measurement is 75 by 145 feet; main auditory, 50 feet in height. With the galleries, from 1700 to 2000 people can be accommodated. The spire is 250 feet high, the cap-stone weighing 2500 pounds. . . . The old bell is in the new spire. . . . The church is lighted by one large chandelier of 100 burners. . . . The spire is to receive a fine clock.” An engraving of the church accompanies this description.—*Harper’s Weekly*, II: 721. This is the present edifice and was erected on the site of the Waddell villa.—L. M. R. II, III: 930. See also descrip. of 73, 53, 1855.

Nov.

The new steam fire-engine, the “J. C. Cary,” built at the Novelty Iron Works, by Lee & Larned, under a contract with the city, is tested before Street Commissioner Cooper and other officials. It runs “from the Novelty Works to the Bowing Green—the place of exhibition—through Avenue C, Fourteenth Street, and Broadway, threading its way without difficulty through the crowded streets of New York, to the main supply from Canol to Duane Street.” At “the large hydrant near the Bowing Green,” the members of Empire Engine Company No. 42 attach the supply hose, and in a few minutes the steam fire-engine begins to work, and for an hour and a half, continues “to throw water in a volume and with a force never before witnessed in this city.” After this and other tests, the engine, with 14 or 15 men on board, is run through Beaver, Broad, Nassau, and Fulton streets, to Broadway and thence through Barclay, Greenwich, and Murray streets, to the house of the Empire Engine Company.” From there it returns “in triumph to the Novelty Works, having won the unqualified approbation of the city officials, and the admiration of the thousands who had witnessed its performance.”—*Harper’s Weekly*, II: 714-715; 538, 1858, the engine is in use.

Due to a weakness in the structure, the walls of the almost finished state arsenal at 35th St. and Seventh Ave. give way, and the heavy roof falls in. With the exception of the main front wall, the building becomes a “complete wreck.” The loss is between $20,000 and $30,000.—*N. Y. Times*, O 6, N 20, and 27, 1858. See also *ibid.*, F 2, 1859. On April 13, 1859, the legislature appropriated $50,000 for the building.—*Lucy’s Daily* (1859), chap. 118.

A large portrait of Simon Bolivar, the South American liberator, is presented to the city by the republic of Venezuela.—*Hist. Mag.* (1859), i, 1, 19.

A meeting of young women is held in the chapel of N. Y. University, which organizes a “Ladies’ Christian Association.” Mrs. Marshall O. Roberts headed its first board of directors. This was the beginning of the Young Women’s Christian Association in the United States. For the beginnings of the “Association” idea, and the history of the organization in Europe and America, see *Fifty Years Association Work among Young Women*, by Elizabeth Wilson (N. Y., 1916).

Dec.

The Herald publishes a tabulation by occupations of the candidates for municipal office in the forthcoming city election. The liquor dealers lead with 27 candidates, outnumbering the lawyers by three.—*N. Y. Herald*, D 5, 1858. In a subsequent editorial reference is made to this tabulation as “fruitful of promise for an incapable and demoralized government.” It is observed that a very large number of the candidates cannot be located in the directory and therefore “have no apparent local habitation and no business,” and attention is called to the large number of proprietors of corner groceries and saloons. “It is not likely that nearly the whole lot are hungry politicians, more greedy, if possible, for the flesh pots of the city treasury than their predecessors.”—*Ibid.*, D 6, 1858.

The annual municipal election takes place. The Herald says:

1. The Comptrollership. The Republicans have gained that [in the election of Robert T. Haw].

2. The fight between the Sachems of Old Tammany and the Wood party in the common council. The Sachems have saved their bacon by the skill of their teeth, but the glory of Old Tammany departed in the struggle.

3. The contest in the election of school officers for the Bible in the public schools. The result is largely in favor of the Bible.”—*N. Y. Herald*, D 8, 1858.

A new liberty-pole, 120 feet high, is erected at the corner of West Broadway and Franklin St. on the site where the former one stood (see J 4).—*N. Y. Times*, D 10, 1858.

The name of Hamersley St. is changed to Houston St., from the termination of Houston St. to Hudson River.—*Proc., App’d by Mayor*, XXVI: 33.

Sen. Stephen A. Douglas and Mrs. Douglas arrived at New York from Havana last evening and were welcomed by a delegation from the common council and escorted to the Everett House. On Dec. 31, Douglas was formally received at the city hall and presented with the freedom of the city. He left for Philadelphia on Jan. 3, 1859.—*N. Y. Times*, D 29, 1858, to J 4, 1859.

The committee appointed to investigate the causes of the city hall fire (see Ag 18) makes a detailed report showing that it originated from the remains of the fire works on the roof of the building during the Atlantic cable celebration (see Ag 17).—*Desc., Bd. of Ald.* (1859), No. 22.

James I. Orr, speaker of the house of representatives, is presented with the freedom of the city.—*N. Y. Times*, D 31, 1858.

The boards of aldermen and councilmen resolve to extend the hospitalities of the city to Sen. Samuel Houston of Texas, who is now in New York.—*N. Y. Times*, Ja 1, 1859.

The repairs on the city hall since the fire (see Ag 18) have cost $61,176.38. They “were partly done under the advice of the Mayor, as immediately necessary, to prevent further dilapidation, and partly under a resolution passed by the Board of Aldermen. No expense was incurred not necessary to save the interior of the building from damage by exposure to the weather, and to put the public offices and chambers again into a state fit for the transaction of public business.”—*Desc., Bd. of Ald.* (1859), No. 6, pp. 4 and 10. See Ja 3, 1859.

The common council grants a franchise to the Ninth Ave. R. R. for the route from the corner of 41st St. and Ninth Ave. along the avenue to Greenwich St., through Greenwich and Canal Sts., to the path of Broadway, College Place, and Vanderbilt St., returning by the same route with a single track through Church and Washington Sts.—*Man. Com. Coun.* (1860), 412-13. See O 3, 1859.
"The Play-ground and the Parade-ground are nearly complete.

The buildings of all descriptions that were found on the Park have, with here and there an exception, reserved for use on the Park, been sold and removed and the proceeds of sales deposited in the Treasury. Among the buildings spared, though a very inferior structure, is the Arsenal constructed by the State and purchased by the city.

The establishment of a Pound has been to a large extent effectual in preventing the incursions of straying animals, from which the young trees have suffered injury." A map showing the original topography of the park and the roads and walk under construction, signed by Frederick Law Olmsted and Calvert Vaux, accompanies the report.—N. Y. Times, 4th Aug. 1859.

A coloured view of New York from Weehawken, lithographed by W. Gauci, is published in London by E. Gambart & Co.—Pyne sales catalogue, item 105.

The new First Central Park is "quite a fashionable resort for skaters," and many hundreds are enjoying the exercise daily.—N. Y. Times, 18th Aug. 1859.

Mayor Tiemann, in his annual message to the common council, says: "As is well known, a part of the City Hall was destroyed, and damaged by fire in the month of September last [error for Aug]; the Street Commissioner was directed by the Common Council to cause plans to be prepared for the repair or reconstruction of the part destroyed, which have not been carried into effect, from the fact that no appropriation was applicable to the work.

I am of opinion that the building should be restored to its former condition without the addition of a full story for public offices, as little available room would be gained thereby, although a large additional expense would be required."—Doc., Ed. of Jd. (1859), No. 1, p. 49.

The new Athenaeum Club, having been fully organized, opens its club rooms at No. 48 Clinton Place for the first time.—N. Y. Times, 13th Aug. 1859. See Mr 24.

The centennial anniversary of the birth of Robert Burns is celebrated at Cooper Institute, Rev. Henry Ward Beecher delivers the address. On Jan. 23, a commemorative banquet was held at the Astor House, where Wm. Cullen Bryant, James T. Brady, Dr. Francis, Horace Greeley, and others spoke. A celebration was also held at Mozart Hall.—N. Y. Times, 25th Jan. and 26th Jan. 1859.

The new house of reception of the New York Juvenile Asylum, at 71 W. 11th St., is opened.—N. Y. Times, 24th Jan. 1859. See also L. M. R. E., III, 95.

A plan of fortifications to defend the water approaches to the city is proposed by J. G. Barnard, major of engineers, in a report to the secretary of war. The fortifications at the Narrows are Forts Hamilton and Lafayete on Long Island; and the old Fort Tompkins and Richmond, and Batteries Hudson and Morton on Staten Island. Between 1840 and 1859, new Forts on Long Island, three or four times the size of the old work, have been built, and a new work in place of Fort Tompkins has been commenced. A new casemated water-battery, also, nearly equal to Fort Richmond, and south of it, has been planned; and it is proposed to extend the earthen batteries. Maj. Barnard also proposes to enlarge the works on Long Island by extending batteries (either open or casemated) along the bluff below Fort Hamilton, and to remodel Fort Lafayette. He proposes to build a fortification on Robbins' Reef, which is mid-way between the Narrows and Governor's Island, to command the approach through the Narrows and the outlets of the "Kills." A work on the point of Coney Island is proposed to sweep the waters of Gravesend Bay. A fortification on Sandy Hook, authorised by Congress, is being commenced. The East River
1859 approach to the city is defended by Fort Schuyler. Another work, opposite to it, on Willow's Point, is deemed necessary.—Barnard, 1859.

THE MANHATTAN BRANCH

This school is a branch of the New York Collegiate Institute. It was opened in 1859, and is conducted by Mr. T. L. Mead.

FEB.

The Rutgers Medical College on Duane Street is destroyed by fire. This was a school established by Doctors Hosack, Mott, Francis, and McNeven. It is a branch of Rutgers College of New Brunswick, N. J.—Griscom, Memoir of John Griscom, 239. See also M. R. K., III: 54.

25 Wm. Smith O'Brien, Irish patriot, arrives at New York on a visit to the United States. Salutes are fired in his honour, addresses of welcome are delivered by Judge B. O'Connor and Thos. F. Meagher, and cheers are shouted by multitudes on the Battery.—N. Y. Times, F 26, 1859. On May 28, he sailed from New York for Ireland.—Ibid., My 30 and 31, 1859.

MAY

And stores to be added to the merchants' exchange in Wall St.—N. Y. Times, Mr 9, 1859.

18 The legislature passes a law prohibiting the admission into theatres in New York City of any minor under 14 years of age who is not accompanied by an adult person.—Laws of N. Y. (1859), chap. 48.

The Athenæum Club [see Ja 12] have removed from their house in Clinton-place, to the large and elegant house No. 108 Fifth-avenue, corner of sixteenth-street.—N. Y. Times, Mr 24, 1859. The club "is an association of men of letters, artists, and members of the liberal professions, numbering some 400 to 500, who meet for the purpose of social intercourse, &c. The establishment is elegantly furnished. —Miller's N. Y. Al 111: 1859, 74.

28 The N. Y. Historical Society having in its possession "the only pure and complete copy to exist of the Journal of the Assembly, at the first Meeting of its Fourth Session, which commenced at Poughkeepsie, in Dutchess County, on September 7th, 1780, and closed on October 10th in that year," it presents to the state "an elegant Manuscript Copy of the Journal," which the society has prepared. On April 8, the assembly passed a resolution of thanks for the gift, and directed that the MS. copy be deposited in the state library and that the Regents have 500 printed copies made.—Assemb. Jour. (1780), Preface.

APR.

4 "Tannhäuser" is sung for the first time in America, at the Stadt Theatre (formerly the Bowery Amphitheatre).—Brown, I: 238; N. Y. P. L. Bulletin (1915), 900.

14 The board of commissioners of taxes and assessments for the city and county of New York is created by act of the legislature.—Laws of N. Y., chap. 302.

15 The legislature authorizes the commissioners of Central Park to widen Seventh Ave. from 110th St. to the Harlem River by adding 25 ft. to each side so that the whole width shall be 150 ft. —Laws of N. Y. (1859), chap. 363.

20 "An Act for ascertaining by proper proofs the citizens who shall be entitled to the right of suffrage, and to prevent fraudulent voting," is passed by the legislature. It provides for a "board of registry," consisting of three inspectors for each election district appointed by the board of supervisors of the city and county of New York. Such board is to meet three weeks prior to the general election for two days, if necessary, "for the purposes of registering the names of the legal voters of such districts." They shall meet again "on the Tuesday of the week preceding the day of the general election . . . for the purpose of revising, correcting and completing said lists."—Laws of N. Y. (1859), chap. 380. For newspaper comment on the result of the first registration, see N 2.

16 The legislature authorizes the N. Y. & Harlem R. R. Co. to lay a double track from their track on Fourth Ave. at 42d St. up said street to Madison Ave. and up Madison Ave. to 79th St. and the tracks between their piers and freight cars from the northern extremity of Manhattan to the southern side of 42d St.—Laws of N. Y. (1859), chap. 387. The company was also permitted to establish a steel terminal at 42d St. and Fourth Ave.—From chronology supplied by the company.

The Broadway Theatre is being demolished.—N. Y. Times, Ap 16, 1859. See also L. M. R. K., III: 928. By Nov. 2, the site was occupied by a store.—N. Y. Daily Tribune, N 2, 1859.

The Equitable Life Assurance Society of the U. S. is organized. After incorporation, it began business in "a small back room on the second floor of a four-story building over against Trinity Churchyard," at 98 Broadway, on July 28. On Dec. 1, the office was transferred to the new building, just completed, at 93 Broadway, where four rooms were occupied. In a few years, additional space was provided at 94 and 96 Broadway.—From The Equitable Society's First Half Century (1909). For history of the company's own building, see My 1, 1870.

Austria sends an ultimatum demanding that Sardinia put her army on a peace footing and disperse all volunteers. Cavour immediately rejected it, and war followed.—Andrews, Hist. Development of Modern Europe, II: 124-25. See also My 3.

The new Broadway Tabernacle at the corner of Sixth Ave. and 34th St. (see D 25, 1857) is dedicated.—N. Y. Times, Ap 11 and 27, 1859. L. M. R. K., III: 928.

France declares war on Austria because she has invaded France's ally, Sardinia.—Andrews, Constitution and other Select Decs. Illus. of Hist. of France (1793-1907), 589-71.

The French and Italian allies defeat the Austrians at Monte- bello.—N. Y. Times, Jl 30, 1859.

The Ramble in Central Park is opened to the public.—3d Ann. Rep., Com's of Cent. Pk. (1860), 10. See also N 12.

The Austrians are dism astigately defeated at Magenta by the allied French and Sardinian armies under Napoleon III.—N. Y. Times, Je 20-23, 1859.

The corner-stone of the R. C. Church of St. Paul the Apostle is laid on 59th St. near Ninth Ave.—N. Y. Times, Je 20, 1859. The church was dedicated on Nov. 27. It is in charge of the Paulist Fathers.—Ibid., N 28, 1859. See also King's Handbook, 397-98, and L. M. R. K., III: 936. A new church was erected on the site in 1876—N. Y. Times, Je 5, 1876.

An operatic benefit is held at the Academy of Music "in aid of the wives and children of the heroic soldiers who are fighting so gallantly and gloriously for the independence of a great people on the plains of Lombardy." A sum exceeding $1,000 is raised.—N. Y. Times, Je 22 and 23, 1859.

The Battle of Solferino is fought, and Napoleon III again defeats the Austrians, the latter losing about 35,000 men.—N. Y. Times, Jl 7-20, 1859.

28 The mayor approves a resolution of the common council directing the street commissioner (G. W. Smith) "to have specifications drawn, and advertise immediately for proposals to have the City Hall building put in proper repair, and as it was previous to the fire."—Proc. App'd by Mayor, XXVII: 212. Smith made a report on Aug. 19 which was approved.—Ibid., XXVII: 335. The contract was signed on Sept. 23 (q. c.).

21 The Peace of Villarsia is signed by Napoleon III and Francis July. It provides for an Italian confederacy under the honorary presidency of the pope, the cession of Lombardy to Sardinia, and Austria's retention of Venice.—N. Y. Times, Jl 25 et seq., 1859.

The corner-stone of a new synagogue for the Congregation Shearith Israel is laid in 10th St. near Fifth Ave.—"The Congregation Shearith Israel," in Publs., Am. Jewish Hist. Soc., VII: 125, 136, 140. The new synagogue was consecrated on Sept. 12, 1860 (q. c.).

The Richmond Grays arrive on a visit to the city and are Aug. enthusiastically welcomed by the National Guard and a committee of the common council. During their stay, they attended services at St. John's Church, visited the public institutions, were reviewed by Mayor Tiemann, and were given a dinner at the Metropolitan Hotel by the city. They left on Aug. 18, and "their departure, like their entrance to our City, and their sojourn here, was an ovation which has seldom if ever been accorded to any strangers, civil or military, who ever before visited the City of New-York."—N. Y. Times, Aug 15-19, 1859.

One of the Grays, on his return home, sent an account of the visit to the Richmond Whig, saying in part: "The street cars, in New-York, run day and night, and as at all other times. Availing himself of these means of conveyance, we rode to the upper part of the City, and took a survey of the place, much talked about, called 'The Central Park'. . . In returning from the Park . . . we walked through Madison-avenue and other fashionable streets, where splendid mansions meet the eye at every step. Look to the
The Fifth Avenue Hotel, on the site of Franconi's Hippodrome (see Mr 14 and S, 9, 1856), is opened to the public. William Walburn of Boston was the architect.—N. Y. Herald, Aug 25, 1859; Maurice, Fifth Ave., 325-37. It contains a passenger elevator, invented by Otis Tufts of Boston.—N. Y. Times, Aug 25, 1859; Scientific Am. (1859), I: 1235 The Galaxy (Nov. 1882), 890, 891; Harper's New Monthly Mag., Nov., 1882. For description of the hotel, see also Graphic Monthly, XI: 317, and Leslie's Weekly, IX: 219. It is shown in pl. 22-b, Vol. III. The elevator was not the first passenger elevator in New York, as one run by steam was in use in the Latting Observatory in 1853 (q.v., Je 30). The Fifth Avenue Hotel was demolished in 1905 (q.v., Ap 4). Regarding it, see also records of the Title Guarantee & Trust Co; L. M. R. K., III: 978: descrip. of pl. 141-b, III: 710.

The Spiegler Institute has purchased the Samuel P. Toward residence in the 300 block of Fifth Ave. and 34th St. for $200,000. The mansion is to be altered for the use of the school.—N. Y. Times, Aug 25, 1859. See also Wealthy Citizens of the City of N. Y. (1855), and Miller's N. Y. Almanac: II I: (1862), 74. The property was later purchased by A. T. Stewart.—L. M. R. K., III: 952.

Col. E. L. Drake, by driving an arsinal well near Titusville, Pa., struck oil. Although petroleum was known, even in ancient times, Drake's work is the first corner of Fifth Ave. and 34th St.

The progress of this Metropolis is especially marked in its domestic architecture. Each year witnesses fresh improvements and more lavish expenditures. . . . The store of Messrs. Lord & Taylor, at the corner of Grand-street and Broadway, to be opened this morning, is one of the finest, if not the very finest, in this grandest of thoroughfares. It is five stories high, built of white marble, and looks more like an Italian palace than a place for the sale of broadcloth. Its extravagant ornamentation would be regarded as a fault by persons of more moderate taste than New Yorkers. The basement and the first and second stories of this establishment form three immense salerooms—each of which is about 60 by 100 feet, and is subdivided by Corinthian columns into three compartments. The stairs communicating with these stories are of palatial width and of massive oak. The upper floors, not yet finished, will be used for manufacturing purposes. A most notable ornament in the building is the huge gas chandelier that lights up the staircase. It was made by Tiffany at a cost of $500, and is original and unique of its kind. The lower wing is not yet completed; but without it the building is one of the most spacious stores in the City, and has every accommodation for the transaction of a colossal business.—N. Y. Times, Ag 25, 1859. See also 1856. A rare view of Lord & Taylor's establishment at 461-469 Broadway, cor. of Grand St., was sold with the Pyne collection, at the Am. Art Assoc. galleries, Feb. 5-7, 1917 (item No. 319), a reproduction appearing in the catalogue. See also N. Y. Times, S 5, 1859.

The Winter Garden Theatre, erected on Broadway opposite Bond St. to replace the old Metropolitan Theatre (see S 18, 1853), is opened with "Cricket on the Hearth."—N. Y. Times, S 15, 1859; L. M. R. K., III: 986. It was destroyed by fire on March 23, 1867 (q.v.).

Leopold Eidlitz is paid $824 for "plans, specifications, &c., for repairs to City Hall."—Decs. Bd. of ald. (1859) No. 32. See S 23.

"Dixie," just composed by Daniel D. Emmett, is sung for the first time from the stage of Bryant's Minstrels at 472 Broadway.—Kildare's Famous Am. Songs, 57-8.

A contract is awarded to Edward Gridley, builder, for restoring the city hall to its condition prior to the fire of 1859 (q.v., Ag 18). Gridley agrees to "furnish all materials necessary to complete, and cause to be performed all the work required for Repairing the City Hall, agreeably with the drawings made and prepared by Leopold Eidlitz, Architect" (see S 15), in accordance with certain specifications. The drawings included from elevation, a ground plan of the attic story, a plan of the roof and framing, a section, and a plan of the framing of the cupola, but these are not on file.—From contract in auditor's office of the commissioner of public works, Borough of Manhattan. The repairs were begun on Sept. 30.—N. Y. Times, O 1, 1859. See O 15.

The common council grants the Ninth Ave. R. R. Co. permission to lay a track from the Ninth Ave. R. R. track at Greenwich St; through Canal St. to connect with the Eighth Ave. R. R. track at Hudson St; also to lay a track from Ninth Ave. through 54th St. to connect with Eighth Ave. R. R.; and permits the Eighth and Ninth Ave. R. R. Co. to run their cars over each other's tracks during such times as they may be respectively relaying and replacing their tracks.—App'd by Mayor, XXVII: 470. See D 31.

The work of repairing the City Hall [see S 23] is going on vigorously. All the charred timbers and crumbled walls have been removed, new ones put in their places, and the roof put on. It is expected that by Monday the roof will be in readiness for coppering.—N. Y. Daily Tribune, O 15, 1859. See also ibid., O 27, 1859, and N. Y. Herald, O 25, 1859.

Harper's Ferry is captured by 18 men under John Brown, the object being to hold the place as a refuge for fugitive slaves. Brown was tried for treason and executed on Dec. 2 (q.v.).—Rhodes, Hist. of U. S., II: 383-416. See also N. Y. Times, O 18 et seq., 1859.

It is stated that a movement is on foot to purchase St. John's Park for building purposes with the remaining $64,000 having been offered for it.—N. Y. Tribune, O 26, 1859.

Prof. T. S. C. Lowe commences the inflation of his great balloon, "The City of New York" (see S 10). The balloon is on exhibition in Reservoir Square. Lowe's transatlantic flight was postponed from time to time during November, and finally it was put off until the Spring, and the balloon was removed from the Crystal Palace grounds and stored "near the gas-house at the foot of Fourteenth-street, North River."—N. Y. Times, N 1, 2, 4, 12, 15, 16, 19, and 26, 1859. See also Lowe's pamphlet entitled Air-Ship City of New York: Full Description of the Air-Ship and the Apparatus to be employed, in the Aerial Voyage to Europe; with a Historical Sketch of the Art of Ballooning and the Aeronaut's Address to the Public (N. Y., 1859). In appearance, as shown by wood-cut illustrations in the pamphlet, the balloon had a closed car in place of the usual basket, below which was suspended a large open boat. See, further, Je 8, 1860.

The first registration of voters in the city under the new "Regis-try Law" (see Ap 15) is completed. "Considering that the process was entirely new, both to the registrars and the registered, and that the law is more elaborate than transparent, the work has been done well. The appointees of the Board of Supervisors were well able to account to all accounts, been entirely impartial, and afforded every facility to applicants of all parties."—N. Y. Herald, N 3, 1859.

The 100th anniversary of the birth of Friedrich Schiller is commemorated in New York by a three days' celebration (beginning on this day), consisting of plays, vocal and instrumental music, tableaux, etc.—N. Y. Times, N 10-12, 1859.
Dec. 6

1859

The new four-mile drive-way in Central Park is opened to the public. The road may be entered at 72d St. and 59th St. from either Fifth or Eighth Ave., and it "runs through the Park by a route which displays in succession the expansive Mall, the unique Skating Pond, the delightful Ramble, the massive bridges, the deep cut near the old Reservoir, the capacious bed of the unfinished Manhattan Lake, and all the points of interest in the lower portion of the Park."—N. T. Times, N. 14, 1859. See, further, Mr. 13.

Mr. Franklin S. Kinney of No. 17 Nassau street is building a white marble hotel on the corner of Broadway and Twentieth-fourth street, facing Madison square. It is six stories in height, and has a frontage of 225 feet on Broadway and Twenty-fourth street, covering four city lots. It is to be conducted on the plan of the best European hotels. There are to be two dining-rooms and about 50 suites of rooms—the parlors of which will all face on one of the streets. Pleasant accommodations will thus be afforded for ladies and families to the number of 250 persons. It is built in the modern French style, with numerous balconies, and a steep slatted roof! The entrance to the hotel is on Twenty-fourth street, with a private door on Broadway. The building will cost about $100,000, and be finished about the 1st of April. Rooms &c. and the property are the architectural work of—N. T. Daily Tribune, N. 18, 1859. The new hotel was doubtless the Alhambra, which is shown on Perris's insurance map of this year.

Adelina Patti, at the age of 16, makes her debut in opera at the Academy of Music in "Lucia."—Ireland, Rec. of the N. Y. Stage, II: 705. Mortier, Biog. Sketch of Madame Adelina Patti, 10. Patti first appeared in New York in 1852 (q.v., My 11). On December 13th, at the age of 55, died at Sunnyvale, near the Hudson, the entire space between Tubbby Hook and Harlem River will be thickly populated and devoted to business purposes, of course with the exception of that portion around Washington Heights, which is not available for streets, and which nature specially designed for a ras in urbe. Up to that point the ground lying between the two rivers is comparatively level, admits of an easy grade and can be used for streets and avenues. It is already contemplated to construct a village which will occupy all that space; and with that view we perceive that some five hundred lots are to be sold at auction to-day at the Merchants' Exchange.

The natural tendency of our population towards the neighborhood of the Central Park, and the vast increase with which the increase of business is compelling the trade and commerce of the metropolis to extend themselves in that direction are manifest to every one. The picturesque beauty of the park, as well as the natural charms of the locality itself, affords an attraction without parallel to erect residences all around in that vicinity, while the pressure of a rapidly increasing trade must compel us to convert that portion of the island lying above it, as far north as Washington Heights, to business and manufactures.

The street commissioner is authorized to procure, by contract or otherwise, a clock for the cupola of the City Hall, which in his opinion shall, in every respect be credits to the city of New York—and to make arrangements for placing it "in the upper story of the City Hall." It is not to cost more than $4,000.—Proc., App'd by Mayor, XXVII: 757-771. See also, App'd by Mayor, XXVIII: 113. Dec. 22, 1859.

The street commissioner is authorized to procure, by contract or otherwise, a clock for the cupola of the City Hall, which in his opinion shall, in every respect be credits to the city of New York—and to make arrangements for placing it "in the upper story of the City Hall." It is not to cost more than $4,000.—Proc., App'd by Mayor, XXVII: 757-771. See also, App'd by Mayor, XXVIII: 113. Dec. 22, 1859.

A tabulated statement of the city's debt is prepared. It was published in the Man. Com. Coun. (1860), 226.

1860

In this year, Gaston Plaizé constructed the first practical storage battery. It was afterwards developed and modified by Faver, Metager, Brush, Edison, and others.—International Encl., XXI: 561.

In this year, the first dime novel was published by Erastus F. Beadle. The firm of Beadle & Adams continued the business until 1897.—Sullivan, Our Times (1926), 271.

In this year, the first direct current electric motor was built by...
1860, in an Italian physician, Antonio Pacinotti. — *Scientific American,* Je 5,
1813—1814.

— In this year, 105,123 alien immigrants landed at the port of New York. Of these, Ireland sent 47,330; Germany, 37,899; England, 11,916; Scotland, 1,617; France, 1,549, and other countries lesser numbers. — *Rep. on Emigration by Ch. of Com.,* Ja 5, 1865, 18. See also *Leslow's* *Weekly,* XIII: 162.

The manufacturing census of this year credited New York City with 50 per cent of the product and 20 per cent of the establishments in the state. Clark, *Hist. of Manufactures in U. S.,* 1807—1860, 465.

— In this year was published *Names of Persons for whom Marriage Licenses were issued by the Secretary of the Province of N. T., previous to 1784.* Printed by order of Gideon J. Tucker, Secretary of State (Albany, 1860).

— From the Revolution to this time 771 newspapers and journals, of all classes and periods of issue, were established and disappeared in New York City. In 1860, 250 newspapers and periodicals were published. — North, 99 (note), citing N. Y. *Gazette* for 1860.

— In this year, the *National Quarterly Review* was founded. — North, 118.

— In this year, Eastman Johnson, one of the most effective American genre painters, settled in New York after many years of study abroad. He specialized in subjects of rural life and was particularly successful in delineating the American negro. — *Isham, Hist. of Am. Painting,* 541-43; *Tuckerman, Book of the Artists,* 466-71.

— In this year was published *New York Illustrated,* a well-illustrated quarter, descriptive of this city. Nearly every year at this period some distinctive guide-book was published, of convenient size for the pocket. — See Gen. Cat. of N. Y. P. L. under "N. Y. City—Guide Books."

— In this year, the direction of operation at Bellevue Hospital was shifted from a board of ten governors (who, in 1849, superseded the common council) to four commissioners of public charities and correction. — *An Account of Bellevue Hospital* (1853), 367, on the building.

— In this year, the first Jewish orphan asylum in the city was opened in West 29th St. by consolidated societies, afterwards named the Hebrew Benevolent and Orphan Asylum Society. — *Jewish Encyclopedia,* IX: 275-76. A building was soon after erected on 77th St. (see O 29, 1860) and dedicated on Nov. 5, 1863 (q.v.).

— In this year, the Church of the Holy Evangelists (which purchased old St. George’s Chapel in 1831, q.v., Jr 21) went out of existence, and the old chapel in Beckman St. became the Free Church of St. George’s Chapel, under a board of trustees appointed by Trinity. — Anstis, *Hist. of St. George’s Church,* 211-12; descrip. of Pl. 157-1, III: 774. In 1866 (q.v., Mr 17), the old church was sold and demolished.

— Between 1860 and 1861, the Friends ("Hickites") built a meeting-house at 15th St. and Rutherford Place, and moved there from Hester St.; they also built a seminary, which still (1926) stands, at 16th St. and Rutherford Place, the two buildings occupying the block frontage facing Stuyvesant Park. — *Tearly Meeting Proc.* (1862), Soc. of Friends ("Hickite"); L. M. R. K., III: 928.

— From 1860 to 1875 (q.v., My 17), the N. Y. Academy of Medicine (see 1850) met at the College of Physicians and Surgeons (now the medical dept. of Columbia Univ.) at the north-east corner of Fourth Ave. and 23rd St.— *N. Y. Med. Jour.,* Jr 22, 1911.

— In this year, Chambers St. was extended to James Slip as New Chambers St. — *Proc., App’d by Mayor,* XVIII: 175, 194, 198; L. M. R. K., III: 955-96. See Ag 25.

This *Manual* also contains the following maps and views: map of the city and county of N. Y., 1860; Central Park, 100; buildings on Ward’s Island, 104; the House of Refuge on "Randals* Island, 106; house on East River at 61st St. (built in 1799 by Dr. Smith), 285; the shot-tower on East River, 312; the Eldridge St. jail, 324; St. Thomas’s Church, Broadway, 248; St. Luke’s Church, Hudson St., 365; Kane statue, 376; railroad depot at Fourth Ave. and 27th St., 412; the Third Ave. railroad depot, 412; the residence of Henry Eckford, bet. Seventh and Eighth Aves., near 24th St., 420; map (2 parts) of New York, Brooklyn, Jersey City, Hoboken, and Hudson (see also 1859), 428; Cherry St., looking west from Roosevelt St., 468; old houses, cor. Pearl and Elm Sts., 492; the "Cortlandt" mansion "at Yonkers" (actually the house that stands in the present Van Cortlandt Park), 608; and the old Ludlow mansion at No. 9 State St., 610. — *Man. Com. Coun.* (1860).

For view of Manhattanville from Fort Haight, 1860, see ibid. (1861), 248.

For view of Hell gate ferry, foot of 86th St., 1860, see ibid. (1861), 234.

For view of residence of the Past family, later Claremont Hotel, on Bloomingdale Road near Manhattanville, 1860, see ibid. (1861), 332.

For view of "Pewter Mug Tavern" and Tammany Hall, Franklin St., 1860, see ibid. (1861), 444.

For view of the Beckman house (headquarters of Sir Wm. Howe, Sept., 1776), on Beckman Hill, 50th St. near First Ave., in 1860, see ibid. (1861), 496; and for two interior views, see ibid. (1861), 498, 492.

For view of Dyckman’s bridge, on the Harlem river, with Kingsbridge and Spuyten Duyvil Creek in the distance in 1860, see ibid. (1861), 308.

— For view of the kissing bridge, on the old Boston Post-road, at Second Ave. and 50th St., in 1860, see ibid. (1861), 528.

For view of a group of old cottages on the old Boston Post-road, cor. Third Ave. and 46th St., 1860, see ibid. (1861), 676.

For view of the process of raising a house (No. 39 White St) by Brown & Adams, 1860, see ibid. (1861), 698.

For view of the old Bowery Theatre, 1860, see ibid. (1862), 154.

For view of the Spangler House, on the west side of Broadway, between 14th and 15th Sts., see reproduction of a lithograph of 1860, in *Brown’s Book of Old N. Y.* (1913), 289.

In about this year, a series of photographs of important sites and buildings in New York was made; it included one of Union Square, which is reproduced and described as A. Pl. 27 B-a, Vol. III.

Mayor Wood, in his message to the board of aldermen, calls attention to the impotence of the mayor under the present charter. "Responsibility and power should go hand in hand," he says, "The Mayor should be clothed with ample authority. Those who are to execute the laws and ordinances should derive their appointments from him, and hold office no longer than, in his judgment, the duty shall be performed with fidelity.

"However conscientious and capable, no man holding the office of mayor can meet public expectations, until the necessary changes shall be made in the fundamental law. Under the system as it is, we shall go on from bad to worse, sinking deeper every year in the ‘slough of despond.’"

"When accepting the nomination of the National Democratic party of this city, as a candidate for the Mayorality, I declared my sentiments fully upon this subject. Upon that occasion I presented the platform upon which I would go into the canvass, and the policy which would govern my official course, if elected.

"The basis of this platform was in the following words: I am in favor of one head to the Corporation, which shall possess authority to enforce prompt obedience to the laws by officials and the people, believing that this city requires a strong, consolidated government, having sufficient inherent vigor and legal independence to command immediate compliance to its will. Better have an iron rule, than no rule at all, as now."

"My opponents took issue with me upon this principle, and the people have decided in my favor. I therefore have a right to expect that the necessary amendments shall be made to the charter, which shall carry out their wishes. Those who expect a reform, without reforming the foundations of the evil, will be disappointed. Under the present laws, it makes little difference who occupies the Mayorality. That functionary is but a clerk. His duties are chiefly clerical and his powers subordinate. Though he may be surrounded by those who live upon official peculation, and otherwise evince a disregard of the public interests, he has not the legal right to punish the one or remedy the other.

"The Mayor, as chief executive, has not the necessary authority to enforce a prompt obedience to, and execution of the laws, and without such authority concentrated in the hands of one man, there can be no good government. It is folly for any person holding this office to attempt that which he has no legal authority to accomplish. The evil-doers will resist him in the courts, and he must necessarily be discomfited. Moral suasion or official station avails not against the corrupt element existing in New York. There must
THE ICONOGRAPHY OF MANHATTAN ISLAND

1860

January 13

be a corrective, stronger and more potent. We require a vigorous arm, upheld by sufficient warrant of law. It is not only necessary that we should have a chief magistrate with capacity, integrity, in a strong man, but he must be vested with requisite, unquestionable jurisdiction. With such a man, thus strengthened and encouraged reforms can be accomplished; otherwise, all attempts to this end will be futile.

"The views now presented by me, in favor of a radical change in the City Charter, are the results of study, observation and experience. I am confident that New York will have no reforms until the fundamental law itself is changed. Whether the Legislature will at this time concur or not, I do not know; but rest assured that, sooner or later, the people will, with one voice, demand the establishment of the 'One Man Power,' and the erection of a strong, consolidated executive government over the municipal anarchy and ruin to which we are now so speedily tending."—

The Tribune says: "Mr. Wood tells the public that he can do nothing, and the Councils can do very little, to mitigate the heavy burdens now pressing upon our tax-payers. We say they can do a great deal; and if they would only take hold and do what they can, we would favor an increase of their power. Let them begin and cut down the inordinate salaries now paid to the Chief Engineer of the Fire Department and scores of other unprofitable employees, and shut up the dens of the mock auctioneers and emigrant ticket-swindlers, enact ordinances calculated to break up gambling-houses, brothels, and law-defying grogshops, and prove themselves on the side of morality, industry and thrift, against fraud, debauchery and wrong, and they could easily obtain from our new Legislature any reasonable enlargement of their powers. But, until they evince a disposition to act energetically and beneficiently the power they already have will they doubtless clamor in vain for its increase; and, in any case, such a practical acrcacy as Mr. Wood seems to demand, is out of the question."—N. Y. Tribune, Ja. 4, 1860.

The Herald gives two columns to the "illegal jobs and frauds" of last year's common council, and declares that other schemes "were cooked," but "in consequence of the determined opposition of the press and the strong public sentiment created thereby, the plotlers were temporarily foiled in their schemes and the matters 'laid over' until a more propitious season. Among these jobs are the following: 1. The repaying of Broadway. 2. A contract for cleaning the streets. 3. The establishment of Westchester railroads, with rails through our principal streets. 4. The widening of St. Marks Pl. The sale of the front of St. Mark's Church during the year illegal manner." Minute details of these schemes are given. The prospect for improvement in the present year is called "dim," and the "city legislators" are denounced in scathing terms thus: "With few exceptions [they are an unprincipled, illiterate, scheming set of cormorants; foisted upon the community through the machine of primary elections, bribed election inspectors, ballot box studious, etc., etc.] and thus the other illegal schemes.

The consequence is that we have a class of municipal legislatures forced upon us who have been educated in barrooms, brothels, and political societies; and whose only aim in attaining power is to consume schemes for their own aggrandizement and pecuniary gain. The present Common Council are not the legitimate representatives of an intelligent community; none of our eminent merchants, tradesmen or mechanics are among them; but, on the contrary, they are from a class of men of superficial views, without the capacity or education to rank as wise legislators. In the present Common Council are men under indictment for murder and fraud, and those who, only a short time previous to their election, were inmates of the penitentiary at Blackwell's Island; and there are others who are actively engaged in contracts with the city—a fact strictly forbidden by the amended charter, passed in the year 1857. In so doing they perjure themselves by engaging in that work, which by their solemn oath they swore they would not do."—N. Y. Herald, Ja. 13, 1860.

This very outspoken language aroused the ire of the aldermen, who declared in a resolution that justice to their number "imperatively demands that either those accusations should be proved, and on it as a means of vindicating their honor, or that such accusations and charges should be as publicly retracted as they were preferred by the proprietor or proprietors of the newspaper in question." This resolution was sent to the other board for concurrence.—Proc., Bd. of Ald, LXXVII: 106-8. The Tribune editor remarks that it appears probable that "the public will be regaled with the interesting spectacle of Mr. James Gordon Bennett being held to account for rehabbing sin." But the common council "must beware how they play with edged tools, as, unfortunately, in this city, some of the members are amenable to the charge made by the Herald."—N. Y. Tribune, Ja. 17, 1860. Says the Times: "The public will await this august spectacle with considerable anxiety and curiosity. A more remarkable culprit has rarely come before a more remarkable tribunal. Charles I before the Regicides, Warren Hastings before the House of Lords, Franklin before the Privy Council, were all very well in their way; but James Gordon Bennett arraigned before Messrs. Boole, Brady and Bagley [the aldermanic committee], for making disagreeable insinuations about the New-York Common Council, will be, in many respects, the most imposing and thrilling scene which has ever been enacted on the stage of events."—N. Y. Times, Ja. 19, 1860. See Ja. 19.

The councilmen decline to take joint action with the aldermen for a committee of inquiry into the charges of the Herald (see Ja. 13).—Proc., Bd. of Councilmen, LXXVII: 91. "We must continue to receive the evidence which is pouring in upon us," says the Herald. "Yesterday we were furnished with another batch of statements, and if they continue to come in at the present rate we shall probably have to employ two or three clerks to take care of them. It is beyond this board's power or that of any other body of men to do fair and diligent spirit and what powers the committee have in the matter. And it remains to be proved, also, whether the statements made to us can be verified; but we must say they furnish a curious, a very curious history, indeed, of the late Boards of Aldermen and Councilmen. The language we used in describing the character of those bodies, whatever it was, was very much more justly combined with the statements in this present. We hope, however, that the Aldermanic committee will give the matter every attention, and we again remind of the necessity to subpoena the District Attorney, with directions to bring all his papers before them. They will probably throw a brilliant flood of light upon the whole transaction."—N. Y. Herald, Ja. 20, 1860.

One never saw a quarter of fashionable society, only a few years ago filled exclusively with private residences, is yielding to the resistless tide of business. Two or three business establishments have already invaded its precincts, and as it is the first step which tells in such a movement, they will have followers and imitators rapidly. Batchelor & Brown have taken possession of the old mansion of Gideon Lee; No. 1 is occupied as a restaurant; a new hardware-store is soon to be opened next to the residence of Dr. Francis. This is the natural progress of events, and in due time even Fifth-avenue will probably go through a similar experience."—N. Y. Times, Ja. 19, 1860.

"The localities below the Park and around the City Hall, where the ancient Knickerbockerish flourished, have long since been removed to make room for the progress of improvement, but until recently, the residences of the Revolutionary houses have been occupied by those who had the good fortune to be spared. Within two or three days of these, and not the least noteworthy—the mansion in which Gen. Lewis for a long period resided, in Leonard-street between Church and Broadway—has been demolished at the stern bidding of the ever-onward-marching Genius of Trade."—N. Y. Times, Ja. 22, 1860.

It appears," says the Tribune's editor, "that the county is paying fees for the same services to several officials. The Clerk of the Sessions, the County Clerk, and the Sheriff all draw 37½ cents each for informing the Secretary of State of every conviction and discharge of criminals. . . . It is high time that this leak was stopped."—N. Y. Tribune, Ja. 24, 1860.

The following remarks are made upon the city parks: "The expense of keeping and improving the public Parks in this city, for the year past, . . . was $27,180, of which amount a little more than half was devoted to Tompkins Square, though the improvements in that Park are not yet quite completed. A taste stone and iron fence has been erected around it, the flagging has been taken up and replaced where necessary, grass and Timothy seed have been sown, privet planted, and young and thriving trees set out. Gutters and ditches have been cleaned, and a stone retaining wall is to be put around the fountain. Madison Square looks dilapidated. The wooden fence around it is rotten and decaying, continually requiring repairs; and the Square, in consequence, looks very little like the one which a Flora McLimsey might be expected to choose for her melancholy.
The Duane Street M. E. Church, erected in 1879, is sold at auction for $72,750. The recent widening of Duane-street, and the proximity of the wharves and railroads, make the location one much desired, and the city legislators that they were once more turning to the state legislature for relief. — Carman, Street Surface Railway Franchises of N. Y. City, 87.

The Central Park commissioners present to the common council their third annual report. They observe an "eagerness that exists in the public mind for the establishment, within the Central Park, of institutions that will afford the means of popular cultivation and innocent recreation," but "doubt the propriety of appropriating the moneys placed at its disposal for these or any kindred purposes. They believe a Zoological Garden "would be an object of continued interest and instruction to the whole community," but that the maintenance of such "out of the public funds would not be justified;" furthermore, "the maintenance of such a garden by a private association...is more thorough the expression of an interest in the public welfare, with satisfaction to the following paragraph in the comptroller's report for 1859: "The increase in the amount of taxes occurring to the city, in consequence of the enhancement in value of real estate situated in the upper part of the island, over and above the former value of the land now withdrawn from taxation, on account of the opening of this noble park, will it is thought, afford more than sufficient means for the payment of interest on the debt incurred for its purchase and improvement, without any increase in the general rate of taxation."

In the selection of employees they report their policy from the beginning has been that of "excluding all political influences from the park" with "results satisfactory to the whole community;" to this policy they "will rigidly adhere for the future." — Proc., Bd. of Ald., LXXVII, 192-211.

A large public meeting is held at the City Assembly Rooms "to express the sympathy which all enlightened Americans feel with the people of Italy in the present crisis of their national existence." Speeches are made by Rev. Dr. Bellows, Rev. Henry Ward Beecher, and others. — N. Y. Times, F 18, 1860.

The new State Senate building is, in its way, the most striking place in the United States. No other spot conveys so good an idea of the bustle and stir of the great commercial city of America." — Harper's Weekly, I: 106. An engraved view of the district appears in ibid., I: 104-5.

On this, the eve of the anniversary of Washington's birth, a large and enthusiastic meeting is held at Cooper Institute in order that the people of New York may publicly express their devotion to the Constitution and their desire for the preservation of the Union. Addresses are made by Mr. James W. Gerard, Hon. J. W. Morison Harris, Hon. George Briggs, and Mr. Theodore Tomlinson. Gen. Winfield Scott is among those present. — N. Y. Times, F 22, 1860.

The status of Washington, ordered by congress in 1783 (p. 22 Ag 7), is unveiled, on July 55 years later, at the intersection of Pennsylvania and New Hampshire Aves., Washington, D. C. Pres. Buchanan makes the address of dedication, and Hon. Thos. S. Mitchell of Virginia delivers an oration. The sculptor is Clark Mills of New York State. An appropriation of $50,000 was made for the statue by congress in 1853. — Johnston, Original Portraits of Washington (1882), 181-82.

Abraham Lincoln speaks at Cooper Institute to a large audience. Wm. Cullen Bryant presides as chairman. — N. Y. Times, F 18, 1860. James A. Briggs, who was instrumental in bringing Lincoln to New York, later wrote an account of his part in the event. Lincoln was invited by Wm. Cullen Bryant, David Dudley Field, and another man, to be one of the lecturers in a course proposed for the winter of 1859-60, each lecturer to receive $200. When Lincoln wrote, in due time, that he would deliver the lecture, a political one, on Feb. 27, the gentlemen responsible for the engagement feared that, as the expenses would be large and as it was late in the season, success was very doubtful. In this emergency Mr. Briggs proposed that the lecture be delivered at Cooper Institute. Both the Young Men's Republican Union and the Draper Republican Union Club refused to have it delivered under their auspices, so finally Briggs and the three original sponsors assumed the expenses and advertised the lecture. Mr. Briggs in his narrative commented upon the general absence of interest in Lincoln in New York City. "A notice of the proposed lecture appeared in the New York papers and the Times spoke of him as 'a lawyer who had some local reputation in Illinois'." — After the lecture was over, Briggs adds, "I was handed by the gentlemen interested the sum of $4.45 as my share of the profits." — Narrative of James A. Briggs, in the N. Y. Ev. Post, Ag 16, 1860.

Henry M. Field was in the audience that greeted Lincoln on this occasion, and in his biography of his brother, David Dudley Field, he writes his impressions of the event and the man: "It was in the Cooper Institute as it was in the old days when the platform of the great hall was not in the middle but at the far end, and I can see him now as the door opened, and the tall figure came forward accompanied by William Cullen Bryant and David Dudley Field. As I sat on the platform close to the speaker, I caught every word and observed every gesture. He spoke in a high-pitched voice, in which there was not a trace of the smooth-tongued orator; but there was a singular clearness in his style, with a merciless logic which no listener could escape, as he unfolded link after link in the iron chain of his argument. But there was more in evidence that night than this: in the plate there was a revelation of the man, as one who loved his party but loved his country more. The fairness to his opponents was quite unusual in political combatants. It was not as if he were fighting an enemy, but reasoning with a friend." — Life of David Dudley Field, by Henry M. Field (N. Y., 1887), 122-23.

"The work on the Central Park has dwindled down to a low figure, and unless 'material aid' is furnished soon, it will cease altogether. The whole force employed on Friday last [Mr 9],... was 160... The only work doing above the new reservoir is in draining, upon which a squad of about 20 men are employed. The work upon the new reservoir, under the management of the Croton Board, is prosecuted with vigor. About 300 men are employed, at present, and as soon as the warm weather shall make it safe to renew the work upon the embankment—probably within a month—the force will be doubled. For the last four months the whole force has been employed in blasting rock for the bed of the reservoir. The embankment and masonry work remains the same as it was last Fall." — N. Y. Times, Mr 13, 1860. See D 11.

The street commissioner is directed "to advertise for proposals for excavation and building of an area around the City Hall; said area to extend in front three feet from the building, and on the other three sides to be of a width of the present coping from the house, and carried to a depth of one foot below the basement floor. The windows on the front to be cut down to the depth of three feet six inches from the floor, and the area covered with an iron grating, as per diagram. The rear windows, and those on the
The building of a Chapel for Grace Church has just been commenced in Fourteenth-street, nearly opposite the Academy of Music.—"N. Y. Times," May 23, 1860.

A terrible fire occurs in a tenement-house, No. 90 West 45th St., between Broadway and Sixth Ave. The building is entirely destroyed. About ten people are burned to death and several are injured.—Harper's Weekly, IV: 216-18. See also N. Y. Times, May 29, 1860.

In this month, a pony express began regular trips between St. Joseph, Mo., and Sacramento, Cal. It was part of a mail line from New York to San Francisco, and by its aid the distance from coast to coast was made in 14 days. "The pony express lasted two years, being given up when the telegraph line across the continent was completed."

The N. Y. Historical Society holds a meeting at the Academy of Music to commemorate the birth of Washington Irving. Wm. Cullen Bryant delivers the eulogy.—N. Y. Times, Apr. 4, 1860.

Commissioners are appointed to lay out streets and avenues north of 15th St. They are James C. Willet, John A. Havon, Isaac P. Martin, Isaac Dyckman, Charles M. Connolly, John F. Seaman, and Henry H. Elliott. The elevated, irregular, and rocky formation of that district, and also between 125th and 141st Sts. of Tenth Ave. and west of a line 50 feet east of the old Kingsbridge Road, made it necessary to alter the plan of the city. The commissioners are not authorised to close Tenth Ave., or the old or new Kingsbridge Road or the Bloomingdale Road, but may straighten or widen them. They were required to make a special map of the streets, avenues, roads, and public squares which they lay out, accompanied by field notes and elucidatory remarks; and to file these, one in the office of the secretary of state, one in the office of the clerk of the city and county of New York, and the third to belong to the mayor, aldermen, and commonalty of the city. They were also required to erect monuments to show the location of the streets, &c., and designate their location on the map, to determine the elevations and depressions of the intersection of streets, &c., above high-water marks, and to designate these, together with the grades, and all such hills, valleys, inlets, and water-courses, as may be necessary, on the maps. The act defines the proceedings necessary for opening the streets so laid down.—Laws of N. Y. (1860), chap. 201. See Apr. 24, 1865.

A Metropolitan Police District is established.—Laws of N. Y. (1860), chap. 339. A similar district was established in 1857 (ch. 58, Apr. 15).

Madison Ave., from 42d to 66th St., is declared by the legislature to be a public street as if laid down by the commissioners of 1807, and is opened.—Laws of N. Y. (1860), chap. 466; amended by ibid. (1862), chap. 176.

The first law requiring fire-escapes on tenement-houses is passed.—Laws of N. Y. (1860), chap. 470. For the development of legislation in this direction, immediately following this act and the building law of April 19, 1862, see Ann. Rep., Supt. of Buildings (1861-1869), 333-40; (1871), 62; and (1872), 9-27.

The Library Association is incorporated.—Laws of N. Y. (1860), chap. 479.

"Sylvan Place," extending from Third to Fourth Aves., 120th and 121st Sts., is declared by the legislature a public place, as if it had been laid out by the commissioners of 1807.—Laws of N. Y. (1860), chap. 486.

The legislature passes an act authorising the corporation "to grant, bargain, sell and convey to the United States so much and such parts of ... the City Hall park, together with any buildings thereon. The said mayor, aldermen and commonalty may determin[e] properly."—Laws of N. Y. (1860), chap. 506. For the purchase of the post-office plot, see Apr. 11, 1867. See also Je. 26, 1866.

The legislature authorises the payment of $1,200 salary to the members of the present common council for their services, "which shall be in lieu of and include all charges for carriage hire and other expenses."—Laws of N. Y. (1860), chap. 509. Says the Tribune: "The Councilmen were so tickled with the idea of getting $2,000 a year for their services that [a session last evening] they got up a mock attempt to donate their own salary, with that of the Board of Aldermen, to the Widow and Orphan's Fund of the New-York Fire Department. When the jest had gone far enough, the motion was withdrawn."—N. Y. Tribune, Apr. 21, 1860. At the time when this "salary grab" was introduced at Albany the Times argued: "In a City like this, a man who can do the duties of an Alderman, and earn his bread as well, is pretty sure to be a honest, more respectable and better-behaved man than an Alderman by profession. In other words, in the existing condition of ward politics, a person who has no ostensible means of support, and looks to being elected a municipal legislator for board and lodging, is pretty sure to be a worthless adventurer, and having no affairs of his own, is the last person in the world to be charged with the management of the affairs of other people. We do not assent or insinuate that penniless people are unfit for office, but we know as a matter of fact that penniless people in New-York, who take to ward politics for a livelihood, are, in nine cases out of ten, incorrigible scamps."—N. Y. Times, F 25, 1860.

The act of legislature called the department of "Public Charities and Correction" is created. It is to be headed by four commissioners appointed for five years by the comptroller, although their successors are to have six-year terms. The almshouse department, that had been created on April 2, 1849 (ch. 6), is abolished, and all books and accounts are ordered to be transferred to the new department.

Particularly mentioned as coming under the control of these commissioners are the almshouse and workhouse, the nurseries for pauper children and destitute children, the county lunatic asylum, the "Putter's field," the penitentiary, and city prison. Institutions excepted from their control are the house of refuge, the juvenile delinquent asylum, the house of detention of witnesses, and the "county or sheriff's jail." While it is made lawful for prisoners to be detained in the workhouse "for the purpose of employment therein," the "recipients of the public charity will not cause the street to be contaminated with felons." "Confineement, by being fed on bread and water only, for such length of time as may be considered necessary," is the penalty prescribed for refusing "to perform the work allotted." All grounds under the department's jurisdiction which are capable of cultivation "shall be used for agricultural purposes, and improved in such manner as will yield the greatest revenue to the department." As far as possible the criminals are to be classified "so that the novice in crime may not be contaminated by the evil example of, or by association and contact with the more hardened and confirmed." The power "to indenture and bind out, as apprentices during their minority, any minor children who may be under their care" is stated in the act. The county board of supervisors is expected "to visit and inspect the department," and any commission "against whom the public interest may be established" is removable by the governor.—Laws of N. Y. (1860), chap. 510. The unique plan of having the comptroller appoint these commissioners is attributable to the fact that it was a republican legislature that passed this act, and that Comptroller Haws was a Republican while Mayor Wood was a Democrat.

Over the veto of the governor the legislature grants franchises in perpetuity to five different groups of men to operate railways in several streets of the city.—Laws of N. Y. (1860), chap. 511, 512, 513, 514, 515. See Apr. 20.

The legislature authorises the sale and conveyance to the city by the state of the soil reclaimed and filled in along the Hudson and East Rivers, which lies outside of and adjacent to the grants made to the city under the Montgomery Charter.—Laws of N. Y. (1860), chap. 606.

Meeting in special session, both boards of the common council concur in a resolution which expresses their displeasure at the action of the legislature in granting street railway franchises in New York City (see Apr. 17). They instruct the corporation counsel "to take all proper necessary legal measures" to prevent the laying of rails on the running of cars in any "street, public place or highway in the said city of New York, without the consent of the Mayor, Aldermen and Commonalty of the said city, being first had and obtained."—Proc. Bd. of Ald., LXVII: 258-425. N. Y. Herald, Apr. 21, 1860. The mayor approves a joint resolution providing that the governor's room in the city hall be painted, carpeted, and upholstered,
under the direction of the street commissioner, "in a manner be-
fitting the necessity of the occasion."—Proc., App'd by Mayor,
XXVIII: 314. This was the big fire-bell in Mt. Morris Square.—
May 4
The Old Clinton Country Market—the old rotten building
in the centre of the triangle of Clinton Market, at the foot of Canal
Street, for many years a landmark [see O 22, 1833]—has become too
dilapidated to answer the purposes of the marketmen, and yesterday
the work of tearing down was begun. The space left is to be ap-
propriated as a stand for the wagons of country marketmen."—N. T.
Daily Tribune, My 5, 1860. For ten years prior to this the old
country market had been used by the Hudson River B. Co.—
A statue of Justice has recently been re-erected on the city hall.
"The figured Goddess, in robes of shining white, looks benignant
[it] on the great town, and, with tempting exhibition of impartial
scales, invites those who seek her aid to the temple on which she
stands. . . . The general course and spirit of the City legislators
nominate in a statue of Mercury, the god of thieves, than in this image of benign Justice, the punisher of thieves and robbers."—N. T.
Times, My 7, 1860. The former statue fell during the fire of 1838 (q. v., Ag 18). This new statue was of wood; it was taken down in 1887 (q. v., Ji 15).—Ibid, Ji 16, 1887.
Four hundred women meet at Cooper Institute, "clarioning for
the cause of Miss Wright; Miss Anthony, Wendell Phillips, etc.
address the meeting.—N. T. Times, My 11, 1860; Leslie's Weekly,
IX: 409.
Garibaldi lands in Sicily and begins his campaign for the libera-
tion of southern Italy from the King of Naples.—Andrews, Hist.
New York receives the news that Abraham Lincoln has been
ominated for the presidency by the national Republican conven-
tion at Chicago, but there is no enthusiasm, for most Republicans
here are surprised and disappointed that Sen. Wm. H. Seward was
not chosen. The various Republican clubs, however, resolve to
support the ticket.—N. T. Times, My 19, 1860.
The Democrats hold a great demonstration at Cooper Institute
in favour of Stephen A. Douglas for the presidency.—N. T.
Times, My 23, 1860. See Ji 2.
The one-cent ferry to Williamsburg has been a great success;
average number of passengers ten thousand per diem.—Leslie's Weekly,
IX: 409.
The College of Physicians and Surgeons is nominally allied with
Columbia College. Though each institution retains its own auton-
omy, and is in all essential respects independent of the other, the
degrees are to be granted by both presidents. The College of Physicians and Surgeons keeps its own title, but it was hereafter known officially as the "Medical Department of Columbia College."—Hist. of Columbia Univ., 1754-1904, 319.
In 1891 (q. v., Mr 24) the two institutions were actually joined.
Ex-Pres. and Mrs. Franklin Pierce paid a visit to Fernando
Wood at the Astor House the other day.—Leslie's Weekly, XI: 7.
Palermo surrenders to Garibaldi.—Staunton, Union of Italy,
The Republicans of the city hold a meeting at Cooper Institute
to ratify the nomination of Lincoln and Hamlin for president and
vice-president. Speeches are made by Horace Greeley and others.—
N. T. Times, Je 8, 1860. Other meetings were held on July 11,
Prof. T. S. C. Lowe (see N 1, 1859) informs the public that he
intends to make his "aerial trip to europe" during the summer.—
N. T. Times, Je 9, 1860. Lowe's transatlantic flight never took
place.
Three of the four ex-presidents were in New York last week, and
all in good health and spirits.—Van Buren, Millard Fillmore, and
Eisenhower attended.—Leslie's Weekly, X: 86.
"The widening of State-street to some sixteen feet, by removing
the sidewalk on the Battery side, has added greatly to the appear-
ance and convenience of the street, and with Whitehall-street also
widened, and nearly completed, there will be no more crowding,
crowding and delay among the omnibuses which gather at those
points. It is now proposed to remove the sidewalk around the
Bowling-green which is perfectly useless for pedestrians, and if this
is accomplished a great and much-needed improvement in that
part of the City will have been effected."—N. T. Times, Je 12,
1860. See also Leslie's Weekly, X: 71.
The New York World is first issued, as a one cent religious daily.
—See issue in N. Y. P. L.; Annals of N. Am., 617. After varied
fortunes, it was purchased by Joseph Pulitzer, in 1883, and became
one of the leading Democratic papers.—King's Handbook (1893),
6th ed., 156.
The first Japanese Embassy to any foreign nation arrives in
New York from Philadelphia. The members are formally received
by a committee of the common council and conducted in procession
to the Metropolitan Hotel.—N. T. Times, Je 18, 1860. Mayor
Wood and Gov. Morgan held an official reception on June 18, and
on the following days there was a continuous round of festivities
including a ball at the Metropolitan Hotel.—Ibid., Je 19-29, 1860.
The embassy left on the "Niagara" for Japan, on June 29.—Ibid.,
Je 30, 1860. See also Booth, Hist. of City of N. Y., and Harper's
Weekly, IV: 408-9, 410.
The Trustees of the Rutgers Female Institute [see Ag 29, 1858]
9
have purchased, at a cost of $60,000, the buildings on Fifth-avenue
between Forty-first and Forty-second streets. They design making
extensive additions in the rear of the buildings fronting on the
avenue, for the purposes of a chapel, laboratory, school-rooms,
painting-gallery, and observatory."—N. T. Times, Je 18, 1860.
The Institute removed from Madison St. to this location at 487-
491 Fifth Ave. during this year.—Man. Com. Coun. (1870), 335.
See also L. M. R. K., III: 941, and Pl. 148-6, Vol. III.
More than 700 Mormons, principally British and Swedish,
disenchaz New York and proceed at once to Utah.—Leslie's Weekly,
X: 87.
Demolition begins preparatory to the erection of the Produce
Exchange on the block bounded by Whitehall, Moore, Pearl, and
The "Great Eastern," the largest ship in the world, arrives off
San Francisco after a voyage of 11 days.—N. T. Times, Je 29, 1860.
A detailed account of her maiden trip from Southampton is con-
tained in Ibid. See also engraving in Harper's Weekly, 422, 424-25.
See further, Ji 3 and Ag 11.
The N. Y. Hist. Society has purchased Abbott's famous Egyp-
tian collection [see Je 14, 1853].—Leslie's Weekly, X: 87.
A Democratic mass meeting is held at Tammany Hall to ratify
July the nominations of Douglas and Johnson for president and vice-
president respectively. After the meeting, Douglas was sworned
at the Fifth Avenue Hotel.—N. T. Times, Ji 3, 1860. See S 12
and N 6.
The "Great Eastern" [see Je 28] is opened to the public. The
admission charge is a dollar.—N. T. Times, Ji 3, 4, 1860.
(May 4) Washington Market is almost wholly destroyed by
fire.—Leslie's Weekly, X: 131. It was immediately rebuilt.—
De Voe, Market Book, 452. See Ja 16, 1867.
Dr. John Francis has sold his far-famed house, No. 1 Bond St.
It is soon to be pulled down.—Leslie's Weekly, XI: 155. See also
N. T. Times, Ji 14, 1860.
In a day or two, the Croton Department will commence the
work of laying down the new four feet cast-iron main along Fourth-
avenue, to connect the new reservoir now building in the Central
Park [see Ap 17, 1858] and the distributing reservoir in Forty-
second-street."—N. T. Times, Ji 31, 1860. See Ag 30.
About 100 British residents of New York meet at the Astor
House to make arrangements for the reception of the Prince of
Wales.—Leslie's Weekly, X: 201; N. T. Times, Ag 7, 1860. On
Aug. 14, a meeting of merchants, bankers, and other well-known
citizens was held for the same purpose.—Ibid, Ag 15, 1860. The
prince arrived on Oct. 11 (q. v.).
The new Tompkins Market [see S 17, 1847] is opened for busi-
ness on the site of the old one, corner of Third Ave. and 6th St.—
N. T. Times, Ag 9, 1860. See also De Voe, Market Book, 556-57.
See, further, O 1. The market was demolished in 1911, and the
present Hewitt Memorial Hospital built on the Cooper Union erected on the
More than 6,000 strangers registered their names last Saturday
in the New York hotels. The presence of the "Great Eastern" is
said to be the principal cause.—Leslie's Weekly, XI: 177.
An editorial reads: "In a few days the Great Eastern [see Je 25]
will take her departure for Great Britain. To say that she has been
1860 THE ICONOGRAPHY OF MANHATTAN ISLAND

1860 Aug. 11 A success here would not be true. She has certainly attracted a great deal of attention—more than any other ship that ever anchored in the bay of New York. She has been visited by several hundred thousand people, who have paid their money to see her. Her enormous size, her wonderful structure, her colossal capacity, her huge engines, her marvelous internal arrangements, have each and all elicited the admiration, not only of the crowd, but of those who are best fitted to judge of such matters. At the same time it would not be correct to say that she has been a success, or that we part with her with much regret." The editor complains that the managers of the ship were grossly inefficient, that the ship was very dirty, that the officers and crew were discourteous and rude, and that Americans who made helpful suggestions were not only ignored but insulted.—Harper's Weekly, IV: 489. See also N. Y. Times, Ag 2, and 5, 1860. The ship left on Aug. 16 (p. vii).

16 The "Great Eastern" leaves New York on the homeward voyage, taking 100 first-class passengers with her. The public shows no interest in her departure.—Harper's Weekly, IV: 535. Cf. N. Y. Times, Ag 17, 1860.

23 The city hall clock is being fitted with illuminated dial plates so that it may be seen at night.—N. Y. Times, Ag 24, 1860.

25 The improvements have met and appointed a large committee, consisting of the most respectable persons in the city, to entertain the Prince [of Wales]. It is understood that they will offer him a dinner in the Academy of Music. Mayor Wool has sent his Secret to Quebec with some sort of an invitation to the Prince. —Harper's Weekly, IV: 535.

The work of demolishing the structures on the line of Chambers St. to Chatham St. and the following is already seen between Chatham and Pearl Sts. The extension of Chambers St. to the East River, making direct broad communication from river to river, is one of the most important lately undertaken by the city.—Leslie's Weekly, XI: 231.

30 The observatory at Chatham and Prince Sts. is completed this and the following days, the theatrical and miscellaneous library of Wm. E. Burton, the comedian, was sold by J. Sabio & Co., at their auction-room, on the south side of 4th St., corner of Lafayette Place, and extending nearly to Broadway.—See catalogue in N. Y. P. L.

The Prince of Wales (afterward King Edward VII) arrives in New York and is received "by a grand military and popular display. —Harper's Weekly, IV: 536.) The American newsrooms were so extensive renovation, is undertaken under the management of George Wood.—N. Y. Times, Ag 31, 1860; L. M. R. K., III: 982. See N 23, 1866. See J 26, 1862.

The Atlantic Garden, the well-known house of entertainment at Nos. 9-11 Broadway, has just been demolished, and a freight station for the N. Y. Central & Hudson River R. R. Co. is to be erected on the site. The property was bought by the railroad companies in 1863. N. Y. Atlas, 1863: 495; 650. See also N. Y. City During the Am. Rev. (1861), 161 Man. Com. Coun. (1865), 514; descrip. of Pl. 98, III: 590; L. M. R. K., III: 976.

Garibaldi enters Naples and issues a proclamation assuming the dictatorship of the kingdom.—Stillman, Union of Italy, 316.

The Douglas Democrats hold a "Grand Political Carnival and O-raft" in Jones' Woods. Between 50,000 and 50,000 people are present.—N. Y. Times, S 13, 1860.

The new Jewish synagogue erected by the congregation Shearith Israel in West 19th St. (see J 11, 1859) is consecrated.—N. Y. Times, S 13, 1860; Leslie’s Weekly, XI: 296. See also L. M. R. K., III: 929.

The property was sold in 1894 (p. vii).

17 A ferry is established, and a lease is directed to be sold, from 139th St., North River, to a place on the Jersey shore nearby opposite.—Proc. App'd by Mayor, XXVIII: 332. This was the Fort Lee Ferry.—L. M. R. K., III: 942.

The work of improving High Bridge is commenced. The new pipe was put into operation in Dec., 1861, and the masonry was completed in 1862. —Bronze tablet, east end of bridge. "High Bridge was the sole means of cooevring Croton water from the main land to Manhattan Island up to July 15, 1890, when the tunnel was supplied through a siphon under the Harlem river near Washington Bridge." —2d Ann. Rep., Am. Scien. & Hist. Pres. Soc. (1917), 533.

The 7th regiment armory on the second and third floors of the new Tompkins Market (see Ag 8) is occupied for the first time and thrown open for public inspection.—N. Y. Times, O 2, 1860. See also ibid., Ja 10, 1861; and L. M. R. K., III: 960. On Dec. 23, this armory was inspected by the common council and the heads of departments. It cost nearly $500,000.—Leslie's Weekly, XI: 116.

The Woman's Library is formally opened by a public meeting in Dr. Chapin's Church, Broadway. Many prominent men make addresses. The library is on the second floor of the University building and looks out on the Washington Parade Ground.—N. Y. Times, Ag 25 and 2, 1860; Leslie's Weekly, XI: 375.

The cornerstone of the P. E. Orphan Asylum is laid in 94th St., between Fourth and Lexington Aves.—N. Y. Times, O 3, 1860. About 12,000 "Wide-Awakes" parade up Broadway with torches for Lincoln and Hamlin. "Standing at midnight in Broadway, near the corner of Tenth Street, and looking up toward Union Place, you saw a group of firemen with a burning light, and Union Place bright with showers of fireworks; while down town, as far as the New York Hotel, and beyond, there was the same blazing torrent of light and enthusiasm, from which, in profuse and incessant explosion, burst the Roman candles of every celestial hue."—Harper's Weekly, IV: 649, 650. See also N. Y. Times, O 1, 3, and 4, 1860.
CHRONOLOGY: INDUSTRY AND EDUCATION: 1842-1860

1860

N. Y. Herald, Jan 1, 1861. Regarding his visit to this country, see also Cordova, A Humorous Description of the Tour of the Prince of Wales through the U. S. A. in 1860 (N. Y., 1861).

15 Nov.

The new theatre for Mr. James W. Wallack, at the corner of Broadway and 13th St., has been begun. It will cost about $30,000.

—Leslie’s Weekly, X: 341. It was opened on Sept. 25, 1861 (q.v.).

19 The Middle Dutch Church (used as a post-office since 1845, q.v.) and the ground on which it stands are sold to the U. S. The deed was not recorded until Jan. 29, 1866—40th Ann. Rep., Mutual Life Ins. Co. (1865). The following facts are interesting in regard to the purchase by the federal government: “The lease of the Post-office expired in 1860, and in that year the Government began to seek a new site, as this one was valued at $250,000, and the Post-office Department was limited to $200,000 for this purpose. Many merchants, banks, and insurance companies were unwilling to subscribe the Post-office removed, and they therefore subscribed $50,000 to make up the amount required. The Government then bought the property. . . . After the premises became the property of the Government, a brick addition was built forming a sort of shell around the old church, most of which it conceals from view. —Evac. Post, O 17, 1882; descr. of Pl. 130-a, III: 695-96. The church continued to be used as a post-office until 1875 (q.v., Ab. 65).

The city conveys to the Hebrew Benevolent Society (see 1860) 12 lots on the southwest corner of 77th St. and Third Ave. On Oct. 17, 1864, a further grant of 5 lots adjoining was made to this society, to be used as an orphan asylum. —Man. Com. Cown. (1870), 765; L. M. R. K., III: 934. The orphan asylum was dedicated on Nov. 5, 1863 (q.v.).

Abrams and Hannibal Hamlin, Republicans are elected president and vice-president. The Democrats were divided, one section nominating Stephen A. Douglas and Herschel V. Johnson, and the other section John C. Breckinridge and Joseph L. McKee, National Conventions and Platforms, 106-20; N. Y. Times, N 7 et seq., 1860. See N 8.

19 Horace Greeley advocates a peaceable disunion of the United States. Section Seven wishes to secede. A leading article in the Tribune says: “If the cotton States shall decide that they can do better out of the Union than in it, we insist on letting them go in peace. The right to secede may be a revolutionary one, but it exists nevertheless. . . . Whenever a considerable section of our Union shall deliberately resolve to go out, we shall resist all coercive measures designed to keep it in. We hope never to live in a republic, whereby one section is pinned to the residue by bayonets.” —N. Y. Tribune, N 9, 1860. See also ibid., N 16, 19, and 30, 1860.

“This view had its greatest popularity in November and in the first part of December, 1860; it received the countenance of other Republican newspapers; it prevailed with Henry Ward Beecher, whose consummate oratory swayed many audiences; it was countenanced by the presence from the North of a friend, who saw in the accomplishment of it the realization of their dream of many years.” This sentiment of peaceable disunion speedily declined in public estimation, however, after the middle of December, and in January, 1861, Greeley recanted.—Rhodes, Hist. of U. S., III: 140-42, and authorities there cited.

Southern medical students attending lectures in New York hold a meeting at the Democratic headquarters on Broadway opposite Astor Place to take action in consequence of Lincoln’s election. They decide to return home “as soon as any State secedes.” —N. Y. Times, N 10, 1860.

“Within the past fortnight a panic has prevailed in Wall Street, and stocks of all descriptions have declined from 10 to 15 per cent.” —Harper’s Weekly, IV: 706.

Thos. H. Chambers, L. M. Whitney, E. D. Bassford, and 175 other citizens having petitioned that the city purchase the statue of Washington, belonging to Dr. S. A. Main, and now in front of the City Hall, and for placing the same in the triangular plot of ground opposite Tompkins Market,” the board of aldermen, on the recommendation of the committee of arts and sciences, resolves to purchase the statue and hereby to place it “in such locality as may be hereafter designated by the proper authorities.” —Proc., Bd. of Ald., LXXX: 499-99, 543-44.

On Nov. 24, Horace Greeley thus commented on this action: “. . . It was a big thing, the aldermen did when they made a liberal appropriation for the purchase of that remarkable work of art, the red sandstone ‘What is It’ that has been standing out in the cold in front of the City Hall for the past two years. How it ever came there, and where it came from, and what it was intended to represent, are points upon which the learned savants of the Ethnological Society have not ventured to offer any explanation. With all the mystery, but none of the gravity of the Sphinx, the hideous object has been staring at us with its distal eyes, a daily deformity to the Park, and a puzzle to everybody. . . . While Paris, which was very well supplied with objects of the kind, has added to her public statue nearly a hundred marble effigies of illustrious Frenchmen during the past year, New York has but one statue, the bronze Washington in Union Square, and that was the gift of a few public-spirited merchants. Our Aldermen were moved by a noble ambition to do something for the city, and to make use of a familiar expression, they have gone and done it. . . . We have no question that that most abominable object is, in the eyes of our Bozoles and Bradys, quite equal, as a work of art, to the Farnese Hercules or the Apollo Belvidere. . . . As we shall have nothing to remind us of Boole and his companions after their term of office has expired, but the debts they have saddled us with, it will not be altogether a bad idea to have this statue as a suitable memento of them; and let it be set up to one of our dirtiest thoroughfares, which might be called the Boole-ward, as an awful example to our posterity.” —N. Y. Daily Tribune, N 24, 1860. On Nov. 22, Alderman Baggraton introduced a resolution of the board to this article and offered a resolution that the statue “be, and the same is hereby assigned a location in the counting-room of the Daily Tribune office, pursuant to suggestion contained in the issue of the aforesaid newspaper, that the filthiest locality in the city be assigned for that purpose.” However, he was not given leave to withdraw the resolution, so the resolution died in LXXVI: 730-71. For Greeley’s comment on this, see N. Y. Daily Tribune, N 29, 1860. On Dec. 1, Leslie’s Weekly said the statue’s “removal from the public gaze is cheaply bought at the price of two thousand dollars.” —Ibid., XI: 19.

The mayor approves a resolution of the common council authorizing payment for “dredging the channel of Harlem river above High Bridge, and removing therefrom obstructions occasioned by the old coffer dams in building the High Bridge.” The resolution also authorizes an appropriation for further improvements.—Proc., App’d by Mayor, XXVIII: 466-67; Proc., Bd. of Ald., LXXVII: 674-84; N. Y. Tribune, Mr 13, 1860.

A private gathering of over 100 men of high position and great influence, who in the preceding presidential election had supported Douglas, Bell, or Breckinridge, meet in New York and adopt resolutions conciliatory and friendly to the south.—N. Y. Times, D 17, 1860; Rhodes, Hist. of the U. S., III: 173-74.

A large meeting is held at Cooper Institute to express sympathy with “Italian Freedom and Nationality.” Resolutions in praise of Garibaldi, and an address to the Italian people pledging aid, are adopted.—N. Y. Times, D 19, 1860.

Simultaneously, Irving Hall, at the southern corner of 15th St. and Irving Place, is opened for the first time.—N. Y. Times, D 22, 1860. See also L. M. R. K., III: 984. It was demolished in 1888 (q.v., Jr 14).

In the Eno collection is a coloured lithographic view entitled “Irving Dances—To L. F. Harrison & Co. proprietors of Irving Hall,” which was pub. by H. B. Dodworth, 6 Astor Place, and bears copyright date of “1851” (error for 1861). In the centre is a view of Irving Hall.—See checklist of Eno prints, in Bulletin, N. Y. P. L., XXIX: 191 (item No. 278).

Central Park is ‘mainly complete below Seventy-ninth street, and from Seventy-ninth to Eighty-sixth street, on the west side of the old reservoir, is also well advanced. . . . The pond at Fifty-ninth street is complete, and filled with water.” —4th Ann. Rep., Com’s of Cent. Pk (1861), 5, 8. See also views in Harper’s Weekly, IV: 652. See D 18, 1861.

In the year ending on this day, New York City handled 70% of the entire import trade of the United States, which was worth $41,000,000.—Johnson, Hist. of the Domestic and Foreign Trade of the U. S., II: 53. See also Ja 10, 1861.

The assessed valuation of New York City property is $577,210, 656; that of the entire United States is $41,088,479,655.—Am. Ann. Cyclopædia (1861), 259. For details of the city appropriation and expenditures during this year, see Man. Com. Coun. (1861), 221-23.
CHAPTER VII
A.—THE CIVIL WAR
1861–1865

B.—PERIOD OF POLITICAL AND SOCIAL DEVELOPMENT
1865–1876
CHAPTER VII

A.—THE CIVIL WAR

1861-1865

A BRIEF summary of the principal events during the Civil War, 1861-1865, and the Period of Political and Social Development, from 1865 to 1876, is contained in Vol. III, chap. VII.

In this year, by a new constitution granted by Emperor Francis Joseph, Austria became a constitutional, instead of an absolute, monarchy. Hungary, however, refused to recognize the new constitution.—Hazen, Europe since 1875, 390-92.

In this year, the 23d Regiment, N. Y. (Engineer Corps), and the 47th Regiment, N. Y., were organized.—Chas. S. Clark, in Eve. Post, F 26, 1916.

In this year, the Board of New York Cotton Brokers was organized by James F. Wenman, who became its president. In 1870 (q.v.), the present Cotton Exchange was formed.—N. Y. Times, My 31, 1919.

At this time, New York City’s defences consisted of the following works: at the Narrows, Forts Hamilton, La Fayette, Richmond, and Tompkins, together with batteries Hudson and Morton, which mounted 457 heavy guns requiring 2,170 men; in the upper bay on Governor’s Island, Fort Columbus, Castle Williams, and the South Battery, with 200 guns and 500 men; on Bełoż’s Island, Fort Wood, and on Ellis Island, Fort Gibson, with 100 guns and 450 men; at Throgg’s Neck in the Sound, Fort Schuyler, with 318 guns and 1,520 men. At Sandy Hook, new works for 300 guns and 1,520 men were being built. There was also under construction at Hoboken an immense Boating battery.—Appleton’s Am. Cyclop. (1861), XII: 271. See also views and description in Harper’s Weekly, IV: 776-77, 778.

“Printing-House Square is the open space facing the eastern side of the Park, opposite the City Hall. Upon this Square directly front the offices of the New York Tribune, the New York Times—on the site of the old Brick Church—the Sunday Times, etc. The great American Tract House Printing Establishment is also on one of the corners of the square, while within sight are the offices of the Hospital, the building of the Sun, the New York Express, the Daily News, the New York Mercury, the New York Ledger, and numerous others.

“On Broadway, just above the Park, is Stewart’s Marble Palace. . . . In all its departments, it employs 350 clerks, and annually sells dry-goods to the amount of several millions. Bowen, McNamie & Co. marble store, also devoted to dry-goods, is on the corner of Pearl-street and Broadway, and is a most costly and elegant edifice. This firm has made itself widely known by their immortal reply to a threat of a withdrawal of trade for their political opinions—‘Our goods are for sale, not our principles’. . . .

“The Fifth Avenue Hotel covers an acre of ground. It is faced with white marble, stretches 200 feet on Fifth Avenue and Broadway, 215 on Twenty-third street, and 198 on Twenty-fourth-street. Exclusive of basement, it is six stories high, and in height [sic] 110 feet. . . . One novel feature of this hotel is a vertical railway [elevator] moved by steam power, which ascends from the lowest to the highest story, and by which persons can be carried from floor to floor.”—Barber and Howe, Our Whole Country: or the Past and Present of the U. S. (Cincinnati, 1861), I: 395-99, 401. See also The U. S. and Canada as seen by Two Brothers in 1858 and 1861 (London, 1862), 17-24.

The school of the Collegiate Reformed Dutch Church, the oldest school in the U.S., erects a three-storey building on the south side of 29th St. near Seventh Ave.—Dunsee, Hist. of School of the Coll. Ref. Dutch Ch. in City of N. Y., 85; Van Rensselaer, Hist. of City of N. Y., I: 120. The Collegiate School is now at 241 W. 77th St.

In this year, Delmonico leased the Moses H. Grinnell mansion at the north-east corner of Fifth Ave. and 14th St., and established there another restaurant, which was opened on April 9, 1862 (q.v.). He also retained his place at Broadway and Chambers St. (see 1859) and the one at William and Beaver Sts.—L. M. R. K., III: 978. See also the Dripps Map of 1867. In 1876 (q.v.), he moved from 14th St. to 26th St.

In this year, the German Reformed Church erected a building at 149-153 Norfolk St. and moved there from Forsyth St. (see 1822)—Corwin’s Manual, 1905; L. M. R. K., III: 935.

In Valentine’s Manual for 1861 are the following maps and views: map of city and county of N. Y., 1861; Central Park (5 views, including four views of park bridges, and one of the skating pond), 185, 214, 215, 228, 236; “Century House,” on Harlem River, near Spuyten Duyvel Creek, 240; Second Ave., looking north from 42d St., 288; old houses at junction of Marion and Elm Sts., 300; Fourth Ave., bet. 10th and 11th Sts., 312; Tompkin’s Market, Cooper Institute, and Bible House, 354; residence of Isaac Dyckman, Kingsbridge, 378; old cottages at junction of Canal and Division Sts., 420; old house, 178 William St., and old cottage, 219 Division St., 516; Gov. Stuyvesant’s pear tree (vide infra), 572; old double house on Pitt St., bet. Broome and Delancey Sts., 542; old houses (built in 1764), cor. Broad and Water Sts., 503; e. and s. w. corners of Greenwich and Franklin Sts., 628; the Havemeyer mansion, bet. Eighth and Ninth Aves., 58th and 68th Sts., 660; old houses in Division St., bet. Eldridge and Orchard Sts., 672; Harlem bridge, 684; Broadway, with Trinity Church and City Hotel, 696.

In this year, the old pear-tree which stood at the n. e. cor. of Third Ave. and 13th St., and which, tradition says, was planted by Gov. Stuyvesant in 1647, bore fruit.—Ibid. (1862), 689. See also map of “The Bouwery” in 1861 in ibid. (1862), opp. p. 686.

For view of the junction of Broadway and Eighth Ave., 1861, see ibid. (1862), 76.

For view looking north on Church St. from the French church at the s. w. cor. of Franklin St., 1861, see ibid. (1862), 284.

For view of the old Columbia House, cor. Stanton and Columbia Sts., 1861, see ibid. (1862), 360.

For views of the state arsenal in Central Park at “57th St.” (error for 64th St.), one showing the interior, occupied by the 7th N. Y. V. (Steuben Regt.); and the other showing the exterior, with troops leaving for the war, 1861, see ibid. (1862), 396, 404, 408.

For other views in Central Park, 1861, one showing Mt. St. Vincent, see ibid. (1862), 420, 424, 460, 672.

For view of Trinity Place, behind Trinity Church, 1861, see ibid. (1862), 476.

For view of an old tavern on Broadway near Houston St., and an old chasm, used as a news depot, at 177 Bowery, near Delancey St., 1861, see ibid. (1862), 484.

For view of the Delafield mansion, on 77th St., 1861, see ibid. (1862), 573.

For view of the new bridge at Macomb’s Dam, 1861, see ibid. (1862), 624.

For view of the Hamilton Sq. church, 1861, see ibid. (1862), 678.

For view of old cottage residence in 16th St., near Third Ave., 1861, see ibid. (1862), 700.

For view of old house in William St., bet. Fulton and John Sts., 1861, see ibid. (1862), 716.

For view of church at Bloomingdale, 1861, see ibid. (1862), 762.

For view of Greenwich St., below Thames St., 1861, see ibid. (1863), 284.
THE ICONOGRAPHY OF MANHATTAN ISLAND

For view of old warehouses, cor. Pearl and Chatham Sts., 1861, see ibid. (1863), 456.

For view of Baxter formerly Orange St., bet. Hester and Grand Sts., 1861, see ibid. (1863), 704.

For view of Manhattan St., bet. Houston and 53 Sts., 1861, see ibid. (1864), 114.

For this year, Augustus St. Gaudent, at the age of 13, entered the night class in drawing at Cooper Institute. For the development of his career, see Fielding's Dict. of Am. Painters, Sculptors and Engravers [1926], 314.

In this year, a view of New York, painted and etched by George L. Brown and finished by A. H. Ritchie, was published by George Ward Nicholas. A signed artist's proof on India paper of the first state of this print was sold with the Pyne collection—Pyne sales catalogue, item 104.

Frederick Wm. IV of Prussia dies and is succeeded by his brother Wm. L. Lewis, Hist. of Germany, 683-84.

New York and other northern states protest against secession; a general fast is proclaimed and observed.—N. T. Herald, Ja 5, 1861.

Mayor Wood, in his annual message to the common council, indicates how far New York is from the "free city of itself," ordained by the Montgomerie Charter of 1771. The state has usurped control, among other things, of the police department, the almshouse, Central Park, schools, piers and wharves, even of our records. Last year the sum of $2,108,625 was exacted from us as a tax, "very unfairly apportioned upon this city." He declares that "the political connection between the people of the city and the State is broken by the latter to our injury. The Legislature, in which the present party majority has the power, has become the instrument by which we are plundered to enrich their speculators, lobby agents, and abolition politicians. Laws are passed through their influence, by which, under the form of legal enactments, our burdens have been increased, our substance eaten out, and our municipal liberty destroyed." With a "disillusion of the Federalism of Liberty," he says, "let the mayor and city accept the obligations [of] it, behave every distinct community, as well as every individual, to take care of themselves. . . . Why may not New York disrupt the bonds which bind her to a corrupt and venal master—to a people and a party that have plundered her revenues, attempted to ruin her commerce, taken away the power of self-government, and destroyed the Confederacy of which she was the proud Empire City?"—Proc., Bd. of Ald., LXXXI: 10-22. Says the Herald: "This document . . . is one of the most remarkable that has emanated from Mayor Wood, who has a Napoleonian love of sensations. . . . The message is devoted entirely to an elaborate attack upon the powers at Albany, and its theory is that, as the Federal Union is about to be broken into pieces like so much fragile crockery, it will be well in hand to pick up the pieces; that New York is rather a valuable fragment, and that we should look out and keep it for ourselves, even if we have to break the State government into bits."—N. T. Herald, Ja 8, 1861. See also, Lossing, Hist. of N. Y. City, II: 715.

The first shot of the rebellion is fired, in Charleston harbour against the "Star of the West," which was bringing reinforcements from New York to Fort Sumter.—N. Y. Times, Ja 19, 1861; Rhodes, Hist. of U. S., III: 245-51.

The College of St. Francis Xavier (see N. 25, 1850) is chartered by the regents.—The College of St. Francis Xavier. A Memorial and Retrospect, 1847-1857, 208-10. See, further, O 15.

A memorial, signed largely by the merchants, manufacturers, and capitalists of New York, is sent to congress in favour of compromise measures with the southern insurgents. On Jan. 18, a memorial of similar import was adopted at a large meeting held in the Chamber of Commerce and sent to Washington with 40,000 signatures.—Lossing, Hist. of N. Y. City, II: 715-16.

The exports of produce, goods, and merchandise from the port of New York during the year 1860 were valued at the Customhouse at the sum of $103,492,826, about thirty per cent. more than the highest export on record.

"Recent political developments have directed attention to the commerce of this port, and alarm has been created by threats of raising up commercial rivals to New York. It does not appear that this alarm rests on a substantial basis. Before the Revolution, Charleston imported more foreign goods than any Northern city. After the Revolution, and previous to 1800, Philadelphia was the principal emporium of foreign goods on this seaboard. New York has now superseded both. It has done so within the last twenty years from Government, but simply by the force of geographical influence and the energy of its people. . . . The simple fact is that a variety of concurrent circumstances—an excellent harbor, a central position, an energetic commercial community, an unequaled system of internal communications, a liberal commercial code, and a uniformly healthy climate—have combined to render this city the metropolis of commercial America. Our taxes are heavier than those of any other city on the continent; our Municipal Government indisputably worse than any. . . . Yet we thrive notwithstanding, and the third of the business of the country are done here."—Harper's Weekly, V: 34.

The regular meeting of the aldermen is adjourned for lack of a quorum, only four members being present. At the same time a cock fight between Troy and New York birds, one side said to be backed by a "member of the city government," is interfered with by the police, although the pit has every seat occupied at $4 per head. Was this match the cause of an adjournment of the Board of Aldermen," inquires the Herald.—Proc., Bd. of Ald., LXXIX: 87; N. T. Herald, Ja 22, 1861.

At the convention beginning on this day, the Southern Confederacy was formed, and Jefferson Davis and Alexander H. Stephens were elected president and vice-president respectively.—Rhodes, Hist. of U. S., III: 291-95; Macdonald, Select Docs. Illus. of the Hist. of U. S., 1776-1861, 446-55.

Mayor Wood approves the resolution of the common council accepting the bid of Andrew J. Hackley for cleaning the streets for five years for $57,000 an annum.—Proc., App'd by Mayor, XXXIX: 12. The mayor had recommended the previous year that the streets be cleaned by contract rather than by day's work; after much discussion bids for such work had been sought. Inasmuch as there were 22 lower bidders than Mr. Hackley and as both chambers of the common council concurred the same day in awarding the contract to him, the Secessionists being contrary to charter opposition to the award and charges of bribery were heard; further indignation was aroused when the common council gave permission to Hackley to use the city dumping ground "as a temporary place of deposit for street dirt." The corporation council ruled that the contract award was valid under a statute (Laws of N. Y., 1866, chap. 599) which allowed the corporation to raise money to clean streets.—Proc., Bd. of Ald., LXXX: 850-60; LXXIX: 329-30, 444, 481-83, 592, 724-25; N. Y. Tribune, F 13, 1861. For further developments relating to this contract, see My 28.

"It is understood that the New York bankers have met and come to an understanding that they will not take another dollar of the forthcoming United States loans, unless a compromise is effected which shall be satisfactory to the border Slave States."—Harper's Weekly, V: 103.

Representatives from all Italy (except Venice and Rome) meet in the first Italian parliament, at Turin.—Andrews, Hist. of Development of Modern Europe, II: 143-44. See Mr 17.

Pres.-elect Lincoln arrives at New York on his way to Washington and is enthusiastically greeted by a great crowd of spectators. The streets are decorated with flags and welcoming banners. After receiving visitors at the Astor House, he made a brief address from the balcony to about 5,000 people.—Harper's Weekly, V: 129, 150; N. Y. Times, F 20, 1861. See F 20.

Abraham Lincoln is officially welcomed to New York at the city hall by Mayor Wood. In making reply to the mayor's words of welcome, Mr. Lincoln takes occasion to say that he is the more
CHRONOLOGY: THE CIVIL WAR: 1861-1865

1861

Feb. 20

Herald, F 21, 1861.

For two hours Lincoln shook hands with an unending line of people. In the evening he and Mrs. Lincoln went to the Academy of Music to hear Verdi's new opera, "Un Ballo in Maschera." After that he was serenaded at the Astor House and a frequent store.

Hannibal Hamlin, vice-president-elect, arrives in New York and is received by delegations from the various Republican clubs. In the evening he was serenaded at the Astor House and made a brief address.—N. Y. Times, F 21, 1861.

The Senate Committee on Cities and Villages reports favorably and unanimously bills for the repeal of acts authorizing the construction of the Tenth Avenue Railroad, The South and West Railroad (known as the "Belb"), The Seventh-avenue and Broadway Railroad, The Fourteenth-street Railroad, The Avenue D and East Broadway Railroad, and The Ninth-avenue Railroad (confirming and extending a grant of the Common Council). All these measures were passed last year over the governor's veto with the exception of the Ninth Avenue which the governor approved.—N. Y. Tribune, F 21, 1861.

The Tribune remarks: "The plunder-mongers of the City Hall . . . in order to evade that requirement of the Charter which provides that contracts shall be given to the lowest responsible bidder on the credit of the City through the last Legislature a bill rendering that clause inoperative so far as street-cleaning is concerned. The Court of Common Pleas, yesterday, was therefore obliged to dissolve the temporary injunction obtained by Mr. Williams, the lowest bidder, and the contract with Huckley was concluded. By their forecast the men who trade in contracts with the Common Council have been enabled to rob the city of nearly half a million of dollars on the credit of the City through operation alone. We suspect their next move will be to neglect the contract clause in the Charter altogether."—N. Y. Tribune, F 27, 1861.

Mr. 4

Abraham Lincoln is inaugurated.—N. Y. Times, Mr 5, 1861.

The Italian parliament at Turin (see F 18) confers the title of "King of Italy" upon Victor Emanuel, King of Sardinia.—Hazen, Escape since 1859, 205.

St. Paul's German Lutheran Church on the corner of 6th Ave. and 15th St. is dedicated.—Leslie's Weekly, XI: 316.

Apr.

Between April and June, 56,100 men (including 40,000 from New York) passed through the city on their way to the front.—Am. Ann. Cyclop. (1861), p. 337. See also Losing, Hist. of N. Y. City, II: 731.

The consent of the state is given to the purchase, by the U. S., of any square feet in New York City, not exceeding in area 50,000 square feet, for a site for a post-office (see D 29, 1857).—Laws of N. Y. (1861), chap. 118. See Ap 17.

The U. S. enters into a treaty with Great Britain for the suppression of the slave-trade. Ratifications were exchanged on May 20, and the treaty was proclaimed on June 7.—U. S. Treaties, Conventions, and International Acts (Washington, 1910), I: 674-87.

The legislature, mostly the supervisors of the county of New York to acquire lands in the city for the erection of a county courthouse.—Laws of N. Y. (1861), chap. 161. An undated map of the ground at Chambers St. is filed as map No. 196 in real estate bureau, comptroller's office. The corner-stone of the building was laid on Dec. 26 (q. v.).

An attack on Fort Sumter begins, and Civil War is now inevitable. The news causes great excitement in New York. "The bulletin boards were surrounded; the streets near them were blockaded, and the fast-gathering multitude were only satisfied when the self-appointed reader had read himself hoarse in the frequent repetition of the brief announcement of the facts. . . . The feeling of rejoicing was everywhere to be met, that Major Anderson had not lowered his flag, and that President Lincoln had determined to sustain, even at so fearful a cost, the honor of the country."—N. Y. Times, Ap 13, 1861.

To provide "against mutilation of the records in the city of New York," the clerk of the city and county and the register of the county are required by act of legislature to "assign one or more suitable persons in their respective offices to have custody of the records . . . by whom or in whose presence all examinations of such records shall be made."—Laws of N. Y. (1861), chap. 172. The legislature also provided that the New York Herald be enrolled as a newspaper for the term from two to four years.—Laws of N. Y. (1861), chap. 186.

Fort Sumter in S. Carolina is surrendered by its commander, Major Anderson, to the Confederates who have stormed it.—N. Y. Herald, Ap 14, 1861. For the reaction on mayor and common council, see Ap 22.

News of the fall of Fort Sumter is announced in New York. The surrender occurred on Saturday, the 13th, at 12:15 p.m., and the news reached New York on Sunday evening, but did not appear in the papers until Monday morning.—N. Y. Daily Tribune, Ap 15, 1861. Lossing says: "It is worthy of record that a New York policeman, Peter Hart, serving under Major Anderson in Fort Sumter, saved the American flag in that first battle of the war."

—Losing, Hist. of N. Y. City, II: 717 (footnote).

The New York papers publish Pres. Lincoln's call for 75,000 volunteers for three months' service. The quota of New York State was 15,000 men. Gov. E. D. Morgan immediately informed the legislature of this, as a proof of the public spirit and with much relief. The legislature, on Ap 15, passed which conferred large powers upon the governor, authorised the enlistment of 50,000 men for two years instead of for three months, and appropriated $3,000,000 for this purpose.—N. Y. Daily Tribune, Ap 15, 1861; Laws of N. Y. (1861), chap. 277, Am. Ann. Cyclop. (1861), 722. Marching orders were sent on the 16th to the regiments in New York to proceed to Washington.—Bid. (1861), 333.

The New York Daily Tribune publishes a call for a patriotic mass meeting. In response to this call, a meeting of the "soldi men of Wall Street" was held at 30 Pine St., where arrangements were made for calling a mass meeting of the citizens. Resolutions urging the legislature, before it should adjourn, to put the militia of the state on a war footing were passed and were telegraphed to Gov. Morgan.—N. Y. Daily Tribune, Ap 15-16, 1861.

The legislature names 24 commissioners "to amend the charter of the city of New York," and fixes May 1 as the date for the members to assemble and organize. The commissioners are to keep "a journal of their proceedings" and submit an amended charter to the voters "at the next charter election." The voters, however, must have a chance to read the document in newspapers "designated by the commissioners" at least 30 days prior to the election.—Losing, Hist. N. Y. State, chap. 113, N. Y. Times, Ap 20.

The New York Herald's office was visited on Monday afternoon by a few hundred citizens with the result that its Tuesday issue upheld the government's prosecution of the war, whereas on Monday it had advocated peace.—N. Y. Daily Tribune, Ap 17, 1861.

The effect upon New York of the attack on Fort Sumter is reflected in the following editorial which appears in The New York Daily Tribune of this date under the heading "The Uprising of the Country:"

"Let no one feel that our present troubles are deplorable, in view of the majestic development of Nationality and Patriotism which they have occasioned. But yesterday we were esteemed a sorry and grasping, contented people, too greedy of gain to cherish generous and lofty aspirations. To-day vindicates us from that reproach and demonstrates that beneath the scum and slag of forty years of peace, and in spite of the insidious approaches of corruption, the fires of patriotic devotion are still intensely burning. The echoes of the cannon fired at Sumter have barely rolled over the Western hills ere they are drowned in the shouts of indignant freemen, demanding to be led against the traitors who have greedily attempted to divide and destroy the country. Party lines disappear—party cries are hushed or emptied of their meaning—men forget that they were Democrats or Republicans in the newly aroused and intense consciousness that they are Americans." See also Ap 23.

The 6th Massachusetts, Col. E. J. Jones, arrives in New York on its way to Washington. It meets with a most enthusiastic welcome and its passing through the city is a triumphal march.—Am. Ann. Cyclop. (1861), 531.
THE ICONOGRAPHY OF MANHATTAN ISLAND

The New York Stock Exchange appoints a committee "to co-operate with the Committee of Citizens of New York, at a meeting to be held at the Chamber of Commerce this day." The object is to give encouragement to the government by pledging fidelity to the Union.—Eames, N. Y. Stock Exchange, 41.

"In 1861 the public stock market in the street was in William Street between Exchange Place and Beaver Street, during the hours when the Board was not in session."—Ibid. The meeting was held April 19 (3 p.m.).

Gov. Morgan issues a proclamation announcing the president's requisition on New York for a quota of 17 regiments, of 780 men each, to serve for three months in the national defence.—N. Y. Daily Tribune, Ap 19, 1861; Stevens, The Union Defence Committee of N. Y. City, 1.

The hide and leather manufacturers, whose business houses are mostly in the "Swamp," swing to the breeze in Gold St. between Spruce and Ferry Sts., a large and beautiful flag. Mr. A. T. Steward does the same on his store. Brookes Brothers also display the American banner from their store at Broadway and Grand St.

On April 19 a large flag was flung out "Trinity Steeple while the chimes played, and also one from St. Paul's portico.—N. Y. Daily Tribune, Ap 19 and 20, 1861.

President Lincoln proclaims a blockade of Southern ports from South Carolina to Texas and declares that all Confederate privates shall be treated as pirates.—Rhodes, Hist. of U. S., III: 314.

A meeting is held at the Chamber of Commerce (corner of William and Cedar Sts.) and is attended by about 200 citizens representing the most important business firms in the city. The speakers, who included Breckinridge Democrats, Douglas Democrats, Bell men, and Republicans, were unanimous in urging prompt support of the government in the measures it was taking to crush the rebellion. A committee was appointed to aid certain regiments in getting equipment to leave for the front; $21,000 was given on the spot, and a large committee of influential capitalists was appointed to secure an immediate subscription to the $9,000,000 left of the government loan.—N. Y. Daily Tribune, Ap 20, 1861.

New York's favourite regiment, the 7th, leaves for Washington. Although the regiment was not scheduled to start before 3 p.m., at an early hour the streets were thronged with people, and the buildings in Lafayette Place, Broadway, and Cortlandt St. were literally covered with flags and hunting. Through the gay and expectant throng first marched the 8th Massachusetts, which was presented with colours on the way, but this only served to fill in a portion of the interval until the coming of the 7th. The latter filed in Lafayette Place about 4 p.m. Before it moved, the 20th New York, at the request of the people of Massachusetts in Baltimore, and forty-eight rounds of ball-carriage were served out to the 7th. The procession was headed by a band of Zouaves, who had volunteered for the occasion, then came a strong body of police, and after the police came the regiment itself, with Col. M. Laffert's commanding. The line of march was through 4th St. to Broadway, down that great thoroughfare to Cortlandt St., and across the ferry in boats pressed for the purpose. Thousands upon thousands lined the sidewalks, and the entire line of march was a perfect ovation.—N. Y. Herald, Ap 20, 1861; Am. Ann. Cyclop. (1861), 531. See also Lossing, Hist. of N. Y. City, II: 726-727 and views in Harper's Weekly, V: 281, 282, and Man. Com. Coun. (1862), 152. A painting owned by the regiment also represents the scene.

By three o'clock more than 100,000 people had gathered around the statue of Washington in Union Square in the largest mass meeting that had ever been held in New York City. John A. Dix, assisted by 87 vice-presidents, presided over the vast assembly. Loyalty to the government was pledged, and a committee was appointed to receive funds to be used in support of the public archivos. The meeting was also directed that a committee of 21 (see Ap 22) be formed to assist in war work—Stevens, The Union Defence Committee, 6-9; N. Y. Daily Tribune, Ap 22, 1861; Am. Ann. Cyclop. (1861), 531. See also view of meeting, in Harper's Weekly, V: 277, 279. "The great war-meeting at Union Square effectually removed the false impression that the greed of commerce had taken possession of the New York community, and that the citizens were willing to secure peace at the sacrifice of principle. Apr. It silenced forever the slander of the misinformed correspondent of the London Times (Dr. Russell), who spoke of his friends as 'all men of position in New York society' who were 'as little anxious for the future or excited by the present as a party of savans chronizing the movements of a magnetic storm'. The patriotism of the citizens was also indicated by the wrath which that meeting excited at the South. The Richmond Dispatch said 'New York will never be remembered with reproach by the South, for all time.'—Lossing, Hist. of N. Y. City, Ill: 719-720.

It is announced that New York, in addition to being the headquarters of the regular army of the United States, has been designated as the headquarters of the department of the East, and that Gen. John E. Wool, second in command to Gen. Winfield Scott, has been ordered to take command. Gen. Wool soon came to New York and opened his headquarters in the St. Nicholas Hotel.—Am. Ann. Cyclop. (1861), 524. See also Lossing, Hist. of N. Y. City, III: 723-725.

Mayor Wood sends a special war message to the common council. "Military aggressions," he says, "have been commenced against the Federal authorities . . . which threaten . . . to subvert our institutions, destroy our commerce, and lay waste our homes and fireplaces. It is a war, apparently, not of self-protection upon the side of the belligerents, but of active hostility against the property, the honor, and the continued peace of the Government under which we live. . . . It is our interest, therefore, as it is our duty and our right, to speak out boldly, and to act promptly, at this critical emergency, in the affairs of the country. Representing the corporation of the city, it devolves upon us to make proper provision for the public exigencies, so far as New York is concerned." He recommends the immediate appropriation of $1,000,000.—Proc. Bd. of Ald., LXXXII: 67-68. Resolutions are adopted by the aldermen assuring the president of "the unqualified support of the people of this city," recommending appropriations "for the purpose of furnishing to each regiment mustered into service from this city a stand of colors and suitable outfit for active service," and declaring it to be "their unalterable purpose . . . to do all in their power to aid and defend by the protection of the laws, the life, liberty, and honor of our flag, and to crush the power of those who are enemies in war, as in peace they were friends." Other resolutions express thanks to Major Anderson "for his gallant defence of Fort Sumter" [see Ap 13] against a vastly superior force of men, guns, and fortifications, and provide for the presentation to him of the freedom of the city in a gold box.—Ibid., LXXXII: 56-60; N. Y. Herald, Ap 26, 1861; See Ap 26.

The "Committee of Twenty-One," formed under the direction of the mass-meeting of April 20 (q.v.), organises, with John A. Dix as president. The mayor, the comptroller, the presidents of the board of aldermen and of the board of councilmen, together with two members of the select committee of the Chamber of Commerce, are added, after which the committee adopts the title, "the Committee of Union Defence of the City of New York." The purpose of the committee was to get troops into the field as quickly as possible to meet the emergency caused by the attack on Fort Sumter. For the time being it became the executive arm of the national government in New York, giving method and efficiency to the people's energies. On April 23, it opened offices at 30 Pine St. It chartered a steamboat to take provisions and ammunition to the garrison at Forts Monroe, to the amount of $800,000, which was promptly occupied by Union forces. It sent the first ambulances to the seat of war. By June 29, thirty-six regiments had been sent to the front from New York City. As soon as the national government was ready to undertake the work of recruiting and equipping soldiers, the committee suspended its efforts. Active work ended in the
Upon the arrival of news from the U. S. "that a civil war has broken out between the Secessionists in that country and the other States of the Union," the Earl of Malmesbury, in the house of lords, put the question whether the ministers "have made any attempt to prevent the quarrel between the different States of the American Union from coming to a bloody issue; what hopes they entertain of succeeding in so laudable an undertaking, and whether they have invited, or are in correspondence with any other European Government with the view of obtaining their assistance in seeking to put a stop at the outset to a civil war, of which, if once fairly commenced, it will be impossible to foresee the end?" Lord Wodehouse, foreign secretary, answered that, "after the most mature deliberation, the Government came to the conclusion that it was not desirable that this country should intrude its offices or counsel on the Government of the United States."—Harvard's Parl. Debates, CLXII: 1207-9.

Col. Ellsworth's Fire Zouaves, to the number of 1,100, leave for the front. After being presented with a banner by the fire department, they parade, through lines of firemen and crowds of spectators, up Broadway, through Bond St. to the Bowery, down the Bowery to the Park, around the Park, and up Broadway and to the foot of Canal St, where they embark on board the "Baltic."—N. Y. Daily Tribune, Ap 30, 1861. See also Losing, Hist. of N. Y. City, II: 772, and "panorama" in Man. Com. Coun. (1862), 124. On May 1, 1861, the board of alderman and councilmen voting the freedom of the city to Maj. Robert Anderson for his gallant defence of Fort Sumter and appropriating $500 for a gold box.—N. Y. H. S. Collections (1885), 429-30. The golden box which was to contain the freedom was on exhibition in October.—N. Y. Times, O 16, 1861.

The commissioners named by the legislature to amend the city charter (see Ap 15) assemble and form a temporary organization. Their second meeting was on Sept. 9, at which they completed a permanent organization, with Wm. M. Evarts as president. Their final session was on N 1 (q. v.)—Jour. of the Commission (MS.), in N. Y. P. L.

Benson J. Losing arrives in New York from New Orleans and is associated at the transformation since he left it for the South late in March. He writes: "Everywhere between Cincinnati and Jersey City he had seen the great uprising. "When he crossed the Hudson River into the great city of almost a million inhabitants, it seemed to him like a vast military camp. The streets were swarming with soldiers. Among the stately trees in Battery Park white tents were standing and sentinels were pacing. Rude barracks filled with men were covering portions of the City Hall Park. Any platforms that were arranged near the fountain, surrounded by hundreds of soldiers, many of them in the gay costume of the Zouave."—Losing, Hist. of N. Y. City, II: 717-18.

The city leases to the Orphans' Home and Asylum of the Protestant Episcopal Church, 12 lots on the south-west corner of Lexington Ave. and 49th St., for 20 yrs. at $1 per year.—Man. Com. Coun. (1870), 762.

"New York has nobly responded to the call made for troops to assert and protect the honor of our national flag, and is fast drafting her military forces to the expected scene of strife. Eight regiments have already taken their departure for Washington 7,300 troops have left the city, and a much larger number is in readiness to leave on receipt of the necessary orders."—Harper's Weekly, V: 275.

Mrs. Lincoln is in town to visit her son Robert, who is at college.—N. Y. Times, My 12, 1861. On May 16, she was serenaded at the Metropolitan Hotel.—Ibid., My 17, 1861. On May 17, she visited the barracks in City Hall Park.—Ibid., My 18, 1861.

England proclaims her neutrality between the contending parties in the United States. "This proclamation . . . derived no great importance for the reason that its issuance and nature of its terms were the recognition of the Confederate as a belligerent power. To regard the Confederate States as a belligerent conflicted with the theory of the Lincoln administration that the Southerners were insurgents, and with the largely prevailing notion at the North that they should be treated as rebels and traitors; and it placed in the eyes of nations—for all the important powers of Europe substantially followed the example of Great Britain—the vessels that should accept letters of marque from the Confederate government on the level of privateers, instead of considering them pirates and

"The events of the last week have brought forth manifestations of public opinion and public sympathy in this City, which have startled those who had not taken into account the deep currents which have long been flowing under the superficial storms of party and faction which ordinarily meet the eye. As long as New-York saw in the political contests of the day only the constitutional strife of Democrat, American and Republican—as long as all parties maintained their allegiance to the Union and their devotion to law, one party might achieve a victory to-day and another party to-morrow; and the loyalty of the defeated was no more in question than that of the victors."

"But now the question has fairly shaped itself as one of Union against Disunion, of the Constitution against Revolution, of Law against Anarchy, the voice of the Metropolis is heard in no doubtful tones, and all parties of the past melt away into the universal and perpetual American party of Constitutional Freedom and National Unity."

"The moral voice is that the Republic must not be destroyed and that the supremacy of the Constitution must be maintained. It finds expression through the Legislature, through the Press, in Wall-street, in the Church, and through the citizen-soldiers of the Republic. There was not half so much unanimity in Seventy-six, when the first blow was struck for Freedom, as there is now in defending Freedom when the first blow is struck against it."—N. Y. Times, Jl 17, 1861.

Gen. Chester A. Arthur, of Gov. Morgan's staff, having been appointed assistant-quartermaster-general, takes up his headquarters at the corner of White and Eln Sts. From two to four thousand men daily were provided with outfits, provisions, and quarters. Temporary barracks were erected in the Park for the reception and accommodation of volunteers as they arrived.—N. Y. Daily Tribune, Ap 23, 1861. See also views of a camp on the Battery, and barracks in the Park, in Harper's Weekly, V: 299.

The 8th Regiment leaves New York for Washington, on the steamer "Alabama." Previous to leaving, the regiment marched to the residence of Mrs. Charles A. Secor, on Fifth Ave., where Dr. Barrow, on her behalf, presented the regiment with a flag—Grand Opening of the New Armony (1862), 16. See Jl 26.

An agent of New York State leaves for Richmond with a letter of credit for $500,000 with which to purchase arms; 19,000 Enfield rifles were subsequently landed in New York at a cost of $757,000.—Am. Ann. Cyclop. (1861), 523.

During 1861, New York City contracted two loans for war purposes. On April 26, an ordinance was approved by which $1,000,000 "Union Defence Bonds" were issued, payable May 1, 1861. Subsequently, a loan of $500,000 was made for the purpose of aiding the families of volunteers.—Am. Ann. Cyclop. (1861), 529. See also D 31.
1861

THE ICONOGRAPHY OF MANHATTAN ISLAND

THE men on board amenable to punishment for piracy, as the
President's proclamation of April 19 had declared them to be. —

By this time, 10,000 men authorized by the New York State
legislature had been raised, and by July 12, they had been
organised into 78 regiments, officered, and dispatched to the seat of war.
In addition, 10 regiments were accepted from the Union Defence
Committee in New York. By July 1, the New York State troops
in the field were: three-months' militia, 8,500; three-years' militia,
3,400; two-years' volunteers, 30,000; three-years' volunteers, 5,000;
total, 46,900. By the end of the year 1861, the total strength of
troops furnished by New York State was 120,316. — Am. Ann.
Cyclop. (1861), 523.

"The grand jury, in the course of several sessions, issues a present-
ment against A. J. Hackley, commissioner of street cleaning (see F 12). At the time when the kids for the contract for cleaning the
streets for five years were called for, two sureties for each bidder
were required. The presentation of the last grand jury showed
that, just prior to the awarding of the contract to Hackley against
22 lower bidders, Hackley had received $40,000 from his sureties and
"refused to say what use he had made of the money on the
ground that his answer would [in]cumber him." Evidence exam-
ined shows that "the contract has not only been violated by Mr. H.
Hackley in respect, but the provisions of its regulations have been entirely disregarded." A list of streets is given, "required to
be swept four times in two weeks and not swept at all;" another
list was "required to be swept four times, but swept only once;" another very long list was "required to be swept twice, but swept
only once;" another, still longer, "required to be swept twice, but
not swept at all." The contractor has "refused the number of
sweeps of over one hundred;" several hundred sweepers working faithfully, in favorable weather, would be required to sweep the
streets once a week. This makes it clear that, with summer coming on, "it is the duty of the proper public officials to take immediate and efficient measures, to save our
citizens from the dangers to which they will then be exposed from
filthy, pestilence-breeding streets." The grand jury declared to be the fault of the contractor not to give immediate notice in writing to the con-
troller, that he may communicate to the sureties; and if they fail to
have the work performed within forty-eight hours thereafter,
to proceed to have it done at their expense. It is also urged that the
corporation counsel investigate to see if immediate legal pro-
ceedings may not be taken "to relieve the city from the burden of
this contract." — Proc. Bd. of Ald., LXXXII: 418-335. N. Y.
Tribune, My 26, 1861. This presentment is referred by the common
council to the committee of the law department. On June 17, this
committee reported for adoption resolutions very closely in accord
with the recommendations of the grand jury, but they were "laid over"
and finally "laid on the table." — Proc. Bd. of Ald., LXXXII:
597-105. LXXXIII: 12, 71, 141.

A committee of gentlemen have offered $500 for a national air
and national anthem, complete; if only the words, $250, and
the same for the music without the words. — Leslie's Weekly, XII: 18.

27 June

Having been ordered to return, because the term for which it was
mustered in the Federal service has expired, the 7th Regiment is
received by crowds at Cortlandt St. It marched up Broadway and
was mustered out of service. — N. Y. Herald, Je 2, 1861. See also
Theodore Winthrop's account in Atlantic Monthly, Je 1861, and
Piferter, N. T. in the War of the Rebellion, 335.

Mr. Gregory of Galway having given notice in the house of com-
mons of his intention to introduce a motion for a "prompt recogni-
tion of the Southern Confederacy of America," it is decided that
it is very inexpedient to enter upon such a discussion at the present
time, and Gregory agrees to postpone his motion sine die. — Han-
iard, Parl. Deb., CLXXXII: 613, 626-63.

July

The "9th New York State Militia," also officially known as the
"33rd New York Volunteers," is mustered into federal service.
It took part in 18 important engagements in the Civil War, includ-
ing Antietam, Chancellorville, and Gettysburg—Piferter, N. T.
in the War of the Rebellion, 440-41. A sketch of the history of this
regiment, which is now the 244th Coast Artillery, has been com-

Columbia College confers the honorary degree of Doctor of
laws upon Abraham Lincoln. — N. Y. Times, Je 27, 1861.

A description of a circumnavigation of Manhattan Island in-
cludes the following: "The upper portion of our island yet presents,
upon the Hudson side as upon the East, very much of its primitive
forest looks; and for more than half the distance of the fourteen
miles between the Spuyten Duyvil and the Battery, the shore is as yet
but little disturbed by the city encroachments, excepting as
they occasionally 'crop out,' like the geologists' rocks, in the form of
a factory dock, an embryo street, or a village nucleus. From the
water, the landscape appears peaceful and rural enough in the cur-
tiling veil of summer verdure; but step ahoare anywhere and the
thumbed foot of the town is somewhat more evident along highways
and byways. . . there already stretch lines of glaring gas-lamps,
and in the shadow of mossy hillocks the eye may occasionally
detect the intrusive uniform of the Metropolitan Police. . . .
The lofty table ridge which overlooks the Spuyten Duyvil
continues unbroken for the distance of a mile, when it drops nearly
to the river level at the railway station of Tubby Hook. The whole
way is a cloven ground, among country retreats, with woods and
lawns extending back to the King's Bridge Road. . . .

"In our next mile's travel we pass the heights memorable in
revolutionary story as the site of Fort Tryon and Fort Washington.
. . . The precise spot upon which Fort Washington stood is now
included in the beautiful estate of Mr. James Gordon Bennett.
It is the highest of the high lands of the metropolis and overlooks
the river, the island, and all its vicinity. . . . The grounds of the
city, towns, villages, and farms, from the Tappan to the Atlantic. . . .

"The picturesque promontory which steps so bravely into the
river at the base of Fort Washington is Jeffrey's Hook. . . .

"Continuing our voyage. . . . we come immediately to the
grounds of the Deaf and Dumb Asylum, a noble edifice perched
on the heights above, with broad, grassy lawns sweeping down to
the river's edge. . . .

"Next below the Asylum—not including a large sugar-refinery
— is Audubon Park, a charming group of country-seats, all sharing
in common the rural pleasures of a broad, woodland stretch along
the river marge. . . . Near the lower end of the Park is the Car-
mansville station of the Hudson River railway at the foot of One
Hundred and Fifty-second Street.

"The interval between the Park and the railway depot is occu-
pied by the thickly-wooded grounds of Trinity Church Cemetery.
The grounds stretch back from the river to the Tenth Avenue, at
present the great central thoroughfare of this part of the island. . . .

"Yet a little further down and we approach that part of the
metropolis still distinctively known as Manhattanville, but soon
merging in the general mass, as the far-flung villas of Che
e and Greenwich were absorbed long ago. . . . Among the public
establishments of this part of the city are a large Lunatic Asylum,
and a conven and seminary of the Catholic church.

"Within the remaining stretch of the river-shore, until we again
reach the compactly built town at Fifty-second Street, are included
the several roadside resorts of Clermont, Stryker's Bay, and
Burn-
ham's; and the pretty edifice of the Orphan Asylum with its beau-
tiful lawns sloping down to the river's side [at 73rd and 74th Sts.].

"From Fifty-second Street back to the Battery and the Bay
we see again, with variations, the busy pictures upon which we
have already looked on our passage up the East River—endless
and crowded streets and wharves and fleets of vessels of all kinds,
justling each other at the piers and in their passage to and fro in
the stream. On this side of the city, huge louver-yards take the
place of the ship-yards and steamboats and steamers of the clipper
ships of the East River. . . .

"We are now near the end of our route, having reached the
point where the great waters of the Hudson mingle with the salt
floods of the Bay. It only remains to float across the mouth of
the broad river and regain the grateful shades of the Battery
grounds, from which we set out and which we now see rising up
around the far-famed Island City." — Harper's New Monthly Mag,

In order to prevent injury to the municipal flag, which occa-
sionally comes in contact with the hands on the clock in the cupola
7 Nov. 1861

The DeKalb Regiment (German) leaves for the front, and is given an enthusiastic send-off by thousands of its fellow citizens.

—N. Y. Times, Jl 9, 1861.

25 Gov. Morgan calls for 25,000 more volunteers.—N. Y. Times, Jl 26, 1861.

1 Aug. 1864

Salmon P. Chase, secretary of the treasury, and Caleb B. Smith, secretary of the interior, are welcomed by prominent New York merchants at the rooms of the Chamber of Commerce. Secretary Chase comments upon the government. Times, Ag 15, 1861. The banks of New York, Philadelphia, and Boston agreed to lend the government $150,000,000.—Ibid, Ag 14-17, 1861.

1 Sep. 1863

Hon. John Kennedy addresses a large audience at Irving Hall in favour of supporting the government and the Union cause.—N. Y. Times, S 4, 1861.

25 Oct. 1860

Wallack’s Theatre at Broadway and 12th St. (see O 29, 1860) is opened with “The New President.” It was first under the management of James Wallack and later of Lester Wallack.—Bowen, Hist. of N. Y. Stage, II: 245; L. M. R. K., III: 986. See S 15, 1861.

25 Oct. 1860

The work of laying the seven-feet pipes across the High Bridge [see O, 1860] is progressing with a rapidity promising very speedy completion. At each gate house, new gates have been constructed and the two three-feet pipes have been brought around and inserted on the west side, while a third gate has been placed at each end of the bridge to regulate the passage of the water through the large pipes, which will soon be inserted. The new reservoir is being pushed forward with all the dispatch commensurate with strength and durability, by the energetic contractors, but it is scarcely probable that the embankment will be sufficiently settled to allow the reservoir to be filled. The lower gate-house, now nearly completed, is pronounced by all scientific men who have examined it the finest piece of masonry on this continent, and not excelled by any similar work in the world.—N. Y. Times, O 3, 1861.

15 Oct. 1861

Gov. Morgan is notified by the secretary of state, Wm. H. Sewall, that his message on anti-foreign enemies. Seward sent similar letters to the governors of all the states on the seaboard and lakes.—N. Y. Times, O 17, 1861; Am. Ann. Cyclop. (1861), 534.

15 Oct. 1861

The corner-stone of the second building of the College of St. Francis Xavier (see N 15, 1860, and Ja 10, 1861) is laid, at the present location on West 13th St. The formal inauguration of the new building took place on July 7, 1862. This was the east wing of the new plan of buildings which was altered and developed into the present structures, mainly during the period from 1886 to 1892.—College of St. Francis Xavier, A Memorial and Retrospect (1897), 68-72, 120, 128-29, 149-50, 164-67, 208.

About this time, Anthony Trollope visited New York. He thus writes of it: “Speaking of New York as a traveller I have two faults to find with it. In the first place there is nothing to see; and in the second place there is no mode of getting about to see anything. Nevertheless New York is a most interesting city. . . . Free institutions, general education, and the ascendency of dollars are the words written on every paving-stone along Fifth Avenue, down Broadway, and up Wall Street. . . . In saying that there is very little to be seen in New York, I have also said that there is no way of seeing that little. My assertion amounts to this,—that there are no cabs. . . .”

“In New York there are street omnibuses as we have—there are street cars such as last year we declined to have,—and there are very excellent public carriages; but none of these give you the accommodation of a cab, nor can all of them combined do so. The omnibuses, though clean and excellent, were to me very unintelligible. They have no conductor to them. To know their different lines and usages a man should have made a scientific study of the city. . . . Then and there are street cars—very long omnibuses—which run on rails but are dragged by horses. They are capable of holding forty passengers each, and as far as my experience goes carry an average load of sixty.”

“And now as to the other charge against New York, of their being nothing to see. How should there be anything there to see of general interest? In other large cities, cities as large in name as New York, there are works of art, fine buildings, ruins, ancient churches, picturesque costumes, and the tombs of celebrated men. But in New York there are none of these things. Art has not grown there. One or two figures by Gainsborough, if you can find them, are all the art of the town . . . but art is a luxury in a city which follows but slowly on the heels of wealth and civilization. Of fine buildings . . . there are none deserving special praise or remark. . . . Churches there are plenty, but none that are ancient. . . . The arrangements for supplying New York with water are magnificent. The drainage of the new part of the city is excellent. All the work is of an almost farcical character. The lunatic asylum which I saw was perfect. . . . And as to the schools, it is almost impossible to mention them with too high a praise. . . . The Fifth Avenue is the Belgrave Square, the Park Lane, and the Pall Mall of New York. It is certainly a very fine street. The houses in it are magnificent, not having that aristocratic look. The London residences rely on the glitter of the palatial appearance of an old-fashioned hotel in Paris, but an air of comfortable luxury and commercial wealth which is not excelled by the best houses of any other town that I know . . . There are churches on each side of Fifth Avenue—perhaps five or six within sight at one time—which add much to the beauty of the street. They are well-built, and in fairly good taste . . . I own that I have enjoyed the vista as I have walked up and down Fifth Avenue, and have felt that the city had a right to be proud of its wealth. . . . But the glory of New York is the Central Park. . . . It is very large, being over three miles long, and about three quarters of a mile in breadth . . . . The great waterworks of the city bring the Croton River, whence New York is supplied, by an aqueduct over the Harlem river into an enormous reservoir just above the Park. . . . At present the Park, to English eyes, seems to be all road. The trees are not grown up, and the new embankments, and new lakes, and new ditches, and new paths give to the place anything but a picturesque appearance. The Central Park is good for what it will be, rather than for what it is . . .™—Trollope, North Am. (N. Y., 1862), 18-29.

“The Battle Hymn of the Republic” is composed at Washington, D. C., by Julia Ward Howe after a visit to the Army of the Potomac. It was first published in Feb., 1862, in the Atlantic Monthly, and it became one of the most popular songs of the Civil War.—Hall, The Story of The Battle Hymn of the Republic, 49 et seq.
1861

The final session of the charter committee of 1861 (see My 1) is held, at which a resolution is passed stating that, "owing to the condition of public affairs, it has been found practicable to prepare and mature the necessary amendments to the Charter within the time prescribed by law" (see Ap 15).—Jour. of the Commission (MS.), in N. Y. P. L.

A large meeting is held at Cooper Institute to express New York's sympathy for the suffering and starving people of North Carolina who remained true to the Union. Speeches were made by George Bancroft, Wm. Cullen Bryant, Gen. Burnside, etc., and a committee is appointed to solicit subscriptions for the relief of the Carolinians.—N. Y. Times, Nov. 8, 1861.

James Mason and John Slidell, commissioners from the Southern Confederacy to Great Britain and France, are forcibly taken from the English mail-packet "Trent" by Capt. Wilkes of the American warship "San Jacinto" and carried to Boston. Upon demand of the British government, Secretary Seward, on Dec. 26, disavowed this violation of the law of nations, and the commissioners were liberated. This proved a sufficient apology to England, and a threatened war with that country was averted.—Rhodes, Hist. of U. S., III: 529-38.

The following scathing arraignment of Fernando Wood appears: "When he came into office the taxes of the city were six millions per annum. They are now over twelve millions. Where are his vetoes which would have stayed this tide of profligate expenditure?" He has made the police force "a mere machine for his private and political purposes. Under his sway gamblers, ticket swindlers, emigrant robbers, baggage smashers, and all the worst classes of the city, rose into prominence ... till the name of New York became by his aid to reach all over Europe."—N. Y. Daily Tribune, N. Y., Nov. 23, 1861. See D 1.

Dec.

In a very close municipal election, George Opydke, an old Free-soil Democrat and pioneer Republican, is elected mayor of New York City over the Mozart Hall candidate, Fernando Wood. Tammany Hall refused to support Wood and nominated C. Godfrey Gunther.—N. Y. Daily Tribune, D 4, 1861. See also some letters to Wood just prior to the election, among miscellaneous N. Y. MSS. in N. Y. P. L. Opydke was succeeded by C. Godfrey Gunther in 1863 (q. v., D 1).

The common council resolves "That the Street Com't be directed to proceed forthwith in the grading and laying out of Mt. Morris Square as a park (to conform to a certain map or plan made by H. L. Southard and J. Buckhout, now on file in his office), except so much thereof as has been leased to S. Van Ostrander; said square to be inclosed immediately, by a strong and substantial picket fence, said fence to be made and put up by contract; and that no portion of the earth or rock-cutting shall be removed from the square."—Proc., App'd by Mayor, XXIX: 192. See, further, S 25, 1861.

Mayor Wood submits a message to the common council advising that the defense force of the city is to be augmented by the enemy. While we have already in position "more guns of heavy caliber than Sebastopol had at the attack of the Allied armies," much remains to be done so that the approaches to the city by the Narrows or Long Island may be "thoroughly and successfully defended."—Proc., Bd. of Ald, LXXXIV: 341-47.

During the past year very extensive improvements have been completed in Central Park. The "Park Drive," a carriage road extended from fifty-ninth street to One Hundred and Fourth-street, making in all more than seven miles of fine a road for driving as can be found in this country. Much labor has also been expended in the preparation of the skating ponds, the construction of refreshment saloons, and other necessary buildings. These buildings will be rented to parties desiring to furnish refreshments to the visitors at the Park, and the income thereof is to be applied to the adornment of the grounds and the improvement of the ponds. Mr. C. G. White, of Brooklyn, has presented to the Superintendent a couple of cranes. They are objects of much interest to those visiting the Park. A pair of deer have also been placed in an enclosure near the Mall, where all may have an opportunity of seeing them. Mrs. Crawford, the widow of the celebrated sculptor of that name, has consecrated her life to the care of the public monuments in the Park. The first road of her husband's works in plaster. They make a very fine appearance. A great amount of shrubbery and large numbers of trees have been transplanted within the last year, with great success. Several new avenues have been opened, and five archways of great architectural beauty, have been constructed in different parts of the Park.

Several wealthy parties in the upper part of the City are now making arrangements to erect a glass conservatory at their own expense. It will be two hundred feet in length, by forty feet in width, and two stories in height. It is to be situated near Fifth-avenue and Seventy-fourth-street, and will front an artificial pond five hundred feet in length, by two hundred and fifty in breadth."—N. Y. Times, Dec. 18, 1861. See also 9th Ann. Rep., Com's of Cent. Pk. (1862) and Harper's New Monthly Mag., Aug., 1861. See further, D 31.

The exports from the city of New York during the week ending on this day show an aggregate value of not less than $4,250,000—an amount unparalleled in the history of the trade of the city.—Leaside's Weekly, XIII: 114.

New York banks suspend specie payments.—N. Y. Herald, D 31, 1861.

The population of New York City is $10,000, half of whom live in tenement-houses.—Am. Ann. Cyclop. (1861), 527.

Of the $260,000,000 borrowed during 1861 by the federal government to carry on the war, $100,000,000 came from New York. Without this advance by the capitalists of New York, there could have been no movements of troops or purchase of arms. The perils of the operation were fully appreciated. Foreign capitalists withdrew their confidence; Boston reduced the quota of its advance from 30 to 20%. New York had no doubts or hesitation; it put its own share and that which Boston rejected.—Am. Ann. Cyclop. (1861), 524.

A tabular statement of the funded debt of the city on this day, showing the titles of stock, for what purposes these various issues of stock were made, and the amounts of principal and interest, was published in the Man. Com. Coun. (1862), 170. Cf. similar statements in ibid. for current years.

1862

In this year, a French expedition sent out by Napoleon III—overthrew the Mexican Republic. It was determined that Mexico should henceforth be an empire, and Archduke Maximilian of Austria accepted the offer of the crown. The majority of the Mexicans, however, were opposed to Maximilian, and guerrilla warfare followed. In 1865, when the Civil War was over, the U. S. threatened intervention, and Napoleon thereupon withdrew his troops. Maximilian was taken by the Mexicans and shot June 19, 1867.—Hazen, Europe since 1815, 277-80.

In this year, "Greenbacks," treasury notes so named from the green colour of the paper used, were first issued in the United States, to provide the Civil government with the funds necessary to follow the example of the banks, had suspended specie payment. The new notes were therefore for the time being an inconvertible paper currency, and since they were made legal tender, were really a form of fiat money. The first act, providing for the issue of notes to the amount of $150,000,000, was that of the 25th February 1862; the acts of 11th July 1862 and 3rd March 1863 each authorized further issues of notes. The notes soon depreciated in value, and at the lowest were worth only 55 cents on the dollar. The act of 12th April 1866 authorized the retirement of $10,000,000 of notes within six months and of $4,000,000 per month thereafter; this was discontinued by act of 4th February 1868. On 1st January 1879 1/40 of specie payment was resumed, and the nominal amount of notes then stood at $246,681,000.

The so-called "Greenback Party," which advocated an increase in volume of greenbacks, the forbidding of bank issues, and the payment in greenbacks of the principal of all government bonds not expressly payable in coin, first appeared in a presidential campaign in 1876, with Peter Cooper as nominee. It went out of existence subsequently to 1884.—Encyclop. Brit., XII: 537.

Edward Dicey, an English newspaper correspondent, arrived in New York early in the spring, and thus described the effects of the war on the city: "I had left England at the time when the fortunes of the Federal cause seemed the lowest, and when New York was popularly believed to be on the brink of ruin and revolution. It was, I own, a surprise to me to find how little trace there was of either. An incurring stranger, not given to enter into conversation,
or to read the newspaper, might almost, I fancy, have lived there for weeks at that time without discovering that the country was involved in a civil war. There were forts being thrown up rapidly along the banks which command the Narrows... The number of uniforms about the streets was small.... A score or so of tents were pitched upon the snow in the City Park, and at the Battery, but rather for show than use. In the Broadway and the Bowery there were a few recruiting offices, in front of which hung huge placards tempting fine young men, by the offer of a hundred dollars' bounty (to be paid down, but after the war), and the promise of immediate active service, to join the Van Buren light infantry or the New York mounted cavalry. It was rare to hear a military band; and in the shop windows I noticed at that time but few pictures of the war, or portraits of the war's heroes. I saw regiments passing through the town on their way to the South, and yet only a few thrillers were given to them pass. In fact, the show-time of the war had passed away, and it became a matter of sober business.

"So, too, I was present at New York when the news came of Roanoke Island, and Bowling Green, and Fort Donaldson—of the first of that long uninterrupted series of victories which checked the progress of the insurrection.... There were no proclamations to the people, or orders to the forces; there would have been under like circumstances in a Continental country. A small crowd collected round the newspaper offices—a few extra flags hung out of shop windows—a notice that Barnum's Museum would be illuminated in honour of the Union victories, by the patriotic proprietor—and a salute of cannon from the battery; such were about the only outward symptoms of public rejoicing that were noticed in the streets. In society it was the one topic of thought and conversation...."

"There was as little look of public distress as of popular excitement. The port and quays were crowded with shipping. Broadway was daily rendered almost impassable by the never-ending string of carts and omnibuses and carriages, which rolled up and down it for hours... New stores and streets were still building, and never were there more signs of sale or of business. Though the banks had suspended specie payments, yet, by one of those mysteries of the currency I never hope to see explained, their notes passed at full value, and were exchanged readily for coin—at least, in all such small transactions as come under a traveller's notice. There was, I have no doubt, much mercantile distress; and the shopkeepers, who depended on the sale of luxuries to the wealthy, were in a poor plight. But it is hard to believe that the poor expressed their regret to me that I should see their city under so dull an aspect. But I know that, on a bright winter day, when the whole population seemed to be driving out in sleighs to the great skating carnivals at the Central Park, I have seldom seen a brighter or a gayer-looking city than that of New York."—D'Icesy, Six months in the Federal States (London, 1863), I. 22-26.

"...nor was there a glimpse of the tenant of 23 William Street, known as the 'Coal Hole,' admission being obtained by paying the lessee an annual subscription. These Calls were attended only by persons not members of the 'Regular Board,' though all parties dealt together in the street. There was no organization, though, the sales on the Calls at the 'Coal Hole' were printed in the newspapers of the period as "Sales at the Public Stock Board."—Eames, N. Y. Stock Exchange, 42.

The old custom-house became the sub-treasury (see 1863).

In this year, Amos R. Eno erected a building for an evening stock exchange (where the Madison Square Theatre was afterwards built), on W. 24th St. adjoining the Fifth Avenue Hotel—Brown, II: 399; L. M. R. K., III: 983. See N. 39, 1865.

In this year, The Market Book, by De Voe, was published.
THE ICONOGRAPHY OF MANHATTAN ISLAND

For although the transformation is gradually wrought, it is always going on before the eye. Twenty years ago it was a street of three-story red brick houses. Now it is a highway of stone, and iron and marble buildings. The few older ones that remain and are individually remembered as among the best of their kind and time, are now not even quaint, but simply old-fashioned and uncomfortable.

At Bay, among all the costly and colossal buildings that have of late been erected few show any real taste or grace.

The fine architectural effects of some streets in Genoa, in Naples, in Rome, in Paris, in Berlin, in Venice, and other great foreign cities, are unknown in New York. There are some exceptions. Some of the new stores in Broadway are almost as imposing as some of the palaces in Italian cities. How the best are disfigured by the vulgar is a matter that would have the mayor of the city rendered responsible for the administration of city affairs.

"Inman responsibility would devolve, of course, upon Mr. Opdyke himself, but all parties repose confidence in both his integrity and ability, and we have no doubt that, under his rule, the city would see better days."—N. T. Herald, Jan 7, 1862. "The message of Mayor Opdyke . . . is brief, pointed, and business-like."—N. Y. Tribune, Jan 7, 1862.

Mayor Opdyke's message was referred "for suitable action," on Jan 13, to a "Select Committee" of five members. This committee rendered a report on F 14. They called the message "one of the most important, interesting, and valuable papers ever addressed to the legislative branches of the city government." However, the committee, holding a different political belief from the popular Mayor, especially in national matters, expressed its views thus: "Opposed in politics as were the great majority of our citizens to the party which brought into power the existing National Administration, they nevertheless cordially and with entire unanimity, placed at the disposal of the Government, in its darkest hour of trial, all the men and all the treasure which the mighty resources of the city could command. And from that time forward the city has been not only among the foremost, but the very foremost in its contributions of troops and money to sustain the National cause. For all these sacrifices and all these exertions, what is the return made by the authorities of the Federal Government? The immense sums which in excess of our due proportion we furnished in their extremity are unpaid. The fortification and defense of our harbor are neglected. But beyond and worse than this, with a rapacity and profligacy to which the history of this country is a stranger; the Cabinet at Washington has recklessly squandered the public moneys upon family relatives and political stipendiaries, and has employed our armies in the field and our navy more for the purpose of enriching contractors and speculators than for the achievement of victory over our enemies."—Proe. Bd. of Ald., LXXXV. 1862.

John Ericsson writes from New York to Assist Sec. of the Navy Fox: "In accordance with your request, I now submit for your approbation a name for the floating battery at Greenpoint. The impregnable and aggressive character of this structure will admonish the leader of the Southern Rebellion that the batteries on the banks of the river will no longer present barriers to the entrance of Union forces. The iron-clad intruder will thus prove a severe monitor to those leaders. But there are other leaders who will also be startled and admonished by the booming of the guns from the impregnable iron-batteries. 'Downing Street' will hardly view with indifference this last 'Yankee notion,' this monitor. To the Lords of the Admiralty the new craft will be a monitor, suggesting doubts as to the propriety of completing those four steel-clad ships at three and a half million apiece. On these and many similar grounds, I propose to name the new battery Monitor."—Church, Life of John Ericsson, I: 254-55 (footnote). The "Monitor" was launched on Jan. 30 (q. v.). See also Mr 3.

A fire starting in No. 43 Fulton St. destroys the Fulton Bank and nine other buildings on Pearl and Fulton Sts. The loss is more than $500,000.—N. Y. Times, Jan 27, 1862.

"Committee on Municipal and National Affairs"—of five members is named by the board of aldermen.—Proe. Bd. of Ald., LXXXV: 94.

The Ericsson battery or "Monitor" (see Ja 20) is launched at Greenpoint, L. I.—N. Y. Times, Jan 31, 1862.

Feb.

"Those who remember the Broadway of twenty years ago can—hardly walk the streets now without incessant wonder and surprise.
almost with impunity, visit and destroy this great commercial metropolis and emporium of the western hemisphere." To remove this "feeling of insecurity," it is believed that "at any sacrifice, and at every hazard, the defenses of the approaches to its environs, both by way of the Narrows and by Long Island Sound, should be so efficiently protected as to allay even the shadow of a doubt as to their impregnability." Further, it is "peculiarly the province of the Common Council of this city—the immediate representatives of all classes of its citizens, and the custodians of its varied and important interests—to take the initiative in a subject of such vital importance."

The resolution that follows calls for the passage of an ordinance "providing for the creation of a fund, to be called the 'Harbor Defense Fund of the city of New York,'" and the issuing of bonds therefor. The ordinance fixes $500,000 as the amount to be raised. A special committee of three is named to confer with the mayor and others "as to the advisability or actual necessity of taking such action."—Proc., Bd. of Ald., LXXXV: 356-60.

The board of aldermen adopts the ordinance considered at the meeting of March 21 (q.v.). The special committee that had reported in favour of such action; a communication to the board by Mayor Opydky, however, had recommended a memorial to the legislature first. He cites a section of the charter which "exclusively forbids the Common Council from borrowing money on the credit of the City for the prosecution of any enterprise or work, unless authorized by special act of the Legislature." Furthermore, he minimizes the "immediate danger apprehended," declaring it is "the opinion of the highest authorities" that the naval department has provided "ample means" for destroying the "Merrimac" if she "again ventures to come out," and that, if this reliance should fail, she could not reach New York Harbour, "as her construction is such as to incapacitate her for ocean navigation."

The board is influenced by the mayor's letter to this extent, viz., "to memorialize the Legislature . . . to legalize . . . the issue . . . to the amount of $500,000."—Proc., Bd. of Ald., LXXXVI: 391-75. The Tribune quotes Alderman Boode as taking exception to the mayor's statement that the "Merrimac" is unnecessarily. "He had the measurement, within a few inches, of the Merrimac, and he felt quite sure that she could easily reach New-York; that first she would visit the East River, and set fire to the city on either side, then visit the North River, and set us on fire on that side, and then bid us good-bye, and go elsewhere."—N. Y. Tribune, Mr 25, 1862.

The Chamber of Commerce makes an appeal to the liberality of banks, insurance companies, and capitalists in the city for a subscription of $100,000 to provide additional safeguards for the harbour.—Opydky, Official Desks, 111.

Lincoln writes an important letter to Horace Greeley, anticipating his Emancipation Proclamation, and suggesting gradual compensation for the freed slaves.—See illustration.

The forts in New York Harbour have been manned and supplied with shot and shell, with reference to the probability of the "Merrimac" escaping from Hampton Roads.—Leislle's Weekly, XIII: 310.

Apr. On this day and the next, the battle of Shiloh was fought, and resulted in a victory for the Union forces.—Rhodes, Hist. of U. S., III: 629-46.

The board of supervisors of New York County is authorised to borrow $1,000,000, for the erection of the new court-house (see D., Apr. 17, 1862). On Apr. 19, 1862, the board of supervisors authorised to borrow an additional $500,000 for the same purpose.—Ibid., (1864), chap. 248. The court-house was occupied in 1867 (q.v.).

Delmonico's new restaurant at Fifth Ave. and 14th St. (formerly the Moses H. Grinnell mansion—see 1861) is opened to the public. —N. Y. Times, Ap 7, 1862. See also L. M. R. K., III: 978. The building was torn down in 1879 (q.v., Mr 25).

The legislature passes "An Act to provide for the regulation and inspection of buildings, the more effectual prevention of fires, and the better preservation of life and property in the city of New York." This creates the "Department for the survey and inspection of buildings."—Laws of N. Y. (1862), chap. 336. On May 1, this law went into effect.—Ann. Rep., Supt. of Bldgs. (1862-1872), 4. James M. Macgregor was the first superintendent, and began in this year to make annual reports to the legislature. The city inspection was made from the Battery northward, block by block, and 6,577 buildings had been inspected by 1870, and a complete record made of their condition.—Ibid. (1870), 37.

...

June

liberty, and all the other virtues possessed by the great people
and Government of the Republic were misrepresented and per-
verted, and the judgment of foreign nations biased against it, by
the malignant tongue of rebellion, speaking through its agents and
emissaries accredited by the rebellious States at almost every Court
in Christendom, [if], did proceed to the same extent, as is believed in a semi-
occlusion, and by his eloquent advocacy of the cause of civil
and religious liberty, as guaranteed to all by the Constitution and
laws of the United States, and his earnest, devoted and patriotic,
yet intelligent, persuasive and convincing arguments in behalf of
the principles for which the free, liberal and enlightened Govern-
ment of the United States was contending against the most infa-
munous causes, and, at the same time, gigantic rebellion ever
recorded in the history of the world, rendered that Government
and the country an important, nay, almost invaluable service,
particularly at the Courts of France and Rome.—''N. T. Times,
Je 10, 11, and 17, 1862. The complimentary resolutions were for-
mally presented to Archbishop Hughes on Sept. 25.—Ibid., S 26,
1862. According the archbishop's mission, see Losing, Hist. of
N. Y. City, II: 735-736.

12.
The hansom cab "has been introduced in the Central Park,
in order to give the public an opportunity to test its merits, and
to determine its adaptation to the Park use. Citizens who have not
seen this cab may recognize it by its peculiar style and shape, and
the driver seated behind the passengers, instead of being in front
as in ordinary carriages."—''N. T. Times, Je 12, 1862.

The Mayor's Office has been very handsomely refurnished with
splendid heavy window-shades, elegant English Brussels carpets,
furniture covered with rich green plush, and the railing tastefully
fluted in blue damask. This improvement gives a fine rich tone to
the general appearance of the office. The Board of Aldermen's
room is ornamented with beautiful curtains and draperies, arranged
with excellent taste. The floor is covered with a brilliant velvet
carpet, while the bookcases are fluted with rich green silk. The
dogs and doormats are of a beautiful design, and the chairs are
upholstered with morocco. The rooms of the Clerk of the Board
are covered with Brussels carpet, and the desks with morocco. The
floor of the outside office is covered with heavy oil-cloth, with mats
and rugs. These improvements at the City Hall were much
needed.—''N. T. Times, Je 21, 1862.

25.
The seven days of battle around Richmond began. They ended
in the retreat of the Union forces and the total failure of McClellan's
Peninsula campaign.—Rhodes, Hist. of U. S., IV: 38-47. See Je 30.

26.
The corner-stone of a new French P. E. church is laid in 22d
St. between Fifth and Sixth Aves. The congregation woodenly
proceeded to the ceremony at the corner of Franklin and Church Sts.—
''N. T. Times, Je 27, 1862. The 22d St. property was the third site
of the Eglise du St. Esprit, and was occupied in 1865.—L. M.
R. K., III: 932. See, further, 1900.

There is a panic in Wall St. when news of McClellan's retreat
to the James River after the Peninsula campaign becomes known in
the North.—Rhodes, Hist. of the U. S., IV: 575, N. Y. Daily Tribune,
Jl 1, 1862.

July

Congress authorizes the construction of a continuous line of
railroad and telegraph from the Missouri River to the Pacific and
agrees to aid the enterprise by grants of land and the issue of
bonds. The Union Pacific R. Co., a new organization, is in-
corporated to build the eastern portion of the road; the Central
Pacific R. Co. is already incorporated, and are authorized to build
the western portion. The first transcontinental railroad is thus
inaugurated.—Laws of U. S., 37th cong., 2d sess., chap. 120. See F,
and D 3, 1862.

A Jewish synagogue at 514 Broadway, which had been re-
modelled for theatrical purposes, opens as Wood's Minstrel Hall.
It was successively the German Thalia Theatre (1866), Wood's
Theatre—continued (1867), Lowndes' (1867), Theatre Comique
(1867), partially destroyed by fire (1868); rebuilt and reopened
1869. It became Harrigan & Hart's in 1876; they closed here,
and the building was demolished, in 1881.—Brown's Hist. of the

There are these 12 places in New York for the reception and
care of wounded soldiers: 1st, the City Hospital; 2d, the Ladies
Hospital at Fifth and Bartlett streets, the Park-Barracks, the New
England Soldier's Relief Association, No. 194 Broadway, David's
Island, Beelose Island, Riker's Island, (not quite finished,) Gov-
eror's Island, the old Arsenal, (nearly completed,) Mother Jerome's
July Hospital, St. Luke's Hospital, and the Jews' Hospital."—''N. T.
Times, Jl 9, 1862. See also Ibid., Jl 14 and N 23, 1862.

A great Union mass meeting of about 50,000 people is held at
various stands in and about Union Square. Mayor Opydak, David
D. Field, Hon. Horace Greeley, Judge Chas. P. Daly, Peter Cooper, etc. make spirited addresses, and Pres.
Lincoln, Gov. Morgan, Sec. Seward, and others send letters of
endorsement. Resolutions are adopted pledging unlimited support
to the government, denouncing the rebellion, and urging a vigor-
ous war policy.—''N. T. Daily Tribune, Jl 16, 1862. See also Proc.
at the Mass Meeting of Loyal Citizens, on Union Square, etc., pub.
by cred. arrangements (1863). Published from the offices of The
New-York Commercial and Financial Chronicle.

The "New York Merchants' Exchange and News-room" has
just been opened "by a number of enterprising gentlemen in Fine-
street, a few doors east of William."—''N. T. Times, Jl 22,
1862.

The new Croton reservoir in Central Park (see Ag 30, 1862) is
nearly completed. It covers an area of 167 acres, is about a mile and
a half in circumference, has an average depth of 40 feet, and
will hold 1,125,880,145 gallons. It is built of brick and granite,
and has cost not far from $2,000,000.—Leslie's Weekly, XII: 275.
It was opened on Aug. 19 (q.v.).

All citizens who are liable to be drafted are prohibited, by Aug.
Secretary Stanton, from leaving their own states or the United
States, and are to be arrested by the peace officers, for all those who attempt
to evade military duty.—''N. T. Times, Ag 9, 1862. This
caused great excitement in New York on Aug. 9, when news of the
order was received.—Ibid., Ag 10, 1862.

Horace Greeley, through the N. T. Tribune, addresses a letter
to President Lincoln voicing the discouragement of the people at the
progress of the war. The letter appears under the caption
"The Prayer of Twenty Millions" and declares that a great pro-
portion of those who supported Lincoln's election "are sorely
disappointed and deeply pained by the policy you seem to be pursu-
ing with regard to the slaves of Rebels." The Confiscation Act,
which provides that all slaves from the South who come within the
Union lines shall be free, is not being enforced.

"Slavery is everywhere the inciting cause and sustaining base
of treason," Greeley says, and adds: "Had you, Sir, in your
Inaugural Address, unmistakably given notice that, in case the
Rebellion already commenced were persisted in, and your efforts to
preserve the Union and enforce the laws should be resisted by armed
force, you would recognize no loyal person as rightfully
held in Slavery by a traitor, we believe the Rebellion would there-
upon have received a staggering if not fatal blow..." Greeley
also complains that the officers of your department have been
repelled rather than invited the approach of slaves who would have gladly
taken the risks of escaping from their Rebel masters to our camps, bring-
ing intelligence often of inestimable value to the Union cause.

.. We complain that a large proportion of our regular Army
Officers, with many of the Volunteers, evince far more solicitude
to uphold Slavery than to put down the Rebellion.

"On the face of this wide earth, Mr. President, there is not
one disinterested, determined, intelligent champion of the Union
cause who does not feel that all attempts to put down the Rebellion
and at the same time uphold its inciting cause are preposterous and
futile—that the Rebellion, if crushed out tomorrow, would be
renewed within a year if Slavery were left in full vigor—that Army
officers, who renounced the war in order that they might live,
are but half-way loyal to the Union—that every hour of deference
to Slavery is an hour of added and deepened peril to the Union.

...—''N. T. Daily Tribune, Ag 20, 1862. See also Rhodes,
Hist. of U. S., IV: 72-73. See Ag 22.

The Croton water is introduced into the new reservoir in
Central Park (see Jl 26) before a large assembly. Addresses are
made by Mayor Opydak, Mynder Van Schaaik, and others.—
''N. Y. Daily Tribune, Ag 26, 1862. See also Croton Aqueduct

President Lincoln, replying to Horace Greeley's letter of Aug.
19 (p. 6), says: "If there be in it any statements or assumptions of
fact which I may be able to correct, I would be glad to do so, or
confer with them. If there be in it any inferences which I may
believe to be falsely drawn, I do not wish to now and here argue
against them. If there be perceptible in it an impatient and dictatorial

In response to a call by Mayor O'Dyke, a war meeting is held in City Hall Park to urge enlistments in the veteran volunteer regiments, in the new regiments called for, and in the Corcoran Brigade. About 20,000 people are present, and there is great enthusiasm at the meeting. Mayor O'Dyke, Gen. Corcoran, Gen. Walbridge, Gen. Wetmore, Col. Nugent, and others make addresses.—*N. Y. Times*, Apr. 28, 1862. The meeting had the desired effect in stimulating recruiting and donations of money.—*Ibid.*, Apr. 29, 1862.

The Union forces under Gen. Pope are defeated in the second battle of Bull Run.—*Rhodeis, Hist. of U. S., IV: 129-30.

Maj.-Gen. Philip Kearney, who was killed in battle on Sept. 1, is buried with military honors in Trinity churchyard. All the bells of the city tolled during the funeral, and business was suspended.—*N. Y. Times*, S 6 and 7, 1862.

The battle of Antietam is won by the Union forces under McClellan, Burnside, and Hooker. This furnished Lincoln the victory he was waiting for to issue his preliminary proclamation of emancipation. Bismarck is appointed president of the Prussian ministry. He remained the chief figure in the state until his resignation in 1890.—*Hazes, Europe since 1815, 250, 305.

The board of aldermen concur with the board of councilmen in the following preamble and resolutions: "Preamble, reciting that the time has arrived when the citizens of the city have a right to know for themselves the loyalty of every man whose salary is paid from the city treasury, and that there are serious rumors afloat in Sept. reference to some who hold office under the City Government, 26 entertaining views differing from the loyal citizens of New York, with resolutions that the head of each Department, and the chief of each Bureau, of our City Government, be directed to administer, or cause to be administered, forthwith, to each and every individual in their departments or bureaus, respectively, the oath of allegiance to support and sustain the Constitution of the United States, and any person, or persons, declining to subscribe to said oath, shall be promptly dismissed from whatever office or position he may hold in any department or bureau of our City Government; and that the provisions of the foregoing resolution shall apply to all persons whose salary is paid from the city treasury."—Proc., Bd. of Aldl, LXXXVII, 302-3.

The New York firemen serumrade Commander David Porter 27 at the St. Nicholas Hotel and hold a torchlight procession in his honour.—*N. Y. Times*, S 23, 1862.

The old Chatham Theatre (later Purdy's New National) has been demolished, and the site is covered by warehouses and stores.—*Leslie's Weekly*, X: 67; L. M. R. K., III: 983.

The former Mt. St. Vincent Academy buildings in Central Park are now in service as a soldiers' hospital under the name of St. Joseph's Hospital. "The institution is in charge of the Sisters of Charity, under the direction of the General Government. . . . The hospital is devoted mainly to those soldiers who have suffered amputation."—*N. Y. Times*, N 16, 1862.

The Sisters of Charity had given up the use of the buildings as an academy in 1857 (see *N. Y. Daily Times*, F 5, 1857) when the grounds were taken for Central Park, and had established themselves in the stone chateau called "Font Hill" (see Peterson, *Landmarks of N. Y., 122) which had been erected by Edwin Forrest in 1854 (see *N. T. Herald*, J 10, 1848) at Riverdale. They still occupy the. Mt. St. Vincent Academy, in Central Park, is shown in Franklin's *Manual view* of 1861 (see *Man. Com. Com., 1862, p. 672), and another of 1864 (see *Ibid., 1865, p. 196). For the later history of these buildings, see D 20, 1865; also *Fifth Ave. (pub. by the Fifth Ave. Bank, 1915), 67.

The Union forces under Burnside are disastrously defeated at Dec. Fredericksburg.—*Rhodeis, Hist. of U. S., IV: 192-98.

All the respectable book-sellers have increased the price of their books as a consequence of the high price of paper.—*Leslie's Weekly*, X: 182.

Gen. McClellan has purchased a fine house in 311 St., near Fifth Ave.—*Leslie's Weekly*, X: 215.

Central Park below 102d St. is practically finished, with the exception of the enclosing wall, the gates, the terrace, and about 100 acres of surface.—*Ann. Rep., Com'r's of Cent. Fk* (1863), 23; Photographs of the park in this year are shown on Pl. 149-b, vol. III. See J 4, 1864.

Of the 120 regiments which New York State raised and sent to the war in 1862, about 70 had their headquarters in New York City.—*Am. Ann. Cyclop.*, (1862), 658.

This year was organized "The Citizens' Association," an organization that had for its object "to undertake the task of regenerating our City Government."—Address of the Citizens' Association to the Public (1871). In April, 1864, a subcommittee known as the "Council of Hygiene and Public Health" was organized to undertake investigations suggested by the city's "alarmingly high death-rate." This council divided the city into 29 districts for the purpose of making a thorough investigation. A leading physician was appointed as sanitary inspector in each ward, and for nine months a complete and scientific inspection was made, including a description of the soil, the number and character of the buildings, the character of the streets and sewerage, the construction and condition of the tenement-houses, the sickness prevailing, the death rate, etc. The results of this investigation were published in a report of more than 360 pages, accompanied by a map made by Gen. Egbert L. Viele showing the nature of the soil throughout the city and the underground streams and water
THE ICONOGRAPHY OF MANHATTAN ISLAND

1861 courses—De Forest & Veiller, The Tenement House Problem, I: 92–94. The Viele map is reproduced at Pl. 155-b, Vol. III.

From 1861 to 1866 were published four volumes entitled The Old Merchants of N. Y. City, written by Jos. A. Scoville, under the supervision of "Walter Barrett."

The custom-house having been moved into the merchants' exchange (see 1862), the old custom-house building on the north-east corner of Wall and Nassau Sts. (see My 1, 1842) is now remodelled, under the supervision of Wm. A. Potter, and is occupied by the sub-treasury, which formerly occupied the old building of the U. S. Branch Bank.—Statutes at large, XII: 534, 740, XIII: 28; House Ex. Doc., 38th cong., 1st Sess., 1866; Hardenbrook, Financial N. Y., 254; L. M. R. K., III: 975; descrip. of Pl. 186, III: 848.

A bronze group, "Eagles and Prey," by Fratin Veitueili, is presented to the city by G. W. Burnham. It was placed west of the north end of the Mall in Central Park.—Cat. of Works of Art Belonging to the Mall.

In this year, Alfred Tallis issued a series of views entitled Tallis's New York Street Views, Showing A Correct View of All the Principal Stores in the City With The Name, Business, And Address Of The Most Prominent Merchants In Each Street, etc. There is a set in N. H. S. See also descrip. of Pl. 147, III: 719 (note).

In Valentine's Manual for 1861, were published the following views, of the "steamship "Cheltenham." (the first steamer), by Philip H. Carret of the U. S. S., 56; the Metropolitan police headquarters, in Mulberry St. near Bleeker St.; 715; the Clendening mansion, on 90th St., bet. Bloomingdale Road and Eighth Ave., 264; interior of Somerindye house (in which Louis Philippe taught school), 272 (side infra): the General Theological Seminary, bet. 20th and 21st Sts., Ninth and Tenth Aves., 258; Ladies Union Aid Soc., on W. 42nd St., east of Eighth Ave., 376; Perritt's mansion, on Bloomingdale Road, near Hudson River and 75th St. (known as Maj. Thompson's, in part of which Talleyrand lived), 175; the Somerindye estate, on Bloomingdale Road, near 75th St., 380; Paisley Place, in W. 17th St., bet. Sixth and Seventh Aves., 675; private residence of the late Mayor Tiemann's father, on the south side of 23rd St., bet. Fourth and Madison Aves., 682; junction of Canal and Wall streets, at centre, 72.

For view of Fulton Ferry, 1865, see ibid. (1864), 204.

For view of Vandewater St., cor. Franklin St., 1865, see ibid. (1864), 316.

For view of old house at Eleventh Ave. and 53rd St. (in 1805 the residence of Mr. McDannell), see ibid. (1864), 740.

In this year, Jean Joseph Etienne Lenoir, a Frenchmen, invented the automobile. "Some authorities credit Lenoir with having driven a vehicle about Paris, using his internal-combustion engine for motive power."—Sullivian, Our Times (1926), p. 479.

President Lincoln issues his Emancipation Proclamation, freeing the slaves in all the states and parts of states which are in rebellion, and, on the 23rd of Jan., 1861, the slaves in the District of Columbia, and the West Indies, and U. S. IV, 212–15. For his preliminary proclamation, see S 22, 1862.

The postage currency has been counterfeited with such great success that it is quite impossible for any except experts to detect the difference.—Leslie's Weekly, XV: 227.

Mayor O'Dwyer submits his second annual message to the board of aldermen. He congratulates it on the fact that business, which had suffered severely at the beginning of the war, has sensibly recovered in all departments. He estimates that the city has furnished 80,000 soldiers from the commencement of the war, and has contributed to the support of the same not less than $500,000,000. This heavy drain on the city's resources has produced "no apparent inconvenience or diminution of the capital employed in trade and commerce." He states "the net amount of the Corporation debt" as $15,095,665.55, "the aggregate value of taxable property" as $71,678,345, and "the amount of expenditures during the year, on city account," as $6,908,990,66.66 of which $609,760.82 was "in aid of soldiers' families" [see My 21, 1863] and for other extraordinary purposes. He urges retrenchment in expenditures, expressing his belief that "the burdens of the war . . . point to the propriety of a diminution, rather than an increase, of all of them; and especially desirable would be a careful revision of the list of employes in each department . . . with the view of diminishing the number in all cases where it may be found practicable without detriment to the public service." The mayor deprecates the absence of a "proper system of sewerage" in the city, applications to the common council "for the reconstruction of overburdened and defective sewers" being frequent. Therefore he recommends an appropriation of $5,000 for the employment of a competent engineer to make the necessary surveys and prepare plans. The mayor also shows how badly it works for the "Croton Aqueduct Department" to have charge of the paving of streets while the setting of curb and gutter belongs to the "Street Department," and recommends that the department first named have charge of all these matters. The trap-block or Belgian pavement had been adopted in all the recent city ordinances, and its durability, evenness, cleanliness, and safety for both horses and vehicles give it "great superiority over any other pavement that has been used." A year's experience, he says, confirms his views as to the defects in the present charter (see Ja 6, 1863) and suggests the propriety of a joint committee of the common council conferring with the mayor on charter revision. If a measure has their "joint assent," there would be no further need of its passage in the Legislature and the approval of the Governor. The mayor declares it is his "fixed purpose to neither ask nor accept a re-election."—Proc., Bd. of Ald., LXXIX: 11–46.

The negroes of New York hold a jubilee at Cooper Institute to celebrate the emancipation edict.—Leslie's Weekly, XV: 275.

For the purpose of building the West Washington Market, 20 the city acquired steamship "Duke of Gaul" and gave her to the City of Paris. In 1881 and 1882, the purchase of adjoining land completed the area required.—Prendergast, Record of Real Estate (1914), citing liber books of conveyances.

The upper stone step of the old city hall, in Wall St., which has been preserved as a relic since the demolition of that building, has now been placed by the commissioners of charity and correction in a wall of Bowery, near Hospital near its main entrance. It bears an appropriate inscription.—Leslie's Weekly, XV: 275.

The title of the "New York Stock and Exchange Board" is changed to the "New York Stock Exchange."—Eames, N. T. Stock Exchange, 41.

Work of the Central Pacific R. R. (see JI 1, 1862) is begun at Sacramento.—Railroad Communication with the Pacific, with an account of the Central Pacific R. R. (1867), 8. See D 3, 1865, and My 10, 1869.

The Union League Club is founded by prominent Republicans in order to aid the Union cause. It leased the Parish residence at 26 E. 17th St. and opened headquarters there on May 12.—Eve. Telegram, Mr 8, 1943; Bellow's, Hist. Sketch of the Union League Club (1879). See also L. M. R. K., III: 939; and descrip. of Pl. 176, III: 704. The club was incorporated in 1864 (p. 21 of T 18). For a sketch of its activities during the war, see pamphlet in N. Y. H. S., entitled Union League Club; Its Memories; Th's President's Address at the last meeting in the old clubhouse, on Union Square, March 26, 1868; and Fairfield, Clubs of N. Y. (1873), 166–83. See also Lossing, Hist. of N. Y. T. City, II: 728 et seq. A very rare view card of the Parish house, also Rhode Island, in the Goldsmith collection.—See catalogue, item 414, with reproduction.

This year is the time for the return of the 17-year locusts. They appeared last in the spring of 1846, and were very destructive to trees.—Leslie's Weekly, XV: 339. The locusts came in 1856 (q. v., JI 8).

Col. Robert Nugent, of the 69th Volunteers, is appointed Spring provost-marshal of the Southern District of New York State, which includes the cities of New York and Brooklyn. His special duty was to take charge of the draft which was about to be made.—Fry, N. Y. and the Conscription of 1863, 14–15.

The Enrollment Act, providing for the drafting of male citizens between the ages of 20 and 45 to suppress the rebellion, becomes law.—Laws of U. S., 37th cong., 3d sess., chap. 75. Dodd, Expansion and Conflict, 305.

A meeting is held at the Chamber of Commerce "to further, and bring to completion, the great Atlantic Telegraph enterprise." Mayor O'Dwyer is chosen chairman and John Austin Stevens, Jr., secretary. After addresses by Peter Cooper, Cyrus W. Field, Wm. E. Dodge, E. Cunard, and A. A. Low, it is unanimously resolved, "That the opinion of this meeting a cable can, in the present state of telegraph science, be laid between Newfoundland and Ireland with almost absolute certainty of success, and, when laid, will prove of the greatest benefit to the people of the two hemispheres, and also profitable to the shareholders; it is, therefore, recommended to the public to aid the undertaking." Several
CHRONOLOGY: THE CIVIL WAR: 1861-1865

1863

present also subscribe to the enterprise.—Proc. of a Meeting Called to Further the Enterprise of the Atlantic Telegraph (1863).

A meeting to support the Union cause is held at Cooper Institute.

Speeches are made by Gen. Prosper M. Wetmore, Rev. Dr. Hitchcock, James T. Brady, David Dudley Field, Judge Daly, John Van Buren, and others.—Loyal Meeting of the People of N. Y., to Support the Gov't (1863); N. Y. Times, Mr 7, 1863. See also Ap 11.

10 The British consulate and the ships in the harbour are gaily dressed with flags and bunting in honour of the marriage of the Prince of Wales to Princess Alexandra of Denmark. At 12 o'clock a salute of 21 guns is fired from the "Africa." In the evening, Mr. E. M. Archibald, British consul at New York, gave a dinner to celebrate the event.—N. Y. Times, Mr 11, 1863.

Apr.

The first issue of the Army and Navy Journal is published.—Losing, Hist. of N. Y. City, II: 754.

The legislature amends the city charter, lengthening the term of office of department heads from two years (see Ap 14, 1867) to four, and providing that "such heads of departments shall hereafter be appointed and removed from office only for the reasons in the manner now provided by law for the removal of the comptroller." The amendment in no way affects the Croton aqueduct board.—Laws of N. Y. (1865), chap. 68. Inasmuch as the removal of the comptroller is possible only "by the governor for cause" (see Ap 14, 1857), a degree of independence is secured for department heads that is deplored by Mayor Gunther (see Ja 4, 1864) and opposed as "unfriendly to the United States" (see OE 24 and N 14, 1864).

The legislature authorizes the city to acquire lands north of 170th St. for another reservoir in connection with the Croton water works and to borrow, by the creation of public stock, a sum not exceeding $200,000 to defray the expenses.—Laws of N. Y. (1865), chap. 93.

Mayor Opydke presides at a meeting held in the Academy of Music, in aid of the suffering poor of Ireland. Gen. McClellan and Archbishop Hughes are among the speakers. A committee to solicit subscriptions throughout the city is appointed.—N. Y. Times, Ap 8, 1863.

A grand mass meeting of the citizens of New York, "regardless of party affiliation," is held in Union Square. The object of the meeting is to "show the people who they are" and to "make the world know what the citizens of New York are."—Proc. of a Meeting Held in Union Square (1863).

Mayor Opydke estimates that New York City has contributed to the national treasury, since the opening of the war, at least $300,000,000.—Opydke, Official Docs., 252.

The common council passes a bill authorizing the Harlem R. R. Co. to build tracks along Broadway and Madison Ave.—N. Y. Times, Ap 22, 1863.

May

Gen. Stonewall Jackson surprises part of Hooker's army in the Wilderness and routs them. After his victory, however, he is fired upon by mistake by his own soldiers and mortally wounded. The next day, the Union troops were again defeated by Lee, in the battle of Chancellorville.—Rhodes, Hist. of U. S., IV: 260-65.

The legislature grants to nine men (named in the act) the privilege "to establish and maintain a ferry from the docks now known as Wilson or Mott's docks, at Mott Haven, in the county of Westchester to the foot of Tenth street, and also to Puck slip, for "Safe and skillful persons" must attend the same, and ferriage shall not exceed "seven cents for each and every passenger."—Laws of N. Y. (1867), chap. 499.

"The New York Board of Aldermen has decided that two stone piers be erected—one on the East river and another on the North river. . . . New York is behind every important commercial city in the world in the character of her wharves."—Leslie's Weekly, May 19.

Preparations are in progress at the different forts in New York Harbour for the reception of a great number of big guns, now on their way from Pittsburgh to this city.—Leslie's Weekly, XVI: 114.

The legislature passes "An Act providing for relief to the indigent families of volunteers and persons who may be ordered into the military service of the United States." In cities, the common council is constituted a "board of relief" with power to grant such relief.—Laws of N. Y. (1865), chap. 514.

The 200th anniversary of the birth of Wm. Bradford, the first New York printer, is celebrated under the auspices of the N. Y. Historical Society. During the day, special services are held in his honour in Trinity Church, and a new marble monument is erected over his grave in Trinity churchyard. In the evening there was a large meeting at Cooper Institute, where John Wm. Wallace of Philadelphia, one of Bradford's descendants, made the principal address.—Wallace, An Address at the Celebration by the N. Y. Hist. Soc. . . . of the 200th Birth Day of Wm. Wm. Bradford (1863); Leslie's Weekly, XVI: 162.

A Democratic mass convention is held in New York, which adopts resolutions declaring fealty to the Constitution and to the sovereignty of the states; that the dissolution of the Union is an act of sedition there is no power to coerce the states by military force; that the war is contrary to the Constitution and should be put an end to; that the dogma of unlimited submission to the executive branch of the government is unworthy an American citizen; that the banishment of C. L. Vallandigham is cowardly, inhuman, and despotic; and that hostilities should cease and a convention be called to determine the constitutionality of the differences between the contending sections.—Am. Ann. Cyclop. (1865), 659; N. Y. Daily News, Je 4, 1863.

The 71st Regiment starts on its third campaign at the front, this time in the vicinity of Harrisburg, Pa.—N. Y. Daily Tribune, Je 18, 1863. On account of the draft riots in New York (see Jl 13), it was recalled from the front, arriving on July 18. It remained on duty, detailed at its camp, the state arsenal, Harlem, and High Bridge, until mustered out of service on July 22.—Whittier, Hist. of the 71st Regt., 74-78.

The 8th Regiment for the third time is called into service, and leaves for the front.—Grand Opening of the New Army (1860), 22.

Mayor Opydke appoints Alderman Boole of the 21st Ward as city inspector, a previous appointment having been rejected by the common council; this selection is called "an innovation in the police laws of the city."—Bd. of Alds., XCI: 709-10, 751. The editor of the Tribune remarks: "His [Boole's] appointment is one that we could not have advised. . . . Boole has brains enough to know that he can do better in the long run by serving our City faithfully than by robbing her; and until he proves the contrary, we shall trust that he means to do the right thing. The sweepings and garbage of this city might be so disposed of as to half defray the cost of street-cleaning; and there is room for great improvements in machinery and transportation."—N. Y. Tribune, Je 25, 1863.

Mr. Boole tendered his resignation as alderman, but the board, instead of accepting the same, passed an extraordinary resolution permitting him "to participate in the deliberations . . . until the expiration of the term, but without the privilege of voting on any question."—Proc., Bd. of Alds., XC: 732, 760-61. Boole was a commanding figure in the board and became the candidate for mayor of the combined Tammany and Mozart Hall Democrats in the December election (see D 1). Horace Greeley characterized him at that time as a man of ability, but "the uniform accomplice, cat's-paw, convenience of jobbers and plunderers," the mayorality candidate of "the Ring," who wants "a Mayor of its own," because it is "inconvenient to have its jobs severally vetoed and their enormous encumbrance held up to general reprobation in Veto Messages." With a mayor of its own "the Ring shall gouge the city out of Hundred Thousand after Hundred Thousand by all manner of Lowther, West-Washington, Fort Gagevoort and Japanese jobs, while incurring far less odium than now."—N. Y. Times, N 37, 1863. Boole continued to hold office as city inspector despite the appeal of "The Citizens' Association" to Gov. Seymour to remove him (see Je 3, 1864), and despite Mayor Gunther's action in suspending him (see O 24, 1864). His incum-
hence ended only with the abolition of the office of city inspector by the legislature in 1866 (p. v., F. 26).

It is announced that Gov. Seymour is sending forward to New York and Brooklyn 19 regiments armed and equipped for field service, to take in repelling Lee's invasion of Maryland.—N. Y. Daily Tribune, Je 29, 1865.

Mr. Roebeck presents a petition to the house of commons "praying the House to enter into negotiations with the great Powers of Europe, with the object of recognising the independence of the Confederate States of America." Long debates were held on the subject, but no action was taken.—Harvard's Parl. Debates, Ch. 7, 1771-1841; Hist. CLXXII: 17, 175, 263, 660-77.

Mayor Opdyke telegraphs to Gov. Seymour that the military force in the city must be strengthened, and asks that Gen. Sandford be authorised to organize new regiments forthwith. This request was made in anticipation of disorder in connection with the draft which was soon to be put in operation.—Opdyke, Official Docns., 259. On the same day, Gov. Seymour took the necessary steps to raise 30 regiments in New York and Brooklyn.—N. Y. Daily Tribune, JI 2, 1865.

After a three days' battle, Lee's army is defeated at Gettysburg by the Union forces under Gen. Meade, and the Confederate invasion of the North is finally checked.—Rhodes, Hist. U. S., IV: 282-93. For the part played by New York troops in effecting the victory at Gettysburg, the Honors of the Empire State in the War of the Rebellion (1889), 93 et seq.

Vicksburg surrenders to Gen. Grant. For an account of the siege, see Rhodes, Hist. U. S., IV: 399-419.

The drawing for the draft begins, at the enrollment offices at Third Ave. and 46th St., and on Broadway near 28th St. No difficulty was experienced at either place on this day.—Am. Ann. Cyclop. (1867), 811-12.

The drawing began in the 23d Ward, in the third sub-division of the 9th Congressional District of New York, of which Capt. Charles E. Jenkins was provost-marshall. About 9 a.m., a large hollow wheel was placed on a platform within the railing. Soon afterwards Capt. Jenkins stepped upon the platform and in a clear voice read his instructions from the president of the United States and from Provost-Marshall Gen. Fry. At 9:45 a.m. George W. Southwick began to turn the wheel. After several turns, Charles H. Carpenter, blindfolded, put his arm into the box and drew out one of the little rolls on which the names of those liable to be drafted had been written. Capt'n Jenkins opened the ballot and read: William Jones, 46th St. near Tenth Ave. The crowd shouted: "Poor Jones," "Good for Jones," etc. The drawing went on well until 4 p.m., when it was an intermission of an hour at 12.—N. Y. Daily Tribune, JI 13, 1865.

A draft riot begins, at the provost-marshall's headquarters on the corner of Third Ave. and 46th St. (No. 677 Third Ave.), which is set on fire by the mob. Mayor George Opdyke thus describes it:

"The fire was started at the Mayor's office on the morning of the 13th, about 10 o'clock; I had been there not more than fifteen minutes before a messenger arrived stating that there was a serious riot in the upper part of the city; in about five minutes another messenger came, and said they were demolishing the Provost Marshall's office... that the police had been driven back, and Superintendant Kennedy was very seriously injured, and that they had set fire to the premises; thereafter I at once addressed a note to the President of the Police Commissioners, also to General Sandford, and another, soon after, to General Wool; General Sandford came over, and after some conversation on the defenseless condition of the city, in consequence of the regiments having been sent to Pennsylvania to repel the invasion [Lee's invasion—see JI 3], said he would do the best he could; we mutually agreed that it was best it should be done immediately, that the only way to put down the riot was to meet it in its inception with rigor, and to use no blank cartridges... Major-General Wool... ordered out what troops he had in the vicinity, and joined me in efforts to collect them from the adjoining country... we sent a messenger to the Governor of New Jersey, understanding that there were regiments at Newark; we sent to West Point to Utica, to Rochester, for a word for a regiment that had just passed through the city... All this time [during the day] the alarm was very general; hundreds came to me saying that their premises were threatened; having no force to protect them, I stated to them very frankly that we had not police and military to meet the rioters actually at work, and it was therefore impossible to defend premises only threatened... up to 8 or 10 o'clock that evening we had failed to get the State militia under arms to the extent of more than 700 or 800 men, and there was some uncertainty that it was again attack; no police were there to defend it... my wife and youngest son were driven out and made their escape through the back door into the basement of a neighbor's house; they got into a carriage, were chased by the mob, who shouted murder after them, and came down to where I was."—The Great Rebel Case Gen. Opdyke aga. Thirde Wkld (1865), 111-14.

During July 13, the residences of Abolitionists were attacked and burned, and negroes were subjected to brutal treatment, several being put to death. The coloured orphan asylum (see Ap 16, 1845, and D 29, 1842) was burned; the Tribune building was attacked; and the Hudson River and Harlem R. R. tracks were partially torn up. Many buildings were on fire, and only a heavy fall of rain at midnight prevented further destruction. The mob held the city from Union Square to Central Park. On the following day the rioting was even worse. Troops collected from West Point, the Navy Yard, and the forts in the harbour, and fighting occurred in Broadway, in Seventh, Eighth, Ninth, and Tenth Aves., and on the cross streets from 23rd to 32d St., and on 42d St. Only word from the government at Washington to send the draft in New York and Brooklyn, the announcement of which appeared in the newspapers, checked the riot, which lasted four days. About 1,000 were killed or wounded, and property estimated at $1,000,000 was destroyed.—Rhodes, IV: 211-28; The Metropolitan Police: Their Services During Riot Week, by David M. Barnes (1861); Harper's Mag., Jan., 1867; N. Y. Times, JI 14-18, 1863. See also N. Y. Times, The Draft Riots, 1863, and views and descriptions of riots, in Harper's Weekly, VII: 467, 484, 485, 494.

There were 233 children in the coloured orphan asylum when it was burned, and all their clothing, bedding, and the records of the society were destroyed. The children, under guard, were conducted to the almshouse on Blackwell's Island. The managers afterwards sold the grounds by the city's permission and bought a tract of land at Tenth Ave. where a new orphan asylum was laid in August, 1867 (p. v.),—Richmond, N. Y. State Institutions, 323; Man. Com. Coun. (1870), 762. The draft was resumed on Aug. 19, 1865 (p. v.).

The board of aldermen, in special session, passes an ordinance "to relieve the city of New York from unequal operation of subscription, and to encourage volunteers." It provides that the city shall "be held to the proper owners" the stock, which each drafted person from going into the service in case such person "shall be found to be unable to pay the said sum." A second provision is that the city, in case the drafted person "shall volunteer to serve for three years or the war," shall pay $500 "to such person or for the benefit of his family or relations." An appropriation of $3,500,000 was made to carry these provisions into effect. A further provision is that the corporation council shall take immediate steps to test the constitutionality of the "Draft Act."—Proc., Bd. of Ald., CCXI 80-83. See JI 18.

The board of aldermen at another special session adopts the following resolutions: Because of the report that it is Mayor Opdyke's intention to veto the ordinance of July 13 (p. v.), and because "the alarms created by the resistance to the draft in the city are not yet totally allayed," the members present pledge themselves to vote to override such a possible veto "after the expiration of the period of ten days, as required by the Charter."—Proc., Bd. of Ald., CXXI 88-89. See JI 27.

Mayor Opdyke returns to the aldermen their ordinance of July 15 (p. v.) with his veto. After declaring that the vague wording of the measure would lead to "infinite abuses," and that it violates "the 3rd section of the Charter," the mayor has the courage to say: "This [draft] act was passed on the 3d day of March of the present year. The ordinance before me was introduced and passed through both branches of the Common Council on the 15th
CHRONOLOGY: THE CIVIL WAR: 1861-1865

July 27
If there was anything in the act which called for action on your part, there was ample time after the 3d of March and before the 13th instant to prepare a careful plan, with all proper guards against fraud and abuse. It would seem, therefore, that it was not so much the assumed defects of the act of Congress as the existence of the riot which broke out in this city on the 13th instant [p. 4], which prompted the action of your Honorable Body. Your ordinance was introduced and adopted during the riot, and was calculated to interfere with and partially nullify the law against which the rioters' resistance was made.

"The money it proposes to appropriate was therefore, in effect, a price offered to a lawless mob to desist from further assaults upon the lives and property of our citizens." The mayor adds that "the character of the riot" was not such as to "induce the government of this city to adopt with unusual haste an ordinance not authorized by the charter." He maintains that "the rioters themselves were not, in general, persons liable to be drafted. A great proportion of them were persons under twenty years of age, and many were convicts, thieves, and abandoned characters—the scum of this great city and the baste importations from other cities. . . . It is impossible to believe that the riot was anything else than the outbreak of traitors who made the draft a pretext for their own crimes, and an occasion for inciting others to become criminals with them. . . . A riot is never to be propitiated, but a riot is never to be propitiated, but a riot is often made more difficult than it is effective, for the character of the causes that lead to it, real or seeming, is full of danger. For my own part I will have nothing to do with it but to employ whatever power I possess to aid in crushing it at all hazards."—Proc., Bd. of Ald., XCI: 92-105. Editor Greeley praises the message and says: "We trust that some one will, on the retirement of our present Mayor from office, collect and print in a volume his Views and Arguments, an unusual and remarkable work. . . ." (see George Opdyke, pub. in 1866). So vivid and truthful an exhibit of the corrupt and sordid influences that too generally sway Municipal legislation, but which have reached their acme in this city, has seldom or never been presented."—N. Y. Tribune, Jr 28, 1863.

On the other hand Mr. Bennett ridicules the "trash" the mayor has included in his message, declares that "incompetency is practically the public policy, and the public will hardly give him the credit of possessing sufficient brains to write the message referred to."—N. Y. Herald, Jr 29, 1863.

Friends of Mr. Opdyke, on Jan. 4, 1864, after his retirement from office, tendered him an impromptu reception; on that occasion the chairman declared there was one page in the Opdyke administration deserving "especially illumination," namely that which "instituted, in July last, the grand process of "incompetency," and its offer of "incompetency to the public will" hardly give him the credit of possessing sufficient brains to write the message referred to."—N. Y. Tribune, Jr 29, 1863.

The common council again (see Jl 23) passes an ordinance "making additional provision for the families of persons who may volunteer or be drafted." There is a provision for an appropriation of $5,000,000.—N. Y. Tribune, Ag 15, 1863; Proc., Bd. of Ald., XCI: 237. As before, the measure does not meet the mayor's approval. He says "the distribution of money by so large a committee as the Mayor, Controller, and whole Common Council (43 members), would be subject to abuse from want of responsibility on the part of those who offer, of which there is no substitute in this country; especially, and a savage brutality which will disgrace the byen, held high carnival in this dis honesh city."—Official Documents, Addresses, Etc., of George Opdyke, 362-68.

The common council again (see Jl 17) passes an ordinance "amending the provision for the families of persons who may volunteer or be drafted." There is a provision for an appropriation of $5,000,000.—N. Y. Tribune, Ag 15, 1863; Proc., Bd. of Ald., XCI: 237. As before, the measure does not meet the mayor's approval. He says "the distribution of money by so large a committee as the Mayor, Controller, and whole Common Council (43 members), would be subject to abuse from want of responsibility on the part of those who offer, of which there is no substitute in this country; especially, and a savage brutality which will disgrace the byen, held high carnival in this dis honesh city."—Official Documents, Addresses, Etc., of George Opdyke, 362-68.

The draft impels the county board of supervisors to legislation. A new ordinance is passed quite different from the one emanated from the common council (see Jl 15 and Ag 15). Inasmuch as it is "deemed necessary for the maintenance of public order and the security of its inhabitants" that the city should not lose the services of members of the fire department and of the police force, as well as members of the active militia force of the state in the city, it is provided that the city shall pay for a substitute in case any such member is drafted. Another provision concerns citizens other than those enumerated above who chance to be drafted; if they have dependent families in indigent circumstances limited pecuniary assistance shall be rendered by the city, but only after careful investigation by a committee of the board. In a case "of peculiar hardship," the committee would be authorized to pay the exemption fee for the head of the family. The ordinance carries with it authorization to borrow $1,000,000 to effect its execution.—Proc., County Bd. of Supervisors (July-Dec., 1863), 215-19. Mayor Opdyke approves the ordinance the same day.—Ibid, 221. Mr. Greeley's comment is: "The Common Council has been subjected to a flaky movement. Its conspiracy to defraud the government and defeat the draft is not only checked but checkmated. The Super- visors appear on the stage with a suddenness which is not more remarkable than the appearance of hopeful coulomb between the Mayor and the Common Council is ended by the complete triumph of the former, and the just vindication of the cause both of the Government and the People, which he represented."—N. Y. Tribune, Ag 29, 1863.

Under the caption "TWO MILLION DOLLARS LOAN OF THE CITY OF NEW YORK," the comptroller invites subscriptions. Such a loan is authorized by the board of supervisors and approved by the mayor in connection with "certain citizens . . . who have been or may hereafter be drafted" (see Ag 28).—N. Y. Herald, Ag 11, 1863.

The common council passes resolutions directing the street commissioner to remove the national troops guarding the public squares and parks of the city, and demanding that the United States pay damages to the city for injuries resulting from the presence of these troops. Mayor Opdyke vetoed these measures.—Opdyke, Official Doc., 284-85, 314, 314-15 N. Y. Tribune, S 7, 1863. The troops were removed almost immediately, and the federal authorities took steps to restore the property to its condition before their arrival.

The common council overrides the veto of Mayor Opdyke of the ordinance appropriating $5,000,000 "to equalize the Conscription Act" (see Ag 15).—Proc., Bd. of Ald., XCI: 496-92.

The corporation council, in answer to a resolution of inquiry (see Ag 31), communicates to the common council his opinion that "the Supervisors of the county of New York, in which there is no town, have not been vested with any power in regard to the granting of relief" (under chap. 54 of the laws of 1863) to persons who have been drafted. He is informed, he says, that "it is not at all under this law the Supervisors have taken action; but under what they consider the necessity of the case, and a firm conviction that the next Legislature will ratify these proceedings."—Proc., Bd. of Ald., XCI: 496-92.

An injunction from the supreme court is issued against the mayor, aldermen, and commonalty to restrain them from attempting to carry into effect "An ordinance making additional provision for the families of persons who may volunteer or are drafted into the service of the United States" (see S 7).—Proc., Bd. of Ald., XCI: 399-404. "This movement does not affect the $3,000,000 exemption ordinance passed by the Supervisors under the approval of the mayor and controller, and which has thus far been entirely successful in its application to the proper objects of an exemption measure—in exempting members of the Fire Department, New-York State National Guard, Policemen, and the
1910 THE ICONOGRAPHY OF MANHATTAN ISLAND

The common council has before it for consideration a memorial of John Randel, Jr., who, when a young man, in 1807 (Apr. 3), was appointed by the commissioners on city plan as chief engineer, and was responsible for the "Randel Map.

He proposed to reproduce those maps, at four times their original scale, "with the addition of his original field notes of the courses, distances, angles, etc., of fences bounding real estate, written down in their proper places."

The committee of arts and sciences emphatically comments the proposal, believing the city government should "perfect that which has been dismally begun by their predecessors more than fifty years ago, thereby furnishing to posterity a perfect map of the city." The "field notes," which Mr. Randel has copyrighted, "themselves are worth what he estimates will be the entire cost of the work," namely, $73,600, an expense that "will be spread over years of time" (seven years being Mr. Randel's estimate).

The committee also declares that the advantages of such a work "are almost beyond computation; interminable litigations would be avoided by making certain and beyond dispute what is now in doubt and uncertainty, and one of the most fruitful sources of the most bitter and worst contested law-suits. All litigation saves the time of the courts and the money of the city."

---Procs., Bd. of Ald., XCI: 116-20. However, the measure was defeated by the board. Make XCH: XCI: 258-30. The resolution was repassed over the mayor's veto by the aldermen on Oct. 16 (ibid., XCI: 172-73), and by the councilmen on Oct. 20 (N. Y. Tribune, O 21, 1861).

Mrs. Opdyke, in vetoing the resolution of the common council of Sept. 28, says he has "good reason to believe" the presence of the soldiers has saved us "from a repetition of the scenes of arson, pilage, and murder which characterized the riot in July last," (see Jl 13). He speaks of the damage as "comparatively trifling," and declares that the "good and orderly conduct" of the soldiers was "the high commendation from their superior officers and the citizens generally." (Official Documents, Addresses, Etc. of George Opdyke (1866), 319-21)

"There has been no result of the war so extraordinary, and so unlooked for, as its effect on the cities of the North. Those of you who remember—and who does not—the pathetic earnestness with which previous to the secession movement, our Pro-Southern Democrats warned us all that if the South left us, our towns would go to decay, the grass grow in our streets, and our ships rot at the wharves, must witness the actual condition of things with a good deal of amusement. One superstition, in particular, which was deeply rooted in the minds of the denizens of Tammany and Mozart Halls—that the hotels of the North were all kept up by Southern planters and 'merchants'—must, by this time, have received a tolerably severe blow. There has probably been hardly a Southern planter seen in the North for the last two years, or a Southern merchant, unless Hambleton, of blackmail fame, be entitled to that designation; and yet we believe the hotels are at present fairly patronized. There are few of them which do not turn away every day nearly as many guests as they receive. Even the New-York Hotel, the very headquarters of planthocracy, and which ought to be ashamed to survive the outbreak of the war, must have bravely upheld the honor of their customers as ever it did on the gold and silver of the South. The demand for houses, too, is unprecedented. There are none to rent, and few for sale, and the tide of population, nevertheless, continues to pour into one of our great towns with undiminished impetuosity."

---N. Y. Times, O 9, 1865.

CHRONOLOGY: THE CIVIL WAR: 1861-1865

1864

In this year, the Progress Club, a Jewish organization, was founded. It was incorporated in 1865. In March, 1865, it opened its club-house at the north-east corner of Fifth Ave. and 63d St.—King's Handbook (1893), 5511 L. M. R. K., III: 958. The club is now (1926) at 88th St. and Central Park West.

In 1864 and 1865, Robert Heller was giving his "Magical" exhibitions at No. 585 Broadway (originally Buckley's Hall)—Robert Heller. His Doings (Glasgow, 1873), 18-20. For the various names given to this playhouse, see L. M. R. K., III: 982. After traveling through the U.S. and Europe, Heller returned to New York in 1876 (p. v, N. 15).

During 1864-1873, the Citizen, a literary journal, was published.—North, 118.

The Eighth Ave. horse-car line had been carried by this time as far north as 86th St. by 1867 it had reached Harlem.—Annals of New York, 125.

In the Eighth Annual Report of the Board of Commissioners of the Central Park (1864), pp. 45-46, a "Central Park Guide," with map, was first published, in which the various gates were designated as the "Scholar's Gate," "Merchants' Gate," "Artizans' Gate," etc. This designation was continued in some of the later reports, and then discontinued.

A view of Central Park, drawn by H. Geisler and lithographed by Henry C. Eno, dates from this year; it is reproduced as Pl. 151, Vol. III.

About this time, a Lithograph of Printing House Square was made by Endicott & Co. and published by Baker & Godwin. It is reproduced and described as Pl. 152-b, Vol. III.

In Valentine's Manual for 1864, were published the following maps of New York City: County and vicinity, frontispiece old Half Way House, at junction of Broadway, Eighth Ave. and 96th St., 49th terrace, Central Park, 715 old house, cor. Houston and Cannon Sts., formerly part of Delancy estate, 128 old shanties, cor. Ludlow and Delancy Sts., 160; the N. Y. State soldiers' depot, at 59-52 Howard St. (5 views), 164, 166 (61a), 168, 170; former residence of John Jay Astor at 88th St. near East River (with the note "Irving wrote Astoria"), 208; Union home and school for soldiers' children, on 58th St., near Eighth Ave., 352; the Varian tree in Broadway, bet. 26th and 27th Sts.; 552; the Fifth Ward Museum Hotel, cor. W. Broadway and Franklin St., 598; the public room in this hotel, 602; residence of John Edwards, west side of Greene St. near Spring St., 666; and old frame houses at cor. of Water and Jackson Sts., 793.

Mayor Gunther sends his first annual message to the common council. He deems the machinery of the city government "vast and intricate," and finds no adequate means under his control to "check the grossest irregularities, or secure an adequate protection to health, comfort, and property." The subdivision of functions, he says, and the "severance of the tie of responsibility among the parts, has naturally led to extravagance and the multiplication of offices. Bodies, independent of control in their power to draw and expend money from the city treasury, will seldom hesitate to exercise the same without regard to the maxims of frugality, and will usually provide for their personal and political friends to the utmost extent of public forbearance." He is sure clerical aid in the city offices could be "employed to better advantage"! The aid required "in a single city Department will nearly suffice to perform the heaviest in the hands of all, in addition to its own functions."

The mayor advocates the removal of slaughter-houses entirely from the island, "as its entire area must before many years be required for dwellings, when, if not now, the Abattoirs will be regarded as nuisances." He is also concerned about the congestion of traffic, which has been increased by the recent introduction of "heavy truck engines by two horses," and recommends a revision of the ordinances "relative to the licensing of vehicles," a limit to be fixed to "the size of trucks," the investigation of "the prices charged by all carriers, including expressmen," and that policemen detailed as inspectors "see that hacks and coaches contain the tariff of fares in view of the passengers."

Mayor Opdyke's recommendation to sell the markets, ferries, wharves, piers, and slips, and therewith pay off a large part of the city debt does not appeal to the new mayor. The fact that the income from these sources is "disproportionately small," he says, "shows defects in the present mode of management, but does by no means demonstrate the expediency of giving into private hands the ownerships and control over this valuable, though perhaps much mismanaged, public property."

The mayor assumes a pessimistic tone when he says: "More than twenty years ago one of my predecessors complained of the encroachments of the State Government. There is left so little to encroach on, that some might consider it advantageous to abolish altogether the city government and transfer the seat of administration to Albany. It is there that the appropriations are finally determined, the tenure of office fixed, and the question decided who shall and who shall not live upon the proceeds of city taxation. The Mayor is in theory intrusted with a supervision over the Executive Departments, but that supervisory action which is exerted over officers completely independent is a nullity. . . . The Mayor may call on the Departments to report to him their acts, but they may do so or not at their pleasure. He may enter his protest against the legislative acts of the Common Council or the Supervisors, but the present system will probably bear the bills for printing his objections in the newspapers." (The repeated passage of ordinances over Mayor Opdyke's veto is undoubtedly the basis for the last statement.) The mayor concludes: "To combat corruption and fraud, and prevent by my influence, and in every honorable way, a continuance of those abuses which have been perpetrated on the rights and patience of the public, will he may consider an end of his term."

Most of the mayor's recommendations appeal to Mr. Greeley as "judicious and well-timed," particularly does he like the "idea of removing the Abattoirs or slaughtering establishments entirely from this island."

Mayor Opdyke does not concur with the former incumbent regarding the sale of the markets, etc., asserting that "our Markets are tumble-down abominations that at once tax and shame us; because they belong to the municipality and are managed by office-holders." The chief market business, he says, "is done at the Washington—a square acre or so of shanties and hovels that would disgrace Abney or Timbucto. We ought to have a lofty, magnificent, cleanly commodious chief market; we should have if the City would sell out and let the Market business regulate itself."—N. Y. Tribune, Ja 5, 1864.

Central Park between 106th and 110th Sts. (see Ap 2, 1859) is being improved.—Communication from Mayor Gunther to the common council, Ja 4, 1864. See Ap 23.

Roosevelt Hospital, founded under the will of James H. Roosevelt, is incorporated.—Laws of N. T. (1864), chap. 4. See O 29, 1860.

Among the curiosities, relics, etc., belonging to the estate of Thos. Riley, deceased, sold at auction at the "Fifth Ward Museum Hotel," is "the trunk of the Marble Statue of William Pitt, which formerly stood at the intersection of William and Wall Sts."—From printed broadside of A. J. Bleecker, Son & Co., at the N. Y. H. S. See Mr 11.

Committees of citizens and cartmen send a memorial to the legislature asking that there be no further extension of railroads in the city until a commission shall be appointed to inquire into the state of transit facilities, and protect the residential streets from the further encroachment of car lines. There were at the time eight railroads in the city, three of them with steam-power and the rest operated by horse-power.—Memorial in Relation to Railroads in the City of N. Y. 1770, at the intersection of Wall and William Streets. It was mutilated by the British Soldiers, soon after their occupation of the City in 1776.

Jos. Wilton, Sculptor.

May 18

1912

THE ICONOGRAPHY OF MANHATTAN ISLAND

1864. The Metropolitan Railway Co., projected by Hugh B. Wilson, Mar.
is incorporated under the Railroad Act of 1850. A few days later, 21
a bill was introduced in the state senate to give this company the
right to build an underground railroad in Broadway from the
Battery to 34th St. and then under Sixth Avenue to Central Park.
This project, apparently the first suggestion for a subway in the
city, was reported unfavourably by the senate committee on April
8, and such report was adopted.—Walker, Fifty Years of Rapid
Transport, 10–13; Plans & Proposals of the Manhattan Ry. Co. 24
(1866), 31; Leslie's Weekly, XVIII: 54. For comment on this, see
Apr. 11.

The Metropolitan Fair, in aid of the U. S. sanitary commission,
4 opens, with elaborate ceremonies, in the 2nd Regiment armory on
West 14th St. and in another building on the north side of Union
Square. It netted over $1,000,000.—N. Y. Times, Apr 4 and 5,
1864; Spirit of the Fair (N. Y., 1864); A Record of the Met. Fair
(1867); Leslie's Weekly, XVIII: 49. See also views in Harper's

Mrs. Van Rensselaer says: "Out of the Sanitary Commission
21 grew the profession of nursing as America knows it to-day.
The first trained-nurse in New York and probably in the entire
country, was a member of Manhattan's aristocracy, Euphemia

The report of the Underground Railroad in the Legislature
[see Mr 21], coupled as it was with the rejection of Mayor Gunther's
proposal to compel the street Railroads to pay 10 percent of
their receipts to the city treasury, is a fresh and alarming illustration
of the powerful over our property and comfort which is now
wielded by the omnibus proprietors, railroad corporations and
political leaders. The Legislature on which we have been labed
habit of trampling seems to have surrendered itself completely to
their hands.

"The Underground Railroad promised to be an immense boon
to the city. It was perfectly feasible; a similar road has been in
successful operation in London for one year; it encroaches on no
vested interest; takes no one's hand or house; interferes with no
taxpaying classes; offers cheap and speedy transit from one end of
the island to the other; requires no money from the public, will add nothing to municipal taxation and is
undertaken by men of the highest character and standing both
social and commercial. In short, there is not a single objection to
be made to it on the part of the public or the Government, and yet
the Committee of the Senate has reported against it, under the
lead of a Senator from this city and, as it has been laid on the table, for
what reason is not stated. We wonder how much longer the
people of this city will permit themselves to be thus plundered by
men who are ostensively their servants and dependents."—N. Y.
Times, Apr 11, 1864; Walker, Fifty Years of Rapid Transport, 13–14.

See Apr 7, 1864.

A "Map of Kip's bay farm" is published bearing this date:
"May 24th 1745.

The legislature annexes Manhattan Square (bounded by Eighth
and Ninth Aven., 77th and 81st Sts.) to Central Park, and provides
for a botanical or zoological garden either there or on any other
part of the Central Park.—Laws of N. Y. (1864), chap. 111. It was
not used for this purpose, and in 1874 (g. w., Je 2) the American
Museum of Natural History was built there, and opened in 1877
(g. w., D 2).

The legislature appoints the mayor, comptroller, street com-
missioner, and president of the Croton Board to be commissioners
for Attending a new public market on Ave. between 16th and 17th
Sts., and authorizes the appropriation of $100,000 therefore.—Laws
of N. Y. (1864), chap. 336.

The foundation-stone of the Central Park statue of Shakespeare
is laid, in the 300th anniversary of his birth; the occasion is cele-
brated also in the theater.—Brown, Hist. of the N. Y. Stage, II:
149. The statue, by J. Q. A. Ward, stands at the south entrance to
the park. (Thornton's "Weeks of Art" Belonging to the City, 168. It
was unveiled on May 25, 1872 (g. w.).

May

The Journal of Commerce and the World are suppressed by
order of Pres. Lincoln, and their editors are ordered arrested.
The two papers printed a bogus presidential proclamation intimating
that Union affairs were in a desperate state and calling for 500,000

more troops. The Herald printed it in part of its edition, but
suppressed it on finding it a forgery. When the authors of the
proclamation, Joseph Howard and F. A. Mallison, were discovered
and arrested, they were not tried. We may now pay $100,000 annually for clearing
Post, My 18–22, 1864; N. Y. Times, My 19–22, 24, Je 14 and 20,
1864.

"The Citizens' Association" (see 1863) applies to Gov. Sey-
mour to remove City Inspector Boole. R. B. Roosevelt, secretary
of the association, argues that $18,000 has been expended unneces-
sarily to dispose of the city's ashes and garbage during the past
year, so offer of a respectable citizen to do it "free of cost" having
been rejected; that Mr. Boole employed, in the months prior to the
charter election in which he was a mayoralty candidate (see D 1,
1863), 250 men to do the work 10 men had done before, 150 of
whom were dismissed after the election; and also that 45 of the
money now on the payroll "draw their pay, but perform no other
service for the city." The "new system of street cleaning" pro-
duced by Mr. Boole is thus graphically described: "First comes a
notice distributor, then a bell ringer, then the cart, then another
bell ringer, then another cart, and then a special inspector to watch
the two carts. They march down to the dumping grounds, and
there they find, or probably don't find, an inspector and assistant
inspector, and probably a special assistant, who keeps a liquor store
nearby, and has a direct influence. Thus we have nine or ten men
to the two carts, and this is the present admirable system of spend-
ing the people's money."

Another speech in support of the charges against the city
inspector is made by Thomas N. Carr, who was a subordinate
officer in the department during the first months of Mr. Boole's term.
He states that Mr. Boole's affidavit and the last affidavit sent in by Boole are perjuries and frauds," that "not a
disinterested person has ventured his reputation in behalf of the
delinquent official." "First came members of the Board of Alder-
men to save the City Inspector was to save themselves. Between
the members of the Board of Aldermen and the heads of the several
departments, there exists the strongest fraternal feeling. These
men are places to be given to the Inspector's Board. . . . It was by
bargain that the present City Inspector obtained his place (see Je
22, 1863). It was bargain that enabled him to fill his department with useless employees, with salaries from $500 to $2,750. It was bargain that gave to the Board . . . the patronage of that department, and these mutual and pecuniary obligations make it not only a neces-
sity, but an act of self-preservation with that body to pronounce,
一直 innocent, a man whose guilt is too clearly established by the
mass of evidence. . . . Our Aldermen call themselves the representa-
tives of the people, and guardians of the public, but, as a general
rule, they only represent a system that seeks for its own
enrichment, and they are the public guardians only over the
plunder from which they extract a share. In place of these men,
came street-sweeping contractors, cash and dirt freighters,
who, with the City Inspector, are engaged in operating upon the
treasury.—Citizens' Association of New York, Miscellaneous
Publications, Vol. I.

Under the caption "The Auger Enterprise," Mr. Greeley writes:
"The Citizens' Association have resolved absolutely, with good
prospect of future attainment, those immeasurable civic abuses
about which there has been so much writing and thinking and
frettmg for so many years. . . . For years we have suffered City
Hall swindling and street smells, and we all said, If these men or
those men, if men of property and standing, would only come for-
ward and inaugurate a reform we should no longer suffer under
these vices and reproaches. Unfortunately, the men did not
come forward. Fortunately, the evil at length reached such a
height that honest men, who wish to live in New-York and to
invest their money here, have been forced to make their influence felt. . . .
They not only seek to diminish taxation, but a frightful waste of
human life. They would renovate not only the Municipal offices,
but thousands of homes which are full of squallor and disease and
wretchedness. . . . We pay nearly $20,000,000 annually for clean-
ing the streets, and as our noses, and our lungs, and our grave-
yards testify, they are not cleaned, but left to be trodden in dis-
comfort by thousands and tens of thousands all walking to most
untimely tombs. . . . People say that the City is too unequal ever to be made clean. The Citizens' Association say it is not."—
A special committee to investigate charges against school trustees in the Fourth Ward makes its report to the board of education.

It has been found that "early in the present year a perfect system was inaugurated by a majority of the Trustees of the Ward to extort money from School Teachers and others in their employ. This "ring" took advantage of the erection of a new school building in the ward to sell the teaching positions therein to the highest bidders," the amounts paid "varying from $50 to $600, according to the position sought." The principal appointed to the new school was the clerk of the "ring" and performed his duty "with alacrity and with a heartlessness worthy of the employers." This system, declares the committee, "brings lasting injury and disgrace on our school system and our city, and particularly on the citizens of the Fourth Ward, whose children are suffering through the gross mismanagement of these corrupt public servants, who have violated their oath of office and the common feelings of humanity." Resolutions are recommended removing from office seven trustees, as well as the principal and four other teachers, these latter having acted "in a manner disreputably and discreditably to themselves as well as to their profession of Education," and appointing a board of education and ex oficio a trustee of the fourth ward, is recommended to be stricken from the rolls. The report of the committee is adopted unanimously.—Jour. Bd. of Ed. (1864), 165-70.

The common council recommends that the city commissioner be authorized to advertise for proposals for a new 10,000 lbs. fire-alarm bell for the tower in Mount Morris Square, the contractor to take the old bell in part payment (see F 3, 1875; Ap 25, 1860).—Proc., App'd by Mayor, XXXIX: 289.

The fire-tower is one of the last relics of the old Volunteer Fire Department; the bell was rung every night at eight up to recent years, and this practice was resumed in 1905.—Kelley, Hist. Guide to the City of N. Y. (1909), 147.

The 200th anniversary of the "surrender of this city and its surrounding province to the English by the Dutch" is celebrated at Brooklyn Institute.—Leslie's Weekly, XII: 83.

The battle of Cedar Creek is changed from a Confederate to a Union victory by Sheridan's ride from Winchester and his rally of the troops.—Rhode, Hist. of U. S., IV: 356-37.

Mayor Gunther transmits to the common council copies of affidavit substantiating charges that certain offices in the department of City Inspector Boole (see Je 22, 1863) were "put up for sale" and actually purchased for sums varying from one hundred and fifty to two hundred dollars each.—Proc., Bd. of Alds., XCVI: 118-19. The city inspector made answer on Oct. 24 (g.v.).

City Inspector Boole, in a letter to the board of aldermen, declares the mayor's charges against him "ridiculous," and says that officer is "actuated by a cowardly and contemptible vindictiveness" towards him. He denies him "to prove one iota reflecting upon the honesty and efficiency with which the affairs of this Department have been conducted."

At the same meeting of the board a communication is received from the mayor suspending from office the city inspector. Nine reasons are given including the following:

1. Mr. Boole has caused a loss to the city of about $18,500 in neglecting to accept or bring before the common council a written proposal "to remove free of cost to the city its dirt, ashes, and garbage."

2. The names of 88 persons are found on the payrolls of his department who either "had no existence or could not be satisfactorily identified by Mr. Boole."

3. During the first year of Mr. Boole's administration he has expended about $80,000 "for work that under his immediate predecessor" cost but $44,000.

Mr. Boole's power with the board is so great that that body immediately questions the mayor's power to suspend and requests an opinion from the corporation counsel.—Proc., Bd. of Alds., XCVI: 128-30, 135-38. Mr. Bennett comments: "Gunther raises a awful dust in the Inspector's department; Boole raises a dust in the streets; but refuses to take up the gauntlet which the Mayor has thrown down. Boole in short refuses to be moved under any provocation; but Gunther attempts to move him out of office by an order of suspension, which the City Inspector takes no notice of, and continues to sweep the streets indefatigably, paying far more attention to the dirt than to the Mayor."—N. Y. Herald, O 25, 1864. See N 14.
1864

Wm. H. Seward, secretary of state, informs Mayor Gunther Nov. that he has information from the British provinces that a conspir-acy is afoot to fire the public buildings of the city. The city council of the night of election day.—Am. Ann. Cyclop. (1864), 584. See N 4 and 25.

1865

In this year, the Fenian movement to achieve the establishment of the republic of Ireland became prominent in Ireland and America.—Hazen, Europe since 1815, 470-71.

In this year, 100,372 immigrants arrived at the port of New York.—Arrivals of Alien Passengers & Immigrants (1861), table 7. Cf. Leslie's Weekly, XXII: 270.

1864

Maj.-Gen. Butler arrives from Fortress Monroe and takes command of New York City. On the Monday preceding the election, 7,000 soldiers arrived under command of Maj. Hawley. On election day they were placed on steamers which were stationed at various places opposite the Battery and in the North and East Rivers. They were then called on Tuesday, Wednesday, and Thursday, and could be marched to any point in the city within half an hour.—Am. Ann. Cyclop. (1864), 584.

1864

Abraham Lincoln and Andrew Johnson, the Republican candidates, are elected president and vice-president, defeating George B. McClellan and George H. Pendleton, Democrats.—Rhodes, Hist. of U. S., IV: 538-39. McKee, Nation, Conventions and Platforms, 121-70.

14

The corporation counsel communicates to the board of aldermen his opinion that neither the mayor nor the common council has the power "to suspend a head of department" (see O 24).—Proc., Bd. of Ald., XCVI: 187-90. So City Inspector Boole remained in office until March 14, 1864, to get the new chief executive, Gov. Fenton, to remove him, but the end was secured only by a charter amendment abolishing the city inspector's office, Feb. 26, 1866 (q.v.). Despite the protest of the Citizens' Association (ibid., CI: 155) the common council reimbursed Boole (see F 12, 1866) "for legal disbursements" in his defense "of charges against him as City Inspector."—Ibid., CI: 155.

15

An editorial in the Herald speaks disparagingly of "the persons now seeking nominations for the offices of Aldermen and Councilmen," declaring that we could "improve our city government by importing nine first class burglars from Sing Sing to fill the vacant seats in the Board of Aldermen, together with twenty-four common pickpockets from the same institution to act as our high and mighty Board of Councilmen for the next year." The candidates include "notorious baggage smashers, bounty jumpers, fighting men, shysters, pocketbook droppers, gamblers, fancy men, policy dealers, losers, bounty swindlers, watch stuffers, and vagabonds generally." The editor thinks "a respectable, non-partisan commission, to be appointed by the State for the government of this metropolis," might be a "decided improvement on the present system, under which we have been so long plundered and disgraced."—N. T. Herald, N 15, 1864.

16

Gen. Sherman begins his march to the sea.—Rhodes, Hist. of U. S., V: 16 et seq.

25

An attempt to burn New York City is made by Confederate agents. Several hotels and places of amusement were set on fire, but in each case the blaze was quickly put out.—Am. Ann. Cyclop. (1864), 399. See also U.S., Congress, Senate, H. R. 137, "Bailout for Liverers of the Draft: and Rapid Transit, The Archd. Suspended Railway, &c. (pamphlet in the N. Y. P. L.), 1865f. Cf. Pl. 153-a and A. P. 278-b, Vol. III.

Plans and estimates for a bridge between New York and Brook-lyn are prepared by Wm. C. Kingley.—Green, Complete Hist. of N. Y. and Brooklyn Bridge (1883). See My 24, 1883.

Riverside Park is first proposed, in a pamphlet by William R. Martin. For a full description of its grounds and historic associa-tions, see Mag., of Am. Hist. (1885), XIV: 242, passim. See, further, L. M. R., III: 971, and Ap 24, 1867.

A list of 23 buildings commenced in this year, with their loca-tions, dates of completion, names of owners, and costs is given in the N. Y. Times, My 17, 1867.

In Valentine's Manual for 1867 were published the following maps and views: map of N. Y. and vicinity, in 1865; Emigrants' Hospital, Ward's Island (wood-cut), 72; terminus of main drive in Central Park at 110th St., showing old bastion and St. Vincent's Convent (Soldier's Home, 1864), 1961; old house, 7 Peck Slip (former home of D. T. Valentine), 204; Fort Fish on the north side of Central Park, 220; Audubon estate on the banks of the Hudson, 1865 (wood-cut of 1863); 226; Harlem Lane, from Central Park to Manhattanville, 228; Mr. (Rebek. K. or Wm. J.) Stewart's house on West 54th St., bet. Broadway and Seventh Ave., 209; old Dutch farmhouse, S. Seven Ave. and 50th St., 341; house in which Schuyler Collax was born (86 North Moore St.), 413; "Croton Cottage," 225th Ave. and 40th St., 455; 230; the Great and the, houses, in which John Louis, 33rd St., 543; house, foot of the city would be ready to take the office at its increased salary." Dec.

—N. T. Herald, D 24, 1864.

In this year, the board of aldermen approve a resolution of the board of councilmen voting the "Freedom and hospitals of the City of New York" to Vice-Admiral David G. Farragut and Capt. Percival Drayton, who are at present in the city.—N. Y. H. S. Collections (1885), 442. Farragut had previously been voted the freedom on Aug. 17, 1865 (q.v.).

The common council grants a petition of the Church of the Re-deemer, at Yorkshire, for permission to occupy, as a site for a church, during the pleasure of this board, the 12 lots of ground at the south-west corner of 82d St. and Fourth Ave.—Man. Com. Coun. (1870), 762-63. The church was occupying this ground in 1870, but no lease had been executed.—Ibid.
CHRONOLOGY: THE CIVIL WAR: 1861-1865

1865

"The new frame building in the Park, to be employed for the enrollment of soldiers of the State of New York, has accommodation for 1,000 clerks. It was designed and built in six days, painting included."—Leisure's Weekly, XIX: 243.

Mayor Gunther communicates to the common council his annual message. At the outset he expresses his conviction that the city government is "fundamentally defective," observing that "the functions and importance of the Common Council have been year by year abridged and diminished." As one prominent cause for this he cites the common council's bicameral arrangement and advocates a single board instead. He declares it to be "notorious that combinations have existed for years in our legislative bodies in this city, for the most Shameful and mercenary ends that selfishness could prompt or corruption carry out," the only remedy for which is an "absolute veto" of the executive. Then again, the power of removal properly belongs in the hands of an officer on the spot [cf. Editor Bennett's suggestion of Dec. 24, 1864] rather than in those of the Governor, whose varied duties can scarcely enable him to give timely attention to charges of corruption, negligence or mismanagement.

Later in his message the mayor calls attention to the "increasing number of large one and two horse trucks, which under the present regulation, only pay the same amount as carts;" a "judicious system of rules and license fees" is necessary. The mayor deprecates the "puerile jealousy" that exists in reference to the police; he would have the neighborhood perform all duties of health wardens, inspectors of meats, and similar functions, which they would discharge more efficiently than the present officials, and save the city a great and very needless expense." Another way to diminish expense that he recommends is to hold the charter election at the same time as the general election, declaring: "If the object of the separation is to exclude local matters from the influence of State and national politics, it is a most invidious one. Peace, Bd. of Ald., XVII: 30-50. The message receives scant praise from either the Tribune or Herald. Mr. Bennett takes the opportunity to reiterate his suggestion of Dec. 24, 1864 (q.v.) as to how to improve the city's government, without calling attention, however, to the striking similarity between Mayor Gunther's plan and his own. Mr. Gleeley is confident the charter needs amendment. This appears to be the general sentiment. The Mayor's message has been printed, and the Board will agree . . . that it is fortunate, at this moment, that no more power is lodged in their hands."—N. Y. Herald, Ja 10, 1865; N. Y. Tribune, same date.

The N. Y. State senate appoints a committee to investigate the following departments in the city of New York: tax commissioners' department, city inspector's department, street department, comptroller's department, Croton aqueduct department, and surrogate's office; also, to examine the past proceedings of the board of supervisors of the county of New York. The investigation began Jan. 26 (q.v.)—Senate Journ. (1865), 39.

The committee of the state senate named to investigate certain city departments (see Ja 10) begins its work. Although the investigation continued through the greater part of the session, the city inspector's department was the only one investigated, the testimony involved covering over 500 printed pages. A resolution introduced in the senate near the close of the session empowering the committee "to sit after adjournment and hear further proof" was lost.—Senate Docs. (1865), Vol. II, No. 38. No action followed as a result of the investigation.

The Petroleum Exchange at No. 73 Broadway, corner of Rector St., is opened.—N. Y. Times, F 4, 1865.

"The Chamber of Commerce sends a memorial to the legislature, 'asking its action towards the completion of the Battery Extension, and to devise a plan by which the piers and wharves of the City shall be kept in order, and revenue yielded to the City from the rent of the same.' The whole subject of encroachments on the harbour, 'and especially that known as the Battery Extension,' was referred to the memorial, and the bill recommended was afterwards passed, placing the control of this alteration in the water front in the hands of the pilot commissioners of this city, the object being to push the work to early completion. The memorialists stated that in 1859 there was 'an alarming report that vessels had struck upon the shoal of the Battery, where there was supposed to be ample depth of water;' and, further, that one "needs only to ask of any New York merchant, pilot or sailor of the now passing generation, and to compare the harbor as it was previous to 1815, when at every wharf water was at all seasons abundant, and sailing vessels starting from them best out to sea unaided by the now inevitable steam-tug, with the present intricate and dangerous navigation, when even steamers with their power and independence, often hang off the point of the Battery for a half-hour, waiting an opportunity to pass from one river to the other." Regarding the character of the improvement, it was proposed "to transfer the present Barge Office to the Battery, where a handsome building, similar in character to that of the Union Ferry Company, will be erected by the Government for revenue purposes, and a large basin will be made, which will furnish accommodation to the numerous barges and small boats for a landing."—Rep. of a Special Com. of the Chamber of Commerce of the State of N. Y., on the Battery Extension (1865).

The N. Y. Yacht Club is incorporated.—Laws of N. Y. (1865), chap. 31.

The Union League Club (see F 6, 1865) is incorporated to encourage loyalty to the government, to discourage any attempt "against the integrity of the Union," and, in furtherance of these objects, to maintain a library and gallery of art and military trophies illustrative of the patriotic services and sacrifices rendered in the present struggle against rebellion.—Laws of N. Y. (1865), chap. 32. On March 31, 1868 (q.v.), the club moved from the Parish house to the Jerome residence at 26th St.

Columbia, the capital of South Carolina, is surrendered to General Sherman.—Rhodes Hist. of U. S. V: 924-5.

Charleston, S. C, is evacuated by the Confederates.—Rhodes Hist. of U. S., V: 99-104.

Verdi's "La Forza del Destino" is sung for the first time in America, at the Academy of Music.—N. Y. P. L. Bulletin (1925), 876.

Abraham Lincoln is inaugurated for his second term.—Harper's Weekly, XIX: 164, 486-90, which contains illustration.

The wires of the Western Union Telegraph Co. are connected with the Pacific Line, and direct communication is established between New York and San Francisco, a distance of 4,000 miles.—Leisure's Weekly, XXI: 5.

All that part of Hamilton Square lying between Third and Fourth Aves., 66th and 69th Sts., is set apart as a parade-ground for the National Guard, the first division of the N. Y. S. N. G., and the street commissioner is directed to have it properly graded for the purpose.—Laws of N. Y. (1865), chap. 84. See Ap 16, 1866. For a history of the parade-grounds of the city, see 13th Ann. Rep., Bd. of Comrs of Central Pk (1865), 154-58.

Commissioners are appointed for erecting a public market on the land bounded by 16th and 17th Sts., Ave. C and the East River.—Laws of N. Y. (1865), chap. 120.

The legislature orders that 90th, 91st, 92d, and 93d Sts., formerly part of Observatory Place, as laid down on the Commissioners Map of 1811, be extended from Fourth to Fifth Aves. Observatory Place is thus abolished.—Laws of N. Y. (1865), chap. 135; L. M. R. K., III: 971.

The legislature directs that all original documents bearing date prior to and inclusive of the year 1699 which are now deposited in the several public offices of the city and county of New York shall hereafter be preserved in the city clerk's office, and that he shall have copies and translations thereof made to be filed in the offices from which the said records shall be taken.—Laws of N. Y. (1865), chap. 171.

The old volunteer fire department, long the object of much thoroughly deserved criticism, is abolished, by an act of the legislature, and the "Metropolitan Fire District," which includes both New York and Brooklyn, is established. The control of the new paid department is put in the hands of four commissioners appointed by the governor. Firemen are hereafter to wear uniforms and badges.—Laws of N. Y. (1865), chap. 245; N. Y. Times, Mr 31, 1865. See also descrips. of F 9th, 13th, 16th, 17th, 26th, 1865, 31: 717.

The extended charter of April 30, 1873, took the control of the fire department from the governor and gave it to the mayor.—Laws of N. Y. (1873), chap. 335. For a history of the city's protection against fire see address printed in Stone's Hist. of N. Y. City,
1865 chap. 12. The organization of the new department was completed by Nov. 3 (q. c.).

Apr. Gen. Lee evacuates Richmond. It was immediately occupied by the Union forces.—Rhodes, Hist. of U. S., V: 114-20.

6 The name of Hoboken St., from Washington St. to West St., is changed to Canal St.—Proc., App'd by Mayor, XXXIII: 92.

7 A bill to permit the Metropolitan Railway Co. (see Mr 21, 1864) to build an underground road in New York City is passed by the state senate. It was passed by the assembly on April 27, but was vetoed by Gov. Fenton on May 20.—Walker, Fifty Years of Rapid Transit, 30-35. See My 22.

Prominent citizens of New York draw up an address to Pres. Lincoln congratulating him on the recent victories of the Union armies.—N. T. Times, Apr 10, 1865.

Gen. Lee surrenders the army of Northern Virginia to Gen. Grant at Appomattox Court House, and the Civil War virtually ends.—Rhodes, Hist. of U. S., V: 123-30. News of the surrender reached New York at 11:30 p. m. On April 10, the city was gaily decorated with flags and hunting, cannon were fired, and a grand "Te Deum" was sung at Trinity Church.—N. T. Times, Apr 10 and 11, 1865. The entire North was filled with rejoicing,—soon to be turned to horror and sadness.—See III: 747, and Apr. 14.
CHAPTER VII

B.—PERIOD OF POLITICAL AND SOCIAL DEVELOPMENT
1865-1876

1865-Apr.

President Lincoln is shot by John Wilkes Booth in Washington.—N.Y. Herald, Apr 15 and 16, 1865. The funeral was held in the White House on April 18. On April 19, funeral observances were held in New York, and April 20 was set apart as a day of national fasting and humiliation. The funeral cortège left Washington on the morning of Friday, the 21st, and, after stops at Baltimore, Harrisburg, and Philadelphia, arrived at New York on the morning of the 24th, enroute to Springfield, Ill. The ferry-boat "Jersey City" transported the party across North River, to the foot of Desbrosses St., and, with the escort of the 7th Regiment, a procession accompanied the hearses to the city hall. The coffin was placed on a catafalque erected in the wide space opposite the principal entrance to the governor's room. Visitors were admitted to the Park through the gate near the register's office; thence passing through the eastern basement door, two abreast; and thence, along the corridors, to the stairs in the rotunda; thence up the stairs, turning to the right, passing in front of the catafalque thence down and out through the rear door. About 150,000 people passed the body during the 24 hours it remained here. Funeral obsequies were held on April 25, when a procession moved from the city hall to the Hudson River R. R. depot. At the close of the municipal procession, the citizens of New York held a meeting in Union Square, where Gov. King presided, prayer being offered by Rev. Stephen H. Tyng, D. D., and an oration by Hon. George Bancroft, with other ceremonies. During the period immediately preceding and following the ceremonies at New York, the city was in deep mourning, many private as well as public buildings being draped in black.—The Obsequies of Abraham Lincoln, pub. by order of the Com. Coun., O 19, 1865; N. Y. Times, Apr 25, 1865. See also views and descriptions in Harper's Weekly, IX: 125, 260, 261, 275, 278, 284, 285, 296, 297. A Biograph about five ft. long, showing the procession in the Col. collection. See also Pyne catalogue (1917), item 173.

Andrew Johnson, vice-president, takes the oath of office as president.—Rhodes, Hist. of U. S., V: 150-51.

The consent of the state is given to the purchase, by the U. S., of the land bounded by Wall, William, and Hanover Sts. and Exchange Place, together with the exchange building and improvements erected thereon, to be used as a custom-house.—Laws of N. Y. (1865), chap. 523. See Apr 29.

The legislature fixes the compensation of members of the common council at $2,000 a year, effective from Jan. 1, of the present year. This compensation is to cover "carriage hire and all other expenses."—Laws of N. Y. (1866), chap. 451.

Sixth Ave. between 110th St. and the Harlem River is ordered widened 25 feet on each side under the supervision of the commissioners of Central Park.—Laws of N. Y. (1865), chap. 564.

The commissioners of Central Park are authorised to lay out streets and avenues north of 15th St.—Laws of N. Y. (1865), chap. 505.

The new building of the National Academy of Design, at the north-west corner of 23rd St. and Fourth Ave. (see O 11, 1865), is formally opened on the occasion of the 40th annual exhibition.—Nat. Acad. of Design. Ceremonies on Laying the Cornerstone, etc. (1865). See also L. M. R. K., III: 957. This building was occupied until 1898 (p. 47).

The University Club is incorporated.—Laws of N. Y. (1865), chap. 594. It opened headquarters in this year at No. 9 Brevoort Place.—L. M. R. K., III: 939.

The merchants' exchange (see 1862) and site are purchased by the United States for $1,000,000, for a custom-house.—Ann. Rep., Supervising Archt., U. S. Treas. Dept. (1875), 19. Though the government sold the property on July 3, 1899 (q. v.), the custom-house remained here until 1907 (q. n., O 1), when it moved into its new quarters at the foot of Broadway. See also L. M. R. K., III: 932.

Parliament, by unanimous vote, resolves to present an address to Queen Victoria, expressing the "deep Sorrow and Indignation" and with which both houses have learned of the assassination of Pres. Lincoln, and to request "that in communicating her own Sentiments on this deplorable Event to the Government of the United States, Her Majesty will also be graciously pleased to express... their Abhorrence of the Crime and their sympathy with the Government and People of the United States."—Hansard's Parl. Debates, CLXXVIII: 1219-28, 1242-47.

Commissioners are appointed, to act in conjunction with the commissioners of Central Park, to purchase a plot of ground in the park and to erect thereon a monument to the memory of Abraham Lincoln, all expenses to be defrayed by voluntary contributions.—Laws of N. Y. (1865), chap. 676.

The legislature directs the city to complete the Battery extension. If the work is not commenced within 30 days and prosecuted with despatch, the commissioner of pilots may continue it or remove so much of the work as is an encroachment on the harbour.—Laws of N. Y. (1865), chap. 656.

Benjamin Altman establishes his business, on the east side of Third Ave. (at No. 39), between 9th and 10th Sts. In the early 70's he removed to Sixth Ave. between 21st and 22d Sts.; in 1876, the business of B. Altman & Co. was established at the corner of Sixth Ave. and 39th St., and from time to time was extended until the entire block front between 18th and 19th Sts. was occupied. In 1897 the business was moved to the east side, between 34th and 35th Sts., where he built his present store, after removing the ruins of Christ Church (L. M. R. K., III: 912) at the 35th St. corner. Later the firm occupied the entire block.—Information supplied by the company.

The assassination of Pres. Lincoln by John Wilkes Booth (see Apr 14) was a crushing blow to Booth's brother Edwin, who writes from New York, under this date, to an intimate friend: "I have been, by the advice of my friends 'cooked up' since I arrived here, going out only occasionally in the evening. . . . My position is such a delicate one that I am obliged to use the utmost caution. Hosts of friends are eternally and true to me here and in Boston I feel safe. . . . I wish I could see with other's eyes all my friends assure me that my name shall be free and that in a little while I may be where I was and what I was but alas! it looks dark to me." Later, under date of July 31, he wrote to the same friend: "I have no idea when, if ever I shall act again. . . . It rests with my friends entirely. My heart is against it for at least a year." The disaster seemed the more overwhelming to Booth, for he had been rejoicing over the end of the Civil War. Writing from New York to a friend, under date of March 10, 1865: "Our news (no news now, though) is indeed glorious. I am happy in it and glory in it, although Southern-born. God grant the end, or rather the beginning, is now at hand. For when the war ceases, we shall only have begun to live—a nation never to be shaken again, ten times more glorious, a million times firmer than before." On January 3, 1866, he appeared again on the stage in New York, in the part of Hamlet.—Grossman, Edwin Booth Recollections and Letters (N. Y., 1864), 177-78.

The N. Y. Law Library is established by act of the legislature.—Laws of N. Y. (1865), chap. 722.
The Stuyvesant pear-tree in Third Ave. is in full blossom for the 220th season.—Leslie's Weekly, XX: 147. See F 27, 1867.

"The French residents of this city, professing the Jewish faith, about eight years ago, organized under the name of the 'Communauté [Communauté] Israélite Française,' and met for worship at a synagogue in Ninth-street. The numbers being greatly increased lately, they decided upon erecting a more commodious edifice in Sixth-street, near Second-Avenue. The building is just only completed... On Friday morning [May 26] the synagogue was consecrated with the usual imposing ceremonies."—N. Y. Times, May 29, 1867.

June

The Fifth Avenue Baptist Church (see F 13, 1841) is completed on the south side of 46th St., just west of Fifth Ave., on lots purchased in Oct., 1859. Services were commenced here in 1860 in a temporary lecture-room.—211st Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1861), 145.

The state census shows that the population of New York City is 726,888, which is 87,283 less than in 1860.—Ann. Am. Cyclop. (1865), 611.

Gen. Grant arrives in New York and is welcomed enthusiastically by the citizens. After a day of receptions, parades, dinners, speeches, and serenades, he left for West Point.—N. Y. Times, Je 8, 1865.

A large meeting in support of Johnson's administration is held at Cooper Institute. Gen. Grant, Logan, Blair, and Hunt are among the speakers.—N. Y. Times, Je 8, 1865.

The first Hebrew free school, at No. 36 Avenue C, near 417th St., is opened and dedicated.—N. Y. Times, Je 17, 1865.

The board of aldermen grants to the City Gas Company of New York, for a term of 50 years, the right to manufacture and sell gas, and lay the necessary pipes and mains in the streets and avenues.—N. Y. Times, Je 20, 1865.

The New York Dry Goods Exchange at Nos. 49 and 51 Park Place is opened for business.—N. Y. Times, Je 30, 1865.

July

In some parts of New York the 17-year locusts are devouring everything that is green.—Leslie's Weekly, XX: 243.

Barnum's Museum, at the south-east corner of Broadway and Ann St., is destroyed by fire.—N. Y. Times, Jl 14, 1865; Costello, 263; L. M. R. K., III: 982. See also views and descriptions in Inns, Hotels, &c., IX: 467, 472, 1212; descrip. of Pl. 84A, III: 350; and Pyne sales catalogue, items 121 and 122.

After the fire, the property was sold to James Gordon Bennett, who erected the Herald building on the site (see 1866).—N. Y. Times, Jl 6, 1865. Barnum opened a temporary museum on Broadway (see 8, 1865).

The old Warren mansion, near the intersection of Charles and Bleeker Sts., which was built by Sir Peter Warren about 1740 (p. 27) and later occupied by Abraham Van Ness, is now down. Its laws extended to the North River.—Stone, Hist. of N. Y. City, 295; N. Y. Eco. Post, Ag 31, 1861. See also L. M. R. K., III: 97; descrip. of Pl. 8, III: 866; and Man. Com. Coun. (1854), 128. A view of the house as it was in 1865 is in Greaters, Old N. Y., opp. p. 68.

The 71st Regiment at this time occupied or used an armory at the corner of 17th St. and University Pl., also the old Centre Market Armory. "In the summer of 1869, they removed to a building on 3rd Street, which afforded better facilities than the old Armory, but even this was inadequate to their wants. In the fall of 1870 the 37th Regiment, which occupied the Armory on Broadway between 35th and 36th Street, was disbanded, and soon after this the 71st Regiment obtained possession of the building and removed thence [literally]"—Whittome, Hist. of the 71st Regt., 80, 89. The site of this building was that later occupied by the Herald. For a short time the regiment occupied a building on the site of the New York Theatre, on the east side of Broadway between 44th and 45th Sts., and for a few years was in the skating-rink at 107th St. and Lexington Ave.—Letter to the author from W. G. Bates, colonel of the regiment. In 1872 (p. 9) the regiment erected its first building at the southeast corner of 34th St. and Park Ave. See also L. M. R. K., III: 923.

Comptroller Matthew F. Brennan reports to the state assessor the assessed valuation of property in the county of New York, as fixed by the board of equalization, as follows:

<table>
<thead>
<tr>
<th>Years commencing</th>
<th>Assessed valuation by the board of equalization of taxes &amp; assessments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct. 1</td>
<td></td>
</tr>
<tr>
<td>1860</td>
<td>$550,078,578</td>

</table>

He also shows that for a number of years this county has paid nearly 40% of the entire quote of the sale tax.—From letter-book of comptroller's office, No. 153, p. 19.

The temporary museum which Mr. Barnum has fitted up at Sept. Nos. 579 and 31 Broadway is opened to the public.—N. Y. Times, 6, 6, 1862. The building is known as "Chinese Hall," and the new museum consists of five large salons and a lecture-room.—Leslie's Weekly, XXI: 7. See also sketches of the museum in ibid., XXI: 20. It was destroyed by fire on March 3, 1865 (p. v.).

The synagogue erected by the Congregation Bnai Jehudur in 34th St. is consecrated.—N. Y. Times, S 15, 1865.

The observatory from the Bay of Tunis arrives in New York on its way to Washington.—N. Y. Times, O 5, 1865.

New York City has a fund of about $600,000, to be appropriated to the support of families of murdered policemen.—Leslie's Weekly, XXI: 35.

"At this moment in the city of New York, there are many thousands of stalwart and educated men wandering the streets, utterly unable to procure employment, even though their ideas of remuneration be ever so modest. This arises mainly from the vast influx of labor suddenly let loose upon the community by the mus-tering out of our armies, and by the hard but truthful fact that there is a prejudice in the minds of employers against returned soldiers."—Leslie's Weekly, XXI: 39.

The corner-stone of the Church of the Divine Paternity is laid at Fifth Ave. and 45th St.—N. Y. Times, O 12, 1865. See L. M. R. K., III: 937. It was dedicated on Dec. 3, 1866 (p. v.).

The spire of St. Paul's Church, which was scorchd at the burning of Barnum's Museum (see 117), has been repainted.—Leslie's Weekly, XXI: 71, 79.

"A discovery of a deposit of alum has been made on First avenue, between 47th and 48th streets, in this city. It was found to be feet below the surface of the earth, in layers under the rocks."—Leslie's Weekly, XXI: 82.

"It is stated that Mr. Hiram Cranston, proprietor of the New York Hotel, has purchased the ground bounded by Fifth Avenue,
A. ARCH ERECTED ON FIFTH AVE. ABOVE 23RD ST. FOR THE CENTENNIAL CELEBRATION, IN 1889, OF WASHINGTON’S INAUGURATION. SEE P. 199; AND ADDENDA, VOL. VI.

B. ARCH ERECTED ON FIFTH AVE. BELOW 24TH ST. FOR DEWEY RECEPTION, SEPT. 28-30, 1899. SEE P. 2038.
The organization of the paid fire department (see Mr 79) has been completed. The entire force of the metropolitan fire department consists of 35 steam-engine companies and 12 hook-and-ladder companies for the city proper. In the city organization each engine company consists of 12 members, a foreman, assistant-foreman, engineer, driver, stoker, and seven privates. The hook-and-ladder companies have the same number of members, but, not requiring an engine or stoker, the privates are increased to nine men. In the suburbs the companies consist of 50 members, and are not paid, a company fund being given them for incidental expenses, the machines being drawn by hand. The whole department consists of a board of commissioners and the board of engineers, with 40 steam-engine and 13 hook-and-ladder companies. Very soon there will be a complete revolution in the fire-alarm system. Instead of the bell-towers and their attendant rings, the city will be watched by a telegraph system. — N. Y. Times, N. 3, 1867.

The new department established headquarters in Farnam's Hall, 127 Mercer St.—Man. Com. Coun. (1865), 179. See also pictures of various kinds of apparatus used by the new department, in Leslie's Weekly, 233-34, and Mr 185-186. See also descrip. of Pl. 56, III: 586, and Pl. 185-186, III: 737.

"General Egbert L. Viele has published a very interesting work, together with a valuable map, showing the topography and hydrology of the city of New York, and defining the healthy and unhealthy sections of the metropolis. It will prove of great value to persons about purchasing residences or building sites upon which to erect the same." — N. Y. Herald, N. 3, 1865.

"The map shows the water courses, streams, marshes, marshlands, ponds, ditches, canals, &c., that existed and now exist upon the site upon which New York is built. . . ." — N. Y. Herald, N. 3, 1865. Gen. Viele's Report of the Council of Hygiene and Public Health of the Citizens' Association of New York upon the Sanitary Condition of the City (1865) is in N. Y. P. L., and his map is reproduced in Pl. 43, II: 171.

"The one agitating subject just now among all classes is the inflation in prices of all articles of necessity and the want of corresponding inflation in wages. In 1863, when wages had reached a very high point, and mechanics all over the country were holding out for higher prices, the prices of food were as follows: flour, $1.75; coal, $6.00; pork, $3.50 per barrel; butter, 22 cts.; lard, 10 cts.; codfish, $2.50 per lb. This year, in peace, flour is $9; coal, $3.50 porc; pork, $3.75 per barrel; butter, 40 cts.; lard 27 cts. and codfish, $8.12 per cwt." — Leslie's Weekly, XXII: 98.

Gen. Grant and his family arrive in New York and take up their residence at the Metropolitan Hotel.—N. Y. Times, N 15, 1865. See also ibid., N 16, 17, 19, and 20, 1865. A great reception, attended by 2,000 people, was given Gen. Grant at the Fifth Avenue Hotel on Nov. 20—Ibid, N 21, 1865. See also views in Leslie's Weekly, XXII: 185 and Harper's Weekly, IX: 774.

Grant left the city on Nov. 21.—N. Y. Times, N 22, 1865.

 Fragile and prominent and influential men in the Democratic party have just completed the organization of a club to be called the Manhattan Club. The objects of the members are to advance the doctrines of their political creed, promote social intercourse, and provide themselves with the conveniences of a club-house. The number of the resident members is limited to 100. The following officers have been chosen: pres., John Van Buren; vice-pres., Augustus Schell; treas., W. Butler Duncan; sec., Manton Marble.—N. Y. Times, N 15, 1865. For the organization of the Manhattan Club and the original list of members, see Watterson, Hist. of the Manhattan Club (1915), XXII, xxiii-xxv, 17-16. See also Fairfield, Clubs of N. Y. (1875), 139-66. From 1868 to 1890 (p. t., Mr 1), the club building was at 96 Fifth Avenue.—L. M. R. K., III: 938. It is described in Harper's Weekly, XII: 436.

St. George's Church on Stuyvesant Square is seriously injured by fire, the steeple, however, being saved.—N. Y. Times, N 15 and 16, 1865. See also illustration and description in Harper's Weekly, IX: 328, 329, 330, 331, 332, 333, 334, 335. As early as possible the original plans of Blesch and Eidlitz, and was reopened Sept. 29, 1867 (p. t.)—Anstic, Hist. of St. George's Church, 232, 234-35.

The drivel and trudel paths in Central Park are completed, last section to be finished being the drive from Mt. St. Vincent to Seventeenth Ave. and 110th St.—9th Ann. Rep., Com's of Cent. Pk (1866), 110.

The exchange built by Amos R. Eno in 1862 (p. t.) on West 24th St. having failed, George Christy opens the building as a ministers' hall.—Brown, II: 399-400; L. M. R. K., III: 983. See, further, S 2, 1867.

Meyerbeer's opera "L'Africaine" is performed for the first time in America, at the Academy of Music.—Brown, II: 52.

Within the past few years, at certain times of the day . . . the Fifth Avenue rivals Broadway seriously as a promenade. We have no doubt that the time will come, within a quarter of a century, when fashion will change from Broadway to Fifth avenue entirely . . . and that the new fashionable avenue will be nothing but a row of stores for retail, while in Broadway the wholesale trade will have monopolized everything below 14th street.

Fifth avenue, at present, is a street of 45 blocks, more than twice the length of the promenade part of Broadway. It has upon it 340 residences, all of the finer class, except a few shanties near the Park . . . It may safely be said that of these 340 houses not one cost less than $250,000." — Leslie's Weekly, XXI: 162. Anthony's stereoscopic views, now scarce, show the avenue at this time.

At the annual charter election, John T. Hoffman, the Tammany candidate, is elected mayor.—Hoffman's plurality over Roberts, the candidate of the Union party, in very small. There were other two candidates, Hecker and Mayor Gunther; the latter was again the candidate of the McKeon Democracy but polled a very small vote; the former was put forward by the Citizens' Association (see 1866) as a "Reform" candidate. Horace Greeley characterized Hoffman as the tool of "Ringmaster" Todd, and supported Hecker.—N. Y. Tribunes, N 23 and D 6, 1865. Hoffman was re-elected in 1867 (p. w., D 3). For a brief account of the man, see Stephen Fiske's Off-Hand Portraits of Prominent New Yorkers (1884), 186 n. 77.

The Stock Exchange moves from Lord's Court into the new building at 10 and 12 Broad St., owned by the N. Y. Stock Exchange Co.—N. Y. Times, D 10, 1865; Eames, N. Y. Stock Exchange, 50. See also interior and exterior views of building, in Leslie's Weekly, XXII: 227-229; and descrip. of Pl. 159-b, III: 842.

Official announcement of the ratification of the 13th amendment and the abolition of slavery in the U. S. is made.—Rhodes, Hist. of U. S., V: 519-40.

Lucy Stone opens "what she calls the New York Theatre, located on the site of the Unitarian Church, lately the Athenaeum on Broadway just opposite the New York Hotel, and between Fourth st. and Astor place, on the east side of the street." — Leslie's Weekly, XXI: 239. See also L. M. R. K., III: 984. See, further, J 16, 1880.

The annual report on Central Park states: "The buildings at Mount St. Vincent, having been for more than three years occupied by officers of the 38th New York infantry, and guarded by soldiers housed in it, N. 16, 1862, were vacated in the month of September last . . . A portion of these buildings have been put in condition, and will soon be ready for use as a place of refreshment. The Board will proceed with the erection of at least one other house of refreshment, commensurate with the extent of the demand that is likely to arise for its use; in connection with it, it is proposed to provide a spacious hall and a winter garden."—10th Ann. Rep., Com's of Cent. Pk (1866), 38; Harper's New Monthly Mag., Nov., 1866. See D 31, 1867.

The Hopper house at 83d St. and Second Ave., built in 1869, was still standing at this time.—See view and description in Leslie's Weekly, XXII: 217. See also L. M. R. K., III: 950.

The number of men furnished for the war by the city of New York, according to the report of the chairman of the board of supervisors, was 116,382, for terms of one, two, three, and four years, the total number of years' service being 267,551. The average cost per man under each call was, for bounties and hand-money, and other expenses, including expenses for the family relief fund, $150-47.—Am. Ann. Cyclop. (1865), 611. See also Townsend, The Honors of the Empire State in the War of the Rebellion (1867), built to conform as closely as possible to original plans of Blesch and Eidlitz, and was reopened Sept. 29, 1867 (p. t.)—Anstic, Hist. of St. George's Church, 232, 234-35.

Some notion of the extent of travel on the city or borse railways of New York may be gathered from the fact that the aggregate of fares received on them for the six months ending December 31st, was $1,887,525." —Leslie's Weekly, XXII: 306.
THE SYMPATHY OF MANHATTAN ISLAND

1865

In this year, the Princeton Alumni Association of New York was founded.—Year Book of Princeton Club (1888). See 1886.

In this year, the Manhattan Railway Co. proposed to construct an underground road from the Battery to Central Park, similar to the subways in London. For detailed description of the project, see Plans and Proposals of the Manhattan Ry. Co. (1866). The first subway in the world was begun in London in 1823 and opened in 1863.—Encyclop. Am., XXV: 756. Encyclop. Brit., XVI: 944.

In this year, Old New York: or Reminiscences of The Past Thirty Years, by Dr. John W. Francis, was published with a memoir of the author by Henry T. Tuckerman.

In this year, David T. Valentine prepared and published A compilation of the existing ferry leases and ferry grants made by the city of New York, together with the grants from the legislature of the state to use the streets of the city for railroad purposes. Also the various ordinances, resolutions, &c., passed by the Common Council, relating to, or affecting the same. The period covered is 1856-1866. An earlier edition compiled by Charles T. McLellan was published in 1860.

In this year, Dickson’s Riding Academy, a fashionable resort in the “75th,” was opened on the north-east corner of Fifth Ave. and 59th St. The Union League Club was later built on the site.—L. M. R. K., III: 939, 962.

In this year, the morgue was erected at the foot of East 26th St. (R. H. G., p. 151, 1866). Scarcely less important than the morgue was the opening of the 39th St. Stages to the Park and as a resort for the sale of the markets, where “wharf and ferry franchises belonging to the city,” believing that “by judicious management they can all be made to yield greatly increased revenues.” At present, he says, “New York, the great commercial city of this continent, has not a single wharf or pier which is not a disgrace to it.” The markets, too, he calls “miserable structures,” and he wishes to see new ones erected that will be “an ornament and credit to the city.”

He anticipates that the legislature will "agitate" a "health bill" (see F 26), and declares any such measure should not "transfer to a State Commission the control and management of the sanitary interests of this city." A pestilence of cholera is likely to be checked by the institution of "proper receptacles for all . . . refuse and garbage," and by the vigilance of every police officer and every citizen in ascertaining and reporting and (as far as possible) removing and abating, all nuisances, and sources and causes of disease; the organization of “health committees” in every ward would give "aid to the work of purification."

Finally, the mayor promises to do all he can "to thwart imprudent legislation, to check extravagant expenditures, and to redeem the character of our local government."—Proc., Bd. of Ald., CI: 145.

A large meeting is held at Cooper Institute "for the avowed purpose of reaffirming the spirit of the Monroe Doctrine and of expressing a sympathy with the feeble and struggling Republics of the continent." Speeches are made by Wm. Cullen Bryant, S. S. Cox, and others.—N. Y. Times, Ja 7, 1866; Leslie’s Weekly, XXI: 297.

The semi-centennial anniversary of the battle of New Orleans is celebrated at Tammany Hall “with something more than regal splendor.” Speeches are made by Hon. John Van Buren, Admiral Farragut, Col. Murray, and others.—N. Y. Times, Ja 9, 1866.

The state senate passes a resolution requesting Alfred W. Craven, the engineer of the Croton aqueduct, "to report his opinion as to the possibility of constructing a backbone under the Broadway in the city of New York [see Ap 7, 1865], and especially as to the effect of the attempt to construct the same upon the Croton and other pipes and the sewers, and the damage if any which may be caused to the city and to the individual property owners thereby, and what precaution ought to be taken to guard against the same, and to provide for the payment of damages, and what legislation is necessary in reference to that object." Craven reported adversely on Feb. 2.—Walker, Fifty Years of Rapid Transit, 45-50.

"Notwithstanding the great reservoirs of Croton water in the Park, and the distributing reservoir in the city, the requirements of New York are not yet satisfied. A new one is to be built at Manhattanville, near Washington Heights, to supply water to parts of the city that cannot be supplied from existing reservoirs. A plat of ground has been selected between 172d and 173d streets, 10th avenue and Harlem river, embracing eight acres, for this purpose."

—Leslie’s Weekly, XXII: 258. The new reservoir had been proposed in 1863.—Ibid., XV: 355.

Charles St. between 4th and Bleeker Sts. is to be designated Van Ness Place.—Proc., Ap’d by Mayor, XXXIV: 7.

The consistory of the Collegiate Reformed Dutch Church has 20 decided to dispose of the land it owns in the 7th Dutch Church, corner of Fulton and William Sts., and to lease the ground for business purposes.—N. Y. Times, Ja 20, 1866. For a history of the church, see ibid., Ja 21, 1866. Protests against its removal appeared in ibid., Ja 22 and 21, 1866. Silver plates and other relics, once attached to coffins placed in the burial-ground of the church, were exhumed in this year and removed to Greenwood Cemetery.
Chronology: Political and Social Change: 1865-1876

1866
Stone, Hist. of N. Y. City, 533; Greatrex, Old N. Y., 43. The church was not demolished until 1875 (q. v., J). The new church has been completed.

There will be, early next year, now [no] fewer than eleven theatres in this city, to wit: Wallack's, New York, Winter Garden, Olympic, Niblo's, Wood's, Broadway, French (in Fourteenth street), Old Bowery, New Bowery, and the German."--Leslie's Weekly, XXII: 725.

The centenary of American Methodism is celebrated at St. Paul's M. E. Church with appropriate ceremonies.--N. Y. Times, Ja 26, 1866. See also views in Leslie's Weekly, XXII: 122-23.

Another celebration was held at Cooper Institute on Sept. 25, at which speeches were made by Rev. C. D. Foss, Rev. Thos. Sewall, and others.--N. Y. Times, S 26, 1866.

"The incapacity of Broadway to adequately meet the requirements of so important a thoroughfare has long had the consideration of the community. It is notorious that the peculiar formation of Manhattan Island, with heavy bodies of water on each side running its extreme length, confines the extension of the city to one direction alone, while into the lower or more commercial part of the city is thrown an amount of traffic so vast that its superficial extent is not equal to the demands made on it. This concentration needs the most direct available communications, and Broadway, according to one view, necessarily becomes the main channel.

Therefore, we think that in the favor of the plan whenever a proper plan is suggested. We have none of our own but we believe that in the end the real relief of the thoroughfare will be found either in an overground railroad or in two broad avenues constructed on each side of the great highway."--N. Y. Herald, Ja 25, 1866. See F 2.

Feb. 1866
H. L. Gage writes to one of the papers: "Several hundred thousand persons--rich and poor, male and female, simple and easy--earn their living by personal effort so that narrow corner of this island which lies south of Grand Street. We can not live here; for most of this area is needed for stores, banks, offices, factories, workshops, etc.; and it is inconvenient to live across the arms of the sea on either hand. We want to live uptown, or in the adjacent county of Westchester, to get at our facilities to live more easily, comfortably, from our homes to our work and back again.

"Street Railroads and Omnibuses have their uses; but we have reached the end of them. They are wedged for hours at night and morning with men, women, boys, and girls, sitting, standing, and hanging on; . . . they are unchangeably too slow; and their capacity is exhausted. To put on more cars or construct more roads is impossible. It is our streets and ... drive all carriages out.

"Gentlemen of the Legislature! Give us both the Underground and the Aerial Railway! Don't let their promoters kill each other's projects; for we had need them both, and with them we may come and go ten to twenty miles per day in forty to eighty minutes, instead of thrice the time, as at present. Don't let the lobby make the bills, but make them yourselves, and see that they are passed in the interest of the public and not of the stockholders exclusively. Let the city have a slice of the profits, if profits there shall be; and let those who ride feel that their comfort, safety, and advantage have been considered in the premises. Such roads, made ten years ago, would have saved to our State millions of taxable property, which has been absolutely forced over into Jersey in search of room to live on. . . ."--N. Y. Daily Tribune, F 2, 1866. See Mr.

The city leases, for 99 years, 26 lots on the block bounded by 81st and 82d Sts., Madison and Fourth Aves., to the Roman Catholic archbishop, for the use of the industrial school of the Sisters of Mercy. "Man. Com. Coun. (1870), 76.

The city leases to the German Hospital a plot on 77th St., between Lexington and Fourth Aves., embracing 18 lots, for 50 years, at $1 per yard. "Man. Com. Coun. (1870), 765. The cornerstone of the hospital was laid on Sept. 5 (q. v.).

A great Fennian demonstration is held at Cooper Institute. The meeting is a "scene of continuous enthusiasm, rising at times to pitches of dramatic intensity." Chas. S. Spencer, Fernando Wood, G. F. Train, and others make addresses. "N. Y. Times, F 13, 1866.

The regular annual publication of the "Corporation [Valentine']s Manual" is threatened by Mayor Hoffman's veto of the common council's resolution directing the Clerk to prepare and cause to be published ten thousand copies of the Corporation Manual for 1866, and providing that he shall be paid for the composition of the work the sum of three thousand five hundred dollars." The Feb. mayor objects to the "gratuitous distribution" of so large an edition at the public expense, each volume last year having been published at a cost of about $1. He also disapproves of the rejection of the plan by the common council of an economy measure that provided for giving to the lowest bidder the contract for publishing: he declares his inquiries lead him to believe the work can be done for $1 a volume."-Proc. Bd. of Alds., CI: 355-57. The Times editor sides with the mayor, saying: "There is no man connected with the City Government to whom so unaniomously respected as 'Uncle David.' For more than thirty years he has been intimately connected with municipal affairs, and to him more than to any other man our ever-changing law-makers have looked for information and guidance. His 'manual' is a valuable work and should be continued in a proper way. But a thousand copies are amply sufficient for official purposes, and no more should be allowed."--N. Y. Times, F 27, 1866. The resolution was passed over the veto. "Proc. Bd. of Alds. 1866. Hist. of N. Y., 436; Proc. Bd. of Councilmen, CI: 599-91. See 1867.

The common council authorises the payment of $9,650 to City Inspector Boole "for legal disbursements in the matter of the several investigations before the Committee of the Board of Aldermen, Governor Seymour, the Senate Investigating Committee, and Governor Fenton, during the last two years."--Proc. Bd. of Alds., CI: 379-71. The Commissioners' Association had protested against such action (ibid., CI: 155).

The New York Tract and Mission Society is incorporated.

Law of N. Y. (1866), chap. 63.

A great Union meeting is held at Cooper Institute to indorse Pres. Johnson's veto of the bill for the continuance and enlargement of the Freedmen's Bureau. "Resolutions adopted and passed." Henry J. Raymond, Postmaster-General; Denison, Francis B. Cutting, Sec. Seward, and others make addresses. "N. Y. Times, F 23, 1866.

Gen. Grant and his family arrive in the city and stay at the Metropolitan Hotel.-N. Y. Times, F 22, 1866.

The legislature creates "The Metropolitan Sanitary District of the City of New York," identical with and embracing the police district (see Apr. 15, 1857). Four "Sanitary Commissioners" appointed by the governor with the consent of the Senate to govern the district. One must be a resident of Brooklyn, and three of the four must be physicians; the regular term of office is to be four years, but the terms of the first commissioners are to be adjusted so that only one commissioner retires from office in a given year. They shall be paid $5,000 a year, and may be removed by the governor on charges. Together with the metropolitan police commissioners and the health officer of the port they shall constitute a "Board of Health." This board shall elect a president who "shall have all the power and authority given [hitherto] to the 'City Inspector,' ... in respect to the making, awarding or executing of a contract or contracts for street cleaning, or any matter thereto pertaining." The board shall have a "Sanitary Superintendent," who must be "an experienced and skillful physician, resident in said district," and whose annual salary shall not exceed $6,000. This officer shall execute the orders of the board and report "the condition of the public health in said district, and any causes endangering life or health." The "City Inspector's Department" is entirely abolished, as well as "all other boards and officers now existing in said district," that are concerned with public health, the health officer of the port and the board of quarantine commissioners excepted. The city inspector's powers all pass to the board except the inspection of weights and measures which is conferred upon the mayor. "All public books, records, statistics and papers" in possession of the city inspector must be delivered to the new organization.

"In the presence of great and imminent peril to the public health in said district, by reason of impending pestilence," the board may exert extraordinary powers and incur extraordinary expenditures with the written approval of the governor. The police board and the health board are required to "cooperate for the promotion of the public health and the safety of human life in said district." The health board together with the mayors and police commissioners of the cities of New York and Brooklyn shall constitute a "Board of Estimate," whose business it shall be annually to "make up a financial estimate and statement" and to apportion "to the several cities, counties and towns in said district" their share of the expenses."--Laws of N. Y. (1866), chap. 74.
In its course through the legislature this had been known as the "Health Bill." Interest in such a measure, says the Times editor, was aroused by "the threatened approach of the cholera, and the fearfully unsanitary condition of our City," and the bill was drafted last November at "a large meeting of our most prominent citizens, without the distinct assent of the Quarterly and Board of Health under the chair of Dr. Willard Parker."—N. Y. Times, F 9, 1866. Dr. Parker was one of the four commissioners subsequently appointed by Gov. Fenton according to the terms of the act.—N. Y. Tribune, Mr 1, 1866. The metropolitan "Board of Health" was organized on March 3 (q.v.).

There is now on exhibition at Brady's Gallery, No. 758 Broadway, a collection of pictures, specimens of the progressive skill and labor during five and twenty years of this patriarch of photography; portraits of remarkable men in all the ranks of life, whose genius, near or remote, links them in some degree with the history of the Republic. To this collection has been lately added a remarkable array of scenes and incidents of the late rebellion.—N. Y. Times, F 26, 1866.

Mar.

1. P. Goodsell, state engineer, and three other engineers make the following recommendation to the railroad committee of the state senate: "Having examined drawings and models of an elevated railway on which the cars are to be propelled by means of a cable or wire rope attached to a stationary engine, we are impressed with the novelty and practicability of the method proposed, and think it worthy of a suitable enabling act from the Legislature to permit the formation of companies to use it, and also of the attention of capitalists in reference to the actual construction of the same."—Expose of the Facts Concerning the Proposed Elevated Patent Ry. Enterprise (1866), 29. A law in relation to this was passed on April 20 (q.v.).

2. The "Metropolitan Board of Health," for which provision was made by a recent act of the legislature (see F 26), is organized with Mr. Jackson S. Schultz as president, and Mr. Benjamin F. Manierre as secretary.—N. Y. Times, Mr 3, 1866. City Inspector Boole, whose office is now abolished, declares this board to have been created through the efforts of "an unscrupulous partisan clique . . . under the specious pretext of preserving the public health," that the act "declaring this Department abolished" simply adds "one more to the encroachments upon our right to govern ourselves," and is intended "to transfer the power and patronage hitherto possessed by this Department from Democratic to Republican control."—Proc. Bd. of Ald., CI: 578-9.

City Inspector Boole had successfully resisted all efforts to disable him since his appointment, June 22, 1865 (q.v.).

3. The board of aldermen requests one of its committees to investigate the practicability of paving "the entire surface of the City Hall Parly, thereby converting it into an open plaza, thus affording additional carriage-way in the surrounding streets, and greatly facilitating the transaction of business in the lower part of the city."—Proc., Bd. of Ald., CI: 548. The Times editor the next day writes: "The incoherence, at present, is useless for practical purposes, and about as great an eyesore as would be a few acres of the great African desert covering the same ground. What is needed to redeem this valuable piece of land from its present unornamental condition is the erection of public buildings thereon which would be architectural adornments to the City. For instance, a fine Post-office might be erected [see Ag 25, 1875] at the lower end of the Park, a Merchants' and General Exchange on the Broadway side, a Hall of Records and offices for the Corporation Council, Surrogate, and Clerk, and other officials on the Park side, and Government and all the Courts be accommodated at the northern end. Thus the Park might be transformed into the fountain head of all the great business interests of the City, it being already the center of the news. Such a disposition of the ground could not fail to be an inestimable boon and public convenience. In Liverpool there is just such a concentration of important public buildings on just such a space, which our authorities might do worse than to model after."—N. Y. Times, Mr 6, 1866.

Mr. F. I. A. Boole, late city inspector, informs the common council that "this day a demand has been made upon me by Jack- son S. Schultz, Esq., President of the new Board of Health" (see Mr 2), for the "books, papers, &c." of my office, and I have "complied with the demand," but requested the "use of the offices now occupied" for a short time, so that I may close up all my business and "give such information to the new Board as they may desire."—Proc., Bd. of Ald., CI: 579. A resolution of the board of aldermen granting him such permission "until May 1, 1866," was vetoed by Mayor Hoffman, but a subsequent measure allowing two months' additional salary to him and ten assistants was allowed by the mayor to be adopted.—Proc., App'd by Mayor, XXIV: 196-97.

4. Agents of the newly constituted "Health Board" remove from the city inspector's office "one hundred and forty-one volumes of the late City Inspector's reports, a cart-load or more of Coroners' inquest papers, and lots of other documents" and deposit the same in one of the "Health Commission's rooms."—N. Y. Times, Mr 6, 1866.

5. The "Fee Academy of the city of New York," now under the supervision of the board of education, is made a body corporate with the title of "The College of the city of New York."—Laws of N. T. (1866), chap. 264. On April 17, the trustees were directed to "select a suitable site upon the lands of the corporation of the city of New York, north of Fortieth street in said city, for the future use of the college."—Ibid. (1866), chap. 657.

The New York Soldiers' Depot at Nos. 59 and 52 Howard St. is closed. "After a successful career for over four years, the depot goes out of existence, full of honor. . . . Nearly 150,000 soldiers have been hospitably received at the Home since its first establishment, and in a multitude of cases protection has been afforded our returning heroes from the sharpers who infest our thoroughfares."—N. Y. Times, Ap 1, 1866.

7. Commissioners of Central Park are required by the legislature to lay out "Avenue St. Nicholas" and Manhattan St. immediately.—Laws of N. T. (1866), chap. 357. Work on the ground began in 1869 (q.v.).

8. Having previously created "The Metropolitan Sanitary District" (see F 26), the legislature now passes a measure forbidding any one to "throw, cast or lay any ashes, offal, vegetables, garbage, dross, cinders, shells, straw, shavings, dirt, filth or rubbish in any gutter, street, lane, alley or in any public place." The law is made to apply to Albany and Buffalo, as well as to New York and Brooklyn.—Laws of N. T. (1866), chap. 377.

The American Society for the Prevention of Cruelty to Animals is incorporated.—Laws of N. T. (1866), chap. 469. The society was founded by Henry Bergh of New York City and was the first of its kind in the United States.—Lossing, Hist. of N. T. City, II: 434-43.

The Union Trust Co. is incorporated.—Laws of N. T. (1866), chap. 501.

10. The commissioners of Central Park are directed to have a survey made of the land bounded on the north by 155th St., on the east by Eighth Ave. north of 82d St. and Ninth Ave. south of 82d St., on the south by 72d St. east of Tenth Ave. and 67th St. west of Tenth Ave., and on the west by the Hudson river, and to mark thereon such changes in size, direction, and grades of the streets and avenues in the pier and bullhead lines as shall be beneficial to the property affected and to the public interests.—Laws of N. T. (1866), chap. 550.

11. Tompkins Square is declared a public parade-ground for the use of the first division, N. Y. S. N. G., and the street commissioner is directed to remove the fountain, trees, and other obstructions and to have it graded and levelled before July 1.—Laws of N. T. (1866), chap. 639. In 1865 (q.v., Je 3), the square was ordered paved. In 1865 (q.v., Mr 6), the parade-ground for the National Guard was fixed at Hamilton Square.

12. The name of the Jews' Hospital (see N 24, 1837 and My 17, 1855) is changed to Mount Sinai Hospital.—Laws of N. T. (1866), chap. 639. My 25, 1868. "10 returns of the middle section was made to the committee."—Laws of N. T. (1866), chap. 642.

13. The Women's College of Physicians and Surgeons is incorporated and authorized to establish a hospital in connection with the same.—Laws of N. T. (1866), chap. 642.
The legislature passes an act providing for the formation of companies to operate railways by means of cables or wire rope attached to stationary engines (see Mr.).— Laws of N. Y. (1866), chap. 697.

The law was introduced by Chauncey H. Harvey, "the father of the elevated roads," who had invented and patented this mode of propulsion. In July, 1866, Harvey and his associates organized and incorporated the West Side and Yankees Patent Ry. Co. They proposed to build a line, 25 miles long, from the Battery by way of Greenwich St. and Ninth Ave. and other streets to Kingsbridge and Yonkers.—Walker, Fifty Years of Rapid Transit, 38-39, 71-72.

See also Exposé of the Facts Concerning the Proposed Elevated Patent Ry. Enterprise (1866), 26. The committee made its report on Jan. 31, 1867 (q.v.).

By act of legislature every railroad in the state is prohibited "from issuing free passes . . . or carrying persons or property free of charge," except in the case of employees, sick and disabled soldiers, or such persons as may be injured in an accident.—Laws of N. Y. (1866), chap. 798. While the bill was under discussion, the Times editor remarked: "The issue of passes has grown into a monstrous abuse alike oppressive to shareholders and corrupting to the recipients of railroad bounty. Every third man you meet in the cars is free on the road, and rides at his pleasure at the expense of the shareholders. The system has been so extended as to embrace all classes of people. Every member of the Legislature rides for nothing, and as often as suits his convenience, during the session. The Judges are all deadheads—municipal officers of every description, the exposition expenses are paid for nothing, and every man among them feels aggrieved if his pass does not include his family and all his relations, near and remote."—N. Y. Times, F 21, 1866.

The legislature authorizes the commissioners of the land office and the city of New York to cede to the U. S. the easier end of the Battery extension for the purpose of erecting a barge office and office building for the collection of revenue and the receipt of interest.—Laws of N. Y. (1866), chap. 862.

The corner-stone of the Woman's Hospital (see Ap 17, 1865) is laid, at Fourth Ave. and 90th St. The hospital was opened for the reception of patients in 1867.—Richmond, N. Y. and Its Institutions, 399 et seq. The site is that of the potter's field.

The Croton aqueduct board is directed to supervise the improvement of the pavement of Broadway between the Battery and 14th St.—Laws of N. Y. (1866), chap. 867.

The legislature authorizes the Dry Dock, East Broadway and Battery R. R. Co. to extend its tracks with a double track from Greenwich St. through Denbrose St. to the North River and with a double track from Greenwich St. through Cortlandt St. to the North River, and through Fulton St. to Broadway, with a single track from Washington to Greenwich St., and a double track from the latter to Broadway. The Ninth Ave. R. R. Co. is to be permitted to use these new tracks upon certain conditions.—Laws of N. Y. (1866), chap. 868.

The legislature passes an act "to amend and reduce to one act the several acts relating to buildings and the keeping and storage of combustible materials in the city of New York."—Laws of N. Y. (1866), chap. 873. Under this act the "Department for the Survey and Inspection of Buildings" was reorganized on June 1, with office at No. 2 Fourth Ave., opposite 6th St. The superintendent of buildings was James M. Macgregor.—Man. Com. Coun. 1866).

The congregation of the Presbyterian Church of the Sea and Land, having secured for its use the North-East Reformed Dutch Church at the corner of Market and Henry Sts., has its inaugural services there on this day.—N. Y. Times, My 7, 1866. Cf. L. M. R. K., III: 935-36.

The Mercantile Library Association is incorporated.—Laws of N. Y. (1866), chap. 878.

Gen. Beauregard arrives in the city and puts up at the New York Hotel. On May 16, he sailed for Europe in the interest of the Louisiana Railroad, having been at the head of it since the close of the war.—N. Y. Times, My 16, 1866.

The common council intends to widen Fifth Ave. by taking up the steps and stoops in front of the dwellings and carrying the sidewalks close up to their walls.—N. Y. Times, My 18, 1866.

The Academy of Music, on the north-east corner of 14th St. and Irving Place (see O 2, 1854), the N. Y. University Medical School at 145-147 East 14th St. (see 1857), and St. James's Lutheran Church are destroyed by a fire which consumes almost the whole of the block bounded by 24th and 15th Sts. Irving Place, and Third Ave. The loss is estimated at over $1,000,000.—N. Y. Times, My 22 and 23, 1866; Harper's Weekly, X: 360, 366. The Academy of Music was rebuilt in the same year and opened on March 1, 1867 (q.v.).—N. Y. Times, Je 22, 1866; Ann. Rep., Supt. of Bldgs. (1865-1866), 234. The Tammany Society purchased the site of the Medical School in 1866 (q. v., Mr 21 and J 4) and erected the present Tammany Hall there. The school first took temporary quarters in the N. Y. Hospital and later removed to its present site in 26th St. (see 1869 and 1876).

The Austro-Prussian war begins with the invasion by Prussia of Hanover, Hesse Cassel, and Saxony, these states having sided with Austria.—Andrews, Hist. of Development of Modern Europe, II: 948.

The name of College Place is changed to West Broadway.—Proc. App'd by Mayor, XXXIV: 191.

The commissioners of the sinking fund pass a resolution recommending that the lower portion of City Hall Park be sold and conveyed to the U. S. government as a site for a post-office and courthouse, for the sum of $500,000. This was approved by the common council in December.—Proc. Cam'rs of Sinking Fund (1866-1877), 785-86, 806. The land was sold on April 11, 1867 (q. v.).

Austria is disastrously defeated by Prussia at Königgrätz or Sadowa.—Lewis, Hist. of Germany, 697-700.

The successful attempt to lay the Atlantic cable is begun when the shore-end is landed at Valencia, Ireland, on this day. The vessel reached the American station, Heart's Content, on July 27 (q. v.).—Field, Hist. of the Atlantic Telegraph, 344 et seq. See also Harper's Mag. (Sept., 1866), 531-32.

The directors of the West Side and Yankees Patent Ry. Co. (see Ap 20) and of other subsidiary companies present the following petition to both branches of the common council: "The undersigned Memorialists, being citizens of and property-holders in the city of New York, respectfully beg leave to represent that they are impressed with the belief that the greatest public want of the city is a new method of transit between points on Manhattan Island and the northern suburban villages, and which shall afford more capacity and rapidity than is presented by existing roads . . . Your Memorialists, while heretofore realizing these facts and their importance, have felt constrained to oppose the various projects for underground and elevated locomotive railways, as impracticable or unjust to public or private interests.

"The first would obstruct our streets for years in construction, if seriously attempted.

"The second would injure our streets in appearance, and become a nuisance in attempting to have locomotive power applied as proposed.

"The attention of your Memorialists has lately been called to a patented system of elevated railway which in the opinion of eminent engineers whom the undersigned have consulted, offers a solution of this difficulty, and is not liable to most of the objections urged against other plans previously made public.

"The motive-power is confined to a series of noiseless, endless, propelling windmills, which is driven by engines made stationary beneath the street pavements, consequently neither smoke, cinders, oil, or noise can be offensive to the ordinary uses of the public streets.

"The structure will project less than thirty inches over the side wall, or likewise over the carriageway, and will occupy less than fifteen inches in diameter, or it's equivalent, once in not less than twenty feet of length, which actually is no more obstruction than is now common along our streets.

"The speed and capacity of the proposed railway is superior to any of the projects heretofore agitated, if it should prove a mechanical success, as engineers almost unanimously predict will be the case.
"Your Memorialists have investigated the patents, and find
the experts consider them as valid, and comprehending the princi-
pies necessary to the operation of a street railway by such means.

"Competent legal authorities have also been consulted, and
report that the Legislature has granted full authority for the con-
struction of railways upon this system, (and this only as to new
routes) by the city of New York by act of April 20, 1866 (p. v.),
which your attention is respectfully invited, and in accordance with
which the undersigned propose to obtain corporate existence, and
to receive your legal permission for prosecuting the contemplated
enterprise.

"Your Memorialists have negotiated with the patentee [Chas.
Harvey], and have obtained the control of the patents on the
principal routes of this city, provided the same can be brought im-
mediately into use.

"They now propose to erect an experimental section upon
Greenwich street, of one half mile in length, which shall be made
the means of judging of the value of the system, and which will sat-
ify your Honorable Body, the public, and themselves, on that point,
and finally decide all questions of the expediency of its extension or
its removal.

"If it does not answer the purpose, it will be for the interest of
your memorialists to abandon the project, and remove the trial-
line at their own expense.

"But if it does supply the want now becoming a absolute necessity
in our city, then every resident on this island will feel interested in
its extension as rapidly as possible.

"Your Memorialists are willing to take the risks of failure and loss
in the trial, for the right to proceed in its extension without delay,
in case of success, which is submitted to your Honorable Body to
and the public as a reasonable and just consideration for making the experiment, and assuming the risks incident thereto.

"Your Memorialists beg leave to add, that they are willing that
a reasonable percentage of receipts of proposed railways shall go
into the city treasury, to increase as the present national and State
taxes are reduced, and to aid in lightening the burdens of our city
taxations.

"Your Memorialists also beg leave to state that they desire your
Honorable Body to pass a resolution which shall protect the inter-
ests of the city in an explicit manner as to the occupancy of the streets
by such railway, but at the same time leave the constructors at
liberty to modify and improve the plans and mode of construc-
tion, and operating as experience shall be gained and improvements
suggested by practical operation of the experimental section pro-
posed.

"No expense will be spared in rendering it effective and orna-
tmental to the city.

"In view of the fact that farther State legislation may be needed
to perfect the mode of acquiring property for such enterprises and
otherwise developing their usefulness, your Memorialists will sug-
gest the importance of obtaining your early consent to the trial sec-
tion proposed, that the same may be put into operation by the time
when the next Legislature will assemble, and afford practical proof
to the committee which the Honorable Senate has appointed to
especially consider this subject in its relation to our city, and to re-
port at the next ensuing session of the Legislature, which will con-
vene in less than six months from this date." The petition was re-
ferred to a committee, which reported favourably on July 31, and
on that day both branches passed resolutions permitting the West
Side, Battery, Yonkers Ry. Co. to construct the experimental line in
Greenwich St. If this proved successful, this company was to be per-
mitted to extend the line along Ninth Ave. to Yonkers. The
Broadway and Yonkers Patent Ry. Co. was to be permitted to con-
struct a similar line from Battery Park along Broadway to
Yonkers, and the East Side and New Rochelle Patent Ry. Co. was to
be allowed to build one parallel St. and Third Ave. to New Rochelle,
guaranteed in return for 5% of the gross earnings of the several railways. The resolutions, however, were vetoed by the mayor on Aug. 15, and before the board could repass them, A. T. Stewart applied for and obtained an injunction to prevent the council's acting on the veto, on the ground that the proposed
roads would deprecate the value of his property on Broadway.—

Exposé of the Facts Concerning the Proposed Patent Ry., Enterprise
(1866), 5, 15-46. See, further, July 23, 1867.

The Atlantic cable (see July 27) is landed at Heart's Content.

Newfoundland, and the great enterprise is at last successfully com-
pleted.—Field, Hist. of Atlantic Telegraph, 350 et seq.

New York receives the news of the successful laying of the Atlan-
tic cable.—Field, Hist. of Atlantic Telegraph, 385-86.

Emma, Dowager Queen of the Sandwich Islands, arrives at New
York after a European tour. The city's first royal woman visitor
takes up her residence at the Bremont House.—N. Y. Times,
Ag 9, 1866. During her stay in New York, the queen visited
Greenwood Cemetery, the Navy-Yard, the U. S. frigate "Ver-
mont," the Broadway shops, and Trinity Church. She enjoyed also
a sail around the harbour.—Ibid., Ag 10-13, 1866. On Aug. 13,
she left for Washington.—Ibid., Ag 14, 1866.

"The Peace of Prague, finally ended the Austro-Prussian war.
It provides for the dissolution of the old German confederation and
the formation of a new one from which Austria is to be excluded.
Prussia receives Schleswig-Holstein, Hanover, Hesse, Nassau, and
the free city of Frankfort, and Saxony is to enter the new North
German Confederation. Austria promises to cede Venetia to Italy.

—Lewis, Hist. of Germany, 704-5; Andrews, Hist. of Development
of Modern Europe, II, 251-52.

The common council resolves that the freedom of the city be
conferred upon Pres. Johnson and that the governor's room in the
city hall be placed at his disposal during his stay in New York.—
N. Y. H. S. Collections (1885), 142-43.

The mayor and common council direct the street commissioner
to "remove the unused railway-tracks, switches, sleepers, turn-outs,
and all incumbering Greenwich street, in front of premises for-
merly known as Atlantic Garden [see S 2, 1860], and heretofore
used by the Hudson River Railroad Company, as the same are a
nuisance, and the street being almost impassable for vehicles."

—Proc, App'd by Mayor, XXXVI: 317. The Bowling Green building
tion of, II, III: 590.

Pres. Johnson, the secretary of state, the secretary of the navy,
and the postmaster-general, are welcomed to New York with a
monster demonstration. The ships in the harbour and most of the
down-town buildings are decorated with flags and bunting, and
patiotic inscriptions and mottoes are everywhere. Through streets
lined with people, the procession passes from the pier to City Hall
Park, where the presidential party is conducted to the governor's
room and formally welcomed by Mayor Hoffman. From the city
hall the party drove to Delmonico's. Here the president reviewed
the troops and addressed the people. In the evening a great ban-
quet in his honour was held at the hotel.—N. Y. Times, Ag 30, 1866.
On Aug. 30, after a drive through Central Park, the president went
to West Point.—Ibid., Ag 31, 1866. See also Clewes, Twenty-Eight
Trees, Wall St, 289-95, and views in Harper's Weekly, X: 577,
581, 585.

The corner-stone of the German Hospital, at Fourth Ave. and
77th St. (see Fig, 9), is laid.—Ireland, New Y. 's and Its Institutions,
379, et seq. The hospital was opened for the reception of patients
in 1869 (q. v., S 13).

The "Black Crook" makes its first appearance at Niblo's
Garden. The playbill of the evening is in the Locke collection.

N. Y. P. L.

The corner-stone of the Church of the Messiah, w. cor. of
Park Ave. and 34th St., is laid.—N. Y. Times, O 4, 1866.

St. Patrick's Cathedral on Mott St. (1809-1815) is destroyed by
fire. It was rebuilt, and re-dedicated on March 17, 1868 (q. v.).

—Farley, Hist. of St. Patrick's Cathedral, 53, 62, 101. See also
Harp. Weekly, Jan 2; The Experimental.

Venetia is formally ceded to the Italian government, and the
union of Italy is complete with the exception of the city and terri-
try of Rome, which is controlled by the pope.—Andrews, Hist. of
Development of Modern Europe, II: 400.

St. John's Park has been sold to the Hudson River Railway Co.
for $1,000,000.—N. Y. Times, O 20, 1866. See N 21, 1867.

—From Oct. 28th, the centennial anniversary of St. Paul's
Chapel was celebrated.—N. Y. Times, O 29, 1866. Hist. Recollec-
tions of St. Paul's Chapel.

The corner-stone of Temple Emanu-El is laid on the corner of
13 St. and Fifth Ave.—N. Y. Times, N 1, 1866; L. M. R. K,
III: 929. It was dedicated on Sept. 11, 1868 (q. v.).

Steinway Hall is opened in the rear of 512 East 44th St., extend-
ing to 115 St.—Brown, Rec. of N. Y. Stage, II: 515; L. M. R. K.,
III: 986. Henry Engelhard Steinway arrived in New York from
1866

Sons. They started making pianos in a small building in Varick St., near Broadway. Their business increased so rapidly that in 1859 they built a large factory on the ground bounded by Fourth and Lexington Aves., 52d and 53d Sts., and in 1863 a new warehouse in East 14th St. near Irving Place. —Lossing, Hist. of N. Y. City, II: 680-81. Steinway Hall was demolished in 1916.—World, Jl 9, 1916; L. M. R. K., III: 937.

Nov. 31

Carl Shapiro, whose experiments and successes in scientific mining and engineering are well known," is in Washington "endeavoring to induce the President or the proper Department to recommend the removal of the rocks at Hell Gate, by the means of nitroglycerine and electricity.”—N. Y. Times, N 13, 1866. See Jl 1869.

The Chamber of Commerce gives a testimonial banquet to Cyrus W. Field, in acknowledgment of his efforts in bringing about the successful laying of the Atlantic Cable." The banquet is held at the Metropolitan Hotel. In his speech, Field gives a graphic history of the cable enterprise.—N. Y. Times, N 16, 1866. See also illustration in Harper's Weekly, X: 760.

Dec. 20

Dr. Samuel Osgood in an address before the N. Y. Historical Society speaks of New York's marvelous growth since the close of the war. He says, "the city is distressed by prosperity. The scarcity of houses, the costs of rent, living, and taxation are grievous and driving a large portion of our middling class into the country."—Osgood, Discourse Delivered before the N. Y. Hist. Soc., N 20, 1866, 44-55.

The old Bowery Theatre (see Ag 30, 1860) is sold at public auction for $100,000.—N. Y. Times, N 24, 1866. See L. M. R. K., III: 937, and view and description in Harper's Weekly, X: 769, 773.

1867

In this year, negotiations between Austria and Hungary for harmony and unity ended with the "Compromise of 1867," and the dual monarchy of Austria-Hungary replaced the former Austrian Empire. Francis Joseph was crowned king of Hungary.—Hazen, Europe since 1815, 393 et seq.

In this year, the Dominion of Canada was established by the union of Upper and Lower Canada, Nova Scotia, and New Brunswick. The other provinces of British North America were admitted at various times later.—Hazen, Europe since 1815, 528-50.

In this year, Jas. Fisk, Jr., in connection with Jay Gould, succeeded in making a large sum of money in Erie stock. "By an unscrupulous combination, ... they got control over stock to the amount of $10,000,000, and were thus able to depress the general value of the stock. These profits, ... amounted, is said, to $1,000,000. An arrangement was then entered into by which Fisk and Gould obtained absolute possession and control of the Erie Railroad, the other conspirators receiving enormous sums of money as their portion of the plunder." From that time until Fisk's death (see Jn 6, 1872), the road was under their management.—Harper's Weekly, Ja 20, 1867; N. Y. Times, passim.

Valentine's Manual was not published in this year. See 1841: F 12, 1866.

1867

This year was published, by Frederik Muller, in Amsterdam, A Bibliographical and Historical Essay on the Dutch Books and Pamphlets relating to New-Netherland, and to the Dutch West-India Company and to its possessions in Brazil, Angola, etc., as also on the maps, charts, etc. of New-Netherland, with facsimiles of the map of New-Netherland, by N. J. Visscher and of the three existing views of New-Amsterdam. Compiled from the Dutch public and private libraries, and from the collection of Mr. Frederik Muller in Amsterdam, by G. M. Asher, L. L. D., Privat-Docent of Roman law in the University of Heidelberg. Although not published until 1867, it was ready for the press in 1853.

In this year, the later parts of A Dictionary of Books relating to America, from its discovery to the present time, by Joseph Sabin, were published. The subject-matter is arranged alphabetically under the names of authors, and, in the case of anonymous writers, under the most obvious subject. The parts were later collected into volumes, the first of which appeared in 1868. Mr. Sabin died in 1881, at which time 13 volumes had appeared. This task was suspended until Mr. Wilberforce Eames persuaded the son, Jos. F. Sabin, to continue it, Mr. Eames assisting in collecting and arranging material. Mr. Eames began work at "Pennsylvania" and edited Vols. XIV to XX which appeared between 1884 and 1892. Succeeding parts were issued from time to time up to 1892, when full volumes and a portion of the twentieth (comprising in all 116 parts) had appeared, carrying the dictionary through "Henry H. Smith." As this goes to press (1876), Mr. Eames is working on the remainder of Vol. XX ("Smith" to "South"), and hopes to issue it in the near future.

In this year was published Colonial Records of the N. Y. Chamber of Commerce, 1768-1854, ed. by John A. Stevens, Jr.

In this year, John A. Reeder published a Report to the president and directors of the New York Bank Company, on the proposed East River Bridge. The author was appointed chief engineer for the erection of the New York and Brooklyn Bridge. This is a report of plans proposed by him, which were eventually brought to fruition in the successful operation of New York's first suspension bridge.

In this year was published a "Map of the boulevard, as established by act of legislature, and plan of grand entrance to Central Park, with the maps of the line of 3d avenue from 59th to 110th street; compiled and drawn by J. Crofton, 1867;" size 11 x 8 ½ in. See also N 25.

In this year, The Evening Telegram was founded by James Gordon Bennett.—King's Handbook (1894), 622.

In this year, The News was founded, edited by Benjamin Wood.—King's Handbook (1893), 622.

The stock quotation and receipts called "tickers" are first introduced.—Eames, N. Y. State Stock Exchange, 51.

In this year, the county (or Tweed) courthouse, begun in 1861 (q.v., D 26) but not yet completed, was occupied. It stands on the site of the second almshouse.—15th Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1910), 398-99; L. M. R. K., III: 974. In addition to the appropriation made for this building in 1862 (5 v., Ap 9), $100,000 was added for its completion and furnishing and further work in 1868 and later years, and by 1872, through the peculations of the Tweed Ring, it had cost many millions.—Laws of N. Y. (1868), chap. 854 (1869), chap. 875; (1870), chap. 381; (1871), chap. 83; Disturnell (1876), 541; Rhodes, Hist. of U. S., VI: 79-98.

The courthouse is shown on Pls. 152-3 and 163, Vol. III; Harper's Weekly, XV: 856, 859; and Man. Com. Coun. (1868), 639. There was a fire in March 17, 1832 (q.v.), where a picture was published as the house then appeared. "To-day the house is but a ruin. Its pitched tiling have given place to a flat roof; its balustrades are seen no more; its portico and columns, its carvings and hetchments, even its doorways, are gone. The broad halls and spacious chambers where the courtly aristocracy of the Province was wont to meet in gay and joyous thought, have been broken into small rooms which now serve as petty shops for tailors and cobblers, or the humble abode of seamen. The fluted pillars in the hall are fast rotting away, yet in their decay convey, to an eye not unused to massive structures, a sense of stately grandure; while without, only the dull and stony stare of the dilapidated old lion, who still wearily looks down as he did a hundred years ago upon the everlastings movements of the seething life below, seems to mark this once princely mansion from his taller and upstart neighbors."—From "Biographical Sketches," by John Austin Stevens, Jr., in Col. Rec., Chamber of Commerce, 1876-1878 (pub. 1867), 61, 64-65. The house was demolished in 1881 (q.v., N 12).

In this year, the commissioners of Central Park commenced...
1867 the long-delayed development and improvement of Mount Morris
— Square (see My 10, 1865; Mr 4, 1841; 1854; D 12, 1865; S 55, 1865). The work was prosecuted under supervision of the
chief landscape gardener Ignatius A. Pilate, who died Sept. 17, 1870, but
the work was carried out according to his design.—1st Ann. Rep.,

— During 1867-68, definite progress was made in laying
out streets north of 155th St. and Sixth and Seventh Aves. northwest of
Central Park were being opened. The Circle at Eighth Ave. and
59th St. was opened on March 2. The square between 58th and
59th Sts., west of Fifth Ave., was laid out, and the following year
was filled in. The "Road of Public Drive" (the Boulevar) was
being regulated and graded from 59th to 155th St. Eighth Ave.
was being graded, but this work was hampered by extraordinary
legislation of a contradictory character.—12th Ann. Rep.,
Comrs of Cent. Pk. (1868), 51, 53, 57, 59; ibid. (1869), 77.

— The improvement of the street plans reports the following buildings
among those "erected" this year (plans filed or work begun):
National Park Bank, at 214 and 216 Broadway (adjoining the
Herald building); the depot of the Hudson River R. R. Co.
on St. John’s Park; the Colored Orphan Asylum, on the north side
of 143d St., west of Tenth Ave.; Edwin Booth’s Theatre, at the
south-east corner of Sixth Ave. and 23d St.; Tammany Hall on the
north-west corner of 14th St. between Sixth and Seventh Aves;
and a fire alarm bell-tower octagonal in form, 14 ft. high, on the north
side of 25th St., between Second and Third Aves.; the Fourth Ave.
addition to A. T. Stewart’s store, between 9th and 10th Sts.—

— In this year, Eliza Grotezett made an etching of Boulange’s
Village and Church, which was reproduced, in 1875, in her book
of Prints from the Battery to Bloomingdale. It is shown on Pl.
153-2, Vol. III.

— In this year, a photograph was made of the New York Hospital;
it was demolished in 1869. It is reproduced and described as

— In this year was published, by J. F. Lloyd, Llloyd’s mammoth
map of the business portion of New York city.

1867

Jan. 17

At the annual meeting of the Washington Market, the
market from Fulton to Dey
16 St., is almost wholly consumed by fire. The former market on
the ground burned in 1860 (q.v., Jl 11). Though Washington Market
proper, or at least the nucleus of it, dates back to 1822, the property
burned in 1867 was not used for market purposes until 1851, the
ground on which it stood having been reclaimed a year or two before.
states that it was Washington Market proper that was burned in
1867.

A public meeting in favour of impartial suffrage is held at
Cooper Institute. The Rev. Mr. Garnett, a negro preacher, makes
the principal address.—N. Y. Times, Ja 22, 1867.

A large meeting is held at Cooper Institute “to consider the
subject of the disfranchisement and suffering now prevailing in
several of the Southern states, and to adopt measures of relief.” Speeches
are made by Peter Cooper, Henry Ward Beecher, Horace Greeley,
and others, and resolutions are passed that a committee be appointed
to take up subscriptions, and that the clergy of all churches be asked to appeal to their congregations.—N. Y. Times,
Ja 26, 1867.

The committee of the state senate appointed in 1866 (q.v.,
Ap 20) to consider the subject of rapid transit on Manhattan Island
reports that, “Among the plans for an elevated railroad, that
presented by Mr. C. T. Harvey [see Ap 20, 1866] appeared to be
the best, and the commission recommended that the privilege of con-
structing one-half a mile in the southern part of Greenwich Street
[see Jl 14, 1866], as an experiment, be granted by the Legislature.”
The committee also states “That in the opinion of this Commission
the best method of speedily attaining the design contemplated by
the senate resolution . . . is by the construction of underground
railways.

That in view of the prospective increase in travel there should
be one line of such railway from the Battery to City Hall Park,
under Broadway, connecting at the City Hall Park with two or
more lines of underground railway, each with double tracks, east
and west of the line of Broadway.

“that to accommodate the larger passenger transportation the
following routes are recommended, each connecting with the said
first mentioned track at the City Hall Park:

One under Chatham street to the Bowery and Third Avenue
to the Harlem River.

The other under Park Place (or Murray or Warren street or by
the most feasible route) to Hudson street, thence under Hudson
street to Eighth Avenue, thence under Eighth Avenue to Broadway,
thence under Broadway to Ninth Avenue, thence under Ninth
Avenue to the Harlem River.

The line under Broadway between the Battery and City Hall
Park to be constructed only as part of one or more of the through
lines.”—Statutes and Docs. Affecting the Elevated Railways in the
City of N. Y. (1866-1885), in Y. P. L., Walker, Fifty Years of
Rapid Transit, 60-70. The committee’s recommendation in regard
to the elevated road was carried out by the legislature on April 22
(q.v.).

The building erected in 1840 by the Society Library at the south-
west corner of Broadway and Leonard St., but now occupied by
S. B. ChittenDan & Co., is destroyed by fire.—N. Y. Herald, F 13,
1867; L. M. R. K., III, 977. See also view and description in

The well-known pear-tree planted by Gov. Stuyvesant,
and which has stood for two centuries, came at last to a sudden demise
during the latter part of last week. This old and famous tree stood on
the corner of Thirty-third-street and Third-avenue, in a circular
inclosure of iron railing, erected, we believe, by Mr. Wainwright,
descendant of the old Dutch Governor. The destruction of this old landmark is said to have resulted from a collision
of vehicles, one of which was thrown against the tree with sufficient
force to break it down. Laborers were engaged in removing the
limbs and trunk yesterday, which were proclaimed obstructions
to travel.—N. T. Times, F 27, 1867. See views in Man. Com.
Cen. (1866), 532, and Grotezett, Old N. Y., opp. p. 99. In 1878
(Jl 15), the tree was enclosed with a wooden railing. The
N. Y. Historical Soc. owns a cross-section of this tree.

The rebuilt Academy of Music (see My 21, 1866) is opened.—
Mar. 15, 1867; L. M. R. K., III, 982. See also Lossing,
His. of N. Y. City, II, 689.

Campiontoller Connelly reports to the legislature, in detail,
regarding unexpired appropriations. Among these items are the
following in the street department:

Battery enlargement .......................... $97,918.42
improvement .................................. 8,366.52
Bridge over Broadway .......................... 14,661.00
Counties Reel, blasting, etc. ................. 11,759.00
Diamond ....................................... 4,438.00
Fourth Avenue Parks .......................... 7,571.48
Grading Hamilton Square ........................ 50.00
Madison Park, iron railing ...................... 39,847.00
Mount Morris, improvement of .............. 98.56

—From comptroller’s letter-book No. 153, p. 40

The New York Chapter of the American Institute of Architects
is organized.—Proc., Ann. Convention A. I. A. (1867), 25; Econ.
Past, Mr 20, 1867. The Institute was founded as a local organi-
zation in 1857 (q.v.), and re-organized into a federal body in 1867.—
President’s address in Third Ann. Convention, 1869. See also Sturgis,
Dict. of Arch. and Building (1902), under “Societies of Archi-
tects.”

The Evening Post publishes the following description of the city:

Manhattan Island, from the Battery to the Spuyten Duyvil
Creek, is thirteen and a half miles long, an average of one and
three-fifths miles wide, and contains about fourteen thousand acres
of land, of which less than a thousand are taken up by parks
and public places. It has about thirty miles of water front upon two
of the finest estuaries in the world; on the opposite shores of which lie
two great tracts, capable of accommodating each a population twice
as large as that New York now has.

By its situation and other advantages New York is destined to
remain the centre of commerce for the American continent. It
has already nearly a million inhabitants, miserably accommodated
for the most part. There are probably three thousand families who
derive their support directly from daily labor performed by some
of their members in the city.

At present New York is the most inconveniently arranged
commercial city in the world. Its wharfs are badly built, unsafe,
and without shelter its streets are badly paved, dirty, and neces-
sarily overcrowded; its warehouses are at a distance from the ships,
and for the most part without proper labor-saving machinery for
The quick and inexpensive transfer of goods, its railroad depots having no proper relations to the shipping or to the warehouses; transportation, needlessly and enormously increased by this ill-arrangement, is made more costly yet by uneven pavements, which waste the strength of horses. Its laborers are badly lodged, and in every way disaccommodated; the means of going from one part of the city to the other are so badly contrived that a considerable part of the working population—which includes nearly all the youth and men, and thousands of women and girls—spend a sixth part of their working days on the street cars or omnibuses, and the upper part of the island is made almost useless to persons engaged in daily business of any kind in the city." The rest of a long account is given to a prophetic description of what the city will be "thirty or forty years hence." This would be about the year 1900, and many of the improvements here suggested have been realized, some of them in a far better way (particularly the transportation facilities) than was foretold in 1867.

92 Tammany Hall, on the corner of Nassau and Frankfort Sts., is sold to Charles A. Dana for $50,000. It is to be transformed into a newspaper office.—Harper's Weekly, XI: 2114; N. Y. Com. Adv., Mr 21, 1867. The Sun occupied the building from 1868 until 1919 when it was sold to M. K. & C. S. for $339,539, details of P. 1611; III: 846. If a brief account of Dana, see Stephen Fiske's Off-Hand Portraits of Prominent New Yorkers (1884), 85 et seq.

21 The Tammany Society purchases, for $80,000, the property of the N. Y. University Medical College on 14th St. between Third Ave. and Irving Place.—N. Y. Com. Adv., Mr 21, 1867; and see My 21, 1866. The cornerstone of the present Tammany Hall was laid July 30, 1868.

22 George Peabody gives a dinner at the Fifth Ave. Hotel in honour of Gen. and Mrs. Grant and the trustees of the Southern Educational Fund.—N. T. Times, Mr 23, 1867.

23 A disastrous fire occurs, resulting in the complete destruction of the Winter Garden Theatre (formerly the Metropolitan—see S 14, 1859), and considerable damage to the Southern Hotel, formerly known as the Lafayette House. The loss is estimated at $250,000.—N. T. Times, Mr 24, 1867. The Grand Central Hotel was built on the site of the theatre.—L. M. R. K., III: 986.

29 The legislature passes an act "to provide for a Convention to revise and amend the Constitution." Arrangements are made for the election of 150 delegates to that convention, on April 23.—Laws of N. Y. (1867), chap. 194.

30 An act is passed reducing the size of Hamilton Square, as laid out in the map of 1807, by discontinuing part lying between Fourth and Fifth Aves., and 66th and 68th Sts.—Laws of N. Y. (1867), chap. 196; L. M. R. K., III: 970. The square was closed in 1868 (q.v., Ap 20).

31 A hotel is opened from Russia for 7,200,000.—Rhodes, Hist. of U. S., VI: 211-13.

41 The site of the U. S. Revenue Dock (Barge Office) on the southwest end of the Battery is bought by the government from the city for $40,000. The cost of construction work, etc. to June 30, 1875, was $241,778.—Ann. Rep., Supervising Architect, U. S. Treasury Dept. (1875), 191; Proc. App'd by Mayor, XXXIV: 395.

42 On this day, the author was born, in the brown stone house still standing on the south-east corner of Madison Ave. and 77th St, at that time the residence of his grandfather, Isaac N. Phelps, and now occupied by Mr. J. Pierpont Morgan.

44 Much of my playtime in early childhood, Spring, Autumn, and Winter, was spent in the pleasant garden which stretched from street to street back of my grandfather's house, and during most of this time my family occupied the "dower-house," on the corner directly across the avenue. From the upper windows of this house I used to watch the ships passing up and down the East River. Lexington Avenue was still a pretty rural district, and there were but few signs of civilization to the north, although from my nursery window, looking north-east toward Zion Church, the view was almost the same as that which existed fifty years later, when we finally left the house.

45 The city conveys to the U. S. government, for $500,000, the lower end of City Hall Park, bounded by Broadway, Mall St., and Park Row, as a site for a post-office (see Je 26, 1866). The property embraces an area of 65,259 sq. feet. The conveyance is made "Upon the express condition, however, that the premises above described and every part and parcel thereof, and any building that may be erected thereon shall at all times hereafter be used and occupied exclusively as and for a post-office and court-house for the United States of America and for no other purpose whatever, and upon the further condition that if the said premises shall at any time or times cease to be used for the purposes above-mentioned or for some one of them or if the same shall be used for any other purposes than those above specified, the said premises hereby conveyed and all right, title, estate and interest therein shall revert to and be re-entrusted by the said parties of the first part, their successors and assigns and the said parties of the first part shall thereupon become the absolute owners of the said premises and every part thereof with the appurtenances and they may then re-enter the said premises and every part thereof in the same manner and to the same extent as if these premises had not been executed."—Liber Deeds, MXII: 142 et seq.; Ann. Rep., Supervising Archit., U. S. Treas. Dept. (1875), 191, 17th Ann. Rep., Am. Scien. & Hist. Pres. Soc. (1910), 401-2. See also Harper's Weekly, XI: 2, and L. M. R. K., III: 974. See, further, Je 3, 1867, and My 6, 1869.

The Rutgers Female Institute (see 1860) receives a full collegiate charter and is hereafter known as the Rutgers Female College.—Man. Com. Coun. (1870), 325. See 1883.

45 The street bridge at the junction of Broadway and Fulton streets is "ready for public use. It has been erected at a cost of $14,000.—N. T. Times, Ap 16, 1867. This was the Lower bridge and was built by the city because Broadway, particularly the narrow portion of it below the Park, was so overcrowded with vehicles that it was "impossible at certain times of the day to pass from one sidewalk of the street to the other without imminent danger to life and limb."—U. S. Bur. of Hist. Maps, Second Series, T. 690; CVI: 151; CIX: 260, 394. See also L. M. R. K., III: 926, and Harper's Weekly, XI: 333. A bridge across Broadway at Fulton St. had been proposed as early as 1852.—Man. Com. Coun. (1858), 444. The bridge proved a failure and in 1868 (q.v., JI 21) was ordered removed.

The legislature incorporates the New York Bridge Co. with an initial capital of $500,000, and authorizes the city of New York and Brooklyn to subscribe for stock. This company was organized for the purpose of building a bridge across East River.—Laws of N. Y. (1867), chap. 399. See My 25.

Madison Ave. is extended from 86th to 120th St., and the extension declared a public street.—Laws of N. Y. (1867), chap. 403.

The legislature passes "An Act to provide for the construction of an experimental line of railway in the counties of New York and Westchester" (see Ja 31). This authorizes the West Side and Yonkers Patent Railway Co. (see Ap 20, 1866) to build within one year an experimental line of elevated railroad on Greenwich St., to be operated by cables attached to stationary engines. This is to be examined by commissioners and, if their report is favourable, the line is to be extended along Greenwich St. and Ninth Ave. to Yonkers.—Laws of N. Y. (1867), chap. 406.

Delegates to the forthcoming constitutional convention (see Mr 29), 160 in all, are chosen at a special election. Their names appear in the journal of the convention. The convention opened on June 4 (q.v.)—Journal of the Convention, 3-14.

The legislature passes an act "to alter the map or plan of certain portions of the city of New York, and for the laying out and improvement of the same." It defines the powers of the commissioners of Central Park in laying out, widening, grading, and improving streets, avenues, roads, public squares and places, between 49th and 57th Sts., west of Eighth Ave.; also new pier and bullhead lines from 57th St. to Spuyten Duyvil Creek. Such powers shall cease on May 1, 1872.—Laws of N. Y. (1867), chap. 697.

The N. Y. and Harlem R. Co. is directed to construct within two years, up to the grade of Fourth Ave., a "substantial stone or brick wall, with suitable coping upon each side of their road, upon a line not extending twenty-six feet in the clear at any point of
THE ICONOGRAPHY OF MANHATTAN ISLAND

June 3

1867 measurement below the tunnel at Ninety-second street. . . . 10 and from the north side of Seventy-ninth street to the south side of Eighty-eighth street, where the road bed or track is below the grade of the avenue, and where the same is not arched or covered, and shall also, within said period, extend upon said wall (except at street crossings, where bridges are, or shall be constructed) a substantial iron fence for the protection of persons using said avenue.

The company is also to construct “an arch of masonry work over the track of the road . . . in Fourth avenue . . . from the south line of Eighty-eighth street to and connecting with the rock cut so called on Ninety-second street.”—Laws of N. Y. (1867), chap. 822.

Jefferson Davis, having been brought before the U. S. circuit court at Richmond, Va., for trial on a charge of treason, is released under $50,000 bail. Horace Greeley heads the list of 16 bondsmen.

—Rhodes, Hist. of U. S., VI: 50–59. The Union League Club objected to Greeley’s action, and, on May 3, he wrote defending himself on this point, and also for advocating clemency toward the recent rebels.—Letter of Horace Greeley, etc. (1867), in N. Y. P. L.

The first New York tenement-house law is passed by the legislature. After defining a tenement-house, this law provides that every such building shall have a fire escape approved by the building inspector, a ventilator in the roof over the main hall, receptacles for garbage and other refuse, and proper sewage facilities. In addition to basements or cellar rooms not a foot from the board of health, and even then they must be at least seven feet high and one foot above the sidewalk, and have an open area in front, properly drained, and a window of at least nine square feet; all halls must open directly to the air; each habitable room must be at least eight feet high and have at least one window connected with the open air or a ventilator leading into the hall or into another room connected with a hall, and the ventilation, and the keeping of animals, except dogs and cats, are prohibited; there must be an open space, between buildings erected on the same lot, of 10 feet if they are one story high and an additional five feet for each additional story; new tenements must have a chimney or open fireplace for each set of rooms, and running water at one or more in every habitable room. The building commissioner must have free access to tenements at all times. Violations are punishable by fine or imprisonment, or both.—Laws of N. Y. (1867), 908; De Forest & Veller, The Tenement House Problem, I: 94–97. See also 16, 1879. A census of tenement-houses in this year “revealed the fact that 18,582 existed, of which 5,814 were reported in bad sanitary condition from neglect, and 9,485 in bad sanitary condition from any cause.”—Gould, The Housing of the Working People (1895), 72.

The common council orders that action be taken against persons closing Little Water St. or Mission Place, and that the same be restored to public use.—Proc., App’d by Mayor, XXXV: 109–10. See Ap 3, 1809; My 16, 1857.

The New York Bridge Co. (see Ap 16) appoints John A. Roebling engineer in charge of the construction of its bridge across the East River. Mr. Roebling was injured in the course of his work and died July 22, 1869. His place was filled by his son Col. Washington A. Roebling, under whose supervision the work was completed.—Green, Complete Hist. of the N. Y. and Brooklyn Bridge, 12. See My 24, 1883.

In this month, a map was made of the public drive (now Riverside Drive) from 136th to Dyckman St.—See original filed in bureau of topography, borough president’s office, as Map No. 2320. See also, in the same office, Map No. 2422, which was probably made in this year, and which shows the drive from 72d to 129th St., including the lay-out, elevations, and property.

At 12 o’clock on this day the competition for the plans for the new post-office (see Ap 11) ended.—N. Y. Times, Je 2, 1867. An exhibition of the plans submitted was held from June 6 to 8 in the rooms of the board of underwriters, 156 Broadway. One of the papers said of them: “There were fifty-one drawings with accompanying plans, of which several are worthy of examination. The majority, however, of the designs are wanting in originality and appositeness, and perhaps a result quite as satisfactory would have been reached at less expense, had an architect of standing been engaged. Selection was made from among the best of the several of the most elegant, and combine their most excellent points . . . as it is averred that our most distinguished architects have, for obvious reasons, declined to stake their reputations upon the decision of a Commission composed of men who are not necessarily competent judges of the art, it will not be wonderful if the very best result is not reached by the method that has been pursued.” Prices of $1,000, $2,000, $5,000, and $10,000 were offered for the four best plans, $500 each for the next five, and $500 each for the following five. The 31 plans were briefly described.—Ibid., Je 7–9, 1867. See, further, D 28, 1867, and F 29, 1868. The post-office was begun in June (q.v., Ag 9).

The state constitutional convention, delegates to which were elected on April 23 (q.v.), opens in the assembly chamber at Albany, and Wm. A. Wheeler, of Malone, is chosen president of the convention. The work of the convention was not concluded until Feb. 28, 1868 (q.v.).—Jour. of the Convention, 15, 1261. “It met nearly four times as long as the Convention of 1821, and twice as long as the Convention of 1846.”—Lincoln, Const. Hist. of N. Y. T., III: 419. The debates and proceedings of the Convention of 1867 [published in 5 vols.] . . . for their learning and breadth of discussion of Constitutional questions will always be of interest to students of the political history of this State.—Hill, Development of Constitutional Law in N. Y. State, 29.

Bavard’s Museum (later Daly’s Theatre) opens at 122 Broadway.—Brown, Hist. of the N. Y. Stage, II: 522. See also L. M. R. K., III: 983.

The Citizens’ Association submits to the constitutional convention its so-called “alterations in the fundamental law of the State.” Many of these suggestions seem very modern, such as “an appointed instead of an elective judiciary,” the appointment, instead of election, of “the Secretary of State, the State Comptroller, the State Treasurer, the Attorney-General, the State Engineer and Surveyor, the Canal Commissioners and the Inspectors of State Prisons—said officers to constitute a cabinet for the Governor,” “the abolition of the office of President of the Senate,” “the abolition of the office of Speaker under constitutional qualifications, and “Representation of Minorities.”—Alterations in the Fundamental Law of the State, proposed by the Citizens’ Association of New-York.

The common council resolves “That the Croton Aqueduct Board be, and they are hereby directed to remove the fountain located in the Civic Halls Park, and to place the same in Madison Avenue [Madison Square].”—Proc., App’d by Mayor, XXXV: 135.

The North German Confederation, composed of 22 states, is established. The king of Prussia is president.—Andrews, Hist. of Development of Modern Europe, II: 255–56.

Work is begun on the experimental elevated road in Greenwich St. (see Ap 22).—Harper’s Weekly, XII: 477. The excavation work was made dependent on the battery after the settlement of the question of their further, or laying the corner-stone of their new Hall in Fourteenth St. . . . July 4, 1867. Also a brief history of the origin and early history of the Society, by Rushmore G. Horton. See Je 4, 1868.

The “America’s Cup,” won by the “America” on Aug. 22, 1851, is presented by the owners of the yacht to the N. Y. Yacht Club with the condition that it be “perpetually a challenge cup for friendly competition between foreign countries.”—The America’s Cup (1874), 117–18.

Brigiam Young, Jr., and his suite are in New York, after a 14 mission to Paris.—N. Y. Times, Je 14, 1867.

At a special meeting of the Union Republican general committee of New York at headquarters at the corner of Broadway and 23d St., Gen. Grant is nominated for president.—N. Y. Times, Jl 24, 1867. See D 4.

The cornerstone of the new building of the Coloured Orphan Asylum (see Jl 13, 1867) is laid at the north-west corner of 143d St. and Tenth Ave. The building was completed in 1868.—Richmond, N. Y. and its Institutions, 302 et seq. The present home of the Institution (1926) is at 261st St. and Riverside Ave.

The best known of the old buildings of the City on West 23d St. (see N. Y., 1863), is Sept. altered into a complete theatre by C. H. Garland and opened as the Fifth Avenue.—Brown, II: 400; L. M. R. K., III: 983. See Ja 25, 1869, for its next transformation.
1867

Sept. 16. The Board of Aldermen pass a resolution directing the street commissioner "to remove the rail-tracks which were laid down on the Battery Grounds on Sunday, the 15th inst., and to restore, or cause to be restored, the walk thereon to the condition in which they existed previous to laying down such railroad tracks."—N. Y. Times, S 17, 1867.

Oct. 6. The reconstructed St. George's Church on Stuyvesant Square (see Nov. 14, 1865) is opened for public worship. It was consecrated Dec. 19, 1867.—Anctic, Hist. of St. George's Church, 235.

16. The new iron bridge over Harlem River, begun in 1866, is formally opened to the public. The old bridge is to be removed soon.—N. Y. Times, Oct. 17, 1867. A history of the construction and a description of the new bridge is contained in ibid.

22. The Fort Greene street property, bounded by Thirteenth Ave., Gansevoort St., West St., and West 12th St., is sold by the city at public auction.—N. Y. Times, Oct 23 and 25, 1867.

Nov. 7. The Astor Library has been in existence fourteen years, and now possesses one hundred and thirty-five thousand volumes, while the capacities of the present buildings are equal to the accommodation of three hundred and fifty thousand. Four thousand volumes are added annually to the new plan. The map accompanying the report says: During the past year there have been about twenty-five thousand readers in the two halls, and about fifty thousand volumes read. Besides these, large numbers have been admitted to the alcoves—authors, statisticians, writers, members of the press, etc.—Hist. Mag., 22 ser., III: 319.

19. Chas. Dickens arrives at Boston on his second visit to America. He commences a series of readings from his own works, in the principal cities of the U. S.—Dolby, Chas. Dickens as I knew him, 150-60. See D 7.

21. The 200 trees which recently adorned St. John's Park have all been felled and the stumps extracted. The temporary freight depot of the Hudson River R. R. (see O 21, 1866) will soon be erected.—N. Y. Com. Ady., Nov. 21, 1867; L. M. R. K., III: 571; descrip. of NY Cen. Park by Matt. P. S., 259.

A plan for developing the west side of the city, from 50th to 155th St., is adopted by the board of commissioners of the Central Park, under the act of April 24, 1867. This district embraced property owned by more separate persons, and paid more taxes, than did all that part of the city above Astor Place in 1811, when the commissioners for laying out the city reported the plan which, in 1867, was amended by the new plan. The map accompanying the report of Andrew H. Green, comptroller of the park, shows the new streets, avenues, public squares and places, new pier and bulkhead lines, and the elevations above high water. The parts of former streets, avenues, and roads, not shown on the map, were abandoned and closed. By comparison with the Commissioners' Map of 1819-1818, it is seen that the Old Bloomingdale Road is thus finally abandoned and replaced by the "Road or Public Drive" (the Boulevard or extension of Broadway) is substituted in its place.—11th Ann. Rep., Bd. of Com's of Cent. Pk. (1867), 156-66. See also Map of the Boulevard, compiled and drawn by John Croton, 1867, in Stuart collection. On June 15, 1868, the supreme court, having appointed commissioners on July 12, 1866, to open the boulevard, confirmed their report, but excluded from the plan of the boulevard certain auricular pieces of land at the intersection of the road with Ninth, Tenth, and Eleventh Aves. During 1868 the work of regulating and grading the road was in progress, it having been commenced Sept. 21. It was hoped it would be opened for travel by Jan. 1, 1871.—12th Ann. Rep., Bd. of Com's of Cent. Pk. (1868), 393; 13th Ann. Rep. (1869), 64. See also map dated March 7, 1868, filed in bureau of topography, borough president's office, as Map No. 2482.

28. The Fenian organizations of New York hold a public funeral ceremony in memory of the Irish patriots, Allen, O'Brien, and Larkin, who were recently hanged at Manchester, Eng. Fully 19,000 people parade.—N. Y. Times, N 29, 1867.

Dec. 3. The Democratic machines, Tammany and Mozart, united in his support. This time Mozart withdrew its support and nominated ex-Mayor Fernando Wood. The Republicans nominated William A. Darling, but many members of the party feared that Wood might be elected and voted for Hoffman, whose plurality exceeded 40,000.—N. Y. Sun, D 4, 1867; N. Y. Tribune, D 4, 1867.

4. "The public feeling in favor of the nomination of Gen. Grant for the Presidency, which has been rapidly increasing in this vicinity for some time past," culminates in a large mass-meeting at Cooper Institute. Speeches are made by A. T. Stewart, Judge Hilton, F. B. Cutting, Gen. Sillies, Lyman Trumaine, and others.—N. Y. Times, D 5, 1867.

Dickens arrives in New York from Boston and puts up at the Westminster Hotel in Irving Place.—Dolby, Chas. Dickens as I knew him, 180-83.

Charles Dickens gives his first reading in New York, at Steinway Hall. The series opens with A Christmas Carol.—N. Y. Times, D 10, 1867. George Dolby, his secretary and manager, afterwards wrote: "The success of the Reading in New York far exceeded Mr. Dickens's most sanguine expectations, and but for the extra exertion in reading in so large a hall as the Steinway, under the burden of an influenza cold, everything would have been in the highest degree satisfactory. He described the New York audience as being 'far better than that at Boston,' which was saying a great deal for them."—Dolby, Chas. Dickens as I knew him, 184. See Ap 18, 1868.

The commissioners appointed to select a plan for the new post-office (see Je 3), after much deliberation, decide that none of the 52 designs submitted is wholly satisfactory or worthy of recommendation to the federal authorities, and that therefore no award of the first and second premiums ($5,000 and $1,000) shall be made. They agree, however, to award prizes to the best 15 designs, and extract and draft their own. Those designs to which premiums have been awarded such a plan as will, in their judgment, meet the approval of the authorities of the United States for the purposes contemplated. The awards given were: $2,000 each to John Correa for plan No. 18, Richard M. Hunt for No. 34, N. L. Brun for No. 36, Schultz & Schoen for No. 48, and Renwick & Sands for No. 51; $1,000 each to Wm. Field, Son & Co. for No. 16, Duncan J. MacRae for No. 27, Pattier &Clinton for No. 28, Alas. Saeltzer for No. 29, and James H. Giles for No. 47; $500 each to Walter Dickson for No. 12, Hammatt Billings for No. 22, G. King & Wilcox for No. 25, Louis Burger for No. 26, and E. J. M. Derrick for No. 39.—N. Y. Times, D 29, 1867. See F 29, 1868. (This account of the competition is incomplete, and in some respects misleading. See Addenda in N. P. S. I.)

The annual report on Central Park states that the work done during the past year includes the following: "The foundation-work of a structure [the Belvedere] contemplated as a lookout at the southwest corner of the old Reservoir has been commenced. . . " The interior of the portion of the brick edifice at Mt. St. Vincent [see D 50, 1865] formerly used as the chapel of the Convent, has been decorated and fitted for the reception of the statue, and although this gallery is situated at a remote part of the grounds, it is much frequented, and is probably the most generally attractive collection and arrangement of statuary in the whole country."—11th Ann. Rep., Com's of Cent. Pk. (1868).

On this date, the comptroller submitted a printed report to the commissioners of the sinking fund in response to a resolution passed on May 21, 1867, calling for a report on the condition of the wharves, piers, and slips belonging to the city. This report is in two volumes, one covering the East River from Whitehall to 130th St., and the other the North River, from Albany St. to 155th St. The report is illustrated by careful drawings of all wharves, piers, and slips, giving dimensions, construction, cost, present value, recommendations for alterations, extensions, repairs, etc.

1868

In this year, Gladstone became prime minister; his "Great Ministry" lasted until 1874.—Hazen, Europe since 1815, 464-66. In this year, Leon Gambetta came into prominence in France as an opponent of Napoleon III and the Empire. He was one of the

1868-1876 1929
1930
THE ICONOGRAPHY OF MANHATTAN ISLAND

In 1868, the last vestiges of the Third Republic in 1870—Hazan, Europe since 1815, 281-82.

About this time, the "boneshaker," a wooden bicycle constructed by Pierre Lallement in Paris in 1865 and patented by him in the U. S. in 1866, became popular in England, France, and America.—Encyclopaedia Brit. VII: 683, with cut.

In this year, George Imms, Homer D. Martin, and Alexander H. Wyant, considered the three greatest American landscape painters, were elected to the National Academy. All of them spent some years in New York, and all are represented in the Metropolitan Museum of Art.—Clement & Hutton, Artists of the Nineteenth Century, 1: 382-83; II: 96-97, 353; Isham, Hist. of American Painting, 155 et seq.

In this year, with the widening of the Brooklyn Bridge into the new Boulevard, an old house was torn down on the west side of Broadway, between 75th and 76th Sts., which was erected before the Revolution, and in which Louis Philippe taught school during his exile in New York. It was formerly the homestead of the Somersfield family, who once owned nearly all the surrounding part of the island not included in the extensive Harsen estate. For a description of the house, see Stone's Hist. of N. Y. City, 597-98. See also Greatorex, Old N. Y., 184-90, and L. M. R. K., III: 952.

In this year, the Brooklyn Reformated Dutch Church (see Aug 4, 1816) was demolished. Greatorex, Old N. Y., II: 142; L. M. R. K., III: 954. A view of this church shortly before its demolition is reproduced as PI. 153-a, Vol. III.

The P. E. Church of the Heavenly Rest at 551 Fifth Ave., between 45th and 46th Sts., was erected in this year and opened in 1869.—L. M. R. K., III: 952. The parish originated in services held in the hall of Rutgers Female College in 1865.—King's Handbook, 527. The church was destroyed in the early summer of 1924.—At the Ap. 20, 1924.

In this year, the bronze statue of Abraham Lincoln, by Henry Kirke Brown, in Union Square, was given to the city.—Cat. Works of Art Belonging to the City, 137; L. M. R. K., III: 964. The railing was erected in 1872-73.—Proc., App'd by Mayor, XL: 232; XLI: 14. For view and description, see Harper's Weekly, XIV: 153.

Bulkhead lines are established around the north-east end of the island, from 56th St. on the Hudson River to Third Ave. on the Harlem River.—Laws of N. Y. (1868), ch. 338; 3d Ann. Rep. of the Park Com'n (1872-1873), 224.

Among the buildings reported by the supt. of buildings as "erected" this year (plans filed or work begun) are the following: The N. Y. Life Insurance Company's 3-storey brick building on the southeast corner of Broadway and 10th St.; the Equitable Life Assurance Society's 5-storey granite building on the southeast corner of Broadway and Cedar St.; a new wing of St. Luke's Hospital, at the southwest corner of Fifth Ave. and 55th St.; the Orphan Asylum for Church of St. Vincent de Paul, on the north-west side of Fifth Ave. and 55th St.; and a "Belvidere or Festival Hall" in Jones's Woods.—Ann. Rep., Supt. of Bldgs. (1867-1872), 439, 439-41, 435-46, 440, 443, 450-51.

The theatres and large public halls in New York at this time were: Stadt Theatre, at 45 Bowery; Bowery Theatre, at 48 Bowery; Pastor's Opera-house, at 201 Bowery; Broadway Theatre, at 485 Broadway; San Francisco Minstrels, at 585 Broadway; Theatre Comique, at 514 Broadway; Niblo's Garden, at 578 Broadway; Olympic Theatre, at 624 Broadway; Kelly & Leon's Minstrels, at 1420 Broadway; New York Theatre, at 728 & 730 Broadway; Wallack's Theatre, at 844 Broadway; New York Circus, on East 14th St; Steinway Hall, at 109 & 111 E. 14th St.; Tammany Hall; Bryant's Minstrels, East 14th St.; Academy of Music; Wood's Theatre, at 1221 Broadway; Booth's Theatre; Pike's Opera House (see Ja. 9), at the n. w. cor. of Eighth Ave. & 23d St; French Theatre, at 79 W. 14th St. and Brougham's Theatre, on W. 24th St. All of these are described in detail in the Ann, Rep., Supt. of Bldgs. (1862-1869), 456-508.

In February, the theater was opened at 79 W. 14th St.
CHRONOLOGY

POLITICAL AND SOCIAL CHANGE: 1865-1876

1868

"The plan of the new structure to be erected in the City Hall Park for the departments of the Post-office and United States Courts has at last been fixed upon, and the work will be commenced just as soon as Congress makes the required appropriation."

29 After the failure to secure a wholly satisfactory plan by competition (see Je 3 and D 28, 1867), a committee of architects was appointed to consider all the plans submitted and to draft a new one combining the best points of each. This committee consisted of Richard M. Hunt, chairman, Renwick & Sands, N. LeBrun, J. Correja, and Schulze & Schneid. They completed their work in this month and placed the final design in the hands of Postmaster Kelly who submitted it to the authorities at Washington, by whom it was approved. The plan is described in detail.—N. Y. Times, F 29, 1868.

1869

Mar.

3 and 541 Broadway (see S 6, 1865) was completely destroyed by fire. The loss was estimated at $400,000—N. Y. Times, Mr 3 and 4, 1868. See also L. M. R. K., III: 982, and view in Harper's Weekly, XII: 188. This was on the west side of Broadway above Spring St.

6 Humpty Dumpty is produced in New York for the first time, at the Union Theatre (formerly Laura Keene's Theatre), with George L. Fox as Clown and Charles K. Fox as Pantaloon.—Brown, II: 159; III: 116–17.

10 The tearing down of St. George's chapel on Beekman St. is in progress. "At present the graves of revolutionary heroes serve as a depository for ashes and rubbish, and vessels are emptied daily from the windows adjoining, on places where a hundred years ago, was the early morning, never to be effaced, "Requiescat in pace." The six lots comprising this property are to be sold. "The property purchased from Colonel Beekman for £500 [see Jl 11, D 21, 1748; Jz 23, Mr 23, 1749] is now worth, it is said, half a million dollars."—N. Y. World, Mr 17, 1868. The property was purchased by the firm of Phelps, Dodge & Co.—Antioch, Hist. of St. George's Ch., 211–14. See also L. M. R. K., III: 931. An original sketch showing the church to process of demolition was made by Miss Greatorex and hangs in the parlour of the Chelsea Hotel on W. 23d St. It is reproduced as PL 155–b, Vol. III. See also Greatorex, Old N. T., 39–41. See further, 1871.

18 The rebuilt St. Patrick's Cathedral on Mott St., which was burned down on Oct. 6, 1866 (q. v.), is dedicated.—N. Y. Times, Mr 18, 1868. See also L. M. R. K., III: 936, under "St. Patrick's Pro-Cathedral."

184 Sorosis, the first women's club in New York, is founded. It was incorporated on Dec. 30.—Rep. of the 21st Anniversary of Sorosis (N. Y., 1893); Articles of Incorporation, Constitution, etc. (N. Y., 1892).

20 The commissioners of Central Park authorise Andrew H. Green, comptroller of the park, to title to "the public squares and plantings along the south front of a large portion of the Park, from 23d street to 89th street, and hence to 124th street and then easterly to 124th street to the 8th avenue."—Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1916), 559. This was Morningside Park. The land was acquired, between 1868 and 1870, at a cost of $1,334,092.72.—Ibid. (1916), 560–61; L. M. R. K., III: 970. See also Prendergast, Record of Real Estate. See further, O 11, 1875.

21 The first issue of the Real Estate Record and Builders' Guide appears.

30 The Metropolitan Life Insurance Co. is incorporated.—Laws of N. Y. (1868), chap. 49. Its offices in this year were at 243 Broadway.—The Met. Life Ins. Co. Its History, etc. (1908).

30 Riley's Fifth Ward Museum Hotel (see Man. Com. Cown., 1864, pp. 598, 602), on the s. w. cor. of W. Broadway and Franklin St., is being demolished.—N. Y. Times, Mr 24, 1868.

30 The Union League Club (see F 6, 1865; and F 16, 1865) is formally re-established in its new headquarters at the south-east corner of 26th St. and Madison Ave.—N. Y. Times, Ap 1, 1868. This was the Jerome residence (see 1865) which the club occupied until 1881 (q. v., Mr 3).—Descript. of Pl. 156, III: 704; L. M. R. K., III: 919, 950. See also illustration and description in Harper's Weekly, XII: 190.

Apr.

8 The cornerstone of Edwin Booth's Theatre is laid at the south-east corner of 6th Ave. and 23d St.—N. Y. Times, Ap 9, 1868.

8 See L. M. R. K., III: 982. It was opened on Feb. 1, 1869 (q. v.).

8 Butler's American Theatre on Crosby St. burns. This building was formerly Mechanics' Hall, with entrance at 472 Broadway.
1932

THE ICONOGRAPHY OF MANHATTAN ISLAND

1868

The state commissioners report that the elevated railroad in July, Greenwich St. (see Ap 22 and JI 2, 1867) is a success, and the governor authorizes its completion from the Battery to Spuyten Duyn-veld.—Harper's Weekly, XII: 475. See Jl 3.

A trial trip is made by Chas. Harvey on the new elevated railway in Greenwich St., and the rapid speed attained "leads the friends of the enterprise to hope that the problem of rapid and safe locomotion through the crowded streets of the city has been solved."—Harper's Weekly, XII: 477, and view on p. 476. See also N. Y. Times, Jl 4, 1868. A view of the trial is reproduced as A. Pl. 27,Bb, Vol. III, where the date is erroneously given as 1867. See also description of Pl. 157-8, III: 700. See, further, Jl 25.

Tammyn Hall on 14th St. (see Jl 4, 1867) is first used when the Democratic national convention opens there on this day. During the convention, which lasted until July 9, ex-Gov. Horatio Seymour of New York was nominated for president, and Gen. Francis P. Blair of Missouri was nominated for vice-president.—N. Y. Times, Jl 5-10, 1868; Brown, Hist. of N. Y. Stage, III: 84-87; Man. Com. Coun. (1868), 782 et seq. See also illustration and account of the new hall in Harper's Weekly, XII: 433, 438, and L. M. R. K., III: 939.

The supreme court declares the Loew bridge (see Ap 15, 1867) a public nuisance, especially injurious to Charles Knox (Knox, the latter, Gein's rival), and orders that it be removed within 90 days or at the option of the commission of the Mississippi

The bridge was "a failure as a public convenience" and "a serious obstacle to the free and uninterrupted uses of the streets," as well as damaging to adjoining property.—Proc., Bd. of Ald., XII: 76, 410, 530; Proc., Appd by the Mayor, XXXVI: 260-61. See also L. M. R. K., III: 926.

The city is authorized to lease a slip or basin, not exceeding 300 feet in front, at the easterly end of the Battery for the purpose of a salt water floating bath, and is directed to establish two free floating baths, one on the East River and one on the Hudson.—Laws of N. Y. (1868), chap. 879.

The Green street elevated road (see Jl 3) "is now in running order from the Battery to Cortlandt Street, and with the present machinery, the cars can be propelled, with little jarring and oscillation, at the rate of fifteen miles an hour."

The common council is directed to construct piers on the Hudson River at the foot of each street from 13th St. to Hampton St.—Laws of N. Y. (1868), chap. 881.

Aug.

Eliza Groteorex thus describes the west side of the city above 57th St.: "In Washington's time, the outskirts of New York, 'squatters' shanties' are perched on the rocks, or nestled in the hollows, sheltered but malicious; the luxuriance of the vines over those small abodes is a comfort and refreshment to the eyes: grape-vines, trumpet-creepers, scarlet-runners, morning-glories,—big posies of sunflowers, nested into almost delicacy of form and color by the deep green surrounding them, and the gray of the background of the German people, who form so large a part of the suburban population, are set out with rows long of parsley, onions, carrots, each separate growth marked in form and tint, contrasting with the deep purple of the beet-roots and the red-brown earth, empty now, but soon to be filled with some later crops.... Farther on, the old mansions, degraded to restaurants and beer-gardens, are more numerous.... All the way up the avenue we have had beautiful vistas in the Park, through the high rocks on the western boundary. They have brought the park well as far as this, and the sharp metallic 'clinic, clinic' of the drilling irons with their rhythmical ring tell the story of continual change and advance. At Elm Park (the former home of the Athorp family) we see what havoc has been made with the trees around it, within the last few months. Streets are rising from the low, irregular hollows; many deep places are being filled in; wagon-ways and go, the red shirts of their drivers making lovely points of color; the wheels crush through thick beds of weeds, yellow, purple and white; and everywhere the grass is of the brightest, freshest green, kept so by the rains which have fallen so plentifully all the spring and summer."

—Groteorex, Old N. Y. (1875), 132-34. A view of Bloomingdale Village is in Ibid., opp. p. 132.

Hamlin's request for six assistant aldermen in 1867 and partially closed in 1867 (q.v., Mr 29), is finally ordered closed by the legislature, and the streets terminating in it extended through.—Laws of N. Y. (1868), chap. 885; L. M. R. K., III: 970. See also N. Y. Times, N 6, 1921

A survey of the square laid out in lots, made in 1868 by Edward Boyd, is filed as map No. 26 in real estate bureau, comptroller's office. See also map No. 35.

Aug.

The first step toward the organization of the New York Athletic Club are taken, at a meeting held on this day. The organization was completed Sept. 8, and the constitution adopted Dec. 1. Its first boat-house was built on the Harlem River in 1870.—N. Y. A. C. Jur., (Dec., 1866), 8.

By act of legislature the city charter is amended, provision being made for another change in the legislative body. The Dongan Charter (see Ap 22, 1866) provided for a law-making body of mayor, recorder, and 6 aldermen, while 6 assistant aldermen representing the six wards, and this form continued for almost a century and a half, aldermen and assistants being added as the number of wards increased. The first bicameral council began its sessions on May 10, 1831 (q.v.), the two boards, constituted as before, sitting separately, and neither the mayor nor recorder being any longer included. The amended charter of April 12, 1853 (q.v.), retained the bicameral council, but a board of 60 councilmen "to be elected from as many districts" displaced the board of assistant aldermen. Four years later (see Ap 14, 1857) another experiment was tried, 22 aldermen from that number of wards being displaced by 17 aldermen from as many aldermanic districts, and the traditional one-year term was doubled. At the same time the very numerous councilmen were reduced to 24, six in each of the four central districts.

Now, by this latest provision, the board of councilmen disappears, and a board of assistant aldermen comes into being as damage again, elected (like the aldermen) one from each assembly or aldermanic district, and having a term (like the aldermen) of two years. After necessary adjustments the terms of the members of both boards will end at the same time.—Laws of N. Y. (1868), chap. 887. The new arrangement had been in effect only a short time when it was changed by the "Tweed Charter" (see Ap 5, 1870).

Temple Emans-El (see O 31, 1866), at Fifth Ave. and 43rd St., is dedicated.—N. Y. Times, S 12, 1868; Jewish Encyclopedia, IX: 276; L. M. R. K., III: 929. See also illustration and description in Harper's Weekly, XII: 739.

A monster Republican demonstration in honor of Grant and Colfax is held at Cooper Institute.—N. Y. Times, S 15, 1868.

The corner-stone of the Church of St. Mary the Virgin is laid at 238 W. 45th St. In December, 1868, the church was incorporated.—From records of the church, by courtesy of Haley Fisk, Esq., treasurer.

Aug.

As Gen. George B. McClellan is about to return from an extended absence abroad, the common council votes to extend the freedom and hospitality of the city to him upon his arrival in New York and also the use of the governor's room.—From original in metal file No. 374, city clerk's record-room.

Memberships in the Stock Exchange are made salable, "the October purchaser of a membership from a retiring member being hailed for by a Committee on Admissions."—Eames, N. Y. Stock Exchange, 75.

The 100th anniversary of the opening of the John St. M. E. Church is commemorated with appropriate services.—N. Y. Times, O 26, 1868.

The corner-stone of the first building of the Y. M. C. A. (founded in 1832 and incorporated on April 3, 1866, q.v.), is laid, at the southwest corner of Fourth Ave. and 23rd St. The building was dedicated Dec. 2, 1869 (q.v.)—17th Ann. Rep. of the T. M. G. A. (1870); N. Y. Times, N 1, 1868. For description of the building, see Stone's Hist. of N. Y. City, 607-9. See Mr 27, 1893.

Soon after this date, the Coster mansion, erected in 1805 (q.v., Nov., Ap 30) at the corner of 70th St. and First Ave., and purchased in 1835 (q.v.) by Anson Phelps, was demolished. The site is now covered by tenements at Nos. 315-19 First Ave. and No. 349 E. 70th St.—Liber Mortgages, DCCCXXXV: 172; L. M. R. K., III: 949; description of Pl. 153-4, III: 776. See also Stokes Records, by Anson Phelps Stokes, 13-15, 85, 151.

Ulysses S. Grant and Schuyler Colfax, Republicans, are elected president and vice-president over their Democratic opponents, Horatio Seymour and Francis P. Blair, Jr.—McKee, National Conventions and Platforms, 131-42.

Mayor Hoffman, now a Democratic, is elected governor of New York State.—N. Y. Tribune, N 6 and 7, 1868. See N 16.

Mayor Hoffman, having been elected governor (see N 3), offers to the common council his resignation as mayor (to which
Next comes the fine, breezy, opening of Madison Square. The nucleus of American hotel architecture, and quite as central and representative of the wealth and taste of Fifth Avenue as Union Square. The Square itself occupies ten acres of turf and foliage and is surrounded by the magnificent dwellings and business buildings of Madison Avenue, 23d Street, Broadway, and Fifth Avenue. . . . Of all the splendid buildings on Fifth Avenue, none will probably ever be so famous as the marble palace of Mr. A. T. Stewart, nearly completed at the corner of 54th Street. This will unquestionably be the most costly and luxurious private residence on the continent. Even in its present unfinished state words are almost inadequate to describe the beauty and unique grandeur of some of the details of its construction. Mr. Stewart hopes to have it ready for occupation by next fall. Before he enters it as a tenant it will have cost him upward of two million dollars. . . . Immediately opposite the Distributing Reservoir on Fifth Avenue, is the building occupied by the Rutgers Female College. This excellent institution was removed to its present locality only a short time ago, and has proved very successful. The building, or series of buildings, were originally erected for dwellings—as, indeed, the two end buildings are at present occupied, the College using the central portion.

The new Jewish Synagogue on the Avenue, in the immediate neighborhood, is worthy of study, as the purest example of the Moorish style of architecture in this country.

Before reaching Central Park, we pass a vast edifice in the course of construction, between 1st and 2nd Streets [error for 50th and 51st Sts], on the east side of the Avenue. The walls have even now scarcely reached the height of 50 feet, but, when completed, it will be by far the most magnificent ecclesiastical building in the New World.

"St. Patrick's Cathedral, . . . was projected by the late Archbishop Hughes, who laid the corner-stone in 1858 [p. v., Ag 15], during which and the following year the foundations were laid and a portion of the superstructure built, when work was temporarily suspended. Upon the accession of Archbishop McCloskey, however, a new impetus was given to the work, which has been vigorously prosecuted ever since. The ground . . . is the most elevated on Fifth Avenue. . . . The first base-course is of Maine granite—the same as used in the Treasury Building at the National Capital. . . . The material above the base-course is white marble, from the quarries of Pleasantville, Westchester County—a highly crystalline stone, productive of very beautiful effects, and especially in the columns and elaborations of the work.

"The style of the building is decorated Gothic. . . . Above 59th Street, the Avenue is so far very little built upon; but the lots are held at extravagantly high prices, and it cannot be doubted that ere long all this portion of the street, overlooking Central Park, will be built up with a succession of elegant villas and mansions.

Fifth Avenue is sometimes criticised as almost too solemn in its tone. The architecture lacks variety, it is true, and the too-prevaling brown-stone gives it a monotonous appearance. This is far from being the case, however, when filled with promenaders and vehicles. . . ."—Appleton's N. Y. Illustrated (1869), 2044.

On the south side of East 88th St., 100 feet west of Third Ave., was erected in this year the first modern apartment-house in New York. There were "four distinct suites of apartments" on each of the first four stories, and the fifth or top storey was planned for artists' studios. The rentals were from $4,100 to $1,800 per annum for "each suite," and $520 for each studio, making a total of $23,000 a year. The owner was Rutherford Stuyvesant, the architect Richard M. Hunt—Ann. Rep. Supt. of Bldgs. (1862-1869), 759; N. Y. World, O 8, 1871. See 1871.

In this year, the Church of the Puritans, on the south-west corner of Broadway and 55th St., was taken down, and the Tiffany building was erected on the site.—Creation, Old N. Y., 71-72, which contains view of the church just prior to its demolition. See also descrip. of Pl. 156, III: 704, and L. M. R. K., III: 928. The materials of the Church of the Puritans were purchased by the Baptists and re-erected in West 53d St. (see N 6, 1878).

In this year, a "gothic arch elevated railway" was one of the plans submitted for rapid transit. It is described in a Report on the Gothic Arch Elevated City Railway, by Richard P. Morgan, Jr. (1866), a pamphlet in N. Y. P. L.
1869 — The Medical College of New York University, having decided to remove from New York Hospital (see 1821) to the vicinity of Bellevue Hospital, rents a building on East 26th St. Property on this street, east of First Ave, was acquired soon after and a building erected in 1876.—N. Y. U. Bull, Je 50, 1911.

— In this year, the tower and steel roof of the North Dutch Church were destroyed by fire.—Greatorex, Old N. Y., IV, 47.

— The following buildings are among those mentioned by the superintendent of buildings as having been "erected" (begun?) in this year: Madison Avenue Reformed Church, at the north-east corner of Madison Ave, and 57th St; Children's Hospital for the Society for the Relief of the Ruptured and Crippled, at the north-west corner of Madison Ave and Lexington Ave, Croton Market, on the north side of 42d St. 43d St., between Lexington and Park Aves.; the Presbyterian Home for Aged Women, on the north side of 73d St. East of Madison Ave; the hotel building (now the Park Avenue) erected by A.T. Stewart at a cost of $1,000,000, on the west side of Park Ave. from 32d to 35th Sts; the Gilsey House at the north-east corner of Broadway and 29th St; the House of Mercy at the south-east corner of Riverside Boulevard and 86th St; the easterly side of Castle Garden, for a baggage depot for the commissioners of emigration; Roosevelt Hospital, from 58th to 59th St, west of Ninth Ave.; the Department of Public Charities and Correction building, at the foot of 26th St, East River. Mansard roof construction was popular during this period.—Ann. Rep., Sup't of Bldgs. (1866-1872), 612-13, 616, 619, 621-23.

— In this year Astor homesteaded at 58th St. and East River (see S 26, 1835) was demolished.—Greatorex, Old N. Y., II, 217, 222-23. See also L. M. R. K., III: 948.

— The work of regulating and grading Avenue St. Nicholas (see Ap 4, 1866) was commenced in this year between 125th and 155th Sts. Work on the lower end of the avenue (between 110th and 125th Sts.) was delayed until after completing the grading of Sixth and Seventh Avenues, because it would interfere with Hendrick Lane, which was part of the Avenue St. Nicholas and was the main thoroughfare to and from the north end of Central Park.

— The commissioners of Central Park laid out miles of streets and avenues, and established grades for them, according to the law of April 24, 1865 (p. 4), between 155th and Inwood Sts; had maps made and monuments erected. They also established the lines of Broadway, as required by the law of May 13, 1869 (p. 1) 100 ft. in width, between 34th and 59th Sts.—15th Ann. Rep., Com's of Central Park (1870), 69-74.

— In Valentine's Manual for 1869 were published the following map and views: map of the city, showing its political divisions and subdivisions; iron building, cor. Broadway and 18th St; iron building (A.T. Stewart's store, cor. Broadway and 30th St, 405 ft. in length, with six ears); Sixth Ave. and 25th St, 88 ft. High Bridge, and high service water-works and reservoir, 124; Foundling Hospital, Central Park, 128; plan showing landmarks in Central Park, 174; bird's-eye view of Lake Manhattan and old reservoir, Central Park, 176; the spa, Central Park, 178; Indian hunter (statue), Central Park, 184; new market, foot of 17th St., East River, 190; Stewart mansion, n. w. cor. Fifth Ave. and 34th St, 2009; iron building, n. w. cor. Broadway and 31st St., 208; marble building (Mary Mason Jones residence, later occupied by Mrs. Paran Stevens), n. e. cor. Fifth Ave. and 17th St, 240; Harlem, from the old fort in Central Park, 432; building erected for the Hudson River R. R., on site of John's Park, 5005; iron building (N. Y. Life Ins. Co. bldg.), 598; iron building (Grand Hotel, cor. Broadway and Park Ave.)—"the East River bridge" (Brooklyn Bridge), 672: statuary group to surround south gate of "great reservoir," 694; the Battery, 748.

— In this year, Eliza Greatorex made a pen drawing of "Hamilton Grange." It was published, with other views drawn by her, in Old New York from the Battery to Bloomingdale, in 1875. This view is reproduced and described as Pl. 155-c, Vol. III.

— In this year Valentine's Journal appeared, North, 118.

— In this year, the New York Genealogical Record began publication.—North, 117.

— In this year, John La Farge, well known American painter, was elected a member of the National Academy. He had a studio in New York for many years. He painted everything (landscape, figures, still-life, etc.), but he is particularly noted for his stained-glass work and his murals, examples of which are in Trinity Church, Boston, and the Church of the Ascension and other churches in New York.—Clement & Hutton, Artists of the Nineteenth Century, II: 29-10; Isham, Hist. of Am. Painting, 516-27, 540-42, 556.

— In this year, Mark Twain's (Samuel Langhorne Clemens) The Innocents Abroad was published.—Encyclop. Brit., xxvii, 490.

Garland's Fifth Avenue Theatre on West 24th St., having been entirely remodelled by James Fiske, Jr., and leased to John Brougham, is opened as Brougham's Theatre.—N. T. Times, Ja 26, 1869; Brown, III: 401-2; L. M. R. K., III: 982. See, further, Ap 5.

— The department of charities and correction has bought, from Mr. Edward Hunter, Hart's Island, "for the purpose of establishing there an industrial school for destitute boys." The price paid was $75,000.—N. T. Times, F 27, 1869.

— Ulysses S. Grant is inaugurated as president of the U. S.—Mar. Rhodes, Hist. of U. S., VI: 236.

— The name of Brougham's Theatre (see Ja 25) is changed to the Fifth Avenue Theatre.—Brown, III: 423; L. M. R. K., III: 983. See Ag 16.

— The American Museum of Natural History is incorporated.—Laws of N. Y. (1869), chap. 119. On May 8, a collection from the duplicate specimens of natural history belonging to the state was authorised to be presented to the museum.—Ibid. (1869), chap. 776. See Je 2, 1874.

— The board of supervisors of New York County is authorised to appropriate a sum not exceeding $35,000 for a soldiers' and sailors' monument to be erected under the direction of the commissioners of Central Park.—Laws of N. Y. (1869), chap. 150.

— The legislature abolishes the election by the people of a board of education, and gives power to the mayor (A. Oakey Hall, at this time) to appoint 12 commissioners to constitute a new board.—Laws of N. Y. (1869), chap. 437.

— The law of June 1, 1866 (p. 4), relating to the Beach Pneumatic Transit Co. is amended to include transportation of passengers.—Laws of N. Y. (1869), 515, 516, See F 26, 1870.

— Madison Ave. is extended by the legislature to 124th St.—Laws of N. Y. (1869), chap. 560.

— A large gathering assembled at Cooper Institute "to listen to addresses in favor of aiding the Cubans to throw off the Spanish yoke and organize an independent government." There is a rumour that the filibustering expedition was said to have landed at Broadway and a few miles north, and the Cubans in their state of war, against Spain.—N. T. Times, My 5, 1869. This rumour was substantiated on May 6.—Ibid., My 6, 1869. During the next few days, enlistments and other activities in favour of the insurgent Cubans became so prominent that the Spanish consul at New York protested against them, on May 8.—Ibid., My 7-10, 1869. These activities continued, however, until finally the Cuban Junta and the chief New York filibusters were arrested and indicted.—Ibid., My 11, 14 and 26, and Je 18, 22, 25 and 24, 1869. The filibusters were later released on bond.—Ibid., Jl 24, 1869.

— The legislature authorises the commissioners of Central Park to erect and maintain a meteorological and astronomical observatory, a museum of natural history, and an art gallery, in Central Park, and to provide the necessary equipment for them.—Laws of N. Y. (1869), chap. 595. In 1870, this observatory cooperated with the U. S. government in establishing a storm signal corps. The records and observations made there have played an important part in the solution of meteorological problems.—Ann. Rep., Dept. of Parks (1902), 24-27. Regarding the Museum of Natural History, see 1870.

— The Manhattan Eye and Ear Hospital is created "for the treatment of indigent persons suffering from diseases of the eye and ear."—Laws of N. Y. (1869), chap. 584. See also Losing, Hist. of N. Y. City, II: 777-78.

— The legislature authorises the city to exchange the 65,259 sq. ft. in City Hall Park heretofore purchased by the U. S. (see Ap 11, 1867) for other lands there as a site for a post-office.—Laws of N. Y. (1869), chap. 469. However, the federal government decided to keep the site purchased in 1867, and the postoffice build-
AN ACT
To unite into one municipality under the corporate name of The City of New York, the various communities lying in and about New York harbor, including the city and county of New York, the city of Brooklyn and the county of Kings, the county of Richmond, and part of the county of Queens, and to provide for the government thereof.

The People of the State of New York, represented in Senate and Assembly, do enactment as follows:

CHAPTER I.
BOUNDARIES, POWERS, RIGHTS AND OBLIGATIONS OF THE CITY.

SEC. 1. All the municipal and public corporations and parts of municipal and public corporations, including cities, villages, towns and school districts, but not including counties, within the following

State of New York, County of New York
City of New York

Let the Mayor of the City of New York, do hereby certify that the annexed bill, to wit:

"AN ACT

in order to unite into one municipality and to confer the corporate name of The City of New York, the various communities lying in and about New York harbor, including the city of Brooklyn and the county of Kings, the county of Richmond, and part of the county of Queens, and to provide for the government thereof.

I, what is hereby accepted by the city and by the Mayor.

In witness whereof, I have hereunto set my hand and caused the corporate seal of said city to be affixed this 5th day of April, 1897.

WILLIAM THOMPSON
Mayor of the city of New York.

STATE OF NEW YORK.

In Assembly.

This bill was duly passed, a majority of all the members elected to the Assembly voting in favor thereof, three-fifths being present.

By order of the Assembly,

JAMES M. GRAY
Speaker.

STATE OF NEW YORK.

In Senate.

This bill was duly passed, a majority of all the Senators elected voting in favor thereof, three-fifths being present.

By order of the Senate,

ROBERT L. THURSTON
Chairman of the Senate.

Approved May 4th, 1897.

Franklin D. Black,
Governor.

A. FIRST PAGE OF OFFICIAL FILED COPY OF GREATER NEW YORK CHARTER BILL. SEE PP. 2028-29.
B. MAYOR STRONG'S DISAPPROVAL OF GREATER NEW YORK CHARTER, APRIL 8, 1897.
C. ENDORSEMENTS SHOWING PASSAGE OF CHARTER BY LEGISLATURE, AND APPROVAL BY GOV., MAY 4, 1897.
ing was begun there on Aug. 9 (q.v.—1865).—13th Ann. Rep., Am. Sect. & Hist. Pres. Soc. (1910), 402.3

The Hanoan Cab Co. is incorporated.—Laws of N. Y. (1869), chap. 689.

The legislature reserves the triangular piece of ground, bounded by Ninth Ave., 6th St., and "the public drive," for a public place.—Laws of N. Y. (1869), chap. 689.

The Stock Exchange and the "Open Board" adopt a plan of consolidation.—Eames, N. Y. Stock Exchange, 52.

The Union Pacific R. R. and the Central Pacific R. R. meet at Promontory Point, Utah, and the first trans-continental railroad is completed. Elaborate ceremonies are held at the junction point and throughout the country. In New York, a "Te Deum" is sung in Trinity Church, the chimes are rung, and a salute of 100 guns is fired by order of the mayor.—Bailey, First Trans-Continental R. R., 97–100.

In the annual "Tax Levies" bill, which passes the legislature, some 35 private organizations (the "Sisterhood of St. Mary Episcopal Church," heads the list) are granted "Donations for Charitable Purposes" which total $11,000.000. Section 10 of the act provides that hereafter "an annual amount equal to twenty per cent on the excise monies received for said city in eighteen hundred and sixty eight . . . be distributed . . . by the board of education . . . for the support of schools educating children gratuitously in said city who are not provided for in the common schools thereof."—Laws of N. Y. (1869), chap. 876. Section 10 of this act was repealed the following year (see Apr 26, 1879).

The city comptroller is authorized to raise, by the creation of public stocks, a sum not exceeding $100,000. "For the purpose of constructing a necessary fire-proof roof to the hall of records, wherein all the records of real estate are preserved, and for adding an additional story thereto, and refitting the building in order to provide for the preservation of said records in a manner more secure than heretofore;" also a sum not exceeding $600,000 for completing and furnishing the county courthouse "now nearing completion."—Laws of N. Y. (1869), chap. 875. In 1870, another $40,000 was appropriated for the repair of the hall of records. The walls were then lined with a fire-proof roof added.—Ev. Post, D 14, 1873, which contains an excellent summary of the history of the building. See also L. M. R. K., III: 972 and descript. of Pl. 97, III: 589.

The New York Hospital, at the head of Pearl St., is being removed, and a new street (the continuation of Pearl) is to be cut through the grounds and building, between Worth and Duane Sts. The building still contains the 77th St. is formed for the reception of patients.—Laws of N. Y. (1869), chap. 875.

The legislature passes an act "to alter the plan of the city of New York, and to carry the same into effect." The alteration provided for is that Broadway between 34th and 49th Sts. "shall be widened to the width of one hundred feet and straightened . . . whenever practicable;" the plans are to be made by the commissioners of Central Park, and the corporation counsel is authorized to acquire title to the necessary lands; and for that purpose "to apply to the Supreme Court . . . for the appointment of three commissioners of estimate and assessment for such widening and straightening of Broadway." One third of the total expense may be assessed on the city, the remainder to be met by "the respective owners, lessees, parties and persons respectively entitled unto or interested in the land and premises required for or affected by the proceedings."—Laws of N. Y. (1869), chap. 890.

Charles W. Eliot (Harvard, '73), a layman, 55 years of age, becomes president of Harvard University.—Universities and Their Sons (1898), 90, 114. His administration terminated Nov. 4, 1908.

The N. Y. and Harlem R. R. Co. is authorized to build the "Grand Central Station" on the east side of Vanderbilt Ave. from 42d to 45th St.; and Vanderbilt Ave. between those streets is declared a fireproof building. The foundations of the best materials, and the front building on Forty-second street shall be of Philadelphia pressed brick, brown or freestone, or marble and iron, and shall be finished in the best style of architecture.—Laws of N. Y. (1869), chap. 919. See also L. M. R. K., III: 975, 101. The first stone of the foundation of the station was laid on Sept. 1 (q.v.).

The centennial anniversary of the dedication of the North Dutch Church is celebrated.—Proc. at the Centennial Anniversary, Int. (N. Y., 1869).

The corner-stone of the Fifth Avenue Collegiate Dutch Reformed Church at the corner of Fifth Ave. and 48th St. is laid.—N. Y. World, May 26, 1869. The building was completed in 1872, the chapel in the rear having been erected in 1866.—Corrin's Manual, 999. The church is shown and described in King's Handbook, 356, 358. See also Kelley, 119, and L. M. R. K., III: 975.

Blind-wolf operations are begun to remove Pot Rock, Way's Reef, July and Sheldrake, at Hell Gate, contract for this work having been made by the U. S. government on June 17th. By Sept. 16, hundreds of tons of rock had been removed.—N. Y. Times, S 16, 1869. See N 12, 1866.

Ground is broken at Cl. Hall Park for the new post-office (see Ap 11 and Je 3, 1867).—N. Y. Times, Ag 10, 1869. See also ibid., D 18, 1869, illustration and description in Harper's Weekly, XIII: 676, 679; ibid., XIV: 745, 777; descript. of Pl. 165, III: 845; N. Y. Times, N 1, 1871.

A T. Stewart's new residence at the corner of 43rd and Fifth Ave. is referred to as "an edifice in New York that, if not swallowed up by an earthquake, will stand as long as the city remains, and never be pointed at as a monument of individual enterprise, of far-seeing judgment, and of disinterested philanthropy."—Harper's Weekly, XIII: 521, 525, which contains a full-page view. See also L. M. R. K., III: 952.

Augustin Daly becomes the manager of the Fifth Avenue Theatre (see Ap 5).—Brown, II: 414. The theatre was destroyed by fire on Jan. 14, 1873 (q.v.).

The first stone in the foundation of Grand Central Station (see May 20) is laid.—From chronology supplied by the N. Y. C. & H. R. Railroad. The station was finished in 1871 (q.v., o 9).

The German Hospital (see 3, 1866) on the corner of Fourth Ave. and 12th St., is erected for the reception of patients.—N. Y. Times, S 14, 1869. See L. M. R. K., III: 954.

An attempt on the part of Jay Gould, James Fisk, and others to corner the gold supply in Wall St. creates a frenzied struggle between the "bulls" and "bears," which, culminating on this day, gives it the name of "Black Friday."—N. Y. Times, S 25 and 26, 1869. See also Eames, N. Y. Stock Exchange, 571 and Clews, Twenty-Eight Years in Wall St, 181-210.

"A ring" was formed, by which absolute control was obtained of all the salable gold in the market, and the consequence was a "corner" in gold on Friday, September 24, 1869. The result was a panic in Wall Street; gold suddenly sprang from 142 to 160. [Jim] Fisk and [Jay] Gould's agents forcing the rate by bids, until it was found that the ring possessed all of the available gold, and intended to hold it for a further advance. Every thing seemed in favor of the conspirators, as it was believed that the government sales of gold would not relieve the market. The scenes in the Gold-room were extraordinary for a continuation of the crisis for twenty-four hours meant absolute ruin of all of the small operators as well as many of the leading firms. While the panic was at its height President Grant ordered the sale of $6,000,000 of gold coin, and the rate dropped down to its old figure. With characteristic effrontery Fisk and his confederates repudiated the majority of the engagements made by their agents, and several failures were the result. The conspiracy was an infamous one, and in any other city would probably have led to the imprisonment of the leaders.

Fisk had, however, become thoroughly identified with the Tammany Ring, Tweed, and the Tammany Ring were Tammany directors. Their influence was all-powerful, and Fisk was allowed to escape the legal consequences of his acts.

His organ-pause speculation may be cited as another striking instance of his peculiar ideas of business honor. When the overissue
THE ICONOGRAPHY OF MANHATTAN ISLAND

1869 of Erie stock gave him control of an immense amount of the shares, he purchased Pyle's Opera-house for $82,000 in the name of the Eric Company; but they not liking the bargain, he assumed the purchase, reimbursing the company with some of his own watered stock. Subsequently the company leased the upper part of the building at an enormous rent. . . .”—Harper's Weekly, Ja 20, 1870.

"Our readers are probably not aware that the harbor of New York is at the present moment being made a naval depot by the Spanish Government, and that in this port a fleet of gunboats is now being completed for service in behalf of that nation. . . . these gunboats are intended for active and decisive operations on the Cuban coast."—N. Y. Times, S 24, 1869.

Oct. 11. The first anniversary of the declaration of Cuban independence is celebrated in New York with great enthusiasm.—N. Y. Times, O 12, 1869.

The corner-stone of the Roosevelt Hospital (see F 2, 1864), on 59th St. between Ninth and Tenth Av., is laid.—N. Y. Herald, O 30, 1869; L. M. R. K., III: 955. The building was dedicated on Nov. 2, 1871 (q. v.).

The proposed new constitution that was adopted by the state constitutional convention, on Feb. 28, 1868 (q. v.), fails of ratification at the general election. The judiciary article, however, which was submitted to the voters on a separate ballot, passed by a narrow majority.—World Almanac (1870), 51. In the "Address to the People" the convention delegates summarized their work on the judiciary article thus: "We have materially changed the judicial system, have made a permanent and efficient court of last resort of seven judges, to be elected for fourteen years, no elector to vote for more than five candidates; a commission to dispose of the causes accumulated in the present court of appeals, thus relieving the suitors from that delay which is a denial of justice; such an arrangement of the existing supreme court as will restrict the number of general terms, thus securing less diversity of opinion, and we have extended the term of office of justices of the supreme court. We have made courts by the Constitution, of the superior court of the city of New York, the court of common pleas thereof, the superior court of Buffalo, and the city court of Brooklyn, continuing in office the present judges thereof, and lengthening the term of their successors to fourteen years, and increased the number of judges of the court of common pleas of New York. We have much enlarged the jurisdiction of the county court and extended the term of office of the county judge. We have provided that no judge of the court of appeals or supreme court shall sit in review of his own decision, and forbidden certain judges from practicing in courts and acting as referee; we have provided for the relief of followers' courts in the counties of largest population; and generally have increased the working power of our courts, and by our last term of office, have made more independent and permanent and useful, the Bench of the State."—Jour. of the Convention, 1204. The Times editor made this favourable comment: "The entire article pertaining to the Judiciary is as creditable to the thoroughness as to the intelligence and impartiality of the Convention."—N. Y. Times, Mr 2, 1868.

An emblematic bronze pediment on the west side of the Hudson River R. R. depot, on the site of St. John's Park (see 1867), is unveiled. It commemorates the commercial enterprise of Commodore Vanderbilt.—N. Y. World, N 11, 1869. See also illustration and description in Harper's Weekly, XIII: 620, and descript. of Pl. 106-a, III: 609. The pediment was removed in about 1920, the building having long been in use as a warehouse and cold-storage.

The Metropolitan Museum of Art, at a meeting held in the Union League Club, at which are gathered several of the most prominent citizens of New York. Wm. Cullen Bryant presides.—N. Y. Times, N 24, 1869; Howe, Hist. of Met. Museum of Art, 103-15. Concerning its origin, see also Eve. Sun, Ap 16, 1920. It was incorporated on April 15, 1870 (q. v.).

Dec. The board of education establishes the "Normal and High School," consisting of the board of examiners of Pres. of Normal College for Tear 1871 (N. Y., 1872). Temporary quarters were opened in 1870 (q. v., Mr 24). The name was later changed to the Normal College, and finally to Hunter College.

In a municipal election Tammany candidates for the common council win all but two seats. The Herald prints the names of 65 men arrested for illegal voting and declares: "These ubiquitous 'birds of passage,' who at every election make their influence felt in every ward of the city, were not idle yesterday. In nearly every ward dozens of them floated about, awaiting their opportunity to put in a vote for their favorite candidates, or at least those whose pocket books were the longest. . . . Not a few cases occurred in which they voted upon the names of respectable citizens, whose votes were refused when they applied for the privilege of exercising the franchise."—N. Y. Herald, D 8, 1869.

"Female suffrage has been adopted way out in Wyoming, where women are scarce and accordingly are appreciated. It is, on account of the scarcity of the opposite sex, a first rate place to test the matter, but we are glad the experiment is to be tried somewhere."—N. Y. Herald, D 8, 1869.

1870

In this year, civil service reform began in England.—Hazen, op. cit., 482.

In this year, the Vatican council proclaimed the new dogma of papal infallibility, the dogma that the pope can not err "when he defines ex cathedra, and in virtue of his apostolic authority any doctrine of faith, or morals,"—a doctrine (says Hazen) "that shocked Liberals thoroughly penetrated with the modern scientific spirit, and that seemed to politicians to assert that the Pope was superior to all rulers, and had a claim upon the loyalty of the faithful superior to that of their sovereign."—Hazen, Europe Since 1815 (1910), 307.

In this year, the White Star Line (or Oceanic Steam Navigation Co.) was founded.—King's Handbook (1893), 79.

The population of Manhattan Island is 942,929.—13th U. S. Census Bulletin (1910). Of Je 1.

By this year, "The inhabited city had spread over the whole island, sparingly in the upper wards. . . ."—Harper's Weekly, 1870, 164.

"The foreign commerce of the district, imports and exports, amounted in value in 1870 to $569,377,000. The census of that year showed that New York had then become the most extensive manufacturing city in the Union. It had 56 national banks, with a capital of $75,000,000, and undivided profits of over $9,000,000. It had 32 savings banks, with deposits from 316,000 depositors of nearly $106,000,000.

"The assessed value of real estate in the city in 1870 was $762,154,520, and of personal $505,322,699, making 2 total of $1,047,459,000. The total amount of the funded debt was nearly $19,000,000. This enormous debt was largely the result of irregular and extravagant and dishonest expenditure of the public money."—Lossing, Hist. of N. Y. City, 1871, 515.

In this year, the Rotunda, erected in City Hall Park in 1817-18, was demolished.—111 Ann. Rep. Bd. of Com'ts, Dept. of Pub'lk's (1871), 225; L. M. R. K., III: 974-75.

For a description of New York of this time, see New York Illustrated (pub. by D. Appleton & Co., 1870).

In this year, Mechanics' Hall, which was built in 1802 (q. v., Ag 2) on the north-west corner of Broadway and Park Place, was demolished. The general Society of Mechanics and Tradesmen erected a new building on the site, and leased it to the Security Insurance Co.—Annals of the society (1823), 167-68. See also L. M. R. K., III: 985.

The American Museum of Natural History (see My 5, 1869) establishes itself on the second and third floors of the arsenal in Central Park.—Records of the museum, by courtesy of Pres. Osborn; see also Growth of the Building of the Am. Mu. of Nat. Hist, Plans for Future Building, etc.; 2nd ed., large ill. booklet, 1912. It moved to the lower floor in 1872 (q. v., O 23), and remained there until 1877, when it moved to its present location.

In this year, the Association of the Bar of the City of New York was organized. It was incorporated in 1871 "for the purpose of maintaining the honor and dignity of the profession of the law, cultivating social relations among its members, and increasing its usefulness in promoting the due administration of justice." The first president (1870-9) was William M. Evarts. The club-house was at No. 7 W. 29th St., where the club remained until the erection of its present building at No. 42 W. 44th St.—King's Handbook, 557: L. M. R. K., III: 937.

In this year, St. James's Episcopal Church in Hamilton Square—
CHRONOLOGY: POLITICAL AND SOCIAL CHANGE: 1865-1876

1870
was demolished.—*Man. Com. Coun. (1870), 925-26. See also Mr.
— 6, My 11, Je 5, 1869; Greenleaf, *Hist. of the Churches, 755 Greatorexes,

— In this year, Tiffany & Co. (see 1872) occupied its new building with iron front at the south-west corner of Broadway and 19th St. (see 1869). This was later enlarged to a frontage of 78 ft. on Union Square, 165 ft. on 15th St., and five storeys high. Their business grew into the largest of its kind in the world.—*Lossing, *Hist. of N. Y. City, II: 798. See 1905.

— Valentine’s Map for 1870 contains the following maps and views: map of the city, showing political divisions and subdivisions (dated Nov., 1870); Goethe mansion, n. e. cor. Broadway and 19th St.; facsimile of passport, issued by the city, 83; map of N. Y. Co., showing wards, police precincts, and location of station-houses, 88; map of the boundaries of the fire dept. (dated 1871), 116; old revenue-office, 198; iron building, n. e. cor. Grand and Crosby Sts., 228; Central Station, m. n. cor. Fourth Ave. and 42d St., 603; Equitable Life Ins. Co. bldg., n. e. cor. Broadway and Cedar St., 616; iron building, n. e. cor. William and Cedar Sts., 692; iron building (Lord & Taylor’s), s. w. cor. Broadway and 20th St., 710; iron building, n. w. cor. Beekman and Cliff Sts., 726; Tripler Hall (later named Metropolitan Hall, and still later the Lafayette House), Broadway, opp. Bond St., 731, St. Michael’s Church (Roman Catholic), opp. 1st Ave. and Hudson St. House, n. e. cor. Broadway and 29th St., 764; old house on Rector St., 809; Stuyvesant mansion (“Roosevelt”), North River, where later 53d St. was cut through, 824; old house on Hopper farm, 883; facsimile of Wm. Hooker’s map of the city, drawn to accompany the Peabody series of views, 904; St. James’s Church, Hamilton Sq. (demolished in 1870; site zoned).

For descriptions, history, and woodcut views of the charitable institutions in New York at this time, see *ibid. (1870).

— In this year, plans for the improvement of Union Square, Washington Square, and Madison Square, were adopted.—*Ann. Rep., Dept. of Parks (1902), 8; *ibid. (1903), 8.

— A map of the New York City wards and political divisions, made in this year, is filed in the bureau of topography, borough president’s office, as Map, No. 2886.

— In this year, “Saratoga,” by Bronson Howard, was first produced. Howard was “the first professional dramatist in the United States.”—*Sullivan, *Our Times (1896), I: 219.

— In this year, the St. Nicholas, a monthly magazine for children, was founded.—North, 121.

— A cartoon, “Mental” by Young, projected by James G. Holland and Roswell B. Smith, was established.—North, 116; *Tassie, The Mag. in Am., 287 et seq.

Jan.

In this month, the first number of The New York Genealogical and Biographical Record, a monthly publication, appeared.

20 The Lenox Library is incorporated.—*Laws of N. Y. (1870), chap. 2. See 1871.

29 At Yale, a young man named Stephen A. Douglas (youngest son of Queen Victoria and afterwards Duke of Connaught) arrives at New York from Washington.—*N. Y. Times, Ja 30, 1870. He attended the firemen’s ball at the Academy of Music, and also a ball in his honour held at Delmonico’s. The prince and his party left for Boston on Feb. 5.—*N. Y. Times, Ja 31-F 8, 1870.

Feb.

A Spanish squadron comes into the harbour to undergo repairs at the Brooklyn Navy Yard. As soon as the men-of-war have been repaired, they will depart for Cuba.—*N. Y. Times, F 15, 1870.

25 The common council passes a resolution that streets lying north of 59th St. and east of Fifth Ave. be renumbered, where necessary, under the direction of the street commissioner.—*Proc., App’d by Mayor, XXXVIII: 76.

26 The Beach Pneumatic Transit Co. completes and opens to the public a section of tunnel extending 209 feet under Broadway from Warren to Murray St. The entrance was at the south-west corner of Broadway and Warren through the basement of the Devlin building. The waiting-room was a large and “elegantly furnished” apartment commencing at Broadway and extending down Warren St. for 120 feet, built wholly underground. Serious objections to the enterprise were made, and it was finally abandoned.—*Laws of N. Y., 1870, N. Y. Daily Tribune, F 28, 1870; Illustrated pamphlet, *Underground Railway (N. Y., 1870). See also descrip. of Pl. 133-b, III: 701. This was the first subway actually constructed in New York, and after its abandonment no other was built in this city until 1900 (p. v., Mr 24).

1871
A contract is made by the Central Underground Ry. (see Ag 17, 1868) for the construction of an underground road from City Hall Park to 46th St. Though an excavation was begun in May, 1871, and a short tunnel about 110 feet was built then, no road was ever constructed by the company. It was claimed by the company that the grant, on April 26, 1870 (p. v.), to the Arcade Railway Co. of similar privileges conflicted with their rights.—*itr. Rep., N. Y. C. Central Underground Ry. Co. (Dec., 1871) Chamber of Commerce of the State of N. Y., Rapid Transit in N. Y. C. and in other Great Cities. See Ap 25; also 1872.

The commissioners of the sinking fund are authorised to lease lands on Fourth Ave. between 65th and 66th Sts. to the Sisters of Charity for the erection of a foundling asylum.—*Laws of N. Y. (1870), chap. 64. The lease was given on Dec. 15—*Man. Com. Coun. (1870), 763. See also *Lossing, *Hist. of N. Y. City, II: 770-71. The Lotos Club is founded.—*N. Y. Times, Mr 14, 1870; Fairfield, Clubs of N. T. (1871), 312-313; *Lossing, *Hist. of N. Y. City, II: 820-21. See also Elderkine, *brief Hist. of Lotos Club (1895). From this time until 1877, its quarters were at No. 2 Irving Place.

— L. M. R. K., III: 938. On May 7, 1873, the club was incorporated.—*Laws of N. Y. (1873) chap. 426.

The board of aldermen resolves to purchase from Joseph Sommers for $1,350 Rembrandt van Rijn’s death-mask in albumin. Washing-ington.—*Proc., App’d by Mayor, XXXVIII: 100. This portrait has disappeared.—Letter to the author (dated Mr 23, 1826) from Henry Rutgers Marshall, secretary of the art commission.

The sinking of the first caisson of the East River (Brooklyn) Bridge takes place on this day.—*N. Y. Times, Mr 20, 1870. The second caisson was sunk on May 8, 1874 (p. v.).

The new Female Normal and High School (see D 1870) is formally dedicated “in the building temporarily occupied by the institution at the corner of Broadway and Fourteenth-street.”—*N. Y. Times, Mr 25, 1870. There was a Model Primary School (of practice) at 17 St. Mark’s Place.—*Rep. of Pres. of Normal College for Year 1871 (N. Y., 1872). See Ap 26 and Jl 20.

The legislature passes a new “Election Law” for New York City. This is a most elaborate and wordy measure. It requires separate ballots and ballot boxes for the various offices, “President,” “Congress,” “Assembly,” “City,” etc.; the board of registry to meet on Monday and Tuesday preceding the week of election; the establishment of a “bureau of elections” under the direction of the board of supervisors; the re-districting of the city annually by the common council “so that each election district shall, as nearly as may be, contain not more than four hundred electors.”

The new law makes illegal registry a felony, as also illegal voting: indeed if any one shall be instrumental “in causing or procuring any person to be fraudulently registered,” or “in procuring any person to vote . . . in any election district in which said person is not at that time a legally qualified voter,” or in inciting any person “to vote “in an assumed or fictitious name.” It also establishes a grad-ual penalty for the fraudulent use of a false or fictitious name.—*N. Y. Times, Ja 7, 1870; chap. 135; *N. Y. Herald, Ap 7, 1870. In the senate’s discussion of the measure Tweed advocated it and said he was “ready to go to the extreme limit in framing a law that would secure fair elections. The complaints had been long and loud against the gross frauds perpetrated upon the ballot-box in New-York City, and the public demanded that they should be stopped.” He was determined, he said, “so far as his influence and vote would go, to bring about a state of things where every man’s vote should count one, and no man’s vote should count more than one.”—*N. Y. Times, Ap 6, 1870.

At the following municipal election (see Mr 17) the *Times editor declared “there was about the usual amount of repealing and other frauds. This was not from any defect in the law, but from a neglect of an organized enforcement of it.”—*ibid, Mr 18, 1870.

The legislature passes “An Act to reorganize the local govern-ment of the city of New York,” commonly known as the “Tweed Charter.” More changes are instituted in the municipal government than have been made at any one time since the signing of the Montgomerie Charter on Jan. 15, 1731 (p. v.). The chief provisions are as follows: A bicameral common council as before (see Ap 11, 1868), only that the elections are to be tried by a special jury of not more than five persons elected on a general ticket, and a reversion to annual elections. A ½ vote is now required to override the mayor’s veto, a ½ vote, also, for any measure involving expenditures, and a ½ vote (formerly ½—see Ap 12, 1853) in case the expense is for “any celebration, procession, or entertainment of any kind.” The powers
of the common council are defined with a considerable degree of
exactness under 27 different heads. The mayor continues to be
5 elected for a two-year term, but his power is increased measurably
with the opportunity to appoint department heads or commissions
without the approval of the common council. Ten departments are
provided for, for, finance, the department of public highways, the
police, the board of education, the department of health, the
superintendent of police, the commissioners of the police, the
department of finance, the department of the courts of record, the
correction, fire, health, public parks, buildings, and docks; the
heads of the two first named, i.e., the comptroller and the corpora-
tion counsel alone continue to be elective (see Ap 26). The
common council by a 3 vote may impeach the mayor, and the mayor
may impeach all department heads, the "full court of common
pleas" being the trial court. The new police, fire, and health de-
partments replace respectively the metropolitan police (see Ap 5,
1857), fire (see Mr 30, 1863), and sanitary (see F 26, 1866) depart-
ments. Four police commissioners with 8 yr. terms are provided for,
five fire commissioners with 5 yr. terms, and four health com-
missioners with 5 yr. terms; the last are joined with the police com-
misssioners and the health officer of the port, to constitute a board of
health. The department of public charities and correction, for-
merly headed by four commissioners appointed by the comptroller
(see Ap 17, 1860), is now to have five commissioners with 5 yr.
terms and, of course, appointed by the mayor. The other depart-
ments are new. Five commissioners with 5 yr. terms head the park
department which absorbs the Central Park commission and whose
jurisdiction is thus defined: "All public parks and public places
above Canal street" (but see Ap 26). The department of public
works, called the "Commission of Public Works," with 3 terms,
assumes the work of the former Croton aqueduct department and
street department. The department of buildings is directed by
the "Superintendent of Buildings," with a 5 yr. term. The depart-
ment of docks is headed by a board of five with 5 yr. terms whose
powers and compensation are to be defined by the commissioners
of the sinking fund; they are limited to an annual expenditure of
$50,000 "for the repair or reconstruction of the wharves, piers and
slips."

There are also "General Provisions" of an important nature
including the following: Expense shall not be incurred "unless an
appropriation shall have been previously made covering such ex-
 pense" security shall be required "for the accountability of all
officers and other persons to whom the receipt or expenditure of
the funds of the city shall be entrusted;" all contracts shall be
found on sealed bids or proposals made in compliance with
public notice duly advertised in newspapers...and... shall be
given to the bidder; no city official shall be "di-
rectly or indirectly interested" in any such contract; any bribery
or attempt to bribe or acceptance of bribes is heavily penalized.

The first common council under the new charter (which is to be
the usual procedure in any referendum) is to be elected on the third
Tuesday in May to serve from the first Monday in June until the
first Monday in Jan., 1872. The first mayor is to be elected at the
next general election in November. Thereafter the charter election
and the general election are to coincide.—Laws of N. Y. (1870),
chap. 13.

The previous day (April 5) at a hearing on the proposed charter
before the senate committee, Senator Tweed in the chair, Horace
Greeley and Samuel J. Tilden were among the speakers. Both
objected to having the mayor's "functionaries survive him," i.e.,
having terms extending beyond his own. Mr. Greeley favoured
amendments which would retain the "Central Park Commission"
and would make the comptroller appointive (see Ap 26). Mr. Til-
den declared that all experience had shown that shown imprisonment to
be both unnecessary and insufficient resource, not to be relied on in
the ordinary administration of the Government; also, he thought
the charter deficient "in that it makes the election of charter officers
coincident with that of the State and Federal officers."—N. Y.

The Herald rejoices in "the new organic law of our municipal govern-
ment," which believes that shown imprisonment to have been given "to a bureau in the Department of Public Works,"
and that the duties of the head of the department of buildings are
"police duties," but that "these are minor defects, that are as
nothing by comparison with the excellence and benefits of a law
that sweeps the [metropolitan] commissions out of existence and
opens to us the possibility of a good municipal government."

The Tribune editorial comment on the passage of the charter is

"The Republicans in our Legislature have accepted and passed the
Tweed Charter for our City on condition that the Democrats should
assist in passing a stringent Election Law. The latter, it is hoped,
will put an end to repeating and discounting votes in our elections;
the former surrenders our City to the rule of Tweed and Sweeny
and the Democratic party. It is almost equivalent to a grant of
power to those who have swindled the People out of millions to
staff a system of public plunder. The legislature have made a
mistake which will yet be palpable."—N. Y. Tribune, Ap 6, 1870.

With a prophetic pen Mr. Dana of the Sun writes: "The result is
that the Ring is more powerful than ever. Mr. Tweed is now the
master of the Empire State. He can set up and he can pull down
whomever he will... This harmless city, instead of having a government of the people, is more than ever under the
dictatorship of the Ring."—N. Y. Sun, Ap 6, 1870. Several amend-
ments to this charter were made on April 26 (q. v.). Tweed testified,
on Sept. 15, 1877, before a special committee of the board of alder-
men appointed to investigate the "Ring" frauds, that he paid
$40,000 each to five senators to get the Republicans "to stand by
this charter."—Deca, Bd. of Ald. (1877), Part II, Doc. 8, pp. 91-92.

"Until Tweed and Sweeny tell their man O'Hall" (Mayor
Hall), says the Sun, "who to appoint under the new charter,
and he acts, we are in a condition of substantial anarchy," atten-
tion being called to the fact that the new charter "wiped out" the
fire department and the health department.—N. Y. Sun, Ap 3,
1870. Mayor Hall announced his appointments on April 11 (q. v.).

"This time," says the Times, "our popular elective officials are
leading part in the exposure of Tweed, expresses belief in him "as
a reformer," and one who has "put the people of Manhattan Island

Mayor Hall gives to the press his list of appointments under
the provisions of the new charter (see Ap 6), accompanied by a word
of explanation. He says he would be "perfectly justified by the
official record of voters and the legislature" and this responsibil-
ity should be conferred every of the thirty-two appointments
upon democrats; but the extraordinary unanimity by which the
power was agreed upon appears to create an honorable obliga-
tion to respect the political minority of his constituents." He thinks
there is general agreement that "the execution of police, fire and
health duty, or administration of charities, ought not to be at all
controlled by partisan influences," so there is a representation of
Republicans on those boards. However, a department involving
"large patronage," like the department of public works, requires
at the mayor's hands "entire respect to party considerations." He
appoints William M. Tweed as "Commissioner of Public Works.
Peter B. Sweeny resigns as chamberlain to accept the presidency
of the Board of Docks which is to be held by the
impartial manner and directness, as the years of the
sketches of the careers of the appointees.—N. Y. Herald, Ap 11,
1870. The Sun's comment is: "Mayor O'Hall hung all his banners on
the outer wall yesterday in honor of the new era of municipal
rights, which began with the operation of the Tweed charter. The
grandeur of the era consists in O'Hall's being obliged to appoint
eight Republicans upon Commissions which rightfully belonged to
the Democratic party."—N. Y. Sun, Ap 12, 1870.

"Mr. Tweed's Legislature," in the words of the Sun, passes
an act for "the abolition of the New York Board of Supervisors.
In the bill's course through the senate, when Senator Tweed's name
was called, "somebody asked him to state what the bill meant.
This bill, Mr. President," promptly replied the America Club
Tiger, "means to abolish the Board of Supervisors of the county of
New York. He is drawn with clasps and banners, and is
financed by the usual perfections to be found in all my bills. I vote yea."—
N. Y. Sun, Ap 13, 1870. Tweed was a member of the first board of
supervisors (see Ap 15, 1877). The duties of this board now revert to
the common council, or more exactly to the mayor, recorder, and
aldermen. The mayor is to be the regular presiding officer, and a
majority vote, including that of the mayor, "shall always be neces-
sary to the passage of any act." The moneys drawn from the treasury "shall be upon vouchers for the expenditure thereof, examined and allowed by the auditor, and
approved by the comptroller."—Laws of N. Y. (1870), chap. 190.

The Metropolitan Museum of Art (see N 23, 1869) is incor-
porated.—Laws of N. Y. (1870), chap. 197; Howe, Hist. of Met.
Museum of Art, 145, 189. The permanent constitution was adopted
on May 24. The paintings belonging to the museum were sold

1870

THE ICONOGRAPHY OF MANHATTAN ISLAND

1938
in Cooper Union, for want of an exhibition-room, until Dec. 1, 1871 (q.v.).—Ibid. See also L. M. R. K., III: 957.

21 Part of the Croton aqueduct, between the south side of 111th St. and the south side of 93d St., is discontinued, and the commissioner of public works is directed, within two years, to lay iron pipes or conduits on the north side of the street, from the south side of 111th St. to connect with the aqueduct at 93d St., as was laid down by the late Croton aqueduct board. To meet the expense, the city is authorized to raise the necessary money, and to pledge the land now covered by the Croton aqueduct between 111th and 93d Sts., Eighth and Tenth Aves. The commissioners of the sinking fund are authorized to sell this property at public auction, but to retain any part deemed necessary and to use the material of the aqueduct as desired for laying pipes.—Laws of N. Y. (1870), chap. 230.

The legislature incorporates "The Industrial Exhibition Company," authorizing it to purchase land in the city and erect buildings on it.—Laws of N. Y. (1870), chap. 335.

The elevated railroad on Greenwich St. (see J. 25, 1868) has been extended to 50th St. "The cars are propelled by endless wire ropes, actuated by a stationary steam engine and drum. The rope carries travelers placed at proper intervals, and rolling upon small rails. The travelers are composed of four miniature car wheels, and carry projecting studs, which, engaging with a lever arm on the car, make the connection. . . . Some experimental trips have been made over the road during the past week. It is proposed, we learn, to continue the road to Yonkers, about fourteen miles up the Hudson from the Battery. . . . The engineer under whose direction the work has been done, is Mr. Charles E. Harvey of this city."—Scientific Am., Ap 23, 1870. However, the method of operating by stationary power proved a failure and, as the people who had contributed large sums towards its construction lost confidence in the project, the road was finally placed in the hands of trustees, who substituted locomotive power.—Railroad Gazette, Ja 24, 1874; Report of the Special Com. on R. R., Appointed . . . to Investigate Alleged Abuses in the Management of R. R. (Albany, 1880), i-4; Statutes and Docs. Affecting the Elevated Railways in the City of N. Y. (1866-1882). See Ap 20, 1871.

Washington's birthday, Feb. 22, is designated by the legislature as an additional legal holiday.—Laws of N. Y. (1870), chap. 379.

For the four holidays previously recognized, see Ap 4, 1849.

26 "For the final completion of the new county court-house" ("Tweed's courthouse") the mayor is authorized by act of legislature to appoint four commissioners, which commissioners are empowered to expend a sum not exceeding $65,000. All powers of the board of supervisors "over the erection of said courthouse shall be delegated to said commissioners," and expenditures shall be subject to their approval. The commissioners are required to submit a report to the mayor, giving an account of expenditures of public monies incurred, and to the clerk of the supreme court. The price of the courthouse site is estimated at $200,000. The amount of the purchase, together with the amount spent for repairs and improvements of the site and on the building, is $634,250. On account in building the new County Court House. Of this sum barely a tenth part was realized by the city."—Myers, Hist. of Tammany Hall (1917), 226; cf. Rhodes, Hist. of U. S., VII: 396.

The "Tweed Charter" of April 5 (q.v.) is augmented and amended by the "Tweed Laws." The important changes are those of making the comptroller and corporation counsel appointive, instead of elective; the present incumbent as corporation counsel, however, is to serve out the term for which he was elected (until Jan. 1, 1871). The jurisdiction of the park department is extended to include "all parks and public grounds south [as well as north] of Canal street," and the park commissioners are to serve without compensation. The commissioner of public works is "authorized in his discretion to cause water meters . . . to be placed in all stores, workshops, hotels, manufactories, public edifices, at wharves, ferry-houses, stables, and in all the places in which water is furnished for business consumption." As to the vexatious question of material for street paving, the act provides that when paving has once been done at the expense of property owners, thereafter the common council shall not prescribe "any patent or special pavement which has not been approved by the mayor, or . . . petitioned for by a majority of the owners of the adjoining property to be affected."

The new dock commissioners are authorized, after a public hearing, to advertise for plans "for the best method of improving the water-front and harbor" so as "to provide for the future expansion . . . and for the better and more convenient transportation of freight along the said water-front," so as to "render the whole water-front of said city available to the commerce of said port."

"The Board of Street Openings" is created, consisting of the mayor, comptroller, commissioner of public works, the commissioners of taxes and assessments, the corporation counsel, and the president of the parks department. This board shall have powers, now vested in the mayor, aldermen and commonalty, "of laying out, opening, widening, straightening, extending, altering, and closing streets or avenues, or parts of streets or avenues . . . south of Fourteenth street." (Chap. 574 of Laws of N. Y., 1871, extended this jurisdiction to 95th St.) Another provision (much debated prior to its passage) repealed, on and after Sept. 30, that section of the act of May 11, 1869 (q.v.), providing for the distribution of certain public funds for non-public schools. The major part, however, of the 37 pages of this new act is devoted to statements of amounts appropriated for the current year for the several parts of the city and county government, on the basis of which a tax is to be levied and collected.—Laws of N. Y. (1870), chap. 385. Tweed testified, in 1877, that he thought the scheme went "out of the community . . . in the hands of a few men. He thought the whole hundred thousand dollars" to members of the legislature to secure the passage of the tax levy bills for city and county, and he gave the names of seven senators who were bribed.—Docs. Ed. of Ald. (1877), part 2, 133-55.

The legislature authorizes the commissioners of the sinking fund to assign to the board of education, for the erection of a normal school (see D, 1869, and Mr 24, 1870), lands north of 40th St., and directs that the "normal school under the charge of said board shall hereafter be known as the Normal College of the City of New York."—Laws of N. Y. (1870), chap. 383. See Ji 20.

Mayor Hall, under the provisions of the "Tweed Charter," as amended (see Ap 26), reappoints Richard B. Connolly, city comptroller. The Herald believes this appointment to be "to the general satisfaction of the community, for Mr. Connolly has been tried and approved as an active, faithful and efficient Comptroller."—N. Y. Herald, Ap 28, 1870.

The commissioners of the sinking fund are authorized to lease to the Hahmemann Hospital public lots situated north of 66th St. for the erection of a public hospital.—Laws of N. Y. (1870), chap. 439. A lease for 99 years of 10 lots on the east side of Fourth Ave. between 67th and 69th Sts., was given on Jan. 14, 1871.—Man. Com. Curr. (1870), 767.

The legislature authorizes the commissioners of the sinking fund to sell at public auction a franchise for the establishment of a double track railroad commencing on the Hudson River at 130th St., thence through the street to Manhattan St., along Manhattan to 125th St., and through 125th St. to the East River; also from 125th St. along Third Ave. to the Harlem Bridge; also from Third Ave. through 150th St. to the Harlem River; also from 125th St. and
1870

Tenth Ave. along the avenue to its terminus.—Laws of N. Y. (1870), chap. 504.

May

1

The first building in New York erected by the Equitable Life Assurance Society (see Apr 18, 1870), at the southeast corner of Broadway and Cedar St. (No. 110 Broadway), is completed and opened. It is the first office-building in the city to have elevators. Authority for its construction had been given in 1868 (Jan. 15), in accordance with the plans of Gilman and Kendall, with Geo. B. Post as consulting architect. From time to time thereafter it was enlarged, the whole structure being completely remodelled and its height increased by several storeys, in 1887, under the direction of Mr. Post.—The Equitable Society’s First Half Century (1900); L. M. R. K., III: 967; Pl. 1594; Vol. III. It was destroyed by fire on Feb. 9, N. Y. Times, Feb. 11, 1912. A new building, covering the entire block, was erected in 1915.—L. M. R. K., III: 967. See also descript. of Pl. 158-5, III: 841.

2

The new paper, the Standard, in its second issue, says: "The general expectation that the various departments of the City Government under the new Charter would organize on Saturday (April 30), led to such a gathering of hungry crowds of place-hunters at various points as is not often witnessed. They came from all directions, as though some modern Cadmus had been sowing Manhattan Island with Democratic dragon’s teeth, and the yield had been a hundred-fold. It was very evident that the faithful benchmen of the ‘powers that be’ had made up their minds that the first of May was intended to be re-moving day for more things than household furniture, and that in their opinion the time had come when their faithfulness in the long siege of the Bureaucrats, which had at last succeeded, should be rewarded with a fair share of the loot of the place.―N. Y. Standard, May 2, 1870.

3

The department of parks is authorised to lay out the "Eastern Boulevard," together with other streets or avenues to connect it with Central Park and the East River.—Laws of N. Y. (1870), chap. 626. See also maps of the borough dated Sept. 25, 1873, and April 8, 1874, filed in bureau of topography, borough president’s office, as Maps No. 2982 and 3084.

4

By act of legislature a part of the town of Newtown in the county of Queens is incorporated as Long Island City.—Laws of N. Y. (1870), chap. 719.

5

Lexington Ave. is ordered extended from 102d St. to the Harlem River.—Laws of N. Y. (1870), chap. 731; L. M. R. K., III: 1004.

6

The first municipal election under the new charter (see Apr 5) results in a sweeping victory for the Tammany aldermanic ticket. The Times editor declares there were "one hundred and ten thousand ballots cast by eighty thousand voters," that "repeaters" in some cases "would walk out of the polling-places into the middle of the street; and there in the face and eyes of the Police, would cast their ballots and hats, and receive the cheers of the leaders of the gangs before starting for the next poll to repeat their ballots." A case is cited of Justice Hogan of the first ward being "cheated out of his vote" by a repeater. While awaiting his turn in the line he was "surprised to hear a strange man announce himself as Edward Hogan, and proceed to vote in his name." The judge immediately challenged the vote, but the inspector "refused to notice the challenge and deposited the vote of the repeater in the ballot-box." The magistrate then called upon an officer to arrest the repeater, but he declined to do so "unless directed by the Inspectors, under whose orders he said he was placed."—N. Y. Times, My 18, 1870. As to frauds practiced in counting ballots, see Thomas Nat’s cartoon bearing the legend: "Getting Through the Form of Universal Suffrage."

7

"Boys, You have the Liberty of Voting for any one you please; but we have the Liberty of Counting in any one we please."—Harper’s Weekly, XV: 1060.

8

The legislature provides for the building of bridges, tunnels, etc., over Harlem River and Spuyten Duyvil Creek, as public works. —Laws of N. Y. (1870), chap. 797.

9

The corner-stone of the Northwest Protestant Reformed Dutch Church (see Addenda, 1870), is laid at the n. e. cor. of Madison Ave. and 47th St. The architect of this building, which was dedicated on Oct. 22, 1871, and which still stands, was E. L. Roberts. By court decree, Jan. 1, 1871, the name was changed to Madison Avenue Reformed Church.—Exercises at the Laying of the Corner Stone, and Dedication (two pamphlets, 1871, at N. Y. Hist. Soc.) L. M. R. K., III: 936. See S 12, 1879.

10

The corner-stone of Mt. Sinai Hospital (see Apr 17, 1866, and N. Y. Times, My 26, 1870. The plans for the building are described in ibid, My 15, 1870. See also L. M. R. K., III: 934. The hospital was opened on May 29, 1872 (q. v.). The mayor approves a resolution of the common council, dictating the clerk (John Hardy) "to employ a suitable person to procure for the press with appropriate inscriptions and notes, the ancient records of the City of New Amsterdam and those of the City of New York," prior to 1850, and to cause 5,000 copies to be printed. The resolution is to take effect on July 1.—Proc. App’l by Mayor, XXXVIII: 196; N. Y. H. S. Quart. Bull. (Oct., 1923), 93—94. See J 30.

11

The legislature directs that 542, 53d, and 54th Sts. be extended from Madison Ave. to the Hudson River.—Laws of N. Y. (1870), chap. 805.

12

At this time there were 944, 129 inhabitants in New York City.—N. Y. Times, F 2, 1871. Cf. 1870.

13

"The Government at Albany has treated the city very harshly on this subject, and has rejected applications for authority to construct these roads, on insufficient grounds and for very crude reasons. But two plans have met their approval: One, the central underground, which has made no progress, and will not, unless they can build under Broadway, for they know that so expensive a road will not pay unless they have the best route. The second is the Greenwich street elevated road."—Scientific Am., Je 4, 1870. On June 30, 1870, the first streetcar line opened was the most practicable means for effecting the desired object without interference with property, or obstructing the street; and if the Pneumatic Railway Company [see F 26] have done nothing else, they are entitled to the gratitude of the public for demonstrating that such tunnels can be built and operated without even temporary inconvenience to surface travel."—Ibid., Je 11, 1870.

14

The first passenger excursion which sailed from New York to Cuba on the "George B. Upton" has been captured by the Spaniards.—N. Y. Times, Je 6, 1870.

15

The new board of aldermen elected on May 17 (q. v.) convenes; this is the first board in the history of the city elected at large. Five of the 15 members have been on the retiring board, and one of the five, Alderman Cooan, is re-elected as president of the new board. Mayor Hall in his message expresses his belief that "the interests of the city as a Metropolis will hereafter be perfectly represented. Hitherto, those interests suffered from local jealousies. Unless an alderman from a ward consented to legislation that immediately affected his locality, a courtesy from associates seemed to dictate that his opposition should prevail against it, and thus a give-and-take policy was instituted in consequence among the Aldermen. It is therefore necessary to protect localities against unjust legislation. Now, as heretofore, localities are represented in the Board of Aldermen; whose action will, undoubtedly, be sufficient for local protection against the overshadowing influence of city interests at large. "It will become, therefore, more especially the province of the Board of Aldermen to initiate measures which tend to foster the aggregate prosperity and to promote the general welfare of the whole city; and of the Board of Aldermen to oversee that taxpayers in small districts are not injured in their local rights."—Proc. Bd of Ald., CXIX: 21.

16

The corner-stone is laid of the Masonic Temple, at the northeast corner of Sixth Ave. and 53d St.—N. Y. Herald, Je 9, 1870. The building was dedicated June 2, 1875 (q. v.). See also L. M. R. K., III: 954.

17

The legislature passes an act for the widening of Broadway between 17th and 19th Sts.—Laws of N. Y. (1870), chap. 806.

18

Under an act of congress of this date, the books, engravings, prints, etc., formerly deposited, under the Copyright Law, in the department of the interior, Washington, were transferred to the Library of Congress, and, according to a report of Dr. Spofford, the congressional librarian at the time, the library thus acquired about 22,000 items.

19

Prior regulations concerning such deposits was as follows: Under the original Copyright Law of May 31, 1790, and its revision of Feb. 5, 1831, the author or proprietor was required to deposit, within three months after publication of the book, engraving, map, etc., a copy in the office of the clerk of the U. S. district court of the district wherein the author or proprietor resided, and was required
CHRONOLOGY: POLITICAL AND SOCIAL CHANGE: 1865-1876

1870 to print stated words ("Entered," etc.) on the title-page, or otherwise as directed. The act of 1871 required that the clerks of the
8 district courts should transmit these works to the department of state once a year. The act of Aug. 10, 1876, which established the Smithsonian Institution, required that the deposit of copies of works for which copyright was secured should be made with the librarian of the Institution (one copy) and the librarian of congress (one copy), "for the use of said libraries." By another act, on Feb. 5, 1859, the accumulation of works formed in the department of state was ordered to be transferred to the department of the interior. Then the act of 1870 placed them in the Library of Congress—Bulletin No. 5, Copyright Office, Library of Congress, entitled "Copyright Enactments, 1783-1900," 10, 36, 40.

12 A party of Orangemen parading on Eighty Ave. (in commemoration of the battle of the Boyne) is attacked by a crowd of Irish Catholic laborers at the corner of 91st St., and shots are fired resulting in the death of three men. — N. Y. Herald, Jl 13, 1876.

19 Looting, Hist. of N. Y. City, II: 811. There was a worse riot the next year (see Jl 12, 1871).

France formally declares war on Prussia, beginning the Franco-
Prussian war. — Henderson, Short Hist. of Germany, III: 422-23.

21 The German states of Bavaria, Wurttemberg, Hesse, and Baden, immediately joined Prussia against France. — Andrews, Hist. of Southern Europe, II: 177.

26 The board of education accepts from the commissioners of the sinking fund the plot of ground bounded by 68th and 69th Sts. and Fourth and Lexington Aves., to be used for the Normal College (see D, 1869, and Ap 26, 1870). A requisition was made on the comptroller for $150,000 for the erection of suitable buildings.—N. Y. Times, Jl 21, 1870. The college was opened here on Oct. 25, 1872.

The city leases to the Association for the Improved Condition of Deaf Mutes, for 99 yrs. at $1 per year, 12 lots on Lexington Ave., west side, between 67th and 68th Sts.—Man. Com. Curr. (1870), 763.

The city acquires by condemnation proceedings the land comprising the Central Park Plaza, at Fifty Ave. and 99th St.—Prendergast, Record of Real Estate, 51. See also L. M. R. K., III: 969. A map of the plaza, dated March 6, 1868, is filed in the bureau of topography, borough president's office, as Map No. 2415.

Dr. E. O. Callaghan is appointed to superintend the publication

Progress on this work was reported by Comptroller Green to Mayor John V. Belt, Jn. 25, 1873 (n.d.).

The Grand Central Hotel, erected at 667-677 Broadway, on the site of the Winter Garden Theatre which was destroyed by fire on March 23, 1867 (n. v.), is formally opened. — N. Y. Times, Ag 26, 1879; Brown, I: 467-68. See L. M. R. K., III: 986, under "Tripler Hall."

The New York Cotton Exchange, which was organized on Aug. 15, begins its first quarters, at No. 142 Pearl St. It occupied these until May 4, 1875 (n. v.), when it moved to the former Hanover Bank building at No. 1 Hanover Square.—Information furnished by Mr. Thomas Hare, Jr., spt., N. Y. Cotton Exchange; L. M. R. K., III: 925; King's Handbook (1893), 799; N. Y. Times, My 31, 1919. See Ap 8, 1871.

After repeated defeats, the French army surrenders to the Ger-
man's in the battle of Sedan. Napoleon III is taken prisoner. This led to the fall of the Empire on Sept. 4, when Gambetta, Jules Favre, and Jules Ferry proclaimed the French Republic at the Hôtel de Ville. The Franco-German war continued, however, to about February 1871.—Haen, op. cit., 297; Duruy, Hist. of France, 755; Anderson, Constitutions and Other Select Docs. Illus. of Hist. of France (1789-1907), 549-96. See Jl 4, 1871.

The city begins to acquire by purchase the land for the Man-
hattan end of the Brooklyn Bridge. From this time to 1882, between South and Chatham Sts. was purchased under 105 separate grants. One additional purchase was made in 1888, and another in 1896.—Prendergast, Record of Real Estate (1914), 115-17, citing Libros de Conveyances. The bridge was opened in 1883 (My 24).

28 Strasburg surrenders to the Germans.—Lewis, Hist. of Ger-
many, 728-29.

Admiral Farragut is buried in Woodlawn Cemetery. Final honours are paid to him in New York City by a civil and military procession. Crowds of people stand in a dreching rain to see the procession pass, and buildings are decorated with mourning. Sept.

Business in the city is suspended at 11 o'clock.—Harper's Weekly, XIV: 657, 659, which contains view.

An elevated railroad on a viaduct of stone, brick, and iron is proposed by John J. Serrell and Leopold Eidlitz as a means of rapid transit, and in the belief that the West Side Elevated Rail-
road, already built for a considerable distance (see Ap 23), has proved a failure.—A Viaduct Railway (booklet in the N. Y. P. L.), 1870.

Rome and its surrounding territory, Herodote under papal
control, vote to join the rest of Italy, and the unity of Italy is at last completed.—King, Hist. of Italian Unity, II: 378. See Jr 12, 1871.

With the fall of Metz, which had been under siege since Sept. 27, 1870, the Germans move to the siege of Paris.—Hazen, op. cit., 298;

Duruy, Hist. of France, 659; Lewis, Hist. of Germany, 729-30. See D 27, 1870; Jr, 1871.

An expedition, equipped by the N. Y. Herald at a cost of $400,000, and conducted by Henry M. Stanley, finds David Livingstone at Ujiji in the British East Africa, May 22, 1871, to explore the sources for the Nile.—N. Y. Herald, Jl 16, 1872; The Autobiography of Sir Henry Morton Stanley (1890); Stanley, How I Found Livingstone; Blakits, The Personal Life of David Livingstone (London, 1885).

Alterations in the stock exchange building begin. The business of the exchange was transacted, until alterations were completed, in the room on the second floor of the 18 Broad St., formerly occupied by the Open Board. The board moved back into its own remodelled building in September, 1871, "having reasonable facilities for a continuous market for the first time in its history."—Eames, N. Y. Stock Exchange, 57. See S 16, 1871.

The death of Mr. John P. De Wint, at Fishkill, in November 1870, severed the last link of the connection [see My 1, 1859], the lease of the [Tontine] building [on Wall St.] terminated, the property reverted to the owners of the shares represented by the surviving seven nominees, and the affairs passed into the hands of Mr. Frederick De Peyster, and Mr. W. T. Horn, as attorneys. The surviving nominees [in 1872] are Robert Benson, Jn., William Bayard [Jn.], Gouverneur Kemble, Horatio Gates Stevens, Daniel Euler, Jr. [Judge David D. [Jr.]], Mrs. William [Duncan?] P. Campbell, and Mrs. John A. King. The heirs of George Bright, who died two years after he nominated Gouverneur Kemble, have, yet to be found. The property will then be sold . . .—Stone, Hist. of N. Y. City (1872), 327 (with contemporary wood-cut view of the Tontine building), citing Journ. of Com., Jl 25, 1871; N. Y. Times, Jl 12, 1881; Mag. Am. Hist. (1881), VII: 231.

The owners of the shares represented by the surviving nominees were: Wm. T. Horn, 3/4 of the total; Elizabeth J. Lynch, 3/4; Marshall H. Bright, as executor of George Bright, Jr., 3/4; the heirs of John A. King, 1/4; Frederick K. de Peyster, 3/4; the heirs of William H. Aspinwall, 1/4; and William S. Verplanck, John N. Whiting, John B. Remsen, and Ellen Shepherd Varick, each a small fractional part of the remainder.

In 1873, Frederic De Peyster and William T. Horn brought a suit in the supreme court to determine the interests of the various owners in the assets of the association, and the proper method of division. The matter was referred to William B. Winterston, as referee, and he advised a sale by auction. This the court ordered, and it took place on Jan. 11, 1881 (g.o.).—N. Y. Times, Jl 12, 1881.

The city leases to the Ladies' Baptist Home Society 10 lots be-

The name of Laurens St. is changed to South Fifth Ave.—Proc., 30th by Mayor, XXXIII: 376.

The P. E. Church of St. Mary the Virgin is "solemnly dedi-
cated," with impressive ceremonies.—N. Y. Times, D 9, 1870; S 8, L. M. R. K., III: 969.

The city acquires by condemnation proceedings the land com-
prised in Empire Park South, at Broadway, Columbus Ave., and 63d St. In 1872, it acquired the land comprised in Empire Park North.—Prendergast, Record of Real Estate, 51; L. M. R. K., III: 969. It is shown on Pl. 177, Vol. III.
1871

In this year, the universities of England were made thoroughly national by abolishing religious tests, another step in the direction of religious and intellectual liberty.—Hazen, op. cit., 483.

Volumes CXXI, CXXII, CXXIII, and CXXIV, both of the Proceedings of the Board of Aldermen and Proceedings of the Board of Assistants Aldermen for this year, are lacking, and the continuity of the record of common council activities is thereby broken. The hiatus is partially filled by the existence of a volume of Proceedings, Approved by the Mayor (1871), XI, also a volume of Documents containing Mayor Hall’s message to the common council (June, 1871), with accompanying departmental reports.

In this year, the “Minutes of the Common Council” from 1874 to 1876, in 15 vols., were printed by the N. Y. Printing Co. They were edited by Dr. E. B. O’Callaghan. The only known set (O’Callaghan’s own proof copy) is in the N. Y. Hist. Soc. It contains, besides the records printed later in the 1905 edition, the “Mayor and Aldermen’s Commission A# 1674,” a “Report on the Fortifications of New York, 1688,” and a unique “Map showing the Wards of the City of New York as established in 1683.” Only the first volume is indexed, and only the first two volumes have title-pages and covers; of the others, all but Vols. VII, VIII, and IX are stitched and ready for binding, lacking only title-pages and indexes.

“The exposure of the [Tweed] Ring in 1871 and the departure for Europe of Mr. Charles Edwin Wilbour, President of The New York Printing Company, printers to the corporation, undoubtedly caused all work on these records to cease, while the plates were stored for years in the basement of the Trow Press, according to Mr. Robert H. Kelby, Librarian Emeritus of the Society. The latter firm is now dissolved and no information is available as to the disposition of the plates.” For the proceedings of the common council leading to the printing of these old minutes, and other facts relating to the subject, see Quarterly Bull., N. Y. Hist. Soc., O, 1923.

The number of new buildings this year is 2,256, as compared with 2,559 in 1862.—Message of Mayor Hall, Jl, 1872.

With the success of the Stuyvesant apartment-house on 18th St. (see 1869), the advantage of this style of residential buildings, called “French flats,” receives further recognition this year in the erection of the Haight House at Fifth Ave. and 15th St.—N. Y. Times, Ap 16, 1871; N. Y. World, O, 8, 1871. For an account of the “Parisian Flats,” with particular reference to the Stevens House, continue which 25th and 26th St., see next page, to Mr. O’Callaghan.

Building plans for the Lenox Library (see Ja, 1870) are filed with the building department.—N. Y. Times, Mr 31, 1871. (This report in The Times gives the location as “between 71st and 72nd Streets;” but the building was erected between 70th and 71st Sts., on Fifth Ave.). See 1877, in which year it was completed. Richard M. Hunt was the architect.

In this year, the iron fence around Union Square was taken down.—2d Ann. Rep., Comrs’ Dept. of Pk’s (1872), 5–6; L. M. R. K., III: 971–72; descrip. of pl. 135, III: 971–72; descrip. of pl. 135, III: 702.

“Houses which were considered to be ‘just the thing’ ten years ago, are out of date today. Observe the style of the houses about 24th Street, for instance; then at 25th to 30th Streets; and, again, those which are being erected to-day. Between 55th and 56th Streets, for example, a block of houses has just been built of Ohio stone—a material fast coming into use, and destined to supplant brownstone. These houses are finished with mansard roofs, and are vastly more attractive than the houses of ten years ago. . . . Another block that will attract attention is just finished, between 57th and 58th Streets. These houses are of white marble, and when one is a little distance away, the effect has been so contrived that the block may very well be mistaken for a church.

“On that portion of the avenue which is on Central Park, fabulous prices have been obtained for building lots, the position being beyond all question the finest in the City. . . . We already begin to see houses converted into stores in the lower section of the avenue and business houses further away. A man need not be more than sixty years old to remember when the Battery was, to the fashionable world, what Fifth Avenue and 50th Street are to-day. If this old fellow should live twenty-five years longer, where shall he look to find the centre of fashion?”—Redfield’s Traveler’s Guide (1871), 72–73.

In this year, Trinity School at 90 Trinity Place, at the s. w. cor. of Prices St., was erected. Its formal name is N. Y. Prot. Episcopal Public School, and under various forms it has been conducted in this immediate vicinity since 1709.—L. M. R. K., III: 941, and authorities there cited.

In this year, the Catholic Church was organized. It was incorp- orated in 1871. Its club-house is at 120 W. 59th St.—King’s Handbook, 556, 574; L. M. R. K., III: 937.

In this year, the Knickerbocker Club was organized, and pur- chased the residence of Wm. Butler Duncan on the south-east corner of Fifth Ave. and 28th St. After being fitted up the club-house was opened in Feb., 1872.—Club Book (1918); The Galaxy (1875); L. M. R. K., III: 938. In 1882 (q. v., Oct.), the club moved to 32d St.

In this year was published by De Vito & Co., New York, a 16mo. guide-book, entitled Metropolis explained and illustrated in familiar form, containing a folding “Map of New York & Brooklyn and adjacent cities,” prepared in this year by G. W. & C. B. Colton & Co. (six, 242 x 144 in.).

In this year was published New York and Its Institutions, 1869—1871, by Rev. John Fletcher Richmond, containing historical and descriptive sketches of its churches, schools, public buildings, etc.

In this year, Frederick A. Bridge, who was one of the earliest of American art students to settle in Paris, going there in 1866, sent his work for exhibition in the Academy of Design in New York.

—Inham, Hist. of Am. Painting (1905), 408.

Early in this month, the Germans began the bombardment of Paris. The siege lasted until the 28th (q. v.—Hazen, 299, 300).

S. E. Church, speaking before the New York and New England Association Hall in favour of a project that the city, in its corporate capacity, build a steam railroad for rapid transit from the Battery to Harlem River, says: “It was in 1872 that Mr. John Schuyler first introduced his bill for authority to construct a railroad for rapid transit in New York. Every year since that time the Legis- lature has been the unceasing battle ground of rival interest on this subject. All manner of schemes are ushered in, one after another, that tier, viaduct, depressed, arcade, marginal, tunnel, and what not, have been pressed with all manner of pictures, plates, drawings, models and designs, endorsed by imposing certificates, bearing imposing and illustrious names, . . . yet we stand to-day, with absolutely nothing done. . . . At one sweep of the legislative session of ’69, the following schemes were given the coup de grace, although itself and 300 copies of Mr. Church’s addenda in favour of the twenty streets scheme, and the new scheme and the fire tunnel, just the thing, and was sure to pass, namely: The Manhattan Un- derground, The People’s Railroad, The People’s Metropolitan Suburban Railway, The New York Underground Railroad, and The Metropolitan Transit Railway, while the Three Tier, the Suspension Bridge, the Arcade, and other plans, had either gone before or followed the melancholy train. Of all the many schemes which have thus deluded the public and swayed the Legislature the past ten years, those which have crystallized into actual charters are the Pneumatic Tube, now making daily trips under Broadway [see the Beach Underground Railway, 1868], and the Institutions of Centre and Greenwich Streets—the one in the ground, the other in the air.” On Jan. 27, 1873, the N. Y. Rapid Transit Association (organized in Dec., 1872) ordered that 900 copies of Mr. Church’s addenda in favour of his twenty streets scheme, and the new scheme—perhaps the most plausible argument for a City Railroad as a City Work.”—The Great Need (pub. by N. Y. Rapid Transit Assn, 1873), pamphlet in N. Y. P. L.

The Academy of Music is crowded to overflowing “by an audience anxious to express their sympathy with the successful movement for Italian unity” (see O 2, 1876). Speeches are made by Gen. Dix, Plate Godein, Rev. Henry Ward Beecher, Horace Greeley, Wm. Cullen Bryant, etc., and letters of approval are received from many prominent men including Emerson, Whittier, Howells, and Henry James. The meeting unanimously adopts resolu- tions congratulating the Romans upon the union of Rome with the rest of Italy and an address to the “Government and People of Italy.” Before adjourning Chairman Dix announced that he had received the following Valedictory Emoluments: “More than ten thousand American citizens are celebrating to-night, the union of Rome with Italy, and send congratulations.” This was received
with "immense and prolonged applause."—N. Y. Times, Ja 15, 1871. See also Botta, _The Unity of Italy, The American Celebration in New York, Jan. 13, 1871_ (N. Y., 1871).

14. Thomas Nast is beginning to expose in cartoons the political manipulations of Tweed and the Tammany Ring. One of this date bears the legend "Tweeddledee and Tweedledum (A New Christmas Pantomime at the Tammany Hall)." Tweed is pictured as bestowing on charity a package of bills with one hand and receiving in the other hand another package of bills from Sweeny, who is at the same time removing another package from the "Public Treasury." Tweed says: "Let's Blind them with _this_, and then take some _more._"— _Harper's Weekly_ (1871), XV. 40. "Partly to quiet his conscience, it was suspected, and in part to make himself appear in the light of a generously impulsive man, Tweed gave, in the winter of 1870-71, $1,000,000 to each of the Aldermen of the various wards to buy a plot of territory. To the needy of his native ward he gave $50,000. By these acts he succeeded in deeding the needier part of the population to the enormity of his crimes."— _Myers, Hist. of Tammany Hall_ (1917), 230.

15. In the "Hall of Mirrors," in the palace of Versailles itself a monument and symbol of the power and pride of Louis XIV, a power which had been secured to some extent by the humiliation of Garibaldi, the last event of its kind is embodied in the person of Garibaldi and by the generals of the German army, is proclaimed German emperor.— _Hazen, op. cit., 301; Lewis, Hist. of Germany, 731-52; Duruy, _Hist. of France_, 661. Hazen, whose Europe since 1815 was published in 1910, refers to this episode as "one of the supreme ironies of history." Since then, another treaty of Versailles, terminating the World War of 1914-18 in favour of the French, restored her territory. The city is authorised to expend $1,500,000 in laying pipes to extend the distribution of Croton water through the city of New York, and to furnish a sufficient supply of Croton water to the institutions in charge of the department of public charities and correction located on Blackwell's Island, Ward's Island and Randall's Island, and in laying mains necessary to deliver water at higher elevations."— _Laws of N. Y._ (1871), chap. 69. On May 7, an additional bill $750,000 was authorised for the purpose of this purpose.— _Ibid._ (1872), chap. 593. The further sum of $11,500,000 was appropriated on June 28, 1873.— _Ibid._ (1873), chap. 865.

16. Five Fenians recently released from English prisons arrive at New York. They are given an enthusiastic welcome.— _N. Y. Times_, Ja 20, 1871. See F 9.

18. Paris capitulates to the Germans, and an armistice for three weeks is signed.— _Dury, Hist. of France, 660_. The armistice of Versailles virtually terminated the Franco-German war (see Jl 19) by an agreement to maintain an armistice called the "National Assembly," in place of a "Government of National Defence" which was improvised when Napoleon III was captured (see S 2, 1870). The assembly chose Thiers as "Chief of the Executive Power," and empowered him to negotiate with Bismarck for peace.— _Hazen, op. cit., 399, 300_. See F 29.

Feb. 6. A letter appears in the columns of the _Tribune_ telling how the New York county auditor has been "the means of defeating one of the most gigantic and iniquitous frauds which the Tammany Ring ever concocted." The writer says that, after the passage of the act authorising the widening of Broadway from 34th to 59th St. (see My 17, 1869), commissioners were immediately appointed to assess damages and benefts. These commissioners, by collusion with the owners of property taken for the widening, "secured a sum of $3,000,000, which, by its timely frustration, would have enriched the members of the Ring by several millions." A part of the plan was to have property owners, "in consideration of excessive allowance," assign their claims against the city for damages over to the county auditor, in trust, "to pay to the Ring its share and to the property owners their share of the proceeds." This trust fund had become about $90,000,000, much more than half of which was to have been reserved for division among the members of the Ring. The death of the auditor, however, would have brought his estate before the surrogate, and all the circumstances connected with this trust fund would be inquired into, and the fraud laid bare "to the public gaze." Mr. Tweed was soon "in communication with his fellow-conspirators," and directions were given "to his minions at Albany" to repeal the act to widen Broadway.— _N. Y. Tribune_, F 6, 1871.

9. A meeting is held at the Produce Exchange "to take measures to contribute relief for the sufferers in France." The sum of $6,700 is collected at the meeting, and a committee is appointed to solicit further contributions.— _N. Y. Times_, F 10, 1871.

The city joins with Tammany in a reception to the Fenian exiles (see Jl 19). Various societies parade in their honour from Tammany Hall to the city hall and thence up Broadway.— _N. Y. Times_, F 9, 1871.

By the preliminary "Peace of Versailles," Bismarck exacts severe terms. France must pay five thousand million francs ($1,000,000,000) within three years. She must cede Alsace and a large part of Lorraine, including the important fortress of Metz. She must support a German army of occupation, which will be gradually withdrawn as the installments of the war indemnity are paid. These preliminaries were embodied in the final Treaty of Frankfort, signed on May 10 (p. v), and ratified by the Assembly of Bordeaux. — _Anderson, Constitutions and other Select Docs. Illus. of Hist. of France_ (1789-1907), 607-8; _Duruy, Hist. of France_, 660.

As a result of the Franco-German war, Italy completed her unification by seizing the city of Rome and terminating the temporal rule of the pope. Rome became the capital of the kingdom (see Jl 2, 1871).

A still more notable consequence of this war was the unification of Germany, and the creation of the German Empire (see Ja 18, 1871), with Berlin the federal capital.— _Hazen, op. cit., 300-2, 378_.

The Germans enter Paris.— _Lewis, Hist. of Germany_, 747.

The public mass meeting held at Irving Hall to consider "the problem of rapid transit." The _Tribune_ gives a report of the meeting under the caption "Tunnel Versus Viaduct." Resolutions are adopted urging Gov. Hoffman to sign the "Beach Transit Bill," which has passed the legislature. This bill permits the construction of a tunnel under Broadway, and the speakers contend that the running of locomotives and trains in such a tunnel, "beneath the surface of the street, included in two feet of masonry," is preferable to "running trains upon the viaduct within ten feet of adjoining buildings." About 50 declared their intention to go to Albany to the hearing before the governor.— _N. Y. Tribune_, Mr 29, 1871. The bill was vetoed by the governor, on March 31 (p. v), after a hearing on the previous day.

The 8th Regiment moves from Centre Market to its new armory at 23d St. In 1890, it moved to Madison Ave. and 94th St.— _Grand Opening of the Eighth Regt._ (1890), in _N. Y. P. L._

"Lochergin" is sung for the first time in America, at the New York Stadt Theatre.— _N. Y. P. L. Bulletin_ (1923), 884.

The legislature authorises the creation by the city of a public fund or stock to be known as "The City Parks Improvement Fund," the amount of which shall be such that the annual interest will not be more than $200,000. This is to be used by the comptroller "for the improvement and regulation of the parks known as the Central park, City Hall park, Riverside park, Madison square, Reservoir square, Washington square, Tompkins square, the Battery, and the several parks and places which now are or hereafter be under the control and management of the department of public parks; and also for the construction and equipment of a meteorological and astronomical observatory on the Central park." At the same time the commissioners of the department of parks are authorised to "construct, erect and maintain in and upon that portion of the Central park, formerly known as..."
The incorporated the re-bridge appropriations "one permitted viaduct of natural history, by the American Museum of Natural History." The aggregate cost of the buildings is not to exceed a sum on which the annual interest is to be $15,000 for each building.—Laws of N. Y. (1871), chap. 290. The corner-stone of the Museum of Natural History was laid on June 3, 1874 (q. c.).

The "New York Railway Company," incorporated by the legislature, the list of incorporators being headed by Peter B. Sweeny and Wm. M. Tweed, Jr. The company is permitted to construct a viaduct railway from Chambers St. northward, with branches on either side of the city and reaching into Westchester Co. A maximum fare of 15c. is fixed "for any distance between Chambers street and the Harlem," and 20c. to Kingsbridge, with the interesting proviso, however, that between 6 and 8 a.m. and 6 and 8 p.m. "trains starting from each terminus, . . . shall have attached to them at least two special cars. . . . for the accommodation of citizens and others desiring to travel to and from their work," in which the maximum fare is to be 5c.

A further proviso authorizes the mayor, aldermen, and commonalty,—"to subscribe for five millions of dollars of the stock of the said company, with the approval of the commissioners of the sinking fund.—Laws of N. Y. (1871), chap. 300. The act was amended on April 28, authorizing the city government to subscribe to the capital stock after "other parties shall have actually subscribed for and taken at least one million dollars of the stock," exempting the railway's property from taxation during the time allowed for the completion of the viaducts and railways (5 years, as far as 43d St. and 5 years "to complete the same to the Harlem"), and permitting the company to build branch railways "to connect with any other railroad authorized by law."—Ibid., chap. 808. When the original bill was introduced into the senate the Sun in an editorial said: "The bill . . . proposing to construct a viaduct railroad on Manhattan Island appears to have been intended simply to give the quietus to all schemes of rapid transit."—N. Y. Sun, Mar. 11, 1871.

A public meeting is held in Cooper Institute to protest against the bills the Tweed Ring is forcing through the legislature. It is a monster meeting and an imposing demonstration. Speeches are made by the Hon. Wm. M. Evarts, the Rev. Dr. Henry Ward Beecher, and the Rev. Dr. Bellows. Stirring resolutions, against the so-called Tax Levy Bill, the bill depriving the registry law of its officeholders, and for establishing a board of education, for changing the law regulating public assessments, are adopted.—N. Y. Times, Apr 7, 1871. In spite of this opposition the bills passed, and Tweed said: "Well, what are you going to do about it?"—Rhodes, Hist. of the U. S., VI: 405.

The legislature amends the charter of the Am. Geographical and Statistical Soc., and changes the name to the Am. Geographical Soc.—Losing, Hist. of N. Y. City, II: 644, quoting its definition of purposes from the act.

The New York Cotton Exchange (see S 1, 1870) is incorporated.—Laws of N. Y. (1871), chap. 365.

The new Broadway Market in Broadway between 44th and 45th St. is opened for public inspection.—N. Y. Times, Apr 13, 1871.

The N. Y. and Long Island Bridge Co. is incorporated for the purpose of constructing and maintaining a bridge over the East River between New York City and Queens County.—Laws of N. Y. (1871), chap. 437.

The Gilsey House, at the n. c. cor. of Broadway and 26th St., is opened. It is "one of the most imposing of our metropolitan palace hotels."—N. Y. Times, Apr 16, 1871. See L. M. R. K., III: 978.

Several amendments to the "Tweed Charter" (see Ap 5, 1870) are made by the legislature. One change empowers the comptroller to "appoint and at pleasure remove a deputy comptroller" whom the comptroller may designate "by due written authority" to act in his stead, "during a period to be specified." The same power is given to the commissioner of public works. More important, however, is the substitution of "the department of public instruction" for the board of education. The members of the latter retire from office "at the expiration of ten days from the passage of this act," and 12 new commissioners are to be appointed by the mayor (former commissioners were elected) to head this new department; in these appointments the chief executive is to recognize "the principle of representation of the minority." A commissioner's term is five years. The department shall not have power "to provide additional sites or buildings or remove any teacher, except by a vote of three fourths of all the members of said board." It is further provided that "trustees of common schools" shall hereafter be appointed rather than elected, although the present incumbents shall serve out their full terms.—Laws of N. Y. (1871), chap. 574. The Tribune comments editorially thus: "Where the present charter restricted inquiry it has been amended; where the past year's experience has developed new methods by which profits might more surely, the Charter has been extended."—N. T. Tribune, Apr 19, 1871.

An additional sum (see Ap 26, 1870) has to be appropriated "for the completion of the New York county court-house"—$750,000.—Laws of N. Y. (1871), chap. 583.

A "board of apportionment" is created for the city by the legislature, consisting of the mayor, comptroller, commissioner of public works, and president of the department of parks. This board is to elect a chairman from its own number and appoint a secretary. It is empowered not only to apportion moneys, but "to limit and transfer appropriations which are found to be in excess, . . . and, to regulate all salaries of officers and employees."—Laws of N. Y. (1871), chap. 593. To this board may be traced the origin of the present board of estimates.

When this measure was before the legislature, the editor of the Tribune exclaimed against it, saying that it turned "the whole public property and public money of the City and County, and all that can be squeezed out of the tax-payers, over to a close corporation of four persons, to-wit, Hall, Connolly, Tweed, and Sweeney," that it empowered "this quartet" to appropriate and transfer moneys "ad libitum," thus giving the Ring "absolute control of every man and body of men, whether officers of court, school-teachers, Aldermen, police, Fire Department, and any and all other employees under the City Government; for if any of these men refuse to do the bidding of the Ring, this quartet could simply stop the entire appropriation of any money to pay their salaries. There certainly should be added to this bill, the editor continues, a clause requiring the board to publish monthly, beginning with July 1, 1871, '"a full, detailed statement of all appropriations and transfers of appropriations made by them during the preceding month.'—N. T. Tribune, Apr 13, 1871.

The amount to be raised "by tax upon the estates, real and personal," in the city, for 1871 and 1872, is limited by act of legislature to $2,900,000, of which $1,800,000 is to be raised by the school fund and $1,100,000 by the city. The aggregate amount raised, including the state tax, is not to exceed $4,900,000 in either year. The sum so raised in each year shall take care of "all the expenses of the city and county government for all their departments and purposes," as well as the debt service. Furthermore, "no liability for any purpose whatsoever shall be hereafter incurred by any department . . . exceeding in amount the appropriations made for such purpose."—Laws of N. Y. (1871), chap. 583.

The legislature passes an act "to amend and reduce to one act the several acts relating to buildings in the city of New York."—Laws of N. Y. (1871), chap. 625.

The legislature authorizes the laying out of a public square above 59th St., to be used as a parade-ground for the first division, N. Y. N. G. and Long Island Bridge Co. is incorporated for the purpose of constructing and maintaining a bridge over the East River between New York City and Queens County.—Laws of N. Y. (1871), chap. 437.

New York State appropriates $16,000 "as the contribution of the State of New York, to be paid . . . to the treasurer of the National Washington Monument Society, whenever the Governor shall certify . . . a sufficient sum has been subscribed from other sources to enable said society to resume work with a reasonable prospect of completing the obelisk or shaft."—Laws of N. Y. (1871), chap. 651; Harvey, Hist. of Washington Nat'l Monument and Washington Nat'l Monument Soc. (1902), 59. Work on the monument had been suspended in 1865 (q. c.). Following the action of New York State, the legislature of Minnesota, New Jersey, and Connecticut also appropriated money towards the monument, and other sums were subscribed by benevolent societies throughout the
THE "partisan thousand" 1872

Reform:...doubled...disbursed to

The legislature authorizes the creation of public stock to an amount not exceeding $200,000 for the erection of a building for the Normal College (see JL 20, 1870).—Laws of N. Y. (1871), chap. 692. The college building was opened on Oct. 29, 1873 (q.v.).

A public meeting takes place at the Broadway Tabernacle "with a view to taking measures for further exploration in the Holy Land for illustration of the Bible."—N. Y. Times, My 1, 1871.

The "Palace Horse-Car," or the "new drawing-room car," takes its place on the Third Ave. line. This is run for "such passengers as voluntarily pay the conductor ten cents in addition to their fare."—N. Y. Times, My 9, 1871.

The second caison (for the first, see Mr 19, 1870) of the East River Tunnel is sunk.—N. Y. Times; My and 9, 1871. See L. M. R. K., III: 957, under "Brooklyn Bridge." A definitive treaty of peace is signed by Germany and France at Frankfurt, embodying the terms agreed upon on Feb. 26 (q.v.).—Duruy, Hist. of France, 660-61.

June

Hall Park have been completed by J. W. Mould.—N. Y. Times, Je 5, 1871. A description of the proposed fountain is in ibid. The statue (by Byron M. Pickett) in Central Park is unveiled. Addresses are made by Gov. Hoffman, Wm. Cullen Bryant, and others. The ceremonies closed with a meeting in the Academy of Music, "where the praises of Prof. Morse were renewed by gifted orators."—N. Y. Times, Je 11, 1871. The statue stood until 1925 near the Fifth Ave. and 72d St. entrance to the park.—Carroll, W. H. Art Belonging to the City. It was then moved to the north end of the Mall, so as to provide more room for the services in honour of Morse held annually by the Society of Telegraphers.

The "Council of Political Reform" of the 21st Ward adopts a "Report on the City and County Debt," and orders the same to be given to the press. The report begins with the statement that "in the past months, ending on May 1st last, the Mayor and Comptroller of the City of New York kept the tax-payers and the public in ignorance of the manner in which they expended and disbursed the public revenue," although law and custom required that "the Auditor should make a report quarterly, showing to a cent, first, for what every dollar of public money was paid out; and second, to whom paid and third, what paid: and that the Comptroller should make his reports at the end of each year, showing...the whole financial transactions,...and a minute statement of the...debts and liabilities; and that on the 1st of January of each year the Mayor should, in his annual message, give to the public a summary statement of these important facts....This honest and old-fashioned practice of our public servants ceased on January 1, 1869."

The report presents tables and figures to show "over $50,000,000 a year spent and no Accounts Rendered," and the debt "more than doubled" in the last two years, and concludes: "Until our city rulers produce their accounts and vouchers, and deliver to the public the regular quarterly reports of the Auditors for the last twenty-eight months...tax-payers and the public creditors cannot avoid the belief that a large part of it was stolen, traitorously stolen." The "New York City Council of Political Reform," on July 11, adopted this report as an "Official Document of the Council," and ordered its publication.—N. Y. C. Council of Political Reform: Official Document on Extravagance of the Tammany Ring, New York, 1871.

JULY

VICTOR EMANUEL II. now sovereign of the kingdom of Italy

2 (see Harper's Weekly, Rome, over which the popes have exercised temporal as well as spiritual rule in uncontested right for a thousand years. Thereafter, the pope considered himself the "prisoner of the Vatican," and did not leave its precincts.—Hazen, op. cit., 378-79; Emerson, Hist. of the Nineteenth Cent., III: 1350.)

The New York Times (proprietor, George Jones, and editor, July Louis J. Jennings) begins publishing accounts of the Tweed ring's peculations.—N. Y. Times, Jl 8, 1871. "Tweed's crimes and those of his associates were brought to light in two ways. A quarrel developed among the partners. James O'Brien, who was not satisfied with the share of the plunder which he was receiving. He made up a claim against the city for $500,000, which he afterwards offered to sell to Tweed for that amount. Tweed refused. He felt that O'Brien's support would cost him too dear. O'Brien thereupon began, through a man named William Copeland, who was one of his assistants, and for whom he had sent an appointment to the Comptroller's office, to furnish information of the pecuniary needs of the partners whom he considered too greedy. Mr. Jones, who was the proprietor of the New York Times, obtained from the office of the Comptroller (not only through Copeland, but through Matthew J. O'Rourke, who was a clerk in that office, and himself became convinced of the fraudulent character of the claims which were being paid), without the knowledge of the associates, statements of accounts which showed that the bills which were being paid by the city for the new courthouse and for other purposes were not honest bills. These bills were made up on the same principle as those of the unjust steward in the parable: the plasterers, the painters, the masons, the plumbers—in short, all of those engaged in furnishing labor or material to the courthouse—were told to take their bills and sit down quietly and write them off as the total amount. The contractors, who found that they could not get paid unless they joined in this fraudulent proceeding, got their money, and the balance went to the conspirators."—Wheeler, Sixty Years of American Life, 326-327. Cf. Rhodes, Hist. of U. S., VII: 396-99; Myers, Hist. of Tammany Hall, 237-41; How N. Y. is Governed. Proud of the Tammany Democrats (pub. by N. Y. Times); Thilton, The N. Y. C. "ring" its origin, maturity and fall; Pause, Life of Nat, 174-75; Docs. Bd. of Ald. (1877), No. 8. Many of the original vouchers of Garvey (plasterer), Keeyes (plumber), Ingersoll & Co. (furniture dealers), and others are to be found in metal file No. 87, in city clerk's record-room. For the immediate outcome of the revelations of the Times, see Ag 23 and 4.

Another "Orange riot" in New York (Jl 12, 1870) occurs. Though guarded by the 9th and 34th Regiments to prevent trouble, the Orangemen parading in honour of the battle of the Boyne are attacked on Eighth Ave., between 24th and 25th Sts. by a number of Irish Catholics. The militia fired into the mob, and 52 persons were killed and many more wounded. The victims of the riot were buried with great pomp and ceremony.—N. Y. Herald, Jl 10, 1871; N. Y. Times, Jl 10 and 11, 1871; History of Tammany Hall, 237-41; N. Y. Times, Jl 12, 1871; N. Y. Times, Jl 13, 1871. See also Witterton's Hist. of the 71st Regt., 90-91; Lossing, Hist. of N. Y. City, II: 815-14; and the account and illustration in Harper's Weekly, XV: 692-93.

The two large tenement-houses on Cherry St. known as Gotham Court are emptied of inhabitants by order of the board of health, so that the building could be sterilized, cleaned, and made wholesome.—N. Y. Times, Jl 21, 1871.

The centennial anniversary of the New York Hospital is celebrated at the Historical Society.—N. Y. Times, Jl 25, 1871.

The centennial anniversary of the birth of Sir Walter Scott is celebrated in New York City by the laying of the cornerstone of his monument in Central Park.—N. Y. Times, Ag 16, 1871. The statue was unveiled on Nov. 2, 1872 (q.v.).

Mayor Hall is aroused by the articles that have appeared in the Times (see Jl 8) to send special messages to the board of supervisors and the board of aldermen. He declares a "partisan conspiracy" has been formed "against the credit of the City," and recommends that members from both boards combine with an "unbiased, unexceptionable, and unpartisan Committee of tax-payers" in an examination of the city accounts.—N. Y. Times, Ag 24, 1871. This brought into existence the "Booth Committee."—Townsend, N. Y. in Bondage, 79-80. See O 27.

"Delegates to the Convention of the Great Italian Union of the United States and Canada have arrived in this City, and are now stopping at the Grand Central Hotel. The Convention represents all the principal Italian benevolent and protective societies in the United States and New-York for the ways attending to the business of the Union."—N. Y. Times, Ag 24, 1871. The Italian societies paraded on Aug. 25—Ibids., Ag 26, 1871.

The mayor and common council accept with thanks an engraving of the old city hall presented by George Pesinger and order that
1946

THE ICONOGRAPHY OF MANHATTAN ISLAND

1871 it be placed in the governor’s room.—Proc., App’d by Mayor,
Ag 30 XXXIX: 161.

Sept. Among the buildings under construction in New York at this
time are: Homeopathic Inane Asylum; Presbyterian Hospital
(L. M. R. K., III: 955); Mt. Sinai Hospital (see ibid., III: 954);
Women’s Hotel; German Savings Bank; Seaman’s Bank for Sav-
ing; new building of Security Insurance Company; new build-
ing of Chatham National Bank; the Kemp Building; and the
building of the New York Life Insurance Company.—N. Y. Times,
S 3, 1871.

The First Baptist Church, corner of Park Ave. and 39th St.,
has just been completed.—N. T. Times, S 3, 1871; Treat’s Ill.
N. T. (1874), 66; L. M. R. K., III: 928. In 1868 (q. v.), the con-
gregation sold the old church on Browne and Elizabeth Sts. to
the Luthers.

4 A great mass-meeting is held at Cooper Union, which condemns
the Tweed ring, calls for reform in the city government, and
appoints the “committee of seventy” to carry out the purpose of
the meeting.—N. Y. Times, S 5, 1871. See N 2.

The Union Square Theatre on 14th St. between Fourth Ave.
and Broadway is opened.—N. Y. Times, S 14, 1871.

5 Appropriations for this year, amounting to nearly two million
of the city and county of New York, include large items of
interest on county debts. Riot damages and soldiers’ bounties
required the issuance of bonds, on which interest is being paid.
The interest on court-house stock alone amounts to $174,051.48.
Over $1,250,000 are distributed among auxiliaries and reformatory
institutions. Next to state, county, and city taxes, the largest single
amount appropriated for county expenses was $99,574 for the
salaries of the judiciary of New York County.—Comptroller’s Book,
No. 153, p. 149.

6 Comptroller Connolly, after seeking the advice of Samuel J.
Tilden, appoints Andrew H. Green deputy comptroller.—N. T.
Times, S 17, 1871. Green was a Democrat of high character who
had achieved fame as one of the Central Park commissioners (see

7 The New York Stock Exchange building, “which has been recon-
structed and remodeled internally at a cost of $600,000” (see N,
1870), is thrown open to the public.—N. Y. Times, S 17, 1871.
The new hall of the stock exchange was formally opened on Sept.
18.—Ibid., S 19, 1871. There is a history of the exchange in
ibid.

Oct. The “Chicago Fire” starts. In two days, it destroyed property
8 valued at $1,600,000. It caused a sharp decline in stocks in the
New York stock market, resulting in seven Stock Exchange failures.
—Eames, in N. T. Stock Exchange, 58.

9 The “Grand Central Station” (see S 1, 1869), the terminus for the
N. Y. & Harlem, the N. Y. Cent. & Hudson River, and the
N. Y., New Haven & Hartford Railroads, is completed at 42nd St.
and Fourth Ave., and the first passenger train leaves the train shed.
—from chronology supplied by the company; L. M. R. K., III: 975.
The station is shown and described in Harper’s Weekly, XVII: 108.
The engineering work of making tunnels, erecting brick arches, iron
bridges, etc., from the depot to the Harlem River was completed in
1875. The cost of this work was $6,000,000.—Wilson, Mem. Hist.
N. T., III: 537. See also desc. of Pl. 169-b, III: 872.

10 The copper-stone of Capt. De Croo’s statue of Benjamin Frank-
lin is laid in Printing House Square “with the impressive cere-
monies of the Masonic Order.”—N. T. Times, O 27, 1871. See L. M.
R. K., III: 964. The statue was unveiled on Jan. 17, 1872 (q. v.).

The “Booth Committee” (see Ag 25) makes its report. The
following conclusions were reached:

11 The debt of our City is doubling every two years.

2 Over $200,000 have been paid for repairs on armories and drill-
rooms, the actual cost of which was less than $200,000.

3 Over $1,100,000 have been charged for outlays on an
unfinished Court-house, for which building completed an honest
estimate of real cost would be less than $2,500,000.

4. Sides, carpets, furniture, cabinet-work, plumbing, gas and
plastering have cost $7,589,466.81, which are valued by competent
persons, after a careful examination, at $624,150.40.

5. $460,000 have been paid for $438,000 worth of lumber. Oct.

6. The printing, advertising, stationery, etc., of the City and
County, have cost in two years and eight months $7,168,122.53.

7. A large number of persons are on the payrolls of the City
whose services are neither rendered nor required.

8. Figures upon warrants and vouchers have been fraudu-

9. The condition of the City and County finances, as shown by these
investigations, has served to destroy all confidence in the man-
gerument of the present City Officials.

While not desiring to arrest the important improvements now in
progress, your Committee still deem it absolutely essential to the
credit of the City that expenditures in all departments be re-
duced to the lowest possible limits; that every officer and salaried
employee whose services are not indispensable be discharged, or
requested to resign; that Contracts be subjected to the most rigid
scrutiny, and all expenditures be reduced to an amount clearly
within the financial ability of the Treasury.

The demands upon the City Treasury will necessitate the bor-
rowing of large sums of money at an early day. An appeal must be
made to the public for the money necessary to meet the crisis of
its affairs. Besides the $20,000,000 due as taxes, $18,000,000
are required to meet current expenses and obligations maturing on the 15th of next January.

Nothing, therefore, remains for us but to submit the results of the
investigation, which are embodied in our successive reports.
We have endeavored to discharge with fidelity, the duty of the
trust committed to our charge, and we deeply regret the necessity of
exposing to public view a record of such unexampled and appall-
ing Municipal frauds.

Respectfully submitted, by order of the Committee,
Wm. A. Booth, Chairman.—N. T. Times, O 28, 1871.

22 Townsend, N. T. in Bondage, chap. 16.

By an order of the supreme court, Tweed is arrested for “deceit
and fraud,” and raised on a million and a half dollars bail
furnished by J. Gould and others.—N. T. Times, O 28, 1871.

That first arrest marked the beginning of the end. Samuel J. Tilden,
like an avenging angel, with all the skill, knowledge, and ambition, of his
kind, had linked his legal acumen with the brilliant daring of the
Times and the relentless genius of Nat.”—Paine, Life of Nat., 194.

The New York Elevated R. R. Co. is organized, with a capital
of $10,000,000, by the principal bondholders under the Greenwich
St. road.—“The Story of the Manhattan Railway,” by Russell
Sage, Railroad Men, X (Jan., 1924), Statistics and Facts. Affecting the Elevated Railways in the City of N. Y. (1866-1882).
For its articles of association, see Documentary Titles and Authori-
ties to the N. T. Elevated R. Co. (1877), 29, in N. Y. Pub. Lib.
See D 6.

Samuel A. Hale writes to F. A. P. Barnard, of Columbia Col-
lege: “Since the date of your letter [July 14] what astounding events
have transpired in our Country! The discovery and revelation of
the gigantic thefts of the ‘Tammany Ring’ in your city—thefts so vast, so stupendous, so bold as almost to make one admire such villany. Certainly the calm and insolent self-possession of Tweed, setting up this yearly very big protest—a very bad exposure of infamy such as has never before been heard of—is any thing but contemptible. . . . The exposure of the corruption of the ‘Tammany Ring,’ in New York, while it excites admiration at the boldness and magnitude of the wickedness displayed, also excites emotions of a very different character. It fills the mind with the very painful conviction, that after all that has been done to make men better, after all the preaching and praying in the Christian Church, through the long series of nineteen centuries, man is now what he was at the beginning—a d---d big rascal.”—From original MS.

in “Collection of autograph letters, etc. 1674 to 1872,” preserved in Columbus Univ. Library.

Nov.

A mass-meeting is held in Cooper Union to listen to reports from the “committee of seventy” (see S 4) and to prepare for the coming elections.—N. Y. Times, N 3, 1871. See N 7.

Roosevelt Hospital (see O 29, 1869), at its present location between Ninth and Tenth Aves., 38th and 39th Sts., is opened and dedicated.—N. Y. Times, N 2, 1871; N. Y. Herald, N 3, 1871; Roosevelt Hospital: First Ann. Rep. (1873). See also L. M. R. K., Ill. 955.

The exposure of the activities of the Tammany ring by the Times, Nast’s cartoons, and the “Committee of Seventy” brings results in the state and municipal elections. Tweed is the only one of the five city senatorial candidates on the Tammany ticket to be elected. Referring to coercion and irregularities at the several polling-places in Tweed’s district, the Times says: “Any one having a Tammany ticket [in the second district] could vote, without regard to name, residence or qualification. From Nos. 101, 107 and 109 Chatham-street—all small houses—there were as many voted as would fill Sweetey’s Hotel to its utmost capacity.” Two thirds of the anti-Tammany candidates for the assembly from the city were successful. Samuel J. Tilden was one of these. Reform candidates were generally successful also in both branches of the common council. The Times editor says: “Will anybody say now that Tweed is right against Tweed? No. The people will not let him. Will all the men tell us today that honest citizens stand no chance against corrupt politicians? The victory we have won is priceless . . . because it will revive every man’s faith in the ultimate triumph of truth and justice—because it will teach scheming politicians that the voice of the people is supreme, and that the immortal principles on which this government is founded, although they may be momentarily stifled, will constantly rise triumphant, while the men who assailed them will pass away to everlasting infamy.”—N. Y. Times, N 8 and 9, 1871.

Perhaps the first striking use of the tiger as a symbol for Tammany Hall appears in Thomas Nast’s cartoon, “The Tammany Tiger Loose,” in Harper’s Weekly. The tiger wears a collar with “American” inscribed thereon.—Harper’s Weekly (1873), XV: 1056-57. Tweed was present at this time of “The American Club,” which counted among its members “many prominent politicians of various shades of political faith,” and which had elaborate club grounds and buildings at Greenwich, Conn. At the annual ball of this organization at the Academy of Music, on Jan. 5, 1871, a part of the decorations consisted of “a gas device, fifteen feet in diameter, representing the well-known badge of the club, with the familiar tiger’s head surrounded by the legend ‘American Club,’ and appropriately flanked with corl.-screws.”—Ibid., XV: 47-58.

One style of the club’s badges was “a solid gold tiger’s head in a belt of blue enamel; the tiger’s eyes were rubies, and above his head sparkled three diamonds of enormous size.”—Myers, Hist. of Tammany Hall (1917), 235.

The first story of the new post-office building (see Ag 9, 1869) is finished, and opens Bates, Supervising Archt., U. S. Treas. Dept. (1871). See also Stone, Hist. of N. Y. City, 601-2. See, further, O 4, 1873.

Mayor Hall reluctantly appoints Andrew H. Green (see S 16) comptroller. The resignation of Comyn had been in the mayor’s hands since Oct. 5.—N. Y. Times, N 21, 1871.

The Russian frigate “Svetlana,” with Grand Duke Alexis aboard, arrives at the bar at Sandy Hook.—N. Y. Times, N 20, 1871. The grand duke landed at New York on Nov. 4, and was received “in a dignified and proper manner.” His suite and the reception committee, escorted by regiments of the National Guard, proceeded up Broadway through lines of interested spec-tators. Later in the day Alexis attended services at the Russian Chapel, No. 951 Second Ave., near 51st St.—Ibid., N 21 and 22, 1871. He left for Washington on Nov. 22, but returned to New York on Nov. 24.—Ibid.

On the following days, he visited the fortifications in the harbour, had his picture taken at Brady’s gallery, reviewed the Metropolitan fire brigade at Tompkins Square, drove through Central Park, went to the Navy Yard, and attended a ball at the Academy of Music.—Ibid., N 26 and 30, 1871. On Dec. 2, he was presented with Page’s famous picture of Farragut at Mobile Bay, which was to be "con-"vered by him to the Emperor of Russia as the gift of American citizens.”—Ibid., D 3, 1871. On this day, also, he was entertained by the N. Y. Yacht Club at Delmonico’s.—Maurice, Fifth Ave., 111. Alexis bade farewell to New York on Dec. 7.—Times, D 7, 1871. See also Fox, Alexis, the Grand Duke. In the U. S. A. during the Winter of 1871-72 (Cambridge, 1872).

"Mignon" is sung for the first time in America, at the Academy of Music.—Brown, II. 72.

The Salmagundi Club, Inc. had its beginning about this time, being organized as a sketch class in the studio of Jonathan Scott Harlithy at 506 Broadway by a group of art students. For two years following the fire of 1874 no museum was again admitted, but on his return the club was revived and met at 866 Broadway. On Jan. 30, 1877, the name "The Salmagundi Sketch Club" was adopted. The club was incorporated in 1880. After many wanderings, it is now (1926) at 47 Fifth Ave.—Shelton, The Salmagundi Club (1918); N. Y. Times, N 6, 1921.

In speaking of suitable accommodations for the commissioners and officers of the parks dept., their annual report states: "The only building that could be adapted to that purpose even in part, was the Arsenal or Museum Building. A limited space of the first story of this building was occupied by a number of clerks. A small part of the basement (damp and unsuitable as it was) was used by the Central Police. . . . Various animals were confined to the basement and on the first floor, with their cages in a state of great insecurity. There had been no extra ventilation furnished to this building from the time it had been used as an Arsenal, and its unwholesome condition was apparent to sight and smell. . . ."—First Ann. Rep., Bd. of Comm’s, Dept. of Pub. Parks, 14.

James B. Hodgkin submits, as a basis for discussion, to his "fellow-members of the Committee of Seventy of New York (see S 4) an article of the Citizens’ Committee of Fifty and a Brief Sketch of the General Plan and Principles of the proposed New Charter for the Consolidated Cities of New York & Brooklyn. This document, which anticipated consolidation by more than a quarter century, contains the following interesting provisions:

1. A single legislative body—"The City Council”—of 100 members elected from 50 council districts, with a two-year term; one half the number retiring each year; salary, $1,000 per year.

2. "In order to give to the position of mayor of the greatest city on this continent a dignity and independence corresponding to its local and national importance, he shall receive a salary of $5,000 per annum, and there shall be assigned to him, at the public expense, an official residence suited to his rank as the direct representative of this great community." Among his duties is that of giving audience “to every citizen,” not excluding the poorest and the humblest. He is to be the defender of the weak, the protector of the helpless, the refuge of the oppressed. He is to be, not in name only, but in reality, "the people’s servant."

3. There shall be no tax to provide for the city’s expenditures, "save and except a tax upon the land within the city limits; and the said land shall be assessed at its full market value irrespective of and without the improvements thereon, and taxed accordingly."—From original in N. Y. T. L., 391.

4. Judges shall be appointed by the mayor with the concurrence of the city council, and "shall hold office for life, or until removed for misconduct."—From original in N. Y. T. L., 391.

5. The Citizens’ Committee of Fifty also leases the Dowdwhod building at 651 Fifth Ave. The first exhibition of pictures was held here on Feb. 17, 1872 (q. v.).—Hove, Hist. of Met. Museum of Art; L. M. R. K., Ill. 957. See also Eve. Sun, Ap 16, 1920. The building in Central Park was begun in Nov., 1872 (q. v.).
1871

The Greenwich St. elevated railroad is sold, under foreclosure
Dec. of mortgages held by various parties, to the N. Y. Elevated Co.

(see O 27) for $250,000.—“The Story of the Manhattan Railroad,” by Russell Sage, in Railroad Men, XVI, No. 41; Statutes & Docs. Affecting the Elevated Railways in the City of N. Y. (1866-1882). From this time until 1875 (p. vi, Je 17), some improvements were made in the way of strengthening the structure and increasing station accommodations, but no extension of the road was undertaken by the company.—Report of the Special Com. on R. R. Appointed... to Investigate Alleged Abuses in the Management of R. R. (Albany, 1856).

16 Tweed, indicted and arrested as a common felon, is arraigned in court of general sessions, but is released by Justice Barnard on $5,000 bail. His counsel consists of Justice Graham, ex-Judge Fullerton, J. E. Burrill, David Dudley Field, and Mr. Stoughton. On the people’s behalf appear District Attorney ex-Judge Garvin, Charles O’Connor, and Geo. Barlow.—N. Y. Times, D 17, 1871. A conditioned statement of the charges against Tweed, as contained in the indictment, is published in ibid., p. S. See, N 19, 1871.

Three English ticket-of-leave men are arrested in New York. As a result of this the U. S. minister to London was instructed “to remonstrate with Her Majesty’s Government against the deportation to this country of criminals from any part of Great Britain.”—N. Y. Times, D 19 and 25, 1871.

Tweed finally resigns his office as commissioner of public works, in a communication to Mayor Hall.—N. Y. Times, D 30, 1871. See N 19, 1871.

1872

In England, a “Ballot Act” was passed during this year, providing for the Australian system in voting. To up to this time, voting had been vote voce.—Hazen, op. cit., 483-84.

The construction of so-called fire-proof buildings is growing general, examples of which are the Staats Zeitung building, A. T. Stewart’s (later the Park Ave.) Hotel, the Drexel building, the Metropolitan Savings Bank, and the post office.—Ann. Rep., Supt. of Bldgs. (1872), 11.

In this year, the Western Union building, another example of early so-called fireproof construction, was begun on the north-west corner of Broadway and Dey St. It was completed in 1875.— Descrip. of Pl. 155-a, Vol. III, where it is shown in process of construction.

In this year, the construction of the “Newboys’ Lodging House” (see Ap 29, 1868), at the intersection of Duane, William, and New Chambers Sts., was begun. The house was finished and opened in 1874.—200th Ann. Rep., Children’s Aid Soc.; L. M. R. K., III: 954. It was formerly a building known as the Shakespeare Hotel (cf. L. M. R. K., III: 980).—Loesting, Hist. of N. Y. City, II: 459.

Between 1872 and 1874, drinking fountains were erected by the city in the following localities: four in City Hall Park; two in Union Square; two on Madison Square; and a granite drinking fountain for horses at the Worth monument. The fountain at 99 St. and Fifth Ave. was removed and re-erected in Washington Square.—3d Ann. Rep., Park Com’s (1872-1873), 17, 56, and 62.

A list of the streets and other public places opened from 1807 to date the property of the parks; the plan of commissioners of 1873, is published by J. W. Gerard, Jr., in A Treatise on the Title of the Corporation and Others to the Streets, Wharves, etc.

In this year, the Beach Pneumatic Underground Railway (see F 26, 1870) met with objections from various authorities, although later Gov. Dix signed the bill authorizing its construction (see Ap 9, 1875).—See the pamphlet, Unanswerable Objections to a Beach Underground Railroad, at 3c.

In this year was issued Tallin’s Illustrated Monthly Business Directory, and New York Street Views, a series of double plates engraved on steel.—See also descrip. of Pl. 147, III: 719: cf. 1854, and 1863.

In this year, Ward McAllister organized the “Patriarchs.” The number was limited to 25, and each member, for his subscription, was permitted to invite to each Patriarch’s hall four ladies and five gentlemen, including himself and family. Distinguished strangers to the number of fifty were invited. The first Patriarchs were: John Jacob Astor, William Astor, De Lancey Kane, Ward McAllister, George Henry Warren, Eugene A. Livingston, Wm. Butler Duncan, E. Templeton Sneling, Lewis Colford Jones, John W. Hamersley, Benjamin S. Welle, Frederick Sheldon, Royal Phelps, Edwin A. Post, A. Gracie King, Lewis M. Rutherford, Robert G. Remsen, Wm. C. Scheffer, Francis R. Rives, Maturin Livingston, Alex Van Rensselaer, Walter Langdon, F. G. D’Hautereau, C. C. Goodhue, and Wm. R. Travers. The first balls were given in the winters of 1872 and 1873 and continued up to 1879 (p. v, Mr 2) and were the most brilliant social events of each season.—McAllister, Society As I Have Found It (1890), 211-17.

1872

In his message to the legislature, Gov. Hoffman recommends a non-partisan commission of 32 to consider and propose amendments to the state constitution. Among the improvements he thinks necessary are the extension of the governor’s term to three years, and that of a senator to four, concentrating power in the governor by placing in his hands the appointment of most of the state officers, the prohibition of special and local legislation, increasing the salary of members of the legislature, and limiting the debt-incurring power of municipalities.—Messages from the Governors, VI: 391-404; Lincoln, Const. Hist. of N. Y., II, 467-69.

 Jas. Fisk, Jr. is shot and killed by Edw. Stokes at the Grand Central Hotel. The motive was revenge, the outcome of business suits and other complications.—Harper’s Weekly, Ja 20, 1872.

In celebration of the anniversary of Benjamin Franklin’s birth, the 17th Century great statue in Philadelphia was unveiled.—N. Y. Times, Ja 18, 1872; L. M. R. K., III: 964. See also Cat. of Works of Art Belonging to the City, 107.

“Among the French of this City a subscription has been opened to raise funds in aid of the French Government to pay the war indemnity, in order to get rid of the German occupation as soon as possible. During one week $4,510 has been received.”—N. Y. Times, F 3, 1872.

The first private view of the collections of the Metropolitan Museum of Art is held, in the Dedworth Building (681 Fifth Ave.), which had been leased for the purpose (see D 1, 1871). On Feb. 22, the gallery was opened to the public.—Howe, Hist. of the Met. Museum of Art, 145, 189. See N, 1872, and 1873.

A great mass-meeting is held at Cooper Institute to induce the new city charter drawn up by the “Committee of Seventy.” Addresses are made by ex-Mayor Haverney, ex-Gov. Salomon, Horace Greeley, Gen. Dix, Joseph H. Choate, and others.—N. Y. Times, F 21, 1872.

The corner-stone of the Manhattan Market is laid at the foot of West 34th St.—N. Y. Times, F 23, 1872. It was opened on Nov. 11, 1872, and N 12, 1872; L. M. R. K., III: 966.

Jas. M. Macgregor, Supt. of Buildings, in his annual report for the year ending April 2, 1874, says, regarding the city’s “Resources,” “... Her narrow streets, frightful tenements and filthy markets yet remain in vivid contrast to her Broadway, 5th avenue and Central Park. Within an area of only 22 square miles, dwell a population of nearly a million, who live and do business in little over half the space, the centre of population being at 14th street and 4th avenue. She has the most extensive, wealthy and intelligent suburban surroundings of any city on the continent, sixty per cent of her business men residing in the rural districts within a radius of 20 miles. Among her domestic duties, according to the last annual reports, New York has the care of: 460 miles of streets and avenues (290 of them paved); three square miles of parks; 732 miles of avenues; 333 parks and playgrounds of over 115 miles; 340 miles of Croton Water pipes, delivering $6,000,000 gallons of water daily; 275 miles of sewers; she expends $5,000,000 annually on her Public Schools, wherein 259,744 pupils are educated by 5,787 teachers in 257 School-houses; she expends on Public Charities and out-door poor annually, $1,206,536, and to aid private charities, over $200,000; her Health Department is manned at an annual expense of $40,000; her Police Force amounts to 2,315 persons maintained at an annual cost of $5,445,692; she has 500 miles Gas Pipes and 19,000 Public Lights, which cost her yearly $1,105,750; to facilitate the work of transportation and transit, she employs 1,000 Horse Cars; 12,000 licensed Vehicles; 267 stages, and 40,000 horses, and her population and necessities are rapidly and inexorably increasing.”—Reports of the Supt. of Buildings for the years 1870 and 1871 (N. Y., 1872), 54-75.
1872

16

The Second Ave. R. R. Co. is authorized to construct an additional track along the avenue from 23d to Houston St., a single track thence to Forsyth St. and along Forsyth to Division St., a double along Division to connect with their tracks in Chatham Sq., and an additional track in Grand St., from Forsyth to Chrystie, and along Chrystie to Division St.; also a double track from their tracks at Second Ave. and Stuyvesant St., along Stuyvesant across Third Ave., 8th St., and Fourth Ave., to Astor Place, and along Astor Place to the east side of Broadway; also a double track from First Ave. through and along 63d and 64th Sts. to a point 200 feet from Second Ave., and in First Ave. between 63d and 64th Sts. to connect with the same; also a double track in 86th St. from Second Ave. to Ave. A, along Ave. A to 92d St., and through to the East River; also a double track from their tracks in Chatham Sq., through and along Worth St. to Broadway.—Laws of N. Y. (1872), chap. 679.

A great mass meeting is held at Cooper Institute by those who are in favour of Grant's re-election to the presidency. Speeches are made by Wm. E. Dodge, E. Delfafried Smith, Gen. Sickles, Sen. Wilson, and others.—N. Y. Times, Apr 18, 1872. See also Claws, Twenty-Eight Years in Wall St., 313–36.

A new city charter, proposed by the "Committee of Seventy" (see D, 17, 1872) for the city of New York, is vetoed by Gov. Hoffman.—N. Y. Times, My 1, 1872. The Times editor says: "It is simply impossible that the community could be so egregiously robbed under the scheme of the Seventy as it was under the work of the Ring. We cannot get out of the beaten track of past failures, unless by proposing something which may be called an "experiment," and in spite of the inevitable chuminess of some of the machinery, the Committee of Seventy's Charter was a far more promising experiment than anything which could be framed under the recommendations made by Gov. Hoffman."—Ibid.

While it was provided by act of legislature, on April 19, 1871 (g. e.), that the tax "upon estates real and personal" in 1871 and 1872 should be fixed at 1%, on the assessed valuation, the law is now altered to allow a 2 1/4% limit for the present year.—Laws of N. Y. (1872), chap. 444.

May

The New York Cotton Exchange (see S 1, 1870) occupies its second building, at No. 1 Hanover Square; on April 29, 1885, the Exchange moved into its present building, No. 60 Beaver St.—Information furnished by Mr. Thomas Hale, Jr., Supt., N. Y. Cotton Exchange.

Election Day is made "a public holiday."—Laws of N. Y. (1872), chap. 544.

Nibo's Garden Theatre, at the north-east corner of Broadway and Prince St., is for the second time destroyed by fire (see S 18, 1846);—N. Y. Times, My 7, 1872. It was rebuilt and reopened Nov. 30, 1872.—Brown, 1: 212. See also L. M. R. K., III: 985.

A new election law (see Ap 5, 1876) is passed "to provide for ascertaining, by proper proofs, the citizens who shall be entitled to the right of suffrage." This act is even more elaborate than the former one and occupies nearly 50 pages in the volume of laws. The more important new features include making election days legal holidays (see Ap 23, 1870), providing for the polls to be open from 6 a. m. to 4 p. m.; placing the whole system of registration and election under the control of a "bureau of elections" in the police department. Our modern books for registering voters, "ruled in parallel columns, in which, opposite to and against the name of every applicant, shall be entered" certain prescribed data (see p. 1577 of the act), are traceable to this act. Four days for registrations are fixed, the last two being "the Friday and Saturday of the second week preceding the day of the November election." No vote is to be received on election day unless the voter's name appears on three registers. A "record of deaths" is to be kept and registers corrected accordingly.—Laws of N. Y. (1872), chap. 675.

The legislature passes an act "to improve and regulate the use of the Fourth avenue." It authorizes the N. Y. & Harlem R. R. Co. to regulate grades, construct viaducts, foot and road bridges over and under the tracks, "most appropriately," under the street, a description with reference to specified streets above 42d St.—Laws of N. Y. (1872), chap. 702. These improvements, begun in 1871, were completed in 1874.—Chronology supplied by the company; see also N. Y. Evac. Post (Supp.), F 1, 1913. See also My 22.

The commissioners of public charities and correction are empowered to purchase all or any part of "Ward's (or Great Barn) Island" not now owned by the city.—Laws of N. Y. (1872), chap. 679.

Cornelius Vanderbilt and others are incorporated as the New York City Rapid Transit Co., with a capital of $12,000,000. The company is authorized to construct an underground railway from City Hall Park to connect with the N. Y. and Harlem R. R. between 48th and 50th Sts. and also a branch from this junction to the track of the N. Y. Central and Hudson River R. R. Co. The main line is to be begun in six months and finished within 3 years and the branch is to be completed within 7 years.—Laws of N. Y. (1872), chap. 834. No underground road, however, was built by this company.—Walker, Fifty Years of Rapid Transit, 98–100.

The N. Y. and Harlem R. R. Co. is directed to extend its tracks from Madison Ave. and 79th St. along the avenue to 86th St., through the avenue to Ave. A, along the avenue to 92d St., and through to the Astoria Ferry, East River, also to lay a track from Madison Ave. and 86th St. along the avenue "as far if it may from time to time be opened."—Laws of N. Y. (1872), chap. 825.

My 29

The Democrats of the city hold a meeting at Cooper Institute to express their approval of the nomination of Horace Greeley for president and of B. Gratz Brown for vice-president. The speakers include Gen. Cochrane, Sen. Tipps, Gen. Dodds, and Gen. Kilpatrick.—N. Y. Times, Je 4, 1872.

A fire breaks out in the cisson of the East River Bridge, on the New York side, but is quickly extinguished.—N. Y. Times, Je 11, 1872.

The legislature provides for the appointment by the governor with the concurrence of the senate of a commission of 31 members (see Ja 3), to propose amendments to the state constitution.—Laws of N. Y. (1872), chap. 884. See Mr 25, 1872.

The Gilbert Elevated Railway Co. is incorporated to provide rapid transit by means of tubular roadways, suspended above the street by gothic arches springing from the curb lines, through which cars are to be propelled by compressed air.—Laws of N. Y. (1872), chap. 885; ibid. The act, that the plans to which the company was committed by its charter were extravagantly expensive, if not wholly impracticable, together with the financial depression of the country, rendered abortive every effort to set this enterprise in motion, until the Rapid Transit commissioners confirmed this company in possession of its valuable route and permitted it to adopt simple and economical plans of construction (see S 3, 1875);—Report of the Special Comm. on R. R. Appointed... to Investigate Alleged Abuses in the Management of R. R. (Albany, 1880).

The commissioners appointed to make the assessments and awards in the matter of the extension of 11th Ave. have completed their work. The opening will extend northwardly from the northerly line of the road or public drive, to the southerly line of the street leading from King's Bridge commission (see L 3, 1872), to the Harlem River, near two bridges over, and thence to the Harlem River, near Sherman's Creek.—N. Y. Times, Je 20, 1872.

The natives of Alsace and Lorraine who are now residing in July 15

New York City manifest their loyalty to the French Republic by meeting at Irving Hall and parading down Broadway to the French Consulate in Bowling Green. Those who wish "to retain their original nationality as French citizens" enroll at the consulate.—N. Y. Times, Jl 16, 1872.

Mayor Hall submits to the common council, with comments, department reports that have been filed with him. In connection with the report of the commissioners of charity and correction he appeals for the construction of a new city prison to dispose the building known as "the Tombs" in a "more agreeable manner than the present prison. This was built upon piles over a swamp. It cramps those whom the law presumes to be innocent with a confinement more impure and irksome than is meted out to convicted criminals. The young girl imprisoned for the theft of urgent temptation is compelled to hear
1872

the blasphemies of the criminal crime—Oliver Twist and Fagins

July

meet within conversational distance. Foul air, fouler association,

and absolute lack of exercise unite to make the Tombs the High

School of Crime, as the State Prison is its University."—Proc.,

30. Plans are approved for the construction of a rostrum and other

suitable arrangements for public meetings and military reviews at

the north end of Union Square. Also, it is resolved to erect the

Merchants' Gate at the 59th St. and Eighth Ave. entrance to

Central Park, and to obtain plans for the Scholars' Gate (Fifth

Ave. and 96th St.), the Women's Gate (Eighth Ave. and 72d St.), and

the Children's Gate (Fifth Ave. and 72d St.).—Min., etc.,

Bd. of Comrs of the Dep't of Pub. Parks (1873), 468, 471. For

Rep. of Bd. of Comrs of the Cent. Pk (1862), 125. For the

location and names of other points of interest in Central Park, see

8th Ann. Rep., Bd. of Comrs' (1864), 45–46. Designs for the

Scholars' Gate were made by Richard M. Hunt. See also Cata-

logue of Plans for Improvement of the Central Park, a pamphlet,

in N.Y. P. L., containing marginal notes in MS. showing the names

of competitors in designing various features (mentioned in an

article by Theodora Kimball in Landscape Architecture, 19 (2), 1922).

Sept.

"The first of the series of grand ratification meetings to be held
during the campaign" takes place at Cooper Institute. It is "a
most enthusiastic and loyal indorsement of the Republican Na-
tional and State tickets." Stirring speeches are made by Gov.

Jocelyn, Gen. Van Buren, and others. The editor of the Times,

on September 25, says: "It is a fine example of the Lombardo-Gothic style, with

lofty decorated front and a campanile tower with open belfry. The

interior is handsomely treated in polychrome. Polish Scotch

granite columns, carrying a triforium gallery and a clerestory, support the lofty nave roof. ."—King's Handbook (1893), 336. Remick & Sands were the architects—Records of the church.

"The "memorial statue of Sir Walter Scott [see Aug 15, 1871],
presented to this city by the British residents, and erected at the
Mall in Central Park," is unveiled before more than 4,000 spec-

tators.—N. Y. Times, N. 3, 1872. The bronze statue was by Sir John

Steele.—Cat. of Works of Art Belonging to the City.

Ulysses S. Grant and Henry Wilson, the Republican candidates,

are elected president and vice-president, defeating Horace Greeley

and B. Gratz Brown, candidates of the Democrats and Liberal Re-

publicans.—McKee, National Conventions and Platforms, 145–61.

The charter election is held jointly with that of state and

nation. Wm. F. Havemeyer, nominated by the "Reformers" and

the Republicans (see O 10), is elected mayor in a three-cornered

campaign, his opponents being A. R. Lawrence, Tammany, and James

O'Brien, Apollo Hall.—N. Y. Times, N. 6 and 8, 1872. The Times

commented laboriously on the "Three-cornered Election" and the

"Triune Tribune" to convince the people that the nominee of Tammany

was a safe man to trust in the Mayor's chair." Mr. Havemeyer's

election assures "an era of local administration in which ability

and economy will go hand in hand, and in which public improve-

ments worthy of the growing wants of the City will be conducted on

the principle that for every dollar expended we must have a

Dollar's worth of work."—N. Y. Times, N. 9, 1872.

The "Boston Fire" begins. It destroyed property valued at

$80,000,000. The decline in stocks at New York caused several

Stock Exchange failures, as the larger "Chicago Fire" had done (see

O 8, 1871).—Eames, N. Y. Stock Exchange, 58. See N 11.

A meeting is held at the Chamber of Commerce "to give ex-

pression to the sympathy of the mercantile community of New

York with the sufferers by the recent terrible fire in Boston [see

N 9], and to take such action in the matter as may be deemed

advisable." Resolutions are passed, and a committee is appointed to

solicit subscriptions.—N. Y. Times, N. 12, 1872.

The Hendrick Rutgers' house, in the block bounded by Rutgers

Place, Clinton, Cherry, and Jefferson Sts, is thus described:

"The Wm. B. Van Rensselaer, appointed trustee of the American

Art Exhibition in the United States and to "memorialize Congress on the subject of an appropriation."—N. Y. Times, O 5, 1872.

The large hall at Cooper Institute is crowded to its utmost

capacity on the occasion of a grand mass-meeting under the

auspices of the Woman's Rights Association. The nominations of

Grant and Wilson are ratified. Rev. Miss Olympia Brown, Miss

Susa B. Anthony, and others address the meeting.—N. Y. Times,

O 8, 1872.

The Prebyterian Hospital (see F 2, 1868) is opened, on the

north side of 70th St. between Madison and Park Aves.—N. Y.

Times, O 11, 1872; Dedication Exercises on the Opening of the

Presby. Hospital (1872). Richard M. Hunt was the architect.

James A. Garfield, the first president.—1st Ann. Rep. (1869). See also

L. M. R. K., III: 955. The hospital is shown and described in

The Republican county organization joins with the "Reformers" in

nominating Wm. F. Havemeyer (mayor in 1845–46, 1848–49) for

mayor.—N. Y. Times, O 20 and 23, 1872. Mr. Havemeyer was

elected (see N 3).

23. The boxes with apartment decides to fit up the lower floor of

the arsenal in Central Park for the Am. Museum of Natural History

(instead of the second and third floors which it has occupied since

1870, q.v.), and to reserve accommodations for its own use in the

building.—Min., etc, Dept. of Pub. Parks (1873), 358. In 1877,

the museum removed to its present location.

Nov.

About this time, work on the building in Central Park for the

Metropolitan Museum of Art was begun. On April 1, the trustees

ratified the selection of the site in Central Park; ground for the

building was not actually broken until 1874.—Howe, Hist. of Met.

The new Episcopal Church of St. Bartholomew, erected at the

corner of Madison-avenue and Forty-fourth-street, is now com-

pleted, and presents a magnificent specimen of the most chaste and

ornate architecture. —N. Y. Times, N 1, 1872. Cf. L. M. R. K.,

III: 935. "It is a fine example of the Lombardo-Gothic style, with

lofty decorated front and a campanile tower with open belfry. The

interior is handsomely treated in polychrome. Polish Scotch

granite columns, carrying a triforium gallery and a clerestory, support the lofty nave roof. ."—King's Handbook (1893), 336. Remick & Sands were the architects—Records of the church.

"The "memorial statue of Sir Walter Scott [see Aug 15, 1871],
presented to this city by the British residents, and erected at the
Mall in Central Park," is unveiled before more than 4,000 spec-
tators.—N. Y. Times, 3, 1872. The bronze statue was by Sir John

Steele.—Cat. of Works of Art Belonging to the City.
and fish-barrels. Last year a Miss Langdon rented the middle part of the mansion for a children's refuge, and put up a blue sign with gold letters, "Chapel of the Holy Rest." She only stayed some months, and then the entire interior of the center was gutted; the marble columns, mahogany doors and the superb moldings were sold. The space thus gained was filled with beer-barrels. It was now a forlorn sight. A rough wooden staircase, more like a ladder than anything else, enabled the workmen to reach the top barrels, but below it was impossible to move, for there was space nowhere. But the visitor, casting his eyes upward, can still see, sole vestige of the marble, the hearth amid all the squalor, a superb molding on the ceiling next to the roof, which was difficult to remove and was therefore left. Finally Mr. Briggs sold house and lots for $120,000, and it is to be presumed that tenement-houses will soon go up, for on the south corner of the block there is now a huge mill, which would be objectionable to the inhabitants of houses of a better class."—N. Y. Times, N 24, 1872. See L. M. R. K., III: 951; and descrip. of Pl. 199-3, I: 612-13. The house was torn down in 1876 (p. 90).

Dec.

"The efforts made during several generations to secure a pay- ment of the claims arising out of the French spoliations, for which the United States had accepted the responsibility in the Treaty of 1801 [see S 30, 1880]... have been revived, and yesterday assure- d the general meeting of the heirs at the country-house of N. L. & G. Griswold, No. 71 South-Street. It is estimated that the value of property destroyed amounted to $12,000,000, the greater part of which belonged to citizens of New York. Nearly seventy of the descendants of these yesterday affixed their names to a memorial to Congress."—N. Y. Times, D 1, 1872; McM. Master, II: 572.

The funeral of Horace Greeley, who died Nov. 29, is held at the Church of the Divine Paternity, the body having lain in state in the governor's room of the city hall on Dec. 3. The service is attended by Pres. Grant, Vice-Pres. Collfax, Vice-Pres. elect Wilson, Chief-Justice of the U. S., and by a large number of other distin- guished members of both political parties.—N. Y. Times, N 30, D 4, and 5, 1873.

At 11:15 p.m. a fire breaks out in an upper story of the Fifth Avenue Hotel. Twenty-two women were smothered and burned to death. The property loss was at least $100,000.—N. Y. Times, D 11 and 12, 1872. See L. M. R. K., III: 978.

A sub-committee of the "Committee of Seventy" (see S 4, 1871) submits certain "points as material in respect of an amended charter," but that any major change in that direction would be "outside of the idea of "obtaining an honest, vigorous and economical administration," nor on the "theory of party ascendency." Another point is "that the method of appointments and removals shall be, in a prudent and appropriate manner, recognized by the principle of Civil Ser- vice Reform as now being enforced by the President." Another, "that there shall be appropriate provisions... for preventing city officers from using their office for private purposes..." The report of the committee was accepted, and the New York city charter was to be amended by an ordinance of the city council. The next day, December 16, the draft was signed by Mayor Grant, and the other two shall be appointed by the existing Mayor as "First and Second Assistant Mayors," with membership ex officio in the board of aldermen. Still others, that there shall be published a "City Record;" that the municipal elections "shall be in the Spring, and separate from other elections;" that there shall be "all possible discrimination and punishing of offenses;"—from pamphlet with the title "Strictly Private," preserved in N. Y. P. L. For the fate of the charter of the "Committee of Seventy," see Ap 30, 1871 (p. 7).

Barzaun's Hippodrome (or Museum), also Grace Chapel to the east of it, and other buildings in 14th St. between Third and Fourth Aves., are destroyed by fire. The menagerie was named the Hippotheatron by Jos. E. Cooke who built it after the war; it came later into the hands of L. B. Lent, who called it The New York Circus; he sold it to Barnum in the Summer of 1872.—N. Y. Herald, Dec. 26, 1872. See also view and description in Harper's Weekly, XVII: 29, 30.

The report of the suit of buildings for the year ending this 31 day is the last annual report.—See Rep. of the Dept of Buildings for the year 1872 (N. Y., 1873). The later reports are printed quarterly in the City Record. A note in the general catalogue of N. Y. P. L. says: "From 1873-1892 this dept., was maintained in the Fire Dept. as a Bur. of Inspection of Buildings, the reports of which are included in those of the Fire Dept." See, however, the charter of April 30, 1873, as amended May 29, 1880 (p. 90), and Addenda.

1873

In this year, the first practical typewriter was invented, by Christopher Latham Sholes, and the firm of E. Remington & Sons began to manufacture it at Iliam, N. Y.—The Story of the Typewriter, 1873-1923 (pub. by Herkimer Co. Hist. Soc., 1923) N. Y. Times, S 9, 12, and 15, 1923. For such an invention, produced in France as early as 1811, see N. Y. Mirror, D 10, 1871.

In this year was published by the Am. Photo. Lith. Co. a color- oupt of the city of New York north of 155th street showing the progress made in laying out streets, roads, public squares and places, by the commissioners of Central Park, under chap. 356 of laws 1865 and of New pier and Bulkhead lines under chap. 695 of laws of 1867. Drawn and printed by Edward S. Ewens; size 24 x 67 in.

In this year was published by Croes & Van Winkle, New York, a folio atlas containing 12 maps, entitled The West side of the city of New York between eighth avenue and Hudson river, from 556- north nine street to one hundred and fifty-fifth street. Showing graphi- cally the existing condition of all real estate as regards all public improvements, with appendix giving dates of the improvement.

In this year was published by J. B. Wallace & T. Shillington an index map of 70 sheets, oblong folio, entitled The Empire city lot book; being a complete atlas of Manhattan island, north of 49th st.

"Few people are aware of the stupendous work going on at Hell Gate and of the important results that may be expected to ensue from it. The removal of the rocks there, so as to make a perfectly free and safe channel for the largest vessels, was a vast undertaking. In this age, however, hardly anything seems impossible to engineer- ing minds. The work would be hard, but the results are of the importance of opening a free and safe channel for the commerce of New York by the way of Long Island Sound and the East River, the government resolved to remove the Hell Gate obstructions. The work was commenced a little more than two years ago and it is believed that in less than two years more the whole will be completed. It is under the charge of Major-General John Newton, of the United States Engineer Corps. A vast deal of rock is already being blasted out and cleared away. Of about one hundred and sixty-five thousand cubic yards of rock to be removed, at least forty two thousand have been taken out. For removing the rest the rock is being tunnelled and pierced in every direction. When this is accomplished a tremendous blast will be made with seven thousand pounds of nitro-glycerine equal in force to seventy thousand pounds of gunpowder. [For the great explosion, see S 24, 1876]."

"Among the most noteworthy buildings in course of construc- tion in the city, is Masonic Hall, at the corner of Sixth avenue and Twenty-third street.

"The new U. S. Post Office and the new Roman Catholic Cathedral exceed in magnificence any other buildings in the metropolis.

The city at this time owned 25 parks and public places, having a total area of 1,094-02 acres. Central Park covered 840 acres, exclusive of Manhattan Squares 143 acres of it were occupied by reservoirs and 9 acres by public highways for street traffic. At the close of 1873, Central Park had cost the city $11,902,515, of which $5,028,844 was for the land and $5,875,671 for its improvements. From 1876 to 1873, the value of real estate in the three wards ad- joining the park increased $185,000,000—34 Ann. Rep., Park Com'ts (1872-1873), 15, 335, 344.
1873

The following are the more important buildings mentioned by
the superintendent of buildings as "erected" (plans filed or work begun)
in this year: "French flats" on Broadway, between 51st and 52d Sts.; Barnum's Hippodrome on 27th St.; Delaware & Hudson Canal Co. building on the south-east corner of Church and Cortlandt Sts., Richard M. Hunt, architect; Western Union Telegraph building on the north-west corner of Broadway and Dey Sts., George B. Post, architect; Fifth Ave. Presbyterian Church, corner of Fifth Ave. and 55th St., Carl Pfeifer, architect; an iron structure called "The Coliseum" at Broadway and 35th St.; Rutgers Presbyterian Church on south-west corner of Madison Ave. and 22d St.; Park Theatre on 22d St. near Broadway (see Ap 14, 1874).—Rep., Dept. of Bldgs., In City Record, II: 165; 491; III: 176-178.

In the spring of this year, the Metropolitan Museum of Art moved from the Dodworth building (see D 1, 1871) to the Douglas mansion at 128 W. 14th St. On Feb. 14, 1879, the exhibition at the Douglas house was closed, and the work was begun of transferring the collection to the building in Central Park, which had just been completed from plans by Mr. Hunt, at a cost of nearly $200,000. — Howe, Hist. of the Met. Museum of Art. The new building was opened on March 9, 1880 (q.v.).

At this time, the Townsend mansion, at the north-west corner of Fifth Ave. and 34th St., was occupied by the democratic blossom club, formed in 1864, of which Wm. M. Tweed was the first vice-president.—Fairfield, The Clubs of N. Y. (1873), 241. J.Q. A. Ward has a department to 58 members of the 7th regiment who died in the Civil War, erected by the regiment and presented to the city. It stands on the west walk in Central Park, opposite 67th St.—Cat. of Works of Art Belonging to the City.

In this year, after the death of the artist John F. Kensett, his canvases remaining in his studio realized over $150,000 at public auction.—Isaham, Hist. of Am. Painting, 1701-1900, 240.

Daly's Fifth Avenue Theatre (see Ap 16, 1869) on West 42nd St. is destroyed by fire.—N. Y. Times, Jan. 2, 5, and 9, 1873; L M. R. K., III: 983. Daly first moved to the Worrell Sisters Theatre at Broadway and 8th St., but on Dec. 3 (q.v.) opened his new theatre on 38th St. The theatre on West 42nd St. was rebuilt and opened on Dec. 18, 1877 (q.v.). —Brown, III: 414.

Mayor Havemeyer communicates a long message to the common council. He emphasizes the desirability of consolidating city and county governments. He deplores the impotence of the common council, declaring that the executive departments "have absorbed to themselves all the legislative power," have "raised, appropriated, and expended" money "without any reference to the Common Council," and, indeed, have assumed "more than the conventional public a scandalic.

The mayor believes the charter provision for the removal of department heads by impeachment, the mayor bringing his charges before "a full bench of the Court of Common Pleas," to have been designed, "not for the purpose of securing the removal of improper officers, but to render such removal impracticable, if not impossible." He declares that he enters office to find that "every officer through whom the government must be conducted is virtually beyond my control," all, even the chamberlain, being "entitled to hold their respective offices beyond my term, under appointments made by my predecessor." He says "the spectacle of last winter of the heads of some of the departments, with a lobby of countere rulers, besieging the legislature during the whole session [when the charter of the "Committee of Seventy"]—see Ap 30—was under discussion to keep themselves in office, and to retain their immense emoluments and patronage, should no longer be tolerated."

The mayor sees no good reasons why the commissioner of public works and the president of the park department should be "members of the composing board." (see Ap 19, 1871); he declares it was "originally thus arranged to enable certain men who then held these offices [Tweed and Seymour] the better to carry on the gigantic schemes of public plunder which they were working for their own personal benefit." The substitution of the representatives of the two legislative boards is his recommendation, and he would have the proceedings of this board "subject to the approval of the common council."

No more revision of the charter, the mayor concludes, is "adequate to protect us from the evils which this city has suffered, and still is suffering." Not only are the ordinances of the city "in inextricable confusion," but also special legislation for the city passed at Albany "has been so extensive that one cannot, without considerable labor, ascertain whether a particular ordinance remains in force."

He recommends that both laws and ordinances be revised "by some one competent to perform the duty."

The mayor believes also that "our public works must be proceeded with, under a well-considered system of contracts;" we no longer want department heads to have "bands of political retainers," many of whom have obtained employment by methods "humiliating to honest labor." Furthermore, "honest contractors" should no longer be "harassed with a double set of inspectors to accommodate political favorites."

Mayor Havemeyer announces his intention of supporting that "incorruptible officer," Comptroller Green, in his "severe and most unpleasant duty of sifting and examining" claims against the city, so many of which are "tainted with excess and corruption."

On the other hand, he flays Chamberlain Palmer, an officer appointed by Mayor Hall, who is firmly entrenched by charter provision in that office until Jan., 1876. The "utter neglect that has characterized the government for the past few years" is illustrated in the case of this officer who is at the same time the "President of the Broadway National Bank" and the city official who designates "the depositsaries of the city and county funds." Not only is his own bank favored by deposits of city funds, varying "from two to three millions," but he has presented to the city $100,000 to another bank, of which his nephew was president. When Comptroller Green brought his attention to the fact that the total deposits in that bank on a given day exceeded the amount above stated by only $36,650, the chamberlain thought it wise to reduce the city deposit to $250,000. It is our duty, the mayor concludes, "to make an earnest effort that the reforms the people so industriously demand that we have been elected to secure, are, by our administration of the government, accomplished." — Proc., Bd. of Ald. (1873), CXXIX: 17-45.

Comptroller Green presents to the mayor a report of the progress on preparing for the press the "ancient records of the City" (see My 29, 1870). He says that Dr. E. B. O'Callaghan was employed to do the work and has rendered bills for his services to June 30, 1872, aggregating $10,000, and that he is "still engaged" in the undertaking. The comptroller is alarmed at the probable "very large claim upon the treasury of the city," and reports that the investigations of an expert into the matter show that "the style in which these fifteen volumes [already prepared for press] are got up is unnecessarily expensive," and if the work were "carried out in its full scope, the whole scheme of corporation printing, it would have involved an outlay of more than half a million dollars, and produced 240,000 volumes, enough to fill a room 24 by 24 feet, and 11 feet high, from floor to ceiling." A more economical style might be adopted at half the cost, but the expense would be "at least $200,000." — Proc., Bd. of Ald. (1873), CXXIX: 123-29. So publication was postponed for nearly a quarter of a century (see O 2, 1897).

Miss Emily Faithful, "the great representative and advocate of the higher industrial and educational interests of woman," is tendered a reception at Steinway Hall.—N. Y. Times, Ja 26, 1873. On May 9, the managers of the White Star Line gave her a farewell reception on board the "Oceanic."— Ibid., My 10, 1871.

Spain is proclaimed a republic. The new government lasted, Feb. however, only until June 1873, when Alfonso XII was chosen king and a constitutional monarchy established.—Hazen, Europe since 1875 (1910), 571-72.

A so-called "Swan Banquet" is given to 72 guests in the large ball-room at Delmonico's, 14th St. and Fifth Ave., at a cost of $150,000. The diners sat around a great oval table that nearly filled the floor space, in the centre of which a lake had been constructed with swans from the Lake of Como. This was surrounded by banks of plants and flowers, and "a delicate golden wire network" which extended to the ceiling; while above were "little golden cages, with fine songsters." The choicest wines and viands were served. For description and menu, see McClure's Society As I Have Found It, 237-36, 457. This banquet was given by Mr. Luckner, a fashionable and wealthy citizen of New York. The period of his life. His daughter married Count Berntoff, later German ambassador to the United States.
Many of the Spanish residents of New York assemble at the Feb. 22, 1873, Maison Dorée in 14th St. “to celebrate the establishment of a Republic in Spain.”—N. Y. Times, F 23, 1873.

The common council passed the following resolution: “Whereas, Public improvements having been made and also given, with seemingly successful results, in front of many private buildings in this city; and

“Whereas, The Board or Commission authorized to make and enter into contracts for lighting the streets, avenues, and places in the City of New York, consisting of the Mayor, Comptroller, and Commissioner of Public Works, have power to use, for public purposes, illuminating materials other than gas, be it therefore

“Resolved, That the said Board or Commission be . . . requested to have experiments made to test the practicability of lighting Central Park and the other public parks or places, streets, and avenues of this city, with electric light, and with a view also of determining the relative cost of the two systems, viz., gas or electric light; such experiments and exhibitions to be without expense to the city.”—Ordinances, etc., XLVII: 17-18. See Ag 25, 1884.

The New York Graphic, the first illustrated daily journal of the world, appears. Its success was made possible by the improvements in the art of photolithographic printing.—North, 126.

The Chapin Home for the aged and infirm, erected on land granted by the city, on 64th St., between Lexington and Third Ave., in 1873, N. Y. Times, 3 Man. Com. Coun. (1870), 763; Lossing, Hist. of N. Y. City, II: 699-70.

Ulysses S. Grant begins his second term as president.—Rhodes, Hist. of U. S., VII: 21-22.

The Congressional Globe becomes The Congressional Record. See 1874.

The colored citizens of New York meet at Republican Hall “to take measures to secure the passage by the Legislature of the Civil Rights bill, introduced by Mr. Husted, of Westchester.”—N. Y. Times, Mr 6, 1873. On May 15, they celebrated the passage of the bill.—Ibid, My 16, 1873.

In a report to the senate, Comptroller Andrew H. Green reviews the status of the markets of the city. They are: Washington, West Washington, Fulton, Franklin, Catherine, Gouverneur, Centre, Jefferson, Essex, Union, Tompkins, and Eighteenth Ward. He states that ten years ago the market property was valued at $7,500,000. “In the process of time there has grown up about some of the oldest of the public markets an enormous business. The habit of people to go there to buy has given value to what is known as the ‘good will’ of the stands. And property of private ownership supporting this has increased in value, and has adapted itself in its uses to the business of the markets. The market and its neighborhood has become a great bazaar more thronged and more densely occupied than any other space in the City. This is especially true of Washington Market, the great centre of business.” When Comptroller Green took office, “the market buildings were all in a wretched condition; they were filthy, the sewers were choked and caved in, and things in every respect in the last stages of decay. . . . There was no discipline, no order, no right; every man stood, as it were, constantly on guard to protect his property from official rapacity. . . . The exertions of Mr. Thomas F. Devoe, the Superintendent, a much experienced and esteemed market-man, have been uniting. . . .”—From clipping in Comptroller’s Letter Book No. 153, p. 252.

The common council votes “to deposit with the New York Historical Society the autograph letter of General Washington [in reply to an address voted him by the corporation]—see My 2, 1785,” . . . taken from Geo. H. Moore, Esq., librarian of the said society, a receipt thereof.”—Proc., Bd. of Ald. (1871), CXIX: 534-45. This letter, after having been “abstracted” from the clerk’s archives, had been recovered “by invoking the aid of the Courts.” The clerk’s office was deemed “a very unsafe repository for a paper of such peculiar value.”—Ibid, CXIX: 582-83. See Pl. 59, Vol. V. Cj My 15, 1879.

A new public drive is to be laid out from 15th St. to Kingsbridge Road.—N. Y. Times, Mr 20, 1873.

After a brief existence, “the department of public instruction” (see Ap 1, 1873, where it is placed by the board of education, the new board to consist of 21 “commissioners of common schools” appointed by the mayor, one third of that number to retire each year. The board is empowered to appoint five trustees for each of the 22 wards, one to retire each year; the board appoints “principal

pals and vice-principals for the grammar, primary and evening schools” on the nomination of the trustees. “Inspectors of common schools,” three in each of the seven school districts, are to be appointed by the mayor.

Provision is also made for a commission “to arrange, simplify and codify the laws relative to common schools.”—Laws of N. Y. (1873), chap. 112.

The commission on constitutional amendments (see Je 15, 1872) renders its report to the legislature. “Fortunately, in the haste which necessarily characterizes most of the work of our Legislature, some of the best of the proposed provisions were defeated. Thus the ‘City Article’ imposing restraint upon the power to incur debt and loan credit [from which great good was anticipated], was lost at this stage: the excellent provisions requiring their separate readings, and the printing of all bills before the vote on their final passage, was defeated; . . . the limitation of the time for the introduction of private, special and local bills to sixty days from the commencement of the session . . . was stricken out. The proposed change in the composition of the Senate, providing for four Senators from each of eight large districts, was also defeated.” In the succeeding legislature of 1874, a provision that “certain local judicial officers should be appointed instead of elected” was rejected.—The Proposed Amendments of the Constitution of the State of N. Y. Their History, Nature and Advantages (1873), chap. 3. For the amendments that were ratified by the electorate, see N. Y. 1874.

The N. Y. and Harlem R. R. leases the steam portion of its road to the N. Y. Central & Hudson River R. Co., for a term of 401 years.—From chronology supplied by the company.

The commissioner of public works reports to the board of aldermen a statement of streets or parts of streets and avenues opened or ceded to the city north of 29th St., with the dates of such openings or cessions.—Dec. No. 6, Bd. of Ald., Ap 3, 1873.

The extension of Church St. from Fulton St. to Morris St., at its intersection with Greenwich St., has been completed.—N. Y. Times, Ap 4, 1873. See L. M. R. K., III: 1004, under “Lumber Street.”

The legislature passes an act, supplementing those of June 1, 1868 (p. v), and May 3, 1869 (p. v), which provides for the appointment of commissioners to supervise the work of the Beach Pneumatic Transit Co., and the method of acquiring real estate, etc., and to complete a certain section within three years and the remainder within five years. It also invests the company with the powers and privileges of, and subject to the duties and liabilities imposed on, railroad corporations by the laws of the state.—Laws of N. Y. (1873), chap. 185. See My 20, 1874.

The “Cathedral Church of St. John the Divine” is incorporated. The incorporators, who are to be the first trustees, are Horatio Potter, Morgan Dix, Henry C. Potter, John Cotton Smith, Geo. H. Houghton, Philander K. Cady, Hamilton Fish, John J. Cisco, Stephen P. Nash, Wm. H. Guion, Wm. Butler Potter, and Wm. T. Blodget.—Laws of N. Y. (1873), chap. 222.

The park commissioners receive instructions for shaping and grading Five Points Park. The work was carried forward during this year.—3d Ann. Rep., Park Com’rs (1872-73), 59.

The Young Ladies’ Christian As’ns is incorporated. The incorporators named in the act are Caroline D. Roberts, Hannah S. Brick, Julia C. Jayne, Henrietta E. Takott, Margaret L. V. Shephard, Sarah E. Wendell, Stella B. Lee, Kate Oakley, Olivia E. P. Stokes, Sarah B. Hills, Margaret D. Harper, Mary Beach, Louise F. Underhill, Mary L. McCready, Georgiana B. Ballard, Mary A. Atkin, “and their associates.”—Laws of N. Y. (1873), chap. 319.

The legislature votes a new charter to the city, “An Act to reorganize the local government of the city of New York” into one with a common council composed and numbered only after Jan. 1, 1875. (This is a reversion, after 42 years of experimentation—see Ag 31, 1868—to the form that had always been used prior to May 10, 1831, 9. v.) This single board is to consist of three aldermen elected from each of the five senatorial districts and six others
1873

April 30

THE ICONOGRAPHY OF MANHATTAN ISLAND

TABLE OF TAXES GIVEN 1870

An official sheet, The City Record, has its origin in this charter.

See J 42.

Mayor Havemeyer is continued in his office by a provision that the "first election for mayor under this act" shall be in Nov., 1874. Comptroller Green and a few other department heads are continued in office to the end of their terms, but most of the officials are to be nominated by Mayor Havemeyer and subject to confirmation by the Board of Aldermen. In general all these appointees have terms from four to six years, while the mayor continues to be a two year official. The mayor may be removed from office by the governor, who is also empowered to "suspend the mayor for a period not exceeding thirty days" pending an investigation. All heads of departments "may be removed by the mayor for cause, and after opportunity to be heard, subject, however, before such removal shall take effect, to the approval of the governor, expressed in writing."

The charter increases the importance of the chamberlain, who is now required to give a million dollar bond with sufficient sureties before he enters upon his office; his duties, too, are defined with a great degree of exactness, and his salary is fixed at $50,000, the highest of any officer.

The bureau of street cleaning is shifted from the health department to the police department, and the police officer in charge is to be called "inspector of street cleaning;" he shall "supervise and enforce the performance of the conditions of any existing contract for such cleaning or for the removal, under any contract now existing or hereafter made by the board of health, of night soil and contents of sinks and privies, and offal and dead animals." The board of health is reduced in number from nine to four, namely, two commissioners of health, the president of the police board, and the health officer of the port.

An additional department for which provision is made in the charter is the department of taxes and assessments, with a president and two commissioners at its head. "It shall require a majority of such commissioners to correct or reduce the assessed valuation of the personal property of any person."

There is a provision that in the department of buildings "the commissioner shall appoint as the chief executive officer of the department a person who shall have been for at least ten years an architect or builder, and who shall be approved by the New York Chapter of the American Institute of Architects. This person shall be known as 'superintendent of buildings.' The building of the board of street openings is changed by the charter to comprise the mayor, comptroller, commissioner of public works, president of the park board, and president of the board of aldermen.

The first commissioners of accounts are created by this charter, two persons appointed by the mayor and removable by him, plus the president of the department of taxes and assessments. It shall be their duty at least once in three months "to examine all vouchers and accounts in the offices of the comptroller and chamberlain, and make and publish, in the city record, a detailed statement of the financial condition of the city."

Also, they shall "from time to time make an examination of the expenses of the several departments and officers, and make such recommendations to the board of aldermen and other officers, with reference thereto, and particularly with reference to salaries and duties, as they deem advisable" (see J 4, 1884).

A "board of estimate and apportionment" succeeds the former "board of apportionment" (see Ap 19, 1871), and comprises the mayor, comptroller, president of the board of aldermen, and president of the department of taxes and assessments. The first meeting of said board in every year shall be called by notice from the mayor, personally served upon the members of said board. Subsequent meetings shall be called as the said board shall direct. To this board heads of departments shall submit in writing departmental estimates for the ensuing year, and, on the basis of these, "provisional estimates" shall be made by Nov. 1, and submitted to the board of aldermen within 10 days thereafter. The aldermen have 15 days to suggest in writing "any reductions or augmentations of said provisional estimate." If the board of estimate and apportionment shall "overrule the objections or suggestions," the

reasons therefor must be published in the City Record, where also the "final estimate" is to appear. The comptroller is to certify the "aggregate amount" to the supervisors, who are empowered to raise that amount by tax. The board of estimate and apportionment is also empowered to authorize issues of stocks or bonds, and to make transfers of appropriations, "from one bureau or purpose to another in the same department."

Duplicate office holding is checked by a provision that any person who accepts an office under the government of the United States, or of the state, "shall be deemed thereby to have vacated every office held by him under the city government;" neither shall any person hold two city or county offices.

There is another provision that, after a street has been once paved at the expense of "the owners of the adjoining property by assessment," repaving shall not be done at their expense except on their own petition.

Salaries, which the "Tweed Charter" (see Ap 5, 1870) left to be fixed by the common council, are now longer left to such determination, but stated specifically. — Laws of N. Y. (1873), chap. 335.

The Times presents editorially a table to show that the total of salaries paid to the mayor ($12,000), comptroller ($10,000), corporation counsel ($15,000), and the heads of departments, under the new charter, is almost 50% less than before, and declares that these salaries are "ample to secure proper incumbents for the several offices, and the interests of economy and improved administration are thus reconciled." — N. Y. Times, Ap 10, 1874.

The San discovers that there are "in all twenty-four prominent public officers who are to be appointed by the Mayor with the approval of the Board of Aldermen, and two Commissioners of Accounts whom he appoints absolutely. It is a serious responsibility, but it is certain that Mr. Havemeyer will discharge it without regard to party considerations, and with an honest purpose to select men who will do their whole duty." — N. Y. Sun, Ap 19, 1874.

The Democratic Herald says that the passage of this charter brings to an end a three months' "indecent scramble of the republican factions over the municipal spoils." The belief is expressed that it would have been better "to give the uncontrolled power of appointment and removal to the Mayor, and to hold that officer directly responsible for the honesty and efficiency of every subordinate department." The politicians having declined to do this, "the probability is that in practical operation the new government they have given us will be found to be just as irresponsible as that we have been living under for the past year." — N. Y. Herald, Ap 17, 1873.

Lexington Ave. is extended from 102d St. to the Harlem River. May 13 — Laws of N. Y. (1873), chap. 506.

The New York Charter to the Suppression of Vice is incorporated. — Laws of N. Y. (1873), chap. 527.

The legislature passes an act providing for the laying out of the Eastern Boulevard. — Laws of N. Y. (1873), chap. 528.

By act of the legislature the towns of Kingsbridge, Morrisania, and West Farms, in Westchester County, are to be annexed to the city of New York, Jan. 1, 1874, if voted upon favorably by the inhabitants of those towns at the next general election (see N. P. — Laws of N. Y. (1873), chap. 613. This act was amended on May 6, 1874, and May 25, 1876— Ibid. (1874), chap. 329; (1876), chap. 411.

In 1874 was published by Croes & Van Winkle a "Map of the northern portion of the city of New York, comprising the 12th ward, and the new 24th and 24th wards, recently annexed under the act of May 25, 1874; laws of 1874, state of New York;" size 32 x 61 in. Of the Beers maps of 1876 (q. v.), and of 1878 (q. v.). See also the Croes map of 1879.

Desbrosses St. is ordered to be extended from Hudson to Varick St. — Laws of N. Y. (1873), chap. 645.

The corner-stone of the new Fifth Avenue Presbyterian Church is laid at the north-west corner of Fifth Ave. and 55th St.— N. Y. Times, Je 10, 1874; L. M. R. R., III: 931. See My 21, 1874.

The remains of the prison-ship martyrs are removed from the dilapidated vault erected in 1808 (q. v., My 26) to a brick structure at Fort Greene, Washington Park.— An Appeal to the Cong. (1890). See Je 5, 1888.

Fred. Law Olmsted, landscape architect of the dept. of public parks, reports various works under way for the completion and ornamentation of the parks; the progress being made on Manhattan Square, the Museum of Natural History, and Museum of Art; the sea wall at the Battery; the fountain in City Hall Park;

"for the purpose of expressing indignation at the course taken by the Spanish authorities at Santiago-de-Cuba, in having so hastily put to death the captives of the Virginius, and to raise subscriptions for a new expedition."—N. Y. Times, N 10, 16, 18, D 13, 1875.

19 This first number of the City Record is issued, a daily journal, published by the city, containing, in condensed form, department directories, reports on official transactions, current proposals for bids on city work, and many other features of the city’s government.

20 The failure of Jay Cooke & Co. precipitates a great panic in Wall St. This spread to Philadelphia, Chicago, St. Louis, Cincinnati, and other cities throughout the country. The excitement increased on Sept. 19 and Sept. 20, and more than 30 reputable firms in the city failed, including Fish & Hatch and the Union Trust Co. On Sept. 21, Pres. Grant attended a meeting of bankers in New York, and they agreed upon a plan for the re-establishment of the national credit. After this, the panic gradually subsided.—N. Y. Times, S 21, 19, 1879; Supt. of Ex., N. Y. State, 62 pp.; and also illustration and account in Harper’s Weekly, XVIII: 891, 892.

21 Willie Collins, the novelist, arrives at New York from Liverpool.—N. Y. Times, S 26, 1873. On Nov. 17, he made his début as a “professional reader” at Association Hall. He read his story of "The Dream Woman—A Mystery."—Ibid., N 12, 1873.

22 A fourth story is being added to the new post-office in City Hall Park (see N 17, 1873). When the building is finished, it will be “larger than any granite or marble building yet completed by the Government outside the District of Columbia, and is not only the largest post-office building in the world, but will have unequalled facilities and accommodations for the transaction of business.”—Ann. Rep., Supervising Archt., U. S. Treas. (1873), 4-5. See also ibid., 1874, 1875, 1876.

23 "The Sixth General Conference of the Great Council of the Protestant denominations throughout Christendom, and known as the Evangelical Alliance," begins its sessions at Steinway Hall. The meetings lasted from Oct. 3 to Oct. 12.—N. Y. Times, O 4-13, 1873.

24 Messrs. Olmsted and Vaux present to the park board plans for laying out and improving Madison Park, recommending among other things that a building for birds and tropical feline animals be established there. These plans were greatly modified.—21st Ann. Rep., Am. Scn. & Hist. Hist. Soc. (1916), 65-72. For a description and the early history of the park, see ibid. (1916), 59-55. See also 22nd Ann. Rep., Park Comrs’ (1872-73), 59. See also Dec. 12, 1874.

25 The congress of the members of the “Association for the Advancement of Women” opens at the Union League Club.—N. Y. Times, O 16 and 17, 1873.

26 The corner-stone of the Rutgers Presbyterian Church is laid at the west-south corner of Madison Ave. and 29th St.—N. Y. Times., O 24, 1873. The church was dedicated on Jan. 3, 1875.—Ibid., Jl 4, 1875. Cf. L. M. R. K., III: 911.

27 Normal (now Hunter) College, on the site bounded by Park and Lexington Aves., 68th and 69th Sts. (see Jl 19, 1870), is opened and dedicated.—N. Y. Times, O 10, 1871; Dedication of the N. Y. Normal College, Oct. 29, 1873. The college is shown and described in Harper’s Weekly, XVIII: 617, and Harper’s Mag., April, 1878. See also L. M. R. K., III: 941.

28 Nov. A decided majority is given “in favor of annexation of the lower towns [in Westchester Co.] of King’s Bridge, Morrisania, and West Farms to the City of New York” (see My 23). A newspaper editorial reads: “We have increased the area contained within our municipal boundary by about one-half; in other words, the New York of 1874 will have an area of about 21,000 acres instead of 14,000 acres at present. We have added to our population some 30,000 to 40,000 people; we have increased the number of wards by over 200, and we have added an eighth judicial district, a sixth Police Justice’s district, and a tenth judicial district.”—N. Y. Times, N 6, 1873. This was the first addition to the city’s area since the Montgomery charter (see F 11, 1711).

29 The Cubans of New York meet at Masonic Hall in 17th St.
The common council resolves that "the new avenue west of Mt. Morris Square, extending from 120th to 124th Street, shall be hereafter known and designated the Fifth Avenue, and numbered continually from the 1st Avenue," and orders the survey of said Fifth Avenue. —Proc. App'd by Mayor, XLIII: 87. See, however, My 7, 1878.

Stewart's Park Theatre, on the s. e. cor. of Broadway and 22d St. (see L. M. R. K., III: 982, under "Abbay's Park Theatre"), the construction of which was begun in 1873 by Dion Boucicault, is opened.—N. Y. Times, Ap 15, 1874; King's Handbook, 582. See My 15, 1872.

The commissioners of the sinking fund are directed to lease to the 7th Regiment the plot bounded by 66th and 67th Sts., Fourth and Lexington Ave., for the erection of an armory.—Laws of N. Y. (1874), chap. 234. The corner-stone of the armory was laid here on Oct. 13, 1877 (q.v.).

Again "the old order of things changeth, giving place unto the new order," as the old Fifth Avenue was in 1763—L. M. R. K., III: 94! S. S. says it is all gone out of existence. The encroachments of modern progress have decreed its destruction, and people have failed to realize the proper site of a country seat at Fifty-first street, even so far east as first avenue. . . . Of late it has stood alone on a rock some twenty feet from the sidewalk, the cutting through Mount Pleasant for the purpose of grading Fiftieth Street, producing this condition of isolation. . . . There is now no Beekman country seat; it is among the things of the past. The destroyer commenced the work of its demolition on Monday last [April 20], and the relics of its existence are shapeless and unrecognizable. . . . The Beckman House contained two famous apartments—one of them in which Nathan Hile passed his last night, and the other that in which Major André slept before going to meet Arnold. But its vicissitudes are now over; its career is ended."—N. Y. Times, Ap 27, 1874. James W. Beckman presented the drawing-room mantel and the Dutch tiles to the N. Y. Hist. Soc.—Mag. Am. Hist., 16: 659. See also Creators, 27; Old N. T., 160-161; and L. M. R. K., III: 948.

The legislature passes an act "to consolidate the government of the city and county of New York."—Laws of N. Y. (1874), chap. 324.

At a meeting of the N. Y. Hist. Soc, James W. Beekman reads a paper "written by the late Mr. Brodiehead, entitled an 'Unpublished Chapter of the History of New York.' . . . The paper . . . treated of that particular period in the history of New York beginning in the year 1687, when Lord Belamont, an Irish nobleman arrived in this City as Governor, representing the British Government. The historical incidents connected with his administration possess little interest for the general reader, though they are regarded by the society as of considerable importance. The most attractive features of the paper were its humorous descriptions of the hamlet then known as the City of New York, and the manner of living of its inhabitants."—N. Y. Times, My 6, 1874. See, however, De Peyster's Life of Benjamin.

The legislature authorises certain people "to lay down, construct and maintain tubes of iron, wood or other material underground and beneath the bed of navigable waters in and between the city of New York and the villages, towns and cities in the neighborhood thereof . . . and to convey letters, parcels, packages, and other messages, peremptory and for a private use and through said tubes, for compensation, by means of the pneumatic method of propulsion."—Laws of N. Y. (1874), chap. 400.

The legislature passes a compulsory education law.—Laws of N. Y. (1874), chap. 421.

For the accommodation of the public, the Eighth Ave. R. R. Co. is directed to extend its tracks from its present terminus to MacDougal Road and the Bowery Post Office. This will provide a continuous road from Vesey St. and Broadway and from Canal St. and Broadway to the Harlem River.—Laws of N. Y. (1874), chap. 478.

The name of the Beach Pneumatic Transit Co. (see Je 1, 1868) is changed to the Broadway Underground Ry. Co., and the company is directed to construct within 5 years, as the first section of its road, that portion of its line from the Battery to Bowling Green to a connection with the N. Y. and Harlem R. R. at or above 42d St.—Laws of N. Y. (1874), chap. 501. This company in time was absorbed by the Arcade Railway Co. (see Jn 11, 1881), but its extension was never carried out; and, while the subject of an underground road or subway was agitated from year to year, no other one was constructed until granting for the Pennsylvania line in 1900 (q.v., Ja 16 and Mr 24).—Wilson, Mem. Hist. N. Y., II, ch. 14, sec. 3.

James Rogers and others are authorised to construct a street railway with a double track from Vesey St. through Church St. to Morris St., thence to Greenwich St., through Greenwich to Battery Place, and along Battery Place to State St.; also along State St. with a single track to Whitehall and thence to South Ferry, returning along Whitehall to Bowling Green and along Bowling Green to the double track at Battery Place.—Laws of N. Y. (1874), chap. 508.

In order to give representation in the board of aldermen to that portion of Westchester County (the new 25th and 24th Wards) recently annexed to the city (see N 5, 1873), the legislature amends the charter, increasing the number of aldermen from 21 to 32. The new member shall be elected in the Staten Island and the Pre-Emption district or in one of the new wards.—Laws of N. Y. (1874), chap. 515.

Henri Rochefort, "the exiled editor of 'La Lanterne,'" arrives at New York and takes up his residence at the Grand Central Hotel.—N. Y. Times, My 31, 1874. On June 5, he made an address at the Academy of Music.—Ibid., Je 6, 1874.

The corner-stone of the south wing of the American Museum of Natural History is laid by the President of the N. Y. Times, Jn 1, 1874. This was the first section of the present building on Central Park, W., 7th to 81st Sts.—Growth of the Bldg. of the Am. Mus. of Nat.Hist. (1912); L. M. R. K., III: 946. It was opened on Dec. 22, 1877 (q.v.). See also My 15, 1875.

An act is passed authorising New York and Brooklyn to assume control of the Brooklyn Bridge, paying back to the original subscribers the amount of their subscriptions, with interest. If the cities agree to undertake the work and the owners of two-thirds of the
5 private stock consent to sell their shares, the bridge is to be put
under the management of a board of trustees, ten from each city,
including the mayor and comptroller. The funds are to be raised
three-halves by Brooklyn and one-half by New York.—Laws of
1874 N. Y. p. 185; T. Laidley, Green, Complete Hist. of the N. Y. and
Brooklyn Bridge, 12. See My 14, 1875.

July
In this month, J. B. Holmes, city surveyor, made a Map of the
Common Lands from 42nd to 59th Streets, Third & Sixth Ave's
showing the old streets and plots as surveyed and mapped in 1796
[by Mr. 1] by Cassimer T. H. Gough, City Surveyor and resur-
veyed in 1852 [by N], and the Distance between these old streets and our present streets.—See map in register's
office, N. Y. County.
8 The board of aldermen in special session passes resolutions re-
quiring Gov. Dix to "suspend and remove" Mayor Havemeyer
because of the latter's failure to "investigate the complaints" raised
against two of the police commissioners, also because of his "def-
ying the spirit, if not the letter, of the law, by their reapportion-
mant, after court action against them. —Proc. Bd. of Ald. (1874),
CXXXV: 3-8. The Tammany organization, the "Council of
Political Reform," and some members of the "Committee of
Seventy" interview the governor to the same end.—N. Y. Times,
Jl 9, 1874. For the governor's action, see S. 14.

The "Eight" of the N. Y. Market Exchange, which was built under the
auspices of the "Tammany Ring" but never used, has been turned
into a dog pound.—N. Y. Times, Jl 24, 1874.

Sept.
Gov. Dix declines to remove Mayor Havemeyer, an action he
was urged to take, on July 8 (p.v.). He does not absolve the mayor
from the charges against him, but declares "his errors, grave
as they are, belong to the class which are left to popular reprob
more properly than to executive correction." He commends the mayor for
"earnestly on the side of economy, and in furtherance of the
reform of those abuses under a former administration of the
municipal affairs of the City, the exposure of which led to his
election to office."—N. Y. Times, S 15, 1874./

Mayor Havemeyer gives to the press a long letter to "Honest"
John Kelly, Tweed's successor as "Boss" of Tammany Hall. He
floods the letter with his praise of the "Boss" and into Richard Croker as a marshal. Later, certain elec-
tion inspectors whom Kelly claimed a right to appoint were found
be to "of notoriously bad character," so that the police board con-
sidered it a duty to remove them. The mayor then recites the
tricky method by which the "Boss" secured the removal of the two
police commissioners. In the rest of the letter the results of re-
organizing into Kelly's conduct of the office of sheriff are given to
show that "you have defrauded the public treasury, defamed the
character of the city, libelled our citizens of your own race, and
sunk yourself to the lowest degrees of disgrace . . . . I think that
you were not worse than Tweed, except that he was a larger operator.
The public knew that Tweed was a bold reckless man, making no
pretensions to purity. You, on the contrary, are always aiming
your honesty, and wrapped yourself in the mantle of piety.—
N. Y. Sun, S 18, 1874. For Kelly's reply, see O 1.

The legislature orders the Kingsbridge Road opened north and
east from 155th St. to the Harlem River. —Laws N. Y. (1874),
chap. 625. See also the map of the road, dated Nov. 4, 1874, filed
in bureau of topography, borough president's office, as Map Nop.
3065.

Oct.
A new local party, to be known as the "People's Party,"
1 is founded at the Fifth Avenue Hotel "by some of the property-
holders and tax-payers of this City who are not willing to swallow
everything that Tammany Hall may feel disposed to thrust before them."—N. Y. Times, O 2, 1874.

"Honest John Kelly" replies to Mayor Havemeyer's letter of Sept. 14, defending himself against the mayor's charges. He
delers his intention to commence a libel suit to establish "beyond
cavil or doubt that . . . . it is you, and not I, who by publishing a
series of infamous libels upon an innocent man, have 'closed your
career finally in dishonor.' "—N. Y. Sun, O 1, 1874. See N. 50.

Nov.
In a three-cornered municipal election that is overshadowed by
the gubernatorial contest, Wm. H. Wickham, the Tammany can-
didate, is defeated; S. H. Whitman, Republican nominee, and
Oswald Ottendorfer, candidate of the anti-Tammany Democrats.
—N. Y. Sun, N 4, 1874.

A number of amendments to the state constitution, proposed by
the constitutional commission (see Mr 25, 1873) and passed by
two successive legislatures, are approved by the electorate. Some
of these are: A provision to prevent bribery at elections, and
another to prevent official corruption; provisions increasing the
salary of members of the legislature to $1,000, increasing the
term of senators to four years, and making city officials ineligible
for seats in the legislature; provisions to extend the governor's
term from two to three years, and to fix his salary at $10,000 plus
the use of "a suitable and furnished executive residence."—Leg-
Manual (1875), 481-99; Lincoln, Const. Hist. of N. Y., II: 473-
573; N. Y. Times, N 10, 1874.

Mayor Havemeyer dies suddenly in his office in city hall. The
libel suit brought by John Kelly against the mayor (see O 1) had
just been started in "Supreme Court Chambers." Judge West-
brook adjourns the court after the plaintiff's counsel's statement
that "the solemnity of the occasion is such as must disarm all
hostility . . . . We have no desire to utter other words of kindness,
such as would be suitable on so important an occasion."—
N. Y. Sun, D 1, 1874.

"The Two Orphans" is produced for the first time in New
York, at the Union Square Theatre with Kate Claxton as Louise

"A circular addressed to the people of the United States has
been issued commanding to their notice the coming centennial cele-
bration. The document states the advantage which will accrue from the Exposition, and urges the necessity for
conducting the enterprise upon a scale befitting a great nation.
The paper involves the people of this City to awaken to the sense
of the responsibility entailed upon it."—N. Y. Times, D 2, 1874.

King Kalakaua of the Sandwich Islands arrives at New
York from Washington. He is formally received and conducted to
the Windsor Hotel at 46th St.—N. Y. Times, D 24, 1874. During his
stay here, which lasted until Dec. 31, the king took a sleighride in
Central Park, attended services at St. Thomas's P. E. Church and
at St. Stephen's R. C. Church, and was photographed at Gurney's
gallery.—Ibid., D 25-31, 1874.

Prominent New York bachelors, including Charles Post, Wm.
Dough, Isaac Bell, Wm. Duane, Wm. Dury, and Peter Marie, hold
an elaborate masquerade ball at Delmonico's. This is sometimes
to be called the 'Bouncers' Ball' because many men and women "here-
tofore not considered among the social elect" were invited.—Van

1875

In this year, Geo. Westinghouse invented the first successful
air-brake; it made high speed railroad travel possible. —Scientific
American. Je 5, 1875.

In this year, Mark Twain's Adventures of Tom Sawyer appeared.—

In this year was published Hinrichs' guide map of the Central
park, size 10 x 26 in.

In this year was published Old N. Y. from the Battery to Blem-
ingdale, by Eliza Greitorex.

In this year, Alfred Speer presented a plan of an elevated endless
railway operated by stationary engines like a moving platform.—
Speer, Solution of Rapid Transit for N. T. C., 1875.

In this year, the historic Rutgers-Crobsby mansion, erected in
1754 (p.v.) by Hendrick Rutgers on the block bounded by Clinton,
Jefferson, Cherry, and Monroe Sts., was demolished.—Liber Deeds,
MCCXXIX: 89; Greitorex, Old N. Y., 1: 104; L. M. R. K., III:
932. See also N. 24, 1872, and Pl. 109-a and b, Vol. III.

About 1875-6, J. H. Besi made a photograph, from five neg-
atives, giving a panoramic view of New York from Brooklyn. It is
reproduced and described as Pl. 135-e, Vol. III.

In this year, the Art Students' League was organized. It was
incorporated in 1878. It holds classes in life, portrait, sketch,
modelling, composition, and costume work.—King's Handbook
(1893), 410. For this and other art schools at present (1926) in
New York, see Am. Art Annual, Vol. XXII (1925), 271 et seq.

The New York headquarters of the Centennial Exhibition man-
agers are opened on the second floor of the St. Nicholas Hotel.—
N. Y. Times, Jl 20, 1875. See also Survey of Harlem River, from Randall's Island, by way of
Swayne Duyck Creek, to Hudson River, New York, in compli-
ance with the provisions of an act of congress, of June 23, 1874
(p.v.), is completed under the direction of the secretary of war. In
the report submitted to congress a history of the unsuccessful at-
The Iconography of Manhattan Island

1875
Feb. It is pointed out that the river is now crossed by six bridges, the Harrow Bridge, the N. Y. & Harlem R. R. Bridge, Central Bridge, High Bridge, Fordham Bridge and King's Bridge; any obstruction to navigation by the two last named does not need to be considered, if the proposed canal is cut "through a small portion of the northern end of New York Island," at a point south of those bridges, thus avoiding "the very shallow, obstructed, and crooked" Spuyten Duyvil Creek. It is assumed that High Bridge, although it "encroaches with its piers unnecessarily upon the water-way" and "has contracted the width of the river" by its approaches, cannot be interfered with because it "carries the whole supply of water for the city." It is estimated that the excavation of a channel 350 ft. wide and 15 ft. deep, including the construction of the canal, will cost $2,777,571.44; if the depth be decreased three ft., it will decrease the cost about $500,000.—Excet. Docs, 43d cong., 2d sess., No. 75, Part 9. See J. 1, 1883.

Apr. The New York Woman Suffrage Society celebrates the centennial of the battle of Lexington by "an interesting entertainment made up of addresses and recitations by prominent adherents to the cause of woman suffrage, at the Union League Theatre."—N. T. Times, Ap 20, 1875.

25 A large part of the Union League Club building in Madison Square is destroyed by fire.—N. T. Times, Ap 26, 1875.

28 The Racquet Court Club is organized. Its rooms at 25 W. 26th St. were opened on May 1, 1876.—Club Book, Racquet & Tennis Clubs, 1891; L. M. R. K., III 954.

May The new Fifth Avenue Presbyterian Church (see Je 9, 1875), of which Rev. Dr. Hall is pastor, is dedicated. The church is at the north-west corner of Fifth Ave. and 55th St.—N. T. Times, My 10, 1875; L. M. R. K., III 951. It is described in King's Handbook (1893), 366-67.

9 An act of the legislature dissolves the N. Y. Bridge Co. (see Ap 18, 1871) which proposes that the bridge across East River, which this company has been erecting, shall become a public work of the cities of New York and Brooklyn.—Laws of N. Y. (1875), chap. 300. See Je 3, 1874, and My 24, 1883.

18 The legislature authorizes the raising of a sum not exceeding $200,000, by the creation of public stock, for equipping "the building now erected upon that portion of the Central park . . . formerly known as Manhattan square . . . in a suitable manner, for the purposes of a museum of natural history."—Laws of N. Y. (1875), chap. 351. See Je 2, 1874.

17 The N. Y. Academy of Medicine (see 1860) holds its first meeting in a building of its own, at 12 W. 31st St., formerly a brownstone residence.—N. T. Med. Jour., Jl 22, 1911. The cornerstone of its present building, at 17 W. 43rd St., was laid on Oct. 2, 1879 (43d cong., 1st sess., No. 88, 1878).

22 A great public demonstration is staged at Steinway Hall to awaken "popular sentiment in behalf of the octennial Centennial celebration." Music and speeches make up the entertainment.—N. T. Times, My 23, 1875.

June The new Masonic Temple (see Je 8, 1870) is dedicated with imposing ceremonies.—N. T. Times, Je 3, 1875; L. M. R. K., III 954.

5 All of the proposed street, Aves. B, between 68th and 99th Sts., and of the proposed Ave. between 100th and 106th Sts., as laid out on the city's plan of 1809, are stricken from the official city plan by the legislature.—Laws N. Y. (1875), chap. 494.

18 The St. Nicholas Church is incorporated, eligibility to membership being confined to descendants of residents of the city or state of Ireland before 1848. One of the principal objects of the new organization is the collection and preservation of information concerning the early history of the city and state.—Club Book (1877). In 1893, its club-house was at 365 Fifth Ave.—King's Handbook, 546, 547; L. M. R. K., III 938. See 1904.

17 The centennial anniversary of the battle of Bunker Hill is celebrated at the Academy of Music.—N. T. Times, Je 18, 1875.

The N. Y. Elevated R. R. Co., which acquired the franchises of the West Side and Yonkers Railway Co. and the elevated road in Greenwich St. in 1871 (43d cong., D 6), is ordered to complete the road within five years. Its route may not cover other streets than Greenwich St. to Ninth Ave., along Ninth Ave., or streets west of it, to the Harlem River.—Laws of N. Y. (1875), chap. 595. See S 3.

17 The Clearing House Association (see O 11, 1873) takes possession of the building on the corner of Pine and Nassau Sts. for its occupied, reserving for the use of the N. Y. Central, the Tenth and the National Bank. The building has been entirely remodelled.—N. T. Clearing House Laying of Corner-stone and Opening Ceremonies of the New Building in Cedar St. (N. Y., 1896). See also Lossing, Hist. of N. Y. City, II 629-63. The cornerstone of its own building was laid on Oct. 2, 1894 (46 c). The "rapid Transit Act of 1875" is enacted, "further to provide for the construction and operation of a steam railroad or rail ways in the counties of the State." It provides for the appointment of a commission in any county in which application has been made by "fifty reputable householders and tax-payers," which commission is empowered to decide whether or not the locality needs rapid transit, to "determine the route or routes," and, if found expedient, to organize a company to build the lines. In New York City, Broadway and Fifth Ave., below 59th St., and Fourth Ave., above 43d St., are excepted from the operation of this act.—Laws of N. Y. (1875), chap. 606; Chamber of Commerce of the State of N. Y., Rapid Transit in N. Y. C. and Other Great Cities, 51. See 3 18

July 1885

27 The demolition of the old North Dutch Church in Fulton St. is completed. During the last stages of the work on this day, the tower, 60 ft. high and 24 ft. square, fell, through some mishap, from an adjacent building.—N. T. Times, Jl 8 and 9, 1875; Harper's Weekly, XIX 457; L. M. R. K., III 939. There is a view of the ruins at the time of demolition in N. Y. P. L.—a drawing made from Fulton St., dated June, 1875. See also Grote, New N. Y., 42-44, and descrip. of Pl. 141-b, III 718.

27 The first of the free excursions on board the new "Floating Hospital" for the benefit of the destitute sick children of the city is held. The hospital barge is in the charge of St. John's Guild.—N. T. Times, Jl 29, 1875.

A meeting is held at Cooper Institute to celebrate the 100th anniversary of the birth of Daniel O'Connell, "the Liberator of Ireland." Eulogies of O'Connell are delivered by Gen. McMahon and Rev. Dr. McGlynn. Commemorative services are held also in the Catholic protectory and in most of the Catholic churches.—N. T. Times, Ag 5, 1875.

27 Counties Reef has been removed from New York Harbour.—N. T. Times, Ag 25, 1875.

The Middle Dutch Church is abandoned as a post-office. All business is transferred to the new building at Park Row, Broadway, and Mail St. (see Ag 25), though the latter edifice is not entirely finished.—N. T. Times, Ag 28, 29 and 30, 1875. See also L. M. R. K., III 935, 974, and descrip. of Pl. 28, 1: 262. "For a few months after the post-office department was removed the interior of the old church was utilized as an auction mart, and a dozen large stores were temporarily fitted up and found eager occupants. Then came the announcement that in accordance with the act of congress the premises would be sold at public auction."—Mag. Am. Hist., XXII 196. See also Evc. Past, O 17, 1882, and descrip. of Pl. 180-a, III 696. The old church was sold in 1882 (46 c, O 19).

Work on the city hall post-office (see Ag 25 and 28) is abandoned Sept. It was resumed in Aug. 1876, at which time the stairs, elevators, and attic were being completed.—Ann. Rep., Supervising Archt., U. S. Treas. Dept. (1876), 7. The building was finished in 1876 (46 c, O 1).

3 The rapid transit commission reports that better means of rapid transit are needed by the city; that elevated steam railways are best suited to the needs of the situation; and that Second, Third, Sixth, and Ninth Aves. should be chosen to be the routes of these roads. The privilege of building them is given to the two companies already in existence and authorised to build elevated railroads in the city,—the Gilbert Elevated R. R. (see Je 17, 1872) and the N. Y. Elevated R. R. Co. (see O 27, 1871). To the Gilbert Co. it gave what we now know (in part) as the Sixth Ave. and Second Ave. routes. It began at Kingsbridge on the
1875
Harlem River, thence by River St., Eighth Ave., 110th St., Ninth Ave., 53d St., Sixth Ave., Amity St., South Fifth Ave., West Broadway, College Place, Murray St., Church St., and New Church St. to Morris St., and thence through private property and Bowling Green to Beaver St., thence by Beaver and Pearl Sts., the New Bowery, Division St., Allen St., First Ave., 33d St., Second Ave., and River St. to the first-named line at the corner of River St. and Eighth Ave.; also a connecting line along Chambers St. and Chatham St. and a branch on Sixth Ave, from 53d to 59th Sts. The commission also remedied the vital defect in the Gilbert Co.'s charter by which it was committed to an impracticable mode of construction.

To the N. Y. Elevated Co. it confirmed the Ninth Ave. route, which the company had acquired by purchase from the West Side and Youkers Railway Co., and also conferred upon it the route from Battery Place to South Ferry, and from South Ferry by way of Pearl St., the Bowery, and Third Ave., to the Harlem River, with branches to all the railroad depots and ferries.

The work of constructing the roads was soon afterwards begun, but it was much hampered by the opposition of property owners and surface railroad companies.—Rep. of the N. Y. C. Comrs. of Rapid Transit, S ; 1875; Rep. of the Special Com. on R. R., Appointed . . . to Investigate Alleged Abuses in the Management of R. R. (Ainsay, 1882); Statutes and Docs. Affecting the Elevated Railways in the City of N. Y. (1866-1882). See 1876, and Mr 13, 1876.

Oct. The Eagle Theatre at Sixth Ave. and 33d St. is opened.—Brown, Hist. of the N. Y. Stage, III: 235 et seq. See F 20, 1878.

18 The evangelistic work of Moody and Sankey in the U. S. is begun, in Brooklyn at the skating rink on Clarmont Ave. The meetings closed on Nov. 19, after which the evangelists visited Philadelphia. The first meeting in New York was held on Feb. 7, 1876 (q.v.).—Chapman, Life and Work of D. L. Moody, 158-61.

Nov. In this month, Chickering Hall, on the north-west corner of Fifth Ave. and 18th St., was opened.—Brown, II: 791-92; L. M. R. K., III: 983. G. B. Post and F. C. Murray were the architects. —Rep., Dept. of Bldg., in City Record, III: 679, 1105, 1629; IV: 107. It was altered for business purposes in 1893, and demolished in 1902.—L. M. R. K., III: 983.

The Manhattan Railway Co. is organized, with a capital stock of $2,000,000. With the consent of the rapid transit commission, it adopted substantially the routes occupied by the N. Y. Elevated and the Gilbert Elevated Cos., its object being to meet the public necessities in case either, or both, of these failed to complete its system.—"The Story of the Manhattan Railway," by Russell Sage, in Railroad Men, XVI, No. 4; Statutes and Docs. Affecting the Elevated Railways in the City of N. Y. (1866-1882). In 1879 (q.v., S 30), the Manhattan Co. leased the lines of the other two elevated companies.

Vice-Pres. Henry Wilson dies at Washington of apoplexy.—N. Y. Times, N 23 and 24, 1875. On Nov. 26, the funeral cortège left Washington for Baltimore, and, after making stops there and at Philadelphia, arrived at the Conshohocken St. ferry landing on the afternoon of Nov. 27. While church bells tolled, the hearse was escorted, by civil authorities and military organizations, to the Grand Central Depot, where the body was placed on a train bound for Boston. The line of march was crowded with people, and buildings were decorated with mourning and with flags at half mast. The vice-president was buried in Dell Park Cemetery (Natick, Mass.) on Dec. 1. —Ibid., N 25-D 2, 1875. See also illus. and account in Harper's Weekly, XIX: 1020.

Wm. B. Auntor dies at his residence, No. 172 Fifth Ave. He was buried on Nov. 27 in the family vault in Trinity Cemetery, after funeral services at Trinity Chapel, No. 15, W. 25th St.—N. Y. Times, N 25, 27, and 28, 1875.

Dec.
Wm. M. Tweed escapes from Ludlow St. jail.—N. Y. Tribune, D 6, 1875. In 1876, he was arrested at Vigo, Spain, and returned to New York.—Ibid., S 9, 1876; Harper's Weekly, XX: 821. He died in this jail on April 13, 1878 (q.v.).

The board of aldermen adopts the following resolutions:

"Resolved, That in commemoration of the important event in the history of our country, and as an appropriate inauguration of the centennial year, the Commissioner of Public Works cause the national standard to be displayed from sunrise to sunset on every public building in this City on Jan. 1, 1876 that the owners and occupants of private buildings, the proprietors of hotels, places of amusement and other public places controlled by individuals, and also the masters of vessels in the harbor, be and they are hereby requested to display their flags on that day; and be it further

"Resolved, In order, if possible, that this commemoration may be general in every portion of this extended country from the Atlantic to the Pacific and from the St. Lawrence to the Rio Grande, it is hereby respectfully suggested and most earnestly recommended that the newspaper press of this City cause this recommendation to be published in or telegraphed to all parts of the country, in the hope that our patriotic people may enter into the spirit of the occasion, and thereby, while honoring our national emblem, inaugurate, in the most appropriate manner, the centennial year of the Declaration of American Independence."—N. Y. Times, D 28, 1875.
CHAPTER VIII
THE MODERN CITY AND ISLAND
1876-1909
CHAPTER VIII
THE MODERN CITY AND ISLAND
1876-1929

A brief summary of the principal events in the history of the modern city and island from 1876 to the Hudson-Fulton Celebration of 1909 is in Chap. VIII, Vol. III, pp. 781-811.

In this year, N. A. Otto, a German, invented the four-cycle internal-combustion engine, the type later universally used in gasoline-driven automobiles.—Sullivan, Our Times (1926), I: 479.

In this year, the first bicycle proper was brought to this country and exhibited at the Centennial Exposition.—Sullivan, Our Times, (1926), I: 241. Shortly after this date, the author saw this or a similar machine in use on the ice on Central Park lake.

"New York or Manhattan Island is divided into 141,486 building lots, by survey, of which about one-half are appropriated. From Battery Point at the southern extremity, the City proper is regularly covered with streets and buildings for a distance of 5 miles, and also, but irregularly, 4 miles further to Harlem on the East side. On the West side again, it forms a concrete mass of stone and brick to about Sixth street, thence less compactly to above Bloomington-dale, where it opens into the suburban districts of Mauhattanville and Washington Heights...

"The City contains 470 churches...

"The New York Markets, 12 in number, are most of them well provisioned with abundance of meats, poultry, fish, and vegetables.

"There are now in the City of New York (1876), 75 National and State Banks; 38 Savings Banks; 86 State Fire Insurance Companies, besides numerous Agencies; 10 Marine Insurance Companies, 20 State Life Insurance Companies, besides Agencies; 4 Safe Deposit Companies, a Stock Exchange Company, and a Bank Clearing House..."

By this year, the development of Central Park, in its principal features, was completed.—16th Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1911), 478.

Early in this year, the N. Y. Elevated R. Co. extended its West Side (Ninth Ave.) line to 59th St.—Rep. of Special Com. on R. R., Appointed... to Investigate Alleged Abuses in the Management of R. R. (Albany, 1880); Statistics and Docs. Affecting the Elevated Railways in the City of N. Y. (1880-1882). See Ap 5, 1877.

In this year, Delmonico's was erected on the south side of 26th St. between Broadway and Fifth Ave., and the restaurant moved here from Fifth Ave. and 14th St. (see 1861). It later became the Café Martin, and in 1914 it was demolished.—Parity Fair, Jn, 1916; L. M. R. K., 111: 978. The building is shown in King's Handbook, 295. For a description of the interior, see D 4, 1879.

The Medical College of N. Y. University (see 1869) builds on 26th St., east of First Ave. This college existed as a proprietary school until 1879, when the university took over the property.—N. Y. U. Bull., Jy 30, 1911; City Record, III: 679, 1105, 1629; IV: 197.

In this year, the Buchanan Hotel was opened at the s. e. cor. of Fifth Ave. and 50th St., opposite St. Patrick's Cathedral.—King's Handbook (1859), 296. It was demolished in 1925 to make way for the store of Saks & Co.

In this year, M. Dripps published a map of the city on 19 folio sheets.—Descript. of Pl. 113, III: 707.

In this year was published, by H. H. Lloyd & Co., a map entitled: The surroundings of New York city, embracing the territory occupied by the homes of New York business men, 36 x 23 in.

From 1876 to 1885 were published by J. B. Beers & Co., in five folio volumes, maps of the Twelfth, Twenty-third, and Twenty-fourth Wards, called New York city from official records and surveys.

A centennial note, issued on Jan. 6, 1876, to help pay for the Colles' water works, is redeemed by the city and is ordered to be preserved "in a costly antique frame."—N. Y. Times, Ja 7, 1876.

Trinity corporation has made plans to build, in the spring, "an East side chapel and school-house on the site of the old Quaker burying ground on Houston street, near the Bowery." The building was consecrated in 1877, as the Chapel of St. Augustine.—N. Y. Times, Ja 16, 1876; N 30, 1877.

Closing services are held in the old Fifth Avenue Presbyterian Church, s. e. cor. of 19th St. The structure has been presented to the Central Presbyterian Church and is to be removed to 55th St., near Broadway; the land on Fifth Ave. has been bought by Arnold, Constable & Co.—N. Y. Times, F 1, 1876. See also L. M. R. K., 111: 931. See, further, My 27, 1876, and O 12, 1878.

Moody and Sanyky hold their first meeting in New York, at Gilmore's Concert Garden (formerly Baruman's Hippodrome), and more than 10,000 people are present. The meetings lasted until April 19 and were enthusiastically attended.—Chapman Life and Work of D. L. Moody, 163-65.

They continued their evangelistic work throughout the U. S. and in Great Britain until Mr. Moody's death in 1899.—Ibid. See also Sullivan, Our Times (1926), I: 265-67.

The legislature passes an act "to prevent injury to animals in the city of New York," making it a misdemeanor to throw in the streets nails, glass, or other substances which might "maim, lame, cut or otherwise injure any animal," or to put salt, saltpeter, etc., for melting snow or ice, anywhere except on curvcs, crossings, or switches of railroad tracks.—Laws of N. Y. (1876), chap. 16.

A fire which broke out at No. 444 Broadway consumes 35 buildings; loss $5,000,000.—N. Y. Herald, F 9, 1876; N. Y. Times, F 9, 10, 11, and 12, 1876. See also Harper's Weekly, XX: 167.

The board of aldermen appoints a committee to report how the common council "shall proceed to evince its deep interest in the forthcoming celebration of the Centennial as well as how a friendly cartel can be established between New-York and Philadelphia" to aid the exhibition.—N. Y. Times, Mr 10, 1876.

Words are first transmitted by electric telephone, at Boston, between Alexander G. Bell and his assistant, Thomas A. Watson.—Casson, Hist. of the Telephone, 32-33; N. Y. Times, Mr 7, 1926.

The contract is made between the Gilbert Elevated R. R. Co. and the Loan and Improvement Co. by which the latter agrees to construct and equip the road covered by the charter of the former company in conformity with the requirements of the Rapid Transit Commission. Work was immediately begun on the road, but was interrupted by legal proceedings, which culminated in an injunction and a stay of all construction work until Sept., 1877 (p. v).—Rep. of the Special Com. on R. R., Appointed... to Investigate Alleged Abuses in the Management of R. R. (Albany, 1880).

The city acquires by condemnation proceedings the land at the junction of St. Nichols Ave. and 1234 St. This became Hancock Square.—Prendergast, op. cit., 51; L. M. R. K., 111: 970. See 1884. On this day and on May 27, 1891, the city acquired by condemnation proceedings the land bounded by East End Ave. to East River, 8th to 90th Sta. This became Carl Schurz Park.—Prendergast, op. cit., 51; L. M. R. K., 111: 969.
1964

THE ICONOGRAPHY OF MANHATTAN ISLAND

1876

The New York Club building at Nos. 1 and 3 W. 25th St., at the junction of Fifth Ave. and Broadway (see 1874), is partially destroyed by fire.—N. Y. Times, Ap 3, 1876.

Closing services are held in the Greene Street M. E. Church. The congregation has purchased the Dutch Reformed Church in Washington Square, which will hereafter be known as the Asbury M. E. Church, Ap 3, 1876. The latter church was dedicated on June 4.—Ibid., Jl 5, 1876.

Alexander T. Stewart dies at his residence, n. w. cor. of 34th St. and Fifth Ave. The flags on the city hall and other public buildings are placed at half mast in his honour.—N. Y. Times, Ap 11-14, 1876. See in N, 1876.

After the death of Mr. Stewart, his business, which was founded in 1818, came into the possession of a surviving partner, Wm. J. Libbey, and Judge Henry Hilton, who had been Mr. Stewart's attorney. They continued the organization as A. T. Stewart & Co. However, there was a quarrel between Judge Hilton and Mr. Libbey, and the firm was dissolved and reorganized in 1876 under the name of E. J. Denning & Co., Mr. Denning having been Mr. Stewart's chief manager. After Mr. Denning's death in 1892, the firm assumed the title Hilton, Hughes & Co., and as such failed in 1896. In that year (q.v., S 20), John Wanamaker acquired it by purchase.—From a letter to the author from the office of John Wanamaker, dated Aug. 19, 1892.

The legislature grants permission to the U. S. to improve "the Harlem river, and Spuyten Duyvil creek, from the North river to the East river through the Harlem kills," and cedes its jurisdiction over the same, for the purpose of the improvement.—Laws of N. Y. (1876), chap. 147.

May

The Centennial Exhibition at Philadelphia is opened with impressive ceremony, Pres. Grant delivering the principal address. About 150,000 people are present, including representatives from almost every country in the world. In New York, the opening was celebrated by a display of flags and floats on public buildings, streets, private residences, and the ship ping in the harbour.—N. Y. Times, My 9-13, 1876. For the preparations in New York, see ibid., F 26 and Ap 20, 1876. The exhibition was formally closed by Grant on Nov. 10.—Ibid., N 9-11, 1876. The Centennial Exhibition, the first of a long line of international expositions held in this country, was an important milestone in our country's development. It marks the beginning of the end of provincialism and of the "Vic torian age." Affording as it did an opportunity to vast numbers of people to see for the first time foreign manufactures and foreign arts, and to establish new contacts, it broadened knowledge and set new standards of taste, which were far reaching in their results.

The Centennial may fairly be taken as marking in New York City as in many other parts of the country, an awakening to modern consciousness, which received a further and even greater impetus from the Chicago World's Fair in 1893.

27

The corner-stone of the Central Presbyterian Church is laid in 57th St. near Seventh Ave. with impressive ceremonies. This stone "was the corner-stone of the Nineteenth Street Presbyterian Church [see Jl 31], and is marked on different sides with the successive dates of its first laying (A.D. 1842) and relaying (A.D. 1876)."—N. Y. Times, My 28, 1876; L. M. R. K., III: 930, 931. See O 12, 1878.

June

The legislature authorizes the city controller to pay for "improving the avenue known as Riverside avenue" and declares the "whole of the land embraced within the boundaries of Riverside avenue . . . to be one of the parks and public places in the city."—Laws of N. Y. (1876), chap. 447.

The city acquires by condemnation proceedings the land at the junction of St. Nicholas Ave. and 116th St. This was later developed as Kilpatrick Square.—Prendergast, Record of Real Estate, 51; L. M. R. K., III: 970.

The R. C. Church of the Sacred Heart, at 51st St. and Tenth Ave., is dedicated. The building was formerly used as a Baptist church.—Ibid., Jl 6, 1876.

July

The celebration of the 100th anniversary of the Declaration of Independence is begun in New York, on the evening of this day, with a military parade and fireworks. An immense crowd gathered in Union Square, which the 71st Regiment had difficulty in keeping back from the line of march.—N. Y. Times, Jl 4, 1876.

The celebration of the centennial anniversary of the Declaration of Independence is continued with impressive ceremonies at the Academy of Music, which includes music by the German Sängerverbund, an original ode by Wm. Cullen Bryant, and an address by Rev. Dr. R. S. Storrs. The Cincinnati and other societies held individual celebrations, and in the evening there were fireworks in City Hall Park. The day was also observed with great enthusiasm at Philadelphia and other cities throughout the country.—N. Y. Times, Jl 5, 1876.

Don Carlos, emperor of Brazil, and the empress, arrive in New York from Philadelphia and stay at the Buckingham Hotel. On July 12, they sailed for England.—N. Y. Times, Jl 6-13, 1876.

Castle Garden, used as an immigrant station, and containing baggage-rooms, sleeping-rooms, telegraph-offices, post-office, etc., is almost completely gutted by fire. The custom-house and the large office, close to the water's edge, are also burned.—N. Y. Tribune, Jl 10, Jl 11, 1876; N. Y. Times, Jl 10 and 11, 1876; L. M. R. K., III: 953. See S 15.

The French residents of New York present to the city a statue of Lafayette, executed by Bartholdi. It is placed in Union Square between the statues of Washington and Lincoln, and unveiled Sept. 6.—N. Y. Times, S 6 and 7, 1876; N. Y. Herald, S 7, 1876; L. M. R. K., III: 964.

The work of repairing Castle Garden, after the recent fire (see Jl 9), is in progress.—N. Y. Herald, S 15, 1876.

The "carrier rope," to which is attached the first cable of the Brooklyn Bridge, is hauled into position.—N. Y. Herald, S 15-16, 1876; descript. of Pl. 155-c, III: 798. See My 24, 1883, for account of the entire work of building the bridge.

The centennial anniversary of the battle of Harlem Heights is celebrated under the auspices of the N. Y. Hist. Society on the historic ground lying between 110th and 125th Sts., Ninth and Tenth Aves. Hon. John Jay (grandson of Chief-Justice Jay) delivered the oration.—N. Y. Times, S 17, 1876.

Prof. Huxley begins a series of lectures at Chickering Hall on "The Theory of Evolution."—N. Y. Times, S 19, 1876. See also ibid., S 21, 23, 24, 1876.

The great explosion takes place to remove the reefs at Hallett's Point (Astoria) which have obstructed the channel at Hell Gate.—N. Y. Herald, S 10, 15-25, 1876. Surveys were made in 1848 by Lieut. Commodore Davis and Porter, by which a complete knowledge of the hydrography of the pass was obtained, and in 1851 a system of surface blasting was commenced by M. Maillier on the following named rocks, which included some in the lower East River. A table of operations and results of that work was prepared by Gen. John H. Newton, of the Corps of Engineers, U. S. Army, who conducted the operations for clearing away the obstructions at Hell Gate, and was published in ibid., S 16, 1876. It showed the early operations on Pot Rock, Frying Pan, Way's Reef, Shell-
1876.

Drake, Baldheaded Billy, Hoyt's Rock, Diamond Reef, and Hal-lette's Point. The result of the surface blasting was insignificant, and in 1866 Gen. Newton took charge of the operations, and by the aid of drill stone and other apparatus he succeeded in partly removing Diamond Reef, near the entrance of the East River; Counties Reef; the Frying Pan Rock, in Hell Gate; the Pot Rock, in the same channel, and Way's Reef, near Halliett's Point. The chief danger to the navigation of the eastern channel of Hell Gate was presented by the great projecting ledge of stratified rock known as Halliett's Point Reef, which projected into East River in a northeasterly direction.—Ibid., p. 146, 1876. A description of this tunneling of this rock, and the method of making a simultaneous blast of nitro-glycerin, was described in ibid., S 16, 17, 18, 19, 20-24, 1876. Gen. Newton explained in the Herald of Sept. 22, that Monday was chosen for the final explosion from "shelter necessity,"—so that lines of guard boats could be placed around the point at a distance of 600 feet when river traffic was suspended. Guard boats were to be stationed across the East River at the head of Blackwell's Island and at the southwest point of Ward's Island; also west of the Great and Little Mill reefs. A map of Hell Gate was published in ibid., S 24, and the explosion itself described in ibid., S 25, 1876. The water-way was thereupon named Newton's Channel.—Ibid., S 27, 1876. Work on Flood Rock, which had been begun in 1875 and was interrupted, was resumed in 1876. The improvement accomplished by this "first attempt to remove the ob-structions to navigation in the Hell Gate channel by the destruct-100ion of Halliett's Point Reef" directed attention to the possibilities of developing New York's water front and wharves, the Harlem River, and its entrance.—Ibid., O 1, 1876. See also descript. of Pl. 82b, III: 534.

The uplifted hand of Bartholdi's statue of "Liberty" is on exhibition at Philadelphia.—N. Y. Times, S 25, 1876. It was after-wards set up in Madison Square on the site where later the Farragut statue was erected.—224 Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1917), 221. See Mr 3, 1877.

The statue of W. H. Seward, by Randolph Rogers, is unveiled in Madison Square.—N. Y. Herald, S 28, 1876; and see Cat. of Works of Art Belonging to the City, 142.

Oct.

The first sustained conversation by telephone is held, between Alexander G. Bell at Boston and his assistant Thomas A. Watson at Cambridge, a distance of about two miles.—Casson, Hist. of the Telephone, 48-49; Field, Hist. of Bell's Telephone, 6-9.

Nov.

Smith Ely, Democrat, is elected mayor of New York City.—N. Y. Times, N 7, 1876.

In the presidential election held on this day, Samuel J. Tilden, Democrat, on the face of the returns, defeated his Republican oppo-nent, Rutherford B. Hayes. The returns of four States, South Carolina, Florida, Louisiana, and Oregon, however, were disputed, and congress finally, on Jan. 29, 1877, passed the Electoral Count Act, referring all disputes to a commission of 15. This commission de-cided in favor of Henry of Oregon, and on March 3, he was declared elected by an electoral vote of 185 to 184 for Tilden. The country was in a turmoil from the time of the election until the decision was announced. Commenting on the result, Rhodes says: "The decision, though deemed a gross injustice by more than half of the country, was submitted without a suggestion of forcible resistance worth considering. The Democratic party in Congress and out of it and especially its Southern wing and Randall, the Speaker of the House, won for themselves the respect and admir-a tion of the country and of the world."—Hist. of U. S., VII: 206-85.

Robert Heller, magician, humorist, and musician (see 1864), opens the former Globe Theatre at 728-30 Broadway, calling it "Heller's Wonder Theatre." His entertainment consists of delight-of-hand tricks, musical numbers, and "second sight" feats. He has the co-operation of Miss Heller, "who sits blinded and named, with almost unfailing accuracy, a hundred articles of dress, kc., shown to Mr. Heller while he rambles among the spectators."—Ibid., N 16, 1876. See also ibid., D 26, 1876. Heller re-main ed here until May 31, 1877.—Brown, II: 394. On April 30, 1877, he introduced "A Dark Séance in a New Light," in which startling manifestations, which would have been accepted as the productions of spiritual agents by believers in spiritualism, were carried on in the lighted auditorium.—N. Y. Times, My 1, 1877. These "second sight" séances created much wonder and interest.—Ibid., My 23, 1877.

The statue of Daniel Webster, by Thomas Ball is unveiled in Central Park, and given to the city by Gordon W. Burnham. It Nov. stands at the south-west corner of the lake opposite the 72d St. 25 entrance.—N. Y. Times, N 26, 1876. See also Cat. of Works of Art Belonging to the City.

In this year, Martha J. Lamb's History of the City of New York was published in two volumes. It had already appeared in parts, sold by subscription. It was the most readable and accurate history of New York which had been published. Mrs. Lamb's work as New York's historiographer continued in the pages of the Magazine of American History, of which she was owner and editor. Her editorial office at that time was her private library in the Coleman House, at the s. w. cor. of Broadway and 27th St., where she resided. In 1876 (q. v.), Mrs. Burton Harrison published a supplementary third volume of Mrs. Lamb's history.

In this year, the Magazine of American History made its first appearance.—North, 299. Mrs. Martha J. Lamb was its founder. The N. Y. H. S. owns a portrait of Mrs. Lamb in her study.

In this year, Puck, a weekly magazine of humour, was founded.—North, Newspaper and Periodical Press, 299.

From 1877 to 1881, H. Creswell Tuttle published, in 3 vols. Abstracts of farm titles in the city of New York, between 39th and 100th St., and between 1st and 11th Ave. This work is a résumé of the Common Lands, excepting Glass house farm, with maps. (This title is a composite of three of the volumes.) The work is based upon original records and maps in the New York County register's office, and in the land office, Albany.

"The number of fires in 1877 was 1,457, as compared with 1,344 in 1876... The loss by fires in 1877 was $2,479,682, as com-pared with $1,717,496 in 1876."—M. Y. Times, Ja 4, 1878.

The portrait of Alexander Hamilton painted for the citizens of New York by Trumbull in 1792 at this time hung in the hall of the Chamber of Commerce.—Mag, of Am. Hist., I: 127. The vicesitutes of this portrait, attending the Chamber's various re-movals, are described in Portrait Gallery of the Chamber of Com-merce (1896), where it is listed No. 25, and has a permanent place in this year, the Great Metropolitan Railway Co. succeeded to the rights and powers of the New York City Central Underground Railway Co., pursuant to chap. 493 of the laws of 1874, and chap. 446, laws of 1876. This company continued the attempts to secure ways and means for establishing a subway system of railroads in New York.—The Great Metropolitan Railway Co. of N. Y., pam-phlet with map, by O. Vandenburgh. 1876. See D 22.

A "patent concrete pavement" had been tested without suc-cess on Fifth Ave., in front of the Worth monument, for a year or two up to 1877. In 1878, the commissioner of public works stated in his report that if the durability of asphalt pavements could be proved it might "yet he found serviceable in certain localities." He had tested asphalt block pavement in Hanover St., between Wall St. and Hanover Square. The "patent" pavements, which had proved failures, were, he said, "the fraudulent jobs of the infamous cahal which ruled this city within the past four years, loaded it with debt, and robbed its treasury."—N. Y. Tribune, Ag 10, 1877; ibid., Ag 20, 1878; and Message of Mayor Ely, Ja 7, 1878.

The Lenox Library (see 1871), on Fifth Ave., between 70th and 71st Sts., was completed in this year from designs by Richard M. Hunt.—5th Ann. Rep., Trustees of Lenox Library (1877); Lossing, Hist. of N. Y. City, II: 323-34. It was demolished in 1912, and the house of Henry C. Frick was built on the site.—L. M. R. K., III: 956.

The General Society of Mechanics and Tradersmen erects a four-storey building at 16-18 1st St., which becomes the home of the society instead of at 472 Broadway. It was formally opened as the new Mechanics' Hall, on Jan. 2, 1878.—Annals of the Soc. (1882), 201.

In this year, Alfred T. White of Brooklyn built the so-called "Home Buildings" for working people, upon plans similar to those of Sir Sidney Waterlor's Industrial Dwellings Co. of London. In 1878, Mr. White erected, directly opposite, an entire block of similar model tenements with a large park or courtyard in the centre.—De Forest & Veiller, The Tenement House Problem, 97.

In this year, the double house at 7 East 15th St., sold in 1875 to James Stokes and Morris K. Jenup, was transferred to the Y. W. C. A., which occupied it until June, 1917.—Description of Pl.
1966

THE ICONOGRAPHY OF MANHATTAN ISLAND

1877

Jan.

In this month, Thos. A. Edison received the first patent for a phonograph. The imprints were taken on tin-foil, which was a rather unsatisfactory medium. Edison later invented the wax cylinder or disk, which permitted permanent records.—Encyclop. Brit., XXI: 467.

1 Queen Victoria is officially proclaimed "Empress of India."—Hazen, Europe since 1815 (1910), 588-99.

2 A meeting of distinguished men was held at the Century Club to take measures for raising money for the reception of the statue of "Hercy."—Am. Conserv. Win. M. Evarts is authorized to appoint a committee of 20 to solicit subscriptions. Auguste Bartholdi makes a short address.—N. Y. Times, Js 3, 1877. The committee appointed included Edwin D. Morgan, John Jay, Wm. Cullen Bryant, Parke Godwin, Theodore Roosevelt, Frederick R. Coudert, and Anson Phelps Stokes. On Feb. 5, they issued an address to the people of the U. S.—Ibid., F 6, 1877. The sum necessary to provide the pedestal for the statue was raised by public subscription through the efforts of this committee and of Joseph Pulitzer of the World.—22d Ann. Rep., Am. Scien. Hist. Soc. (1917), 221.

Commodore Cornelius Vanderbilt dies at his residence, No. 10 Washington Place. On Jan. 7, he was buried in the Moravian churchyard near New Dorp, Staten Isd.—N. Y. Times, Js 5 and 8, 1877.

Feb.

1 The Russian corvette Croyser, the first vessel of the Russian fleet to arrive at New York, is anchored off the Battery.—N. T. Times, F 18, 1877. See Mr 23.

Pres. Grant having informed congress that "citizens of the French Republic propose to commemorate the one hundredth anniversary of our independence by erecting at their own cost a colossal bronze statue of 'Liberty enlightening the world' upon a pedestal of the same figure of granite to be built by private subscriptions upon one of the islands belonging to the United States in the harbor of New York," a joint resolution is passed by the senate and house of representatives authorizing the president to accept the statue, to designate either Governor's or Bedloe's Island as the site, and upon the completion of the statue to cause it to be dedicated with suitable ceremonies. He is also to make regulations "for its future maintenance as a beacon, and for the permanent care and preservation thereof as a monument of art, and of the continued good will of the great nation, which aided us in our struggle for freedom."—Laws of U. S., 44th cong., p. 410. An act was later passed leaving the choice of the island to Gen. Win. T. Sherman, who confirmed Bartholdi's selection of Bedloe's.—22d Ann. Rep., Am. Scien. Hist. Soc. (1917), 221. The statue was formally presented to the U. S. at Paris on July 4, 1877 (p. 408).

Rutherford B. Hayes is inaugurated as president of the U. S.—N. T. Times, Mr 6, 1877.

16 The New York Hospital in West 15th St. is formally opened.—N. T. Times, Mr 13 and 17, 1877; L. M. R. K., III: 955. See also illustration and description in Harper's Weekly, XXII: 267, 272.

A Russian squadron, composed of one frigate and two corvettes, arrives at New York and is received with naval honours by the U. S. war vessel "Pohatkan" (Admiral Rowan). The ships anchor in the Hudson under the Weehawken Bluffs. Grand Dukes Alexis and Constantine are among the arrivals.—N. Y. Times, Mr 24, 1877. On March 25, Admirals Boutkow and Rowan exchanged courtesies, the Russian being tendered the use of the Brooklyn Navy Yard, which the Americans lent to the Russians.—Ibid., Mr 25; also ibid., Mr 26 and Ap 8, 1877. On May 2, the members of the squadron, at the invitation of Mayor Ely, visited the institutions on Blackwell's Island.—Ibid., My 3, 1877. The squadron sailed on May 17.—Ibid., My 18, 1877.

Work is begun on the ground of Stewart's hotel for working women (later named the Park Avenue Hotel), on the west side of Fourth Ave. and 72d and 73d Sts.—N. Y. Times, Mr 27, 1877. See also ibid., N 12, 1877; and Harper's Weekly, XXII: 296, 297.

Apr.

A concert of piano selections is transmitted from Philadelphia, by electric wires, to Steinway Hall, New York, where it is enjoyed by a huge audience. The transmitting piano and the receiving board are the inventions of Prof. Elisha Gray, who explains their operation. Prof. Alexander Bell, the inventor of the telephone, is in the audience.—N. T. Times, Ap 3, 1877.

The N. Y. Elevated R. R. (see 1876) opens the extension of its Ninth Ave. line from Battery Place to South Ferry.—Rep. of Milton Courtwright, Chief Engineer of the N. Y. Elevated R. R., Je 1, 1877. See, further, Je 1.

The New York Petroleum Exchange is organized, at No. 80 Beaver St.—N. T. Times, Ap 14, 1877. It was formally opened on May 3, at Nos. 84 Beaver St. and 131 Pearl St.—Ibid., My 7, 1877.

The board of aldermen adopts a resolution changing the name of Chatham St. to Park Row.—N. Y. Times, Ap 20, 1877.

The news that Russia has declared war on Turkey causes "marked activity and excitement at the Produce Exchange." The grain trade is particularly brisk, and prices are advanced.—N. Y. Times, Ap 25, 1877. The excitement continued on April 25.—Ibid., Ap 25, 1877.

Samuel B. Ruggles, Wm. E. Dodge, Jr., John Jay Cisco, and their associates, are incorporated as "The Trustees of the Botanical Garden in the city of New York," and are authorized to establish, by public subscription, "a garden for the promotion of botanical science, and the improvement of horticulture." The garden is to be placed in any part of Manhattan Square, bounded by 79th and 81st Sts., Eighth and Ninth Aves., except such portions as are used by the Museum of Natural History.—Laws of N. Y. (1877), chap. 199.

Prof. Alexander Goddard of Boston exhibits his telephone to 200 invited guests at the St. Denis Hotel.—N. Y. Times, Mr 12, 1877. On May 17, he began a series of lectures on the subject at Chickering Hall.—Ibid., My 18-20, 1877.

Pres. Hayes visits New York for the first time since his election, and attends the 109th annual reunion and dinner of the Chamber of Commerce at Dehnonio's.—N. Y. Times, My 15, 1877. On May 15, an elaborate reception was held in his honour at the home of ex-Gov. Edwin D. Morgan, at which the Russian Grand Dukes Alexis and Constantine were also present.—Ibid., My 16, 1877. On May 16, he received the public at the city hall, shaking hands with a long line of people, lunched at the home of John Jacob Astor, and dined with ex-Gov. Morgan.—Ibid., My 17, 1877. He left the city on May 17.—Ibid., My 18, 1877.

The bronze statue of Fitz Greene Halleck in Central Park is unveiled by Pres. Hayes.—N. Y. Times, My 16, 1877. James Wilson Alexander MacDonald was the sculptor.—Cat. of Works of Art Belonging to the City.

Gen. U. S. Grant, with his wife and youngest son, sails from Philadelphia on a tour around the world. He was enthusiastically welcomed and entertained in every capital and important town in Europe, and then visited the Holy Land and countries of Asia and Japan. He landed at San Francisco in Sept., 1879, and started east across the continent, completing his circuit at Philadelphia.—Coolidge, Ulysses S. Grant, 354-359; Edmonds, Ulysses S. Grant, 317-21.

The N. Y. Elevated R. R. on Ninth Ave. is five miles in length. June

The double track from South Ferry to Central Park is not finished, 3 miles of single track, including the siding at 59th St., being necessary to complete it. The East Side extensions have not been built.—Rep. of Milton Courtwright, Chief Engineer of the N. Y. Elevated R. R., Je 1, 1877. See Ag, 1878.

The Society of American Artists is organized by Helena De Kay, Saint Gaudens, Wyatt Eaton, and Shirlaw at Miss De Kay's studio, to help the newer and younger artists, whom they feel have little chance of becoming established through the Academy of Design. The society opened its first exhibition, in the Kurtz Gallery with a membership of 22.—Lamb, 567 et seq. Among the members later were Abbey, Beckwith, Blashfield, Bridgman, Appleton Brown, Chase, Church, Duvenseck, Cox, Gay, Gifford, La Farge, Millet, Pearce, Picknell, Vedder, Vinton, and Welt.—King's Handbook (1893), 309.

The legislative authorities of the city of New York to acquire the permanent right to draw water from the available lakes and ponds in the Croton watershed.—Laws of N. Y. (1877), chap. 445. "Commissioners of Appraisal were appointed under this law on October 20, 1877, and the legal proceedings were commenced. Much opposition arose against these steps on the part of the owners, who demanded extravagant damages. This was especially the case at Lake Maloupar, where the claimants proceeded to fill up the outlet, which the Department of Public Works could only reopen by
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876-1909

1877
- See also L. M. R. K., III: 956. In the evening, the president was the guest of honour of the New England Society at Delmonico's. Secretary of State Wm. M. Evarts, Pres. Eliot of Harvard, Pres. Porter of Yale, and others were present.—Maurice, Fifth Avenue, 111-12.

1878
- In this year, Chas. F. Brush gave to the world the Brush electric arc light. It was first adopted by the municipality of Cleveland.—Scientific American, Je 5, 1878, p. 515.
- In this year, the manufacture of bicycles in America was begun, by A. A. Pope.—Encyclop. Brit., VII: 684.
- In this year, the College of Pharmacy purchased Grace Chapel at 209-211 East 23d St. and fitted it up for the use of the college. Subsequently the adjoining building on the east was connected with it.—Hist. of Columbia Univ., 420-21. In 1894, the college moved to its present building in West 68th St.—Eve. Post, D 28, 1894; Hist. of Columbia Univ., 418-21. See also My 31, 1884.
- In this year was published by J. B. Beers & Co. a coloured Map of different estates situated in the 22d ward between 42d and 59th streets, and the 6th avenue and Hudson river. [etc.] Taken from official documents. Compiled by Dr. Heinrich Windward. Correctly drawn and carefully reduced from the government survey of 1877, 1878, and 1879. 200 pp. See also New York in 1874, by Hon. John D. Townsend, 1900.
- An exhibition of Edison's "speaking and musical telephones and speaking phonograph" is held at Cooper Union.—N. Y. Tribune, D 14, 1877, and Ja 18, 1878. For a brief account of Edison about this time, see Stephen Fiske's Off-Hand Portraits of Prominent New Yorkers (1884), 108 et seq.
- The armory of the New York 25th St., is destroyed by fire, the regiment losing valuable documents, dating back many years; nothing was saved except the colours.—Grand Opening of the New Armony (1890), 26.

1879
- The Eagle Theatre (see O 18, 1875) is reopened by William Henderson as the Standard Theatre.—Brown, Hist. of the N. Y. Stage, III: 235-50. See Ja 15, 1879, and D 14, 1883.
- The 100th anniversary of the birth of Robert Emmet is commemorated at Chickerling Hall and at Emmet Hall in 33d St.—N. Y. Times, Mr 5, 1879.
- The work of tearing down the old buildings on the north side of Franklin St. to make room for the approach to the Brooklyn Bridge is begun. The buildings include the former residence of Mayor Harper and the "Old Anthony tan-yards," which are more than 100 years old.—N. Y. Times, Mr 6, 1879. See also Daily Graphic, Ji 28, 1880.
- The "Metropolitan Stock Exchange" has been organized by a number of persons "interested in stock speculations in a small way."—N. Y. Times, Mr 7, 1878.
- On this and succeeding days, the first part of the collection of Americanana of Mr. Geo. Brinton, J. Hartford, was sold by auction at the Clinton Hall sales-rooms by Geo. A. Leavitt & Co., auctioneers. The other parts of this great library were sold on March 22 et seq., 1880; Apr. 4 et seq., 1881; Nov. 15 et seq., 1886; and Apr. 18 et seq., 1893. There is a copy of the catalogue, in 5 vol., with an index vol. separate, in the N. Y. P. L.

1880
- The first train is run on the Gilbert Elevated road on Sixth Ave.—N. Y. Times, Ap 30, 1878. The line was opened to the public on June 5 (q.v.).
- The Bell Telephone Company of New York is organized with a capital of $1,000,000. The territory granted to this company was a circle of land sixty-six miles in diameter, with the City Hall as the centre. Also for good measure it received the whole of Monmouth County, N.J., and Long Island.—Leopold, Hist. of the City of N.' Y., 1609-1900, 465, 466. In 1880, this company became the Metropolitan Telephone Co., and in 1896 it was renamed the N. Y. Telephone Co.—Ibid., 466.
- The common council resolves that the new avenue west of Mt. Morris Square between 120th and 124th Sts. be called Mount
1880 Times, e( public elected Plans See art The the 3) a separate Treas. the Garden "The descrip. performed east square Oct. 189^, Railroad Oct. I LXI; — barge and will State Metropolitan city and department (1878), (pub. 12, 6 the work removed Fifth-avenue, Gilbert said building. to 67th avenue, of 1879, Feb. Rector said the location." to­ every­thing. that 42d avenue, of 1879, and the new 430, 15­th of 1879, and the new site. City and 49, See Je 6. Chamber of Commerce of the State of N. Y., Rapid Transit in N. Y. G. and in other Great Cities, 49. See Je 6. Chamber of the Gilbert Elevated R. Co. is changed to the Metropolitan Elevated R. Co. — Chamber of Commerce of the State of N. Y., Rapid Transit in N. Y. G. and in other Great Cities, 49—51.

Wm. Cullen Bryant dies at his residence, No. 24 W. 16th St.— N. Y. Times, Je 15-15, 1878.

The legislature authorizes the city to raise, by the creation of public stock, a sum not exceeding $50,000, which is to be used to "restore Tompkins square as a public park or square."— Laws of N. Y. (1878), chap. 411.

The board of aldermen cedes to the federal government a triangular piece of land at the battery for the purpose of a new barge office.— N. Y. Times, S 3, 5, 1878. See O 1.

The Third Ave. elevated railroad is opened from 42d (see Aug. 26) to 67th St.— Hist. of Real Estate in N. Y. City (pub. by Real Estate Record & Builder's Guide, 1894), 44. See D 9.

Gold reaches par in Wall St. for the first time since Jan. 13, 1862.— Harper's Cyclop. of U. S. Hist., Vol. IX.

The Third Ave. Elevated Railroad (see Ag. 26) is completed from 89th to 19th St.— Hist. of Real Estate in N. Y. City (pub. by Real Estate Record & Builder's Guide, 1894), 44. See D 30.

1879

In this year, Charles Stuart Parnell became the leader of the Home Rule Party, which demanded that Ireland have a separate parliament to manage its own affairs. Parnell adopted a policy of obstruction, seeking to prevent or delay all legislation until the Irish grievances were redressed.— Hazen, Europe since 1815, 497-99.

During the five years from 1875 to 1879 inclusive, 457, 666 alien immigrants landed at the port of New York.— Arrivals of Alien Passengers and Immigrants (Washington, 1891), 64, 183, 109.

Writing of the past and future development of New York City, Egbert L. Viele says: "The growth and development of this city are without a parallel and without a precedent. Its future has been often prophesied, but not always understood. . . . One thing is, however, certain, that the anticipations of the imaginative have always been more than realized while the prophecies of the doubtful have only been remembered for their failure."
The progressive growth of the city has been often capricious, so far as locality is concerned, but the important factor of topography has always asserted itself, in spite of all efforts to ignore it in the interests of individual projects. Going back to the early settlement of Dutch proprietary, we find the growth of the city progressing along the east side of the city, on the line of what is now Pearl street. The early occupation of that section was due to the fact that from the east side of the city, on account of the prevailing winds, sailing vessels may always be kept under way more readily than from the west side, where it is often impossible for a vessel to leave her berth without the aid of a big wind. When the English occupation took place the Dutch had already monopolized the east side of the city as far up as the 'Bouwerie' or Bowery.

The natural social and business antagonism between the Dutch and English necessitated the selection of a new locality on the part of the latter, and Broadway became the choice, where erected the English churches—Trinity and St. Paul—and here the English merchants built their residences and stores. The Dutch churches were in Fulton and Nassau streets, and as the religious element, especially in small communities, is always an important factor in social life, we find two distinct centres of civic progress developing themselves and maintained with great energy and determination for many years. The topographical advantages were, however, in favor of the English, and the building up of New York as the metropolis of New England took the centre of gravity of the city, and Broadway was the result.

But time and prosperity causing a rapid increase of population the city assumed a cosmopolitan character, local religious or social influences ceased to have the same force that they formerly exerted, and new influences arose to determine the direction and character of the city's growth. Yet no one anticipated then or for years afterward what the city might become. Yet the city has continued to grow, the centre of wholesale trade shifting from place to place as the city extended itself. This has been especially the case with the dry goods trade, which at one time centred itself in Pearl street, in the old homes of the Dutch, shifting thence to lower Broadway, afterward occupying the streets running from that thoroughfare on the west side, most of which were widened from 20 to 40 feet, to make accommodations for this rapidly increasing trade, and were lined with fine marble buildings, soon, however, to be abandoned for Church street, middle Broadway and the streets connecting them, where it now rests for a season.

Other lines of trade have apparently followed in the wake, and occupied the localities deserted by the jobbing trade, leaving no vacancies, but filling up, as it were, the interstices as fast as they were vacated, and the very force of this business the dry goods traders have always led the way. On the other hand, in the development of the area appropriated for the purposes of residences the governing elements have been of an entirely different character. Take, for instance, Second avenue. An extensive tract in this locality belonged to the heirs of the Stuyvesant estate, many of whom had sufficient means to erect expensive structures for their own residences and encouraged others to do the same in their vicinity. The consequence was that for a time many first class improvements were made in the neighborhood of Stuyvesant square and along that region of the avenue alluded to. Again, St. Mark's Place was selected by an enterprising citizen as an exclusive faubourg, but it proved a mere halting place of fashion. Bond street was another effort, where enough gentlemen of taste and means established themselves to render the entire street an exclusive precinct for a decade or more, but its glory has long since faded.

Some thirty years ago the movement in Fifth avenue was initiated, and it has held its own with a growth above and a decay below from that time to the present day. This fine avenue has now become thoroughly invaded, from Washington Square almost to the Central Park, with fancy shops, jewellers, hotels and boarding-houses, and its exclusiveness has vanished forever. Murray hill, the line of which it crosses, was for a considerable time regarded as the synonyme of fashion, but in time it will be more strictly synonymous with shabby gentility. Fifth avenue northward is limited to the east side of the Park, and has a 'jumping off' place at the 34th Street, the Washington Square Park being the limit of availability. Madison avenue has to some extent usurped the place of Fifth avenue, due in large measure to the convenience afforded originally by the extension of the Fourth avenue surface road into that avenue.

"Lenox Hill, on the line of Fifth and Madison avenues, from the very nature of its elevated position affords very attractive building sites, which the large and opulent class of our Hebrew fellow-citizens have not been slow to appreciate."

"In fact, as this favored territory is really limited by the sudden descent into Harlem flats at 100th street, it is very doubtful whether it will be sufficient even to accommodate all of that faith who are likely to erect here their 'lares and penates.' The inquiry naturally presents itself, where, then, shall the growth of the city thus limited and circumscribed in the channels it has provided for three decades be now directed?"

"The conclusion is inescapable that the section of the city that has been held in reserve until the time when the progress of wealth and refinement shall have attained that period of development when our citizens can appreciate and are ready to take advantage of the situation, is the section that is to be the most favored and the most sought after. At an expense unparalleled except in the lavish periods of imperial oppression the west end plateau, extending from the Central Park to the North River, has been laid out and ornamented with a series of magnificent avenues not excelled by any other city in the world. Moreover, this entire region combines in its general aspect all that is magnificent in the leading capitals of Europe. In our Central Park we have the fine Prater of Vienna, in our grand boulevard the rival of the Via Philippa of Paris, in the avenue of Palms the Avenues of Madrid, and the equivalent of the Chiaja of Naples and the Corso of Rome, while the beautiful 'Unter den Linden,' of Berlin, and the finest portions of the West End of London are reproduced again and again."

"Originally the highest portions of the 'backbone' of the island were rough and unsightly rocky eminences alternated with intervening valleys. By a process of uniform grading these have been transformed into a generally level plateau from seventy-five to a hundred feet above the river. On the east the Central Park, with all its luxurious beauty, stretches out its long line of trees and shrubs. On the west the stately Hudson thunders the foot of the green slope in which it terminates, while, from the splendid avenue on the west above, this beautiful sheet of water, which in former times was the life of sail and steamer, is viewed for more than three miles of drive and promenade. On the south the busy city stretches out from below the Park, and on the north the Boulevard extends its length away into the picturesque and inviting region of Fort Washington, with the Morning Side Park on the east to break the view of Harlem Plains while Long Island Sound and its beautiful islands are seen in the distance."

"... It is believed that the density of the future population of the east side will exceed anything now conceived of. With the improvement of the Harlem River, soon to be accomplished, a cordon of business and second-class dwellings will be drawn closely around that side which can by no possibility invade the west end plateau. The business capacity of the Harlem River is yet to be developed... We are soon to realize the fact that this fine river is the proper terminus of the Erie Canal. When the contemplated improvements of this river are completed a commercial channel will be opened that will render unnecessary the transportation of the canal freight the entire length of the island and around the Battery, to interfere with the shipping and the ferries. It will, instead of making this long detour, be discharged into warehouses and elevators on the Harlem River and at Port Morris, whence the foreign shipping can receive it. The grain and lumber trade of the city will centre here, and a large amount of business, now crowded into the lower end of the island, will be transacted at this point. The facilities offered by the rapid transit railways have made all this not only possible, but certain."

"Overlooking the whole of this vast and accumulating traffic and commerce, but separated from it forever by topographical lines as clearly defined and obstructive as the bastions that surround the fashionable residences of the Viennese, the west end plateau will undoubtedly always be held intact for the development of a higher order of domestic architecture than it has been the good fortune of New York hitherto to possess."

"The plans of improvement at the west end that have now been completed, afford the opportunity for that change in style of house construction that has so long been a desideratum with us... The territory at the west side is so admirably divided
1879 up by the broad boulevard through the centre, the open space of Central Park on the east and the Riverside Park on the west—that the interminable vistas of brown stone that characterize the rest of the city are impossible, while unexampled facilities are supplied for the erection of elegant homes that will do credit to taste and comfort and facility a home in this vicinity can be reached, and as these roads will be running through the west end this spring a decided movement has already begun, and building operations on an extensive scale have been commenced. Some fine private residences will also be erected this spring on the uninvaded Riverside area. This splendid avenue is to be fully completed and opened during the coming season. Visitors to the "World’s Exhibition" in the Central Park, in 1888, will probably find the entire region, westward to the river, built up in a manner consistent with the surrounding public improvements.

"If there appears to be the least exaggeration in this statement, let us reflect for a moment on the striking fact, that with the exception of the immediate vicinity of the General Post Office and part of Madison Square, there is no spot in the city where a larger number of people can be concentrated, in the closest space of time, with the readiest means of locomotion than 'The Circle' at the eighth avenue and Fifty-ninth street entrance of the Central Park, and yet, in ignorance of this fact, this point is probably regarded by nine-tenths of our citizens as comparatively isolated. The Elevated railways, which in this immediate vicinity come together and meet eight lines of surface railways, have accomplished this result. While the triangle between St. Paul’s and the Post Office, will be for many years to come what it now is, the most active focus of the business portion of the city, The Circle' has been made, by the facilities for locomotion afforded at that point, the chief centre of social life.

'The Metropolitan Elevated Railroad has, in point of fact, by its Fifty-third street reach, converted the upper portion of Ninth avenue, into the northerly extension of the Sixth, and the Park front of Eighth avenue has by the same process of transformation been brought into line with that part of the Fifth below the Park. This is one of the rapid transit revolutions, which it is impossible to keep pace with."—Viele, The West End Plateau of the City of N. Y. (1879).

At this time, on Gracie’s Point or Horen’s Hook, on the East River, there stood an enormous tree, towering above the bluff. "This tree, a noble specimen of the Balsam Poplar, or Cotton tree species (Tachamaca Populus Balsamifera), is nearly, or quite [in 1879] two centuries old, and probably the largest on New York Island. It measures fourteen feet in circumference, taken at a height of thirty-six inches from the ground. Its branches begin at not less than thirty feet from the ground and spread into an enormous dome. Yet so full the tree and so perfect its symmetry, that at a short distance its size and height do not strike the eye."—Mag. of Am. Hist., III: 691-92 (Nov., 1879).

In this year, the New York Free Circulating Library was established by private enterprise.—N. Y. P. Lib. Bull. (1879), 216. In 1901, it was merged with the New York Public Library.—Ibid. (1917), 236. See My 4, 1880.

In this year, the Calumet Club was organized "for the men whom the limit of membership and the long waiting list keep out of the Union." It was incorporated in 1891 and had its headquarters at No. 267 Fifth Ave.—King’s Handbook (1893), 246-47.

In this year, Bradstreet’s was founded.—King’s Handbook (1893), 630.

In this year, The Dramatic Mirror was established, under the editorship of Harrison Grey Fiske.—King’s Handbook (1893), 626.

In this year was published in Brooklyn an Historical sketch of the Fulton Ferry, and its associated ferries, by a Director (Hy E. Pierrepoint).

In this year, a competition, instituted by Henry C. Meyer, editor of the Sanitary Engineer, D. Willis James, F. B. Thurber, Henry E. Pellew, and Robert Gordon, was held for the best architectural designs for a tenement-house on a city lot 25 x 100. Two hundred and six plans were sent in from all parts of the United States, Canada, and Great Britain, and the first prize was awarded to James E. Ware for his "Dumb-bell Plan," so called because the outline of the building is tapered in the middle like the handle of a dumb-bell. Though the award was severely criticized, this type of building multiplied all over the city. It produced the evil of the narrow air-shaft, and by 1900 had come to be considered one of the worst types of tenement designs ever devised.—De Forest & Veiller, The Tenement House Problem, 100-2.

In this year, Columbia College erected a new building at 49th St. and Madison Ave., naming it Hamilton Hall.—Hist. of Columbia Univ., 144.

During this year, the Ninth Ave. elevated line was entirely rebuilt, the Chatham Sq. branch was extended, a branch was constructed from Third Ave. to the 34th St. ferry, new stations were built, and nearly all the old stations were enlarged and improved.—Rep. of the Special Comm. on R. R., Appointed . . . to Investigate Alleged Abuses in the Management of R. B. (Albany, 1850); Statutes and Docs. Affecting the Elevated Railways in the City of N. Y. (1866-1882).

In this year, Wm. J. Taylor made a lithographic map of New York City showing in detail almost every building on Manhattan Island and containing, besides, a list of the leading hotels, schools, theatres, public buildings, piers, ferries, etc., and small inset views of one hundred places of interest. It is reproduced and described as PL 154, Vol. III.

In this year, Geo. W. Bromley & Co. published an atlas of the city of New York in one volume, showing all the principal buildings, including hotels, factories, schools, theatres, etc., by ground-plan outline and name; also block and lot measurements, car-lines (distinguishing steam railroads and street railways); original farm lines, old roads, water-courses, and estates; ward boundaries, fire- hydrants. Like the Pierce maps (see 1852), this atlas reveals the northern extent of the built-up portion of the island. Bromley's partner, E. Robinson, published a similar map for the year 1885 (g. 2.).

In this year, Jas. R. Croes published Additions and revisions of the west side atlas, to Oct. 1, 1879, in 3 sheets, folio. Cf. the Croes & Van Winkle map of 1874.

In this year, Progress and Poverty, by Henry George, appeared.—Encyclop. Brit., XI: 747. See also Sullivan, Our Times (1856), I: 175-76.

The U. S. government resumes specie payments after 17 years of suspension.—Rhodes, Hist. of U. S., VIII: 97 et seq.

Jan. 9th, a great fever and diphtheria epidemic begins.—N. Y. Times, Jan. 13, 3, and 5, 1879. See also ibid., Jan. 15 and 19, 1879.

A disastrous fire in the heart of the dry goods district destroys the building comprising Nos. 62 and 64 Worth St. and Nos. 70 and 72 Thomas St. and badly damages the adjoining property. Losses amount to nearly $3,500,000.—N. Y. Times, Jan. 18 and 19, 1879.

Marshall MacMahon resigns the presidency of France, and Jules Grévy is elected in his place.—Hazen, Europe since 1815, 350-51.

The new capital at Albany is formally dedicated.—N. Y. Times, Feb. 12, 1879.

This day having been set aside as "Tenement House Sunday," through the efforts of the State Charities Aid Association, the leading clergymen of the city preach upon the evils of the tenement-house system and the need for reform.—De Forest & Veiller, The Tenement House Problem, 98.

A great public meeting, called by the State Charities Aid Association, held at Cooper Union to devise measures to carry tenement-house reform into effect. A committee known as the "Mayor’s Committee" is appointed by Mayor Cooper, consisting of D. Willis James, Frederick W. Stevens, W. W. Astor, Cornelius Vanderbilt, R. T. Auchmuty, James Gallatin, Henry E. Pellew, F. D. Tappen, and C. P. Daly. The committee reported on March 25 recommending the formation of a company to build model tenements similar to those of Alfred E. White (see 1877) and proposing radical changes in the existing tenement-house law. The Improved
Dwellings Association was organized as a result of these recommendations and erected a group of buildings on First Ave., between 141-42. Fort resident yellow organized. — dedicated 15, 17

Mar.

In this month, the first New York telephone exchange was opened, by the Bell Company at 52 Nassau St. “Subscribers were charged $60 a year, and later $120 a year, and given one month’s free trial. The first telephone directory was a small card, showing 252 names; and the first switchboards held a dozen wires apiece.” — Leonard, Hist. of the City of N. Y., 1699–1909, 463–65. See Oct 23, 1878.

Delmonico’s old building at the corner of Fifth Ave. and 14th St. (see Ap 9, 1862), formerly the Moses H. Grinnell mansion, has just been demolished.—N. Y. Times, Mr 23, 1879.

Apr.

The common council is authorized to direct the department of parks “to complete the restoration of Tompkins Square as a public park or square” (see Je 3, 1868). A sum not exceeding $25,000 may be raised by the issuance of public stock, for this purpose.—Laws of N. Y. (1879), chap. 177. See, further, S 4.

The theatre on the south side of West 24th St., next to the Fifth Ave. Hotel, which has undergone several changes in name and management since 1865, comes under the management of Mr. Macdonald as the Madison Square Theatre.—Brown, II: 415; L. R. M. K., III: 983. See, further, F 4, 1880.

May

“Gilmore’s Garden [on the block bounded by Madison and Fourth Aves., 26th to 27th Sts.] will hereafter be known as the ‘Madison-Square Garden.’ . . . The place will be transformed into a garden, with w inding gravel walks nearly a mile long, through flower beds, shrubbery, and palm trees. The gas jets are to give way to the London Electric Light Company’s apparatus. They promise to light the garden with electricity successfully, and at a cost less by $100 than is now paid for gas.”—N. Y. Times, My 22, 1879; L. M. R. K., III: 984.

St. Patrick’s Cathedral is dedicated with impressive services by Cardinal McGucken before an immense crowd of people.—N. Y. Times, My 26, 1879; Parley, Hist. of St. Patrick’s Cathedral, 123, 172. The cathedral is fully described in the Times, My 18, 1879. See also L. M. R. K., III: 976.

The Madison Square Garden (see My 22) is opened for the first of a series of summer-night concerts.—N. Y. Times, Je 1, 1879. See also ibid., D 17 and 25, 1879. See, further, Ap 21, 1880.

June

A ferry is established from the foot of 129th St., north River, to 13th St., L. N., Ord, etc. App’d by Mayor, XLVII: 120; L. M. R. K., III: 942.

As a result of the agitation following the efforts of the State Charities Aid Society (see F 28), the law of May 14, 1877 (p.v.), regulating tenement- and lodging-houses, is amended by the legislature. The new law—the second tenement-house law passed in New York—provides, among other things, that no new tenement shall occupy more than 66% of a lot, that, to prevent overcrowding, there shall be at least 600 cu. ft. of air space per person in every room, and that there shall be a resident janitor, at the discretion of the board of health, in a tenement-house occupied by more than ten families. The law also establishes 30 sanitary policemen under the supervision of the board of health and creates a tenement-house fund of $10,000 to be spent annually for sanitary inspection.—Laws of N. Y., 1878-79, ch 391; De Forest & Veiller, The Tenement House Problem, 99–100. For tenement-house plans approved by the board of health under the law of 1879, see Gould, The Housing of the Working People (1895), plans No. 7–12. See, further, Je 2, 1884.

July

The board of aldermen resolves that the street between the southern end of City Hall Park and the post-office, extending from Park St. to Market St., be designated as Mail St.—Proc., Bd. of Ald., CLIII: 456; CVL: 156.

15

The Duke of Argyll and his daughters, Lady Elizabeth and Lady Mary Campbell, arrive at New York from Newport and stop at the Brevoort House. On July 16, they sailed for Europe.—N. Y. Times, Ji 16 and 17, 1879.

Sept.

The Republicans of the City of New York is organized. — It was incorporated on May 25, 1888. For several years it had rooms at various places, and, on March 10, 1888, opened its first club-house at 52 W. 28th St. The second club-house was opened on May 21, 1888, at 440 Fifth Ave.—Club Book (1889). The club is now at 44–46 W. 40th St.

The completion of the improvements in Tompkins Square Park (see Ap 16) is celebrated with music and speeches.—N. Y. Times, S 3, 1879. See L. M. R. K., III: 971; also My 19, 1880.

About this time, granting of British soldiers were dug up at the north-west corner of Lexington Ave. and 104th St. It is said that “all the space on the west side of Lexington avenue, between 104th and 105th Streets was a military graveyard during the British occupation.” The house occupied by H. P. McGowan, which stands on the south side of 106th St., between Third and Lexington Aves., was a military hospital.—Mag. of Am. Hist., IV: 245.

The New York (or Bowery) Theatre at 46–48 Bowery is re-opened as the Thalia Theatre for German drama.—Brown, Hist. of N. Y. Stage, I: 164; L. M. R. K., III: 983; descrip. of Pl. 102-b, III: 604. See, further, Mr 30, 1892.

The building on the west side of Broadway, just below 50th St., hitherto successively known as Baynard’s Museum, Wood’s Museum and Metropolitan Theatre, and the Broadway Theatre, is opened under the management of Augustine Daly, and called Daly’s Theatre.—Brown, II: 532–545; L. M. R. K., III: 983. For the next 20 years, Daly’s was famous both nationally and internationally for the excellence of its stock company and its elaborate production of Shakespearean plays. In 1920, the historic house was torn down and an eight-story business building erected on the site.—N. Y. Times, Ji 3 and 11, 1920; N. Y. Sun, Ji 28, 1920.

The Chamber of Commerce appoints a committee to solicit contributions for the sufferers in Memphis, Tenn., where a yellow fever epidemic is raging. More than $11,000 was forwarded from New York City.—N. Y. Times, S 19, 20, 23, 25, 27, O 7, 15, and 21, 1879.

The lines of the Metropolitan Elevated Railway Co. (formerly the Gilbert Co.) and of the N. Y. Elevated Co. are leased by the Manhattan Railway Co. (see N 10, 1879) for 999 years.—Chamber of Commerce of the State of N. Y., Rapid Transit in N. Y. City and in Other Great Cities, 49. See O 22, 1881.

Austria and Germany enter into a defensive alliance.—Hazen, Ethnic Relations, 1815, 319–21; Ward, Germany, I: 141–42. See My 20, 1882.

Thos. A. Edison perfects the first incandescent lamp.—N. Y. Times, Mr 22, 1879.

The “Open Board of Brokers,” a new rival to the Stock Exchange, is formally organized.—N. Y. Times, O 28, 1879. It opened for business on Nov. 5, in the old post-office building.—Pl 147, 1879.

The Chapel of St. Chrysostom, built by Trinity corporation at the corner of Seventh Ave. and 39th St., is consecrated by Bishop Potter.—N. Y. Times, O 31, 1879; Trinity Church Bi-centennial Celebration, May 5th, 1879, 37 and view.

Arthur Sullivan and W. S. Gilbert, authors of “H. M. S. Pinafore,” arrive at New York.—N. Y. Times, N 6, 1879. On Nov. 8, a reception in their honour was held at the Lotos Club.—Ibid., N 9, 1879.

A great fire is opened by the Seventh Regiment in its new armory at Park Ave. and 66th St., to raise funds to complete and furnish the armory. Mayor Cooper presides, George Wm. Curtis delivers the principal address, and Pres. Hayes officially opens the fair. It continued until Dec. 6, and the net receipts were $160,540. During the fair, a daily journal called The Knapsack was published, containing the news of the fair and contributions from distinguished persons.—Clark, Hist. of the Seventh Regt., II: 274–84. There is complete file of The Knapsack in the N. Y. P. L.

George Augustus Salis, an English journalist, writing about the changes in New York since his last visit, in 1863–64, says: “I declare that when, with no knowledge of the machinations of Prince Bismarck to evacuate Hol- land, and had suddenly colonized the puzzling of Paradise-street, Liverpool, which by some preternatural means or other had been transported across the Atlantic. The Modern City and Island: 1876–1909 1971
The little red-brick houses, the high 'stoops' or flights of wooden steps in front, the gay 'boujous' shutters, the handicrafts and shop business carried on in cellars, the amount of mopping, and scrubbing, and scouring gone on, the endless procession of open drays full of corpulent little legs presumably full of schism, all at first bespeak the neighbourhood of Amsterdam, Rotterdam, or the Hague, but by the time the noise dies down, I began to realize the fact that I had reached the only country which as yet possesses that not very artistick-looking but still distinctly beneficial institution, an 'Elevated Railroad'—America...

"I am free, indeed, to confess that, as an old wrestler with wild beasts at Ephesus, and an inveterate grumbler, grievance-monger, and yet, up to this time, the most consistently indulged in and appointed with the coldness, almost amounting to indifference, with which Americans of culture seem to be treating things in general. People talk freely enough about 'H. M. S. Pinafore,' the musical genius of Mr. Arthur Sullivan, the wit and humour of Mr. W. S. Gilbert, and the talent and bonhomie of Mr. Frederick Clay, all of whom are at present among the choicest lions of New York fashionable society, and the 'Princess Toto' they talk about, the millions of dollars which Mr. James R. Keene is reported to be continually making in Wall-street speculations; Mr. Mapleson's opera coming is frequently discussed; people of culture and people who are 'intime' discourse concerning Mr. E. Burne-Jones's pictures or Mr. Whistler's etchings; but they have nothing to say on the Eastern Question, and even the Nicaraguan Canal, Chinese cheongsam, the Customs Tariff, the chances of General Grant as a candidate at the next Presidential Election, Mormon polygamy, and the expediency of the gradual withdrawal of greenbacks from circulation fail... to excite anything beyond the most languid amount of interest.

"As for the Rebellion, as for the greatest and most momentous Civil War that modern times have seen, it is never made a subject of conversation in polite society...

"Thus, having traversed in imagination Holland, North Germany, and Ireland, I arrived at length at my destination, the Brevoort House, an hotel situated in a region to which I hesitate to assign a parallel in the way of locality. The truth would seem to be that within the last sixteen years the city of New York has become not only structurally but socially transformed, and that the Brevoort, although as comfortable and as aristocratically frequented as ever, is no longer situated in a fashionable quarter. The Brevoort—it must be told in Gath—is now 'down town'...

"When I came here first, Twenty-fifth-street was accounted as being sufficiently far 'up town,' and Forty-fifth-street was Ultima Thule. Beyond that the course of town lots planed out and presently petered out. No Grand Tombs were there, no imposing boulders of the living rock having weird graffiti eulogistic of the virtues of Drakes's Plantation Bitters, the Night Blooming Cereus, the Balm of a Thousand Flowers, and Old Dr. Jacob Townsend's Sarasparrilla. What has become of these strange stencillings on the living rock? Where I remember wildernesses I behold now terraces after terraces of lordly mansions of brown stone, some 'with marble façades,' others wholly of pure white marble, gleaming like the product of Carrara in the clear blue sky, and lacking only a few palm trees and orange groves to surpass in beauty the villas of the Promenade des Anglais at Nice. Unless my friends in New York are laughing at me, this state of things architectural goes on up to One Hundred and Ninetieth-street... the growth of young Manhattan, as it must much more astonishing than our own metropolitan transformation. Growing London absorbs suburbs, villages, and towns. Growing New York has had nothing to absorb but the open."

Henry A. Holmes, LL. D., of the State Library, Albany, reads an address before the Albany Institute, entitled The Correct Arms of the State of New York as established by law since March 16, 1787 (Albany, 1880). The subject was investigated by a senate commission, which later published: Report of the Commissioners of the Correct Arms of the State of New York, with Appendices: Letter of H. A. Holmes to the Commissioners, Transmitted to the Senate April 13, 1881 (Albany, 1882). Mr. Holmes read a second paper before the Albany Institute, May 24, 1882 (Albany, 1883). The inquiry led to the act of May 20, 1882 (4 v.). The device of the arms of the state, as adopted March 16, 1787 (5 v.), is correctly described in the Laws of N. Y. (1894), chap. 678, §40.

2

George A. Sala (see Dr) writes: "On the whole there seems to be far less social friction in modern New York life than is the case on our side. People here do not trouble themselves much about things calculated to arouse embittered controversy; and in the present the and it was in this way that the former closely resemble the Viennese. La Bagatelle appears for the moment to be triumphant. There are a multitude of cheap and well-managed theatres open, playing mainly the most frivolous and nonsensical pieces it is possible to conceive; and they are all crowded nightly. How many tens of thousands of dollars a week Mr. Delmonico is clearing I do not know, but his palatial establishment, as well as scores of the restaurants and cafes, continues to overflow with guests."

"When I was here last the fashionable or 'uptown' Delmonico occupied a large building at the corner of East Fourteenth-street, and Fifth-avenue. But East Fourteenth-street is now 'down town' and the existing Palazzo Delmonico fronts Broadway, Fifth-avenue, and Twenty-sixth-street. The furniture and hangings are splendid, but very quiet and refined. The establishment comprises an immense café, and a public restaurant of equal dimensions, while on the second floor... there are first a magnificent saloon which can be used as a ball room or as a dining hall, and next a series of handsome private rooms for select dinner parties; on the upper floors are a limited number of furnished apartments for gentlemen..."

"Next in renown to Delmonico's is that of the Hotel Brunswick [on the n. e. corner of Fifth Ave. and 26th St.]... The Brunswick presents an additional attraction of a large garden in the rear; and here, in summer, meals are served under a canopy awning..."

"...I suppose that luxurious life in New York is at the present moment about the most expensive of any life in any city in the world. Good wine is costing about two dollars a bottle. You cannot obtain a Havana cigar worth smoking for less than ninenineteen; and two shillings is thought to be quite a moderate price for a Regalia Britannica. There is no drinkable champagne under three dollars or twelve shillings a bottle. Claret is almost equally dear. In fact, so far as my experience goes, I have found that the purchasing power of the dollar in New York does not exceed that of an English florin.

"...the necessities of life, properly so called, may be bought in the numerous and excellently provided markets of New York at prices which, estimating them by comparison with our own, we should be entitled to consider as ridiculously cheap..."—Sala, America Revisited (London, 1883), II: 90-99.

Regarding New York's prisons, he says: "...the Tombs, facing the Matte, affords a picturesque view of the Jefferson-market Gaol, which occupies a very tall tower of brick and stone in the Italian Gothic style of architecture. The cells are airy, and not by any means cheerless... The Tombs—rarily has so appropriate a name been bestowed on a prison—is a really remarkable and grandiose specimen of Egyptian architecture; and but for the unfortunate position of the site it would be the most imposing public building in New York..."

"Internally, the Tombs is rather a series of prisons than a single structure. The cells rise in tiers one above the other, with a separate corridor for each tier. There is a grating before each cell, between the bars of which the visitor can converse with the prisoner within...

"Finally the chief warder took us to his garden, where there was a vine trained against the wall, with a pigeon-cote amply stocked, and a pretty little pond bordered by turf and flowers..."—Ibid., II: 255-65.

1880

The population of Manhattan Island is 116,673—175th U.S. Census Bulletin (1910).

About this time, the 15, 14, 13 puzzle was all the rage.—Champlin, Young Folks' Cyclop. of Games and Sports, 320-21.

In this year, the telephone was being perfected. Henry Ward Beecher's voice was carried through a Blake transmitter in Plymouth Church, Brooklyn, by wires ramifying in all directions as far as Yonkers and Elizabeth, and was distinctly heard in New York.—N. Y. Tribune, May 9, 1880. There were at this time 30,372 Bell telephone stations in the U. S. In 1890, this number
The Second Ave. line of the elevated railroad is opened from Mar. 1, 1880.

The Chatham Sq. to 67th St.—Hist. of Real Estate in N.Y. City (pub by Real Estate Record & Builder's Guide, 1894), 451 Chamber of Commerce of the State of N. Y., Rapid Transit in N. Y. City and in Other Great Cities, p. 49.

The U.S. steamers "Constellation" sail from New York with contributions for the relief of the famishing people of Ireland—N. Y. Times, Mar 26 and 28, 1880. The famine was caused by a general failure of the crops.

The Broadway Opera House, having been renovated, is reopened as the Bijou Opera House.—N. Y. Times, Apr 1, 1880.

Gladstone becomes prime minister for the second time. His Apr. administration lasted until 1885—Hazen, Europe since 1875, 490.

Madison Square Garden (see My 22 and 21, 1879) is a scene of panic when 100 ft. of the second story, fronting on Madison Ave. and including the tower at the northwestern corner, fell to the street, carrying away the art gallery, the dancing-room, and part of the restaurant. The masonry falls upon about 20 persons, killing three and injuring seven. Many oil paintings and water colours are badly damaged.—N. Y. Times, Apr 22, 1880. See also ibid., My 10, 1880, and L. M. R. K., III: 984. There is a cut of the tragedy in Harper's Weekly, XXIV: 292. See Jl 7.

The 7th Regiment moves from the Tompkins Market Armory to its new armory on the east side of Park Ave. between 66th and 67th Sts. (see O 13; 1877)—Daily Graphic, Apr 28, 1880. The armory is shown in Harper's Weekly, XXIV: 238.

The New York Free Circulating Library Association (see 1879) May 10 has opened its first library at No. 46 Bond St.—N. Y. Times, My 4, 1880. See also Harper's Weekly, XXVI: 54.

The lands bounded by Bloomingdale and Gagevoet Sts, Tenth and Thirteenth Ave., and the block bounded by Gagevoet, 3rd and 5th, 6th and 7th Sts. (see O 13, 1877)—Daily Graphic, Apr 28, 1880. The armory is shown in Harper's Weekly, XXIV: 238.

The department of public buildings informs the stand-holders in Fulton Market that the building is in such a dilapidated and unsafe condition that it must be pulled down.—N. Y. Times, My 17, 1880. On May 25, part of the roof of the market caved in.—Ibid., My 25, 1880. See L. M. R. K., III: 959. A new market was built on the site (see N 16, 1882).

The park commissioners appropriate $25,000 for completing the restoration of Tompkins Square as a public park (see 4, 1879). This was done pursuant to Laws of N. Y. (1878), chap. 411; (1879), chap. 177; (1880), chap. 66; and act of common council, April 17, 1880.—Min. & Doc., Bd. Com. Dept. Pub. Parks (1880-81), 61.

The new Metropolitan Concert Hall on Broadway between 41st and 42d St. is opened to invited guests.—N. Y. Times, May 27, 1880. This was a forerunner of the Metropolitan Opera House.—N. Y. Times Mag., Jl 7, 1925.

The charter of 1873 (p. 7, Apr 30) is amended in several particulars by the legislature. In order to "reduce the burden of taxes to be levied in said city," reductions are made in the salaries of nearly all the officials, with the provision that no one "now in office, during his present term" shall be affected. To cite a few examples, aldermen hereafter will receive $2,000, a reduction of 30% of the president of the board, $5,000 instead of $5,000, the mayor is reduced from $12,000 to $10,000, the corporation counsel, from $5,000 to $12,000, the chamberlain, from $20,000 to $25,000; heads of departments generally will receive salaries which are required "to reduce the aggregate expenses...for salaries and compensation of persons employed" (day laborers receiving less than $2 per day, school teachers, and a few others are particularly exempted from this reduction) during the next fiscal year, by at
1880
May 29

The department of buildings is abolished by this act, and in its stead a fourth bureau is created within the fire department, "the bureau of inspection of buildings." All the officers of this bureau, except clerks and messengers, must be either practical architects, house carpenters, or masons, "shall have served a regular apprenticeship as such, and... pass an examination before the board of examiners now by law established for the examination of officers of the department of buildings." An attorney to the fire department, who shall be "a person regularly admitted to the bar and practicing in the city of New York," is to be appointed by the fire commissioner at a salary of $4,000.

Another provision is that all officers charged with the duty of expending or incurring obligations payable out of the moneys raised by tax must regulate expenditures so that they "shall not in any one year exceed the amount appropriated by the board of estimate and apportionment," and "no charge or claim or liability shall exist or arise against said city for any sum in excess of the amount appropriated."

June 9

The elevated tracks, structures, etc., in Battery Park are ordered removed within six months.—"N. Y. Times," Jc 10, 1880. See Je 30, 1891.

16

The legislature passes a law for the improvement of Morning-side Park (see July 14, 1893) — "Law of N. Y. (1880), chap. 532. See further below.

23

"The last chapter of the Olympic Theatre, which has under different names been a place of public amusement for about a quarter of a century," is completed by the sale of "such play-house effects as remained in the establishment."—"N. Y. Times," Jc 25, 1880. See L. M. R. K., III: 984; under "Laura Kenee's Varieties.

July 14

"At no time since the panic of 1873 have such large sums been expended in the erection of first-class business blocks and elegant and substantial private dwellings as at present....

"At the head of the latter class, and, in fact, of anything of the kind heretofore attempted in New York, are the new and (actually) palatial residences of the Vanderbilts now approaching completion on upper Fifth-avenue. The most costly and conspicuous of these are the two companion houses at Fifty-first-street and Fifth-avenue, which are designed the one for William H. and the other for his sister, Mrs. Shepherd and Mrs. Sloan. The cost is $750,000 apiece. Both are of brown-stone; and both are as utterly unlike the popular conception of "brown-stone fronts" as can well be imagined. In place of the innumerable narrow floors, piled one upon another, capped by French roofs and flaring cornices, are modest and quiet exteriors in the Renaissance style, three stories in height, with flat roofs, and piers on the sides; and for windows, one vine, oak-leaves, &c., over the windows. J. B. Snook is the architect of both houses. [Messrs. Hertzer were the architects; J. B. Snook assisted with the building details.—Mr. Vanderbilt's House and Collection, by Edward Strahan (publ.); L. M. R. K., III: 953.] The carpets and upholstery of both are being made to order in various cities of Europe. A third house, with front and side walls of heavy cut stone, is being finished on the north of the pair already described, for Mr. William K. Vanderbilt. [Designed by Richard M. Hunt, this was the finest town residence in America, until taken down in Feb-March, 1926.]

17

P. T. Barnum has formed a stock company to erect a museum building which shall combine a Coliseum, opera-house, lecture-hall, vast show-rooms, and an immense tropical garden. The capital stock is $7,000,000. The board of directors is composed of leading capitalists and business men, including W. H. Vanderbilt and Henry Cummins. The site is the Madison Square Garden, "famous for its dog shows, revival meetings, walking matches, and recently for falling down and endangering the lives of pleasure-seekers within its walls...."

"The size of the building will be 300 by 425 feet, covering the entire block. It is to be five stories in height, constructed of brick, stone, and iron in the most substantial manner. At the south-western corner there will be a brick and iron observatory, about 250 feet high, provided with an elevator, and furnished around its dome or apex with a coronet of electric lights,..."

"The lower story of the building will be known as the Coliseum. To be used for sporting events, big balls, etc."

"The first or ground floor of the Museum will be devoted in part to an opera-house or theatre, to be known as Barnum's Opera-House. This room will have a seating capacity greater than that of any other theatre in the city."

"The building is already paid to the Harlem Railroad for the ground.

"The work of tearing down the old Garden... will begin some time during August, and the Museum will be completed before the summer of 1881.—"Harper's Weekly," XXIV: 453, 455.

The old Madison Square Garden was not demolished until 1889 (q.v., Ag 7).

"The Church-theatre, as the hybrid building on the east side of Broadway, opposite Waverly-place, is commonly named, is soon to be pulled down and a business block put in its place. Formerly the March of the Messenger that steered up town it was turned into a theatre, and has for 15 years thereabout been noted as the grave of nearly every sort of entertainment undertaken there."—"N. Y. Times," Jl 26, 1880. See L. M. R. K., III: 984.

The commissioners of parks decide that the Egyptian obelisk (see Jl 20) shall be erected "on the natural knoll in the Central Park, lying southwest of the Museum of Art building, and on the west side of the East Drive, and north of the Greywack Arch."—"N. Y. Times," Jl 28, 1880. See also ibid., Ag 28, 1880. See, further, O 9.

Over-head telegraph wires on Broadway and elsewhere disappear from the city.—Daily Graphic, Jl 29, 1880. See Ag 6, 1845.

The Second Ave. elevated railroad (see Mr 1) is opened from Aug. 67th to 129th St.—Hist. of Real Estate in N. Y. City (publ. by Real Estate Record & Builder's Guide, 1884), 45.

The Manhattan Market on Eleventh Ave. between 34th and 39th Sts., originally opened in 1872 (q.v., N 11) and then idle until June 8 of this year, is completely destroyed by fire.—"N. Y. Times," Jl 3, 9, Je 7, 9, S 9 and 10, 1884; Daily Graphic, S 10, 1880.

Sir John Steddf's bronze statue of Robert Burns is unveiled in Oct. in Central-stone of the foundation on which the Egyptian obelisk (see Jl 27) is to stand is laid in Central Park with Masonic ceremonies.—"N. Y. Times," O 10, 1880. See Ja 22, 1881.

A great Republican torchlight parade is held on the occasion of Gen. Grant's visit to the city. About 60,000 prominent bankers and business men march, and the spectators number more than 300,000. The whole line of march from 15th St. to 95th St. is brilliantly illuminated.—"N. Y. Times," O 10-13, 1880. On Oct. 23, an elaborate reception was held in Grant's honour at the Union League Club.—Ibid., O 24, 1880.

Mile. Sarah Bernhardt, described as the "greatest tragic actress of the age," is welcomed to America.—Daily Graphic, O 28, 1880; N. Y. Times, Jl 27 and 28, 1880. See also Harper's Mag. (Jan., 1881) 306. Bernhardt made her début on Nov. 8 (q.v.). James A. Garfield and Chester A. Arthur, Republicans, are Nov. 9 elected president and vice-president, over their Democratic opponents, Winfield S. Hancock and Win. H. English.—McKee, National Conventions and Platforms, 188-200.

"Wm. S. Grace is elected mayor of New York. He was supported by Tammany, Stuyvesant, and Irving Hall. The chief issue hinged upon the fact that Grace was a Roman Catholic. It was feared that, if he were elected, public money would be given to sectarian schools.—"N. Y. Times," N 4, 1880; Ann. Cyclop. (1880), 576. Grace was succeeded by Franklin Edson in 1882 (q.v., N 7), but was re-elected in 1884 (q.v., N 4).

Sarah Bernhardt (see Jl 27) makes her American début at 27 Booth's Theatre. The play is "Adrienne Lecouvreur."—"N. Y. Times," N 9, 1880. See also Harper's New Monthly Mag., Jan., 1881.
In this year, The Critic, edited by Jeanette L. and Joseph B. Glidden, was founded.—*Livy's Handbook* (1893), 626.

In this year, Robert Macy of No. 4 Barclay St. issued an illustrated guide-book to the city, entitled *Old Landmarks, or, How to see New York and Its Environs*.

In this year were published by Spielmann & Brush, Hoboken, *Gentified copies of original maps of property in New York City*, filed in the registrar's office and elsewhere, together with registrar's index to maps and important notes regarding the same, comprising in all 93 folio maps, coloured. Among them, for example, is Goerck's map of the Common Lands, 1796. See A. P. 9b, Vol. III, with its description, III: 869.

In this year was published by the Manhattan Railway an official map and guide to all the elevated railways in New York City, size 24 x 29 in.

In this year was published, by David L. Bradley, *Brady's map of the water front. Revised annually; size, 22 x 26 in*. It appeared also in 1882.

New York at this time was often referred to as "the worst paved City in the world." It was urged that asphalt, a "noiseless pavement," like that of Paris, London, and Berlin, be used on Fifth Ave. The commissioners of public works reported that a successful test had been made of it from July, 1878, to 1881, on the block between 26th and 27th Sts., on Fifth Ave., in front of the Hotel Brunswick.—*N. Y. Tribune*, My 9, 1881.

In this year, John Jacob Astor, a grandson of the founder of the family in America, erected a new building adjoining the Astor Library, corresponding in size and style with the earlier ones (1849, 1844, and S. L. (1860)). He also made extensive improvements in the interior. The books at this time numbered nearly 200,000 volumes.—*Lossing, Hist. of N. Y. City*, II: 703-4.

The ruins of Fort Washington, erected in 1776, are "still visible on the line of old 82d street, within the grounds of James Gorden Bennett, at a height of two hundred and thirty feet above the river."—*Mag. Am. Hist.* (1881), VI: 94.

During 1881-2, the Jerome residence at 26th St. (see Mr 21, 1868) was occupied by the Turf Club.—L. M. R. K., III: 950.

In this year, the Maison Doree (formerly the Union Place Hotel—see 1871) became known as the Morton House.—Descrip. of Pl. 155, III: 703.

In this year, the Architectural League of New York was organized. In 1883, it included in its membership St. Gaudens, Ward, McKean, Tiffany, Ware, Upham, Benwick, Rich, Port, Bruce Price, Le Brun, Hunt, Gibson, Robertson, and other well-known architects and artists.—*King's Handbook* (1893), 310.

The Mount St. Vincent buildings in Central Park at East 103d St., used for the past 16 years partly as a restaurant and partly as a museum, are totally destroyed by fire.—*N. Y. Times*, Ja 7, 1881. The present tavern was built on the site in 1855. The *16th Ann. Rep., Am. Soc. & Hist.* (1911), 474. See F 18, 1891.

Dr. G. M. Beards begins a series of mesmeric seances before the scientific men of the city.—*N. Y. Times*, Ja 7 and 11, 1881.

The sale by auction [as ordered—see N 18, 1879] of the Tontine Building, at [the n. w. cor. of] Wall and Water streets, in the Exchange Salesroom, at noon yesterday [Ja 11], closed out the famous Tontine Association, formed in 1792 [error for 1791], Mr 30, 5 ft. by a number of merchants and others. The original shareholders numbered 205, and the shares were valued at $200 each. The profits of each share were to go to the owner during the life-time of a person whom he selected, and at the latter's death such share was to become invalid. Finally, when only seven of those selected should remain alive, the entire fund, whatever it might be, was to be divided among the existing shareholders. The property cost originally $42,787. The building was known as the Tontine Coffee-house, and was a great resort for merchants." The property was "knocked down" to Peter J. O'Donohue, tea merchant, for $38,550. It comprised Nos. 84, 86, and 88 Wall St., which have a total frontage of 71 ft. 4 in. on that street, 60 ft. on Water St., 41 ft. 8 in. on the west side, and 80 ft. 7 in. in the rear.—*N. Y. Times*, Ja 12, 1881; L. M. R. K., III: 981. The twelve-storey "Tontine Building," which was erected in 1901, now stands on the site.

The obelisk or Cleopatra's needle, presented to the U. S. by Isma'il Pasha (see Ja 20, 1880) and erected on its pedestal in Central Park on Ja 22, is formally given to New York by the federal gov-
THE ICONOGRAPHY OF MANHATTAN ISLAND

erament, the speech of presentation being made by Wm. M. Evarts, secretary of state. The obelisk stands 90 feet high on a knoll on the west of the Museum of Art. It dates from the 16th century B. C., having been quarried at Syene, Egypt, and erected at Helipolis by Thothmes III. In the year 12 B. C. it was removed to Alexandria by the Romans. The cost of transporting it to New York and erecting the pedestal and base was defrayed by Wm. H. Vanderbilt. — N. T. Herald, Jan 23, 1881; N. Y. World, Feb 23, 1881; Wilson, Mem. Hist. N. Y., IV, 275-278; Harper's Weekly, XXV: 101, 110. For a voluminous explanation of the inscriptions and of the ancient history of the obelisk, see Mclnnes's N. T. Obelisk (1891). The date of presentation to the city is erroneously given as Feb. 22, 1881 to L. M. R. K., III: 606.

Mar. 4

Thos. A. Edison has moved from Menlo Park to New York City, and the headquarters of the Edison Electric Light Co. have been established at No. 65 Fifth Ave. Edison now considers his electric light invention complete and will devote his time to introducing it into various cities. Detroit has already given the company permission to lay wires in the streets and was the first city to grant this to an electric light company. — N. T. Times, Mr 1, 1881. See Mr 22.

James A. Garfield and Chester A. Arthur are inaugurated as president and vice-president respectively. — N. T. Times, Mr 5, 1881.

The Union League Club takes possession of its present clubhouse at the northeast corner of Fifth Ave. and 39th St. It is considered "the most elegant and luxurious yet built in America." — N. T. Times, F 16, Mr 4-6, 1881. The first regular meeting in the new club-house took place on March 10—ibid, Mr 11, 1881. See also view in Harper's Weekly, XXIII: 746, and ibid, XXV: 118. Dickel's Riding Academy was formerly on the site. — L. M. R. K., III: 606.

The board of aldermen authorizes the Edison Electric Light Co. (see Mr 1) to lay tubes, wires, conduits, and insulators, and to erect lamp-posts in all the streets of the city under the supervision of the department of public works. The city is to receive one cent per linear foot for each street occupied. — N. T. Times, Mr 22 and 23, 1881. On April 19, this resolution was repassed over the mayor's veto. — Ev. Post, Ap 19, 1881.

Apr. 11

Isaac Newton, chief engineer of the department of public works, submits to Commissioner Thompson a report on the city's water supply. He states that the Croton aqueduct has been delivering for the past seven years "a maximum safe discharge" of 95 million gallons per day. "From the time the maximum discharge was first reached to the present the population of the city has increased over twenty-five per cent, so that in each successive year the inadequate supply has been more apparent. The time is not far distant when the supply will not in many localities rise above the basement, while in some situations the water will be almost wholly cut off. The works now in progress on the Bronx and Byram rivers will probably require three years to complete... [and] this new supply is so small that the rapid increase of population and manufactories will soon catch up with it."

A table is given of the quantity of water that "has run to waste over the Croton Dam from the year 1868 to 1880," and the construction of a "new aqueduct from the Croton Valley" is urged as "the only practical means of securing an ample supply of water." Mr. Newton concludes: "No other city of equal importance in Christendom is so dependent upon a single engineering structure for its public supply of pure water as early as 1875, when preliminary surveys were made for that purpose. Owing to the condition of the city's finances, it was deemed unadvisable to construct the works at that time, and no further steps were taken in this matter until the severe droughts of 1880 and 1881 drew new attention to the inadequacy of the water-supply of the city." — Wegman, op. cit., 108. See F 23, 1881.

The board of aldermen grants permission to the Brush Electric Company to lay wires, conduits, etc., in the streets of New York for illuminating purposes. — Ev. Post, Ap 12, 1881. This was vetoed by the mayor on April 19—ibid, Ap 19, 1881. See Ap 21.

The Metropolitan Opera House Co. takes title to the land bounded by Broadway and Seventh Ave., 39th to 40th Sts. The price paid is $596,700. — N. T. Times, Mr 9, 10, and 15, 1881; Ev. Post, Ap 12, 1881.

"The remarkable increase in building operations which is now manifesting itself in this City... is strikingly exhibited on the West Side, especially in the upper and more northerly portions." The proposed buildings include the "Windemere apartment-house" on the southwest corner of 57th St. and Ninth Ave., the Inca Hotel at 62d St. and Broadway, and a "mammoth hotel" which is to extend on Eighth Ave. from 72d St. to 73d St.—N. Y. Times, Ap 17, 1881.

"In the office of the Brush Electric Light Company, at Seventeenth Street and Broadway, may now be seen a large drawing showing the proposed tower which will support the Brush lights to be used in Unison Square in case the Brush Company's bid for lighting Broadway from the Battery to Forty-second street is accepted. The tower will be similar in construction to one recently erected in Akron, Ohio, and is to be made of heavy sheet boiler iron, made in lengths of four feet, and riveted together. The diameter at the base will be only four feet and at the top one foot. Four cables will run from the top of the tower to the four corners of the square in order to keep the structure steady. The total height of the tower, including foundation, will be two hundred and eighty feet, or one hundred feet higher than the top of the cupola on the Domestic Sewing Machine Building at Broadway and Fourteenth street.

"The lighting apparatus will consist of an iron triangle, upon each point of which will be two electric lamps of six thousand candle power each... The iron triangle supporting the lamps will slide up and down on the towers upon oiled ways, and will be lowered every morning. Its weight of about 2,000 lbs. will be nearly balanced by two bars which will run inside the column, and one man can easily manage the whole affair. Changing the carbons will not be more than half an hour's work."

"In view of the result of the tower lights at Akron, Mr. Hayes, the secretary of the New York company, feels justified in promising that the light given by such a tower as the one designed for Unison Square will make it possible to read a newspaper at a distance of half a mile from the light. If the first tower is found to work satisfactorily, another will be placed in Madison Square."

"Mr. Hayes is confident that a franchise will be accorded to the Brush Company within the next two weeks, when the city will be able to accept the bids put in by the Electric Light Company in opposition to the new construction. Since the competition was first used in this city, in Christmas week, they have failed but twice—one for four hours toward the end of January, and at another time for one hour... " — Ev. Post, Ap 21, 1881. See J 1.

The New York & Putnam Bridge, extending across the Harlem River, from 157th St., Manhattan, to Sedgwick Ave., The Bronx, is opened to traffic. — Rep., Com't's of Bridges (1912).

The "Revised Version" of the New Testament, which was begun in 1890, is finally published. — Bevan, Our Eng. Bible. The Hist. of its Development, 47. See My 15, 1885.

The owners of property on 42d St. between First and Second Aves. are authorised to establish two small parks on said street between said avenues and to enclose them with an iron railing. The parks are to be maintained without expense to the city. — Laws of N. Y. 1881, chap. 104, also important sunt. The same was first used in this city, in Christmas week, they have failed but twice—one for four hours toward the end of January, and at another time for one hour... " — Ev. Post, Ap 21, 1881. See J 1.

A bronze statue of Admiral Farragut, designed by St. Gaudens and presented to the city by the Farragut Monument Association, is unveiled. It stands in Madison Square at the junction of Fifth Ave. and 26th St.—N. Y. Times, My 25 and 26, 1881; Min. & Des., Park Com. (1880-81), 265; (1881-82), 24, 53. See also L. M. R. K., XI: 904, 94, and Eleventh street. — Art. 11, 1881. The pedestal was designed by Stanford White.

By act of legislature, a street cleaning department is created and placed under the charge of a single commissioner, to be appointed by the mayor with the approval of the board of health, and subject to removal in the same way. He shall hold office for six years at a salary of $6,000 per year. Exclusive charge of "the cleaning of streets and the removal of ashes and garbage" is in his hands, except that any special contracts must have the approval of the board of
The aldermen pass resolutions, notwithstanding the veto of Mayor Grace, protesting against the "proposed spoliation of the City Park"—"The Common"—revered for its memories by every New Yorker," in the interest of the trustees of the Brooklyn Bridge. "Our taxpayers" already are forced "to pay millions of dollars towards defraying the cost of their bridge structure—for the sole benefit of the City of Brooklyn."—Proc., Bd. of Ald. (1881), CLXIII: 135-38.

William C. Hart open their new Theatre Comique at 728-740 Broadway—Wilson, Mem. Hist, N.Y., IV: 490; L. M. R. K., III: 984. It was destroyed by fire on Dec. 21, 1884 (r.c.).

Cyrus W. Field purchases the Washington Hotel, formerly the Kennedy mansion, on the north-west corner of Broadway and Battery Place, and the land to the west of it as far as Greenwich St. On this he plans erecting an office building—"N. Y. World," Aug 20, 1881. For the history of No. 1 Broadway, see N. Y. Enc. Post, Aug 31, 1881. See also N. Y. Times, N 17, 1881; L. M. R. K., III: 905; and descrip. of Pl. 98, III: 900. See, further, Mr. 1882.

Wallack's old theatre at Broadway and 13th St. (see S 25, Sept. 1861) is opened under the management of Adolph Neuenroff as the Germania Theatre.—N. Y. Times, S 16, 1881; L. M. R. K., III: 986. In 1883 (p. 25, Mr 26), its name was again changed.

The Aurora of the death of Pres. Garfield is received in New York at 1102 p. m., and the bells of Trinity and other churches convey the sad intelligence to the people.—N. Y. Times, 20, 1881. On Sept. 20 and the following days, the city was draped with black. Memorial services were held here on Sept. 26, the day of burial.—Ibid., S 21-27, 1881.

No. 29 common council passes resolutions of regret at Garfield's death.—N. Y. Times, S 24, 1881. Similar resolutions were passed by the Chamber of Commerce, the Union League Club, and other societies.—Ibid., S 22 and 24, 1881.

Vice-Pres. Arthur is formally inaugurated president. A private ceremony had been held on Sept. 19—N. Y. Times, S 20, 21, and 23, 1881.

Arthur arrives in New York. During his stay he received numerous visitors, but there were no public demonstrations. He returned to Washington on Oct. 4—N. Y. Times, S 30-O 5, 1881. He again visited the city in November.—Ibid., N 4-13, 1881.

A disastrous fire destroys the entire block from 33d to 34d Oct. Sts, Fourth to Lexington Aves, and injures several other buildings in the neighborhood, including the Park Avenue Hotel. Losses amounting to several millions are sustained, and 333 horses are killed.—N. Y. Times, O 11-13, 1881. See also Harper's Weekly, XXV: 717. The block burned over was occupied by the car-barns and stables of the street railway. These were rebuilt.

Seven descendants of Baron Steuben arrive in New York on their way to the centennial celebration of the battle of Yorktown. They are welcomed by salutes from Governor's Island and the Brooklyn Navy Yard and are entertained by a community banquet of 10,000 citizens. In the evening they were addressed by Mayor Grace and presented with a copy of the complimentary resolutions adopted by the board of aldermen. German regiments and the German societies held a torchlight parade which was reviewed by the guests from the plaza at Union Square. The celebration closed with the singing, by about 6,000 people, of "Die Wacht Am Rhein," "La Marsellaise," "Hail Columbia," and "Yankee Doodle."—N. Y. Times, O 14, 1881.

The common council passes a series of resolutions approving the action of Orlando B. Potter, Nathan C. Ely, and William H. Webb in opposing the attempt to remove the distributing reservoir at Fifth Ave. and 42nd St. They state that "An attempt is now being made to convert the same into a public park and thereby deprive the Corporation of private property held by it since 1866, without compensation and without the consent of the Corporation." They also declare that the block bounded by 40th and 42nd Sts., Fifth and Sixth Aves, has been appraised at $3,000,000. They resolve "That the attempt by the Legislature of this State to take away from the City of New York, without compensation, the block of land situated between 40th and 42nd Streets, Fifth and Sixth Avenues, granted to it in 1866, in fee, being part of the grants from the Crown of England, and which grants have been confirmed to it by the Constitution of 1777, 1821, and 1846, which lands are worth many millions of dollars and are pledged to the payment of the debt of the City, now amounting to $100,000,000, be resisted until a final decision in the courts can be obtained deciding
the rights of the Corporation."—Ordinances, etc., App’d by Mayor, May 2, 1893.

25. The fountain in Union Square, a heroic bronze group designed by Karl Adolf Donndorf, is presented to the city by D. Willis James and unveiled.—N. Y. Daily Tribune, O 26, 1881; The James Fountain: Proc. at the Presentation; L. M. R. K., III: 964. See also Cat. of the Works of Art Belonging to the City, 139, and illustration opp. p. 176.

Nov. 25. John Q. A. Ward has finished the sketch for his model of the Washington statue to be erected under the auspices of the Chamber of Commerce in Wall Street [see F 7, 1880]. . . . The face will be modeled after Houston’s famous work. . . . The solid block of granite, part of the old City Hall building, upon which Washington stood is now preserved in the hallways of Bellevue Hospital, and will be transferred to the wall of the Sub-Treasury, in which it will be set.—Mag. of Am. Hist., VII: 390. The statue was unveiled on Nov. 26, 1883 (q.v.), at the celebration of the centennial of the British evacuation.

3 Adelina Patti revisits New York, after an absence of 22 years in Europe, and is enthusiastically received.—N. Y. Times, N 4, 1881. See N 9.

5. The French and German delegates to the Yorktown centennial celebration are entertained by the Chamber of Commerce with a dinner at Delmonico’s.—N. Y. Times, N 6, 1881. An elaborate ball was given in their honour on Nov. 7 at the Metropolitan Hotel. —Ibid., N 8, 1881.

9 Adelina Patti begins a series of concerts at Steinway Hall.—N. Y. Times, N 10, 1881.

12 The Walton House at 126 Pearl St., which was built in 1755, is to be offered for purchase.—Harper's Weekly, XXV: 726. See also L. M. R. K., III: 955.

Dec. 5. Booth’s Theatre (see F 5, 1880) is sold to J. A. Page and Smith Ely, Jr., and is to be converted into a dry-goods store.—N. Y. Times, D 23, 1881. See also L. M. R. K., III: 982.

31 By the end of the year, the second enlargement of the Stock Exchange building was completed. Adjoining property south of the exchange, about 24 feet on Broad St., and 68 on New St., was bought at a cost of about $375,000. Payment for the enlargement was met by the sale of 40 additional memberships, the average price received being about $15,000. The new board room was 135 feet long, on New St., by 63 feet wide.—Eames, N. Y. Stock Exchange, 62.

1882

In this year, England assumed her “occupation” of Egypt.—Hazen, Europe since 1815, 534, 535-61.

In this year, the Morning Journal was founded. Albert Pulitzer was the editor.—King’s Handbook (1893), 622.

In this year, was published the first edition of Last Days of Knickerbocker Life in N. Y., by Abram C. Dayton.

In this year, the General Theological Seminary (see Jl 28, 1825) began the erection of additional buildings, in accordance with a plan which contemplated using its entire block front on Ninth Ave. by 600 feet in depth.—Perry, Hist. of Am. Epis. Ch., II: 506-34. See also L. M. R. K., III: 940. The corner-stone of the first new building, Shelter Hall, was laid on May 10, 1885 (q.v.), but erection was not completed until 1903.

The Liberty St. ferry to Communipaw was established in this year.—Proc. App’d by Mayor, I: 52; L. M. R. K., III: 943.

Wallack’s new theatre, at the north-east corner of Broadway and 36th St., opens with “The School for Scandal.”—Evening Post, Ja 5, 1882. See also N. Y. Times, F 8, D 4 and 30, 1881, and Harper’s Weekly, XXVI: 11, 41.

9 Oscar Wilde delivers his first lecture in America, at Chickering Hall. The subject is “The English Renaissance.” One of the newspapers, describing the occasion, said: “As the youthful Irish poet and clever aesthetic poseur . . . appeared last evening, with his massive form clad in full dress coat, white vest, black knee breeches and black silk stockings, . . . the love of notoriety, which is said to be one of his striking characteristics, must have been much gratified. The audience . . . was of great size and fine quality. He was listened to with the most quiet and thorough attention, the silence at times being almost painful, . . . by an assemblage which completely filled the hall, the walls of the main floor and balcony being lined by those who were unable to obtain seats. . . . Everybody known in New York society seemed to be there, the solid as well as the lighter element being represented.” After the lecture, a reception in Wilde’s honour was held at the home of Mrs. John Mack, No. 365 Fifth Ave. His dress was thus described in detail: “Mr. Wilde wore an evening dresscoat, which if worn by a commonplace young man would have been pronounced supremely old fashioned. A double breasted white duck vest, with six pearl buttons, was cut low enough to display a broad expanse of white shirt front of piqué, the grain of the fabric running horizonally. Its immaculate white was made more apparent by a large solitaire, composed of pearls and diamon[s] from his mother’s pocket a sitten [sic] bob depended. To this several gold chains were attached. These and the pin were his only articles of jewelry. Under a deep, rather too wide, turned down collar was folded a two-inch cambric cravat. His trousers, if such a word is to be found in his vocabulary, proved that his taste in dressing was beyond the reach and comprehension of the ordinary society votary. They were of shining black doeskin, cut to display an ample allowance of thighs, and reaching to the knees. The latter part of his anatomy and his lower extremities were encased in black silk stockings. Patent leather pumps tied with large black silk bows completed his outfit. His ears struggled to make their way out of the flowing locks which covered them.”—N. Y. Herald, Ja 8, 1882.

The old World building, on Park Row, Beckman and Nassau Sts., is destroyed by fire.—Daily Graphic, F 1 and 2, 1882. See also illustration and description in Harper’s Weekly, XXVI: 84, 87. See Jl 20, 1883.

Commissioner Thomson submits to Mayor Grace a report on the “Proposed New Aqueduct and Storage Reservoir for Additional Supply from Croton River” (see Ap 11, 1891). He says that proposals have been considered by the department “of obtaining pure fresh water from the upper Hudson river, from Lake George, Erie, Ontario, or Champlain, from the Passiac or Hackensack rivers in New Jersey, from the Housatonic river in Massachusetts, or Connecticut, or from the streams in Rockland and Orange counties,” and they have all been rejected in favour of an enlarged Croton system. The project of “using the salt water which surrounds the city, as an auxiliary to the city’s water supply” is open to so many objections that “engineers do not consider it worthy of serious consideration.” The capacity of the Croton water-shed to furnish a minimum supply of 250,000,000 gallons is proven by “accurate observations and measurements of the rainfall and the quantity of water running over the Croton dam for the past sixteen years,” and “the whole question is narrowed down to the selection of the plans and means to secure sufficient storage and to conduct the water to the city.”

The construction of a new dam “on the Croton river at Quaker Bridge, about 45 miles below the present dam, and five miles above the mouth of the river, forming a reservoir of 3,653 acres in area,” is recommended; also a conduit from this dam to the Harlem River, which shall be “a masonry aqueduct, circular in shape, twelve feet in diameter, and capable of delivering about 350,000,000 gallons of water per day” The cost is estimated at $14,000,000.

The Kennedy house at No. 1 Broadway “is even now being Mar. demolished by its new purchaser, Mr. Cyrus W. Field” (see Ag 29, 1881).—Frank Leslie’s Sunday Mag., XI: 254. The Washington building was erected on the site.—L. M. R. K., III: 950; descript. of Pl. 98, III: 590, and Pl. 159-9, III: 841.

Congress prohibits the immigration of Chinese labourers for May ten years.—Macdonald, Select Statutes, etc., 323-28.

Polygamy is prohibited in Utah.—Macdonald, Select Statutes, etc., 319-22. Another anti-polygamy act was passed in 1887.—Ibid., 380-89.
The Charity Organization Society of the city of New York is incorporated. The incorporators include S. O. Vanderpool, J. Roosevelt, and Alonzo P. Minnurn, and among the City Reform Club of N. Y. (1882), see chap. 139. At first the society rented quarters at 67 Madison Ave. In 1883, it moved to 79 Fourth Ave., and in 1885 to 21 University Place.—25th Ann. Rep. (1897). In 1893 (p. 1) it erected its own building.

Minnie Maddern makes her first appearance in New York, at Stuart's Park Theatre in "Fogge's Ferry."—Eve. Post, My 16, 1882. For the history of this theatre, see 1873: Ap 14, 1874; O 30, 1882.

The Iron and Metal Exchange opens at No. 69 Wall St.—Eve. Post, My 4 and 17, 1882.

Italy joins the Austro-German alliance (see O 7, 1879), and it becomes known as the Triple Alliance.—Ward, Germany, III: 144; Hazen, Europe since 1815, 314.

The legislature passes "An act to reestablish the public arms of the State of New York and to provide for the use thereof on the public seals."—Laws of N. Y. (1882), chap. 190. The present seal of the state is the result of this legislation, which was begun by preliminary inquiry on Dec. 1, 1879 (p. 2). This seal is re-produced by Wilde in The Civic Ancestry of N. Y., Pl. 25.

The Jubilee mansion is sold at auction to Nelson Chase for $45,000. The adjourning house is sold for $21,150.—Eve. Post, Je 1, 1882; and Harper's Weekly, XXVI: 337, 338. A sales map of the Jubilee estate, dated Nov., 1882, is filed in bureau of topography, borough president's office, as Map No. 3616.

The corner-stone of a new Produce Exchange building is laid, at the corner of Broadway and Beaver St.—N. Y. Times, Je 5, 1883. The building was dedicated on May 6, 1884 (p. n.).

The legislature directs the cities of New York and Brooklyn to pay to the trustees of the Brooklyn Bridge the sum of $1,500,000, or so much thereof as shall be necessary to complete the bridge, in the proportion of one-third from New York and two-thirds from Brooklyn.—Laws of N. Y. (1882), chap. 268.

Guiteau, the murderer of Garfield, is executed.—Eve. Post, Je 18, 1882.

The New York Consolidation Act of Eighteen Hundred and Eighty-two is passed by the legislature. This act fills a complete volume of 518 pages of the statutes, and virtually rewrites the charter of 1873, together with all its amendments and all the special and local laws affecting public interests in the city of New York.—Laws of N. Y. (1882), chap. 410.

The wooden steeple of Grace Church, erected about 35 years ago, has been pulled down and is to be replaced by one of stone.—N. Y. Times, II 4, 1882. By June 24, 1882, the new marble spire had reached the height of 175 ft.—Eve. Post, Je 25, 1882.

Congress authorizes the secretary of the treasury "to sell at public auction in the city of New York to the highest bidder, after thirty days' notice in four of the principal newspapers published in the city of New York, the land and premises formerly occupied as the site of the post-office in the city of New York, being upon Nassau street, between Cedar and Liberty streets, and known as the Old Post-Office site." The sale price is not to be less than $600,000.—Laws of U. S., 47th cong., 1st sess., chap. 331. This was the old Middle Dutch Church; it was sold on Oct. 18 (p. n.).

Edison's giant dynamo at No. 257 Pearl St. are started for the first time, and the territory between Nassau and Pearl Sts. and Spruce and Wall Sts. is lighted by electricity, including the Times building.—N. Y. Times, S 5, 1882. This marks the beginning of commercial electric lighting in New York.—N. Y. Herald, S 5, 1882. See also Brown's Book of Old N. Y. (1917), 247-48, 251-2.

The swim meet of Grace Church, erected about 35 years ago, has been pulled down and is to be replaced by one of stone.—N. Y. Times, II 4, 1882. By June 24, 1882, the new marble spire had reached the height of 175 ft.—Eve. Post, Je 25, 1882.

Congress authorizes the secretary of the treasury "to sell at public auction in the city of New York to the highest bidder, after thirty days' notice in four of the principal newspapers published in the city of New York, the land and premises formerly occupied as the site of the post-office in the city of New York, being upon Nassau street, between Cedar and Liberty streets, and known as the Old Post-Office site." The sale price is not to be less than $600,000.—Laws of U. S., 47th cong., 1st sess., chap. 331. This was the old Middle Dutch Church; it was sold on Oct. 18 (p. n.).

In this year, Gottfried Daimler, of Mannheim, Germany, perfected the "hot-tube" system of ignition for internal-combustion engines, which soon ousted the previously used flame ignition. —Sullivin, Our Times (1926), I: 479.

In this year, the Huguenot Society of America was founded at New York, with broad and scholarly historical aims.—Van Rensselaer, Hist. of the City of N. Y., II: 148.

Life was founded in this year.—King's Handbook (1893), 626.

In this year, the Jerome residence, at the s. e. cor. of Madison Ave. and 26th St. (see 1881), was occupied by the Madison Club.—L. M. R. K., III: 930. See also Brown's Book of Old N. Y. (1917), 247-48, 251-2.

In this year, the Rutgers Female College (see Ap 11, 1867) was removed from 487-491 Fifth Ave. (see 1860) to 54-58 W. 55th St.—N. Y. City directories; L. M. R. K., III: 941.

In this year, the Rev. Wm. R. Sandford became rector of St. George's Church. He remained until 1906, when he was forced —

2 - The American Art Association is formed by J. A. Sutton, R. Austin Robertson, and Thomas E. Kirby, for "the encouragement and promotion of American art. It possessed the lease of the American Art Gallery, consisting of a room, 46 by 36 ft., with offices adjoining, in the building of Wm. Kurtz, a photographer, at 6 and 8 E. 23d St. This building was connected with one having an L on 22d St., occupied by the Palette Club, whose members held exhibitions in the Kurtz gallery. Several rooms in the Pike building (later the Bartholdi Hotel), at the E. 25th St. corner of Broadway, were included in the lease. For the early history of the association, see the Address of Mr. Thomas E. Kirby. . . . at the opening of the new Am. Art Galleries . . . Nov. 10, 1892. The business of this association consists primarily of the exhibition and sale of works of art and literature.

Mayor Edson communicates his first message to the board of aldermen. He believes that those "into whose hands the people have committed the city's finances, government and improvements" should have a "thorough grasp of the stern facts" of the city's "comparatively recent history." New York's manufacturing interests, in 1854, "had not yet assumed noticeable proportions," but today she has become "the largest manufacturing city in the United States," and her advance in commerce and trade has been "remarkable" because "it has today a population of fully 1,500,000," while in 1842 the number was only 336,000. Improvements have "lamentably failed to keep pace with this remarkable growth." It is obvious "that our wharves and piers are inadequate to the accommodation of the commerce which seeks them; that the supply of water is wholly insufficient for domestic and manufacturing purposes; that the force and facilities for extinguishing fires are too limited in many portions of the city; that the police accommodations in several districts are by no means what they should be; that hospital accommodations, especially for the reception of those affected with contagious diseases, are almost entirely wanting; and that the work of beautifying the city has been neglected and cannot be viewed with just pride by its citizens." The mayor states with emphasis that the government has "no more important and pressing matter for consideration" than "an increased supply of pure water;" he refers to the plan submitted by the commissioner of public works to Mayor Grace, on Feb. 23, 1882 (p.v.), as "possibly the best that can be devised," but believes it wise, "before finally adopting any plan, to have the opinion of business men, as well as engineers, concerning its practicability, the probable cost, and the necessity for constructing permanent works - ever plan may be adopted should be surrounded with proper safeguards against extravagance or unnecessary expenditure; to this end I believe you will join me in the recommendation that to a controlling extent the work be supervised by men of known integrity who possess some practical knowledge of such matters (see J. A. and J. E.)." - Proc. Bd. of Ald. (1883), CLXIX: 19-36.

The mayor makes "useful suggestions as to practicable improvements," says the editor of the World, "such as the building of subways for all the pipes and wires necessary for municipal or private uses, the building of new police station-houses, the enlargement of the accommodations of the Health Department, a more equitable distribution of school-room space, the propriety of relieving the Park Department of all duties not relating to the park proper, and the hearty cooperation of the municipality in the improvement of Harlem River." The message is termed "a business-like paper, such as might be addressed by an incoming president of a private corporation who had been examining its business thoroughly to its directors and its stockholders." - N. Y. Times, Ja 2, 1883. The Times thinks Mayor Edson's message is "neither very instructive nor particularly suggestive." - N. Y. Times, Ja 2, 1883.

Concerning the "Harlem River Improvement" (see F. 8, 1897), Mayor Edson, in his message to the board of alderman, says: "The State Legislature has at various times ceded by enactments the right of way, has authorized the courts to condemn the land, and has provided for the expenses of commissioners to effect the completion. Furthermore, Congress has appropriated towards this improvement the sum of $40,000,000." - Proc. Bd. of Ald. (1883), CLXIX: 45-46.

The French societies of New York hold funeral services at Tammany Hall in honor of Leon Gambetta. - N. Y. Times, Ja 4 and 5, 1883.

On the basis of a report of the commissioner of public works submitted to the mayor on Feb. 23, 1882 (p.v.), the state senate passes a resolution requesting the present mayor to appoint five citizens who, in conjunction with himself, shall examine this report and make recommendations to the senate concerning plans "for an additional water supply." - Senate Jour. (1883), 190th sess., 25. See Mr. 7.

The sum of $75,635.97 has been subscribed for the pedestal of the Statue of Liberty (see N. 28, 1882). - N. Y. Times, Ja 17, 1883. On Feb. 3, a dramatic entertainment was held at the Academy of Music for the benefit of the fund. It was "one of the most brilliant social gatherings that has ever been held in a public place in this city." - Ibid. Ja 14, 18, 28, F. 4, 1883. See also ibid., Mr. 2, 1883. See J. A. and A. 5, 1884.

Mayor Edson returns to the aldermen with his veto a resolution permitting the erection of a watering-trough on the corner of Tenth Ave. and 24th St. He gives two reasons for his action: First, the watering-trough only one block distant; second, because of the "pressing need for especially for the use of water." (see F. 23, 1882). - Proc. Bd. of Ald. (1883), CLXXI: 165. Mayor Edson's term of office was characterized by a great many vetoes thwarting the often ill-considered liberalty of the aldermen in granting privileges. These privileges included obstructions on the sidewalk in the form of a storm-drain, bay-windows, meat-racks, stands for the sale of oysters and other commodities, posters, poles, signs, bill-boards, curtains, awnings, coal-boxes, and thermometers. - Proc. Bd. of Ald. (1883). See also Campbell's, CLXXXI, CLXXXII, under "Mayor."

The state assembly adopts the following resolution: "That the mayor of the city of New York he and he is hereby invited to inform the House what legislation, if any, he may consider necessary in order to economize, simplify and improve the local government of New York City." - Assem. Jour. (1883), 190th sess., I: 124. See F. 8.

The remains of Archbishop Hughes are transferred from the vault in old St. Patrick's Cathedral (on Prince St.) to the archiepiscopal crypt of the new cathedral on Fifth Ave. - Farley, Hist. of St. Patrick's Cathedral, 153.

The elections for 1883 are difficult, and the New York Yacht Club loses the "America's" cup, because the American rules of measurement are so different from the English, the New York Yacht Club, on motion of Anson Phelps Stokes, appoints a committee of five "to report on the feasibility of changing the present system of measurement, and to consult with other clubs on the matter, ... The committee's report, basing measurement on water-line and sail area, was adopted on May 28. "This made international yacht-racing possible here and revived interest in it." - States Records, I: Part 2, pp. 228-229.

In response to the invitation of the state assembly (see J. A. 30), Mayor Edson expresses the opinion that "economy and simplicity in the local government ... can be secured only through the responsibility, to the people, of the Chief Executive for the proper conduct of the necessary departments of the municipal government; and I know of no way to secure such responsibility other than to entrust the Mayor with the power to appoint and to remove the heads of such departments without the intervention of any other authority." He recommends, further, that the head of each department should consist of one person, who should be held responsible by the Mayor for the faithful and efficient conduct of the department. - Proc. Bd. of Ald. (1883), CLXXXIII: 75-74. For the legislation that resulted, see Mr. 17, 1884.

The legislation enacts that, after July 1, 1883, the marine court of the city of New York shall be called the "city court of New York." - Laws of N. Y. (1883), chap. 26.

In accordance with the resolution the senate of Jan. 9 (p. v.), Mayor Edson informs the body that he did appoint a committee to consider with himself "an additional water supply," and he
The Brooklyn Bridge is formally opened to the public, and the occasion is celebrated in New York and Brooklyn with parades, speeches, etc. Pres. Arthur, Gov. Cleveland, and other distinguished visitors are present.—Ev. Post, My 24, 1883; Harper’s Weekly, XVII: 124; for view of additional storage facilities within the water-shed, the committee is “divided in opinion” as to building the “Quaker Bridge Dam” (see F 23, 1882), or separate dams for storing water in the Croton basin at and above Croton Dam. It recommends that this question be referred to “an unprejudiced commission” which shall have charge of the construction of the work—Laws of Committee on Water Supply (1883), p. V. E. L. For the legislation that resulted from this action, see F 1.

The board of aldermen, by a vote of 21 to 3, authorizes the N. Y. Electric Lines Co. to tear up the streets of the city and to lay telegraph wires underground, on condition that the company pay the city 24c per mile of its gross receipts.—Proc. Bd. of Ald., CLXIX: 679-85. This was vetoed by Mayor Edison, on March 25, but was repassed over the veto on April 10.—Ibid., CLXXI: 766-75; CLXXII: 144-44. A year later, the legislature required immediate action to remove the overhead wires.—Ibid., 1884.

The state gives its consent to the purchase by the U. S. for customs purposes, of the land bounded by Washington, West, Laight, and Hobart Sts., now leased by the federal government for approach to the “Old N. Y.”—Laws of N. Y. (1883), chap. 108. Here the present federal building was erected.

The common council passes a resolution that the body of John Howard Payne, author of "Home Sweet Home," now on its way to New York "from a far-off grave in Northern Africa," be placed in the governor's room of the city hall, before being taken to Washington for final burial.—Ordnances, etc., App'd by Mayor, II: 90. The body arrived from Tunis on March 22, and was ceremoniously conducted to the city hall, where it lay in state until the afternoon of March 25. About 5,000 viewed it. The flags on public buildings and the principal hotels and business houses were also lowered to half-mast in Payne’s honor.—N. Y. Times, Mr 23 and 24, 1883.

Lester W. Hoaghand possession of his old playhouse at Broadway and 13th St. (see S 15, 1881) and reopen it as the Star Theatre.—N. Y. Times, Mr 27, 1883; Brown, Hist. of N. Y. Stage, II: 703; L. M. R. K., III: 986. It retained this new name until its demolition in 1901 (q. v.).

The new Fulton Market (see My 12, 1880), erected on the block bounded by South, Front, Fulton, and Beekman Sts., the site of the old market—Eve. Post, N 16, 1882; Ap 2, 1883; descrip. of Pi 104-b, III: 606. It was abandoned by the city in 1914.—Proc. Bd. of Ald., II: 93; 142-46; N. Y. Times, Ag 12, 1917.

Peter Cooper dies, and the flags on the public buildings are placed at half-mast.—Eve. Post, Ap 4, 1883. He was buried on Ap 14, 1884; Mr 7, 1883.

The legislature directs the dock department of the city to construct a pier “upon the lands under water situated and belonging to said city, between the new pier, number one, North river, and Castle Garden.” The police department is to have the exclusive use of the pier and is authorised to erect thereon such buildings as may be necessary for the transaction of business.—Laws of N. Y. (1883), chap. 159.

A law is passed reorganizing the board of emigration, which is placed in the hands of a single commissioner to be appointed by the governor with the consent of the senate.—Laws of N. Y. (1883), chap. 286; Ann. Cyclop. (1883), p. 570.

The corner-stone of Sherrill Hall, the first of the new buildings erected by the General Theological Seminary (see 1882), is laid by the Bishop of Albany. It was dedicated on Jan. 25, 1884. From that time until 1903, nearly a score of buildings were erected. Lorrillard Hall, the last, was occupied in Sept., 1903. The buildings occupy what is called Chelsea Square, the block bounded by Ninth and Tenth Aven., 20th and 21st Sts.—Perry, Hist. of Am. Epis. Ch., II: 106-14; Cat., Gen. Theol. Sem. (1912-13), 61; Schaff-Herzog, Encycl. of Religious Knowledge, XI: 358.

The Hebrew Orphan Asylum is opened on New York Ave. and at 137th St. —Ev. Post, My 16 and 17, 1883; L. M. R. K., III: 954. The building was dedicated the following year.—Daly, Settlement of the Jews in N. Am.; Jewish Encyc., IX: 280.
1887

"The site of the Peter Building, bounded by Park-row, Beekman, and Nassau streets, which was destroyed by fire on the 31st of January, 1882 [p. v], when several lives were lost, is to be covered by an eleven-story structure to be erected by Mr. Orlando B. Potter, at a cost of about $700,000. . . . N. G. Starkweather is the architect.---N. Y. Times, Jl 20, 1883.

The Metropolitan Opera House, begun in 1882, is being demolished. It is to be replaced by a new iron building.—N. Y. Times, Jl 25, 1883. The corner-stone, dated Oct. 8, 1882, was unearthed on Aug. 7—Ibid., Ag 8, 1883. See Je 12, 1884.

Aug.
The first trial of a passenger car over the cable road of the Brooklyn Bridge is made with great success.—N. Y. Times, Ag 15, 1883. Cars began running regularly over the bridge on Sept. 24.—Ibid., 25, 26, 1883. See also ibid., D 28, 1883.

Oct.
The centennial of the dedication of Washington's army is celebrated with elaborate ceremonies at Newburgh, N. Y.—N. Y. Times, O 16, 18, 19, and 20, 1883.

Henry Irving and Ellen Terry arrive at New York.—N. Y. Times, O 21, 1883. On Oct. 27, Irving was the guest of honour at a dinner given by the Lotos Club.—Ibid., O 28, 1883.

The Metropolitan Opera House (see Ap 12, 1881) is opened, on the block bounded by Broadway, 39th St., 40th St., and Seventh Ave. The opera is "a Faust," Italo Compagni and Christine Nilsson being the principal singers.—N. Y. Times, O 23, 1883; Brown, Hist. of the N. Y. Stage, III: 442; Keating's Handbook (1893), 538. See also L. M. R. K., III: 985. It was destroyed by fire on Aug. 27, 1892.—Ibid., Je 12, 1893.

"Matthew Arnold arrives at New York on a visit to America.—N. Y. Times, O 23, 1883. A reception in his honour was given by Andrew Carnegie on Oct. 27 at the Windsor Hotel.—Ibid., O 28, 1883. Arnold delivered his first lecture in America at Chickering Hall on Oict. 30.—Ibid., O 31, 1883.

The N. Y. Telephone and Telegraph Co. is incorporated.—N. Y. Times, O 23, 1883.

Henry Irving makes his first dramatic appearance in America, at the Star Theatre (see Mr 26). He plays Mathias in "The Bells."—N. Y. Times, O 30, 1883.

Ellen Terry makes her début in America, at the Star Theatre in the character of Queen Henrietta Maria in "Charles I." Henry Irving plays the title role.—N. Y. Times, O 31, 1883.

Nov.
The 400th anniversary of the birth of Martin Luther is commemorated by the U. S. Evangelical Alliance at the Academy of Music.—N. Y. Times, N 14, 1883.

Standard railroad time in the United States goes into effect.—Harper's Encyclopedia, of U. S. Hist., Vol. IX.

The new Madison Avenue M. E. Church at 60th St., the cornerstone of which was laid on July 31, 1882, is formally dedicated.—N. Y. Times, Ag 1, 1882; N 12 and 19, 1883. See also L. M. R. K., III: 930.

The coloured R. C. Church of St. Benedict the Moor, at Bleeker and Downing Sts., is dedicated. This is the first church for negro Catholics in the northern part of the United States.—N. Y. Times, N 19, 1883. It is now in West 53rd St.

The University Club has leased for 10 years the Leonard W. Jerome mansion at 26th St. and Madison Ave., formerly used by the Union League Club (see Mr 31, 1883).—N. Y. Times, N 22, 1883; L. M. R. K., III: 939, 950. The University Club occupied the Jerome residence until 1897 (v. e.).

As Nov. 25 fell on a Sunday, the centennial anniversary of the evacuation of New York by the British was elaborately celebrated, alone, with a civic and military parade, a river procession of almost 200 boats, and a Chamber of Commerce banquet at Delmonico's. Pres. Arthur, his cabinet, and other distinguished visitors were present.—N. Y. Times, N 25-27, 1883. See also Harper's Weekly, XXVII: 754-55, and Centennial Celebration Com.; Report of the Joint com. on the centennial celebration of the Evacuation of N. Y. by the British (N. Y., 1883). See f; F 7, 1884.

The statue of George Washington, erected at the instance of the Chamber of Commerce in front of the sub-treasury on the spot where Washington first took the oath as president of the United States (see f 7, 1880, and N, 1881), is unveiled by Gov. Cleveland and accepted by Pres. Arthur in the name of the U. S. Government. George Wm. Curtis delivers an oration at the dedication of the statue. The statue, which cost $15,000, was paid for by the merchants of New York.—N. Y. Herald, N 27, 1883; Curtis, Address at Unveiling of Statue of Washington (1883). See also Harper's Weekly, XXVII: 777, 781; L. M. R. K., III: 965; and description of Pl. 166, III: 984.

Mayor Edson, pursuant to the provisions of the Rapid Transit Act (see Je 18, 1885), appoints five "Rapid Transit Commission- ers," which is the immediate occasion of the many threats and threats of the city, by a declaration, signed by "more than fifty reputable householders and taxpayers," that there is need for "a steam railway or railways for the transportation of passengers, mail or freight," a need which he desires these commissioners to investigate.—Proc., Bd. of Ald. (1884), CLXXIV: 535-54; Carman, Street Surface Railway Franchises of N. Y. C., 179-80. See Je 30, 1884.

The centennial anniversary of Washington's farewell to his officers at Fraunces Tavern is celebrated by the Chamber of Commerce and the N. Y. Historical Society with a turtle feast in the long-room of the historic building. John Austen Stevens proposes that these present shall form a society to be called the "Sons of the Revolution."—N. Y. Times, D 3 and 5, 1883. See also Brown, A Sketch of Fraunces Tavern (1910), 19.

The Standard Theatre in West 33rd St. (see F 20, 1878) is almost totally destroyed by fire.—N. Y. Times, D 15 and 16, 1883. See also Brown, Hist. of the N. Y. Stage, III: 235-36. It was rebuilt and opened on Dec. 23, 1884.—N. Y. Times, D 24, 1884.

The "Rapid Transit Commissioners" (see N 30) resolve that "there is a necessity in the City and County of New York for a steam railway or railway system of transportation of passengers, mail or freight," and that "such necessity exists, notwithstanding the facilities offered by the steam, surface and elevated railways now in operation."—Proc., Bd. of Ald. (1884), CLXXIV: 854-55. See Ap 28, 1884.

During 1884-85, a general conference was held at Berlin, attended by the United States and all the countries of Europe, except Switzerland, to settle claims to the Congo region. The conference recognized the independence of the Congo Free State, and declared that trade in it was to be open to all nations on equal terms. The new state, however, became practically Belgian and in 1908 was made a Belgian colony subject to the Belgian parliament.—Hazen, Europe since 1815, 555-57.

In this year, Gladstone carried through the "Reform Bill of 1884," extending the borough franchise to the counties so that the mass of workingmen would have the right to vote whether they lived in town or country. This bill and those enacted for Scotland and Ireland "increased the total number of the electorate from one hundred to over five millions" and transformed England "from an oligarchy into a democracy."—Hazen, Europe since 1815, 492-93.

During the five years from 1880 to 1885 inclusive, 1,928,167 alien immigrants arrived at the port of New York.—Arrivals of Alien Passengers and Immigrants (Washington, 1891), 64, 106, 109.

In this year, the first long-distance telephone line in the world was constructed, between New York and Boston. In 1885, a line was put into operation between New York and Philadelphia, and in 1892 one between New York and Chicago.—Encyclopedia Americana, XXVI: 374-75.

In this year, Benson J. Lossing's History of New York City was published. It embraces a very brief history of the city from its foundation to 1850, and a full account of its development from 1850 to 1884. It is essentially a social history, describing aspects of home life, business activities, and social organizations during a period of two generations.

In this year was published a statement, signed by Peter Somers and Wm. Lalor, entitled Reasons why an exterior street should be continued along the East River, from 46th to 51st St., in the city of New York.—See Je 55, 1885.

About this time, John S. Sargent, the portrait painter, who in this year made his home in London, began to paint portraits in New York, which are now among his best known works.—Fielding, Dict. of Am. Painters, etc. (1906), 316.

The Charity Organization Society opens its first "Wood Yard," at 402 East 24th St. This was established "not with any idea of providing work at fair prices for the unemployed, but purely as a means by which to test the good faith of those seeking relief under
Chronology: The Modern City and Island: 1876-1909

1884. The plea of inability to procure work." Tickets were printed whichJan.
were purchased by charitable persons who gave them to beggars
they encountered on the street or at home. Each ticket admitted
a man to the "Wood Yard" and entitled him to a "day's work,"
the cutting of cotton bolls, or the "sowing" of grain. Lighters were
provided for men who were not strong. On completion of his
task, each "man with a home" received fifty cents in cash, and
each homeless man received two meals and a night's lodging.
On Feb. 9, 1886, the "Wood Yard" was transferred to the newly-
formed New York Labor Bureau Association, but on Oct. 9, 1888,
the society resumed its management. After the founding of the
municipal loan of 1886 (q. v.), the association was returned to the
"Wood Yard" by the city to pay for the food and shelter
they had received.—Brandt, Charity Organization Soc. of City of

Mayor Edison sends his second annual message to the board of
aldermen. He tells of the progress made during the year toward
an increased supply of water, but 1890, 1 (q. v.), emphasizes
the imperative necessity for economy in the use of water,
and declares it to be the duty of all officials and good citizens
"to suppress waste, and to oppose any increase in the
distribution of water except in cases of extreme necessity.

The mayor pronounces the present building laws "cruel and inopera-
tive," and recommends that "representative architects, builders,
and owners, with the aid of the Board of the Bureau of
Inspection of Buildings [see My 19, 1885], should consult together
and agree upon such recommendations to the Legislature
as will be likely to secure the adoption of measures which will
protect public interests without retarding legitimate individual
enterprise."

Another recommendation is that a "thorough investigation"
be undertaken "of the present system and of the methods pursued
in making valuations of realty [see Mr 14] by the Department of
Taxes and Assessments." In an "examination and valuation of
eighty-seven pieces of real estate by men possessing expert knowl-
eges," it has been discovered that "the fair aggregate actual value
is $4,030,000, while the valuation of the same property as taken
from the books of the city is only $2,496,510. Furthermore,
while many of these pieces of property "are valued by the
Department at very nearly their full value, many others are valued
at less than fifty per cent of their real value." Such a situation, he
declares, affects "the whole financial structure of the city, inviting widespread dishonesty in efforts to escape the payment of a just
proportion of the necessary expenses of government."

The "Commission of the Municipal Corporation," he emphasizes.
"The City Hall . . . has long since ceased to be much more than
an Executive Building, with rooms for the Mayor, the Board of
Aldermen, and a Governor's Room occupied only on State
occasions. Its style of architecture is such that, without marring its
present symmetry, it cannot be enlarged to the required extent.
Our city is now put to great annual expense in hiring rooms in various buildings for very many of its public offices, and much
time is lost in passing from one to another." The mayor believes
"a disinterested commission" should consider the possible purchase
of the Stewart building at the corner of Chambers St. and
Broadway.

By authority conferred upon mayors by the Civil Service Act
of June 2, 1887 (q.v.), Mr. Edison says that, with the "assistance of
the Civil Service Commissioners of the State," he has prepared
"rules and regulations for the admission of persons into the civil
service of this city," and appointed "Boards of Examiners" who will
"immediately enter upon the performance of their duties."—

The state assembly appoints a special committee, with Theodore
Roosevelt as chairman, "to investigate the local government of
the city and county of New York."—Assemb. Jour. (1884), I: 89.
This committee rendered a report on March 15 (q.v.).

The Union League Club holds a reception in honor of Pres.
Arthur. Nearly 2,000 guests are present, including Mayor Edison.
Wm. M. Evarts, Gen. and Mrs. George B. McClellan, Whitelaw
Reid, Henry Ward Beecher, Parke Godwin, Elihu Root, and
Currier W. Field.—New York Times, March 15 (q.v.).

The Grolier Club is founded at the residence of Robert Hoe by a
group of nine publishers, printers, and book-lovers, for promotion
of the arts pertaining to book production. The first rooms occu-
pied by the club were at 64 Madison Ave. The club continued
to occupy these quarters until the removal to its new club-house,
No. 29 East 32d St., in Nov., 1889. The club was incorporated
on Aug. 2, 1888.—Transactions of the Grolier Club, Part II, and
records of the club.

The new Calvary Baptist Church in West 57th St., the corner-
stone of which was laid on May 29, 1884, is dedicated.—Ev. Post,
My 30, 1884; F 4, 1884.

As this is the 100th anniversary of the inauguration of James
Duane, the first mayor of the city after the Revolution, the board of
aldermen passes the following resolutions:

Resolved, That we urgently call upon the citizens of New York of to-day to give an example of patriotism by taking a hearty interest in the welfare of representative popular city government, and by insisting upon its maintenance as an integral part of our political system and as necessary to the due
protection of the many and various interests of this vast city;
that we regret the growing indifference of our citizens to affairs
of State, and especially the neglect of many of our best citizens
to attend the polls on election day; and that we deplore the boast
of many of them that they 'take no interest and know nothing of politics,'
as predicking a state of affairs which must eventually destroy all
hope of self-government by the people;

Resolved, That in honor of this centennial of the reconstruction
of the municipality under a free government, the flags be
displayed on all buildings of the city. The birthday of our city,
the "day" of the celebration, is June 29, 1884.

—Ordinances, etc., App'd by Mayor, LII: 16-18.

Resolutions are passed by the board of aldermen objecting to the
employment of "an unnaturalized person of English birth, a
subject of the Queen of Great Britain," to prepare the volumes of the
"proceedings attendant upon the celebration of the Centennial
Evacuation Day" [see N 26, 1883], to be placed among the
archives of the New York Historical Society. This is called "an
insult to the graduates and scholars of the public schools of this
city, and its system of education, as well as to the memory of those
patriots who a century ago laid down their lives for the perpetuity
of American institutions." The resolutions were subsequently

One member of the board declared the resolutions "chaptrap, and
demagogism of the very worst quality." The Tribune editor believes such resolutions a powerful argument "to limit the activity of the board."
"If their power for mischief go no further, we shall not suffer much."—N. Y. Tribune, F 8, 1884.

The department of parks is directed to improve "the park in
Union Square Place, in the southern ward of the City of New York,
which park is commonly called Paradise park," by planting trees,
placing benches, repairing the fountain, and removing "the iron
structure now erected and standing thereon." The sum of
$5,000 is to be appropriated for these improvements.—Laws of
N. Y. (1884), chap. 18. See also L. M. R. K., III: 971.

The cornerstone of the New York Cotton Exchange building is
laid at the intersection of Beaver and William Sts. The building
extends through to Hanover Sq. It was occupied by the exchange
April 29, 1885.—N. Y. Times, F 26, 1884; My 1, 1885.
Information furnished by Mr. Thomas Hale, Jr., sup't, N. Y. Cotton

On this and the following days, Geo. A. Leavitt & Co. sold at
auction the library of the late Henry C. Murphy, of Brooklyn,
consisting of American and English books relating to America.—
Spec. of the sale, in N. Y. P. L. At this sale, the Long Island
Hist. Soc. secured the Labadist views and the Journal by Jasper
Dankerts and Peter Slyuter who accompanied them for $5,50
(No. 3954). The views are reproduced as Pls. 17, 18, and 19, Vol. I.

The special committee of the state assembly appointed, on Jan.
15 (q.v.), to investigate the local government of the city and
county of New York, renders its report. They find the whole
government in a condition "absolutely appalling." In the county
clerk's office, the present fee system is found to net the incumbent
during his term of office "the enormous sum of a quarter of a
million dollars! A large part of this is not retained by him for his
own use, but is turned over to the various political organizations
which supported him for re-election."—N. Y. Steam. Union,
Jan. 23.

The register's office, unlike the county clerk's, is "not supported
in any way by the city," all the expenses being borne by the register
personally, who likewise receives all the fees; "a net income of at
least $75,000 or $80,000 a year" is lost to the city by this practice.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1884

Mar. 14

The surrogate's office is surrounded by so many irregularities and illegal practices that it seems to run "simply for purpose of blackmail on those unable to defend themselves." One great source of wrong and injustice is the granting of desk-room in the office to certain persons "not officially connected with the office," who are permitted "to perform certain services for the public at large and to exact from the public therfor amounts greatly in excess of what the services are really worth." Worse still are conditions in the sheriff's office. "In addition to the fees which are specifically fixed, the sheriff is authorized to receive a reasonable compensation for performing certain other services required of him by law and for which he looks to the county for his pay." The "reasonable compensation" fixed by the board of aldermen for him to receive for informing the secretary of state of each conviction in the city criminal courts is 70 cents; this work brought to the sheriff's pocket last year $26,290. The committee contends an ordinary clerk at a salary of $1,100 to $1,500 could easily perform this routine duty. Further, the sheriff received last year $23,109 from the county for conveying prisoners from the city prison to the courts, a distance of "about six city blocks," at $1.75 a head, and "your committee is of the opinion that $5,000 per annum be a very liberal allowance for that work." Again, for feeding prisoners during the year, he received $29,119, "more than half of which was, undoubtedly, clear profit." The committee also observes that, "by the grace of the board of aldermen," the sheriff "is given about six hundred dollars whenever a person is hung." Notwithstanding these liberal allowances, it is evident "that the sheriff has in his possession moneys to which he has no possible title, and which were taken from the treasury of the city of New York by means of fraudulent vouchers sworn to by his subordinates; he has benefited to the extent of thousands of dollars by their misdeeds; and the conclusion seems inevitable that these misdeeds were committed by his instigation, or with his connivance. Many of his subordinates and deputies probably have been guilty of the most outrageous blackmail and extortion upon the unfortunate beings with whom they were by the nature of their duties, brought in contact."

Most amusing is the situation which the committee discovered in the department of parks. "The commission is four-headed, and the president, who is elected by the board, is the only one who has a salary; as a consequence, the board remained unorganized for two years, each member persistent—refusing to vote for any one except himself for president; and it was only organized at last by the adoption of the curious expedient of a rotary presidency, each member, the Republicans as well as Democrats, being elected in turn for a few months, to what one of them called, in the evidence taken before the committee, 'the office of emoluments and trust.' A more undignified squabble for the spoils of office has rarely been seen."

In the department of taxes and assessments the "greatest inequalities" were found to prevail in the manner of assessing real estate. The assessor in charge of assessing "all the immensely valuable property in the first ward," when questioned as to the method by which he arrived at the value of any given lot of land, "was finally forced to admit that it was by means of 'that intuitive consciousness that God gives us all.'" Embodied in the committee's report are bills for enactment by the legislature to remedy the various situations.—Assembly Doc. (1884), VIII: no. 125. For the resulting legislation, see Laws of N. Y. (1884), chaps. 295, 297, 299, 339, 531.

The power of the board of aldermen to confirm appointments made by the mayor is abolished (after the current year) by legislative enactment. This law did not change the power of removal from office.—Laws of N. Y. (1884), chap. 43; Ann. Cyclop. (1884), p. 580. At the time when this measure was introduced the Tribune editor declared: "Elect Mayors that will represent the genuine worth and dignity of this great metropolis and hold them responsible for their appointments. . . . The government of [by] groggeries has had the majority of the councilmen in their positions from behind the bars of corner dramsops, and few of them know as much of the city charter as they do of the composition of cocktails."—N. Y. Tribune, Feb. 8, 1884.

"The expediency of such a measure," says the Sun, "had long been discussed by the press, and public opinion was finally influenced in its favor by the repeated curses offered for bad appoint-
1884 sale would furnish a competence for his wife. Though suffering intensely from cancer of the throat, he continued this work for about a year, and finished his book shortly before his death on July 23, 1885 (q.v.).—Encyclopaedia Am., XIII: 138.

An important measure, giving to "local authorities" in cities, towns, and villages, the power "to provide for the construction, extension, maintenance and operation of street surface railroads," passes the legislature. This "General Surface R. R. Act" expressly excludes surface railways from the authority of the "Rapid Transit Act of 1877" (q.v.).—Je 183. Hereafter, under regulations, associations of persons formed "for the purpose of constructing, maintaining and operating a street surface railroad" shall become corporations automatically by filing "articles of association" with the secretary of state. It is provided that local authorities "may, at their option, provide for the sale of, and sell at public auction the franchise" for such a surface road; also that, in cities of 250,000 or over, the corporation shall pay to the city annually for the privilege 3½% (after five years, 4%) of its gross receipts; also that the corporation shall "keep in permanent repair" that portion of the street between the tracks and for a space of two feet outside the tracks. A five cent fare "for one continuous ride" is specified with certain qualifications.—Laws of N. Y. (1884), chap. 232.

The new Palace Exchange, on the block bounded by Whitehall, Moore, Pearl, and Water Sts., is abandoned, and the new building on Broadway (see Je 6, 1884) is formally dedicated.—Eve. Post, My 6, 1884. See also Harper's Weekly, XXVIII: 285; Harper's New Monthly Mag. (1886), 189-218; description of Pl. 156-5, III: 839; and L. M. R. K., III: 925.

The legislature authorises the New Y. and Harlem R. R. Co. to enlarge the Harlem depot (the Grand Central Station) by extending it to a line 80 feet east of Fourth Ave., from 42d to 45th St.—Laws of N. Y. (1884), chap. 261.

The legislature empowers New York City, through the commissioners of public charities and correction, to purchase Riker's Island, the total expenditure in the transaction not to exceed $180,000. Riker's Island is to become a part of the 23d Ward.—Laws of N. Y. (1884), chap. 279.

The name of Reservoir Square is changed to Bryant Park.—Laws of N. Y. (1884), chap. 282. See also L. M. R. K., III: 968.

The corner-stone of the New York Cancer Hospital is laid at Eighth Ave. and 106th St.—Eve. Post, My 19, 1884. See 1887.

The commissioners of public charities and correction are authorised to acquire title to the whole of Ward's Island at a reasonable price.—Laws of N. Y. (1884), chap. 342.

The state civil service act of June 2, 1883 (q.v.), is so amended as to make its application obligatory on New York City and the other cities of the state. Within two months from this date, the several mayors are required to classify "all subordinate clerks and officers in the public service," after another month has elapsed, "no officer shall be appointed to the city without the board shall be admitted to or be promoted in either of the said classes . . . until he has passed an examination, or is shown to be exempted from such examination" under the commission's regulations.—Laws of N. Y. (1884), chap. 410; cf. Ann. Cyclop. (1884), 589.

The College of Pharmacy (see 1878) is incorporated.—Laws of N. Y. (1884), chap. 447.

June

The corner-stone of parks is authorized to enlarge the Metropolitan Museum of Art at an expense not exceeding $350,000.—Laws of N. Y. (1884), chap. 447.

A more effective measure aiming at improvement in city tenement-houses is passed by the legislature. For earlier ones see My 14, 1867; Je 16, 1879. It provides for a non-salaried commission of 11 members "to investigate and inquire into the character and condition of tenement-houses, lodging-houses and cellars in the city of New York." For the expenses of the commission $5,000 is appropriated. The members of the commission are Alexander Shaler, Joseph W. Drexel, S. O. Vanderpold, Felix Adler, Oswald Ottendorfer, Moreau Morris, Anthony Reichardt, Joseph J. O'Donohue, Abbot Hodgman, Chas. F. Wingate, and Win. F. Everson.—Laws of N. Y. (1884), chap. 448; De Forest & Veiller, The Tenement House Problem, I: 102-11; II: 335-34. See F 15, 1885.

The commissioners of accounts, created by the Charter of 1873 (q.v., Ap 30), are now made officers with power by a legislative act authorising them "to compel the attendance of witnesses, to administer oaths and to examine such persons as they may deem necessary." The salary of the office is fixed at $5,000.—Laws of June N. Y. (1884), chap. 316.

The first half of the New Washington Market on Vesey St. (see Jl 25, 1883) is informally opened. The remainder will be completed in about six months.—Eve. Post, Je 12, 1884.

A commission is appointed by the mayor, in accordance with an act of the legislature, to select land for public parks in the 23d and 24th Wards of the city, which lie north of the Harlem River. The commission chose the sites of Van Cortlandt, Bronx, and Pelham Bay Parks, together with land for three smaller parks—Crotona, Claremont, and St. Mary's—and prepared a bill enabling the city to acquire them. This was presented to the legislature and became law on July 14, 1884.—Laws of N. Y. (1884), chap. 522; Ann. Cyclop. (1884), 561. For a detailed account of the steps leading to the choice of these parks and a description of them, see Mullally, N. T. Parks; Beyond the Harlem (1887).

The legislature again sets apart the land bounded by Bloomfield, Gansevoort, and West Sts. and Thirteenth Ave. for market purposes; and the block bounded by Little 12th, Gansevoort, Washington, and West Sts. and Tenth Ave. is again declared a public market-place for the exclusive use of farmers and market gardeners (so first declared on My 7, 1880, q.v.).—Laws of N. Y. (1884), chap. 525. The former ground became the site of the new West Washington Market (see Jl 26, 1886). The latter site was first called the Farmers' Market but is now known as Gansevoort Market.—L. M. R. K., III: 959. A map of the ground, dated Oct. 1886, is filed in the bureau of topography, borough president's office, as Map No. 4921.

The board of street openings is authorised, whenever it shall be deemed necessary for the public good, to acquire title to the lands bounded by Cherry and Jackson Sts. and the East River, and to convert them into a public park.—Laws of N. Y. (1884), chap. 529. The property was acquired in 1883 (q.v., Jl 17) and became Corlear's Hook Park.—L. M. R. K., III: 969. See also O 20, 1889, and My 8, 1894.

The legislature passes a law requiring that "all telegraph, telephone and electric light wires and cables" shall be "removed from the surface of all streets or avenues" before Nov. 1, 1885.—Laws of N. Y. (1884), chap. 534.

The statue of Simon Bolivar is unveiled in Central Park.—Eve. Post, Je 18, 1884.

The ceremony of the formal presentation by the French government to the U. S. of Bartholdi's "Liberty Enlightening the World" (see Mr 3, 1877) takes place at Paris.—N. Y. Times, Jl 5, 1884. See Ag 5. In April, 1885, the statue was taken apart and shipped in 210 cases to New York where it arrived on June 19, 1885 (q. v.).—22d Ann. Rep., Am. Soc. & Hist. Soc. Pres. Soc. (1917), 221.

The bronze copy of Houdon's statue of Washington, which was placed in the city hall in 1879 (q.v.), is unveiled in Riverside Park at the request of the city hall and the public schools.—Eve. Post, Jl 5, 1884. It is now in the Metropolitan Museum of Art.—Cat. of Works of Art Belonging to the City, 180-81.

31 The cornerstone of Parks is authorized to enlarge the Metropolitan Museum of Art at an expense not exceeding $350,000.—Laws of N. Y. (1884), chap. 447.
1986

THE ICONOGRAPHY OF MANHATTAN ISLAND

1884

fear from desecration, insure a proper construction and the use of rails which will produce the least possible obstruction in the streets, and at the same time guarantee efficient service."

25 Proc., Bd. of Ald. (1884), CLXXV: 431–37. The aldermen repassed the measure over the veto, on Aug. 30 (g.v.).

The common council gives direction to the commission having authority to make contracts for street lighting, to cause all those portions of Fifth and Eighth Aves., 59th and 111th Sts., to be lighted with electricity.—Proc., App’d by Mayor, LI: 278.

The new barge office at the Battery is formally opened.—See Post, Ag 25, 1884. See also L. M. R. K., III: 973.

30 Notwithstanding the objections of Mayor Edison (see Ag 18), the aldermen pass again the resolution granting a franchise to the Broadway Surface Railroad Co.—Proc., Bd. of Ald. (1884), CLXXV: 503–4. "The corruption of this board of aldermen was such it came to be known as 'the Boodle Board.' The sequel is well known. Aldermen Duffy, Fullgraff and Waite turned state’s evidence. Alderman Henry W. Jashne was convicted on his own confession and sentenced ... to penal servitude at hard labor for the term of nine years and ten months, for having received a bribe of $20,000 for his vote. Alderman 'Honest' John O'Neill was sentenced ... to imprisonment at hard labor at the state prison for four years and a half and to pay a fine of two thousand dollars. Alderman Arthur J. McQuade was sentenced ... to seven years in the state prison for bribery and to return five thousand dollars of bribe money to the city. He was released ... and ... after having accumulated assets, James Sharp was sentenced ... to four years in the state prison, and to pay a fine of five thousand dollars. He obtained a stay and a new trial, but died before the retrial was held. Aldermen Keenan, DeLacy, Dempsey, Rothman, Sayles, and Maloney fled to Canada and other parts. Aldermen Farley, Finch, Kirs, Miller, Pearson, Reilly, Shiel, Wendel, Cleary, and Richardson were indicted ... but ... these indictments were dismissed.——Fullgraff vs. N. Y. Co., 143. See also “Final Report of Committee on Railroads Relative to Broadway Surface Railroad Company,” Senate Doc. (1886), No. 79.

Indigation at the recent action of the aldermen (see Ag 30) is the cause of a mass meeting in Chickering Hall, at which resolutions are adopted providing for a committee of fifty, "charged with the duties of protecting the franchises of the city; securing their value to the City Treasury when sold; of bringing to justice the unfaithful officers who have attempted or shall attempt to give these franchises away; of breaking up the existing scheme to capture the franchise for a Broadway railroad, and generally of assisting the Mayor in all practicable ways to protect and defend city property."

—N. Y. Times, S 5, 1884. See also Fullgraff vs. N. Y. Co., 143.

Oct.

6 At a meeting, also on this day, of the committee of fifty (see S 4), it is resolved that "the franchise of a railroad in Broadway should only be granted to the highest responsible bidder at public auction."—N. Y. Times, O 7, 1884.

The new military parade-ground in Van Cortlandt Park is formally opened.—N. Y. Times, O 7, 1884.

13 Mayor Edison communicates a special message to the aldermen, expressing reasons additional to those offered on August 15 (g.v.) why they should not take favorable action on the new petition of the Broadway Surface Railroad Co. He shows how any agreement between this company and the Broadway and Seventh Ave. company (see O 6), to allow each use the other's tracks is "an ingeniously contrived prelude" to a scheme by which the city will be "juggled out of revenues which the Legislature intended should be secured to it as compensation for the grant of a valuable franchise."

He estimates that the net income of the company the first year will be "little short of $400,000," and raises the question: "Why should they, of all the million and a half inhabitants of this city, have such an enormous fortune conferred upon them at the expense of their fellow citizens?"—Proc., Bd. of Ald. (1884), CLXXVI: 449–55.

The city acquires title to the land on the west side of Columbus Ave. between 61st and 62d Sts. On this the armory of the 12th Regiment was afterwards built.—Prendergast, Record of Real Estate (1914), citing Libers of Conveyances.

The subject of introducing electricity as a motive power on devoted railways is under discussion.—N. Y. Mail & Express, Nov., 31, 22, 24, D 1, 2, 5, 9, 10, 13, 16 & 20, 1884.

24 Grover Cleveland and Thos. A. Hendricks, Democrats, are elected president and vice-president. The Republican candidates were James G. Blaine and John A. Logan.—McKee, National Conventions and Platforms, 201–31.

Wm. R. Grace (see N 2, 1880), who had been nominated for mayor by the citizens’ committee, and was supported by the County Democracy and Irving Hall, is again elected mayor.—N. Y. Times, N 5 and 6, 1884; Ann. Cyclop. (1884), 586. Grace was succeeded by Abram S. Hewitt (see N 3, 1886).

At the state elections, a large majority of the voters approves an amendment to the state constitution forbidding a city of 100,000 inhabitants or over to incur indebtedness in excess of 10% of the assessed value of the city’s real estate.—Leg. Matter (1885), 126.

The city acquires title to the land comprising the block bounded by Broadway, Columbus Ave., 67th and 68th Sts. On this the armory of the 22d Regiment of Engineers was afterwards built.—Prendergast, Record of Real Estate (1914), citing Libers of Conveyances.

With two dissenting votes, the aldermen, "in lieu of, or in substitution for, the resolution" passed on Aug. 30 (g.v.), grant a franchise to the Broadway Surface Railroad Co. for the use of Broadway to Union Square, declaring that "an urgent necessity exists for a railroad in Broadway between the Battery and Union Square." In addition to the legal requirement of an annual payment to the city of 3½% of gross receipts at first, and, after five years, of 5½%, the additional annual payment of $40,000 is exacted.—Proc., Bd. of Ald. (1884), CLXXVI: 706–17. This measure was vetoed by Mayor Edison on Nov. 24 (g.v.).

A season of German opera is begun at the Metropolitan Opera House, under the management of Edmund C. Stanton and with Leopold Damschro as musical director. "Tannhäuser" is the first presentation.—Brown, III: 443; King’s Handbook (1893), 588. This experiment was so successful that a similar policy was pursued during the six years following. During that period, all Wagnerian operas (excepting Parsifal) were produced in magnificent style, some of them for the first time in America. In the spring of 1891, the stockholders decided to set aside German opera for the time being, and contracted with Henry E. Abbey for a season of Italian and French opera, to be given during the winter of 1891 and 1892.——Ibid.

Mayor Edison returns to the aldermen with his veto a second resolution (for the first, see Ag 6) granting a franchise in lower Broadway to the Broadway Surface Railroad Co. (see N 15). He observes that the "value of the franchise is now admitted" by the board, but he is convinced that it is not conferred upon the local authorities by the new law (see My 6) "to arrive at the value of this franchise in any other way than by public auction," especially whenever several companies are asking consent to construct a railroad through this great thoroughfare, each claiming to afford better facilities for public travel than the other.—Proc., Bd. of Ald. (1884), CLXXVI: 777–84. See D 5.

The aldermen give permission to the Bleeker Street and Fulton Ferry Railroad Co. to extend its tracks from Park Row through Wall St. "to any tracks that may be constructed in Broadway."—Proc., Bd. of Ald. (1884), CLXXVI: 766–73. "This seemingly was a minute and unimportant extension, but it effectually furthered the elaboration of a gridiron system of railroads which Sharp [president of this company and leading petitioner for the Broadway Surface Railroad Co.] and his associates had in view."—Myers, Public Franchises in N. Y. C., 145. This measure was vetoed by Mayor Edison, on Dec. 4 (g.v.).

The city acquires title to the land comprising the block bounded by Madison and Park Aves., 94th and 95th Sts. On this the
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876-1909

1884
armories of Squadron A and the 8th Regiment were afterwards built.—Prendergast, Record of Real Estate (1914), citing Liber 1842.

26
The aldermen grant a franchise to the Chambers Street and Grand Street Ferry Railroad Co. This railroad, it is declared, will "supply to the public the only means of crossing the city from river to river, by a direct route... south of Canal and Walker streets."—Proc. Bd. of Ald. (1884), CLXXVI: 877-78. Mayor Edson vetoed this measure on Dec. 8.—Proc., Bd. of Ald. (1884), CLXXVI: 1916-19. See D 30.

Dec

4
Mayor Edson dissolves the corporation of the aldermen permitting the Bleecker Street and Fulton Ferry Railroad Co. to extend its tracks (see N 24). His chief objection is that "no compensation is required to be paid to the city for the privilege."—Proc., Bd. of Ald. (1884), CLXXVI: 981-83. Myers, Public Franchises in N. Y. C., 145, errs in ascribing this veto message to Sept. 5. The resolution was passed again on Dec. 20 (q.v.).

5
The aldermen pass over the mayor's veto (see N 24) their resolutions favouring the Broadway Surface Railroad Co.—Proc., Bd. of Ald. (1884), CLXXVI: 938-42. "Thus, after trying first in 1882 (q.v., JI 16) and every little while thereafter, Jacob Sharp finally succeeded in getting control of Broadway."—Myers, Public Franchises in N. Y. C., 143.

The committee on railroads of the board of aldermen reports favorably on the application of a franchise to the New York Cable Railway Co. (see Ap 28). The committee believes the cable system "gives speed without danger," and "gives a constant service irrespective of snow and ice;" furthermore, under the scheme as proposed by the transit commissioners, it gives "immeasurable facilities for rich and poor" by providing "transit up-town, down-town, cross-town for a single fare of five cents, on a line of seventy miles of track."—Proc., Bd. of Ald. (1884), CLXXVI: 1972-74. The report was laid over for further consideration. Before the meeting of the common council took place, an owner of abutting property along one of the proposed routes secured a temporary injunction restraining the board from making the grant. This injunction was dissolved, and immediately another owner obtained a stay order, which continued in force until December 31, 1884. "It was vacated at too late an hour to give the then outgoing Mayor opportunity to consider whether he ought to approve the consent of said Board to the construction of said railway or railways in case said Board should adopt a resolution to that effect."—Ibid. (1886) CLXXVI: 151. See F 2, 1885.

9
The new buildings of the Union Theological Seminary (see Mr 1877) on Fourth Avenue from 69th to 70th Sts., are dedicated.—N. Y. Times, D 10, 1884; L. M. R. K., III: 941.

20
The board of aldermen pass the resolutions favouring the Bleecker Street and Fulton Ferry Railroad Co., despite Mayor Edson's veto (see D 4).—Proc., Bd. of Ald. (1884), CLXXVI: 1082.

23
Harrigan & Hart's Theatre Comique (see Ag 29, 1881), on the east side of Broadway between 4th St. and Astor Place, is destroyed by fire—N. Y. Times, D 24, 1884; L. M. R. K., III: 984. See Mr 2, 1885.

30
By a vote of 22 to 2, the aldermen pass, over the mayor's veto (see N 26), their resolutions favouring the Chambers Street and Grand Street Ferry Railroad Co.—Proc., Bd. of Ald. (1884), CLXXVI: 1205-7.

1885
The Pasteur treatment for hydrophobia, by inoculation with rabid virus, was first applied to human beings in this year, after prolonged investigation and experiments on animals.—Encyclop. Brit., XIV: 169-70.

In this year, the Dunlap Society, named in honour of Wm. Dunlap, was organized to issue reprints of rare books and pamphlets relating to the American theatre and to collect and preserve portraits of distinguished American actors, dramatists, and other theatrical celebrities.—The Dunlap Society (1885), pamphlet in N. Y. P. L.

The Holland Society of New York is founded, chiefly for historical but also for social purposes.—Van Rensselaer, Hist. of the City of N.Y., 248-58.

In this year, the Cosmopolitan was founded, with James Brehon Walker as editor.—King's Handbook (1891), 616.

In this year, Gottlieb Daimler produced the first motorcycle and Carl Benz, another German, built the first successful gasoline-driven motor-car.—Sullivan, Our Times (1926), I: 479.

In this year, Little Lord Fauntleroy, by Mrs. Frances Hodgson Burnett, was first published, as a serial in the magazine Saint Nicholas.—Encyclop. Am., XVII: 511. See also Sullivan, Our Times (1926), I: 279.

In this year, the Tenement House Building Co. of N. Y. was founded to erect model tenement-houses. It built at 338 to 344 Cherry St. and opened its houses on Dec. 1, 1887.—Gould, The Housing of the Working People, 196-200, including view and plan. A bronze bust of Washington Irving by Friedrich Bergner is given to the city and placed in Bryant Park.—Cat. of Works of Art Belonging to the City, 161; L. M. R. K., III: 964. It follows the Plume daguerreotype portrait of Irving.—See the Seligman collection in the N. Y. P. L.

In this year, the first cable cars were installed, on the 125th St. and the Amsterdam Ave. lines of the Third Ave. R. Co.—N. Y. Electrical Handbook (pub. by Am. Inst. of Electrical Engineers, 1904), 127; N. Y. Daily Tribune, Ag 10, 1885. Cf. Rapid Transit in N. Y. City (pub. by Ch. of Conn., 1905), 7, and Engineering Mag., IV: 351.

In this year, Robinson's Atlas of the City of New York was published. Eliza Robinson was Bromley's partner in publishing the similar atlas of 1879 (q.v.). This atlas shows, by various colours, lines, and names, the different structures of the city and the thoroughfares and properties. The atlas contains 43 maps, the work of Robinson and Pigden (see 1880).

In this year, Frederick S. Church, who received his art education partly in the Natl. Acad. of Design and the Art Students' League in New York, was elected to the National Academy.—Fielding, Dict. of Am. Painters, etc. (1936), 65.

Ammoson appointed by the supreme court, on the application of the Broadway Surface Railroad Co., to determine whether such railroad "ought to be constructed," hold their first public hearings. These hearings continued through Feb. 24.—Broadway Railroad: Proceedings before Commissioners, 2 vols.

Mayor Grace, in his message to the aldermen, takes a position regarding the matter of franchises that is very like that of the retiring mayor. No franchise, he says, will be awarded except upon such conditions as will secure to the city the largest possible revenue. The proper means to attain this end I conceive to be the undeviating adherence to the plan of putting all such franchises up at public bidding.

The mayor declares his purpose of employing the commissioners of accounts (see Je 12, 1884) to "undertake a thorough and exhaustive examination into all the city and county offices." He would like to see municipal elections held "in the spring of the year," so that purely local interests may not be "sacrificed for the sake of party supremacy." He urges a bureau of elections "independent of the Police Department," denouncing the present system as "a standing menace to the safety and purity of the ballot-box." He advocates "single heads" instead of "a multiplicity of Commissioners" for departments, "save only the Tax and Communications Departments."—Proc., Bd. of Ald. (1885), CLXXVI: 22-67.

 Mayor Grace sends a second message to the aldermen urging them to revoke franchises granted during the preceding year to six companies which, he believes, have "not yet acquired contract or property rights by constructing and operating the railways."—Proc. Bd. of Ald. (1885), CLXXVI: 119-12.

Khartoum, capital of the Soudan, is stormed by the Soudan chief known as the Mahdi, during a religious war against Egypt, and the English garrison, consisting of Gen. Gordon and 11,000 men, is massacred. The English expedition, sent out in Sept., 1884, for Gordon's relief, did not arrive until Jan. 28, 1885. Prime minister Gladstone was the author of the tragedy, and his ministry was overthrown. Lord Salisbury became prime minister and held the office until Feb. 1, 1886 (q.v.).—Hazen, Europe since 1815, 497, 561-62.

The New York Cable Railway Co. (see D 8, 1884) petitions again for a franchise. "Referred to the Committee on Railroad..."
1888

The Iconography of Manhattan Island

1885
—Proc., Ed. of Ald. (1885), CLXXVII: 166-67. The company renewed its petition on Feb. 22 (ibid., 417-71), reciting the history of the case during the preceding year. This was also referred to the committee on railroads. The company and many property owners “frequently urged and argued for the granting of said petition before said Committee, and presented petitions in favor thereof.” One of these was the signature of more than 760,000, which signatures were “duly verified under oath.” The committee, however, “omitted to report” and, on Dec. 8, was discharged by the board “from the further consideration of the petition.”—Proc., Ed. of Ald. (1885), CLXXVII: 1178; ibid. (1886), CLXXVI: 152-55. See J. 19, 1886.

9 The aldermen follow the recommendation of Mayor Grace (see J. 19) and reject the franchises granted to the Broadway Surface Railroad Co. and five other companies during the preceding year.—Proc., Ed. of Ald. (1885), CLXXVII: 271-72. For the decision of the state court of appeals regarding such action, see N. 27, 1888. “In the spring of 1885 the company [above-mentioned] caused its track to be constructed over the route authorized, and from that time to the 4th of May, 1886 [q. e.], when it was dissolved by an act of the legislature, and other railroad companies, ran its cars over such road and the connecting lines.”—N. Y. Reports, Court of Appeals, CXL: 321 Ann. Cyclop. (1885), 642.

15 The tenement-house commission appointed on June 2, 1884 (q. v.), makes its report to the legislature. It recommends, among other things, that the requirements for new tenement-houses be extended to old buildings, altered or used as tenements; that the weights on each floor of tenements be fixed so that every tenement-house occupied by eight or more families have a resident janitor; that rooms and halls in all new tenement-houses have direct light and communication with the open air; that the board of health be required to make a semi-annual inspection of all tenement-houses in the city, and an annual report to the mayor; that the number of sanitary policemen be increased from 30 to 40 and their duties extended entirely to the inspection of tenement- and lodging-houses; that the name and address of the owner of every tenement-house be filed in the department of health; that a permanent tenement-house commission, composed of the mayor and the heads of the departments of health, public works, buildings, and street cleaning be appointed to meet annually to consider the desirability of change in the tenement-house laws; that certain streets be opened so as to do away with Mulberry Bend, a notorious “slum” district; and that free public baths be established throughout the tenement-house districts. The commission published a report containing these recommendations and also the result of a sanitary inspection of nearly 1,000 tenement-houses. Their suggestions did not result in legislation until 1887 (q. v., Mr. 4, 1887).—Tenement House, 2d ser. 1-21.

21 The Washington monument, in Washington, D. C., begun by the Washington Natl. Monument Soc., in 1848 (q. v., Jl 4) and completed under a joint commission appointed by congress (see Ag 2, 1876), is dedicated.—Harvey, Monograph of Washington Natl. Monument (1885); Harvey, Hist. of Washington Natl. Monument and Washington Natl. Monument Soc. (1903), 108 et seq.

Mar. 4, 1885.

4 The cause of the Broadway Surface Railroad Co. (see D 5, 1884) is advanced by the decision of the commissioners appointed by the supreme court (see J. 13) that “there is a public necessity for the construction and operation of a surface railroad on Broadway between the Battery and Union-square,” and that “a horse railroad is more appropriate than a cable road for such a thoroughfare and will better subserv the public convenience and accommodation.”—N. Y. Times, Mr 13, 1885. The Times agrees editorially with the commissioners and believes “that financial conditions on which the consent of the Common Council was granted (see N. 13, 1884). . . is far more favorable to our expectations than is at all material to know and relate to the commissioners . . . are not entirely free from suspicion—on at least is believed to have held confidential relations with Sharp’s son-in-law, who was his clerk or book-keeper.”—Senate Doc. (1886), IV: No. 52, P. 5.

25 The present B’nai Jeshurun synagogue, on Madison Ave. just south of 69th St., is dedicated.—N. Y. Times, Mr 26, 1885. See also L. M. R. K., III: 929.

On this and the two succeeding days, a part of the paintings owned by Geo. L. Seney were sold at the Ann. Art Galleries for $405,821, the largest sum thus far realized in this country for a collection of paintings. The highest price ever obtained for a single picture, up to that time, was $18,500, paid at this sale for "Evening in the Hamlet of Finisterre," by Jules Breton.—A Plan and Interesting Information concerning the Am. Art Assn. See, however, Mr. 3, 1886. For the second Seney sale, see N. 27, 1886.

An a civil service dinner is held in honour of George H. Pendleton, father of the Pendleton Bill, or U. S. Civil Service Law.—Stokes Records, I: Part 2, p. 323.

A bronze tablet in memory of Edgar Allan Poe, by Richard Henry Park, presented by the actors of New York to the Metropolitan Museum of Art, is unveiled, and the alcove in which it is placed is consecrated as "the poets’ corner of America." Algeron A. Sullivan, Edwin Booth, and the REV. Wm. R. Alger make addresses.—N. Y. Times, Mr 5, 1885.

Edward Harrigan and Tony Hart make their last appearance together in New York at the Fourteenth Street Theatre.—N. T. Times, My 10, 1885. See also ibid., Mr 3, Ap 30, My 5 and 7, 1885.

Copies of the "Revised Version" of the Old Testament are presented to Queen Victoria and the London press. It was first issued in the public in England on May 12 and in America on May 21.—N. T. Tribuns, My 16 et seq.; N. T. Herald, My 16 et seq., 1885. See also Bevan, Our Eng. Bible. The Hist. of its Development, 47.

The legislature passes an act "for the better security of mechanics, laborers, and others who perform labor or furnish material for buildings and other improvements in the several cities and counties of this state." The security is in the form of a lien that may be placed on the structure or "upon the lot, premises, parcel or form of land upon which the same may stand."—Laws of N. Y. (1885), chap. 342.

The French societies of New York hold memorial services in Tammany Hall in honour of Victor Hugo, who died on May 22.—N. T. Times, My 23 and Je 1, 1885.

The Celte Exchange is incorporated.—Laws of N. Y. (1885), June chap. 393.

The statute of "The Pilgrim," by J. Q. A. Ward, is presented to the city by the New England Society of New York, and unveiled in Central Park. It stands near the Fifth Ave. and 72d St. entrance.—N. T. Times, N. 22, 1884, and Je 7, 1885; Cat. of Works of Art Belonging to the City of New York."To regulate the height of buildings" is passed by the legislature. It provides that hereafter "all houses used or intended to be used as dwellings for more than one family . . . shall not exceed seventy feet upon all streets and avenues not exceeding sixty feet in width, and eighty feet upon all streets and avenues exceeding sixty feet in width."—Laws of N. Y. (1885), chap. 454.

The legislature authorizes the immediate construction of a free bridge over Harlem River about 1,500 feet north of High Bridge. The land on both sides of the river for the approaches to a bridge has already been acquired by the city.—Laws of N. Y. (1885), chap. 487. See also L. M. R. K., III: 927. The bridge (Washington) was not begun until July, 1886 (q. v.).

A suite of three rooms which occupies the front second story of the City Hall has been renovated by a firm of decorators in a bright key of color. New carpets have been laid, and the old furniture, which was used by Washington in the old City Hall, on Wall-street, has been finished up and supplied with near coverings. The table desk at which Washington sat and the more elaborate desk at which he transacted business in his own New-York home and the other suites are here in such braver for their curious and somewhat simple architecture as furnish and oil can give. The ceilings of the three apartments have been frescoed and gilded with more taste than usually behoals our public offices. . . Coats of arms in each of the rooms are painted near the ceiling, while the compartments on the ceilings themselves have appropriate decorative designs of a mixed peaceful and warlike character. . . The most interesting decorations, however, are the priceless tier of oil paintings,
CHRONOLOGY: THE MODERN

City and Island: 1876-1909

1885. Large and small, which show the portraits of distinguished men of the colony, the Revolution, and successive State Governments.

2 Jan. 1886. The budding of the first house was at 234 East 57th St. On Dec. 6, 1899, the club was incorporated. — *Year Book* (1888); *ibid.* (1904). See 1897.

3 In this year, the N. Y. Sun described Edison's phonograph, which had recorded the voices of the late Henry Ward Beecher and other distinguished men. For the text of this account (without date), see *Brown's Book of Old N. Y.* (1941), 205.

4 In this year, the publication of *Book Prices Current* began.

5 In this year, the Forum was founded. It was edited by Walter H. Page. — *King's Handbook* (1893), 636.

6 The new building of the College of Physicians and Surgeons (see 1859), on the north side of 59th St. near Tenth Ave., it begun; it was dedicated Sept. 29, 1857. — *Hisct. Columbia Univ.* 312-21. See *ibid.* (1891).

7 Jan. 1886. St. Luke's Church on Hudson St. was badly damaged by fire.

8 — N. Y. Herald, Jan. 3, 1886.

9 "Die Meisteringer" is produced for the first time in America, at the Metropolitan Opera House. — *Brown's* III: 443.

10 Mayor Grace communicates his annual message to the board of aldermen. Of particular interest are his figures relating to the civil service; he shows a table wherein it appears that "the number of persons examined for admission to the Civil Service in this city is increased to more than one hundred times that of the number examined for admission to the whole Federal Civil Service; while it is nearly four times as large as the number examined for admission to the State Service." Of the whole number examined, "seven eights succeeded in obtaining the minimum of 70 per cent. which is fixed, and were rated as eligible. The examinations . . . are of a thoroughly practical character, and are solely directed to the determination of the qualifications required for the positions to which admission is made." The mayor is convinced "not only of the merits of the Civil Service system in its general scope, but of its perfect feasibility and justice." In another table Mr. Grace shows that the rental of offices for the city officials during the past year cost $96,750, an argument for the erection of a municipal building.

11 The mayor reiterates his recommendation of the previous year that the departments and commissions, with the exception of the tax and health departments, be under the control of a single commissioner, who can be held to a strict accountability for his official acts. "Even the Health Department might be included to advantage if power were vested in the Mayor to veto health ordinances, leaving its initiation to the Single Commissioner at its birth." — *Proc., Bd. of Ald.* (1886), CI:YXXI: 145-55.

12 A banquet in honour of Lieut. Greely, of Arctic fame, is held at the Lotos Club. The guests include Gen. Horace Porter, Commander Schley, Chief-Justice Dally, and others. — *Maurice, Fifth Avenue*, 114-15.

13 The New York Central Railway Co. (see 1852, 1868) petition for a franchise once more, rectifying the story of its previous efforts. — "Referred to the Committee on Railroads." — *Proc., Bd. of Ald.* (1886), CLXXXI: 145-55. See Mr. 1.

14 The "Council of Municipal Reform" publishes figures to show that, on the basis of moneys expended in 1884, New York City's expenses are "four times greater than the average of all other cities in the world," namely, $26.77 per capita, against an average of $1.02. — *N. Y. Tribune*, Jan. 26, 1886.

15 Glazdale enters upon his third ministry. — *Hazen, Europe since 1815*, 499. See Ap 8.

17 The board of aldermen grants franchises to the "Madison Avenue and Eighty-sixth Street Railway Company" and to the "St. Nicholas Avenue and Crosstown Railroad Company." — *Proc., Bd. of Ald.* (1886), CLXXXII: 466-66, 467-73. Mayor Grace vetted both grants, the former on March 9 (q.v.), the latter on March 16 (q.v.).

18 The board of aldermen follows the recommendation of its committee on railroads and grants a franchise to the New York Cable Railway Co. (see J9). In its report the committee virtually apologizes to the petitioning company for requiring it to pay to the city annually 12% of its net earnings, declaring that they acquiesced "in deference to the suggestion of Mayor Edison's Rapid Transit Commissioners" (see Ap 24, 1884). It has been a "serious question, with your Committee," they say, "whether the company could afford or ought to be required to pay any percentage of its net revenue into the city treasury," in view of the "numerous routes and large mileage . . . over which a five-cent fare conveys upon each passenger the privilege of a free transfer ticket." — *Proc., Bd. of Ald.* (1886), CLXXXII: 473-79. This action was vetoed by Mayor Grace on March 19 (q.v.).

19 From March 7 to 15, the sale of the paintings, porcelains, silver, literary property, and etchings of Mary J. Morgan, deceased, was held at the Am. Art Galleries. They yielded $1,205,153. With the exception of the Duke of Hamilton collection, this was "the largest total ever obtained [up to that time] at public sale of one collection in the world." Jules Brieton's "Communications" brought $45,200. — *Morgan's, "Missions de Livres," 80, 000, 000 third sum. — "The Semi. (8 by 11 in.), by Barque, $1,500. — Address of Mr. Thos. E. Kirby . . . Nov. 10, 1892, 19; A Plan and Interesting Information concerning the Am. Art Ass'n." The famous "peach blush" vase was sold on March 8 for $18,750. — *N. Y. Tribune*, Mr. 9, 1886.

20 "The Arcade underground railroad scheme [see Apr. 26, 1870, and Je 11, 1881], promises quick transit from the Battery to
The Gladstone Mar. each to resolution June chartered. the May e.. Harlem Arcade safe, annulled a parliament 1886 onenger franchises granting a proverb has franchises granting a vicious tendency to the young New York, in advance of any city in the world in the matter of quick and convenient passenger transit.”—N. Y. Sunday Mercury, Mr. 7, 1886. See also N. Y. Arc American Palace. A Pamphlet for the use of Owners of Property on Broadway, giving a Summary of the Purpose, Plan and Advantages of its Proposed Railroad, etc. (1886), Illus. pamphlet in N. Y. P. L. See Ap 13.

Mayor Grace vetoes the resolution of the board of aldermen granting a franchise to the “Madison Avenue and Eighty-sixth Street Railway Company” (see Mr. 2). He is compelled to take this action, he says, even though he fully recognizes the necessity for the road, because “only the minimum fixed by the statute is secured to the City for such franchise.” He emphasizes again that all such franchises should be subject to “sale by auction.”—Proc., Bd. of Ald. (1886), CLXXXI: 64-65.

Permission is granted by the legislature to the federal government to acquire the block bounded by Whitehall, Pearl, Moore, and Water Sts., together with the building thereon known as the Old Produce Exchange.—Laws of N. Y. (1886), chap. 46; see also N. Y. Times, Mr. 31, 1886. The building was reconstructed and became the U.S. Army building—L. M. R. K., III: 923. See O 5.

Mayor Grace returns to the aldermen with his veto the resolution granting a franchise to the “St. Nicholas Avenue and Cross-town Railroad Company” (see Mr. 2). “An adequate return for the privilege ceded is not secured,” he declares.—Proc., Bd. of Ald. (1886), CLXXXI: 665.

Mayor Grace returns with his veto the resolution of the aldermen (see Mr. 2) granting a franchise to the New York Cable Railroad Co. He does not see “how surface cable roads under the peculiar conditions of our city life can ever properly solve the problem of rapid transit.” He believes there are “serious legal objections” to the grant, one being that “the act of 1875 [see N. Y. 30, 1833] contemplated only elevated or under-ground railroads.” He does not consider that 25% of the net profits is a “proper com- mission” on the franchise. He says, however, that the language of the act is not clear, and that the methods of corporate organization, which are to-day only too prevalent, and by which bonds are sold below par and stock is given away as a bonus, he regards the profit as “actual earnings” to be “very difficult of ascertainment” and, therefore, any return to the city board on such earnings as “almost illusory.”

An important feature, however, of this veto message is a recommend- tion “for the sale of franchises generally” on a plan “similar to that under which ferry franchises are now granted.” Under this plan the commissioners of the sinking fund would “lease all franchises at public auction for a term of not less than ten or more than twenty years,” and would “appoint an auditor who, with the officers of the road shall certify under oath the actual money value of the road and equipment at the time of construction, i.e., its real cost.” The franchise would “be delivered to the lessee at the end of a term of years.”

Mayor Grace proposes that the city pay the old lessee the estimated cost of replacing the plant, charging a like sum to the new lessee who shall be represented in the appraisement. 

The result of such a system would be: “First—the City and not monopolists would reap the benefit accruing from the increase of traffic incident to the growth of the City; i.e., the city itself would, as it should, be the beneficiary of the ‘unearned increment.’

Second—There would be sufficient inducement to lead to the proper investment of capital and labor of superintendence.

Third—the franchises of our City could ultimately be made to pay a much larger part of our taxes than they do now, instead of building up great and practically irresponsible monopolies at the public cost.”—Proc., Bd. of Ald. (1886), CLXXXI: 675-686.

The legislature provides by the “Corton Act” that hereafter local authorities must (by the law of May 6, 1884, q.v., they “may, at their option”) require a franchise for a surface railway to be “sold at public auction” to the highest bidder.—Laws of N. Y. (1886), chap. 65. This act was amended, on June 15, to require the corporation to complete the road and put it in operation within three years from the date of sale.—ibid., chap. 642.

The board of aldermen appoints a special committee “to present to Mrs. U. S. Grant the album containing a copy of the preamble and resolutions adopted by the Common Council on the occasion of the death of her lamented husband.”—Proc., Bd. of Ald. (1886), CLXXXI: 719-20.

Gladding introduces in parliament the Irish Government (or Home Rule) Bill, providing for an Irish parliament to sit in Dublin and legislate on Irish affairs. The Irish were to be excluded from the British parliament but to contribute to the imperial expenses. The bill precipitated one of the fiercest struggles in English parliamentary history and, after much discussion, was defeated on June 8. Gladding therefore dissolved parliament and appealed to the people, but he was again defeated, and Lord Salisbury became prime minister. The Salisbury ministry lasted until 1892.—Hazen, Europe since 1815, 520-521.

Mayor Grace approves the resolution of the board of aldermen changing the name of Chatham Street to Park Row.—N. Y. Times, Ap 7 and 10, 1886; L. M. R. K., III: 996.

Dennis O’Brien, attorney-general, delivering an opinion on the “Legal Status of the Arcade Railway,” cites the law of 1873 (q.v., Ap 9) regarding the time allowed for the construction of the railway (formerly the Beach Pneumatic) and declares that by the failure of the Arcade Co. to begin construction and to expend two-fifths of the required capital within five years (which was one of the rules governing any railroad corporation) they had forfeited their right to corporation.—The Legal Status of the Arcade Ry., pamphlet in N. Y. P. L.

Richard Mansfield makes his first appearance as a star, at the Madison Square Theatre, in “Prince Karl” (see F. 4, 1880)—Brown, III: 427.

The charter of the Broadway Surface Railroad Co. (see Ap 6, 18 and 30, 1876, O 6 and 13, N 14 and 20, and D. 5, 1884) is annulled by the legislature.—Laws of N. Y. (1886), chap. 268. The court of appeals, however, in a decision of Nov. 27, 1888 (q.v.), held that the franchise could not be taken away.

The department of parks is authorized to set apart so much of the Riverside Park as may be suitable for the interment of the remains of U. S. Grant and his widow and for the erection of a monument to his memory. The construction of the temporary vault in the park (see II 25, 1887), is validated.—Laws of N. Y. (1886), chap. 338. The corner-stone of Grant’s tomb was laid on April 27, 1892 (q.v.).

The New York Post Graduate Medical School and Hospital is chartered.—Laws of N. Y. (1886), chap. 478.

By act of legislature the commissioners of charities and correction are authorized “to hire one or more buildings . . . with sufficient ground attached to each to be known as municipal lodging-houses.” When these houses are ready for the receipt of applicants, no police official shall thereafter “shelter as a lodger in any police station, situated within the limits of one mile from such lodging-house other than women, children and aged or infirm men.” Any applicants for shelter whom the commissioners may think proper to receive shall be “bathed on admission” and given “plain and wholesome food and a night’s lodging free of charge.” No person shall be received “more than three times in any one month in the same lodging house,” and all lodgers shall be required “to perform a reasonable amount of labor in return.”—Laws of N. Y. (1886), chap. 335.

“ar the Fifth Avenue Transportation Company (Limited)” is authorized by the legislature to run “a line of stages . . . from Eighty-ninth street . . . down Fifth avenue, across Washington park, and along South Fifth avenue to the Bleecker Street Elevated station,” and the consent of a majority of the property owners on said avenue and streets is obtained. The usual license fee for such a franchise shall be paid to the city, and the fare limit is to be five cents.—Laws of N. Y. (1886), chap. 516.
1886 The New York Cable Railway Co. once again (see Mr. 16 June petitions the board of aldermen for a franchise, without success.—
Proe, Bd. of Ald. (1886), C 7, 150-51. "Possibly the inner transactions of the board of aldermen relative to the Broadway surface railroad [see Ag 30, 1884], the details of which were becoming public, were responsible, in part at least, for the non-
passage of this grant."—Carman, op. cit., 185.
July The contract is awarded for the construction of the new Harlem
bridge (see Je 11, 1885).—N. Y. Tribune, J 15, 1886. It was
completed in 1888 (T. E. C., J 1), and was later given the name of
Washington Bridge (1886).
Aug. In this month, the history of the Christian Science movement
in New York City began, when Mrs. Laura Hathrop charted her
"Christian Science Institute," at 137 W. 34th St. Students and
patients were received for instruction in the rudiments of Christian
Science and for healing.—Information supplied by Mr. Chas. E.
Heitman, Christian Science Committee on Publication for the
State of New York. See, further, N 27, 1887.
Sept. The Calumet Club opens its new club-house at the n. c. cor.
of 1 Fifth Ave. and 29th St.—N. Y. Times, S 3, 1886. See also ibid.,
S 26, 1886; King's Handbook (1893), 547.
Oct. The post office on Second Avenue, between 29th and 30th, west
ward, was erected on the west side of the city between 29th and 35th
Sts., and 34 have just been completed. Of the unfinished buildings, 788 are between
59th and 110th Sts., and 98 are above 110th St.—N. Y. Times,
S 11, 1886. For the great part played by rapid transit in opening up
the west side, see S 3.
The first conduits for putting the telegraph wires underground
are laid, before a large crowd of people.—N. Y. Times, S 4, 1886.
"The west side of the city presents just now a scene of building
activity such as was never before witnessed in that section, and
which gives promise of the speedy disappearance of all the shanties
in the neighborhood and the rapid population of this long neglected
part of New York. . . . The huge masses of rock which formerly
met the eye, usually crowned by a rickety shanty and a bowling
green, are now当天 (1886). The cost of existence. Streets are being graded,
and thousands of carpenters and masons are engaged in rearing
substantial dwellings where a year ago nothing was to be seen but
market gardens or barren rocky fields.
"The west side of New York with all its natural advantages,
was left to an unproductive and unprofitable existence until now
because of the lack of facilities for reaching it. Until the building
of the Sixth-avenue elevated road there was practically no way for
a man of moderate means to reach his home, supposing he possessed
one in that section of the city. The Eighth-avenue surface line
ran a few cars up to One Hundred and Fifty-fifth-street, and there
was a line of stages from Thirty-second-street and Sixth-avenue,
but these methods of transportation were slow and unsatisfactory.
With the building of the elevated roads the west side is assured.
Then for the first time it became almost as accessible to the people who do business
down town as Thirty-fourth-street had been before.
"The elevated road was the first agency to open up this great
part of the city to population, and gave the first impetus to building.
Following came the Tenth-avenue cable road and the new
Boyle road, both of which, by adding to the facilities for reaching
the west side, gave an increased energy to the building operations.
Within the last year, too, another attraction has been added to
the west side as a quarter for residences, in the tomb of Gen. Grant at Riverside.
"—N. Y. Times, S 11, 1886.
Dockstader's Minstrel Hall, on the west side of Broadway near
29th St., is opened "amid great rejoicings."—N. Y. Times, S 18,
1886. See also ibid., O 13, N 30, and D 22, 1886.
Asher B. Durand, the painter and engraver, dies.—Dunlap
Oct. The first block of electric cable is laid underground on Sixth
Ave. between 37th and 38th Sts.—N. Y. Times, O 21, 1886.
See also ibid., O 13, N 30.
Prince Louis Napoleon, grand-nephew of Napoleon Bonaparte,
is visiting New York incognito.—N. Y. Times, O 24, 1886. See
also ibid., O 8, N 15.
M. Auguste Bartholdi, Count Ferdinand de Lesseps, and other
prominent Frenchmen arrive at New York for the unveiling of the
statue of "Liberty."—N. Y. Times, O 26, 1886. A reception and
concert in honour of the French guests was held at the Academy
of Music on Oct. 26.—Ibid., O 27, 1886. See O 25.
The corner-stone of a new federal armory, to be erected on the
site of the Old Produce Exchange (see Mr. 16, is laid.—N. Y.
Times, O 26, 1886. This was the U. S. Army building; it was com-
M. Auguste Bartholdi is formally received at the city hall by
Mayor Grace and presented with the freedom of the city. After
this the French delegates visited the Produce Exchange and in the
dining dined at the Union League Club.—N. Y. Times, O 26,
1886. See O 28.
Bartholdi's statue of "Liberty" is unveiled on Bedloe's Island
amid great enthusiasm, and it is formally accepted from the people
of France by Pres. Cleveland. Addresses are also made by Count
The occasion is marked by magnificent land and water parades, impos-
ing ceremonies, and the presence of a great multitude.—N. Y.
Times, O 29, 1886; Inauguration of the Statue of Liberty (1887);
on the platform close to the speakers, wrote about the occasion:
"Mr. Evarts had got only part way along in his speech when the
applause was mistaken by an eminent Frenchman present as the
signal for him to pull the rope which unveiled the statue, upon
which all the steamers and steam-tugs which were in attendance
for the island started their steam-whistles, and the crowds on
board them cheered, making a terrific din, which they kept up for
a long while. Mr. Evarts went right on with his speech, and Presi-
dent Cleveland, who presided, appeared as if giving strict warning to
him, although it was impossible to hear what the orator was saying."—Stokes Records, I: Part 2, p. 235. For a brief history
Pres. Soc. (1917), 220-26. See also Bartholdi's article in N. Am.
Rey. (1885).
Abram S. Hewitt, supported by Tammany Hall and by the
County Democracy, is elected mayor. In this election, for the first
time, working men organised in unions presented a candidate for
mayor. Their nominee, Henry George, was also supported by Irving
Hall. Theodore Roosevelt was the Republican candidate.—N. Y.
Times, N 3, and O 24, 1886; Annex, Cyclo, (1886), 648. Hewitt succeeded
Wm. R. Grace (see N 4, 1884).
The new buildings projected this year largely exceed in number
and cost those of any previous year. Up to Nov. 1, they number
3,704 at an estimated cost of $53,119,068. The need of better
homes for people of moderate means is felt. An "underground road"
was mentioned as a possible solution of the crowding of the Elevated
Railroad. The Brooklyn Bridge is over-crowded, and a new bridge
at Blackwell's Island is projected.—N. Y. Tribune, N 15, 1886.
Muncy's painting "Christ Before Pilate" is placed on exhi-
bition in the Twenty-Third Street Tabernacle, at 141 W. 23rd St.—N.
Y. Times, N 18, 1886; King's Handbook (1893), 599.
The Lotus Club gives a dinner in honour of Henry M. Stanley,
who has just returned from his travels after a very long absence
completing Livingstone's work in Central Africa. Stanley is intro-
duced by the club president, Whitelaw Reid, and relates some of
his experiences. Lieut. Greeley and Chauncey M. Depew also make
addresses.—N. Y. Times, N 28, 1886; Maurice, Fifth Avenue, 115.
On Nov. 29, Stanley also delivered a lecture at Chickering Hall.
—N. Y. Times, N 30, 1886.
The Triton and Iliad is performed for the first time in America,
Dec. at the Metropolitan Opera House.—Krehbiel, Chapters of Opera,
167; N. Y. P. L. Bulletin (1925), 901.
1887
There are, on the average, sixteen souls to every dwelling-
house in New York City. It is said that there are only about forty
thousand old-fashioned "householders," that is, heads of families,
who occupy a whole house by themselves in New York City.
Most of the people live in 'apartments.'—Loomis, Modern Cities (1887),
63; Tenth Census of the U. S., 1: 670.
In this year, the first issue of the Social Register appeared.
—Scribner's Magazine was founded in this year.—King's Hand-
book (1885), 625.
In this year, The Evening World was founded by Joseph Pulitzer
and The Evening Sun by Chas. A. Dana.—King's Handbook (1893),
623.
In this year, the N. Y. Cancer Hospital at Central Park West
and 106th St. (see My 17, 1884) was completed, mainly through the
generosity of Mrs. John Jacob Astor, and D. O. Mills erected a
THE ICONOGRAPHY OF MANHATTAN ISLAND

1887 home for trained nurses at Bellevue, supplementing the previous gift of Mr. and Mrs. Wm. H. Osborn—Message of Mayor Hewitt, Jan. 31, 1888, p. 38. See also King's Handbook (1893), 485, 490.

The Stock Exchange building is enlarged for the third time. "The Broad Street end of the building, about 65 feet square, was added to the Board Room, thus utilizing for the Board Room all the gross space of the present site" (1894).—Eames, N. Y. Stock Exchange, 65.

This year was published Olnstead and Vaux's General plan for the improvement of Morningside Park—a large folded map.

In this year, the N. Y. Neighborhood Guild was founded by Dr. Stanton Coit in a five-storey tenement at No. 145 Forsyth St. Its object was to help the poor people in the vicinity by the establishment of a free school, a kindergarden, and of lectures, debating societies, theatrical entertainments, gymnastic exercises, etc. In the autumn of 1889, the Guild moved across to No. 147 Forsyth St.—Univ. Settlement Soc. Bulletin (Jan., 1892), 6-13. See 1891.

In a message to the aldermen that is remarkable for its brevity, Mayor Hewitt calls attention to "the erroneous impression which prevails in some quarters that the Mayor controls a large amount of official patronage." Actually such power resides "exclusively with the Commissions;" when the mayor has appointed a commissioner his (the mayor's) powers cease. He believes appointments made by his predecessor under the new law (see Mr. 17, 1884) have improved "the character of the Commissions," and he hopes to maintain such a "standard of excellence."

The several new improvements and declares that the city "has reached a point in its development, which demands such large and generous treatment in all directions, as will facilitate business, provide the best appliances of modern civilization, spread the opportunities for knowledge and refinement and give the freest possible play to the humanizing influences of the fine arts, morality, and religion." However, the power to accomplish these ends the Mayor asserts, "does not reside either in the Common Council or in the Mayor, singly or jointly, and yet it is made his duty to communicate the facts having a bearing thereon, so far as he shall be able to obtain them, in the expectation that the legislative power of the State, which makes and unmakes Mayors, Commissions and Common Councils at its constitutional pleasure, may by wise law render it possible for New York to become worthy of its eminence as the chief city of the United States in wealth, enterprise, culture, and (with good government) in the general comfort and prosperity of its citizens." You "may count upon my hearty co-operation," he says, "in any measures looking to this end which under your restricted powers you may be able to devise."

Dennison Thompson appears in "The Old Homestead" for the first time in New York, the Fourth Street Theatre. He later played in it at Niblo's Garden, the Academy of Music, the Harlem Opera House, the Grand Opera House, and other theatres. The play had an exceptionally long run.—Brown, I: 224, 328; II: 106, 107, 113, 114, 229, 377, 497, 497, 6511; III: 551, 555, 557.

The new Y. W. C. A. building, at No. 7 East 13th St. (see D. 1, 1885), is opened.—N. Y. Times, Jan. 19, 1887. See also illustration and description in Harper's Weekly, XXXI: 43, 45.

Feb. The Interstate Commerce Act becomes law.—Macdonald, 4 Select Statutes, etc., 532-71.

Closing services are held in the Lafayette Place Reformed Dutch Church (known since 1854 as the Middle Dutch Church) prior to its demolition. A large clothing establishment is to be built on the site.—N. Y. Times, F 8, 1887; L. M. R. K., III: 917. The congregation worshipped at 14 Lafayette Place until the new building at Second Ave. and 7th St. was erected in 1891 (q. v.).—Corwin's Manual, 996, 997-99.

Mar. Mayor Hewitt returns to the board of aldermen with his veto to a resolution granting permission to "a "Cleaning Bureau" to employ a man" to carry a portable sign on his breast and back through the streets, "where the sidewalk is not less than the sidewalk wide." If a permanent "advertising sign" on the sidewalks constitutes an obstruction contrary to the law, a "peripatetic sign," he declares, "multiplies the objections to the stationary one many fold. The public will never know where to find the wearer. He will naturally seek the most crowded thoroughfares, and will unquestionably be most frequent during the busiest hours of the day."

From March 23 to 31, the art works and books belonging to the estate of the late A. T. Stewart were sold at the Am. Art Galleries for $75,079.42. Rosa Bonheur's famous painting, "The Horse Fair," was bought by Mr. Samuel P. Avery, a dealer, for $5,000. Mr. Avery sent it the next day to the Metropolitan Museum of Art "with the compliments of Cornelius Vanderbilt."—Address of Mr. Theoph. Kirkby. . . Nov. 10, 1922, 40.

Acting on some of the recommendations made in 1885 (p. 13, F 15), by the tenement-house commission, the legislature amends the tenement-house law by increasing the number of sanitary police from 10 to 45, by providing for a permanent tenement-house commission composed of the mayor and the heads of the departments of health, public works, and street cleaning, who are to meet once a year to determine the housing and sanitary needs, by requiring the owners of all tenement-houses to file their names and addresses with the board of health, by requiring the board of health to make a semi-annual inspection of all tenements, and by making more stringent regulations regarding the erection of tenement-houses.—Laws of N. Y. (1887), chap. 85; De Forest & Vellier, The Tenement House Problem, I: 104. See, further, My 26.

The Tilden Trust, established by the will of Samael J. Tilden, is incorporated for establishing and maintaining a free public library and reading-room.—Laws of N. Y. (1887), chap. 85. The resources of this corporation were materially reduced by the failure of Mr. Tilden's testamentary design, the trusts which he attempted to create by his will being declared invalid by the indefiniteness. Had the Tilden Trust received his entire estate, the trustees would probably have felt compelled to establish an independent library and reading-room as directed by his will. As it was, the $2,000,000 saved for the trust was inadequate for a new public library, but did contribute very materially towards establishing the present New York Public Library (Astor, Lenox, and Tilden Foundations).—N. Y. F. L. Bulletin (1912), 79, 94.

For the last five years, Fifth Ave. residences have been remodelled once by one for $1,500,000.——N. Y. Times, Ap 10, 1887.

Columbia College celebrates its 100th anniversary with a parade and with exercises at the Metropolitan Opera House. Frederic R. Coudert delivers the principal address.—N. Y. Times, Ap 14, 1887.

The freight yards of the N. Y. Central & Hudson River R. R. Co., extending along the Hudson for a dozen blocks north of 9th St., are destroyed by flames from burning oil. The loss is about $120,000.——N. Y. Times, Ap 17, 1887.

The Harvard Club of the City of New York (see 1886) is incorporated.—N. Y. Times, Ap 20, 1887. See also ibid., Ap 30, 1887. See, further, Je 9.

The legislature appoints a commission "to inquire into the feasibility and necessity of constructing a means of transit, either bridge or tunnel, across the East River at a point at or near Broadway, between Kent Avenue and Bedford avenues, or thereabouts, in the city of Brooklyn, to a point or near Grand street, between the river and East Broadway, or thereabouts, in the city of New York."—Laws of N. Y. (1889), chap. 231.

The corner-stone of the Harlem Y. M. C. A. building is laid on 125th St. near Fifth Ave.—N. Y. Times, Ap 28, 1887. See also Harper's Weekly, XXXII: 559, 605. It was dedicated on Sept. 24, 1887 (q. v.).

"Ermine" is produced for the first time in America, at the May Casino Theatre with Pauline Hall in the title role and Francis Wilson as Cadeaux.—Brown, III: 489, 490. See also Sullivan, Our Times (1926), I: 214.

An estimate of the probable cost of erecting a new "figure" (of justice) on the top of the cupola of the city hall is presented to the board of estimate and apportionment. This report states that one of sheet bronze with iron frame, weighing about 2,500 lbs., will cost about $6,000. A cast bronze figure, weighing at least 6,000 lbs., will cost about $9,500. "The present structure will carry the lighter figure with safety. Some necessary repairs of tower will be indispensable from the change, and the whole cost, if the light figure be adopted, will not be not less than the estimate at about $6,000."—Min. Ed. of Est. and App. (1889), 144. The report was ordered placed on file. See II 15 and N 1.

The legislature passes the "Small Parks" act, authorising the board of street opening and improvement "to select, locate and lay out such and so many public parks ... south of One Hundred and Fifty-fifth street, as the said board may from time to time determine."—Laws of N. Y. (1887), chap. 320. Under this law the
Laws of N. Y. (1887), chap. 434. See Je, 9, 1888. The old structure May on the site named above (see II 17, 1886) was demolished in 1889 24

As suggested by the tenement-house commission in 1828 a large number 26 (q.v., F 15), the legislature extends the requirement that no new tenement- or lodging-house "shall occupy more than sixty-five per centum" of an ordinary city lot, corner lots excepted (see Je 16, 1876), to old buildings that are being "enlarged or altered," i.e., "converted to the purposes of a tenement or lodging-house."—

Laws of N. Y. (1887), chap. 488.

A fire starting in the Belt Line R. R. car-stables at 53d St. and 27

Tenth Ave. destroys the stables, kills 1,400 horses, and burns six tenement-houses in West 54th St. and injures several others.

The total loss is about $700,000.—N. Y. Times, My 24, 1, 1887.

Wm. O'Brien, Irish patriot and editor of United Ireland, 2

is given a public reception at the Academy of Music, and resolutions are adopted expressing "the sympathy of the law-abiding people of New York with the evicted tenants, their condemnation of Lord Lansdowne and other evicting landlords, and the Governmental policy which supported them."—N. Y. Times, Je 3, 1887.

See also ibid., Je 5, 1887.

On June 6, O'Brien was received at the Press Club.—Ibid., Je 7, 1887.

On June 7, a farewell dinner was held at the Hoffman House in his honour.—Ibid., Je 8, 1887.

The Harvard Club (see 1885, and Ap 19, 1887) takes possession of 19 its first club-house, at No. 11 West 22d St.—N. Y. Times, Ap 23 and Je 10, 1887. See further, 1894.

A jubilee choral service to celebrate the 50th anniversary of Queen Victoria's accession to the throne is held in Trinity Church.—

N. Y. Times, Je 20, 1887. See Je 21.

Queen Victoria's jubilee is celebrated by the British residents 25 of New York at the Metropolitan Opera House. Speeches are made by Mayor Hewitt and Erastus Wiman. The Irish residents hold an anti-jubilee at Cooper Union "in honor of the victims of Queen Victoria's 50 years on the throne," the hall being draped in mourning.—N. Y. Times, Je 21 and 22, 1887.

An exterior street is ordered to be laid out along the westerly 25 shore of the East River from 46th to 86th St.—Laws of N. Y. (1887), chap. 697. On May 10, 1888, the northerly limit of the street was changed to 81st St.—Ibid. (1888), chap. 272.

The N. Y. Central & Hudson River R. R. Co. is authorized to build a parapet wall 611 feet west of Eleventh Ave. from 60th St. to 72d St.—Laws of N. Y. (1887), chap. 714.

A Board of Electrical Control is established by act of the legislature, whose powers and duties embrace the subjects of construction, maintenance, and control of electrical conductors, and their conduits or subways. Except by permission of this board, no poles or wires can hereafter be erected or retained above ground.—Ibid., chap. 714.

The wooden statue of Justice which has stood on the dome of the July city hall since 1879 (see My 7, 1860) is taken down because it is much rotted away and is liable to fall down and injure some one.—N. Y. Times, Jl 16, 1887. A new statue was erected on Nov. 3 (q.v.).

"Dr. Jekyll and Mr. Hyde" is first acted, at the Madison Square Sept. Theatre, with Richard Mansfield in the dual title-role.—Brown, Theatre, Hist. of the N. Y. Stage, II: 426.

An electric car is tried with success on the Fourth Ave. line 23 from 32d St. to 117th St., and creates as much surprise as "that caused by the first steamboat on the Hudson." "The patent under which it is constructed is that of the Sprague Company. Under the seats in the car are storage batteries from which the electricity is conducted to an armature underneath. This armature's revolutions turn an axle which, by means of cog wheels, turns the axles of the car wheels. A large hard-wood box on either dashboard has a sliding bar by which the amount of electricity is graduated and the car stopped by cutting off the current."— N. Y. Times, S 24, 1887. See also ibid., D 15, 1887. See further, S 17, 1887.

The Railroad Men's Building or Railway Y. M. C. A., at Oct. n. e. cor. of Madison Ave. and 45th St., erected by Cornelius Vanderbilt for the use of the employees of the railroads entitled to use the Grand Central Station, is opened and formally inaugurated. Addresses are made by Mr. Vanderbilt, Chauncey M. Depew, and others.—N. Y. Times, O 4, 1887. See also ibid., O 9, 1887.

Charles Dickens, Jr., makes his first appearance before the 25
1889 American public, at Chickering Hall. He begins a series of public
readings from his father's works, starting with "Doctor Marigold"
and a part of "Pickwick." He is introduced by Chauncey M.
Depew.—*N. Y. Times*, O 26, 1889. See also *ibid.*, N 12, 1887.
31 The Rutgers Presbyterian Church at 25th St. and Madison Ave.
has been sold to the Scottish Masons and is to be known as "Scott-
Nov. 3 A new statue of Justice, made of copper and weighing 170
pounds, is erected on the dome of the city hall.—*N. Y. Times*, N 4,
1887. See JL 15.
5 The trustees of the Cathedral of St. John the Divine agree to
purchase, for $850,000, the Leake and Watts Orphan Asylum property
at 110th St. and Tenth Ave. (see N 1, 1843) as the cathe-
dreal site.—*N. Y. Times*, N 6, 1887; 21st *Ann. Rep.*, Am. Soc. &
The asylum purchased a plot of 30 acres on the dividing line between
New York and Yonkers and abandoned its old building on Oct. 27,
1891 (q. v.).—*Hist., Charter, Act of Incorporation*, etc., Leake &
Watts Orphan House (N. Y., 1893).
14 The city acquires from Daniel D. Lord and others the land at the
intersection of Broadway and Amsterdam Ave. between 70th and
74th Sts. Here Sherman Square was laid out.—Prendergast,
*Record of Real Estate*, 54; L. M. R. K., III: 971. It received its
present name in 1891 (q. v., Mr 5).
27 The Christian Science Society, which has been holding informal
meetings, holds its first regular Sunday service, in "Columbia In-
situte," No. 720 Sixth Ave.—Information supplied by Mr. Chas. E.
Heidgerken, Director of Christian Science Committee of the State of
N. Y. (OW, Aug., 1886; and see further, F 3, 1888.
29 Josef Hofmann, at the age of 10, makes his American début,
at the Metropolitan Opera House. He is rated "a marvel" and a
"second Liszt."—*N. Y. Times*, N 30 and D 2, 1889.
30 Sixth Ave., north of 110th St. is to be hereafter known and
29 The Sloane Hospital for Women, the gift of Mrs. Wm. Sloane,
and the Vanderbilt Clinic, the gift of the four sons of Wm. H. Van-
derbilt to the College of Physicians and Surgeons, are dedicated.—
1888

In this year, the bronze statue of Giuseppe Garibaldi, by G.
Turini, was erected in Washington Square.—*Cat. of the Works
of Art Belonging to the City,* 115.

In this year, Elisha Robinson published "Certified copies of
important maps appertaining to the 23d and 24th wards, city of
New York, filed in the registrar's office at White Plains . . . .

In this year, the New York Club occupied the Caswell residence,
at the southeast cor. of Fifth Ave. and 25th St. See 1886.

This year, Edward Bellamy's *Looking Backward appeared.—

During 1888-89, the Tower Building, at 50 Broadway, was
erected. Bradford Lee Gilbert was the architect.—*Tablet placed
on building in 1890 by the Soc. of Architectural Iron Manufacturers
This is generally accepted as the earliest example in N. Y. City of
modern skeleton construction, in which the entire weight of the
walls and floors is borne and transmitted to the foundations by a
framework of metallic columns and beams.—See, however, O 1, 1855;
describing three earlier examples of very similar construction, the
earliest one being in New York and the other two (one built in 1883)
being in Chicago. The Tower Building was demolished in 1914.—
*Bid.*

Between 1888 and 1889, the Church of the Ascension, on the
north-west cor. of Fifth Ave. and 70th St. (see N 5, 1841), "was
beautified by a new chancel, furnished by Stanford White, and
adorned with angel figures by St. Gaudens, mosaics by Maitland
Armstrong, a richly carved memorial pulpit and walls of Siena
marble." Above these was placed a large picture of the Ascension
painted by John La Farge and donated by the Misses Rhindtander.
*King's Handbook* (1893), 356.

The Society of Old Brooklynites addresses a petition to congress
reviewing the burial of the remains of the prison-ship martyrs by the
Tammany Society in 1805 (q. v., My 26), and the transfer of
the remains from the temporary wooden vault on Jackson St. to
the permanent tomb at Fort Greene (see Je 17, 1871), and re-
questing that at least $100,000 be appropriated for the erection of
a monument to their memory. The petition was approved by the
state legislature, the New York common council, and the Kings
County board of supervisors. The society published its petition
in this year, together with the names of 8,000 persons who perished
on board the "Jersey." The whole number of prison-ship victims
was stated to be more than 12,000.—*A Christmas Reminder*, etc.
(pub. by Soc. of Old Brooklynites, 1888). Bills for appropriating
money for the monument were introduced in congress in 1889 and
1890 but failed to pass.—*An Appeal to the Congress of the U. S.
from the Soc. of Old Brooklynites*, etc. (1890). Regarding the
question of the number of Americans who perished on board the
British prison-ships, see Ap 25, 1873. The "Martyrs' Monument"
was erected until 1906.—*Stokes Records*, 1: A 14, 1907.

The Reform Club, organized "to promote honest, efficient, and
economical government," is incorporated by Anson Phelps
Stokes, Everett P. Wheeler, Geo. Haven Putnam, John De Witt
Warner, Wm. M. Irwins, Robert B. Roosevelt, and E. L. Goldin.—
*Westminster Rec.*, CXXXVI: 609; *King's Handbook*, 564. See
also *N. Y. Times*, Ja 6, 7, and 14, 1888. The first public meeting
was held on Jan. 21 (q. v.). Mr. Stokes was elected the first presi-

Mayor Hewitt devotes the major part of his annual message
to the board of aldermen on an explanation of the increased amounts
for the different departments that appear in the "final estimate for
1888." He shows that many of the expenditures for new
improvements are "mandatory upon the City," less than half the
total amount being "based on the revision by the Board of Estimate
and Apportionment." He believes the legislature "should have
the power to reduce but never to increase the expenditures provided
for in the City budget. In no other way can a proper responsibility
be imposed upon the public officers for the control and expenditure
of the public moneys.

Most notable in the message, however, is the mayor's expression
of relief that the city "would largely gain by the abolition of all
taxes upon personal property," even though "the amount thus
collected at this time is about one-sixth of the whole amount of
taxation." This tax, he argues, "is notoriously impossible of collec-
tion. . . . Those who ought to pay the most part of it pay the least,
while the humble citizen, who is unable to 'fix up' his statements,
is subjected to the full amount of lawful taxation." The mayor calls it "scandalous" when the "estates of widows and orphans and wards in chancery pay the full amount of taxation required by law, although in most cases it can be least afforded, while 'blotted' capitalists either entirely escape taxation or promise for a very inadequate sum." If the taxes on personal property were repealed, he believes it would not be difficult "to devise a system of taxation that would assign to the city . . . the
franchises which would not be onerous to them, and which would
more than make up the amount thus canceled."—*Prot., Bd. of

The newly organized Reform Club (see Ja 9) holds its first 21
public meeting in the form of a "tariff-reform" dinner at the
Metropolitan Opera House assembly-rooms. Pres. Anson Phelps
Stokes, Congressman W. C. P. Brockway of "Kentucky, Repre-
sentative," Melbourne H. Ford of Michigan, Col. Henry Wattron
of the Louisville *Courier*, M. D. Hartter of Mansfield, Ohio, Fred-
rick R. Coudert of New York, ex-Mayor Grace, Jackson S. Shultz,
and Everett P. Wheeler make addresses.—*N. Y. Times*, Ja 22,
1888; *Stokes Records*, 1: Part 2, 242. The immediate purpose of
the club was the reform of the tariff "by reduction or abrogation of
so-called protective taxes, especially of those either so dis-
couraging to imports as to yield to the Government but a small
revenue when compared with the enormous subsidies thereby
compelled to be paid by the people at large to the favoured few, or
so enhancing the cost of materials to manufacturers as to bar them
from the markets of the world."—*Westminster Rec.*, CXXXVI: 609.
Four large buildings on the west side of Broadway between
30th and 42nd Sts., were destroyed by fire with a loss of $4,770,000 —
*N. Y. Times*, Ja 31 and F 1, 1888.

The Christian Science Society (see N 27, 1887) is incorpo-
rated as a church, called "Church of Christ, Scientist." It continued
with this designation until April 7, 1896, when its name was changed
to "First Church of Christ, Scientist, New York City."—*Information
supplied by Mr. Chas. E. Heitman, Christian Science Comm. on
Jan. 5
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876-1909

1887 Publication of the State of N. Y. For its own church building, Feb. see N. 30, 1899. Before its church was built, the Second Church was organized (see O, 1891), and was the first to build.—See Ap 2, 1899.

28 The Union Square Theatre, opened in 1871 (p. 12) on the South side of 14th St., between Broadway and Fourth Ave., and the Morgan Theatre at the corner of Broadway and Prince St. (built of brick, but later destroyed by fire.—N. Y. Wild, F 29, 1888. See also illustration and description in Harper's Weekly, XXXI: 167, 173. The theatre was rebuilt and opened on March 27, 1889 (p. 27). For further history of Broadway in the 1870s-1890s, see Hazen, “The Place of the Independent in Politics,” under the auspices of the club at Steinway Hall.—Stokes Records, I: Part 2, 44–45.

29 The legislature authorizes the board of education to provide special classes for “the purpose of giving instruction in the English language to foreigners, whose ages or vocations are such as to prevent their attending the grammar, primary or evening schools.”—Laws of N. Y. (1888), chap. 183.

30 According to a prominent city official, “The architectural features of New York City are passing through a transitional period.” He says in regard to the evolution in building and the changes which are now going on: “Of all the business buildings and a considerable portion of all other buildings that were erected over 20 years ago there will not, in my opinion, be one in a hundred remaining 10 years hence. Several reasons combine to confirm me in this conviction, the principal of which is the manifest demand for every possible square foot of enclosed space that can be had anywhere on Manhattan Island. This was not always so. Only within the last few years has the opinion gained general acceptance that the population of New York City . . . would assuredly in time fill every available foot of space on the island and continue to overflow as it has for years upon the contiguous shores. Further improvement in rapid transit, either by arcades, underground, or through-the-blocks railroads that will enable people to reach the centre of the business district from points beyond the Harlem River in the time now required to travel half that distance, will more than double the area of possible expansion of the business district and will extend the limits of possible expansion of the entire city almost beyond comprehension. “Running these transportation agencies—the elevator and rapid transit—are comparatively new institutions. Most of the structures of which the city is composed were put up before their advent and altogether without reference to them . . . . The various branches of business were concentrated in districts peculiar to themselves and in some measure they have retained their localities.

31 Production of the State of N. Y. For its own church building, Feb. see N. 30, 1899. Before its church was built, the Second Church was organized (see O, 1891), and was the first to build.—See Ap 2, 1899.

32 The Union Square Theatre, opened in 1871 (p. 12) on the South side of 14th St., between Broadway and Fourth Ave., and the Morgan Theatre at the corner of Broadway and Prince St. (built of brick, but later destroyed by fire.—N. Y. Wild, F 29, 1888. See also illustration and description in Harper's Weekly, XXXI: 167, 173. The theatre was rebuilt and opened on March 27, 1889 (p. 27). For further history of Broadway in the 1870s-1890s, see Hazen, “The Place of the Independent in Politics,” under the auspices of the club at Steinway Hall.—Stokes Records, I: Part 2, 44–45.

33 The legislature authorizes the board of education to provide special classes for “the purpose of giving instruction in the English language to foreigners, whose ages or vocations are such as to prevent their attending the grammar, primary or evening schools.”—Laws of N. Y. (1888), chap. 183.

34 According to a prominent city official, “The architectural features of New York City are passing through a transitional period.” He says in regard to the evolution in building and the changes which are now going on: “Of all the business buildings and a considerable portion of all other buildings that were erected over 20 years ago there will not, in my opinion, be one in a hundred remaining 10 years hence. Several reasons combine to confirm me in this conviction, the principal of which is the manifest demand for every possible square foot of enclosed space that can be had anywhere on Manhattan Island. This was not always so. Only within the last few years has the opinion gained general acceptance that the population of New York City . . . would assuredly in time fill every available foot of space on the island and continue to overflow as it has for years upon the contiguous shores. Further improvement in rapid transit, either by arcades, underground, or through-the-blocks railroads that will enable people to reach the centre of the business district from points beyond the Harlem River in the time now required to travel half that distance, will more than double the area of possible expansion of the business district and will extend the limits of possible expansion of the entire city almost beyond comprehension. “Running these transportation agencies—the elevator and rapid transit—are comparatively new institutions. Most of the structures of which the city is composed were put up before their advent and altogether without reference to them . . . . The various branches of business were concentrated in districts peculiar to themselves and in some measure they have retained their localities. The iron trade still haunts the east side below 14th St.; the leather trade divides the district between the Fulton, Wall, William and South streets with the cotton and cardage trades; jewelry is still the feature of Maiden-lane; groceries and provisions continue as of old to impart special features to the west side from Greenwich to West street and from Canal to the Battery; and the dry goods trade that some 40 years ago was centred about upper Pearl-street, has spread over the region between Duane and Houston and Elm and Greenwich streets. The office building district, beginning at the Battery and extending northward, has crowded all these districts in its continued expansion, until now it reaches along some of the avenues as far north as Canal-street. In a sense and to a certain degree these districts have become so firmly established that there is little prospect of any territorial expansion. In the higher stages of residential transition, the amount of property to be transferred of Broadway are almost wholly destroyed by fire.—N. Y. Wild, F 29, 1888. See also illustration and description in Harper's Weekly, XXXI: 167, 173. The theatre was rebuilt and opened on March 27, 1889 (p. 27). For further history of Broadway in the 1870s-1890s, see Hazen, “The Place of the Independent in Politics,” under the auspices of the club at Steinway Hall.—Stokes Records, I: Part 2, 44–45.

35 The legislature authorizes the board of education to provide special classes for “the purpose of giving instruction in the English language to foreigners, whose ages or vocations are such as to prevent their attending the grammar, primary or evening schools.”—Laws of N. Y. (1888), chap. 183.

36 According to a prominent city official, “The architectural features of New York City are passing through a transitional period.” He says in regard to the evolution in building and the changes which are now going on: “Of all the business buildings and a considerable portion of all other buildings that were erected over 20 years ago there will not, in my opinion, be one in a hundred remaining 10 years hence. Several reasons combine to confirm me in this conviction, the principal of which is the manifest demand for every possible square foot of enclosed space that can be had anywhere on Manhattan Island. This was not always so. Only within the last few years has the opinion gained general acceptance that the population of New York City . . . would assuredly in time fill every available foot of space on the island and continue to overflow as it has for years upon the contiguous shores. Further improvement in rapid transit, either by arcades, underground, or through-the-blocks railroads that will enable people to reach the centre of the business district from points beyond the Harlem River in the time now required to travel half that distance, will more than double the area of possible expansion of the business district and will extend the limits of possible expansion of the entire city almost beyond comprehension. “Running these transportation agencies—the elevator and rapid transit—are comparatively new institutions. Most of the structures of which the city is composed were put up before their advent and altogether without reference to them . . . . The various branches of business were concentrated in districts peculiar to themselves and in some measure they have retained their localities. The iron trade still haunts the east side below 14th St.; the leather trade divides the district between the Fulton, Wall, William and South streets with the cotton and cardage trades; jewelry is still the feature of Maiden-lane; groceries and provisions continue as of old to impart special features to the west side from Greenwich to West street and from Canal to the Battery; and the dry goods trade that some 40 years ago was centred about upper Pearl-street, has spread over the region between Duane and Houston and Elm and Greenwich streets. The office building district, beginning at the battery and extending northward, has crowded all these districts in its continued expansion, until now it reaches along some of the avenues as far north as Canal-street. In a sense and to a certain degree these districts have become so firmly established that there is little prospect of any territorial expansion.
creased demand for more room that has come with the rapid increase in population and to the popular conviction that New York City is destined to become the most beautiful city in the Western Continent, if not in the whole world, the owners of property have begun the redemption of the city from its reproach of ugly monotony, and the older buildings are gradually giving way to the construction of more imposing edifices, many of them expressive of a higher order of architectural beauty than the world has ever before seen and which, although not departing in a pronounced manner from the ancient and established precedents, yet combines them with new departures in such effective and novel designs as to indicate a peculiarly American origin and to establish the American order of architecture."—N. Y. Times, Ap 29, 1888.

May

The legislature authorizes the board of estimate and apportionment to appropriate a sum of money for the suitable celebration of the centennial year of the inauguration of Gen. Washington as the first president of the United States.—Laws of N. T. (1888), chap. 270. See Ap 24, 1889.

The old Times building, erected in 1857 (q.t.), My 12 on the site of the old Brick Church, is being demolished.—N. Y. Times, My 13, 1888; descrip. of Pl. 152-b, III, 772. See Je 7.

By act of the legislature commissioners are designated to provide for the erection of a municipal building (such as a building as it had been urged by several mayors—see Ja 10, 1884; Ja 4, 1886) "in the neighborhood of the county court house building . . . having a central park." The commissioners shall select the exact site and "advertise for the submission to them of plans and specifications for said building."—Laws of N. T. (1888), chap. 323. See Mr 27, 1889.

The legislature passes a law providing that all criminals sentenced to death shall be executed by electricity.—Laws of N. T. (1888), chap. 489.

The Naval College, heretofore in the charge of the board of education, is incorporated as a separate and distinct organization.—Laws of N. T. (1888), chap. 580.

The corner-stone of the new Times building (see My 15) is laid on the old site at Nassau St. and Printing House Square.—N. Y. Times, Je 8, 1888. See also Harper’s Weekly, XXXII: 817, 818.

The legislature authorizes the "Madison Square Garden Company" (see My 24, 1887), with the approval of the mayor, "to construct and maintain an ornamental arcade over the sidewalks . . . immediately adjoining the property of said company." The mayor is to prescribe regulations "for the lighting and policing by said Madison Square Garden Company of said arcade when constructed."—Laws of N. T. (1888), chap. 534. The new "Garden Arcade," June 16, 1887.

Provision for adult education, i.e., "for the benefit of working men and working-women," by the city board of education is authorized by the legislature. One school in each ward, "where practicable, shall be designated" for this purpose, and "at least three lectures shall be delivered in each school in each week" between Oct. 1 and March 31, except during the Christmas holiday season.—Laws of N. T. (1888), chap. 545.

Frederick III of Germany dies at Potsdam after a reign of 99 days (see Mr 9), and his son ascends the throne as Wm. II.—Ann. Reg. (1888), 29; Hazen, Europe since 1815, 332.

Frank J. Sprague, speaking before the American Institute of Electrical Engineers at Columbia College, recommends electric power as the "Solution of Municipal Rapid Transit".—Sprague, Solution of Municipal Rapid Transit (1881). See N 26.

July

The Manhattan Bridge (later named Washington Bridge) from 181 St. on Manhattan Island to the bluff on the opposite shore (formerly the estate of Wm. B. Ogden), is completed.—N. Y. Times, Jl 3, 1885; L. M. R. K., III: 927. See also Hutton, The Washington Bridge (1885). See Je 11, 1885, and Jl 1886.

The Jackson Square branch of the N. Y. Free Circulating Library on 13th St. near Eighth Ave., is opened. It is the gift of George W. Vanderbilt. This is the fourth branch library, the others being the Bond St. branch, the Ottendorfer on Second Ave., and the Bruce in W. 42d St.—N. Y. Times, Jl 6, 1888.

The Convent of the Sacred Heart, at Manchesterville, between 126th and 135th Sts., Tenth and St. Nicholas Aves., burns. It was a structure of brown brick and four stories high. The central portion comprised the old Lorillard mansion, which, with the additions, had been occupied by the nuns for nearly 50 years. The convent was formerly on Houston, and later in Bleecker, St.—N. Y. World, Ag 14 and 15, 1888.

The first electric car open to passengers in New York begins to run on the Fourth Ave. line between 56th St. and the Post Office. It was made by the Julien Electric Traction Co. A second electric car will be added in a week.—N. Y. Times, S 16 and 18, 1888. See S 23, 1887.

The Plaza Hotel on the west side of Fifth Ave. between 58th and 59th Sts. is purchased by the N. Y. Life Insurance Co. for $250,000.—N. Y. Times, S 19, 1888. See also ibid., N 24, 1888. For the opening of the second Plaza Hotel on this site, see S 29, 1890.

The Y. M. C. A. building at 5 West 125th St. (see Ap 27, 1887) is dedicated.—N. Y. Times, S 25, 1888.

Hodji Hossein Ghody Khán, first minister from Persia to the U. S., arrives at New York.—N. Y. Times, O 1 and 2, 1888.

"The spires of St. Patrick’s Cathedral, at Fifth Avenue and Oct. Fifty-second-street, are now complete. . . . While these spires give the cathedral a finished appearance it still lacks much of realizing the original plan. There is yet to be built a chapel extending from the main building back between the Bishop’s house and the priests’ house to Madison-avenue. This will make the entire structure 400 feet long . . . A new sacristy will also be built by the northeast corner of the cathedral. When this shall have been completed the coped one now in use will be demolished. This will finish the exterior of the cathedral and will fill up the entire block bounded by Madison and Fifth Avenue and Fifty-sixth and Fifty-first streets. But there is much interior decoration that will probably not be finished for years. There are several hundred niches to be filled with figures and there are 10 Chapels in which altars will be placed. . . ."—N. Y. Times, O 7, 1888; Farley, Hist. of St. Patrick’s Cathedral, 140.

Benjamin Harrison and Levi P. Morton, Republicans, are Nov. elected president and vice-president, defeating the Democratic nominee, Grover Cleveland and Allen G. Thurman, though Cleveland had a larger popular vote than Harrison.—McKee, National Conventions and Platforms, 232-39.

Hugh J. Grant, the Tammany candidate, is elected mayor.—N. Y. Times, N 7, 1888. He succeeded Mayor Hewitt, who recommended the County Democracy renominated and supported. The Republicans, however, nominated a separate candidate (Erhardt) who "took votes enough from Hewitt to elect Grant."—Wheeler, Sixty years of American life, 337. Grant was re-elected in 1890 (q.v., N 4).

The Daft electric motor is tried with success on the Ninth Ave. Elevated R. R. from 14th to 42d St. It draws three cars containing 300 guests and takes electric power from a cable laid outside the track from 50th to 14th St.—N. Y. Times, N 27, 1888.

In 1889 (q.v.), electric power was installed on the line. The "Memorial House," adjoining St. George's Church on East 16th St. and given to the parish by Mr. J. Pierpont Morgan, is formally opened.—N. Y. Times, N 27, 1888.

The state court of appeals renders an important decision regarding railroad franchises, a decision that was brought about by the action of the common council, on Feb. 9, 1885 (q.v.), in revoking franchises, and that of the legislature, on May 4, 1886 (q.v.), in annulling the charter of the Broadway Surface Railroad Co. The court holds that the latter corporation "took, through its grant from the city, an indefeasible title in the land, necessary to enable it to construct and maintain a street railway in Broadway and to run cars thereon," and that any questions which have arisen "with reference to the propriety of the means by which the corporations of the company obtained the consent of the municipal authorities (see Ag 30, 1854) are not involved in the case."—N. Y. Reports, Court of Appeals, CXI: 1-66.

The Amberg German Theatre, erected at Irving Place and Dec. 15th St. on the site of Irving Hall removed earlier in the year, is opened with a performance of "Ein Erfolg" and "Fortunio’s Liebeslied."—N. Y. Times, Jl 14, D 1 and 2, 1888; L. M. R. K., III: 984. This was later known as the Irving Place Theatre.—King’s Handbook (1893), 602-3.

The bodies are being removed from the churchyard of St. Luke’s P. E. Church in Hudson St., and the old church is to be demolished, and the proceeds have been given to Trinity corporation, which intends to erect a large church on the block bounded by Clarkson, Hudson, Varick, and Leroy Sts. The St. Luke’s con-
The residence of Valentine G. Hall at No. 16 Gramercy Park had been purchased by Edwin Booth, and remodelled and furnished by him as a club for actors and friends of the drama, the house is formally opened over by Booth to the Players' Club.

In this year, an elevated railroad came before the supreme court "in which the fundamental question involved was whether the Dutch Roman law prevailed on Manhattan Island before 1664, under which law the railroad claimed that the State absolutely owned the streets and that adjacent owners had no rights or easements therein. This question depended upon the determination of the historical question who, under the law of nations, discovered and settled New York." To aid the court in the solution of the question, a Mr. Arroux was called to testify to prove "that under the law of nations it has always been declared in both Europe and America the English were the lawful owners by right of discovery under governmental authority, perfected by taking possession long before the Dutch ever landed here, and continued by assertion of such ownership down to the time of the conquest. On the other hand, the Dutch were interlopers, intruders, squatters. They had no title in fee to the land before 1673."—Arroux, The Dutch in Am. (1890), 3, 41-42.

Judge Arroux did not mention the title of the case in which this argument was used, possibly because the case was still pending in the courts. It was the case of Hine vs. N. Y. Elevated R. R., the firm of Arroux, Rich & Woodford appearing for the respondent.

In this year, the Art Ass't brought to this country, exhibited and sold at the Art Galleries the great collection of paintings, rugs, and relics, belonging to the Russian patriot, painter, and writer, Vereshchagin.—Address of Mr. Thos. E. Kirby (1922).

In this year, 60 sets of competitive designs for the Cathedral of St. John the Divine were received by the trustees in response to circulars sent out by the committee on architecture. The committee selected 15 of the designs and referred them to a group of experts composed of Chas. Babcock and Wm. R. Ware, architects, and John Bogart, engineer. After eliminating all others, four sets were recommended to the trustees for further action, namely those of Heins & La Farge, Halsey Wood, Wm. A. Potter, and Huss & Bock. These were exhibited at the National Academy of Design from March 24 to May 17, 1891. Finally, in July, 1891, the design of Messrs. Heins & La Farge was approved and accepted.—Cathedral Church of St. John the Divine (1916), 20.

The competition having been won by Heins & La Farge, the choir, two apsidal chapels, and the main structural elements of the crossing were carried out under their direction. The contract between the present trustees of the church and Heins & La Farge provided that, in the event of the death of either member of the firm, the trustees might terminate the contract. Mr. Heins died. The trustees theretoon terminated their contract with the original firm, and, on April 20, 1911, appointed Mr. Ralph A. Cram in his personal capacity as consulting architect. By authority of the trustees, he caused new preliminary sketches to be prepared showing how the work could be continued after a stylistic fashion differing from that determined by the original architects. These sketches were approved in principle by the trustees, and Cram, Goodhue & Ferguson, who in the meantime had acted as architects for the old house, bishop's house, deanery, and chapel of St. Martin of Tours, were appointed on April 5, 1915, architects for the nave. Since then, Cram & Ferguson have been authorized to prepare complete preliminary sketches for the completion of the entire building; and have also been authorized for the work for the west front, the north transept, the bapistry, and the chapter-house. They have also been authorized to prepare plans of the remaining element,—i. e., the lantern and spire.—Information supplied by Canon R. E. Jones, and by Cram & Ferguson.

Heins & La Farge's original plan was perhaps the most successful piece of ecclesiastical planning ever produced in America. The spire over the "crossing" was also a bold and effective innovation.

Electric tractions was first introduced in New York City in April 1899. Elevated R. R. at the beginning of this year. Two years before, there were only 20 electric cars in operation in America. Thos. A. Edison operated an electric motor at Menlo Park in 1881. In 1883 Leo Daft, the electrician of the Daft Electric Light Co., made the first public exhibition with the electric motor-amphure on the Saratoga and Mt. McGregor Railway. It was on Mr. Daft who introduced electric motor in New York City. He had tried it on the Ninth Ave. line on Nov. 26, 1888 (p. 251).—N. Y. Tribune, F 24, 1889.

"Hamline Grange" is moved from the west side of Convent Ave.—Mag. of Am. Hist. (1889), XXI: 6. It later became the rectory of the new St. Luke's Church, which stands beside it on the north-east corner of 141st St.—Ibid. (1892), XXIV: 380. See also Col. of Pl. 15-17. In the fall of 1889 the Grange was presented, by an anonymous donor, to the Am. Scenic and Hist. Pres. Soc. as a memorial.—N. Y. Times, N 18, 1924.

In this year, Troop A, an outcome of the First Hussars, was organized by Capt. (afterwards Gen.) Roe. It was a fashionable cavalry company like the Ancient and Honorable of Boston, or the Philadelphia City Troops.—"King's Handbook" (1894), 358.

During the decade from 1889 to 1899, the Museum of Natural History in Manhattan Square was greatly developed—the central section of the south building in 1889-1893; the east wing of the south building in 1893-1895; the west wing of the south building in 1895-1897; the south-east and south-west corner wings in 1897-1899. Acts of the legislature, authorising the enlargement and making appropriations for the purpose, were passed in 1871, 1875, 1887, 1889, 1894, 1895, 1896, 1897, and 1900. Ordinances of the board of aldermen for the same purpose were passed in 1901, 1902, 1905, 1909, and 1911.—"Growth of the Building of the Am. Mus. of Nat. Hist." (1912).

In this year, additions covering the entire block bounded by 70th and 71st Sts., Madison and Park Aves., were made to the Audubon Apartments. Rep. (1894), 461. The new wing was on the east side.

In this year, the College Settlement was established at No. 95 Rivington St. by women college graduates. "The residents, with outside helpers, conduct clubs for women, boys and girls; classes in cooking, millinery, dressmaking, embroidery, kitchen-garden, wood-carving, drawing, singing, literature and municipal government; a library and reading-room; a penny-provident fund; and a kindergarten."—"King's Handbook" (1893), 421-2.

In this year, the "Penny-Provident Fund of the Charity Organization Society" was established "to initiate habits of providence and thrift among the poor, by supplying them with facilities for small savings, such as savings-banks do not afford."—Ibid., 454.

In this year Kenyon College added a new art and illustration building, which was partially burned on Dec. 19.—N. Y. Times, D 20, 1889.

In this year, the College Settlement was established at No. 95 Rivington St. by women college graduates. "The residents, with outside helpers, conduct clubs for women, boys and girls; classes in cooking, millinery, dressmaking, embroidery, kitchen-garden, wood-carving, drawing, singing, literature and municipal government; a library and reading-room; a penny-provident fund; and a kindergarten."—"King's Handbook" (1893), 421-2.

In this year, the "Penny-Provident Fund of the Charity Organization Society" was established "to initiate habits of providence and thrift among the poor, by supplying them with facilities for small savings, such as savings-banks do not afford."—Ibid., 454.

In this year Kenyon College added a new art and illustration building, which was partially burned on Dec. 19.—N. Y. Times, D 20, 1889.
1889—THE ICONOGRAPHY OF MANHATTAN ISLAND.

Bay Park, he thinks, should be "utilized as a site for almshouses and charity improvement in place of those now maintained on Blackwell's Island;" and "Blackwell's Island could be readily converted into a park, which, at trilling expense, would be made easily accessible to all our citizens, and its pavements was front could be made available for bathing purposes. Property along the East river would be greatly benefited by such a change and the health of the city materially improved."

The "necessity for an improved system of docks" is another subject discussed by the mayor. "At the present time there is little or no classification of shipping at our docks. Ferry-boats, small, or smaller craft which ply between this city and adjacent towns are crowded indiscriminately together. Passenger-boats and freight vessels sail from the same piers. Lines of trucks laden with merchandise render the streets in the neighborhood of the freight depots impassable to foot passengers. . . . In order to preserve the commercial primacy of our city, it therefore becomes our paramount duty so to improve and regulate our magnificent water-front that our supremacy as the chief port of the Western Hemisphere will be forever secured."

"It is now generally conceded that in order to make provision for our commerce it is essential that the city acquire title to all the water-front. The rights of private owners should therefore be acquired with as little delay as practicable. . . . On the East river, from Grand street to Eighth street, and from Seventeenth street to Twenty-third street, a plan for public purposes has recently been adopted, which we may hope soon to see pushed to a successful completion."

Regarding the pavements, the mayor says: "The granite-block pavement appears to be the only best adapted to our climate and soil, though recent experiments on Madison avenue seem to show that in certain localities an asphalt pavement might meet the public requirements. The cost of both pavements being about equal, the selection might be determined by the character of the thoroughfare to be paved and the amount of traffic which it would be compelled to bear."

The "filthy condition" of the streets "is the cause of universal and well founded complaint," and Mayor Grant expresses his intention to do everything in his power "to see this state of affairs remedied."

As the system under which taxes are now collected is a source of confusion and annoyance, the mayor suggests the passage of a law providing that all taxes be collected by a single officer "so that the taxpayer may be readily afforded complete information as to the extent of his obligations."

Mayor Grant also reminds the board of the necessity for the construction of a municipal building as soon as possible, for the city is now paying about $100,000 per annum for the rental of offices for public departments. Although laws for this purpose were passed by the legislature in 1887 and 1888, nothing has been done by the city. The municipal building, the mayor says, "might well be erected upon the City Hall Park, although it is undoubtedly true that many good citizens are opposed to having this park encumbered by any additional buildings."

Electric wires and telegraph poles continue to disfigure the streets and obstruct the thoroughfares, notwithstanding the general demand for the burial of the wires.—Proc. Bd. of Ald., CXIII: 11-19.

26 The new West Washington Market, on the block bounded by Thirteenth Ave., West, Bloomfield, and Gansevort Sts. (see Je 14, 1884), is formally opened, and the event is celebrated by a parade, a banquet, and addresses by Mayor Grant and others. The site was formerly that of Fort Gansevoort.—N. Y. Times, Ja 13, 15, 18, 20, 26, and 27, 1889. See also Harper's Weekly, XXXII: 1007-9, and L. M. R. K., III: 960. On Aug. 25, 1890, the market was partially destroyed by fire.—N. Y. Times, Ag 26, 1890.

29 The United Service Club is organized, with a temporary club-house at 16 W. 31st St. It is composed of commissioned officers and ex-officers of the army, navy, and National Guard, and graduates of the U. S. Military and Naval Academies.—N. Y. Eve. Telegram, My 10, 1913; King's Handbook (1893), 360. See 1897-98. The first performance in America of the cycle of "Der Ring des Nibelungen" took place at the Metropolitan Opera House on March 4, 5, 8, and 11, 1889.—Brown, III: 446; N. Y. P. L. Bulletin (1895), 895.

Benjamin Harrison is inaugurated president.—N. Y. Times, Mr 5, 1889.

Proctor's 23rd Street Theatre, built on the site of the old tabernacle, at 141 W. 23d St., near Sixth Ave., is opened by Neil Burgess in "The County Fair."—N. Y. Times, Mr 6, 1889; King's Handbook (1891), 599.

A second act is passed by the legislature (for the first, see My 18, 1888) providing for the construction of a municipal building. The same commissioners as before are designated, but they are now instructed to choose a site within the park on the easterly side.—Laws of N. Y. (1889), chap. 81. See Instruction for Architects in preparing Plans for a Public Building to be erected in City Hall Park (1889), which shows that the commissioners had in mind a building "six stories in height including the basement."

The idea of putting the new building within the Park aroused much adverse comment. "Enormous sums of money are being expended," says the Tribune editor, "in the acquisition of open spaces in different parts of the city, and it is much to be regretted that a necessity should arise for diminishing a single one of those already possessed and enjoyed by the people." Also fear is felt that the city ball will not be left "to its quiet and graceful supremacy.—N. Y. Tribune, Ap 25, 1889. See S 18.

The new Union Square Theatre opens with an English version of Scribe's "Bataille des Damnes."—N. Y. Times, Mr 27 and 28, 1889; L. M. R. K., III: 986. The old theatre was burned on Feb. 18, 1888 (q. v.).

The office of city chamberlain, "the most lucrative office in Apr. Mayor Grant's gift," is turned over to Richard Croker, "the recognized leader of Tammany Hall."—N. Y. Tribune, Ap 10, 1889.

Ward McAllister's venture into the ranks of the great public to take a hand in the management of the centennial ball is likely to be attended with results to him as a sort of fortune. When Mr. McAllister awoke to the fact that he was not the entire committee—merely a member of it—it astonished him. To have his dictates questioned in social affairs was a new, novel, and rather unpleasant experience. . . . [Cf. 1872.]

"The trouble is that the deposition from leadership in centennial affairs isn't all that is liable to be the outcome of the sudden and startling discovery that the social world can wag without the assistance of Mr. McAllister. This latter fact has struck the society leaders, or those who would be such, with peculiar force. . . . It has led to more animated discussion in the Union and Knickerbocker Clubs than has any subject. . . . The matter was started at the Union Club, when a member, who is also a Patriarch, is said after an hour's deep thought, to have created almost a panic by inquiry: " I say there, would it be possible to give a Patriarch's ball and have it managed by a committee instead of by Ward McAllister, donch' know?"

"Society is deeply agitated by the matter. The Knickerbocker Club has already decided against Mr. McAllister. The Union Club is very evenly divided just now, with a tendency committee-wise, though the official action of the Governing Committee had not been bulletined up to midnight last night. The general belief, however, is that the next assembly of the Patriarch's will be under the management of a committee instead of under a dictatorship. Social lights fear that the result may be disastrous, but the male element in the much-talked-of four hundred seem determined because Mr. McAllister has actually brought them into scorn and ridicule by his failure to retain his dictatorship and thus their prestige.—N. Y. Times, Ap 9, 1889. The centennial committee appointed Edmund C. Stanton director of the ball, and McAllister, though nominally managers, was left without any important powers. He therefore resigned from the committee and did not attend the ball, which he criticized as the "most grossly mismanaged affair I ever heard of."—Ibid., Ap 10, 15, 19, and My 3, 1889. It was held on Saturday, April 29 (6 p. m.). A fire at the foot of West 59th St. destroys $5,000,000 worth of property.—N. Y. Herald, Ap 20, 1889. See also Harper's Weekly, XXXIII: 145.
A. Design for N.Y. Municipal Building, submitted by Howells and Stokes in competition, 1908. See July 20, 1907 (p. 2067).

day and by decorating their windows and doors with the national colours.—*N. Y. Times*, Ap 23, 1889.

The board of estimate and apportionment is authorised to appropriate $15,000 for decorating the city hall and other public buildings, displaying fireworks, erecting stands for reviewing the parade, etc. during the centennial celebration of Washington's first inauguration.—*Laws of N. Y.* (1889), chap. 147, 185. See also *Ten Years*.

Services in honour of the centennial of Washington's inauguration are held in Trinity Church, St. Paul's Chapel, the Church of the Holy Trinity, the Fifth Avenue Baptist Church, the Collegiate Reformed Dutch Church, St. Paul's M. E. Church, Chickering Hall, and the B'Nai Jeshurun Synagogue.—*N. Y. Times*, Ap 29, 1889.

A triumphal arch, designed by Stanford White, and built of wood covered with “staff,” is erected on Washington Square at the foot of Fifth Ave. by private subscription. The arch is surmounted by a wooden statue of Washington 10 feet in height. “This statue is said to have been erected on the Battery in 1792, and to have been the first erected in the city. It bears evident signs of age.”—*N. Y. Times*, Ap 23, 1889. *Harper's Weekly* XXXIII: 343, 344. The corner-stone of a permanent arch of granite, designed by the same architect, was laid on this site on May 30, 1890 (q. v.).

Regarding the alleged placing of a wooden statue of Washington “on the Battery in 1792,” no record has been substantiate to the statement. Richard Watson Gilder describes the temporary and in Chap. 21 of *Bowen's Hist. of the Fourth Avenue Parade and the Inauguration of Geo. Washington* (1892), 410, with a photographic view showing the statue in position. He refers to it simply as “a colossal wooden statue of Washington, of ancient workmanship.” The *N. Y. Hist. Soc.* owns a small photograph of the statue, taken probably about 1893, showing it standing in the back part of a store. On the back of this picture is pasted a facsimile of the following statements, unsigned and unauthenticated, but probably intended to aid the sale of the statue: “It was erected at Bowling Green and placed in the small park in 1792, near Battery Park, to replace the Statue of King George. . . .

The statue was the first erected in New York and bears convulsions of its great age. . . . It stood for 11 years, from 1792 to 1843, in the small park at Bowling Green . . .; and was sold at auction on Liberty St to a collector of relics named Jaques, and after his death it was sold at auction to Mr. D. Schiff, and afterwards to Mr. F. Theobald who sold it to the present owner, Mr. Joseph Liebman, in 1892. . . . It is the only and oldest wooden statue of Washington in the United States, 106 years old (1792-1898), 9 ft. 5 inches from the base and weighs over 800 pounds.” The description exactly describes the small statue, which bears the signature of Mr. Joseph Liebman who was a tobacconist with a shop at 265 W. 15th St.—*See City Directory*. A fuller account of the statue, by H. Dick, was published in the “Magazine” section of *The World*, Feb. 20, 1921. This report states that Liebman “opened negotiations with the Historical Society for its purchase,” but that its price—$5,000—was too high to interest this society. The writer adds that, in 1913, the statue stood in front of a barber-shop at St. Nicholas Ave. and 182d St. The barber, like Liebman, tried to sell it to various patriotic societies. “But his ideas were even lovelier than Liebman’s. He wanted $100,000.” Later, writes Dick, “Gen. Coleman Du Pont is said to have found it in a junk shop and bought it for $800 to give to the Historical Society of his native State, Delaware.” It was placed in the basement of the city hall at Wilmington. Casual writers (see, e.g., the *N. Y. Times*, Ag 21, 1923) have used the statements from the Liebman photograph as authentic history; but, from the thorough researches undertaken for the present work, having particular regard for the known and discoverable monuments and statues of Washington in New York (see Index), it can be said with reasonable certainty that this wooden effigy never stood on either the Battery or Bowling Green. In common council always strictly safeguarded public property against private encroachment or incumbrances. There is no petition or permit in the minutes or filed papers of the city clerk, at any time, referring to this statue on either of these or any other public lands. Had it been placed there even briefly, without official authority, for some temporary celebration or otherwise, it would have been noticed and made known by newspaper paragrapher, some correspondent, artist, traveller-author, or guide-book writer; but no such mention of it has been found to substantiate the claim of the imaginative tobasconist. Its only claim to distinction is that it was placed atop the temporary memorial arch at Washington Square in 1889. Its origin and early history are unknown.

The celebration proper of the centennial of Washington's inauguration is begun with an enthusiastic welcome of Pres. Harrison, Vice-President, Mr. otros national officials, a brilliant marine parade, a public reception at the city hall, and a ball at the Metropolitan Opera House. The city is crowded with visitors and is everywhere decorated with flags and bunting.—*N. Y. Times*, Ap 28-29, 1889; *The Cincinnati in the Centennial Celebration* (1889), 84. See also Bowen, *His. of the Centennial Celebration* (1892), and *Harper's Weekly*, XXXIII: 575, 576, 575. One of the most interesting features of the day's events was the trip of the president and vice-president from Elizabethport. They came in an open barge, as Washington had done, rowed by 15 sailors, and landed at the foot of Wall St. *Cf. Ap 23, 1789.*

On this day, the anniversary was commemorated with religious services in St. Paul's Chapel, where Washington used to attend; special exercises of the *Hea of the Firemen, the Irish, and the Switz. and German, and Irish divisions.—*N. Y. Times*, My 2 and 3, 1889; *The Cincinnati in the Centennial Celebration* (1889), 85. See also Bowen, *Hist. of the Centennial Celebration* (1892).

May 31

A great flood at Johnstown, Penn., occurs, entailing the loss of more than 2,000 lives and millions of dollars worth of property.—*N. Y. Times*, Je 1 1989.

The department of public parks is authorized to complete the enclosure and ornamentation of Morris Park (see O 11, 1871)—*Laws of N. Y.* (1889), chap. 444.

The legislature directs that 116th St. be extended from Tenth Ave. to the Broadway Boulevard.—*Laws of N. Y.* (1889), chap. 450.

Commissioners are designated by the legislature, to be known as "municipal bathing-house commissioners," who are authorized to decide within the scope of their jurisdiction, if a bathing-house containing baths of hot and cold water and adapted to the different seasons of the year. The expense is not to exceed $175,000, and when completed it is to be under the control of the department of public works.—*Laws of N. Y.* (1889), chap. 452. This appears to have been the first public bathing-house other than the so-called "floating baths" moored on the river front.

The Society of American Artists (see Je 1, 1872), the Architectural League of New York (see 1881), and the Art Students' League (see 1875) form the American Fine Arts Society. This is incorporated, on this day, under the Business Corporation Law by filing a certificate with the secretary of state, for the purpose of erecting a building as a home for these societies and headquarters of the graphic arts in New York.—*King's Handbook* (1891), 110, and *see of state's records.*

The Am. Art Ass'n buys, for $80,650 francs ($15,000), Millert's July painting, "The Angelus," after the French senate's refusal to appropriate the money to buy it at a public sale in Paris. The painting measured 18 by 30 inches.—*Kirby's Address*. See O 13.

Upon invitation of Mayor Grant, a number of prominent New Yorkers meet in the governor's room of the old court house to inaugurate measures for holding a world's fair in New York in 1892, in commemoration of the 400th anniversary of the discovery of America. They authorize the mayor to appoint four committees for formulating detailed plans.—*N. Y. Times*, Jl 18 and 26, 1889. See also ibid., S 21, O 2, and D 27, 1889.

The work of tearing down the old Madison Square Garden (see Ap 21 and Jl 17, 1886) is begun.—*N. Y. Times*, Ag 8, 1889; L. M. R. K., III: 984-85. See Je 16, 1890.
1889. Mile. Carmenita, the Spanish dancer, makes her American debut, at Niblo's Garden.—Brown, I. 226.

Sept. 17. A hearing is held in Mayor Grant's office on the subject of the selection of a site for a new municipal building. Protests against the location of such a building within the Park (see Mr 27) were numerous, including one in the form of a "preamble and resolutions adopted by the New York Chapter of the American Institute of Architects."—"N. Y. Tribune," S 19, 1889. For a new act of the legislature concerning the proposed building, see My 6, 1890.

30. The Harlem Opera House on West 155th St. is opened.—"N. Y. Times," O 1, 1889.

Oct. 2. My 17, 1889 is laid in West 43d St.—"N. Y. Med. Jour.," Jl 22, 1911. It was opened on 20th Oct., by Dr. Albert C. Allen, the Treasurer's physician. The building was completed and received Dec. 20, 1890. (q.v.)—"N. Y. Times," N 21, 1890.

7. Architectural College opens at 343 Madison Ave.—"N. Y. Times," O 8, 1889. At this time it had a provisional charter, but in Jan. 1900, it was incorporated as a part of Columbia University. It moved to its present site in the autumn of 1897.—"Hist. of Columbia Univ.," 397-408. See also L. M. R. K., III: 939.

The cornerstone of the World, or Pulitzer building, is laid at Park Row and Franklin St. on the site of French's Hotel, which was bought by Joseph Pulitzer in 1888 ("N. Y. Daily Tribune," Mr 11, 1888). The Pulitzer building was completed and opened Dec. 20, 1890 (q.v.).—"N. Y. World," O 11, 1889. See also L. M. R. K., III: 968; Harper's Weekly, LXXIV: 44; 47, and descript. of Mr. 163, III: 846.

15. Millie's "Angelus," for which the Amer. Ass'n paid $15,000 (q.v. 16), arrives at New York. In November, it was exhibited at the American Art Galleries, 6 E. 23d St.—"N. Y. Times," O 15 and N 16, 1889. It was resold later for $15,000, and now hangs in the Louvre.—Address of Mr. Thomas E. Kirby... Nov. 10, 1892.

20. Plans are laid and work is about to begin on the Mulberry Street and Corlears Hook (see Je 14, 1884) Park, and the widening or extending of several streets, notably College Place. Work of this sort is in progress on Wallabout Bridge and East River (now Carl Schurz) Parks, the latter being enlarged by adding territory from 86th to 89th St. The car-line through Central Park at 86th St. is soon to be built.—"N. Y. Tribune," O 20, 1889.

Nov. 13. The mayor approves a resolution of the board of aldermen giving consent to the Broadway and Seventh Ave. R. R. Co., the South Ferry R. Co., and the successors to the franchises formerly held by the Broadway Surface R. R. Co., and to their successors and assigns respectively, to use cable power in the operation of the street roadways, owned or operated by them respectively, from Central Park to South Ferry by way of Seventh Ave., Broadway, Whitehall, State St., and Battery Place. This franchise permits the companies to make any changes in the construction of these roads or roadbeds, necessary for the use of cars, and also to lay or extend electric cables.—Ordinance, Resolutions, etc., Approved by the Mayor, LVII: 158-59. See also The Cable Traction System of the Rapid Transit Cable Co. (1889). The Broadway cable line was completed in 1893 (q.v. My 17).

22. The N. Y. Kindergarten Ass'n is organized, in the belief that the public school system of N. Y. City does not extend far enough, and that the children in their earliest years should have the benefit of kindergarten training. On March 10, 1890, the association opened its first kindergarten in the store floor of No. 353 E. 53d St., leased for the purpose. Its second school was opened on Oct. 27, 1890, at the n. w. cor. of First Ave. and 63d St. This association, for the benefit of the less fortunate children of New York, in its first year had the following officers: Richard Watson Gilder, president; Mrs. Grover Cleveland, 1st vice-president; Hamilton W. Mabie, 2d vice-president; Mrs. Sidney Webster, 3d vice-president; a board of managers, a secretary, and a treasurer. It was incorporated Feb. 12, 1892.—1st and 2d Ann. Reps., N. Y. Kindergarten Ass'n, pub. 1901 and 1902. Its work is described in "The Free Kindergarten" (reprint from Harper's Mag., 1905), issued by the N. Y. Kindergarten Ass'n (534 W. 42d St.), at which time the association had kindergartens under its direction.

Dec. 15. Among the buildings now being erected in the city are Carnegie Hall on the corner of 57th St. and Seventh Ave., the new Century Club in 43d St. just west of Fifth Ave., the Lenox Lyceum on Madison Ave., near 59th St., and the Manhattan Athletic Club at the corner of Madison Ave. and 45th St.—"N. Y. Times," D 15, 1889. See also Harper's Weekly, XXXIII: 876, 879, 892, 895.

The delegates to the Pan-American Congress recently held in Washington arrive on a visit to New York, and are welcomed by a reception committee. Mayor Grant later received them at the city hall.—"N. Y. Times," D 17, 1889. See also ibid., D 18, 19, 20, and 21, 1889. They left for Washington on Dec. 21—ibid., D 22 and 26, 1889.

1890

The population of Manhattan Island is 1,141,216,—175th U. S. Census Bull. (1910).

For a description of the "slums" of New York at this time, see Jacob Riis' How the Other Half Lives, 162-75. See also Riis, The Battle with the Slums (1902).

In this year, the New York Pasture Institute, the first of its kind in America, was opened at No. 1 W. 97th St. for the anti-hydrophobic treatment of rabies according to the method of M. Pasteur" (see 1885). Dr. Paul Gibier, a pupil of Pasteur, was the founder of the institute—King's Handbook (1893). 486.

During 1890-93, the first section of the present building of the Metropolitan Life Insurance Co. (see Mr 24, 1868) was built on the northeast corner of Madison Ave. and 52d St. on a plot 125 x 145 feet. The architect was Napoleon Le Brun.—The Met. Life Ins. Co.: Its History, etc. (1908). L. M. R. K., III: 967. See also view and description in Harper's Weekly, XXXVIII: 453.

The entire building was completed in 1909 (q.v.). It is shown on Pl. 168, Vol. III: 211.

In this year, Albert Hertler, who was born in New York in 1871, began to win distinction as a painter, particularly in mural decoration.—Fielding, Dict. of Am. Painters, etc. (1926). 167; also Helen W. Henderson, A Loiterer in N. Y. (1917), 271.

In this year, Wm. M. Chase, the painter, was elected a member of the National Academy. For sketch of his career, see Fielding's Dict. of Am. Painters, etc. (1926), 65.

"Prior to 1890, the automobile was merely waiting for the proper type of engine to make it a popular success. In 1887, R. E. Olds built a buggy driven by a steam engine, in which the steam was produced by using gasoline as a fuel. In 1889, Serpollet and De Dion in France revived the flash boiler principle and gave the steam carriage a fresh impetus. They made it a success, but it came at a time when the gasoline engine was about to enter the field. In Germany, two engineers, Daimler in Cannstatt and Benz in Mannheim, attempted to solve the problem by substituting for the steam engine an explosion motor. After trying other methods Daimler took out a patent in 1885 for a vehicle driven by a petrol motor, and this was the beginning of the modern automobile. Daimler sold his patent in France to Panhard and Levassor in 1889, and they began the construction of motor cars as they are to-day, the first car being completed in 1891. "The Evolution of the Automobile," by John L. Macfarlane, in Commercial America (1917). XIII: 11. See, further, 1892.

Mayor Grant, in his annual message, informs the common council that the city debt has been increased during the past year by $75,000,916,404, due largely to the purchase of new parks. He calls attention to the fact that at present "the water supply can scarcely be deemed adequate to the necessities of its people," as the daily supply is still 112,000,000 gallons, as it was five years ago, although during that time the city has greatly increased in population, buildings, manufactures, and commerce. However, the approaching completion of the new Croton aqueduct with its capacity of 500,000,000 gallons per day makes it certain "that before the close of the year we will be in the enjoyment of such a generous supply of water as will meet every requirement of the population."

The matter of street pavements, long a source of criticism and reproach, has been solved to some extent. "In obedience to a general demand by property-owners, residents and the newspaper press, it has been decided to adopt smooth asphalt pavements for those streets which are not extensively used for business purposes. In laying these pavements the Department of Public Works has adopted a form of contract by which the companies who undertake the work are compelled to guarantee that the pavement will be kept in a condition of thorough repair for the space of fifteen years, free of all expense to the City, and for these pavements with this guarantee of permanent maintenance the total cost will be less than the amount paid for the pavement now upon Fifth avenue, which, after a few years of use, is already in need of repair."
1890
Since Jan., 1889, the bureau of incumbrances has removed 2,495 telegraph poles and about 14,500,000 ft. of electric wires; and it is "confidently believed that every pole will be removed from the streets and that every electrical wire will be operated under ground in properly constructed subways" by the end of next summer.

Several "laudable reforms," says the mayor, have been accomplished in the department of public works. "By dispensing with the services of unnecessary employees and by the reduction of excessive salaries a saving in the expenses of this department has been effected, amounting to $50,000 a year. The law which provides that all contracts shall be let to the lowest bidder after an honest competition has been obeyed in its spirit as well as in its letter. By the terms of the statute such letting is compulsory only where the amount to be expended exceeds the sum of $1,000. In former years a few contractors obtained by private arrangement, without competition, contracts which often were for one dollar less than that sum. This system of awarding $999 contracts by private agreement has been abolished, and no work or materials involving the expenditure of more than one hundred dollars are now ordered, except upon competitive bids."

Dedication of the City Prison. "The encounter between the realm of the city and the jurisdiction of the State is that of two of the oldest establishments of this city, therefore, compelled to pay an unjust proportion of the cost of this city, which municipality is forced to issue its own bonds for the purpose. In consequence, New York City is not only compelled to pay for its own armories, but also to bear about 5½% of the cost of all the armories erected in other parts of the state."—Proc., Bd. of Alds., CXCVIII: 6-19.

The completed Rutgers Riverside Presbyterian Church at the s.w. cor. of 77d St. and Western Boulevard, the corner-stone of which was laid on May 25, 1889, is opened for worship.—N. Y. Times, My 26, 1889; Jl 20, 1890. See also L. M. R. K., III: 931-33; The Redbook (1890), 656. This church was dedicated on July 25, 1925, to make way for an office building; and a new church was built on the north side of 77d St. adjoining the Ansonia Hotel. This was dedicated on March 21, 1926.—N. Y. Times, Mr 22, 1926.

The 8th Regiment armory, erected on the west side of Park Ave., between 94th and 95th Sts., is opened. The 8th Regiment, which had its beginning in 1876, did duty at Port Gamosevet, foot of West 11th St., in the War of 1812, and served in the Civil War and the Spanish War. For a time it occupied the upper part of Centre Market, Grand and Centre Sts.—Souvenir of the Grand Opening of the new Armory of the Eighth Regiment, N. G. S. N. T. Jan. 30, 1890 (New York, 1890?); Miller, New York As It Is: (1876), 40.

Feb. 1 From Feb. 3 to 8, the library of the American Academy of the late Samuel Latham Mitchell Barlow was sold at the Am. Art Galleries. It included much manuscript material relating to early New York.—See sales cat. (with price-list), in N. Y. P. L.

The 100th anniversary of the organization of the U. S. supreme court is celebrated with exercises at the Metropolitan Opera House. In the evening there was a banquet at the Lenox Lyceum.—N. Y. Times, F 4 and 5, 1890.

A great mass-meeting is held in Cooper Union in favor of a world's fair in New York in 1892 (see II 25, 1889)—N. Y. Times, F 18, 1890. Congress, however, decided that a Columbian fair should be held at Chicago (see Ap 25).

The Racquet Court Club (see Ap 28, 1873) having been merged in this year in the Racquet and Tennis Clubs, the latter is incorporated. The rooms at 55 W. 26th St. continued to be used until April 30, 1891, when the club-house at 27 W. 43d St. was opened.—Club Book (1891) L. M. R. K., III: 918. On April 15, 1898, a new club-house, at 370 Park Ave., was opened.—Club Book (1918).

John Jacob Astor (grandson of the first J. J. Astor) died at his residence at Fifth Ave. and 53d St.—N. Y. Times, F 23, 1890.

From Feb. 23 to 25, Bangs & Co. sold at auction the library of Jas. Carson Brevoort, of Brooklyn. It consisted principally of scarce works relating chiefly to the discovery, exploration, and history of North America.—See the sale catalogue in N. Y. P. L.

The Manhattan Club (see N 13, 1863) signs a 21-year lease of the A. T. Stewart mansion at the north-west corner of Fifth Ave. and 54th St.—N. Y. Times, Mr 14, 1889, and Mr 2, 1890. See also Wattersen, Hist. of the Manhattan Club, 62-63; 75-77; N. Y. Era. Telegram, J 7, 1913; Mon. Hist. N. Y., IV: 724-25; L. M. R. K., III: 958, 959. However, the club remained here only until 1899 (q.v., My 2).

Andrew H. Green presents a memorial to the legislative having as its object to emphasize the importance of official inquiry into the expediency of enlarging the area of the city of New York. After calling attention to his earlier communication (see D 30, 1888), he concludes: "The encounter between the realm of the city and the tribal system and the coming forces of the operative system, between barbaric tradition and educated aspiration, to which there can be but one result, when the frontier lines of the Manhattan, the Montanks and the Raritans shall be obliterated, and New York, Brooklyn, Long Island City and Staten Island shall be one politically as they are already in every other relation. . . . These are some spheres of administration whose proper regulation is most vitally important to the common welfare and which must be apportioned out among different territorial authorities.

The navigable water system of the port belongs in common to all the cities and towns and counties of the port. Its development and protection is the concern of all, but under existing arrangements it is the duty of none. . . . The arrogacies of garbage and mudscow begin in making their way through the streets of the city, and all sorts of waste are past finding out. From Sandy Hook to Yonkers all the shore and all the water space is open to lawless enterprise. Every little district has its marauders, who, by encroachment, appropriation, and misuse deplete the general system to transfuse its vitality into some niggard scheme of individual profit."—Assembly Docs. (1890), II, Doc. 71.

The handling of immigrants arriving at the port of New York is transferred from the state commissioners of immigration to the U. S. superintendent of immigration at the barge office.—Ann. Cyclop. (1890), 620.

The Union League Club holds a reception in honour of Gen. Wm. T. Sherman on his 70th birthday. About 700 guests are present including representatives of the army, navy, the clergy, as well as business, professional, and political life.—Maurice, Fifth Avenue, 116-17.

Immigrants land for the last time at Castle Garden. The barge office is to be used as a landing-place until Ellis Island is ready (see Ja 1, 1892)—N. Y. Times, Ap 16, 17, and 19, 1890. See also L. M. R. K., III: 987. See Ja 10, 1891.

The name of Ninth Ave. from 94th St. to 127th St. is changed to Columbus Ave.—Proc., App'd by Mayor, LVIII: 59.

The name of Tenth Ave. from 59th St. to Port George Ave. is changed to Amsterdam Ave.—Proc., App'd by Mayor, LVIII: 59.

Congress passes an act providing that the 400th anniversary of the discovery of America by Christopher Columbus shall be celebrated in 1892 by an international exhibition at Chicago.—Laws of U. S., 51st cong., 1st sess., chap. 196. See O 25, 1892.

The legislature provides for a bi-partisan commission of 18 members, to be appointed by the governor with the concurrence of the senate, to revise the judiciary article of the state constitution.—Laws of N. T. (1890), chap. 189. This commission rendered a report on March 4, 1891 (q.v.).

A Protestant Episcopal synod is held for the last time in Zion P. E. Church at the s. e. cor. of Madison Ave. and 35th St., and the consolidation of Zion Church with St. Timothy's is consummated.—N. Y. Times, Ap 25 and 28, 1890; L. M. R. K., III: 934. The united congregations erected a new church (see Ap 29, 1891), and the old Zion Church edifice was sold to the South Reformed Dutch congregation (see N 30).

The legislature incorporates the New York and New Jersey
THE ICONOGRAPHY OF MANHATTAN ISLAND.

1900 Bridge Co. for the purpose of constructing and maintaining permanent bridges across the North River between N. Y. City and New Jersey. The bridge is to be commenced on or before Jan. 1, 1892, and to be completed on or before Jan. 1, 1897. Its terminus in New York City is to be somewhere between 10th and 181st Sts.—Laws of N. Y. (1890), chap. 273. On March 3, 1896, the time for completing the bridge was extended to Jan. 1, 1897.—Ibid. (1896), chap. 67.

1900 Ground is broken for the permanent Washington Memorial Arch.—N. Y. Herald, May 1, 1890. See May 30.

May 1890 The Astor Place Opera House, which has been used by the Mercantile Library Association since April 19, 1854 (q.v.), is demolished and a new library building begun on the same site (see Jl 16). This was completed Nov. 9, 1891 (q.v.).—11th Ann. Rep., Merc. Lib. Ass’n (1882); L. M. R. K., III: 956; Harper’s N. Y., XXXIV: 347, 348. See also Sun, N. 2, 1925, and N. Y. Times, N. 5, 1920.

1890 A third act is passed by the legislature (for earlier ones, see My 18, 1888, and Mr 27, 1889) looking to the construction of a municipal building. The commissioners of the sinking fund, together with the surrogate, the clerk, and the registrar, are to be a board of commissioners, which board is to choose a site not over the city hall park” (see S 18, 1889), advertise for plans, and award contracts. The contracts are to be carried out “under the direction and supervision of the commissioner of public works.”—Laws of N. Y. (1890), chap. 299.

1890 An act is passed to create a commission to inquire into the expediency of consolidating the various municipalities in the state of New York occupying the several islands in the harbour of N.Y. Laws of N. Y. (1890), chap. 317; Foord, Life and Public Services of A. H. Green, 186. The commissioners of inquiry appointed under this act were John Bogart of New York City, state engineer; John H. Brinckerhoff, of Queens County; George R. Cathcart, Frederic W. Devoe, Andrew H. Green, John L. Hamilton, and Calvert Vaux, of New York City; George Wm. Curtis, of the County of Essex; Edward F. Sutton, J. S. T. Straun- dahl, and Wm. D. Vender, of Brooklyn; and Charles P. McClelland, of Westchester. The commission organised with Andrew H. Green as president.—Ibid., 186–87. See Jl 25, 1893.

13 The dept. of pub. works issues proposals to contractors “for furnishing materials and performing work in the repairing the north front of the City Hall with artificial stone, and painting the same.” The contract was let on June 4, and called for completion of the work in 60 days. The specifications called for the repair of cornices, balustrades, urns, carved caps, windows, doors, etc., and painting the entire north front. The total cost is about $85,000.—From the original contract in auditor’s office, dept. of pub. works. See S 20, 1890 and Ap 1, 1893.

15 The corner-stone of Carnegie Hall is laid by Mrs. Carnegie.—N. Y. Times, May 15, 1890. On May 30, 1891 (q.v.), the hall was opened. See also L. M. R. K., III: 987.

18 Announcement is made that Helen Keller, aged ten, a deaf, dumb, and blind girl from Tuscumbia, Ala., whose remarkable mental development in the face of the tremendous handicap imposed on her by nature, has been the theme of much delighted comment, has within the last six weeks been taught to speak intelligibly.” Her education is described.—N. Y. Times, My 25, 1890.

27 Wm. Waldorf Astor intends to erect a monster hotel at 450 St. and Fifth Ave., on the site of the old Astor residence. It will be under the management of George C. Boldt.—N. Y. Times, My 28 and 29, 1890. The hotel became the Waldorf.—Harper’s Weekly, XXXV: 192. For an account of 12 new hotels which are about to be built in the city and of the chief ones now existing, see N. Y. Times, O 19, 1890.

30 The corner-stone of the permanent “Washington Memorial Arch” is laid at the lower end of Fifth Ave.—N. Y. Herald, My 31, 1890; L. M. R. K., III: 966. The arch was dedicated on May 4, 1895 (q.v.).

June 1890 The new Madison Square Garden designed by McKim, Mead & White, one of the largest halls of public entertainment in the world, is opened with a concert by Strauss’s orchestra at which at least 10,000 people are present. The building extends from 26th to 27th St. and from Madison to Fourth Ave.—N. Y. Times, Jl 8 and 17, 1890; Harper’s Weekly, XXXIV: 281, 282. The original building on this property, erected in 1863 as a passenger station for the N. Y., N. H. & H. R. R., was leased to P. T. Barnum and others in 1873 as an amusement place, and was successively used as a museum, religious meeting place, circus, and concert hall. In 1879 (q.v., My 22 and 29), it was named the Madison Square Garden, and in 1889 (q.v., Ag 7) it was demolished prior to the erection of the new Garden.—Brown, Hist. of the N. Y. Stage, III: 88–90. L. M. R. K., III: 984–85. See also descrit. of Pl. 168, III: 871.

The People’s Municipal League is organised.—N. Y. Times, Jl 25, 1890.

30 The cornerstone of the Judson Memorial Baptist Church is laid at Washington Square and Thompson St., in honour of Adoniram Judson, the first American missionary to foreign lands.—N. Y. Times, Jl 1, 1890; L. M. R. K., III: 928. See also Harper’s Weekly, XXXIV: 905, 906. The church was completed in 1892.—King’s Handbook (1893), 379.

Alterations were made at this time in Frances Tavern. The July white street story chooses a site of some of the original first-floor timber of which had survived the fire of 1852 being sold for souvenirs. The first floor had been a few steps above the street level. It was now brought down to the level of the sidewalk, and in place of the original first story walls on Broad and Pearl streets, iron columns and plate glass windows were inserted.”—14th Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1907), 72; descrip. of Pl. 167-b, III: 950; L. M. R. K., III: 978. See Jl 5, 1904, and Ag, 1906.

The Sherman Anti-Trust Act becomes a law.—Macdonald, 2 Select Statutes, etc., 395–97.

The city acquires by condemnation proceedings the land on the east side of Fourth Ave. between 33rd and 43rd Sts. Here the armory of the 71st Regiment was afterwards built.—Prendergast, Record of Real Property, 1914.

The new aqueduct from Croton Lake, “began in 1883” (error for 1885), is opened, though not quite completed, and the water is let into the big double reservoir in Central Park, starting from the gate-house at 135th St. This reservoir holds 1,000,000,000 gallons. The aqueduct has a capacity of 315,000,000 gallons a day to Jerome Park, where a receiving reservoir is built for supplying the annexed district. Below Jerome Park, the capacity is 250,000,000 gallons a day to 135th St., the southerly terminus. From this point eight 48-inch pipes carry the water. Four of the pipes go to Central Park; the other four branch off to direct connections with the city’s distributing mains, one at 125th St., a second at Manhattan Ave., a third at 110th St., and the fourth at 100th St.—N. Y. World, Jl 15 and 16, 1890. For a detailed description of the work see Wegmann, 49, cts. 315–37; Century Mag., XXXIX: 205. The new aqueduct was finally completed on June 24, 1894 (q.v.).

16 The cornerstone of a new Clinton Hall (the third) is laid for the Mercantile Library Association on the old site at Astor Pl. and 8th St. (see My).—N. Y. Times, Jl 17, 1890. The association moved into the new building on Nov. 9, 1891.—Ibid, N. 10, 1891; 71st Ann. Rep., Merc. Libr. Ass’n (1892).

The Western Union Telegraph building, at the n. w. cor. of Broadway and Dey St., is almost destroyed by fire, and telegraphic communication with the city is cut off.—N. Y. Times, Jl 19, 1890. See also ibid., Jl 20–26, 1890.

16 The 159th St. viaduct is commenced. It was completed Oct. 2, 1893, having been erected under plans approved by the board of estimate and apportionment, pursuant to chap. 576 of Laws of 1887.—N. Y. Times, Ag 15, 30, and 31, 1890; also tablet at east end of viaduct. See also maps filed in bureau of topography, borough president’s office, as maps No. 5555 and 4176.

The Democratic Club of the City of New York is incorporated. Its club-house was at 617 Fifth Ave.—Club Book (1891). This was demolished in 1924 to make way for part of the Saks & Co. building.

27 Sept. one of the departments of the Madison Square Garden enterprise, is opened with a performance of “Dr. Bill.” Wilton Lackaye plays the title-role.—N. Y. Times, S 14 and 28, 1890.

A tablet is placed by the Holland Society on the wall of No. 4 Bowling Green to mark the site of Fort Amsterdam and of the
1890

The Manhattan Island was then at the north-east corner of Pearl St. and Centre St., the site of the first Dutch House of entertainment in New York, afterward the old St. Mary's, or City Hall,” at Third Ave. and 13th St., where Stuyvesant's pear tree formerly stood; at the north-east corner of Broadway and Exchange Place, to mark the site of the first New York exchange, established in March, 1670; at the north-east corner of Nassau and Cedar Sts., the site of the old Dutch Church, later used as the post-office; at the south-east corner of Broad St. and Pearl Sts., where the old Franchise Tavern, erected by Etienne De Lancy, stood; and at about No. 115 Broadway, the site of the historic De Lancey House, afterward the City Hall.—New N. Y. Times, S 20, 1890. See also L. M. R. K.

The new Plaza Hotel at 59th St. and Fifth Ave. is opened.—N. Y. Times, S 30, 1890; King’s Handbook, 222. See S 18, 1888.

The corner-stone of St. Michael’s P. E. Church, at the n. w. cor. of Amsterdam Ave. and 99th St., is laid by Bishop Potter.-N. Y. Times, S 30, 1890; L. M. R. K., III: 934.

Oct.

Louis Philippe Albert, Comte de Paris, and his eldest son,

Louis Philippe Robert, Duc d’Orléans, arrive at New York and are welcomed by a committee of veteran Union generals in commemoration of the court’s services to the Union during the Civil War. The party is escorted to the Windsor Hotel.—N. Y. Times, O 4, 1890. See also ibid., O 5 and 6, 1890. After visiting Trenton, Philadelphia, Baltimore, Washington, and other places in the South, they returned to New York, and on Oct. 20 the survivors of the army of the Potomac held a banquet in the court’s honour at the Plaza Hotel. They sailed for home on Nov. 1.—Ibid, O 7, 17, 19, and 31, 1890. See also N. Y. Times Mag., Ag 24, 1891.

The most costly buildings in the city, excluding federal and municipal buildings, are the Navarro flats erected by the Central Park Apartment Equitable Trust Co., the St. Patrick’s Cathedral, the Mills Building, the Dakota Apartment House, and the Plaza Hotel, the costs of which ranged from $4,000,000 to $24,000,000.—N. Y. Times, O 5, 1890.

11

The Society of the Daughters of the American Revolution is organized at Washington, D. C.—Constitution and By-laws (1893).

25

The corner-stone is laid for the new criminal court building (see My 15, 1897), bounded by Franklin, Centre, Elm (later, Lafayette), and White Sts.—N. Y. Times, O 26, 1890; Message of Mayor Grant, Ja. 5, 1891, p. 18. It was erected under the direction of the commissioners of the sinking fund and the department of public works (see tablets in entrance corridor), and was completed in 1895, at a cost of $1,350,000 (without its furnishings).—Message of Mayor Gilroy, Ja. 9, 1892. The N. Y. State arsenal formerly occupied the site. —L. M. R. K., II: 974.

28

The name of Ave. B, from 79th St. to 89th St. is changed to East End Ave.—Proc. App’d by Mayor, LVIII: 177.

Nov.

“...the embarras of the Barings in London had a very disturbing effect upon the stock market in New York. ... The decline in prices caused eighteen Stock Exchange failures.”—Eames, N. Y. Stock Exchange, 66; N. Y. Times, N 16 et seq., 1890.

Hugh J. Grant (see N 6, 1888) is re-elected mayor.—N. Y. Times, N 5 and 6, 1890; Ann. Cyclo. (1890), 622.

The South Reformed Dutch Church takes possession of the edifice at 53rd St. and Madison Ave., formerly Zion P. E. Church. It moved here from Fifth Ave. and 21st St.—N. Y. Times, D 11, 1890; L. M. K., III: 934; 916; records of the church (by courtesy of Rev. Thos. B. Bridges). Christian Science services were conducted here prior to the demolition of the building in 1917.

A tablet is unveiled in St. Paul’s Chapel in memory of the centennial celebration of the inauguration of Pres. Washington.—N. Y. Herald, D 8, 1890.

The new Pulitzer Building (see O 19, 1890) is formally opened.—N. Y. Times, D 11, 1890; descrip. of Pl. 163, III: 846. It is the tallest building in the city.

Old Christ Church, erected (as a Baptist Church) in 1858 at the south-east corner of Fifth Ave. and 35th St., is destroyed by fire.—N. Y. Times, D 18 and 19, 1890; L. M. R. K., III: 932.

1891

—In this year was published an atlas of 13 maps, by J. R. Bien and C. C. Vermeule, New York, entitled Atlas of the Metropolitan district and adjacent country comprising the counties of New York

Kings, Richmond, Westchester and part of Queens in the state of New York, the county of Hudson and parts of the counties of Bergen, Passaic, Essex and Union in the state of New Jersey showing in a series of maps the relative geographical position, the topography, hydrography and economic features of this state.

In this year, there were 77,355 tenement-houses in New York, with a total population of 1,225,421.—Gould, Housing of the Working People (1892).

In this year, cable traction was established on the surface roads in Broadway and Third Ave., and a new pavement was laid, at the same time in Broadway from Bowling Green to 33rd St.—Message of Mayor Grant, Ja. 4, 1892, pp. 12-13. See also Street Railway Jour., XVII: 681. In 1901 (q.v.), the cable system was changed to electric.

This year, the Century Association erected its present building on the north side of 43rd St. near Fifth Ave. (No. 7 W. 43rd St.). McKim, Mead & White were the architects.—Liber Deeds, MMXI: 458. See also summary under D, 1846. The statement in L. M. R. K., III: 937, that the building occupies the site of the last remaining observatory, is clearly erroneous, as the observatory stood on the north side of 44th St. opposite the Crystal Palace (see Mr 25 and Je 30, 1851).

In this year, largely through the efforts of Mr. A. C. Bernheim, the University Settlement Society was organized “to bring men and women of education into closer relations with the laboring classes of this city for their mutual benefit.” The N. Y. Neighborhood Guild (see 1889) was merged in the society, and the Guild House at No. 147 Forsyth St. became the first "settlement." In 1893, the society moved to 26 Delancey St.—Univ. Settlement Soc. Bulletin (Jan., 1892), 3-6, 15-18; Ann. Rep., Univ. Settlement Soc. (1894), 11. King, writing of the society in 1893, said: “It aims to establish ‘settlements’ in the tenement-house districts, where college men interested in the work may live, and mingle with their poor neighbors, in terms of perfect equality, somewhat after the plan of the famous Toynbee Hall, in London. It maintains the Neighborhood Guild, at 26 Delancey Street, which includes kindergartens, gymnasium, boys’ and girls’ clubs, a reading-room and circulating library, penny provident bank, concerts, and lectures, besides dancing, cooking, sewing, singing and other classes. It has organized the Tenth-Ward Social Reform Club, to establish public baths, laundries, kitchens, lavatories, parks, co-operative stores, sick benefit societies, etc.”—King’s Handbook (1895), 421. See 1898.

During this year, the improvement of Riverside Park from 72d St. to 79th St. was completed.—Ann. Cyclo. (1891), 586.

The board of taxes and assessments publishes The land map of the city of New York, bearing this date. It is an oblong atlas of 43 sheets.

The first of the Fifth Avenue Theatre in W. 28th St. entirely destroys the playhouse and badly damages Herrmann’s Theatre and the shops and offices in Broadway between 28th and 29th St. The upper storyst of the Shuettenee House on the east side of Broadway are also injured.—Evre. Post, Ja. 3, 1891; L. M. R. K., III: 984. See My 24, 1892.

Mayor Grant communicates his third annual message to the common council. He says that during the past year the city debt has decreased nearly $600,000, and that though the most important subject under consideration during his first term was rapid transit, it is no nearer solution than it was two years ago. The proper cleaning of streets is also a subject of great importance with which little progress has been made, as well as the construction of a municipal building service, a site for which has not yet been selected. Since May 1, 1889, about 120,000 sq. yds. of asphalt pavement have been laid, and New York now has more of this pavement than either London or Paris. In addition, the mayor says:

*The efficient administration and consequent excellent condition of the Fire Department have reduced the average loss per fire from $2,729 in 1888 and $1,451.03 in 1889 to $1,172.64 in 1890.*

*The system adopted by the Dock department of increasing the wharfage facilities of New York is to be commended. Twenty-two new piers are now being extended and the wharfage facilities of New York will shortly be so increased that all the large Atlantic steamers can have ample accommodation.*

*The work of removing the poles and overhead wires has been continued during the past year. There have been removed...*
The hospitals, asylums and other charitable institutions of the city are in a crowded condition. Instead of trying to extend them where they are now located and where the area for extension is limited, it would be as well gradually to remove them beyond the city limits. In this event several of the islands on which these institutions are situated could be turned into public parks. In case arrangements can be made to induce the Federal authorities to abandon Governor's Island as a military post, such action should be taken by the City and State authorities as will assure the use of that accessible place for a public park.

Third: It would be a neglect of my duty were I to fail to again protest against the treatment of New York by the Federal authorities. The city is the largest city in this country. It will in time be the greatest in the world. As the first city in the United States it was entitled to the World's Fair. As a matter of right it is entitled to a truthful enumeration of its population and to proportionate representation in Congress and the Electoral College. That representation has thus far been denied. The reports of the various departments and the enumeration made by the Police force show that New York has 200,000 more people than the Federal authorities have given as credit for. I have no power to do more than has been done to redress this grievous wrong. A population less than the omitted people is now represented by six Senators of the United States and three members of the Federal House of Representatives."

The second part of the sale of paintings belonging to Geo. J. Seney (see Mr. 31, 1853), took place in the assembly-room of Madison Sq. Garden on Feb. 11, 12, and 13. The sale yielded $665,550.—A Plan and Interesting Information concerning the Am. Art Ass'n. On Feb. 7 to 9, 1894, a sale of the paintings, etchings and engravings, for the estate of Geo. J. Seney, deceased, took place in the Hotel Astor.

20. The park board changes the name of the Mt. St. Vincent Restaurant in Central Park (see 2, 1881) to "McGowen's Pass Tavern."—Even Post, F 1, 1891.

21. The remains of Gen. Wm. Tecumseh Sherman, who died Feb. 14, are escorted to the Desbrosses Ferry from 71st St., to be conveyed, via Penn. R.R., to St. Louis. The same tier is used which carried the bodies of Grant, Hancock, and Sheridan. A funeral procession of regulars, Grand Army men, militia, and veteran organizations accompanies it.—N. T. Herald, F 20, 1891. See also Harper's Weekly, XXXV: 154.

22. The Metropolitan Club is organized.—Club Book (1894); King's Handbook (1893), 545. See also N. Y. Times, F 25, Mr. 8, 10, 11, and Apr. 1, 1891, and L. M. R. K., III: 938. See Mr. 19.

23. A New York chapter of the Daughters of the American Revolution is organized at Sherrys.—N. Y. Times, F 24, 1891. See also ibid., Mr. 24, 1891.

24. The New York Historical Society decides to purchase, for $286,500, the property on Central Park West between 66th St. and 70th St. as the site for a new building.—Even Post, F 25, 1891. The building here is used which carried the bodies of Grant, Hancock, and Sheridan. A funeral procession of regulars, Grand Army men, militia, and veteran organizations accompanies it.—N. T. Herald, F 20, 1891. See also Harper's Weekly, XXXV: 154.

25. The New York Historical Society decides to purchase, for $286,500, the property on Central Park West between 66th St. and 70th St. as the site for a new building.—Even Post, F 25, 1891. The building here is used which carried the bodies of Grant, Hancock, and Sheridan. A funeral procession of regulars, Grand Army men, militia, and veteran organizations accompanies it.—N. T. Herald, F 20, 1891. See also Harper's Weekly, XXXV: 154.

26. By unanimous vote the board of aldermen resolves that the junction of Amsterdam Ave., the Boulevard, and 70th St. (see N 14, 1887) shall hereafter be known as Sherman Square in honor of the late Wm. Tecumseh Sherman.—Even Post, Mr. 3, 1891.

27. The International Copyright Act is approved by Pres. Harrison.

29. "The Judiciary Commission of 1899" (q.v., Ap 26) renders its report to the state senate (Senate Doc. 1891, VI, no. 51). "This report . . . manifestly came too late to enable the legislature to give the subjects embraced in it the consideration which their importance demanded, and the senate took no action except to refer the report to the judiciary committee," but "many of its most important suggestions were adopted, three years later, by the Convention of 1894" (q.v., My 8), and were incorporated in the new constitution.—Lincoln, Const. Hist. of N. Y., II: 719-21.

30. From March 7 to 14, the Bratvogt Ives' collection of rare Oriental porcelains and jades, Japanese lacquers, books, and manuscripts was sold at the Am. Art Galleries for $755,310.75.—A Plan and Interesting Information concerning the Am. Art Ass'n. The Japanese ceremonial swords to be sold with this collection, were purchased as a lot prior to this sale, and presented to the Metropolitan Museum of Art.—Address of Mr. Thos. E. Kirby . . . Nov. 10, 1922.

31. The federal government buys, for $265,022, the site bounded by Washington, Christopher, Barrow, and Greenwich Sts., to be used for the erection of the "Appraiser's Warehouse." Preliminary plans for the building were prepared during 1891-92, and it was in the course of erection by Sept. 30, 1892.—Ann. Rep., Supervising Archit., U. S. Trea. Dept. (1892), 105-7. 211. The warehouse was entirely enclosed and under cover by 1894, but in 1895 plans for its enlargement to ten storesys. It was not occupied April, 1896 (q.v.).—Ibid., 1893, 45; ibid., 1894, 43; ibid. (1895), 44 (with view); ibid. (1897), 41.

32. The legislature authorizes the union of the College of Physicians and Surgeons with Columbia College.—Laws of N. Y. (1891), chap. 101. In November, the former college transferred its property to the trustees of the latter and became an integral part of Columbia.—Hist. of Columbia Univ., 1754-1904, 323-24. The union of the colleges was ratified by the legislature on March 6, 1894.—Laws of N. Y. (1894), chap. 57.

33. The statutory revision commission is directed by the legislature to republish verbatim, preserving the original spelling and punctuation, the statutes of the colony of New York, from the foundation thereof to the adoption of the first constitution.—Laws of N. Y. (1891), chap. 125. They were printed in 1894 under the editorship of Robert C. Cumming, with the title Colonial Laws of New York.

34. A bill providing for the creation of "Greater New York" is introduced in the senate and in the assembly. This bill made no progress and was virtually pigeon-holed at the end of the session.—Foerd, The Life and Pub. Services of A. H. Green, 187.

36. The establishment of the Cathedral Parkway by widening 110th St. between Seventh Ave. and Riverside Park is authorized, to connect Central, Morningside, and Riverside Parks,—Laws of N. Y. (1891), chap. 275. The land was acquired in 1892 (q.v., D 30).

38. The corner-stone of the Church of Zion and St. Timothy (see Ap 27, 1890) is laid in 47th St. between Eighth and Ninth Aves,—N. Y. Times, Ap 30, 1891; L. M. R. K., III: 934. It was opened on April 17, 1891 (q.v.).

39. Carnegie Hall (see My 13, 1890) is formally opened.—N. Y. May Times, My 3 and 6, 1891; L. M. R. K., III: 983. See also Harper's Weekly, III: 347.

40. The corner-stone of a new Middle Reformed Dutch (College) Church (see F 27, 1887) is laid on Second Ave. near 75th St.—N. Y. Times, My 16, 18, 1891; L. M. R. K., III: 935. See Je 26, 1892.

41. Ground is broken at Fifth Ave. and 60th St. for the club-house
of the newly organized Metropolitan Club (see F 20).—*N. Y. Times*, May 20, 1891.

19. See also ibid., May 29 and 31, 1891, and L. M. R. K., III: 928. The club-house was opened on Feb. 27, 1894 (p. q.v.).

20. On this date, and on Aug. 6, 1891, and March 30, 1892, the city acquired title to the land at 129 W. 14th St. (north side, west of Sixth Ave.). Here the armory of the Ninth Coast Artillery was afterward located. Rendegast, *Record of Real Estate* (1914), citing *Libers of Conveyances*. It was formerly the site of the Palace Garden. —See L. M. R. K., III: 924, 985. See also 1858.

21. June

22. The new Croton aqueduct, authorised in 1883 (p. q.v., Je 1), is completed and is formally turned over to the department of public works.—*Aqueduct Commission. Report of the President*, 1887-1885, in N. Y. P. L.

23. July

24. The French Regiment armory, at 44th St. and Broadway, is partially destroyed by fire.—*N. Y. Times*, Je 28, 1891.

25. The board of aldermen, by a vote of 16 to 8, decides against the Manhattan Elevated Railroad’s occupancy of part of Battery Park (see Je 9, 1885).—*N. Y. Times*, Ji 1 and 2, 1891. A large mass meeting was held in Battery Park on July 10, at which resolutions were adopted approving the aldermen’s action and asking the park commissioners to revoke the permit granted in 1876 (q.v., F 10) to the railroad.—Ibid., Ji 10, 11 and 12, 1891. See also ibid., Ag 2 and 4, 1891. No action, however, was taken by the park commissioners, and the elevated tracks were not removed.

27. Chas. B. J. Snyder is elected superintendent of school buildings by the board of education. He served as such until his retirement on Jan. 1, 1923, and during these years did more for the city’s school plant than any other man. He developed a type of school planning and architecture which is a credit to the city and has been copied all over the United States. conspicuous examples of his work are: George Washington High School, Washington Irving High School, Manhattan Trade School, and New Utrecht High School.—Letter to the author from Eugene A. Nienmecker, director of research, research and statistics, Board of Education. —See Mi 27.

28. Thomas A. Edison applies for a patent for a "Kineticograph Camera," the first camera invented for taking motion pictures. The patent was issued on Aug. 31, 1897.—*Dyer & Martin, Edison His Life and Inventions*, 905, 964.

29. Mr. Edison, writing to the editor of the *Times* in June, 1921, said: "The writer of Screen News in your issue of June 5 does me an injustice in citing a lot of claims tending to deprive me of the honor of being the inventor of the modern motion picture. The injustice arises through a misunderstanding. "The basic invention was the Kinetograph, which was an instrument for recording (‘taking’) motion pictures, as now used. It was not the apparatus for the reproduction of the pictures, enlarged, on a screen. It is on the projecting machine only that the claims of others can have any bearing. "The same applies, I believe, to all the other claims set forth with several attachments to adapt it for screen purposes. "At first I put out several hundred reproducing machines which reproduced the pictures with but little enlargement, and I was starting to make the addition to the recording instrument to adapt it to greater enlargement for projection on the screen as we now see it, when Mr. Armst presented to my agents a better device for projection than I had at the time. Soon afterward Lumiere, of France, used my recording instrument, adding another and different kind of device to adapt it for screen enlargement. These reversed recording machines were introduced commercially as Projecting Machines, but the additions and changes were merely detail improvements on my prior and basic invention, namely, the Kinetograph, or Recoding Machine, under which I claim to be the inventor of the modern motion picture."—*N. Y. Times*, Je 9, 1921. See Ap 14, 1896.

30. The Merchants’ Hotel, erected in 1820 at Nos. 39 and 41 Cortlandt St., is being demolished to make room for a ten-storey office building.—*N. Y. Times*, Ag 9, 1891.

31. Sixty persons perish in the burning of a building on Park Place.—*N. Y. Times*, Ag 18, 1891. See also illustration and account in *Harper’s Weekly*, XXVI: 676.

32. The New England Hotel on the corner of the Bowery and Bayard St., erected as the North American Hotel about 1826, has just been demolished.—*N. Y. Times*, Ag 31, 1891.

33. Sept.

34. Temple Beth-El, at the corner of 76th St. and Fifth Ave., is dedicated.—*N. Y. Times*, S 19, 1891; L. M. R. K., III: 929. See also King’s *Handbook* (1895), 492.

36. Of this month, the "Second Church of Christ, Scientist, Borough of Manhattan, City of New York," was organized.—Information supplied by Mr. Chas. E. Hoytman, Christian Science Com. on publication of the State of N. Y. C. F. 1, 1888; and see, further, November. For the Second Church’s building, see Ap 2, 1899.

38. St. Agnes’ Chapel, erected by Trinity on W. 92d St. near the Boulevard, is opened.—*N. Y. Times*, O 19, 1891. See also King’s *Handbook* (1895), 347-48 and L. M. R. K., III: 933.

39. The board of rapid transit railroad commissioners, provided for in the legislative act of Jan. 31 (p. q.v.), renders a report to the common council, including special reports by Wm. Barclay Parsons, and other engineers employed by the board. In this report are to be found interesting discussions that are embryonic of the present (1926) subway arrangements: e.g., the loops at City Hall Park and Battery Park, the four parallel tracks on a level, as now seen in the Seventh Ave. subway line, and the "double deck tunnel with two tracks upon each deck," to be observed in the present Lexington Ave. line.—*Report of the Board of Rapid Transit Railroad Commissioners* (1891). The plans of the board, virtually as presented, were adopted by the common council on Oct. 28 (p. q.v.).

40. The first Empire State Express runs from New York to Buffalo, via the N. Y. Central & Hudson River R.R., in 8 hours, 41 minutes, and 45 seconds.—*N. Y. Times*, S 15, 16, and O 27, 1891.

41. The Beaux Arts foreshadowing of the Architectural Society had been sold to the Cathedral of St. John the Divine (see N 5, 1887), moves from Morningside Heights to Yonkers.—*Hist., Charter, Act of Incorporation, etc., Leake & Watts Orphan House* (N. Y., 1893). See also L. M. R. K., III: 954. The corner-stone of the cathedral was laid on Dec. 27, 1892 (p. q.v.), but the old asylum building is still standing (1926). A special meeting of the board of aldermen the report of the board of rapid transit railroad commissioners is presented for consideration. A resolution is adopted accepting the plans virtually as presented.—*Proc. Bd. of Ald.* (1891), CCXL: 717-741. *Report of Board of Rapid Transit Railroad Commissioners* (1901), 111-116.

42. New York’s development is in a perennial state of transition, and already a great change has come over much of her finest streets. The trades that cater to the needs or tastes of the wealthy have forced their way into the very closest proximity to their patrons. Business has obtained more than a foothold upon Fifth Avenue. It has taken possession of entire blocks. Upon mansion after mansion has been displayed the sign 'To Let for Business Purposes,' and the desertion continues. Dealers in bric-a-brac, pictures, silverware, and the like, are flocking to the streets. Publishing houses, and great and small, are among its tenants. Piano salesrooms are hardly to be found elsewhere. Show cases are to be seen upon its sidewalks, which here and there are piled with the wares of the furniture seller, and even with the still more commonplace goods of the retail grocer. "But while such is the condition of a part of Fifth Avenue, still more considerable portions of it have retained their former character, and contain the most costly and splendid residences in the country, some of which are of quite recent erection. It is still the headquarters of the world’s wealth and fashion of New York, and consequently of America. It is still the avenue on which dwell the leaders of the social and financial world, and to which, above all others, come those who have gained great fortunes elsewhere. Upon the lists of its residents are the names of Vanderbilts, Astors, Astor, Rhinelander, Cooper, Goedel, Mills, Whitney, Marshall, Roberts, Morgan, Rockefeller, Flagler, Huntington, Gould, Sage and others hardly less notable as the representatives of famous Knickerbocker families or the accumulators of newer millions. "Cut off from the residential district to the northward by the river of traffic which flows along Fourteenth Street, the lower end of Fifth Avenue forms one of the most characteristically air of old Knickerbocker statefulness lingers amid a commonplace environment. The six blocks between Washington Square and Thirteenth Street are a unique corner of New York. Their architecture is that of a generation that has now passed away. It represents the days before that brown stone front era which gave us the monotonous rows of somber respectability that fine street after street of a wide district further up town. It may be seen in its best and most characteristic phase at the corners of Washington
At the n. w. cor. of 51st St. is the richly decorated white stone house of Wm. K. Vanderbilt. Between St. Thomas's Church and 54th St. are the residences of the other two sisters,—Mrs. Webb and Mrs. Twombly. Cornelius Vanderbilt's house is at the n. w. cor. of 57th St., and across the street, on the s. w. cor., is Wm. C. Whitney's "red brick and brown stone house." At the s. e. cor. of 57th St., C. P. Huntington's "castellated mansion of white stone has just been built upon a part of the block which Mr. Robert Bonner so long held unimproved. Three blocks below, the houses of two Standard Oil magnates, Mr. William Rockefeller and Mr. H. M. Flagler, confront each other at the corners of Fifty Fourth Street.

"On the block above the Cathedral is the Roman Catholic boys' orphan asylum." St. Luke's Hospital is on the n. w. cor. of 54th St., "standing back amid trees."

The houses on the eastern side of Central Park overlook its delightful landscape. "A double row of trees shades its western sidewalk, over which occasionally a bushy-tailed squirrel may be seen to scamper. The park view is at its best for some distance above Seventy Second Street, where the ground descends to a small lily-pond near the eastern boundary, and then to the Conservatory Water, rising beyond into wooded slopes, over which peer the lofty tops of the Dakota and San Remo apartment houses, west of the park.

"Vacant lots are still numerous on this upper part of Fifth Avenue, but they are rapidly becoming less so. There are many fine buildings, mostly residential. ... They exemplify the free use made by the architects of today of a wide range of materials and technical styles. Structures worthy of especial note are those of the Progress Club, the most prominent Hebrew social organization, at Sixty Third Street; the Lenox Library, which stretches from Seventieth to Seventy First; and the newly finished synagogue at Seventy Sixth, a magnificent Romanesque edifice, which, done, with its gilded veins, is a towering and conspicuous landmark."

"Beyond Eightieth Street .... Fifth Avenue takes on for a space the undeveloped character of a semiurban thoroughfare. At One Hundred and Twentieth Street, its continuity is interrupted by the steep slope of Mount Morris Park. Beyond this it passes through the more thickly built up district of Harlem to end prosaically in the mud of the Harlem River."—From "Picturesque Points on Fifth Ave.," by Richard H. Titherington, in Munsey's Mag., VI: 123 et seq. See also King's Handbook (1893), 148-153, and Century Mag., Nov., 1893.

In this month, the third Church of Christ, Scientist, was organized, called at first the "Metropolitan Third Church of Christ, Scientist." For the earlier ones, from its beginning in the various churches of New York City, of which the first was the Church of First Church of Christ, Scientist, 1888, 28, N. Second St., and in 1889, in the new building, 39, E. Twenty-ninth St. —Information supplied by Mr. Cha. E. Heitman, Christian Science Com. on Publication of the State of N. Y. See, further, Ap 2, 1899.

The tower of Madison Square Garden (see Je 16, 1899) is opened to the public, St. Gaudens's statue of Diana on its summit having been unveiled on Nov. 1. In the evening the tower was illuminated with red fire, coloured lights, and rockets.—Eve Post, O 13 and N 2, 1891. See also Harper's Weekly, XXXV: 819. While this is being written (June, 1927), the Madison Square Garden is being remodelled to make room for a new office building for the N. Y. Life Ins. Co. Alas.

Ignace Paderewski makes his début in America, at Carnegie Hall.—Eve Post, N 18, 1891.

During the progress of the excavations through the Harlem River Marsh, for the Harlem River Ship Canal, at the Broadway crossing, the remains of a mastodon tusk were found imbedded in peat at a depth of 16 feet below mean low-water. It was secured by the engineers in charge of the work, and presented by Lieut. Col. G. L. Gillispie, U. S. A., to the Am. Museum of Natural History. This is the only occasion known of the finding of such remains on Manhattan Island. This task may possibly have been that of a mammoth, as the tusks of the two animals are much alike; but the probabilities are greatly in favour of its being that of a mastodon. There have been many finds of the mastodon—skulls, jaws, teeth, or bones—in New York State, especially in area around Newburgh; whereas there are only two examples on record in the state (one at Elmira and the other at Attica) of
the finding of teeth of a mammoth.—Information obtained from

1891

Dec.
The Holland House, at Fifth Ave. and 30th St., is opened to

invited guests. It is to be open for business on Dec. 7.—N. Y. Times, D, 6, 1891.

14

Edouard and Jean de Retzak make their New York début, at the Metropolitan Opera House, in "Roméo and Juliet."—Brown, III: 449.

1892

In this year, Gladstone became prime minister for the fourth time; his administration lasted until 1894.—Hazen, Europe since 1875, 507.

"Selden was the first man in the United States to invent a gasoline automobile. He applied for a patent in 1879, but kept it pending for sixteen years, so that when the patent was issued in 1893 it was of the first time because aware of his work. Duryea completed his first gasoline car in 1894, and, despite the prior invention of Selden, may be considered the real father of the American automobile. In the Chicago Times-Herald race in 1895 Duryea won easily, as he did also in New York in the following year. In the race in England, from London to Brighton, in 1896, the Duryea machine won over all competitors, covering the distance in an hour less than any other. Haynes ran his first car in 1894 and Winton in 1896, building his first International car in 1894, and Ford and his first four-wheeled vehicle in 1899, although he did not enter actively in the business until 1899. The improvements in automobiles since that day have been so numerous that the mere mention of them would require more space than can be allowed to this article.—From The Evolution of the Automobile, in Commercial America (F, 1897), XIII: 17. See also "The Rise of the Automobile," in Scientific American, Je 5, 1915, and "Surviving Pioneers of Automobile Building," by John C. Wethorne, in Evan. Mail, Supp., Ja 3, 1914. See also 1890.

In this year, Henry Ford produced "a vehicle scarcely larger than a tricycle with a very crude steering apparatus, and driven by a small one-cylinder engine with a pulley clutch." In 1898 he organized the Detroit Automobile Co., which financed his experiments. His aim was to produce a low-priced car within the reach of people of moderate means. The company was reorganized into the Henry Ford Co; and, in June, 1903, the Ford Motor Co. was capitalized at $100,000. This was the beginning of what became the largest automobile manufacturing business in the world. In 1909, 10,600 cars were sold, and the company bought 276 acres on the outskirts of Detroit, and built the present enormous establishment. For fuller particulars, see The Nat. Cyc. of Am. Biography, XV: 58-60. See 1898.

In this year, the first electric automobile appeared on the streets of Chicago and caused great excitement. It was designed and built by William Morrison of Des Moines, Iowa, during the summer of 1891.—Doolittle, Romance of the Automobile Industry.

The automobile was first equipped with pneumatic tires by Panhard & Levassos, French manufacturers.—Sullivan, Our Times (1926), I: 479-80.

In this year, The Discovery of North America, by Henry Harrisse, was published.

In this year, The Memorial History of the City of New York, by James Grant Wilson, was published.

In this year, The Children of the Poor, by Jacob Riis, was published.

In this year, the Athorpe mansion, erected in 1764 south of 91st St., 210 ft. west of Columbus Ave., was demolished, and seven dwelling-houses were erected on the site.—Record & Guide, XLIX: 753, 834; ibid., L: 320; L. M. R. K., III: 948.

In this year, the 71st Regiment (see 1887) erected its armory at the south-east corner of 54th St. and Park Ave.—Tablet in the present armory; L. M. R. K., III: 923: Harper's Weekly, XXXVIII: 313. It was destroyed by fire on Feb. 22, 1902 (q.v.).

In this year, the American Fine Arts Society erected its building on the north side of West 57th St. between Broadway and Seventh Ave. The main building with four galleries was completed this year, one of them, the Vanderbilt Gallery, being the gift of George W. Vanderbilt, Dec. 6, 1892. The present June 20, 1899 (q.v.), by a combination of the Society of American Artists, the Architectural League of New York, and the Art Students League of New York, for the purpose of erecting a fine arts building; and the land, 75 by 143 ft., was acquired on May 3, 1890.

Richard Harding Davis, describing Broadway in this year, writes: "Broadway means so many different things to so many different people. There is the business portion of Broadway, and the shopping district, and still farther up town the Broadway where New Yorkers and their country cousins once used to walk to look at the passers-by, and where now only those who walk who wish to be looked at. And yet Broadway has, from the Battery to 59th Street, where the cobble-stones break up into a dusty country road, its own dear individuality.

"Broadway proper begins at Bowling Green. This is the open breathing-place where the street rests before it narrows down and meets the fierce turmoil of the business portion just above. It is a very cosmopolitan Broadway at this point, and every house facing it seems to welcome and bid for the arriving immigrants. The offices of the foreign consuls are here, and the immigrants' boarding-houses, with their signs in almost every strange language, and shops where shillings and francs and guineas can be changed into dollars . . . ."

"It is only a few steps farther up town from this, and you are in the rush of the business district. This part of Broadway is a valley of great buildings, and from a boat on the North River one can trace the march of the street by these mountains of brick and sand and plate-glass and steel which rise up above the rest of the city like shot-towers, and you see nothing up town to equal them, save the white points of the Cathedral, and the slim, graceful spire of Grace Church half-way between.

"The rush is greatest about the base of one of the tallest of these—the Equitable Building.

"Just below this, only a block to the south, is one of those strange contrasts which seem as if they could not have been accidental. This is where old Trinity Church, with its graveyard, blocks the way of Wall Street. There is no stronger contrast than this in the whole city of New York . . . ."

"Broadway widens in front of the Astor House, and gives the cars from all over the city a little room in which to turn before they start off uptown again.

"The City Hall Park makes a pleasant break in Broadway. It opens it up on one side and lets in a breath of fresh air where it breaks one of the long, high barriers of business houses . . . ."

"But it is at night that the Park is at its best. When the windows of the Post-Office are blazing with light, and the mail wagons rattle up over the empty streets with a great to do and unload the weight of trouble and news where it may be scattered broadcast over the world. On warm nights the marble steps of the City Hall are black with people from the slums, and every bench holds four drowsy figures . . . ."

"Newspaper Row bounds the eastern side of the square with the workshops of the great dailies . . . ."

"Broadway to Tenth Street the complexion of the street is utterly changed, and there is nothing but wholesale business houses, almost all with strange foreign names. This is where Broadway nods a little. There is none of the rush of lower Broadway, and none of its earnestness . . . ."

"The shopping district begins about Tenth Street, and is bounded on the north by the latitude of Twenty-third, where the promenade begins, and continues on up . . . to Forty-second Street.

"Union Square makes a second break in Broadway, and is a very different lounging-place indeed from City Hall Park . . . ."

Horace Greeley and Benjamin Franklin are the appropriate guardians of that busy lower park, while the graceful Lafayette and the stately equestrian figure of Washington are the presiding figures of this gay and more metropolitan pleasure-ground. Union Square is bounded on the south by that famous strip of pavement known to New Yorkers who read the papers as the Rialto. This is the promenade of actors . . . ." The Broadway side of Union Square is its richest and most picturesque. The great jewelry and silver-shops begin here, and private carriages line the curb in quadruple lines, and the pavement is impressively studded with white-breasted groomsmen. Long-haired violinists and bespectacled young men roll in conspicuous-colored uniforms, and the concert of music in their hands, becomes conspicuous just above this—the music-shops are responsible for them. And from this on up Broadway from Union Square the richer and more fashionable element . . . . predominates . . . ."

"At Twenty-third Street the more business-like Broadway takes
on the leisurely air of the avenue, which it crosses, and in which — it is merged for a block or two. The rush is greatest here, and hansom and democratic street-cars and lumbering husses ... are forced into each other's company as closely as are the cars and the other down town. This is the most interesting spot in the city to the stranger within our gates, and it is, after all, the Broadway that we all know and like the best. It is so cosmopolitan, so idle, and so rich in color and movement, and so genorous in its array of celebrities. — "The Great Streets of the World," 3-35.

The immigration bureau on Ellis Island is formally opened.— N. Y. Times, Jan 2, 1892. See Apr 18, 1890.

4 In his annual message to the common council, Mayor Grant says in part: "Notwithstanding the fact that bonds to the extent of $7,581,466.85 have been issued for permanent improvements during the year, the net debt of the City shows a decrease at the close of the year 1891 of $514,379.30. ...

I deem it my duty to again bring to your attention the question of the government of this city by the Legislature. Few of the annual charges of the City Government are subject to the discretion of the local authorities. These charges are to a great extent fixed by mandatory laws; and all bonds issued by the City for permanent improvements are issued in obedience to similar laws. The City, therefore, in respect to its main expenditures, is governed from Albany by a Legislature composed to a great extent of members who, for the most part, have never visited this city, and a large majority of such legislators are frequently politically hostile to its Government. More than this, the Legislature has the power to order the payment of claims by the City which may have been rejected by the courts or which have been allowed to lapse under the provisions of the Statute of Limitations. ...

The Legislature has also the power of granting valuable franchises to private corporations, such as the laying of pipes, change of motor power of surface railways, and the maintenance of telegraph lines. "In most instances the private corporations obtaining such franchises pay no revenue to the City, while their property rights receive the protection of all departments of the City Government. The City authorities are constantly hampered in their efforts to promote the interests of the municipality by the interference of the owners of such franchises. ...

While I believe that the interest of every city in the State would be advanced by imposing upon each the full responsibility of its own maintenance, the evils which I have brought to your attention could be largely remedied without removing the supervision by the Legislature over the expenditures of the municipalities of this city. Other constitutional amendments which would provide that hereafter no law should be enacted by the Legislature requiring the execution of any public work or local improvement at the expense of any city, or compelling the payment by it of any claims; but authority to execute such public work and make such local improvements, or pay such claims, should, by act of the Legislature, in each instance, be vested in the municipal authorities, who should be given full discretion to determine whether such improvements should be made or claims paid. ...

A further constitutional amendment should provide that franchises should only be granted by the Legislature in any city in this State for the use of its streets, or the sub-surface under the streets, or any of its property rights, on payment of a reasonable revenue to such city, which should be fixed and determined by the proposition of the authorities. "The injustice inflicted upon this city by the State Board of Equalization continues. While the State Assessors, in accordance with their custom, briefly confer with the Commissioners of Taxes and Assessments in regard to the assessed valuations of this city, they pay but little attention to the suggestions made to them. On the occasion of the last conference of the State Assessors information was submitted to them by the Commissioners concerning the valuation of real estate in the rural counties, and it was shown that in all such counties the assessed valuation was very much further below the market value of real estate than in the City of New York. This data, however, received no consideration, for the State Board of Equalization repeated the annual injustice done the taxpayers of this city by increasing the valuation of its real estate $116,524,167. The discrimination against this city is such that it is called upon to pay nearly one-half the entire State tax. ...

"The subject of rapid transit for the Annexed District is important in aiding its development. For its surface roads I favored the trolley system as being peculiarly adapted to its needs. The people of the Twenty-third and Twenty-fourth Streets are at a disadvantage in their facilities for rapid transit which their geographical position does not justify. The elevated railroads of New York now extend on the west side of the city to One Hundred and Fifty-fifth street. A great part of the population of the Twenty-third and Twenty-fourth Streets is south of the line of One Hundred and Fifty-fifth street. While the people of the west side are now enabled to proceed from their residences to their places of business in the railway by the payment of one fare, the people of the annexed district are compelled to patronize two different lines and pay two fares. When the proposed line of railway laid out by the Rapid Transit Commissioners is built these difficulties will be remedied. "Communication between Manhattan Island and the Annexed District will be greatly improved by the work being done on the new McComb's Dam Bridge and the viaduct connecting it with the heights on St. Nicholas avenue and One Hundred and Fifty-fifth street. A kindred subject on which legislation is necessary is the raising of the Harlem river bridges which do not conform to the requirements of the Federal law governing the Harlem Ship Canal, that the spans of bridges shall not be less than 24 feet above high-water mark. ...

"The increase of rapid transit on the surface roads in Broadway and Third avenue is a matter of interest and importance to the people of this city. The work in Broadway was accompanied with the laying of a new pavement from Bowling Green to thirty-second street, and the magnificent thoroughfare is now fittingly paved. The roadway, as a condition for being permitted to change its motor power, agreed to pay to the City a revenue of five per cent on the gross receipts, which are estimated to amount to more than $150,000 per annum, less than which it was not to be in any event. It is a matter of deep regret that similar terms could not have been made with the Third Avenue Railway Company compelling it to pay a reasonable revenue as a condition for the change of its motor power. ...

"The question of selecting a site for the new municipal building is still in abeyance. "Lands acquired for park purposes in the Twenty-third and Twenty-fourth Streets, and those lately acquired as an addition to the East River Park should be improved. In the meantime these lands should be utilized for the public benefit, and I recommend that Pelham Bay Park be thrown open for use as an excursion ground. The Park Department could, at a small outlay, provide temporary summer houses as shelter from the sun and rain, as well as bathing-houses on the inviting sandy beach of the park. ...

"The decrease in fatal accidents resulting from overhead wires, despite the great increase of electrical business, is an evidence of the wisdom of the efforts made by this administration to place the wires underground. The year's work under the Board of Electrical Control comprises the removal of 5,324 poles and 71,152 miles of wire and the construction of 114 miles of subways. ...

"The Department of Docks during the past year has made commendable improvements. Nine new piers have been built on the North river and five on the East river. Ten of the piers on the North river were extended to the new pier-head line. Six hundred feet of masonry seawall were built on the North river and 1,400 feet on the East river, and 1,200 feet of cell-bulkhead were constructed in the upper part of the island. A total of new wharfage front was thus provided of more than two and a half miles, equaling over ten per cent. of the entire dock frontage of the City of Liverpool. — Proc., Bd. of Ald., CCCV: 7-19."

Mrs. Win. Astor gives her famous ball at her residence at 5th Ave. and 54th St.—N. Y. Times, F 2, 1892. The term "Four Hundred" as applied to the hostesses the ball was managed by Ward McAllister, the social dictator of New York, and because of lack of space McAllister limited the number of guests to 400, remarking that after all there were only 400 people who were really in society. As given to the press, his list of those who were indisputably entitled to this distinction included the following names of only 265 individuals, whose, according to the Times report, he called the beau monde. The Times Index, however, designates them the "Four Hundred of New-York City Society."

—Ibid., F 16, 1892; Van Rensselaer, The Social Ladder, 206-7;

No one at that period appears to have succeeded in compiling a correct and satisfactory list of exactly 456 names of persons in the most exclusive circle of “New York Society.” Pamphlets, now scarce, were produced by publishers attempting it. One of these, now in the N. Y. Hist. Soc., published by the “Melville Publishing Co.” is entitled The “400.” (Officially Supervised.) (Copyrighted). It bears no date either of publication or copyright, and no author’s name. It contains 554 names, with the explanation that “it is quite impossible to compress the world of fashion so as to bring it within Mr. McAllister’s very narrow limits.” This continues: “Our catalogue has been prepared with much care, the names having been well sifted and weighed, and only those admitted who are now prominently to the front. . . .” This is followed by a “Notice” in italics: “If by typographical or clerical error, omissions of names have occurred, please address the publishers for rectification in future editions.”

In 1895, Mrs. Burton Harrison wrote: “ . . . I am an unbeliever in the body corporate which, for want of a better term, has come to be popularly known as the Four Hundred of New York. The lists of visitors and invitations made out yearly by people of good position, to include their acquaintances to whom such courtesies are due, number, say, a thousand names. Of these names, it is among us who is equipped or prepared to say six hundred are outside the pale . . .”—From “The Myth of the Four Hundred,” in The Cosmopolitan, Jr., 1895, p. 331.

The Hotel Royal, at the e. e. cor. of 40th St. and Sixth Ave, is destroyed by fire; 19 lives are lost.—N.Y. Sun, F 26 and sep, 1894.

Rev. Chas. H. Parkhurst, president of the Society for the Prevention of Crime, begins a campaign against Tammany by scathingly denouncing its city officials for corruption and accusing them of protecting and promoting vice and crime in the city. As he was unable to substantiate his charges, he was rebuked by the grand jury on Feb. 29. However, he later secured definite evidence by personally visiting many of the worst dens of debauchery in town, and this direct evidence led to a presentment by the grand jury against the police department.—Parkhurst, Our Fight With Tammany (1895), 1-87. The continued revelations of Parkhurst and the society were responsible, in a large measure, for the appointment of the Lexow Committee (see Ja 30, 1944) and for the defeat of Tammany in the election of Nov. 6, 1894 (92). See also My 26, 1892, and S 8, 1894.

The trustees of Columbia College have decided to purchase the ground occupied by the Bloomingdale Asylum for the Insane (see My 30, 1841), bounded by 116th and 120th Sts., Morningide Park and Amsterdam Ave.—N.Y. Times, F 18, 1892; Hist. of Columbia
THE ICONOGRAPHY OF MANHATTAN ISLAND

The corner-stone of Grant's Tomb (see Jl 21, 1885, and My 13, 1886), designed by John H. Duncan, is laid by Pres. Harrison.—N. T. Herald, Ap 28, 1893; L. M. R. K., III: 965. The monument was dedicated on April 17, 1897 (p. v).

By act of the legislature, aldermen henceforth shall "hold May office for the period of two years" instead of for a single year.—Laws of N. Y. (1892), chap. 408.

In authorising a "further appropriation for the maintenance of the Metropolitan Museum of Art," the legislature inserts the proviso that the collections be made accessible to the public on Sundays.—Laws of N. Y. (1892), chap. 419; cf. N. T. Tribune, My 1, 1892.

The stock exchange clearing house (see Ap 20) is opened, on the 100th anniversary of the founding of the exchange.—N. T. Times, My 17 and 18; also Eames, N. Y. Stock Exchange, 67, 93, and Harper's Weekly, XXXVII: 357.

The legislature passes an act called "The State Law" (constituting chap. II of the General Laws), in relation to the sovereignty, boundaries, survey, great seal, and arms of the state. The device of the arms of the state, as adopted March 16, 1778, is correctly described; also the great seal of the state and its use are prescribed. Laws of N. Y. (1892), chap. 67, §§ 49, 43, 44.

Section 40 of this law, describing the arms, was amended April 8, 1896, by an alteration in the description of the figure of Justice, and by the addition of a brief regulation prescribing the design of the state flag, which is "declared to be buff, charged with the arms of the state in the colors as described in the blazon of this section." (See p. 1386), chap. 67, §§ 49, 43, 44.

The state flag had previously been one of white buffeting of various sizes with the arms in the centre.—See General Regulations for the Military Forces of the State of N. Y. (1858), § 717; Regulations for the Military and Naval Forces of the State of N. Y. (1894), § 837. The colour of this flag was changed to blue, with the arms in prescribed colours in the centre, on Feb. 17, 1909 (p. v).

A mass-meeting in the Hall of the Society for the Prevention of Crime, and resolutions are adopted calling upon the district attorney and the police department to enforce the laws for the prevention of vice, and blaming the city officials for the "present condition of protected crime."—Parkhurst, Our Fight With Tammany (1895), 113-27. See F 14.

The new Fifth Avenue Theatre at Broadway and 28th St. is opened with a new opera called "The Robber of the Rhine."—N. T. Times, Ap 8, My 22 and 29, 1894; L. M. R. K., III: 984. See also Jl 2, 1891.

The Rhinelander sugar-house, erected in 1763 (p. v) on the south-west corner of Rose and Duane Sts, has just been demolished.—N. T. Times, Je 5, 1892; Harper's Weekly, XXXVI: 500; Wilson, Mem. Hist. N. T., II: 301. There is a view of this old landmark in Bronner's N. Y. in 1857. The Rhinelander building was erected on the site in 1893.—Tablet on building; L. M. R. K., III: 963; Kelley, 65, 182. A portion of the wall of the sugar-house was re-erected, with an inscription, beside the old Van Cortlandt house, Van Cortlandt Park.

The Hotel Savoy at the south-east corner of Fifth Ave. and 59th St is opened.—N. T. Times, Je 7, 1892. See also ibid, My 20, 1892; Harper's Weekly, XXXVI: 160; and King's Handbook (1893), 230. It was torn down in March, 1926.

The Collegiate Reformed Dutch School, the oldest school on Manhattan Island, opens its new building at 241 and 243 West 77th St.—N. T. Times, Je 7, 1892.

The City Club has leased the old Odes residence at 677 Fifth Ave.—N. T. Times, Je 17, 1892. See also L. M. R. K., III: 937.

The new Middle Dutch Church, at Second Ave. and 77th St. (see My 17, 1891), is dedicated.—N. T. Times, Je 25 and 27, 1892; Corwin's Manual, 999.

The site for a new custom-house is selected by the secretary of the treasury, bounded by Bowling Green, Whitehall, State, and Bridge Sts. (see F 4, 1893). Damages are fixed, payable to the owners of the land in the aggregate sum of $5,101,000.—Am. Rep., Securing an Arch, U. S. Treas. Dept. (1892), 108, 211; ibid. (1894), 44-45. See also N. T. Jour. of Commerce, Jl 8, 1892. Regarding the development of this property, see 1899, 1902, 1906.

Workmen making excavations in the rear of the city hall dug up an old bronze plate about two feet long bearing the inscription "R. Varick Esq., Mayor, 1796." There is nothing to explain how this plate came to be there.—N. T. Times, Jl 19, 1892.

The Carnegie Institute.—The Carnegie Institute, which is to be erected on Fifth Ave. opposite Broadway, opened its doors on April 23, 1893.—N. T. Times, Ap 21, 1893; also Eames, N. Y. Stock Exchange, 52, 53. The clearing-house was opened on May 17 (p. v).

CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876-1909

1892

The aqueduct commissioners award the contract for the construction of the "New Croton Dam" (see O 29).—Aqueduct Commission. Report of the President (1887-1897), 9. Work on the dam was begun in the fall of 1892; the first stone in the foundation was laid May 24, 1896; the dam was nearly finished and the gates were closed January 28, 1905, beginning the storage of water; the work was completed January 1, 1906; and by November 5, 1907, the reservoir was full to high water mark. —22d Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1917), 518.

27

The Metropolitan Opera House (see O 22, 1885) is almost wholly destroyed by fire.—N. Y. Times, Aug 25, 1892. See also L. M. R. K., III, 985.

Sept.

As cholera has been brought to quarantine from a foreign port, 1 Mayor Grant calls upon all citizens to aid in preventing its introduction into our city. The board of health is doing its utmost to guard against this and to care for any cases that may appear.—N. Y. Times, S 2, 1892. Several cases did appear in the city, but, due to the precautions of the board of health, the disease failed to secure a firm foothold.—Ibid., S 3, 5, 6, 15, 16-19, and O 2, 1892.

4

The Columbus statue which is to be erected at The Circle renews New York from Italy. Signor Gaetano Russo, the sculptor, also comes to the city.—N. Y. Times, S 5 and 6, 1892. Regarding the statue, see also ibid., Je 13, Ag 30, 1891. See S 16.

6

The cornerstone of the Columbus monument at The Circle is now to be laid.—N. Y. Herald, Ji 5 and 7, 1892. See also L. M. R. K., III, 964, and view in description in Harper's Weekly, XXXVI: 801. See S 4 and O 9.

27

St. Agnes' Chapel, a chapel of Trinity Parish, on W. 91st and 92d Sts., west of Columbus Ave., which was commenced in 1889, is completed and consecrated.—Trinity Church Bicentennial Celebration, May 5, 1897, 38, and view, L. M. R. K., III, 931.

Oct.

Joel Dodge kept his debate as a "star" in New York, at Palmer's Theatre. The play is "The Masked Ball."—N. Y. Times, O 4, 1892.

9

Between Oct. 9 and 15, the Columbus celebration, commemorating the discovery of America, was held.—Official Program (in N. Y. P. L.). See also Harper's Weekly, XXXVI: 909, 1015. On Oct. 12, the Columbus monument, at Eighth Ave. and 55th St., erected by the Italians residing in America, was unveiled and dedicated.—N. Y. Times, O 13, 1892.

The World's Fair formally opens at Chicago. About 100,000 people are present.—N. Y. Times, O 22, 1892.

29

The Sodom reservoir, a new storage basin for the Croton water supply, is completed.—Transactions, Amer. Soc. of C. E. (1893), 385. See also City Hall (original Department of Public Works for an increased supply of water from the Croton watershed involved the construction of a large storage reservoir, which was to be formed by building a high dam across the Croton River near the Quaker Bridge [see F 23, 1882]. The storage thus obtained was to be increased subsequently, if required, by the construction of smaller reservoirs on the branches and affluents of the Croton. Owing to the opposition to the building of the Quaker Bridge Dam which was made by some citizens at the public hearings, the construction of the proposed reservoir was not begun simultaneously with the building of the new aqueduct [see Ji 15, 1890], as originally intended. The result was that some delay occurred before any additional storage was obtained.

"While the question of constructing the Quaker Bridge dam remained undecided, the pressing necessity of obtaining additional storage caused the Aqueduct Commissioners and the Department of Public Works to commence the construction of the four smaller reservoirs now as the East Branch [consisting of two basins, the Sodom reservoir, and the Bog Brook reservoir], Titicus, Carmel, and Amawalk reservoirs."—Location finally chosen for the "New Croton Dam" (see Ag 26) was about 74 mi. above the mouth of the Croton River and 31 mi. below the old Croton Dam. —Wegmann, op. cit., 191, 205. The Sodom reservoir was the first of these to be completed; during its construction the cut of the Croton River was diverted by an artificial channel constructed from a point "about 80 ft. back of the dam site" and "entering the river again 500 ft. below the dam."—Transactions, Amer. Soc. of C. E. (1888), 385.

Nov.

Grover Cleveland and Adlai E. Stevenson, Democrats, are elected president and vice-president. The Republican candidates were Benjamin Harrison and Whitelaw Reid.—McKee, National Conventions and Plaforms, 256-89.

8

Thomas F. Gilroy, the candidate of Tammany Hall, is elected mayor.—N. Y. Times, N 9 and 10, 1892; Ann. Cyclop. (1894), 525.

The Manhattan Opera House, on 34th St. between Broadway and Seventh Ave., is opened.—N. Y. Times, N 15, 1892; Brown, Hist. of the N. Y. Stage, III: 572-77.

Jav Gould dies.—N. Y. Times, D 3, 1892.

27

Trinity vestry decides that St. John's Chapel in Varick St. shall be torn down and a new church built on another site.—N. Y. Times, D 9, 1892. Although nothing was done at this time, the subject was revived in 1906 (p. v. N 22).

22

"M. Luke's Church men 'Hamilton Granges,' at 141st St. and Convnet Ave., is opened for worship.—N. Y. Times, D 19, 1892. The old church in Hudson St. became a chapel of Trinity Church. —Ibid., N 28, 1892. For view of the latter, see Trinity Church Bicentennial Celebration, May 5, 1897, 38 et seq.

The cornerstone of the F. E. Cathedral of St. John the Divine (see 1888) is laid. The building is to be situated on Morningside Heights between Morningside Park and Amsterdam Ave. on 110th St., the name of which is changed to Cathedral Parkway. The architects are Heim and La Farge.—N. Y. Times, D 28, 1892; Mag. Am. Hist., XXXIX: 172. See also Harper's Weekly, XXXV: 247, 253-56; XXXVI: 411; XXXVII: 7; and L. M. R. K., III, 932. The cathedral is still (1926) unfinished, and one building of the Central Library (see 1888 and O 27, 1891) remains standing just south of it, used as a choir school.

The city acquires by condemnation proceedings the lands comprised in Cathedral Parkway, 110th St., 7th Ave. to Riverside Drive (see Ar 25, 1891).—Prendergast, Record of Real Estates, 51; L. M. R. K., III, 966.

1893

Early in this year, Gladstone introduced his second Irish Home Rule Bill. After 82 days of discussion, marked by scenes of great disorder, the bill was passed by the house of commons, but a week later it was defeated in the house of lords.—Hazen, Europe since 1815, 507-9.

This year was an eventful one in the stock market. Business of all kinds was paralysed by numerous disasters.—Eames, N. Y. Stock Exchange, 67.

In this year, King's Handbook of New York City was issued. It was the most comprehensive guide-book to the city published up to this time, containing, besides a history of New York, a detailed account of its topography, administration, buildings, institutions, societies, etc. and over 1,000 illustrations.

In this year, McClure's Magazine, published by S. S. McClure, was founded.—King's Handbook (1893), 636.

In this year, seven kindergarten classes were established by the board of education, a special appropriation of $5,000 having been made for that purpose.—Palmer, The N. Y. Pub. School, 193.

"Cable-Cars, so successfully used in many American cities, are about to be introduced in New York on several of the main lines of tramway, and notably on Broadway and Third Avenue. . . . The trolley system of electric railways will probably get an entrance into New York in time, although it has been unable to overcome a certain singular prejudice felt here against it, in spite of the success of the trolleys in so many other cities."—King's Handbook (1893), 137-38.

In this year, the Charity Organization Society (see My 10, 1882) moved into its own building ("United Charities Building") on the north-east corner of Fourth Ave. and 22d St., which was given by John S. Kennedy as a centre for various benevolent societies. R. W. Robertson and Rowe & Baker were its architects.—See memorial tablet in 22d St. vestibule. The N. Y. Association for Improving the Condition of the Poor (see 1843), the City Mission and Tract Society (see F 19, 1860), and the Children's Aid Society (see F, 1843) have offices there.—24th Ann. Rep., C. O. S. (1907); 7th Ann. Rep., City Mission & Tract Soc. (1894); 41st Ann. Rep., Children's Aid Soc. (1895). See also view and description in Harper's Weekly, XXXVI: 736; XXXVII: 262, 264; L. M. R. K., III, 916. The rooms of the School of Philanthropy are also there, controlled by the Charity Organization Society and affiliated with the Catholic University. Since it was founded, in 1882, the Charities Organization Society has been instrumental in establishing the Children's Court, the Domestic Relations Court, the N. Y. City Tenement House Dept., the Provident Loan Soc. the Municipal
THE ICONOGRAPHY OF MANHATTAN ISLAND

1893
Lodging House, and the nucleus of the Russell Sage Library.—

— Rider's N. Y. City Guide (1923), 290,
— The Collins P. Huntington house at the south-east corner of Fifth Ave. and 57th St. was erected in this year from designs by Geo. B. Post.—King's Handbook (1893), 152, 222; L. M. R. K., III: 925.
— In this year, the 58th St. wing of the Cornelius Vanderbilt residence on Fifth Ave. (see My 21, 1881) was built from designs by Geo. B. Post; the remodelled building occupied the entire block from 57th to 58th Sts.—King's Handbook (1893), 222; N. Y. Times, Ja 11, 1929, L. M. R. K., III: 925. It was sold and finally closed in Feb.-Mar., 1926.
— In this year, the present First Baptist Church, at 79th St. and the Boulevard, the corner-stone of which was laid in 1891 (N. T. Times, S 26, 1891), was completed.—L. M. R. K., III: 925.
— In this year, John W. Alexander began to win an international reputation as a portrait painter. As a mural painter, his distinction began at about the same period.—For the development of his career, see Fielding's Dict. of Am. Painters, etc. (1926), 5.

Mayor Thos. F. Gilroy sends his first annual message to the common council and calls attention to the fact that the city debt has increased $1,163,590.55 during the past year. In addition, he says in part: "Although the Croton Aqueduct has been completed, and as far as the means of acquiring the water by the city over four hundred million gallons of water per day, we have not as yet sufficient storage accommodation to afford our citizens the full benefit of this stupendous work. A storage reservoir on Muscoot river, with a capacity of 7,000,000,000 gallons, is already in process of construction, and at the present rate of progress will be completed in 1895. The Byram river supply will be turned into the Kearsick reservoir in the course of a year or two. A contract for the construction of the Cornell Dam has been awarded, according to which the structure must be completed in July, 1899, and other reservoirs constructed by the Aqueduct Commission are now nearing completion.

"When these reservoirs shall have been constructed the city will enjoy a daily supply greater in proportion to the population than that enjoyed by any other city in the world, and there will be secure for future use a sufficient quantity of water to supply a population of over four millions.

"The steady growth of our commerce strains every day to an increasing degree the capacity of our thoroughfares. The widening of College place has been undertaken in order to relieve the immense traffic on lower Broadway. It is not probable that this improvement will all the remaining years of its life, as it might. Yet it must be apparent to every one who has witnessed the congestion of vehicles, which is a daily occurrence on Broadway, between Fulton street and Maiden Lane, that some provision must be made for the steadily increasing traffic of the city. It is suggested that a tunnel be constructed from the North to the East river under John and Dey streets, thus providing an easy and level means of transit for wagons from one river front to the other. If this undertaking is found to be practicable, its value to the commerce of the city could be measured by millions."

"It has long been a reproach to this city that the sick and unfortunate who are the legitimate objects of charity are sent to Blackwell's Island, which is generally associated in the public mind with a penal institution. The growth of the city demands larger accommodation for its charitable institutions. It is, therefore, suggested that Riker's Island be made available for the penal institutions now located on Blackwell's Island."

"In the general condition of the city there is much to encourage our civic pride. Its financial prosperity is proved by the exceedingly low rate at which it can borrow money, and by the eagerness of capitalists to find investments within its limits. During the last year, $2,000,000 of the city's bonds have been sold at $1,116,399.55, during the period. During the period. During the period.

Edward F. De Lancy calls upon Mayor Gilroy and reads to him a letter "explaining the position taken by the New-York Historical Society in relation to the old City Hall Building." The letter states in part: "The Historical Society has never proposed, asked for, or wished the removal of the City Hall from the park. On the contrary, I have no doubt but that the voice of the membership would be to keep it where it is. The beauty of its architecture, its age, its historic interest, and the attachment of all old New-Yorkers, native and adopted, to it and to the park alike demand its preservation. And in this feeling I am glad to see that you participate, and to know that only the necessity of having a large municipal building has led to your desire for its removal, so that a new one can be erected on its site. This fact your suggestion that the building should be re-erected up town for a museum or some similar object conclusively proves.

"The necessity for a new City Hall is patent to every NewYorker, and is urgent. But cannot that necessity be overcome? Cannot a new City Hall be erected in the park without removing the present classic structure? . . .

"The reason, and the only reason, urged for building on the site of the present City Hall is to save the three or four millions that a site outside of the park and down town would cost. It is a good reason, as all will admit, and a most forcible one.

"Your commission, Mr. Mayor can give full effect to it, and at the same time erect a building in the park which would not interfere with the present City Hall. Let the entire space in the park be cleared of every building in it except the City Hall itself. Then plan a building to extend from Centre Street to Broadway on Chambers Street, standing back fifteen feet from each of the thoroughfares, and at the same distance from the sidewalk. Before tearing down the present ugly and unworthy Tweed Court House, build, first, the two ends of your new building, so that the courts and other offices can occupy them, and then take down the Court House and build the centre portion of your new building on its site.

"The space so occupied by the two ends of the new building would be 30 per cent. greater than that occupied by the present Court House. . . .

"By this plan no more money for rents would be required than is now paid, for the new Centre Street court building is just finished, and will more than accommodate the tenants of the two brownstone buildings now on Chambers Street, east of the present Court House.

"But if this, or some similar plan, does not meet with the favor of your commission, and you do decide to take down the old City Hall, then comes action on your suggestion for its removal to another location up town.

"You suggested giving it to the Historical Society, and the idea is well worthy of that society's consideration. The first question would be, Can the City Hall be taken down and re-erected on the site of the present City Hall, and if so, what would be the necessary precautions to make it a fire-proof building. The society has raised $285,000, and paid for that land, under the obligation to its contributors that the building there to be erected should be fire-proof. If this can be done at a reasonable cost, which only architectural experts can decide, then a removal would be possible.

"The next question is how the cost is to be provided for. The society is now engaged in raising funds for a new building, with fair prospects of success. It is entirely out of debt, possesses somewhat $80,000 or $85,000 of invested funds, the income of which is required for its present use and maintenance under the trusts on which they were given, and cannot be used for building purposes. Its present fire-proof building at Second Avenue and Eleventh Street is worth about $100,000, but cannot be sold till a new building is completed on its new site. Its library and collections, worth in the neighborhood of $1,000,000, could not be risked in any temporary location.

"Hence the society cannot of itself undertake the removal and re-erection of the City Hall. You, Mr. Mayor, roughly estimated the cost of removal and re-erection at $150,000. From what I can learn, to make it fire-proof and adapted to the purposes of the society, the cost might be nearer $300,000. The disposition of the building would have to be altered almost entirely to fit it for the objects of the society, but the exterior would be precisely as it now stands in the park.

"The above estimated amount would effect the edifice, but at the cost of its furnishing and its library and picture gallery fixtures and other arrangements to accommodate its collections would have to
1891, be met by the society itself, which it probably could do by an appeal to its friends and members.—"N. Y. Times", Jan 17, 1893. See also ibid., Jan 24.

24 Mayor Gilroy, as chairman of the new municipal building commission, receives the following letter from the Tilden Trust, signed by John Bigelow, president: "It is now rumored that legislation is in contemplation for the removal of the reservoir from Bryant Park, and also for the removal of the old City Hall, to make place for more spacious and adequate accommodations for the municipal offices. Much as we regret the necessity of disturbing a structure consecrated to us like our City Hall by so many precious historical and forensic associations, should such a necessity be found to exist, we respectfully suggest that that admirable structure be transferred to the site now occupied by the reservoir in Bryant Park, and appropriated to the uses of the Tilden Trust."—"N. Y. Times", Jan 25, 1893. See also ibid., Jan 29, F 19, and 26, 1893.

25 A bill referring to the voters of the several districts involved the question of consolidating the suburbs of New York with the city (see My 8, 1890) is introduced in the legislature. It failed to become law.—"Foord, Life and Pub. Services of A. H. Green", 187-88. It passed in 1894 (g.o., F 28).

27 The legislature makes provision for the election of 175 delegates to a constitutional convention at the next general election (see N 7).—"Laws of N. Y." (1893), chap. 8.

Feb. 2. The state gives its consent to the purchase, by the U. S., of the land bounded by Bowling Green, Whitehall, Bridge, and State Sts., as a site for a navigation-house for J. J. L. 1892. See also ibid., Jan 22.

22 The famous old New York Hotel, erected in 1845 at Broadway and Waverly Place, is finally closed. The property has been sold for about $1,500,000, and the hotel will be replaced by a business-block.—"N. Y. Daily Tribune", F 5 and 23, 1893. See also L. M. R. K., III. 980.

The Inman Line steamers "New York" and "Paris" are transferred from British to American registry, and the stars and stripes are raised on the former by Pres. Harrison. This inaugurates the American Line of trans-Atlantic steamships.—"King's Handbook" (1893), 76-79. Mrs. Burton Harrison, Hist. of City of N. Y., p. 25.

Mar. 8. Grover Cleveland is inaugurated as president.—"N. Y. Daily Tribune", M 6, 1893; World Almanac (1894).

8 Early this morning, New York is very slightly shaken by an earthquake.—"N. Y. Daily Tribune", M 9, 1893.

9 The legislature directs the department of parks to lay out, within one month, the Harlem River Driveway (or Speedway). It is to extend from 165th St. and St. Nicholas Place north-easterly to the west shore of the Harlem River and north along the river to Davenport St. The roadway is to be not more than 150 ft. wide.—"Laws of N. Y." (1893), chap. 102. See also N. A., 1896, and J J, 1898.

9 The department of parks is authorized to remove from City Hall Park "the building now occupied by the register of the city and county of New York, the building now occupied by the court of general sessions of the said city and county and by the district attorney of said city and county, and the building now occupied in part as an engine-house and in part by the district court of the city of New York for the first judicial district, whenever suitable accommodations elsewhere shall have been provided according to law for the officers and courts so occupying the same."—"Laws of N. Y." (1893), chap. 105.

14 The Hotel Waldorf, at the n. cor. of Fifth Ave. and 33d St., is formally opened. The hotel was built as an investment by William Waldorf Astor and cost more than $2,500,000. It was designed by J. H. Hardenbergh.—"N. Y. Times", F 13, 12, 1893; L. M. R. K., III. 981. See also Maurice, Fifth Avenue, 205.

19 The gold medal of the Royal Institute of British Architects has for the first time been conferred upon an American, Richard M. Hunt. "It is a distinction of great national as well as personal value, and its presentation to Mr. Hunt by the Institute has ceased to be a negligible quantity, and that its practitioners have done something of which the profession in Europe is bound to take notice."—"N. Y. Times", M 19, 1893.

21 By act of the legislature an additional bureau, the "bureau of street openings," is created within the law department. It is to have charge of "such legal proceedings to open or close streets, roads and avenues, and to acquire title to real estate thereon, and of all such other proceedings involving awards for damages or assessments for benefit to lands, tenements and hereditaments, as may be assigned to it by the counsel of the corporation."—"Laws of N. Y." (1893), chap. 188.

The so-called "Water-shed Act" is passed by the legislature, giving large powers to the commissioner of public works in providing "for the sanitary protection of the sources of the water supply of the city of New York." He may "enter in and upon any land at any time within three years from the passage of this act any or all lands near, on, adjacent or contiguous to any of the said sources of water supply," and "abate and remove the cause" of any "pollution or defilement."—"Laws of N. Y." (1893), chap. 189. In pursuance of the authority thus conferred, your engineers have abated about one-thousand serious causes of pollution, beside numerous minor nuisances, and the Aqueduct Commission has taken the necessary steps to acquire a sufficient of the reservoirs, and each of the reservoirs constructed or projected" (see O 29, 1893).—"Aqueduct Commission. Report of the President" (1887-1893), 11-12.

The dock board adopts plans to build new piers and bulkheads along the North River front between 11th and 23d Sts., at a cost of nearly $11,000,000.—"N. Y. Times", M 24, 1893. This was the so-called "Chelsea improvement," plans for which were passed upon by the art commission.—See 1894, and J 4, 1899.

The legislature authorizes the board of estimate and apportionment to issue bonds, from time to time, up to $150,000, to enable the department of parks to "fully complete, furnish, equip and stock the building known as Castle Garden in the Battery park . . . for the purposes of an aqueduct, and to complete the improvements of the grounds of Castle Garden, and repairs to the sea-wall for the use of the public." The aqueduct is to be open every day in the week.—"Laws of N. Y." (1893), chap. 254.

The 100th anniversary of the founding of Christ P. E. Church is celebrated in the present edifice on the north-west corner of Broadway and 71st St.—"N. Y. Daily Tribune", Ap 4, 1893; L. M. R. K., III. 972.

The board of estimate and apportionment is authorized to appropriate a sum not exceeding $50,000, to be employed by the city "in participating in such aerial and other reviews and parades as may take place in said city or the waters about the same, during the year eighteen hundred and ninety-three, in honor of the quadri-centennial anniversary of the landing of Christopher Columbus, and also in the reception and entertainment of distinguished visitors to the city during said year."—"Laws of N. Y." (1893), chap. 280.

From April 14 to 21, in commemoration of the bicentennial, the Grolier Club held an exhibition of books printed by Bradford and other printers of the Middle Colonies.—See catalogue in N. Y. P. L.

The rapid transit commission agrees to allow the Manhattan Railway Co. to make uptown and downtown extensions of its elevated road.—"N. Y. Daily Tribune", Ap 12, 1893.

The Duke of Veraguas, a lineal descendant of Columbus, arrives with his family at New York to attend the Columbian Exposition, and is welcomed as the nation's guest by representatives of the federal and municipal governments. After being escorted to his apartments at the Waldorf, he was presented with the freedom of the city and serenaded by the Spanish colony.—"N. Y. Daily Tribune", Ap 16, 1893. On April 18, the duke was formally received at the city hall by Mayor Gilroy and the board of aldermen. On April 19, a reception in honor of the duke was held at the Waldorf by the Chamber of Commerce, the New York Historical Society, and the American Geographical Society.—Ibid., Ap 19 and 20, 1893. After several private receptions, the party left for Washington on April 22.—Ibid., Ap 23, 1893.

Demondico's restaurant in Broad St., having been sold recently, is finally closed.—"N. Y. Daily Tribune", Ap 16, 1893. See also N. Y. Times, M 9, 1893, Ap 15 and 16, 1893. This was at 22 Broad St.—"King's Handbook" (1893), 240. For Demondico's several other sites, see L. M. R. K., III. 977-78.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1893. A fleet of 32 men-of-war, representing the United States, Great Britain, Spain, Russia, France, Holland, Italy, Germany, Argentina, and Brazil, and three Spanish caravels representing Columbus’s ships, the “Niña,” the “Pinta,” and the “Santa Maria,” arrive at New York for the Columbian naval review and anchor in the bay.—N. Y. Daily Tribune, Ap 26, 1893. On April 26, amid salutes from the harbour forts, they moved up into the North River. The officers were the guests of the Union League Club.—Ibid., Ap 27, 1893. See, further, Ap 27.

26 Amid the roar of many guns and the waving of flags and bunting, Pres. Cleveland reviews the foreign fleet at anchor in the Hudson River (see Ap 25). In the evening, a Grant birthday dinner was held at the Waldorf, and a brilliant Columbian celebration naval ball at Madison Square Garden.—N. Y. Daily Tribune, Ap 28, 1893.

A parade of 4,000 armed sailors and marines from the foreign warships is held in New York. In the evening a banquet was given at the Hotel Waldorf by the Chamber of Commerce to the city’s guests.—N. Y. Daily Tribune, Ap 29, 1893.

May 3 The 250th anniversary of the erect a memorial arch in honour of the soldiers and sailors of New York who gave their lives during the Civil War.—Laws of N. Y. (1893), chap. 522. See D 15, 1900.

“Whenever the board of estimate and apportionment . . . shall determine and declare that the public interests will be promoted” by the removal of the reservoir from Bryant Park, it is proposed, from a report of legislation that the new area shall be “under the control and management of the department of public parks,” and that the park “shall not be used for military parades, drills, inspections or reviews of any kind.”—Laws of N. Y. (1893), chap. 539. The use of the reservoir space for a public library was not yet contemplated. See, however, My 19, 1896.

The cornerstone of the new St. Luke’s Hospital, at Morning- side, St. I. is laid.—New York Herald, My 7, 1893. See also Harper’s Weekly, XXXVII: 17, 20. The hospital was opened for patients Jan. 24, 1896 (q.v.). Ernest Flagge was the architect.—Tablet at entrance to the hospital. See L. M. R. K., III: 955.

On this and succeeding days, Bangs & Co. sold at auction the first part of the library of Americans of the late Geo. H. Moore, for many years librarian of the N. Y. Hist. Soc. The second part was sold on Feb. 5, 1894, and the following days. See cat. in the N. Y. P. L.

“The cable road in Broadway is at last completed.”—N. Y. Daily Tribune, My 17, 1893. Regarding the design and construction of this line, which was commenced in 1890, see Harper’s Weekly, XXXV: 723. For its franchise, see N 13, 1889.

25 The Infanta Eulàlia, her husband, Don Antonio Maria d’Orléans, and his son arrive outside war on the “Reina Maria Christina” on a visit to the United States.—N. Y. Daily Tribune, My 19 and 20, 1893. After a visit to Washington, the infanta was officially received at New York on May 25 (q.v.).

The Infanta Eulàlia, sister-in-law of Queen Maria Christina of Spain, returns to New York from Washington (see My 18) and is escorted from the West 34th St. pier to the Hotel Savoy. At the hotel she was formally welcomed to the city by Mayor Gilroy and presented with the freedom. In the evening she was serenaded by the Saragossa Band and attended the performance at the Garden Theatre.—N. Y. Daily Tribune, My 26, 1893. On May 26, a brilliant ball was held in her honour at Madison Square Garden, and on May 28 she attended mass at St. Patrick’s Cathedral and a reception at the Catholic Club. On May 30, she laid a wreath on Grant’s tomb, held a formal reception at the Savoy, and visited the Fifth Avenue Theatre. On June 4, she attended mass at St. Francis Xavier College, and on June 5 she left for Chicago.—Ibid., My 27–6, 1893.

Speaking editorially, the Times says: “The killing of a little child by a reckless rider of a bicycle in the Boulevard has served, for the moment, to make these rubber-shod missiles of the highway more careful of their movements. But there is no hope that any real or lasting relief from the danger and annoyance to which wayfarers in the Boulevard are daily subjected will come through any change of heart in the bicycle riders. The pedestrian must be better protected by laws enforced by the police.

“With the cheapening in the cost of bicycle riding in the public streets has come the abuse of that privilege by thousands of ignorant and loafing individuals. Many of the bicyclists who swarm along the smooth asphalt of the Boulevard, particularly at night and on Sunday, are irresponsible and reckless young men to whom a stable keeper would not entrust a saddle horse, and who are not fit to ride anything but a rail.”

In the interest of public safety and common decency every rider of a bicycle ought to be brought more fully within the police authority than he is at present. Each owner of a bicycle ought to be required to take out a license for his machine, and display it whenever called upon to do so. Every man who keeps bicycles for rent should be required to obtain a licence and a number for each machine, which its rider should be compelled to display, like a public hackman, upon his vehicle. The fee for a license need not be large, but the system would be salutary and effectual both morally and practically. The police would thus have a chance to regulate the riding as they now can control the driving of horses; and the existing ordinances as to speed, proper place in the roadway instead of on the sidewalks or the central ‘grass-plots’—so-called—in the Boulevard, and the keeping of bicycles in road-worthy condition, with effectual signals by day and lamps at night, could be enforced more stringently.

“It is true that a policeman on foot cannot catch a bicyclist in a stern chase. There seems to be a distinct need for a few mounted policemen to break the back of this dangerous nuisance in the Boulevard and the Riverside Drive. In view of the belligerent attitude of many of these impudent law breakers it might be well to arm these mounted policemen with lassos, at first, or with hounds and ‘merry-men.’”—N. Y. Tribune, My 16, 1893.

St. Luke’s Hospital, on Fifth Ave. between 54th and 55th Sts., is sold for $2,400,000. The old buildings are to be retained until the new hospital on Morningside Heights (see My 6), is completed.—N. Y. Daily Tribune, Je 1, 1893. See also N. Y. Times, Je 1, 2, and 4, 1893. See, further, Mr 24, 1895.

The New Netherlands Hotel, at Fifth Ave. and 59th St., is open for business. The拿出来 of the magnificent creations of this sort which William Waldorf Astor has completed within a year.” It is 17 stories high and “is one of the tallest buildings in New York.” It cost about $5,000,000.—N. Y. Times, My 18, Je 1 and 2, 1893.

The Washington Square M. E. Church in 4th St. near Mac-dougal St. votes to unite with the Asbury M. E. Church at the s. e. cor. of Washington Place and University Place. The United churches will use the former’s name and edifice.—N. Y. Daily Tribune, Je 8, 1893. The Asbury M. E. Church was originally the church building of the Washington Sq. Ref’d Dutch Church.—L. M. R. K., III: 936. See My 15, 1893.

The cornerstone of a new Fourth Presbyterian Church is laid at West End Ave. and 95th St.—N. Y. Daily Tribune, Je 11 and 12, 1893; L. M. R. K., III: 931. See also Harper’s Weekly, XXXVIII: 473.

“I Pagliacci” is sung for the first time in America, at the Grand Opera House.—Brown, II: 643; N. Y. P. L. Bulletin (1925), 892.

The “Viking Ship,” an attempted counterpart of the vessel in which Lief Ericson is said to have visited America, arrives at New York from Norway on its way to the World’s Fair at Chicago. It is enthusiastically welcomed.—N. Y. Times, Je 18 and 19, 1893. On June 19, Capt. Magus Andersen and his officers and crew were received by Mayor Gilroy at the city hall.—Ibid., Je 20, 1893.

A bronze tablet commemorative of the reading of the Declaratory of Independence to the American army in the presence of Gen. Washington is erected by the Sons of the Revolution on the front wall of the city hall under the middle window of the mayor’s office. It is to be unveiled on July 9.—N. Y. Daily Tribune, JL 8, 1893.

Grand Duke Alexander, Vice-admiral Kazakoff, and the other officers of the Russian war fleet stationed in the Hudson River are entertained by Gen. Daniel Butterfield.—N. Y. Daily Tribune, JL 11, 1893. On July 13, they were formally received at the city hall by Mayor Gilroy.—Ibid., JL 14, 1893. The fleet sailed on Aug. 9.—Ibid., Ag 10, 1893.

The city acquires by condemnation proceedings the land bounded by Jackson, Corlears, and Cherry Sts. and the East River (see Je 14, 1884). Here Corlear’s Hook Park was laid out.—Prendergast, Record of Real Estate, 45; L. M. R. K., III: 969. See My 8, 1894. The acquisition was authorised in 1884 (q.v., Je 14).
1893 The Herald moves from Broadway and Ann St. to its new Aug. building, designed by McKim, Mead & White, bounded by Broadway, Sixth Ave., 35th and 36th Sts.—N. Y. Daily Tribune, Aug 19 and 24, 1893.

30 A new Grinnell armory in the building at the north-west corner of Fifth Ave. and 14th St. is destroyed by fire.—N. Y. Daily Tribune, Aug 31, 1893.

Sept. Farewell services are held in the Scotch Presbyterian Church in West 14th St. prior to the congregation's removal to the new church in 59th St. near Central Park West.—N. Y. Daily Tribune, Sep 23, 1893; L. M. R. K., III: 922. See My 30, 1894.

Nov. The city acquires by condemnation proceedings the land bounded by Seventh Ave. and Macomb's Lane, south of 155th St. Here Harlem Lane Park was laid out.—Predecessant, Record of Real Estate; L. M. R. K., III: 970.

7 Delegates are elected to a constitutional convention to assemble in Albany, on May 8, 1894 (p.1).—Jour. of the Convention, 10:14.

Abbey's Theatre at the n.w. cor. of Broadway and 38th St. is opened with Henry Irving and Ellen Terry in Tennyson's tragedy "Becket."—N. Y. Daily Tribune, N 9, 1893. In 1896, the name of the theatre was changed to the Knickerbocker.—N. Y. Herald, Jan 15, 1896. For view, when under construction, see King's Handbook (1893), p.387.

The bronze statute of Nathan Hale by Fred. Wm. MacMonnies, given to the city by the Sons of the Revolution, is unveiled at the southwest corner of City Hall Park.—N. Y. World, N 26, 1893.

Dec. The route for the West Side elevated road is formally adopted by the rapid transit commission. It commences in Battery Place at or near West St. and runs along West St. to W. 11th St., thence along W. 11th St. to Seventh Ave., thence along Seventh Ave. to 45th St., along Broadway and the Boulevard to 190th St., along Kingsbridge Road to Tenth Ave. and 216th St., across the Harlem Ship Canal and Spuyten Duyvil Creek east of the line of Broadway, thence to Broadway and Riverdale Ave., and along Broadway to the city limits. The plan also includes a branch connecting the Harlem Yacht Basin with the Sheep's Meadow running along the line of the Sixth Ave. Canal St., along Canal to Wooster St., along Wooster St. and University Place to 14th St., along 14th St. to Seventh Ave., there connecting with the main line.—N. Y. Daily Tribune, D 2, 1893.

5 The number of houses in Fifth-ave. that are being altered for business purposes is rapidly increasing. Below Forty-second-st. there is a vast house for sale or rent which does not have a clause in the notice that the property will be altered for business purposes. . . .—N. Y. Daily Tribune, D 5, 1893.

31 Among the buildings completed or about to be occupied at the end of this year were the Metropolitan Life Insurance building at the corner of 23rd St. and Madison Ave. (the original wing on 23rd St.—see 1892—the new wing and towers not being built until 1900, 9:9); the Hotel Waldorf at the corner of 33rd St. and Fifth Ave.; the Herald building at the corner of Broadway and 35th St.; and the New Netherlands Hotel at the n.e. cor. of 59th St. and Fifth Ave.—Ann. Cyclopaedia (1893), 525.

1894 — In this year, Gladstone resigned as prime minister, "thus bringing to a close one of the most remarkable political careers known in English history." Lord Rosebery succeeded him, but remained in office only 16 months (see Je, 1895).—Hazen, Europe since 1815, 510.

— In this year, the U. S. was in the midst of an industrial crisis, and unemployment was so great throughout the country, due to bankruptcies, closing of factories, etc., that Jacob Coxey, a business man of Ohio, inaugurated a march of idle men on Washing- to, "to demand relief at the hands of the government. His 'army,' as it was called, ended in a fiasco, but it directed the attention of the country to a grave condition of affairs."

This was a year, also, of numerous strikes, including the great Pullman strike in Chicago.—Bard, Contemporary Am. Hist., 197-98.

— In this year, the Society of Iconophiles was founded. —See the society's seal and certificate of membership. "It set for itself the pleasant task of picturing New York as it is in the closing years of the century, while incidentally it hoped to revive an interest in and to encourage the practice of the long neglected art of pure line engraving." For a descriptive and historical account of the first 12 plates issued by this society, see William Loring Andrews's The Journey of the Iconophiles around New York in search of the historical and picturesque (1897), 21-35, in which the date of founding is erroneously given as 1895. The founding members were Wm. Loring Andrews, Beverly Chew, Richard H. Lawrence, Marshall C. Lefferts, Edward H. Bierstadt, and Edwin B. Holden. To these were added later Samuel P. Avery, Charles B. Foote, Wm. F. Havemeyer, and J. Harson Purdy. This completed the active membership, which has been maintained at ten. In addition, there have been since 1905 thirty associate members who have the privilege of subscribing to one copy of each publication made by the society. It publishes yearly one or more views engraved by such artists as Edwin Daxa French, C. F. W. Mielatz, Francis S. King, Sidney L. Smith, Joseph Pennell, Walter M. Aikman. Up to 1906, it had published nine series comprising 80 engravings. These included contemporary views of New York, facsimiles of early views, early American printers and engravers, men and events connected with New York, early New York authors, etc.—Cat. of Engravings issued by Soc. of Iconophiles, 1894-1908, compiled by Richard H. Lawrence, with introd. by Wm. L. Andrews (1908). See also N. Y. Times, JI 15, 1919.

Since 1908, seven more series have appeared, making sixteen numbers consecutively. The books issued by the society are: Washington's Reception by the Ladies of Trenton together with the Chorus sung as he passed under the triumphal Arch raised on the Bridge over the Assumpink (N. Y., 1905).—An Index to the Illustrations in the Manuals of the Corporation of the City of New York 1834-1870 (N. Y., 1906).

Catalogue of the Engravings issued by the Society of Iconophiles ... MDCCLXIV-MCMXI (N. Y., 1908).—The Hudson-Fulton Celebration MCMIX By Gustav Kobb (N.Y., 1910).—From A List of Engravings issued by Society of Iconophiles, 1895-1925.

In this year was published an Abstract of title of Kip's hay farm in the city of New York, with all known maps relating thereto, together with the water grants on the eastern post road, etc., etc., also, the early history of the Kip family and the genealogy as referred to the title, by John J. Post. It contains 35 maps.

In this year, the Harvard Club (see Je, 1887) erected its present building at Ns. 27-29 W. 44th St. from designs by McKim, Mead & White. In 1904-5, the building was enlarged and extended through to 45th St. It was enlarged again in 1915.—Records of the club (by Langdon F. Marvin, secretary); Club Books (1895 and subsequent); L. M. R. K., III: 938. See also Harper's Weekly, XXXVII: 1144.

Teachers College, which was incorporated in 1889 as the New York College for the Training of Teachers, later simplified to Teachers College, removes from 9 University Place (the old building of the Union Theological Seminary) to 120th St., between Broadway and Amsterdam Ave.—Hist. Columbia Univ., 412-13. See also Harper's Weekly, XXXVIII: 355-356.

In this year, the Congregation Shearith Israel sold its synagogue in West 19th St. (see S 12, 1890).—Pubs., Am. Jewish Hist. Soc., VI: 149; L. M. R. K., III: 929. The corner-stone of its new church at 70th St. and Central Pl. W. was laid on May 20, 1896 (q.v.).

In this year, Jas. Carroll Beckwith became a member of the National Academy.—Fielding, Dict. of Am. Painters, etc. (1926), 24.

In his annual message to the common council, Mayor Gilroy says that the city debt has increased $2,112,840.19, owing to the many permanent improvements. The city was forced to issue nearly $25,000,000 in revenue bonds to pay for contingent expenses until the receipts from taxation became available, and as the interest on these bonds amounted to $250,000, the mayor suggests that taxes be collected in the earlier instead of the later months of the year. The general affairs of the city are in a very satisfactory condition, he says, but in one direction "we fail to note substantial improvement. This is the important matter of rapid transit. . . . It may be that an underground road capable of the highest speed, to be built by private capital or public funds, will furnish the ultimate solution. Thus far no capitalists have shown a sufficient interest in such a plan, nor has public sentiment declared in favor of such an investment by the City. In the mean-
1894. Jan. 9

1894. Jan. 9

THE ICONOGRAPHY OF MANHATTAN ISLAND

miles of subways for telegraph and telephone wires have been constructed in the city, and 493 miles of subways for electric light and power conductors. The total mileage of subways is 874 for telephone and telegraph and 820 for light and power wires. There are in use 6,790 arc lamps, 268,000 incandescent lamps and nearly 10,000 telephones. The Board has also caused the removal of 1,409 poles and 1,606 miles of overhead wires without cost to the City, and 104 poles and 382 miles of wire at public expense. The absence of fatal accidents and damage to property, as well as the improved appearance of the public thoroughfares, attest the benefit of the work of this Board.

"A condition of unexampled depression in trade exists throughout the country, and the effects are shown in this city by the unemployment of people unable to secure new employment. Distressing destitution and hardship are imminent in thousands of homes among those worthy and willing to work. No such revival of business activity as would afford employment to all those seeking it can naturally be expected this winter. Any public work, therefore, that can be prosecuted to the public advantage, and which would furnish employment while it is not to be found in other directions, should be promptly commenced."

In conclusion, the mayor says: "It is the manifest destiny of the vast population and immense business interests of which our port is the centre that they shall be consolidated under one municipal government and form the Metropolis of the World. The Greater New York already exists in popular fancy, and the title is due to develop the Metropolis of the World. Whether the boundaries of New York City shall be increased or not is a question to be determined by the people. I am in favor of the proposition to submit to the people, for their decision, the question as to whether the time has arrived for such consolidation."

A senate committee of seven members is appointed, commonly known as the "Lenox Committee," to investigate the police department of New York (ibid., 318). It was the result of the activities of certain reform movements in the city, and, more especially, of the investigations of the Rev. Dr. Chas. H. Parkhurst, president of the Society for the Prevention of Crime (see F 14, 1892.—Ann. Cyclop. (1894), 537; Parkhurst, Our Fight With Tammany (1895), 253 et seq. As a result of the committee's investigation, 67 men connected with the police department were accused of crime on evidence sufficient, in most cases, to warrant indictments (Ann. Cyclop., 1894, 537-538), but, on Jan. 1, 1896, not one man who was accused before that committee had begun to serve a term of imprisonment (ibid., 1895, 549).

The Tilden Trust having proposed to the commissioners appointed to select a site for the municipal building that if it is found necessary to remove the city hall, it will be re-erected in Bryant Park, J. H. H. Green protests to the commissioners against such removal and expresses the hope "that no portion of Reservoir Square, or any other Park, Square or open ground on this Island provided for the use of the people, may hereafter be appropriated to buildings." Regarding the city hall, he says:

"The City Hall presents an example of fine architectural taste. In design and construction it is as faultless as any structure in the City, whilst its historical and biographical relations involve events of paramount interest and personages of dignity and estimation. It should continue to stand as for nearly a century it has stood, ample, commodious and convenient."

"Its presence tends to keep alive associations that are near to very many of our citizens, a visible landmark, an object lesson to the people, that should not be destroyed."

Its erection was coeval with the conception of a group of enterprises that distinctly marks an era in the material progress of the City, the State and the Nation; among which the Erie Canal, the laying out of the City by Rutherford, De Witt and Morris, and Jefferson's magnificent scheme of a National Coast Survey are prominent examples.

"Here the Declaration of Independence was read to the American army in the presence of Washington.
The Hungarian societies of New York hold a memorial parade in honour of Louis Kossuth, who died recently. In the evening there was a large meeting at Cooper Institute where tributes were paid to Kossuth by Chauncey M. Depew, Frederick K. Conrad, and others.—N. Y. T. Times, Apr. 30, 1894.

The law is passed by the legislature authorising the governor to appoint a commission having broad powers to examine the tene ment of New York with regard to their construction, healthfulness, safety, rentals, and the effect of tenement-house life on the health, education, savings, and morals of persons living in these habitations.—Laws of N. Y. (1894), chap. 479. The commission appointed consisted of Richard Watson Gilder, chairman, W. D. N. Washington, Cyrus Edison, Richard, Solomon Moses, George B. Post, and John R. Schuchman. Edward Marshall, the Sunday editor of the Press, through whose efforts the law was passed, was appointed secretary and executive officer.—De Forest & Veiller, The Tenement House Problem, I, 105.

The constitutional convention, delegates to which were elected on Nov. 7, 1893, begins its sessions at Albany and chooses Joseph H. Choate for president. The convention concluded its work on Sept. 29 (q.v.).—Jour. of the Convention, I, 114, 848.

The legislature authorises the expenditure of $200,000 for the regulation of the Corlear's Hook property, which, by supreme court proceedings completed in 1893, as provided for by the law of June 14, 1884 (q.v.), has been made a public park.—Laws of N. Y. (1894), chap. 511.

The board of estimate and apportionment is authorised to appropriate $50,000 for the erection, in Battery Park, of a monument to commemorate the evacuation of New York by the British in 1783.—Laws of N. Y. (1894), chap. 523. So far as known, this monument was never erected. The board of estimate and apportionment apparently did not choose to make the appropriation.—Loudon, the author (ibid., chap. 8, 1926) from Henry Rutgers Marshall, secretary of the art commission.

The legislature provides for the laying out and establishment of Fort Washington Park.—Laws of N. Y. (1894), chap. 581. See also L. M. R. K., III: 696. The land was acquired in 1896 (q.v., Ag 7).

New York State passes a compulsory education law.—Laws of N. Y. (1894), chap. 671.

The bronze statue of Columbus, by Suchard, is unveiled on the Mall in Central Park by Vice-Pres. Adlai E. Stevenson.—N. Y. T. Times, May 10 and 13, 1894. See also ibid., Je 13, 1892.

The work of tearing down the old N. Y. U. building in Washington Square is begun.—N. Y. T. Times, May 22, 1894. See also Harper's Weekly, XXXVIII: 172, 174; descript. of Pl. 135, III: 708; and L. M. R. K., III: 941. A modern 11-storey building was erected on the site, the first eight floors of the new structure were rented to a book-publishing company and the ninth, tenth, and eleventh floors reserved for the use of the N. Y. U. Law School and the School of Pedagogy.—N. Y. U. Bull., Je 30, 1911.

The legislature directs the city to acquire the land bounded by 111th and 114th Sts., First Ave. and the Harlem River, to establish a public park there.—Laws of N. Y. (1894), chap. 746. This became Thomas Jefferson Park (see D 10, 1897, and 1922). See also L. M. R. K., III: 971.

On the same day the legislature directed that the land included by Tenth Ave., Fort George Road, Eleventh Ave., Dykeeman St., and the Harlem River, be made a public park.—Ibid. (1894), chap. 749. This became part of Fort George Park as developed in 1901–6.—L. M. R. K., III: 971.

The Chamber of Commerce rapid transit bill becomes a law. This measure was in the nature of an amendment to the Rapid Transit Act of 1891 (q.v., Ja 31), and authorised the municipal construction and ownership of a rapid transit system, if the people should...
so choose. When the question was submitted to them, the vote in
favour of a road to be constructed under municipal direction was
22,124,647 as against 42,916. The law also called for the creation of a
new board of rapid transit commissioners. These were Alexander
E. Orr, president, Seth Low, John Claffin, John N. Inman, John
H. Statin, and William Steindam. This commission selected Wm.
Barclay Parsons as consulting engineer and entrusted him with the
preparation of plans for an underground road. He visited Europe to
study the problem, and finally submitted plans for a road, the
cost of which would be $80,000,000. -Laws of N. Y. (1894),
chap. 725; Ann. Cyclop. (1894), 540. A rare volume of the
Minutes of the meetings of this rapid transit board, for the years 1894-96,
is preserved in N. Y. P. L. See My 9, 1895.

The corner-stone of the new Scotch Presbyterian Church is laid at
69th St. and Central Park West. The new building will be the
fourth occupied by the congregation since its organization in 1756.

June
7 Congress authorizes the New York and New Jersey Bridge Co.
 to "construct and maintain a bridge across the Hudson River
between New York City and the State of New Jersey." The
location is to be subject to the approval of the secretary of war and is
to be somewhere between 59th and 69th Sts., New York City.-Laws

28 Congress passes a law making the first Monday in September,
chap. 118.

July
The Hawaiian Republic is proclaimed, with Sanford B. Dole
as president.-N. Y. Times, Jl 19, 22, and 29, 1894. Pres. Cleveland
recognized it on Aug. 8.—Ibid., Ag 9 and 10, 1894.

The city acquires by condemnation proceedings the land
bounded by Park, Bayard, Baxter, and Mulberry Sts. Here Mulberry
Bend (now Columbus) Park was developed.—Prendergast,
Record of Real Estate; L. M. R. K., III: 971.

Aug.
In August and September of this year, the Bloomingdale Asyl-
num for the Insane removed from the site bounded by Amsterdam
Ave. and the Boulevard, 171st and 191st Sts., to its present location
at White Plains, where building operations had been begun in 1892.-
124th Ann. Rep., Soc. of N. Y. Hospital (1895), 19-25; Times,
O 18, 1894. The property on Morningide Heights had been sold
to Columbia College (see F 18, 1892), and the college took possession
of the ground on Oct. 1, 1894 (g.v.).

Sept.
The Bank for Savings (see Jl 3, 1819) moves from Bleecker St.
to the s. w. cor. of Fourth Ave. and 22d St.—Unpublished records
of the bank.

A mass meeting is held at Madison Square Concert Hall "for
the purpose of formally launching a citizens' movement in the
interest of honest government and to effect the overthrow of Tam-
many rule," and the new committee of seven is authorized to
power to confer with other anti-Tammany organizations and to
take such action as may be necessary to further the objects of the
meeting.—N. Y. Tribune, S 7, 1894; Parkhurst, Our Fight With
Tammany (1895), 253 et seq. The committee of seventy included
Abram S. Hewitt, George L. Rives, Wm. B. Hornblower, J. Pier-
pont Morgan, Wm. E. Dodge, Anson Phelps Stokes, Wm. Travers
Jerome, and Joseph Larche—Quotations, Records, III: 60. The can-
didates placed in nomination by the committee of seventy were
elected on Nov. 6 (g.v.).

The constitutional convention, which began its sessions on May
8 (g.v.), completed its work of revision. An "Address to the people"
was adopted, and provision was made for the submission of the
revised constitution to the people at the next general election.—
Avenue of the Giants, 1717.

Oct.
In this month, the famous "Dreyfus case" began in France.
It lasted until 1906 (g.v., Jl 12).—Haizen, Europe since 1815, 358-
64. See also Ja 13, 1898.

The trustees of Columbia College take possession of their new
site bounded by 116th, 120th Sts., Amsterdam Ave. and the Boule-
vard, formerly the property of the Bloomingdale Asylum for the
Insanitary (see 1895, Ag 9).—Eve. Post, O 1 and 30, 1894.
Most of the asylum buildings were soon after demolished, and the
corner-stone of the first Columbia building, the library, designed by
McKim, Mead & White, the gift of Pres. Seth Low, was laid on
Dec. 7, 1895 (g.v.). The property was dedicated as the university site
on May 2, 1896 (g.v.).

The Clearing House Association (see Je 17, 1875) lays the corner-
stone of its present building at 77-83 Cedar St. Robert W. Gibson
is the architect.—Eve. Post, O 2, 1894; The N. Y. Clearing House:
Laying of the Corner-stone and Opening Ceremonies of the New Bldg.
in Cedar St. (N. Y., 1896). See also L. M. R. K., III: 925, and

John Alexander III, czar of Russia, dies and is succeeded by Nicholas

"It was announced today that John Jacob Astor is going to
build a large hotel on the south-west corner of Fifth Avenue and
Thirty-fourth Street adjoining the Waldorf, which, it is said, will
be larger than any other hotel in the world. It will be 530 feet long,
100 feet wide, and will be several stories higher than the Waldorf.
Henry B. Ely, the manager of Mr. Astor's property, said to-day
that an effort would be made to excel all other hotels in every way.
It will be run in connection with the Waldorf by Mr. Boldt without
the attempt at any rivalry.

"The plans have not yet been perfected, but the architect will
be Henry J. Hardenbergh, who built the Waldorf; only the ground
plan has been considered thus far. The style of architecture and the
height of the building are matters yet to be decided upon.

"The new hotel will cover the other half of the block now occupied
by the Waldorf on Fifth Avenue, and will extend west through
Thirty-fourth Street for an additional distance of 100 feet. This
site is now covered by the Astor homestead, the stables in the rear,
and seven brown-stone-front houses on Thirty-fourth Street from
Nos. 2 to 14."—Eve. Post, N 2, 1894. See also N. Y. Herald, Je
2, 1895. The new hotel became the Astoria.—L. M. R. K., III: 981,
N 1, 1895.

The north wing of the Metropolitan Museum of Art is opened.
-N. Y. Times, N 6, 1894; Ann. Cyclop. (1894), 345; Howe, Hist.
At the election on this day a definite attempt is made to oust
Tammany Hall from control of the city government. The com-
mittee of seventy (see S 6), representing all classes of society,
nominated Wm. Lee and J. S. Youngwood for recorder.
The Republicans, the State Democracy, the Independent
County Organisation, the Anti-Tammany Democracy, the German-
American Reform Union, and the confederated good government
clubs, all anti-Tammany organisations, supported the committee
of seventy's ticket, which was generally successful. Strong was
elected by a plurality of over 45,000, and Goff, by an even larger
vote.—N. Y. Times, N 7 and 8, 1894; Ann. Cyclop. (1894), 541.
For a history of the movement against Tammany which culminated
in the success of this election, see Parkhurst, Our Fight With Tam-
many (1895).

On the question of consolidation the election results are: "New
York, for consolidation, 96,938; against, 59,939; Kings, for, 64,744;
against, 64,671; Queens, for, 7,712; against, 4,741; Richmond, for,
5,555; against, 4,873; Rockland, for, 1,467; Eastchester, for, 3,743;
against, 2,605; Westchester, for, 6,260; against, 621; Pelham, for,
261; against, 153."—Ash, Greater N. Y. Charter with Appendices
(1901), second ed., cxxi-cxxii. See also N. Y. Tribune, N 9, 10, and
30, 1894.

"The Constitution of 1894" (see S 29) is adopted by a vote of
415,697 against 337,602. —Leg. Manual (1895), 977-78. In their
"Address to the people" the delegates declared: "We have retained
the general framework and substance of the existing Constitution
and have sought only to make such modifications as experience has
shown to be desirable, without venturing upon undue experiments.
"Out of more than four hundred amendments proposed and
considered, we have adopted thirty-three, besides striking out
obscure matter."

One amendment separates municipal from state and national
elections; another prohibits "the issue of passes by railroad, tele-
graph and telephone companies to public officers;" another pro-
hibits "riders on appropriation bills;" another extends the pro-
bhibition against lotteries so as to include "all pool-selling,
bookmaking and other forms of gambling;" another requires that a
man must be a citizen for 90 days (instead of 10) in order to qualify as
a voter; another makes it unlawful to use a "mechanical device for
recording and counting votes;" another fixes the number of sena-
tors and assemblymen at 50 and 150 respectively, reapportion
the districts, and provides that "no one county shall have more
than one-third of all the Senators, and that New York and Kings
county together shall not have more than one-half of all the Sena-
tors;" another prohibits the "contract system of convict labor." (Ordinary provisions of statute law were thus introduced.)
1895

In the spring of this year, Theodore Roosevelt was appointed police commissioner by Mayor Strong. He retained the office for two years, and during that time did much to eliminate politics and favoritism from the department.—Theodore Roosevelt. An Autobiography, 185-222.

In this year was published Our Fight with Tammany, by Rev. Chas. H. Parkhurst, D.D.

In 1895, there were 2,406 new buildings erected; in 1896, 3,208,—an increase of 902.—Message of Mayor Strong, Jan 12, 1897.

The Jacob H. Schiff fountain in Seward Park, designed by Arnold W. Brunner, was presented to the city this year.—Cat. of the Works of Art Belonging to the City, 129.

In this year, Chas. Dana Gibson's drawings in black-and-white began to be popular and during the later Nineties they "achieved an almost universal vogue." Commenting on them, the World said: "Gibson has drawn the true American girl. He is the American Du Maurier. Before Gibson synthesized his ideal woman, the American girl was vague, nondescript, inchoate; there was no type of her to which one could point and say 'That is the typical American girl.' As soon as the world saw Gibson's ideal it bowed down in adoration, saying: 'Lo, at last the typical American girl.' Not only did the susceptible American men acknowledge her their queen, but the girls themselves held her as their own portrait, and strove to live up to the likeness of her. Thus did nature follow in the footsteps of art, and thus did the Gibson girl become legend, and the world take her to its heart as the type of American womanhood. . . . Gibson also created a type of man, the square-shouldered, firm-jawed, clean-shaven, well-groomed, wholesome youth—for which he and his friend Richard Harding Davis were the models; and the American young man, less self-consciously than the American girl, set himself to imitate the type. It was Gibson's pen which sent mustaches out of fashion and made the tailors pad the shoulders of well-cut coats."—Sullivan, Our Times (1896), I: 193-95.

The Ship Canal Bridge (see Ap 5, 1892), extending across the Harlem River from Broadway, Manhattan, to Broadway, Bronx, is opened for traffic.—Rep., Council of Bridges (1912), 255. This report contains a view of this bridge (Pl. 17) as well as views of all the other important city bridges. See also Ann. Cyclus. (1894), 55-; See Je 17.

The 34th St. crosstown horse-cars begin to run.—N. Y. Herald, Ja 6, 1896.

The old Herald building, erected in 1886 (p. v.) at Broadway and Ann St., was sold during the past week to H. O. Havemeyer for $590,000.—N. Y. Times, Ja 6, 1895. The St. Paul building was erected on the site in 1896 (p. v.).

Mayor Strong, in his first message to the common council, informs them that the city debt has increased $5,316,412.30 during the past year. Commenting on the revolt against Tammany at the last election (see N 6, 1894), he says: "Although it was clearly not the intention of the original framers of our Constitution and laws that public affairs should be conducted through the medium of political parties, it is a matter of history, both in State and Nation, that practically such has been the result. It is neither strange nor unnatural to find that as our citizens in widely separated localities have sentiments in common upon subjects of finance, foreign policy, internal improvements or the tariff, that they should seek to act in unison at the polls and in so doing form themselves into political parties. In the matter of municipal administration, if properly placed, if conducted in such a manner that the welfare of the citizens of a particular locality, the same conditions do not exist. In municipal affairs, results may be accomplished through different channels, providing every citizen conscientiously keeps alive his interest in such affairs and is prepared to exercise a proper influence, based on knowledge, when he goes to the polls. Integrity in public office can be assured by a continued demand for such conduct by our citizens and by a continued interest in public affairs. In a word, municipal administration can and should be made a matter of practical business, differing chiefly in the magnitude of interests involved. However these propositions may be argued out theoretically, the people at the last election demanded a change from politics to business. . . . Your Honorable Board will I have no doubt, within the limits of your power, seek to obey the mandate of the citizens so clearly expressed at the recent election. For myself, while appreciating the demand for change, both in the character of men chosen to perform public service and in the nature and amount of public expenditures, I shall endeavor to meet both these requirements by naming for office men whose capabilities are their inducements, and at the same time to make such reductions in expenditure as will give the taxpayer the greatest results for the least taxation, being mindful meanwhile that we live in a city so magnificent in location, wealth and standing that it is: the part of wisdom as well as civic pride to jealously guard those interests."—Proc., Bd. of Ald., CCXVII: 17-18.

Capt. George E. Waring assumes office as street cleaning commissioner of New York City, having been appointed by Mayor Strong.—The Sun, Ja 16, 1895. He completely reorganized the department and introduced the white duck uniforms, from which the cleaners derived the name of "White Wings." Mrs. Burton Harrison said: "A marked feature of the new regime has been the reform in the character of the working force. To bring this about, the men employed were made to feel that their retention depended entirely upon themselves,—that, if they worked and behaved well, they would be kept; if the reverse, no power or 'influence' of politicians or of any one else would enable them to hold their places. This understood, the character of the force was changed as if by magic such removals and new appointments as were made were in individual cases, and only after careful examinations of the hundred and forty-five hundred who, next to yesterday, is practically that of two years ago, with only such differences as proper discipline must effect. The matter of costuming the workers in white duck suits and caps, although the subject of satirical comment by the casual critic, is useful for many purposes,—keeps the men more easily under observation, and is even gratifying to many of them, because it identifies them with one of the most popular reforms in recent years; though others are still to be found who resent any uniform as a badge of servitude no American should tolerate."—Harrison, Externals of Modern N. Y. (1896), 796-98. See also Waring, "The Cleaning of a Great City," in McClure's Mag., IX: 911-24.

The tenement-house commission appointed in 1894 (p. 17, My 4) presents to the legislature a report showing the results of its investigations. The report discusses the questions of immigration, density of population, overcrowding, different types of tenement-house plans, fireproof construction, death rates, rear tenements, the need of public parks in tenement neighbourhoods, recreation piers, public baths, etc. Among the recommendations made to the legislature by the commission were the following: that the law be extended so as to give the board of health power to condemn and destroy tenement-houses unfit for human habitation; that the percentage of lot allowed to be covered by new tenement-houses be limited to 70% and that no more air shafts shall be roofed over; that certain dangerous trades be prohibited in tenement-houses so as to prevent fire; that the ceilings of all habitable basements be at least two feet above the ground; that all dark hall-ways be lighted by artificial light; that at least 400 sq. ft. of air be provided for every adult and 200 cu. ft. for every child under
early in the history of the development of the West End seems to have resulted in the devotion of a large part of the frontage of buildings of a public or semi-public character. . . . Great hotels, imposing apartment houses, churches, schools, hospitals, museums, and buildings of like importance already have location here, and others are contracted for or projected. . . .

"The social life of this part of the West End is fashioned by the character of the buildings in which its devotees are housed. So many big family hotels and apartment houses make a neighborhood that is distinctive. None but the wealthy can afford to dwell in the expensive structures erected on the highest-priced land in the residential portion of the city.

"The Boulevard has not yet become the place of residence of the very wealthy. Some time it may. But from the buildings there now it seems likely that it will be second to Central Park West, as the avenue upon which structures of a public character will be erected. . . .

"The building of the elevated railroad on Columbus Avenue determined the character of that street. Its length is taken up by apartment houses, the ground floors of which are occupied by shops. West End Avenue, it was originally supposed, would become the business pulpit of the West End. But it is now the avenue upon which there are more private houses than any north and south street.

"Riverside Drive is, of course, the most beautiful avenue of the West End. . . . There are not yet a great many residences on the drive. But its future is assured. There are few lots now not held by permanent investors and it will not be many years before there will be a line of palatial houses on the west side of the drive.

"There is no boulevard in all the world that compares with Riverside Drive in natural beauty. The nearest approaches to it are the Chiaia at Naples, and the boulevard in the new part of Glasgow. But both are insignificant in comparison. . . . The Chiaia is nearly on a level with the sea, while the height from which the Hudson front of Riverside Drive is one of its greatest charms. The view north from Claremont is as fine as can be found in any city in the world.

"Although so much has already been done to make Riverside Drive and Park beautiful, there are still many projected improvements to be made before it will have reached that finished state which is desired by those who are most interested in securing for the people a charming pleasure ground. It is necessary to complete the retaining wall from Ninety-sixth to One Hundred and Nineteenth Street, so that the improvements that have been made will not be washed down into the river by the rains. . . . It is also proposed to build a viaduct across the depression at Ninety-sixth Street, which will cost $150,000. . . ."—N. Y. Times, Mar. 10, 1895.

Nibley’s Garden, famous as a place of amusement for more than 60 years, finally closes its doors. It is to be demolished immediately and a large office building erected on the site.—N. Y. Herald, Mar. 24, 1895. See also Harper’s Weekly, XXXVI: 614, and L. M. R. K., III: 985. See also D. 27, 1894.

The property of St. Luke’s Hospital (see My 31, 1893), consisting of 12 lots on Fifth Ave. between 54th and 55th Sts., is being sold.—N. Y. Herald, Mar. 24, 1895. The new University Club building was erected on the corner (see 1895).

The legislature incorporates “the trustees of scenic and historic places and objects,” whose object is “to acquire by purchase, gift, grant, devise or bequest, historic objects or memorials or picturesque scenes in the state.” The 54 incorporators include Andrew H. Green, Chas. A. DNA, Channcey M. Depew, Horace Porter, Wm. Allen Butler, Morris Williams, George G. Haven, Elbridge T. Gerry, Wm. H. Evarts, Frederick W. Devoe, S. Van Rensselaer Cruger, Frederick J. De Peyster, Morgan Dix, Lewis Cass Ledyard, Henry E. Gregory, and other prominent men. The corporation is required to make an annual report to the legislature. — Laws of N. Y. (1895), chap. 166.

The society was suggested by Andrew H. Green, who memorialized the legislature in Jan., 1895. Morris Williams drafted the bill, and Henry E. Gregory personally enlisted the interest of men who consented to become incorporators. In 1898, the name was changed to the “Society for the Preservation of Scenic and Historic Places and Objects,” and in 1901 the field of its operations was extended to any state in the Union, and it became the "Amer-
The whole territory is rich in Revolutionary reminiscences, and it was the site of many of the most aristocratic Colonial mansions. The country is marvelously beautiful. On one side is the Hudson River, and on the other the Harlem River. To the north is Spuyten Duyvil Creek, where the new canal is being constructed which will unite the Hudson and the Harlem. The views from the ridge of land between these two streams is far reaching and comprehensive. The Hudson remains away on one side of the river far to the north. Across the Harlem may be seen the new parks in the Twenty-third and Twenty-fourth Wards, and to the south is the wonderful panorama presented by the closely built city.

"The depression at One Hundred and Twenty-fifth Street, called Manhattan Valley, divides Morningside Heights from Washington Heights, but the characteristics of both are similar, and the development of one will follow the development of the other."

"On Morningside Heights are now being built a number of the most educational, religious, and charitable institutions of the metropolis. They will form a group of buildings that will attract visitors from all over the country. These are Columbia College, Teachers' College, the Cathedral of St. John the Divine, St. Luke's Hospital, and several others."

"Riverside Drive forms the most beautiful approach to this wonderful elevation, which has been called the Acropolis of America."

"Washington Heights rises from One Hundred and Twenty-fifth Street to a series of natural terraces, and is covered with a luxuriant growth of forest trees. The southern portion of Washington Heights has been subdivided into lots, but the northern portion still remains in large tracts, and much of it can never be divided into city lots because of the characteristics of the topography. Through the heart of Washington Heights is a broad boulevard which shows to advantage every desirable residence. It has only lately been opened and is one of the most pleasant drives around New-York City."

The legislature authorises the appropriation of $1,000,000 to the use of the Metropolitan Museum of Art, to build an "East Wing" (on Fifth Ave.).—*Law of N. Y.* (1895), chap. 347. The architect of the new extension was Richard M. Hunt, who was also the designer of the improvements to the Metropolitan Museum. The building was completed and opened in 1897.

The legislature incorporates the New York Zoological Society and authorises the commissioners of the sinking fund to set aside for its use any of the lands belonging to the city north of 155th St. The incorporators include Chauncey A. Bunn, Andrew H. Green, George O. Havemeyer, Albert H. Gallatin, and Frederick S. Church.—*Law of N. Y.* (1895), chap. 435.

The new Macombs' Dam Bridge is formally opened to traffic.—*N. Y. Times*, May 2, 1895; Rep. Com'y of Bridges (1912), 10-11. It required three years to build the bridge, and its cost was $2,000,000.

The city acquires by condemnation proceedings the land bounded by West End Ave., Broadway, and W. 106th St. Here Schuyler Square was developed.—*Prendergast, Record of Real Estate, 515; L. M. R. K., III: 971.

The Washington Memorial Arch (see My 30, 1890) is dedicated. It was constructed from designs by Stanford White. —*N. Y. Herald*, May 5, 1895. It is a granite structure 77 ft. high and 62 ft. wide, having an arch 47 ft. high with a span of 30 ft., and was erected by the people of New York City.—*Cyclone*, (1895), 548.

The legislature authorises the new tenement-house commission (1894, q.v., My 4) to adopt building and housing regulations for tenement houses and other structures in the city. —*Ann. Cyclop.* (1895), 2021.

The rapid transit commission decides upon the routes and the general plan of construction of the subway. The construction is to run from Battery Place under Broadway and Union Square to 50th St then along the Boulevard by tunnel or viaduct to 169th St, thence under Eleventh Ave. to 185th St. The plan also provides for a loop under Battery Park, State, and Whitehall Sts.; a loop under Broadway, Mail St, City Hall Park, Park Row, and Chambers St; a connection from the latter loop at Park Row to the Broadway line at or near Fulton St; a branch line which is to diverge from the Broadway line near 14th St. and run along Fourth or Park Ave. by tunnel or viaduct to the Harlem River, which it is to cross by a bridge, and then turn to the left to Walton Ave. and 158th St., and run along Walton Ave. to 146th St.

The commission also adopts an address to the common council submitting the routes for consideration and setting the cost at $7,000,000.—*Min. of Rapid Transit Board* (1895), 75; *Ann. Cyclop.* (1895), 551. The common council approved the routes, but "the property owners refused their consent, making an application to the Supreme Court necessary. The Court refused its approval upon the ground that the city, owing to a provision of the constitution of the State limiting the city's power to incur debt, would be required to raise the necessary money." It also contended that it would be too expensive to go under Broadway.—*Interborough Rapid Transit (The Subway)* in *N. Y.* (pub. by L. R. T. Co., 1904), 18, 24. See *Ja*, 1897.

The "General Removal Act," abolishing the office of police justice (thereby expelling from office the Tammany police justices, who were held largely responsible for the corruption that had prevailed) and creating a board of city magistrates becomes law.—*Law of N. Y.* (1895), chap. 601.

The legislature designates Lincoln's birthday as a "public holiday."—*Law of N. Y.* (1895), chap. 603.

The Ashbury M. E. Church (see *Je* 7, 1892), at the south-east corner of Washington Square and Washington Place (formerly the Washington Square Reformed Dutch Church), is sold to the firm of Bowen & Coen, who intend to demolish the church immediately and erect a seven-storey warehouse on the site. The purchase price is reported as high as $386,000.—*N. Y. Tribune*, May 17, 1895. See also L. M. R. K., III: 936, and descript. of Pl. 113, III: 708.

The income tax law passed by congress in 1894 is declared unconstitutional by the supreme court. The *World* characterized the decision as "the triumph of selfishness over patriotism... another victory of greed over need." The people at large will bow to this decision as they habitually do to all the decrees of their highest courts. But they will not accept law as justice. The *Tribune* said: "Thanks to the court, our government is not to be dragged into communistic warfare against rights of property."—*Sullivan, Our Times* (1926), L. 174-75.

The legislature directs the construction of a permanent suspension bridge over the East River from the foot of Broadway or thereabouts in Brooklyn to the foot of Grand St. or thereabouts in New York.—*Law of N. Y.* (1895), 789; *ibid.* (1896), chap. 612; *ibid.* (1897), 421. See also *Harper's Weekly*, XXXIX: 521; XI: 968, 982. This was the Williamsburg Bridge. It was opened on Dec. 19, 1903 (q.v.).

The delection law is amended in an important particular. The
partisan ballot with its "paster" possibilities is displaced by act of the legislature, and there is now to be provided "one form of ballot for all the candidates for public office and every ballot shall contain the names of all the candidates . . . together with the title of the office elected and in continuous lists under the respective party or political or other designation certified." Precedence in the lists is to be given "to the party which polled the highest number of votes for the head of the ticket in the next preceding general election."
—Laws of N. Y. (1897), chap. 810.

The bureau in the law department, the chief officer of which is the public administrator, is removed from that department by act of legislature and is continued as an independent bureau. The power to appoint and remove the public administrator is vested in the county surrogate.—Laws of N. Y. (1895), chap. 827.

In this month, Lord Rosebery resigned, and Lord Salisbury became prime minister for the third time. His administration lasted until 1902.—Hazen, Europe since 1815, 511.

The department of public charities and correction is abolished, and in its place two separate departments are created, the department of public charities and the department of correction.—Laws of N. Y. (1895), chap. 912. The department of charities took over the records of Bellevue Hospital.—An Account of Bellevue Hospital (1895).

The legislature passes a law "to annex to the city and county of New York territory lying within the incorporated villages of Wakefield, Eastchester and Westchester, the city and town of Westchester and portions of the towns of Eastchester and Pelham."—Laws of N. Y. (1895), chap. 934. See also Ann. Cyclop. (1895), 551. In 1897, Robinson & Co. of New York, published certified copies of maps of the annexed districts, filed in the registrar's office at White Plains, Westchester Co.

The commissioners of the department of public parks are authorized to erect a driveway over the Harlem River from 140th St. Manhattan to 140th St., Bronx.—Laws of N. Y. (1895), chap. 986. The bridge was opened on Aug. 24, 1905 (p.v.).

The N. Y. and Brooklyn Tunnel Co. is empowered to construct a single or double tunnel under the East River from some point in Manhattan between 16th and Whitehall Sts. to some point in Brooklyn between 5th St. and Atlantic Ave.—Laws of N. Y. (1895), chap. 1014.

The "Temperance Education Bill," so called, becomes a law of the state. It provides that "the nature of alcoholic drinks and other narcotics and their effects on the human system shall he taught in connection with the various divisions of physiology and hygiene as thoroughly as are other branches for not less than four hours a week, or ten or more weeks in each year in all grades below the second year of the high school."—Laws of N. Y. (1895), chap. 1041.

The Harlem Ship Canal is opened by a procession of vessels.—N. Y. Herald, Je 18, 1895. Gen. John Newton planned the canal, for which congress ordered the government survey in 1874. In constructing it, 53,000 tons of rock were removed, 162,000 cubic yards of earth excavated, 1,000,000 cubic yards of earth dredged, and 5,000 cubic yards of retaining walls built. The plan called for a channel 400 ft. wide and 15 ft. deep at low tide. It was estimated that $1,750,000 would be required to complete the work.—See also view and account in Harper's Weekly, XXXIX: 603, 605. A map of the canal, without date, is filed as map No. 43 in real estate bureau, comptroller's office. The canal is shown on Pts. 175-6 and 177, West 149th St.

The board of aldermen adopts an "aldermanic flag." It is to be white with the city seal on it in blue surrounded by 30 red stars, one for each aldermanic district.—N. Y. Herald, Ag 15, 1895.

The city acquires by condemnation proceedings the 17 acres of land at Hudson and Clarkson Sts., comprising Trinity Parish Cemetery.—L. M. R. K., III: 970. Hudson Park was opened here in 1808 (p.v.). See also Ap 17, 1895.

A contract is let by the aqueduct commissioners for the construction of the Jerome Park reservoir, a new receiving reservoir for the Croton water supply, to be fed by both the old and new aqueducts.—Wegmann, op. cit., 209.

Oct.

The board of aldermen empowers a committee of five citizens appointed by Mayor Strong "to make translations of and print such of the enterprising books and articles that have appeared in the City Hall Library, located in room number twelve in the City Hall, as they may desire."—Proc. Bd. of Ald. (1895), CCXX: 170. On Dec. 31, the board of estimate and apportionment appropriated $7,000 for this purpose, and, under the editorship of Berthold Ferno, the seven volumes were published in 1897 (p.v.), entitled Records of New Amsterdam, to which many references are made in the Chronology during the years 1653-1699. See also N. Y. Hist. Am., 1, Istrod. v.-vii. For earlier efforts to translate and publish these records, see G. A. 1872: 254; 1875: 213.

19 New buildings of the New York University on University Heights (see Ap 18, 1894) are officially dedicated. McKim, Mead & White were the architects.—N. Y. Herald, O 20, 1895. See also Harper's Weekly, XXXIX: 365, 378. For a brief later history of the university, see N. Y. U. Bull., Je 30, 1911.

A fire at Broadway and Bleeker St. destroys $5,000,000 worth of property, including the Manhattan Savings Institution and the Empire State Bank buildings. The old Bank for Savings building at 67 Bleeker St. is injured.—N. Y. Herald, N 6, 1895. Hammerstein's Olympia Music Hall, occupying the block front on the east side of Broadway between 44th and 45th Sts., is opened. —N. Y. Herald, N 24, and 26, 1895; Harrison, Hist. of the City of N. Y. 844. See D 8. In 1899, the name was changed to the New York Theatre.—N. Y. Times, Ap 25, 1899.

The cornerstone of the Columbia University library, the first Columbia building erected on Morningside Heights, is laid by Pres. Low. The library was designed by McKim, Mead & White, who had been appointed the architects of the university.—N. Y. Herald, D 8, 1895; Hist. of Columbia Univ., 162. See also views in Harper's Weekly, XXXVI: 123, 124, and N. Y. Herald, K. III: 940. The library stands on the site of the main building of the Bloomingdale Asylum for the Insane.—A Psychiatric Milestones Bloomingdale Asylum Centenary, 1821-1921, 12. See O 1, 1894, and My 2, 1896.

Yvette Guilbert arrives at New York for her first American engagement.—N. Y. Herald, D 9, 1895. She appeared first on Dec. 16, at Hammerstein's Olympia Music Hall.—Ibid., D 17, 1895.

The police "Bicycle Squad" is organized for the better protection of pedestrians against careless bicycle riders.—Ibid., Bd. of Ald., CCXXV: 280.

The Anti-Saloon League, as a nation-wide institution, is organized at Washington, D. C.—Sullivan, Our Times (1912), I: 16.

The 100th anniversary of the Jay treaty, the "Centennial of Commercial Liberty," is commemorated by distinguished New Yorkers at Delmonico's.—N. Y. Herald, D 20, 1895.

The city begins to acquire title to the land on Amsterdam Ave., between 135th and 141st Sts., where the new College of the City of N. Y. is to be built. Down to 1907, there were 12 grants and 6 condemnation proceedings for this purpose. The total cost of the land was about $14,500,000.—Prendergast, Record of Real Estate a W. 1895, 124, 149, citing Lincoln's Conveyances.

The "Court of Oyer and Terminer and of Goal Delivery" finally goes out of existence. It is to be succeeded by "Part I, Trial Term, of the Supreme Court, for the Trial of Indictments."—N. Y. Herald, D 31, 1895.

1896

In this year, Guglielmo Marconi went to England and took out his first patent for wireless telegraphy.—Gibson & Cole, Wireless of Today, 72-73, 275.

In this year, rural free delivery was inaugurated.—Sullivan, Our Times (1912), I: 401.

"In American political history, 1896 was a dividing point. It marked the climax and the ending of radicalism arising out of issues associated with current events. The growth of the political discontent to speak of. It largely evaporated under the warming influence of generous emotions aroused by watching Cuba's struggle for freedom, the still warmer feelings that attended our taking part in that struggle, and the exaltation that accompanied our brief adventure in territorial annexation. It was assuaged by larger supplies of gold from the mines of the world, rising wages and prices, and the accelerated activity of business that came with the war."—Sullivan, Our Times (1926), I: 291.

In this year, John S. Kennedy presented to the N. Y. Pub. Library the Thos. Addis Emmet collection of manuscripts, consisting of about 10,800 items, including one or more autographs of almost every man of distinction in American affairs during the Revolution, as well as a large number of earlier colonial documents, and letters of more recent date. With the exception of 5,900 bound pieces, they are bound in 94 volumes. In 1900, the library published a calendar of the collection.
In this year, through the efforts of the Association for Improving the Condition of the Poor, the City and Suburban Homes Co. was organized, "with a capital of $1,000,000 for the purpose of building model tenement houses in New York as a business investment." A competition for the best tenement-house plan was held, and an excellent type of building, on a lot 100 x 100, designed by Ernest Flagg, was finally chosen. Under the leadership of Dr. E. R. L. Gould, the tenements were erected at Nos. 217-23 W. 68th St. and Nos. 214-220 W. 69th St. In 1902, a second group of buildings similar to the first were erected on First Ave. between 64th and 65th Sts.

- During this year, 223 telegraph-poles were removed from the city's streets with 1,635 miles of wire. The total number of removals since the creation of the board of electrical control in 1887 is 20,377 poles and 29,802 miles of wire. This was accomplished without expense to the city. - Message of Mayor Strong, Jan. 12, 1887, p. 48.

- In this year, the St. Paul building was erected, from designs by Geo. B. Post, on the south-east corner of Broadway and Ann St., the site long occupied by Baraum's Museum and later by the Herald building. — Liber Deeds, DCCXL: 608, Sec. 1; XXIX: 90, Sec. 1; L. M. R. K., III: 982. See also descript. of Pl. 158-A, III: 841, and Pl. 163, III: 846.

- In this year playgrounds for school children were introduced. The first was at Grammar School 735, in Norwalk. — Palmer, The N. Y. Pub. School, 191-92.

- In this year, a bronze statue of Abraham de Puyer, by George E. Bisell, was presented to the city by John Watts de Peyster and erected in Bowling Green. - Cat. of Works of Art Belonging to the City, 106.

- The Peter Goedel mansion, on the north-east corner of Broadway and 19th St., stood, surrounded by trees and flowers, until this year. - Descrip. of Pl. 156, III: 795.

- In this year was published a History of the City of New York: Externals of Modern New York, by Mrs. Burton Harrison. Illustrated. Being Chapter XXII, Volume II, of Mrs. Martha J. Lamb's History of the City of New York (see 1877). Jan. 1

- The "Common Pleas," which had been in existence for nearly two centuries and a half, is to go out of existence on this day. — N. Y. Herald, D 31, 1895. This court was organized in 1673 as the "Court of Burgomasters and Schepens," later became known as the "Mayor's Court," and finally was called the "Court of Common Pleas." By the state constitution adopted in 1894, it was merged in the "Supreme Court," and when it ceased to exist, it was "the oldest judicial tribunal in the State of New York, the oldest with an unbroken record in the United States."—Van Rensselaer, Hist. City of N. Y., I: 330-31.

7 Mayor Strong sends his second annual message to the common council, saying in part: The city debt has increased $5,806,688.44. "Persistent criticism of the police, charging corruption and failure to impartially enforce the laws, has been carried on in this city for a number of years, and culminated in the official investigation and the disclosures of the Lexow Committee.

- The evidence thereby adduced disclosed the giving and taking of bribes for preferment in the force itself, the enforcement or non-enforcement of the laws according to the social or political standing of those affected thereby, the oppression of the poor for inability to pay for privileges, and the withholding from others, who could mete out an equivalent in money or influence, rights without such consideration. By whatever course of events such abuses arose, the fact remains that on the 1st of January, 1895, the police were discounted in the eyes of our citizens and sister cities, a belief in their integrity wanting, and public confidence lacking in either their ability or willingness to impartially enforce the law.

- The effort of the Police Commissioners during the past year has been to restore discipline in the force itself, and to assure to every member thereof that preferment could be predicated alone upon proper conduct and then to enforce the laws as they are found upon the statute books. I believe that within the limits of another year the discipline of the force will have been raised to a grade higher than it has been for a quarter of a century, and that law-abiding citizens are already respected the enforcement of the law as fully as breakers of the law will fear it.

- Personally I do not believe that the enforcement of our Excise laws will ever fail to breed more or less discontent until the question of the Sunday opening of the saloons is established by a vote of the people themselves. — And in the consideration of this subject I am frank to say that it is a question upon which people honestly and intelligently differ. Within the last half century the character of our population has rapidly and radically changed. There is a vast element among us to whom the use of certain beverages means, not dissipation, but proper indulgence. And there are those again with whom such use would not amount to an abuse, and who certainly have a right to have their desires passed upon at a general election where a consensus of the opinion of our entire community may be taken. . . .

- The introduction of diphtheria antitoxine, its production by the Board of Health, and its use in this city during the past year, may be attributed the decrease in the mortality from that disease. . . .

- "One of the most fruitful results of purely political methods and subserviency of public interest to other considerations was found in the care of the public streets. . . . Within the current year there has been a radical change not only in the methods of administration, but in the actual results obtained. From the streets have been removed the trucks, to the number of about 60,000, and sufficient room has been discovered for their housing despite the charge maintained during a number of years that this result was impossible of accomplishment. The streets have been made and are kept clean, the public health has been improved, and the decrease in the mortality rate has been greater during the year 1895 than it was in the last ten years by about two per cent. per thousand. . . .

- "There are now in the subways 103 miles of cables, aggregating 964 miles of conductors; 264 miles of underground subsidiary ducts have been constructed. . . . It is important that the work of putting electrical conductors underground should be continued, together with the finishing of the larger part of the uncompleted portion of the city south of One Hundred and Thirty-seventh street. . . ." Titticus Dam, near Purdy's Station, and the two Carmel Dams have been finished, and the work remaining to be done by the aqueduct commissioners consists mainly of the new Croton Dam and Reservoir, and the Jerome Park Reservoir.

- "The school system of New York is at once its pride and safety. More than upon statute, ordinance or police regulation must we rely upon the intelligence of our citizens to promote the public welfare. At this chief point of entry for immigration, with almost every nationality represented among our citizens, with more papers published in foreign language than in any city in the United States, the first and most jealous care should be given to our school system.

- "There are under the jurisdiction of the Board of Education three hundred and thirty one schools and departments—two hundred and fifty-four Grammar and Primary, twenty-seven Evening, four Evening High, one Nautical and forty-five Corporal.

- During the present year women have been appointed as Inspectors of Public Schools, and in each of the school districts two of the three Inspectors are now women. There has also been a woman chosen as a Trustee. The results of these innovations have been most flattering, and it is proper to remark that the fidelity and care with which the women so chosen have followed out their official duties are worthy of the highest emulation. . . ."

- The city now has a park area of 5,185 acres. The need of enlargement of the areas of cities for the accommodation of increased population and for improvement in their administration, in connection with the lesser communities that constitute suburban areas, is apparent in the old world as well as in the new. The subject of uniting various municipalities about this Port has already received the approval of a very large majority of the electors of the areas concerned.

- "At its last session the Legislature carried out a part of the scheme of the Commission which has long been at work on this subject by the union with this city of one town and portions of two other towns of Westchester County, and it is not improbable that the question of annexation of other areas will come up for action in the present Legislature." — Proc. Bd. of Ald, CCXXI: 3-24.

- "The Greater New-York bill, to be introduced in the Senate by Mr. Lexow immediately on the resumption of the session, is that recommended by the Consolidation Commission a year ago with some slight modifications. As the town of Flatlands has now
THE ICONOGRAPHY OF MANHATTAN ISLAND

1898 become a part of Brooklyn, and Kings County has been merged in that city, and as the part of Westchester County to be included in the consolidation has already been annexed to the City and County of New York, there is no longer any occasion for mentioning them in the title of the bill. The 1898 public official further declares the consolidation to take effect Jan. 1, 1898. This will obviate all question of disturbing existing terms of office.

"The only other change of importance in the bill as offered by the commission in their report last year consists in striking out the words which would add the Mayors of New York and Brooklyn to the commission. This leaves to the commission as it now stands the task of preparing the measures by which consolidation is to be effected. The propriety of this can hardly be questioned, for this commission has been studying the subject for five years, and its knowledge and experience are valuable if not indispensable. Besides, it is an independent body, which will not be suspected of partisan designs."

The present building of the N. Y. Clearing House Assn. (see O 2, 1894), at 77-83 Cedar St., is formally dedicated.—N. Y. Clearing House: Laying of Corner-stone and Opening Ceremonies of new Bldg. in Cedar St. (1896).

The patients are removed from the old St. Luke's Hospital at 54th St. and Fifth Ave. to the new building on Morningside Heights (see My 6, 1893)—N. Y. T. Daily Tribune, at 25, 1896. See also Ap 26, 1896.

Feb. The trustees of Columbia pass the following resolution: "Resolved, That in all official publications hereafter issued by or under authority of the trustees, all the departments of instruction and research maintained and managed by this corporation may, for convenience, be designated collectively as "Columbia University," and the School of Arts, as the same is now known, and demands may hereafter be designated as "Columbia College" or "The College."—N. Y. Daily Tribune, F 4, 1896; Hist. of Columbia Univ., 159-60. The new site was dedicated On May 7 (q. v.).

The New York Red Cross is incorporated.—N. Y. Daily Tribune, F 14, 1896.

From Feb. 17 to 19, David H. King, Jr.'s paintings, furniture, and textiles were sold at the Am. Art Galleries for $34,907. A second sale took place on March 31, 1903, which yielded $24,414. —A Plan, etc., op. cit. in Mar.

In this month, the Grolier Club held an exhibition "Illustrative of a Centenary of artistic Lithography."—See catalogue in N. Y. P. L.

The Raines Excise Law is passed by the legislature. It abolishes all excises in the state, and substitutes therefor a state commissioner of excise, who, with the aid of a deputy state commissioner, secretary, clerks, special agents, and attorneys, is to have charge of all matters relating to licenses, collection of liquor taxes, etc. The law also directs the appointment of a special deputy commission in each county which contains a city of the first class (New York, Kings, and Erie Counties), imposes four grades of taxes on liquor business, provides for local option, designates where and to whom liquor may not be sold, and imposes penalties for violations of the law.—Laws of N. Y. (1896), chap. 112. The law was amended on April 20, 1897.—Ibid. (1897), chap. 312. See also Raines Excise Law and the Greater N.Y. Bill (pub. by Bidyn. Daily Eagle, 1896).

The trustees of the New York Public Library, Astor, Lenox, and Tilden Foundations, present an address to Mayor Strong reviewing the need of a great public library system in New York City, and suggesting the following plan: "If the City of New York will furnish a proper site, and provide the means to erect thereon a suitable building for the purposes of the New York Public Library, excluding for the present the requirements of branch libraries or delivery stations other than those now controlled by the Free Circulating Library, then the New York Public Library can, through the sale of its present sites, obtain such an addition to its funds as will justify it in providing for the circulation of books from its main building. If further funds can be supplied from private benefaction or otherwise, sufficient to establish and maintain an adequate number of branches for circulation, it is certain that the City of New York can and will have a free Public Library on the broadest and most comprehensive plan."

"Should the suggestions of the Trustees be favorably received, no site within the control of the City could accomplish the ends in view as well as that of the Reservoir upon Fifth Avenue, between Fortieth and Forty-second Streets.

"The site is an ideal one for such a building. It is to-day the most central and easily accessible spot on the Island and will be rendered even more so by the fact that within a single block are two lines of surface cars and two elevated railroads, running north and south. The Forty-second Street surface road intersects all the chief thoroughfares that connect the upper with the lower part of the City. Less than three hundred yards away is the common terminus of the three principal railroads running into the City. And not only does this site command these incomparable advantages at the present time, but it is impossible to foresee a time when it cannot retain a like superiority. At no point further north can any similar convergence of public modes of travel ever be anticipated.

"On this site it will be possible to erect a library building, dignified, ample in size, visible from all sides, with uninterrupted light, free from all danger of fire, in no respect encroaching upon the existing Bryant Park, and which will be an ornament to the City. The Park area would indeed be increased by substituting a library building for the Reservoir. The Reservoir measures 455 feet by 420. A library building 350 feet by 300 would offer all the accommodations which the most sanguine would probably think it wise to present to public; and even this would leave a margin of more than 100 feet on the south and east, and room to turn about to the north and west, with grass and shrubbery. The City would then have no quarter more inviting. The library would in effect bring the Park to Fifth Avenue; while reciprocally the Park would add enormously to the attractiveness, security and usefulness of the library."

"Mayor Strong has vetoed the Greater New-York bill. — Apr.

Mayor Strong's veto was contained in a document of about 1,000 words, in which New-York City's Chief Executive labored hard to make it emphatic that he favors consolidation, but not according to the terms of the bill in question. He favors the appointment of a commission to prepare a charter for the greater city, which shall be adopted by the legislature before the various municipalities are declared to be one city."—N. Y. Times, Ap 14, 1896. The bill was passed over the mayor's veto by the legislature on May 11 (q. v.).

"Thomas A. Edison and Albert Bial have perfect arrangement by which Edison's latest invention, the vitoscope, will be exhibited for the first time anywhere at Koster & Bial's Music Hall. Edison has been at work on the vitoscope for several years. It consists of a large canvas on a stage, that will appear from the canvas, and move with great facility and agility, as though actuated by separate impulses. In this way the bare canvas before the audience becomes instantly a stage upon which living beings move about."

"Mr. Bial said yesterday: 'I propose to reproduce in this way at Koster & Bial's scenes from various successful plays and operas of the season, and well known statesmen and celebrities will be represented, as, for instance, making a speech or performing some important act or series of acts with which their names are identified. No other manager in this city will have the right to exhibit the vitoscope."

Koster & Bial's, where this first public moving-picture show was held in New York, was a concert-hall, vanudelle theatre, and beer-garden, at 115 W. 23d St., on the north side of the street, west of Sixth Ave.—King's Handbook (1895), 605.

The city acquires by condemnation proceedings the land at the north-east corner of Madison Ave. and 25th St. On this, the court-house of the appellate division of the N. Y. supreme court was afterwards built (see D 20, 1899)—Prendergast, Record of Real Estate (1914), 171.

The city continues the action of the board of street opening and improvement in laying out St. John's (or Hudson) Park, on the east side of Hudson St. between Clarkson and Leroy Sts. (see Ag 12, 1895), is ratified by the legislature, and the land is declared a public park.—Laws of N. Y. (1896), chap. 295. It was opened in 1898 (q. e.)—L. M. R. K., III: 370.

Edison's vitoscope (see Ap 14) is exhibited for the first time, at Koster & Bial's. Commenting on it, a newspaper says: 'The ingenious inventor's latest toy is a projection of his kinetoscope
1896 figures, in stereoptican fashion, upon a white screen in a darkened hall. In the centre of the balcony of the big music hall is a curious object, which looks below like the double turret of a big monitor. In the front of each half of it are two oblong holes. The turret is neatly covered with the blue velvet brocade which is the favorite Sambo's dance with some of the indescribable celerity. Their motions were all clearly defined. When they vanished, a view of an angry surf breaking on a sandy beach near a stone pier amid the spectators. The waves tumbled in furiously and the foam of the breakers flew high in the air. A barque's boxing match between a tall, thin comedian and a short, fat one, a comic allegory called "The Monroe Doctrine," an instant of motion in Hoyt's farce, "A Milk White Flag," repeated over and over again, and a skirt dance by a tall blonde completed the views, which were all wonderfully real and singularly exhilarating. For the spectator's imagination filled the atmosphere with electricity, as sparks crackled around the swiftly moving, lifelike figures.

"So enthusiastic was the appreciation of the crowd long before this" scene ended "that vociferous cheering was heard. There were loud calls for Mr. Edison, but he made no response."—*N. Y. Times*, Ap 24, 1896. See also ibid., Ap 26, 1896.

The legislature passes "An Act in relation to the common schools and public education in the city of New York." This provides that all public schools in the city shall be under the control of a board of education, consisting of 21 school commissioners appointed by the mayor, and that this board shall have power to appoint a city superintendent of schools, a superintendent of school buildings, assistant superintendents of schools, principals, teachers, clerks, and other officers. The board is also authorised to divide the city into at least 15 inspection districts, in each of which the mayor is to appoint five inspectors. It is to have power to establish and erect new schools, to convert old schools into new schools, to consolidate schools, to acquire sites for new buildings, etc. One or more high schools may also be maintained. All school trustees are abolished, and a board of superintendents is created, composed of the city superintendent and the assistant superintendents, whose duty it shall be to recommend changes in the course of study, to nominate principals and teachers, to examine candidates for school officers, and to report on school matters in general.—*Laws of N. Y.* (1896), chap. 387.

May 27 Columbia formally dedicates its new site on Morningside Heights (see O 1, 1894, and D 7, 1895), and the event marks "the transition of Columbia from a college into a well equipped university." The corner-stones of Schermerhorn Hall and of the Physics Building are laid on the same day.—*N. Y. Herald*, My 2 and 3, 1896; *Hist. of Columbia Univ.*, 162-66; L. M. R. K., III: 940; descrip. of Pl. 170, III: 822. See also views in *Harper's Weekly*, XL: 113 and 1269. The work of the institution was transferred to the new site on Oct. 4, 1897 (q.v.).

An act consolidating the local governments of territory within the city and county of New York, the counties of Kings and Richmond, Long Island City, and the town of New Town, Flushing, and Jamaica, together with a part of the town of Hempstead, usually known as the "Greater New York Bill," is passed by the legislature over the vetoes of the mayors of New York and Brooklyn. This bill provides that the governor shall appoint a commission to report a charter for the enlarged city by Feb. 1, 1897.—*Laws of N. Y.* (1896), chap. 488; *Asb., N. Y. City Charter* (1897), cvii-cix. See also *N. Y. Times*, My 11, 1920. See Je 9.

The bicentenary of the charter of the Reformed Protestant Dutch Church of the city of New York is celebrated.—See the *Bicentenary report*, printed by the consistory; also *N. Y. Times*, My 12 and 22, 1896.

The N. Y. and Harlem R. R. Co., or its lessee, the N. Y. Central & Hudson River R. R. Co., is authorised to erect a station building on Sixth Ave. from 127th to 126th St.—*Laws of N. Y.* (1896), chap. 594.

An act is passed providing that whenever the land on Fifth Ave. between 40th and 42d Sts., at present occupied by the reservoir, shall be made a public park and the reservoir removed, the department of parks may, if it sees fit, "enter into a contract with the New York public library, Astor, Lenox and Tilden foundations, . . . for the use and occupation of said land . . . by the said corporation and its successors for establishing and maintaining therein a free public library of characterized books of N. Y. (1896), chap. 714. See D 26, 1896, and My 19, 1897.

The Congregational Church in Israel (see 1894) lays the cornerstone of a new synagogue at the south-west corner of 70th St. and Central Park West.—*N. T. Times*, My 21, 1896; *Pubz., Am. Jewish Hist. Soc.*, VII: 149; L. M. R. K., III: 925. It was dedicated on My 25, 1897.—*N. Y. Times*.

The legislature authorises the board of park commissioners to transfer the custody of the Van Cortlandt mansion in Van Cortlandt Park to the Society of Colonial Dames of the State of New York.—*Laws of N. Y.* (1896), chap. 857.

Gov. Morton, who was authorised by the act of May 11 (q.v.) June to appoint a commission to report a charter for Greater New York by Feb. 1, 1897, names the following members: Seth Low, Benjamin F. Tracy, John Morton, I. S. Dillen, and Asa Beec, for New York; Stewart L. Woodford, Silas B. Ditcher, and Wm. C. De Witt, for Brooklyn; George M. Pinney, Jr., for Richmond Co.; and Garret J. Garretson, for Queens Co. Fitch resigned, and Thos. F. Gilroy, former mayor, was appointed in his place. By the terms of the act the following gentlemen were also on the commission: Andrew H. Green, president of the firm of M. H. Hathaway, state engineer; Theodore E. Hancock, attorney-general; Wm. L. Strong, mayor of New York; Frederick W. Waran, mayor of Brooklyn; and Patrick Jerome Gleason, mayor of Long Island City.—*N. T. Tribune*, Je 10, 1896; *Asb., N. Y. City Charter* (1897), cxx.

The commission organized on June 23 in Mayor Strong's office, appointed Benjamin F. Tracy as president and George M. Pinney, Jr., as secretary, and named Wm. C. De Witt, John F. Dillen, Thomas F. Gilroy, Seth Low, Andrew H. Green, Benjamin F. Tracy, and George M. Pinney, Jr., as a committee to draft the proposed charter.—*N. Y. Times*, Je 26, 1896; *Asb., op. cit.*, cxi.

Writing in 1897, James W. Pryor thus commented on the drafting of the charter: "Probably never before was there an attempt made to formulate within so short a time a piece of legislation so difficult and complicated as this charter. From the time of the passing of the law creating the commission the opinion has been freely expressed by men conversant with legislation relating to municipal government that within the time allowed, no body of men could do the work with thoroughness at all commensurate with the importance of the subject. The commission had about five expert state engineers; but its continuous work did not extend over much more than half of that time. The charter was appointed on the ninth of June, 1896, under a law requiring it to make a final report by the first of February, 1897. In the early summer it met a few times, and adopted certain general propositions, but no comprehensive plan or framework was formulated. During the summer one member of the commission [Wm. C. De Witt] prepared with great industry the draft of a charter. This was reported to the commission's committee on draft on the twenty-first of September. After that date the committee met from time to time, and at length, on the ninth of December, reported to the commission a complete draft essentially different from the draft made during the summer. The first eight chapters of this draft were made public by the commission on the twenty-fourth of December, with the announcement that public hearings would begin on the second of January, and would continue for two weeks. During these two weeks additional chapters were given out from time to time, as they were completed; but two or three important chapters were not made public until after the hearings, and the supplemental bills were given out only when the final form of a charter was sent to the legislature and published. Toward the end of its term the commission perceived that it could not complete the draft without much assistance. Accordingly, several lawyers were employed to draw some of the chapters, and some of these lawyers were at work while the public hearings were in progress. After the hearings, the commission found that it would be unable to report the final draft by the first of February, and an extension of time until the twentieth of February was secured from the legislature.

"Undoubtedly the commission consulted a number of people, but it may be said that the work was practically carried on in
THE ICONOGRAPHY OF MANHATTAN ISLAND

1896 secret, the public having no information as to its progress, or as to the process by which the commission was arriving at its conclusions upon the many points of public interest involved. Inspection of the dates given above will show that it was impossible for those who were interested to prepare themselves to discuss the draft intelligently at the hearings. It could only be properly considered as a whole and after careful examination. But insufficient time was given for the examination of the chapters published on the twenty-fourth of December, and the charter as a whole was not before the public until after the termination of the hearings. It was not the policy of the commission to distribute copies of the draft freely, and only a comparatively small number of copies were printed. The final draft did not become accessible to the public generally until the latter part of February, when it was published by the New York daily press.

The Hotel Manhattan at the north-west corner of Madison Ave. and 42d St. is opened.—N. Y. Times, O 15, 1896.

Princeton College becomes Princeton University.—Memo-rial Book of the Sesquicentennial Celebration (1898); Collins, Princeton (1914), 253, 260-64.

A business man's service is held in New York in behalf of sound money. It was part of the political campaign preceding the election of McKinley to the presidency.—N. Y. Times, N 1 and 2, 1896; Ann. Cyclop. (1896), 372.

Walter L. Hensley of the Harlem Speedway (see Mr 8, 1895), which had been discontinued in June, 1895, is resumed. It is expected that the first section will be completed in a year.—N. Y. Times, N 3, 1896. See Jl 1, 1898.

Wm. McKinley and Garret A. Hobart, Republicans, are elected president and vice-president, defeating the Democratic candidates, Wm. J. Bryan and Arthur Sewall.—McKee, National Conventions and Plataums, 206-8.

"One of the latest clubs to be formed in New York is the City History Club, whose object is the formation of popular classes for the study of the history of the City of New York. The club thus hopes to awaken an interest in the traditions of the city and in the possibilities of its future, believing that such educational work is for the improvement, uplifting, and civic betterment of the community.—N. Y. Times, N 7, 1896. The City History Club was founded by Mrs. Robert Abbe. To meet the needs of its students it issued a number of historical monographs called The Half Moon Series, the first volume of which was published in 1897.

The corner-stone of the present club-house of the N. Y. Athletic Club was laid on May 15, 1896, at the south-east corner of 59th St. and Sixth Ave.—N. Y. Times, Jl 23, 1896.

The aquarium is first opened to the public, in the old Castle Garden (formerly Fort Clinton) in Battery Park. About 30,000 people visit it during the day.—N. Y. Times, N 5, 10, 11, 1896; Ann. Cyclop. (1897), 565; L. M. R. K., III: 357. See also Harper's Weekly, XI: 1143.

The common council orders that the land occupied by the distributing reservoir on Fifth Ave., between 40th and 42d Sts., together with the adjacent land lying west thereof, known as Bryant Park, shall constitute a public park named Bryant Park; it is also provided that any resolution for the removal of the reservoir shall contain the condition that the work shall be done after water mains have been laid and made ready for use as far south as 58th St., as provided by Laws of N. Y. (1896), chap. 669. Ord., etc., App'd by Mayor, LXIV: 359. See also N. Y. Times, Je 29, 30, Jl 1, 1896. See, further, My 19, 1897.

1897

In this year, the seven volumes entitled Records of New Amsterdam were published by the city. They were an English translation, edited by Berthold Fernow, of the earliest Dutch records that have been preserved relating to New York. The publication was authorised in 1895 (q. v., O 2).

In this year, New Amsterdam New Orange New York, by Wm. Loring Andrews, was published. It is a chronologically arranged account of engraved views of the city from 1614 to 1800.

As late as this year, there was still an ordinance in force relating to the disposal of swine found at large in New York.—City Ordin-ances (1897), 121-22.

In this year, the name of the United Service Club (see Ja 29, 1896) was changed to the Army and Navy Club. In Jan., 1896, it began to erect a club-house at 107-109 W. 43d St., which was opened March 4, 1908.—N. Y. Even. Telegram, My 10, 1915.

In this year, a truant school "for the detention of children habitually absenting themselves from school" was established in East 21st St.—Palmer, The N. Y. Pub. School, 124.

During this year, five new piers from 700 to 730 feet long with slips 50 feet wide, lying between the foot of Charles St. and of Gansevoort St., were under construction. Plans were adopted for seven new piers between Bloomfield St. and West 23d St., as well as for two other piers flanking the ferry slips opposite West 13th St., and one pier on the northerly side of Bloomfield St.—Ann. Cyclop. (1897), 594. Cf. Mr 23, 1893.

Between 1897 and 1909, Catherine Market, which was rebuilt with iron fronts in 1894 (see Proc., App'd by Mayor, XXX: 588;
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876–1909

1897  
**ibid., XXII:** 236, 307; De Voe, *Market Book,* 369, was demolished.

Jan. Having failed to have their routes approved by the supreme court in 1895 (q. 6, q. 9), the rapid transit commissioners and adopt new routes for the proposed subway, extending from city hall to Kingsbridge and the station of the N. Y. & Putnam R. R. on the upper west side, and to Bronx Park on the upper east side. They comprise what are now known as the Broadway and Seventh Ave. lines. "The local authorities gave their consent to the new route, the property owners, as on two previous occasions, refused their consent; the Supreme Court gave its approval in lieu thereof; and the Board was prepared to undertake the preliminary business of letting a contract."—*Interborough Rapid Transit (The Subway) in N. Y.* (pub. by L. R. T. Co., 1904), 18, 23–24. See Mr 29, 1899.

Mayor Strong sends a message to the board of aldermen on the subjects of the board of education, the department of health, and the City Record. Regarding the first, he says: The past year has been fruitful of more discussion regarding the school system in this city than any previous year in our history. Not only has there been a radical change in the school law, but the question of adequate accommodations for school children and the ability of the city to meet the requirements of an increasing population have been productive of much discussion in the public prints and by the citizens generally. It is a fact that for a number of years there has been a demand for proper and permanent accommodations in this city. It is a fact that there is not now such an accommodation as the standing of New York City and the character of its population demands. There are now nine schools in course of construction or recently completed, contracts have been let for three more schools and two additional are under consideration, plans for seven are nearing completion in the draughting department, ten sites for new larger schools have been chosen and for additions have been acquired during 1896. 28 sites are being acquired by condemnation proceedings, and 13 have been approved by the board of education and will be acquired in the near future. There are now 295,883 pupils enrolled in the public schools, nearly 70,000 in the Catholic schools, and over 20,000 in private schools.

The work of the health department during the past year has been "unusually important," and the death rate has been brought down to 21.54 per 1,000, the lowest in the history of the city. There are 45,542 tenement-houses, and the semi-annual inspections have affected a "marked improvement in their sanitary condition." Also, "Measures have been inaugurated during the past year for the systematic examination of all milk cows within the city limits, with special reference to animals suffering from tuberculosis." It is a fact that tuberculosis in cattle is the same disease so fatal in mankind, and that the milk from such diseased animals is frequently the cause of this disease in those who consume it. The importance of an early diagnosis of this disease in milk cows and the prompt destruction of diseased animals is obvious. Of the 2,700 milk cows within the city limits, 1,139 have been carefully examined the past few months and the "tuberculin test" applied. Of this number 186 were found to be diseased and were slaughtered, and the autopsy in each case confirmed the diagnosis. A detailed experimental investigation has been made during the past year in the bacteriological laboratory of the Board of Health into all the methods employed in various parts of the world for the production and preservation of vaccine virus, with satisfactory results. The vaccine virus now produced by the Board of Health is believed to be unexcelled by any in the world in potency, in lasting qualities and in freedom from bacteria. The methods of conducting the City Record have been so improved that all debts relating to it have been liquidated.—*Proc., Bd. of Ald., CXXV:* 169.

20

The Bellevue Hospital Medical College, erected in 1866 in East 26th St., is almost wholly destroyed by fire.—*N. Y. Daily Tribune,* Ja 21, 1897. This led to the consolidation on May 19, 1897, of the Bellevue college with the Medical College of N. Y. under the name of the University and Bellevue Hospital Medical College. This college now has four buildings opposite Bellevue Hospital, the "College Building," erected by the Bellevue Hospital Medical College; and transplanted the university the time of the consolidation; the Carnegie laboratory, the gift of Mr. Carnegie in 1885; the new laboratory building, built by the university in 1903; and the Carnegie laboratory extension, another gift of Mr. Carnegie, dedicated in the autumn of 1910.—Jan. N. Y. U. Bull., Je 30, 1911.

"Plans are now being considered toward an enlargement and general rearrangement of the interior of the Grand Central Terminal. The two main entrances to the building are now at the opposite sides of the station, it was said yesterday, makes the changes imperative.

"Now each road has a separate waiting room and ticket office. The offices of the various officials are crammed, and some of them have been forced to move to neighboring buildings.

"The changes under consideration are said to be the addition of two stories and the combining of the ticket offices and waiting rooms."—*N. Y. Times,* Ja 27, 1897. See Ag 25.

Mayor Strong writes to the board of aldermen regarding the departments of charity and correction and the bureau of licenses, saying in part: "In a city the size of New York the charitable institutions should form a model for the entire country. It is not too much to say that a city can well be judged for its advancement materially and socially according to the degree of care given to its poor and unfortunate. It is not necessary that the city's charitable institutions furnish luxurious accommodations or entail a profligate expenditure of money. It is desirable that hospitals should be able to take care of the city's indigent sick and furnish medical treatment and accommodations consistent with the most advanced science and the greatest progress in municipal affairs. Much has been done during the past two years to place the institutions referred to on a plane consistent with the standing of this city before the world."

The institutions under the department of corrections include the city prison, the district prisons, the workhouse, and the penitentiary, and they have at present 3,984 inmates. "Appreciating the benefits of fresh air and the advantages afforded by out-door work, experiments have been made in placing under cultivation many acres of heretofore uncultivated land on Blackwell's Island, affording at the same time employment for the prisoners and increasing the supply of fresh vegetables for their dietary. . . . Vegetables to the value of over $7,000 were raised and employment furnished to a number of the prisoners."

In 1896, there were 295,883 licenses issued, and the fees received therefrom amounted to $154,942.50, a large increase over 1895.—*Proc., Bd. of Ald., CXXXV:* 171–79.

The Times prints a "Round Table" page in which prominent citizens give expression to their views concerning the proposed bicameral "Municipal Assembly" which the charter commission proposes to write into the Greater New York Charter (see My 4). The expressions are generally adverse.—*N. Y. Times,* F 6, 1897. During this entire month the editorial columns of the Times are replete with comment on the charter, generally adverse.

A "much-heralded fancy dress ball given by Mr. and Mrs. Bradley Martin" takes place at the Waldorf. About 700 guests are present, including most of the people prominent in New York society, and all are attired in beautiful and elaborate costumes of the sixteenth, seventeenth, and eighteenth centuries. The grand ball-room of the hotel is "a scene of splendor."—*N. Y. Times,* F 11, 1897. On Fe 14, a newspaper said: It will be many a day before the echoes of the great Martin costume ball die away. . . .

"The guests are not yet weary of rehashing to each other and their friends the incidents of the night and the beauties of the scene. The effect, in particular, of the room during the time of the dancing of the quadrilles was marvelously beautiful. These quadrilles were in every way unique and were the great feature of the ball. . . . It was in every way the greatest night in the history of New York society."—*Ibid., F 14, 1897. See also *ibid.,* F 21, 26, and 27, 1897, and Van Rensselaer, *The Social Ladder,* 207–9.

The Greater New York charter is unanimously approved by the charter commission at the mayor's office.—*N. Y. Times,* F 13 and 18, 1897. On Fe 18, the report to the legislature, giving reasons for the charter prepared, was signed by the commissioners.—*Ibid.,* F 23, 1897. The report is printed in Ash, *N. Y. City Charter* (1897), ccxvii–ccviii.

The Citizens Union is formed, and issues its first address to the public with a "Declaration of Principles and Objects." Among the issues of the affairs of municipal corporation should be "managed upon their own merits uncontrolled by national or state politics;" the character and record of every candidate for municipal office should be such as to justify public confidence that
he will not use his office "for the benefit of any political organization;" civil service requirements should be impartially enforced.

so as "to afford a fair chance to every citizen without regard to race, religious belief or political affiliations;" public franchises should be granted "for limited periods in order that increases in value shall be the people's;" there should be "the rapid transit facilities without unreasonable delay;" adequate school accommodations should be provided and the "efficiency of the public schools be steadily increased by the adoption of the best educational methods;" laws providing for the better sanitation of tenement-houses should be "carried into effect at the earliest practicable date;" the government of the city should be "by its citizens for their own benefit, not by partisans for the benefit of parties."

--Report of Committee on Plan and Scope to Citizens Union Executive Committee (1900), 1-51 N. Y. Tribune, 24, 30 and 26, 1897 N. Y. Times, 54, 1897.

--To Harper's Weekly.

Mar.

The last of the Patriarchs' halls (see 1872) is held. Anson Phelps Stokes, commenting on them, says: "I have been one of the Patriarchs under Mr. Ward McAllister's management, and had continued under Mr. Buchanan Winthrop's leadership. At these balls for many years the principal presentations of young ladies were made. The pictures were numerous made regarding Mr. McAllister, and he sometimes expressed himself incan-ducibly, but he really served a useful purpose. He issued all the invitations to these balls, other Patriarchs sending him names and giving him absolute veto power. In many cases, when invitations were not received, he took all the blame. It is difficult to know how such a series of fashions could have been carried on success-fully in New York at that time on any other basis. There were not many private ball-rooms then in New York."--Stokes Records, III: 56-67.

Mr. McKinley is inaugurated president.--N. Y. Times, Mr. 5, 1897.

Under the title, "The Educational System of Greater New York," Nicholas Murray Butler gave great praise to the educational chapter in the proposed charter for Greater New York (see My 4). "It is a genuine contribution," he says, "to the science of municipal administration, and a noteworthy advance beyond conditions that now prevail so generally in the school systems of great cities."--Independent, Mr. 11, 1897, 305.

The board of estimate and apportionment is directed to select a site for the proposed court-house, now City Hall Park, upon which the clerk of the city and the county, the surrogate courts, and the law, finance, and tax departments.--Laws of N. Y. (1897), Vol. II, chaps. 59 and 793.

Apr.

Theodore Roosevelt, who for the past two years has been police commissioner of New York City (see 1895), is nominated by Pres. McKinley as assistant secretary of the navy.--N. Y. Times, Ap. 4, 6, and 7, 1897. A farewell reception was held in Roosevelt's honour by Good Government Club A on April 15. --Ibid., Ap. 16, 1897. He resigned the office of police commissioner on April 17, to take effect April 19, when he became assistant secretary of the navy.--Ibid., Ap. 18, 1897.

Gen. Grant's body is removed from the temporary mausoleum on Riverside Heights, where it was deposited in 1885 (37, 7), to the new marble tomb. --Sun, Ap. 18, 1897. The new tomb was dedicated on April 27 (q. v.).

The legislature directs that the height of dwelling and apartment-houses, measured from the sidewalk through the centre of the façade, shall not exceed 150 ft. on streets and avenues more than 75 ft. in width, and 100 ft. on streets and avenues less than 75 ft. in width.--N. Y. Tribune, Ap. 8, 1897.

Grant's Tomb (see Ap. 27, 1897), at Riverside Drive and 122d St., is dedicated by Pres. McKinley. The occasion is marked by a land parade of 60,000 marchers and a review of the fleet in the Hud-son River by McKinley. Mrs. U. S. Grant and her family, ex-Pres. Cleveland, and other distinguished people are present.--Sun, Ap. 20-21, 1897. The tomb occupies the site of the former country house "Strawberry Hill."--N. Y. Herald, Ap. 21, 1897. See also Harper's Weekly, XI: 429, 431, 416, 437, 444, 457, 460-61, 468-69, and 475; Cat. of the Works of Art Belonging to the City; and L. M. R. K., III: 965.

The charter of "Greater New York" (see My 11, and Je. 5, 1896) becomes law. It is entitled, "An act to unite into one municipality under the corporate name of the City of New York, the various communities lying in and about New York harbour, including the city and county of New York, the city of Brooklyn and the county of Kings, the county of Richmond, and part of the county of Queens, and to provide for the government thereof." The traditional corporate name was "The mayor, aldermen, and commonalty of the City of New York." All the duties and powers of the several municipal and public corporations, thus "united and consolidated," are hereby devolved upon the municipal assembly of the said city of New York," and "all valid and lawful charges and liabilities" now existing against any of these municipal or public corporations "shall be deemed and taken to be like charges or liabilities of the said 'The City of New York.'"

The new city is divided into the five boroughs of Manhattan, The Bronx, Brooklyn, Queens, and Richmond.

Legislative power is vested in "The Municipal Assembly of the City of New York," comprising a council and a board of aldermen. The former is to have 28 members, elected from "council districts" for a term of four years, plus a president to be "chosen on a general ticket." The latter is to receive $5,000 salary, the other members, $1,500.

Every ex-mayor of "The City of New York," so long as he remains a resident, shall be entitled to a seat in the council without a vote. Aldermen are to be elected biennially from assembly districts, except that the area formerly comprising Long Island City and the town of Newtown shall be entitled to one member, as shall also the area formerly comprising the towns of Jamaica and Flushing and that part of Hempstead taken into the city, and the area comprising "those parts of the first and second assembly districts of Westchester county included in the borough of The Bronx." The salary of an alderman is fixed at $1,000. Heads of administrative departments are entitled to a seat in the board without a vote. The clerk elected by the council is also the "city clerk," and it is in his power to appoint the clerk of the aldermanic board. The latter body chooses a president from its own membership. In imitation of the federal congress, the two bodies shall each "determine the rules of its own proceedings;" shall each be the judge of the election returns and qualifications of its own members, subject, however, to review by certiorari of any court of competent jurisdiction; shall each keep a journal of its proceedings; shall each sit with open doors; shall each have authority to compel the attendance of absent members and to punish its members for disorderly behavior; and to "to any member with the concurrence of two-thirds of all the members elected to such body."

All ordinances or resolutions are subject to the mayor's veto, but may be passed over the veto by a two-thirds vote in each branch, provided that "in case the ordinance or resolution involves the expenditure of money, the creation of a debt, the laying of an assessment, or the grant of a franchise," it shall require a five-sixths vote. Among other powers specifically authorized are the acquisition of additional water-works, restricting the height of buildings to be hereafter erected, granting franchises (limited to 25 years) for street railways, and the maintenance and regulation of ferries.

The chief executive is the mayor, to be elected for a four-year term at the general election in November, 1897; it is to be noted that this is the "off-year," not the year for federal and state elections. He shall not be eligible for the next term after the termination of his office.

Administrative departments under the mayor include law, police, water supply, highways, street cleaning, sewers, public buildings, lighting and supplies, bridges, parks, buildings, public charities, correction, fire, docks and ferries, taxes and assessments, education, and health. At the head of each is a commissioner or a board of "boards of" in the case of the department, in which the six depart-ments successively named above beginning with water supply. Under plural control (i. e., under control of a board or commission) are also the police, parks, buildings, public charities, docks and ferries, taxes and assessments, education, and health. For most of these commissioners or boards the term is six years or "until their successors have been appointed and have qualified." For six months after the commencement of his term the mayor may remove any appointive official "except members of the board
Chronology: The Modern City and Island: 1876-1909

1876—May 4

Albert Shaw, editor of the Review of Reviews, satirized this power thus: "The mayor will have spent six months in winding up the machine and he will have forty-two months in which to watch it radially run down."—See "The Municipal Government in Greater New York, in Atlantic Monthly (1897), LXXIX: 746. Appointments are all made by the mayor without confirmation and include the chamberlain, three or more civil service commissioners to serve without compensation, a "municipal statistical commission" consisting of "not less than three nor more than six members," also seven or more borough commissioners, and a "superintendent and county auditor," to supervise the property of any corporation or private individual and which shall extend to "every street, park or public place belonging to the city."—It is not clear what these persons were to do, etc., are referred to this commission by the mayor or board of aldermen. In 1900, this commission was given power over the selection of art productions costing not over $50,000 in any one year, when such appropriation has been made by the board of estimate and apportionment.—Laws of N. Y. (1900), chapter 75. In 1903, the legislature increased the commission's jurisdiction to cover the structures mentioned above, to be erected or contracted for at an expense of $1,000,000 or more without previous reference of plans by the mayor or aldermen to the commission.—Ibid. (1901), chap. 466. In 1907, the charter was amended so that all public or private structures extending over or upon land belonging to the city should come under the jurisdiction of this commission. The only exception is that, when a structure is to be erected costing $250,000 or less, the commission shall not act if requested not to do so by the mayor or board of aldermen.—Ibid. (1907), chap. 675. See also F 14, 1898.

Chapter 2 of the charter contains important provisions relating to "The Acquisition of Lands for Public Purposes;" Chapter 22 consists of general statutes regarding streets, amusements, birds, commercial paper during epidemic, pharmacists, board of City Record, coroners, etc.; and Chapter 23, with which the charter closes, contains the provisions relating to the counties embraced in Greater New York, provisions relating to the repeal or survival of old provisions relating to the city.

Commenting on the charter, James W. Pryor says, "The most important local statute passed within recent years is the charter of Greater New York, which will take effect on the first of January, 1885 [p. 79]. It creates a municipality so large as to present a new factor in the political institutions of the country. For the first time, we have to deal with the government of a great metropolitan city with a population of over three millions. This fact gives to the charter an importance far beyond that of the ordinary municipal charter. It is an experiment which is of interest beyond the limits of New York State. Its success or failure will strongly influence the development of institutions in other parts of the country. . . . Viewed in this light, the work of the commission and the passage of the charter by the state legislature constitute a significant event in the political history of the country. . . ."—Annals of Am. Acad. of Political and Social Sciences, v. 20.

The Review of Reviews declares that the provision for an assembly of two chambers "flies in the face of all sound experience everywhere" (Rev. of Reviews, Feb., 1897, 143); that it "is the most hampered, restricted, and altogether helpless, useless and meaningless piece of sham machinery ever speciously proposed in any governmental instrument in a country of democratic institutions;" that its only power in connection with the budget is one of "obstruction;" that, in laying taxes and assessments and raising money, its functions are "so perfunctory that they could be performed by a dummy." He calls the charter remarkable in "verbal dimensions" and "complicated in its provisions," based on the "theory of checks and balances," "new checks having been invented and old ones rearranged" "until the result is something to my mind nothing so much as the combination of bolts, levers, time-locks, and other mechanical devices which go to make up the burglar-proof system one finds on the great door of a modern bank vault."—Independent (1897), XIIX: 123-4. For the opinion of President Butler of Columbia Univ., see Mr 11.

James Bryce, the English critic of America's municipal institutions, praises the change in the time of elections, declaring "No greater forward step can be taken" than that of "eliminating national party politics from municipal elections."—Contemp. Review, Nov. 1897. See also Harper's Weekly, XLI: 75, 385-91; and descrip. of Pl. 157-b, III: 840. See illustration.

The bi-centennial jubilee of Trinity Church is celebrated. A souvenir book, copyrighted by the rectory, the Rev. Mr. S.T.D., contained the form of thanksgiving followed by the congregation, together with the rector's pastoral letter, a history of the parish, and also portraits of its rectors since the year 1697.—
Trinity Church Bicentennial Celebration, pub. by authority of the church; N. Y. Times, My 6 at seq., 1897.

As the land on Fifth Ave., between 40th and 42d Sts. has been made a portion of Bryant Park (see D 26, 1896), the department of public parks is directed to remove the reservoir and to erect a fire-proof building to be used as a public library and reading-room by the New York Public Library, Astor, Lenox, and Tilden Foundations. There is to be a free circulating branch in the library, and the same is to be open during the day time on Sunday and during the evening of every other day until at least 10 o'clock.—Laws of N. Y. (1897), chap. 556. See also N. Y. Times, N 30 and D 20, 1897. The plans for the library were selected in the fall of 1897 (p. v, N 10), but the building was not begun until 1899 (q.v.).

The New York Public Library adopt the terms of a competition for a design for the new library building to be erected on the reservoir site (see My 19). "Two competitions were called for, first, an open competition in which sketches only would be required, followed by a restricted competition for which finished drawings would be made. The first was open to all architects having offices within the limits of Greater New York. Drawings for it must be submitted on or before July 15. From these drawings the judges, Professor Ware, Colonel Green, and Dr. Billings, would select the best twelve, and the authors of these would be paid $300 each. The Committee would then choose from these twelve competitors not more than six, who with six other architects were to be invited to take part in a second competition. To those then submitting plans would be paid $600 each, and from the plans the jury of seventeen would select not more than five to be members of the board of trustees. From these three the trustees were to send one to the Board of Estimate and Appropriation for its approval."

"... To make certain that the requirements were consistent and reasonable, a sketch plan was included, giving the dimensions of the plot and indicating for each floor in diagrammatic form a suggested arrangement of rooms. The Committee was careful to say that they had prejudice in favor of these particular plans and that competitors were requested to make such alterations and changes as they chose."

"Competitors were to submit floor plans for each floor on the scale of 50 feet to 1 inch, an elevation of the 5th Avenue, 42nd Street, and Bryant Park fronts, two sections showing the principal rooms and the staircases. The Committee was careful to say that they had prejudice in favor of these particular plans and that competitors were requested to make such alterations and changes as they chose.

"Competitors were to submit floor plans for each floor on the scale of 50 feet to 1 inch, an elevation of the 5th Avenue, 42nd Street, and Bryant Park fronts, two sections showing the principal rooms and the staircases. The Committee was careful to say that they had prejudice in favor of these particular plans and that competitors were requested to make such alterations and changes as they chose."

"Drawings for the preliminary competition were to be sent to the Secretary on or before July 15, 1897. The Committee would announce their choice, name the other competitors, and issue final instructions for the second competition early in August, and determine for that competition the plans or sections which were not submitted for or before November 1."—Lydenberg, Hist. of N. Y. Pub. Library, 442-45. See further, Jl 26.

The demolition of the old Tombs, at Franklin and Center Sts., is begun. The prison will be rebuilt on the same site.—N. Y. Daily Tribune, My 25, 1897. See also L. M. R. K., III: 973. See S 29, 1902.

The Yale Club of New York City, an outgrowth of the Yale Alumni Association organized in 1868, is incorporated.—Annual of club (1898), 9-11. It occupied its first building, at 17 E. 26th St., in this year.—L. M. R. K., III: 930.

The bronze statue of Peter Cooper, by Augustus St. Gaudens, who had been a pupil of Cooper Union, is unveiled in Cooper Square. The pedestal was designed by Stanford White.—Sun, My 30, 1897. See also N. Y. Times, N 1, 1897, and N 22, 1896; and Cat. of the Works of Art Belonging to the City, 1736-1896.

June

Mayor Strong appoints a committee to act with him in an advisory capacity for the selection of sites for small parks (see My 13, 1889) in the crowded quarters of the city.—Sun, Je 5, 1897. This "Small Parks Commission," submitted a report in October, stating that the lack of play spaces for children compelled them to play in the streets, which were already occupied by car-tracks and over-crowded, and that the safety of the children and the police had led to the growth of a criminal class.—Ann. Rep., Dept. of Parks (1902); Reps., Com. on Small Parks (1897).

The department of public works issues a permit to the Tabular Dispatch Co. to lay two pneumatic tubes for the transmission of mail from the general post-office to the Produce Exchange branch post-office (under the provisions of chap. 400 of the Laws of 1874, and chap. 977 of the Laws of 1894).—See The Recent Administration of the Dept. of Pub. Works (pub. by The City Club, Sept., 1897).

Mulberry Bend Park, the first park obtained as a result of the passage of the Small Parks Act in 1887 (q.v., My 13), is formally opened. The city paid $1,500,000 for the land included within this park, and thus reclaimed for healthful purposes one of the worst tenement districts in the city.—Ann. Cyclop. (1897), 585. It was later called M. Columbus, E. Maitland, and Park Hill. See L. M. R. K., 971.

The immigration buildings on Ellis Island are destroyed by fire.—Sun, Je 15 and 16, 1897. See D 3, 1900.

The Merchants’ Association of New York is formally organized at the Merchants’ Club, and incorporated.—The Merchants’ Assn. of N. Y. Certificate of Incorporation and By-laws (1899); N. Y. Times, Je 6, 18, and 20, 1897.

The city acquires by condemnation proceedings the land bounded by Suffolk, Division, Jefferson, Canal, Essex, and Hester Sts. and East Broadway. Here William H. Seward Park was developed.—Prendergast, Record of Real Estate; L. M. R. K., III: 971. It was completed in 1902 (q.v.) and opened on Oct. 15, 1903 (q.v.).

The city acquires by condemnation proceedings the land bounded by Willett, Pitt, Sherill, and Stanton Sts. Here Hamilton Fish Park was developed.—Prendergast, Record of Real Estate; L. M. R. K., III: 970. It was opened in 1901 (q.v.).

A recreation pier, the first in New York City, is opened at the foot of 34 St. Its success surpassed even the hopes of the dock commissioners.—Ann. Cyclop. (1897), 584. See also view and description in Harper’s Weekly, XII: 701, 706. On Sept. 25, the pier at East 24th St., was formally presented to the city.—Ann. Cyclop. (1897), 584.

The Times-Lamp Company of Millionaire Madison Avenue, 1887, submitted a number of schemes for a Federal wireless telegraphy invention. Other American patents were issued in later years.—Sewall, Wireless Telegraphy, 101-13, 200-17.

The Dingley Tariff Act is passed by congress and signed by Pres. McKinley.—Am. Dict. of Dates, II: 55.

The judges in the first competition for a design for the New York Public Library (see My 21) reported to the executive committee that 88 designs were submitted and that the first prize was given to J. H. Freestone Dryden, Hayden & Shepard, Hornbostel, G. E. Wood and G. C. Palmer, Howard & Cauldwell; Lord, Hewlett & Hull, Clarence S. Luco, Parish & Schroeder, Roos & Weber, Wheeler Smith (associates with Walker & Morris), C. W. & A. A. C. Worthington, James E. Ware & Son, and Whitney Warren. On July 27, the executive committee decided to invite McKim, Mead & White, George B. Post, Cyrus L. W. Edliss, Currier & Hastings, Peabody & Starnes, and Chas. C. Haight to enter the second competition, and on July 28, the following were selected from the first twelve in the preliminary competition: J. H. Freestone Dryden, Haydel & Shepard, Hornbostel, G. E. Wood and G. C. Palmer, Howard & Cauldwell, Wheeler Smith (associates with Walker & Morris), and Whitney Warren.

"The Committee then sent to the twelve architects thus chosen the terms for the second competition dated August 2, calling for the delivery of plans on or before November 1. In general, these terms followed those of the first competition, although the size and arrangement of the rooms, and other details, were changed. The predominant feature of the main reading room over the book stacks at the west end of the building was adhered to. A large public entrance on 42nd Street was added and the Central Circulation room placed in the north court directly opposite this entrance."

"The competitors were themselves to choose three practicing architects, who with three members of the Board of Trustees and the Director were to constitute the jury of award. This jury was to submit to the trustees the three designs they deemed best, from which one was to be selected as the trustees for recommendation to the Board of Estimate."

"The designs were to have no device or motto, but were to be accompanied by a sealed letter containing the name and address of the architect submitting it, and to be addressed in typewriting to the Secretary. Drawings and envelopes were to be numbered as received and were to be referred to by number. The envelopes were not to be opened until the jury had made its award.

"The three architects chosen for the jury were Walter Cook, Cass Gilbert, Edgar V. Seeler. The trustees were John L. Cadwalader, Alexander Maitland, George L. Rives. These with Dr. Billings constituted the jury of award."—Lydenberg, Hist. of N. Y. Pub. Library, 446-50. See further, N 16.

The work of enlarging the Grand Central Station (see Ja 22) is under way. "Three more stories are to be added, giving the struc-
The new DeLomnois's at the n. e. cor. of Fifth Ave. and 44th St. is opened informally to about 1,000 guests. The building was designed by James Brown Lord. Its opening "marks another epoch in the social history of New York."—N. Y. Times, N 14 and 16, 1897. Cf. L. M. R. K., III: 978.

"In making way for the extensive alterations in the City Hall several tons of old records have been collected from long neglected store rooms, attics, and out-of-the-way places, and the question of what shall be done with so much official rubbish has become a serious one for Martin Eayes, the custodian of the building."

"Architect John H. Duncan in planning the remodeling of the City Hall, provided for a large amount of fireproof storage room in the basement. The unused vaults, cells, and coal holes have been overlaid, in some cases rebuilt, and in every instance made lighted and ventilated. A convenient arrangement has been made for the accommodation of the records and the Library of the Municipal Government. There will be a librarian's room on the first floor of the City Hall, and underneath these commodious vaults capable of storing many thousands of volumes in book racks systematically placed. Most of the vaults are of new construction, with solid masonry walls three feet thick."—N. Y. Times, N 14, 1897.

1897
Aug. 25
A lease for the use and occupation of the library building is executed between the city and the New York Public Library, Autor, Lenox and Tilden Foundations. "This granted to the Library the building to be erected on the reservoir site as long as the corporation provided a public library and reading room therein. The City was to maintain the building and keep it in repair. The Library was to occupy it as soon as possible after completion and was to let it accessible at all reasonable hours for general use, free of charge to the public; one or more reading rooms were to be open on week days, holidays included, from 9:00 a. m. to 9:00 p. m., and on Sundays from 1:00 to 9:00 p.m.; a circulation branch was to be maintained therein by the trustees to be opened for the public during the day time on Sunday and during the evening of other days for such time as may be prescribed by the trustees. The hall or branch to be closed at night not earlier than 10 o'clock."

"The Library retained title to and control of its collections in the building. It agreed to submit to the Mayor a detailed printed report of its operations and transactions and of its receipts and expenditures. The City was to have access to the building, but the Library was to appoint, direct, control and remove all persons employed in the building. The City was to provide for the maintenance and repair of the building, to furnish a supply of water and adequate police and protection. The Department of Parks was to care for the approaches."—Lydenberg, Hist. of N. Y. Public Library, 450-51.

From this date until Dec. 25, an exhibition of plans and views of the New York City from 32d St. to the Brooklyn Bridge, at the Grosh Club, No. 29 E. 232 St. This, so far as known, was the first comprehensive public exhibition of New York City prints, although some interesting material, especially books, was shown in the old Lenox Library during the celebration of the 400th anniversary of the discovery of America.—Cat. of Plans and Views of N. Y. City, 1651—1860.

1898
In this year, "the discovery of gold in the Klondike stirred men's imagination to an extravagance second only to the discovery in California fifty years before."—Sullivan, Our Times (1926), I: 273.

In this year, just as the French attempt to build a Panama Canal was coming to acknowledged failure, the U. S. began taking steps to have its own canal of its own construction and ownership.—Sullivan, Our Times (1926), I: 455.

In this year, at the suggestion of Lawrence Veiller and with the support of Josephine Shaw Lowell, the Charity Organization Society appointed a standing committee of its members, known as the "Tenement House Committee of the Charity Organization Society." The committee consisted of Frederick W. Holls, chairman, Felix Adler, Constant A. Andrews, Robert W. de Forest, Edward T. Devine, John Vinton Dahlgren, Ernest Flagg, Richard Watson Gilder, E. R. L. Gould, George B. Post, Jacob A. Riis, and L. N. Phelps Stokes; and Lawrence Veiller who was secretary and executive officer. Its object was to improve tenement-house conditions by securing remedial legislation in regard to new buildings, by preventing bad legislation, by having existing tenement laws enforced, by stimulating the building of model tenements, and by having old tenements altered to suit the needs of new
THE ICONOGRAPHY OF MANHATTAN ISLAND

1898 tenants. In the first six months, the committee devoted itself to the
work of framing 15 new tenement-house ordinances, which they submitted to the municipal building code commission with a statement of the reasons for them and the advantages to be gained by their enactment. These ordinances were published in a small pamphlet in June, 1899, and received widespread favourable comment, but none of them was adopted by the authorities.—De Forest & Veiller, Tenement-House Problem, I, 109-11. See 1900.

In this year, the New York Training School for Teachers was established. It was opened in September in P. S. 159—Palmer, The N. T. Pub. School, 287.

The National Arts Club is organized and incorporated. Its first club-house, at 39 W. 34th St., was opened in Oct., 1899. Later, 41 W. 34th St. was added. The club removed to its present quarters, formerly the residence of Samuel J. Tilden, at 14-15 Gramercy Park, in Aug., 1906. A studio building was constructed in 1906.—See records of the club. The object of the club was: "To give a helping hand to artists of all kinds by affording them conveniences and club comforts, a place for exhibitions, and rallying to their support the encouragement of amateurs."—Bulletin of Nat. Arts Club, Dec., 1897.

In this year, the University Settlement Society (see 1891) erected its own building on the south-east corner of Rivington and Eldridge Sts. Howells & Stokes were the architects.—Ann. Rep., Univ. Settlement Soc. (1897), 2, 50, 53-57; ibid. (1898), 53-54, 56-59, 63-66.

In this year, Hudson Park (see Aug. 12, 1895), on the site of the old St. John's Seminary of the Franciscan order, was opened. It is on the east side of Hudson St. between Leroy and Clarkson Sts.—Ann. Rep., Dept. of Parks (1898), 19. See also L. M. R. K., III: 970, and 1902.

In this year, work was begun on Hancock Square at St. Nicholas Ave. and 123d St. (see Mr 16, 1876). The improvements were finished in 1899.—Ann. Rep., Dept. of Parks. (1899). See also L. M. R. K., III: 970.

In this year, a memorial to the architect Richard Morris Hunt, consisting of a granite screen, as architectural setting, by Bruce Price, and a bronze bust and figures by Daniel C. French, was erected by the art societies of New York on Fifth Ave. opposite the Lenox Library.—Cat. of Works of Art Belonging to the City, 176.

The National Academy of Design removes from 23d St. and Fourth Ave. (see Ap 27, 1865) to its present location at 190th St. and Amsterdam Ave.—Records of the society. The 23d St. building was demolished in 1899 (q.v.).

In this year, Rand, McNally & Co. published Greater New York Illustrated. Over one hundred and fifty photographic views of the foremost city of the western hemisphere.

In this year, August Will made a wash drawing of the sky-line of Greater New York and published it with a drawing made by him showing the skyline in 1873. The two views are reproduced as Pl. 157-a, Vol. III.

"The automobile industry, which had its beginnings in the last decade of the nineteenth century [see 1890, 1894], developed at such a rapid rate as to far outstrip that of carriages and wagons, the parent industry. Before 1898 only 1,621 motor cars were manufactured in France, 894 in Germany, 623 in England, and probably 1,200 in the United States. In 1913, only fifteen years later, the number of automobiles in use was estimated at 1,161,911, of which 628,185 were in the United States, 125,728 in the United Kingdom, 89,185 in France, and 70,006 in Germany. Statistics for later years are not available except in the case of the United States, in which it is estimated that there were 3,500,000 in use in 1916, or more than three times as many as in the world only three years before. ... "The subject is continued at length in regard to the output in the U. S., and its value."—"The Evolution of the Automobile," by John J. Macfarlane, in Commercial America (F, 1917), XIII: 15: See Mr 24.

The City of New York," incorporated under that designation by the charter of May 4, 1897 (q.v.), begins its corporate existence. The first officers, elected according to the provisions of the charter on Nov. 2, 1897 (q.v.), are formally installed, with Robert A. Van Wyck as mayor.—N. T. Times, Ja 1 and 2, 1898.

Mayor Van Wyck sends his first annual message to the common council, saying in part: "The radical changes which the provisions of the new charter make in the several departments and in their modes of procedure present a problem which must be met on the part of the city officials with intelligence, caution and industry, and on the part of the public with patience and hearty co-operation. ..." "The new Charter makes no change in our mode of government more radical than in the provision under which the legislative power of the city is hereafter vested jointly in the Municipal Council and Board of Aldermen.

"The equally marked feature of the change is the important addition to the powers of the local legislature, amounting to a considerable measure of home rule. ... "In determining upon the necessity, character and expense of such public work as may be submitted for your action, you must be governed by a settled purpose based upon the promise given, that the public improvements would be fairly distributed as between the five boroughs, and that the most pressing needs of each of the localities would receive equal consideration and be supplied, as nearly as possible, with equal promptness. In all your proceedings you should take the broad and liberal view, which, appreciating that the residents of the several boroughs now make up but a single constituency, deals with the City's affairs without any regard to any former lines of civil divisions and accepts the benefits conferred upon any particular section or any particular work as an advantage secured to all. ... "There has been no popular demand, in the line of public improvements, so vigorous, so persistent and so well justifed as that which calls for a safe, speedy and comfortable mode of travel from the homes to the places of business or employment of such of our citizens as reside in the northern portion of the Borough of Manhattan in or the Borough of the Bronx. It is not alone unfortunate but also disheartening, that the petitions, protests and demands of the people for better transit facilities have been answered with nothing better than a multiplicity of plans. Certain is it that our citizens will no longer tolerate, much less excuse, delay upon delay at the cost of not alone the comfort and convenience of the people, but also the increased valuation which, in a considerable degree, would add to the public revenues if the rapidly growing districts most directly interested were furnished with greater and improved facilities of travel. ... "To my mind there can now be urged no sufficient reason for the continued employment of the locomotives now in use on the elevated roads, and the people should no longer be subjected to the resulting nuisances of noise, smoke, and flying cinders.

You should demand and insist upon the substitution, in the place of the present motive power, of electricity. ... And, again, the number of through express trains should be considerably increased, their running time improved and their use continued throughout the day and night. ... "The corporations should be compelled to continue the present [eleventh] routes to the more sparsely settled and more distant localities, even if for office time loss is entailed upon them by so doing. ... "The surface railroads likewise should be required to adopt the best-approved motive power. ... "We should be constant in our endeavor to make the metropolis as attractive and healthful as its financial condition will permit. We must make our city in every way worthy of its proud position in the first place among the municipalities in the western world. With a promptness and expenditure limited alone by prudence we should secure for our citizens good roads, improved pavements, bicycle paths, small parks and every improvement which helps in out-door recreations, and so assist in bettering the physical condition."—Proc., Bd. of Ald. (1898), I: 17-42.

The Fine Arts Federation, in accordance with a clause in the charter, submitted eighteen names yesterday, from which Mayor Van Wyck will select six, to appoint as members of the Art Commission. The list was to be made up of three painters, three sculptors, three architects, and nine men not a member of any of the professions in the fine arts. One Commissioner is to be taken from each profession and three from the list of laymen, and these six, together with the President of the Metropolitan Museum of Art, the President of the New York Public Library, the President of the Brooklyn Institute of Arts and Sciences, and the Mayor, will make up the commission. ... The list submitted to the Mayor yesterday is as follows: "Painters—John La Farge, Frederick Crowninshield, and George W. Maynard.
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876-1909

1898

"Sculptors—J. Q. A. Ward, Daniel C. French, and Herbert Adams."

5

"Architects—George B. Post, Walter Cook, and Charles F. McKim."

A translation of a letter written by Enrique Dupuy de Lome, Spanish minister at Washington, speaking disparagingly of President McKinley, is published by the Cuban Junta in New York.— N. Y. Times, F 9, 1898. De Lome was recalled, and Spain disavowed the reflection on McKinley.— Ibid., F 11, 13, and 18, 1898.

11

Mayor Vau Wyck appoints as members of the newly created municipal art commission (see Ja 5), Cha. T. Barney, Henry E. Howland, and Samuel P. Avery (laymen), John La Farge (painter), Daniel C. French (sculptor), and Cha. E. McKim (architect). The mayor, the presidents of the Metropolitan Museum of Art, of the N. Y. Art Library, and of the Brooklyn Institute of Arts and Sciences are, ex officio, members of the commission.

"The commission supersedes all like bodies and the Commissioners serve without compensation. The Board of Estimate and Apportionment must provide suitable offices for them. Under the terms of the charter (Sections 633 to 639) the members appointed must be three laymen, one architect, one artist, and one sculptor."

"The charter gives the commission extensive powers. Without its approval no work of art can become the property of the city by gift or purchase, and none can be placed upon city property. The expression "work of art" is construed by the charter to include "oil paintings, mural decorations, stained glass, statues, bas-reliefs, or other sculptures, monuments, and archives."

"At the discretion of the Mayor or the Municipal Assembly the commission may exercise like powers over designs for municipal buildings, bridges, gates, lamps, &c. to be erected on city property."— N. Y. Times, F 15, 1898. For a résumé of the commission's powers, see the analysis of the charter under May 4, 1897.

Commenting on the commission on Feb. 17, the Times said: "The Mayor has chosen a very good Art Commission, according to the requirements of the charter. Indeed, he could scarcely have chosen a bad one from the list furnished to him by the Fine Arts Federation."

"It is a pity that the powers of the commission do not extend further. Of course it is a great gain to have imbedded in the charter an acknowledgement of the aesthetic interests of the city, and of the necessity of providing some means for their protection. But the powers of the commission are limited to passing upon the merits of any work of art which it is proposed that the city shall acquire by purchase, gift, or otherwise. Obviously public buildings and erections which are primarily works of utility should be submitted to the commission as a matter of course, and the charter should be so amended as to require such a submission. Strongly of this kind it is more to the public advantage that public disfigure a city than the works of art specifically so called."

"Even such an extension of its powers would not, however, secure the fulfillment of the purpose which an art commission should serve. If its labors are confined to mere obstruction, to preventing the erection of works of art which may at least be assumed to have had their origin in patriotism or civic pride or a spirit of pious commemoration, it will fail to enlist any enthusiasm in its behalf."

The commission, as named by the Mayor, is abundantly competent to prepare a permanent plan. Each shall include in a comprehensive scheme of public improvement such details as the designation of suitable sites for public monuments, of which heretofore every one has been treated as a new question and an isolated question, and almost every one has given rise to a squabble. Such a scheme cannot be carried into effect without the co-operation of the City Government, and that co-operation should be the first object of the commission. Without it the usefulness of the commission will be slight and purely negative. With it the commission may render a positive and most important service to the city."—Ibid., F 17, 1898. Regarding the commission, see also Statutes relating to Organisation and Powers of the Art Commission (N. Y., 1902).

15

In the evening of this day, the U. S. battleship "Maine" is blown up in Havana harbor. Two officers and 251 sailors are killed.— N. Y. Times, F 16 et seq., 1898.

The board of aldermen adopts the following resolutions:

"Whereas, The entire American Nation has heard with profound grief of the deplorable destruction of the United States battleship 'Maine' in the harbor of Havana; and

"Whereas, The demolition of the magnificent war vessel has caused sadness to hundreds of homes throughout the length and breadth of the land, more particularly to those within the area of the Greater City of New York; therefore be it

"Resolved, That we, the members of the Board of Aldermen, sincerely deplore the sudden and terrible deaths which met the officers and members of the crew of the said 'Maine', and we extend to their surviving relatives our sincere sympathy in their bereavement."—Proc. of Mun. Assmb. (1898), I: 90-91; N. Y. Times, F 24, 1898.

From Feb. 24 to 26, the collection of the late Chas. A. Dana, consisting of paintings and Chinese and Persian porcelains, was sold at the Am. Art Galleries for $194,496.—A Plan, etc. op. cit.

The new art commission (see F 14) has moved into the mayor's office, and organizes by electing Cha. T. Barney president, Henry G. Marquand vice-president, and A. Augustin Healy secretary.—N. Y. Times, Mr 1, 1898.

Congress appropriates $50,000,000 for national defense.—Laws. U. S., 55th cong., 2nd sess., chap. 56. See Mr 29.

9

The board of aldermen passes the following resolutions:

"Whereas, The alterations in the City Library, conformably to legislative requirement, are now completed, and

"Whereas, These rooms are intended for specific purposes not yet so officially designated; therefore

"Resolved, That the Committee on Public Buildings, Lighting and Supplies of the Board be and it is hereby instructed to confer with the Department of Public Buildings, Lighting and Supplies, and with the City Clerk, with a view of designating the various rooms in the said City Hall for such purposes as are advisable and necessary."

"Resolved, That each room be properly numbered or renumbered, and that such furniture, fittings, etc., as may be necessary be recommended.

"Resolved, further, That, in reporting to this Board, the said Committee on Public Buildings, Lighting and Supplies present its recommendations in detail, together with appropriate provision, by resolution, for the preparation of a complete directory, for which purpose suitable space and marble slabs have been already provided."—Proc. Bd. of Ald. (1898), I: 779-50.

The legislature incorporates "The Hebrew Charities Building," the incorporators being Henry Rice, Isaac Josephi, Jacob H. Schiff, Isaac Wallach, Abraham Wolf, Isaac N. Seligman, and Morris Loeb. The objects of the corporation are "to erect, establish and maintain a building in the city and county of New York in which Hebrew benevolent institutions can have their headquarters, and to which all applicants for aid may apply; and to establish in said building a public library with a special department in music; such building to contain the general offices of The United Hebrew Charities in the City of New York and of other charitable and benevolent institutions; and to provide for the maintenance of such library and such any societies and for chari-
1898 table and benevolent work in connection therewith."—Laws of Mrst. N. Y. (1898), chap. 96.

The first sale of an American-made gasoline automobile occurred on this day, when Alexander Winton sold one-cylinder Winton car to Robert Allison, of Port Carbon, Pa. The author owned and drove the New York's first fifty of the cars delivered.

From 1898, the time of the sale of the Winton car, dates substantially the development of the automobile industry in the U. S. "Beginning with this date, the first real enthusiasm was put into the sale of cars."—Barber, Story of the Automobile, 75-76; Doolittle, Romance of the Automobile Industry, 23-24.

The legislature designates May 4, 1898, "a public holiday in honor of the first fifty of these cars delivered." It is to be known as "Charger Day."—Laws of N. Y. (1898), chap. 118.

A collection of pre-revolutionary and revolutionary broadsides relating to the city and state of New York, gathered by Gerard Bancker, the provincial treasurer of New York, is sold for the estate of the late Jan. A. Bancker, of New York, by Stan. V. Henkel, auctioneer, Philadelphia. A copy of the sales catalogue (No. 809), and its supplement containing facsimiles, is in the author's collection.

Books, manuscripts, and other parts of the collection were sold on Dec. 13, 1898, and May 4, 1899 (q.v.).

The U. S. sends a note to Spain demanding that the war on Cuba shall cease and threatening intervention if its proposals are rejected. Spain is unsatisfied with the terms, and war became inevitable.—N. Y. Times, May 28, 1898.

The "Appraisers' Warehouse" at Washington, Christopher Barrow, and Greenwich Sts. (see Mr 9, 1898), is finished and occupied.—Ann. Rep., Supervising Archt., U. S. Tress. Dept. (1898), 33. On March 4, 1899, its name was changed to "Appraisers' Stores."—Ibid. (1909), 371. Here are the offices of the board of U. S. general appraisers, America's customs administrative court, first appointed by Pres. Benj. Harrison. Regarding their duties, see "Judicial Review in Customs Taxation," by Judge Geo. E. Brown, in The Forum, Jl, 1918; King's Handbook (1993), 786-87. At one time, a storey of this building was reserved for seized, unclaimed, abandoned, and smuggled goods, but these are now (1926) kept at the "Army Base" in Brooklyn. Only merchandise samples are kept in the "Appraisers' Stores."—Letter to the author from the appraiser's office.

Pres. McKinley sends a message to Congress reviewing the Cuban situation, declaring that in the interests of humanity "the war in Cuba must stop," and asking power to intervene.—N. Y. Times, Ap 12, 1898.

In accordance with resolutions adopted by Congress, Pres. McKinley sends an ultimatum to Spain demanding the immediate evacuation of Cuba.—N. Y. Times, Ap 24, 1898.

The legislature orders that the national flag he displayed on all public school houses in the state and directs the state superintendent of schools to make provision for a salute to the flag at the opening of each school day and for the observance in the schools of Washington's Birthday, Lincoln's Birthday, Memorial Day, Flag Day, and such other legal holidays as may be designated by law.—Laws of N. Y. (1898), chap. 481.

Pres. McKinley calls for 125,000 volunteers.—N. Y. Times, Ap 25, 1898. The enrollment in New York was very vigorous.—Ibid., Ap 26, 28, 29, 30, My 1, 1898.

Congress passes a law declaring that war with Spain has existed since April 21.—N. Y. Times, Ap 26, 1898.

May

The American squadron under Commodore George Dewey destroys the Spanish fleet in Manila Bay.—N. Y. Times, My 2 st., 1898. Admiral Bradley A. Fiske said that Dewey's victory at Manila Bay destroyed the fleet of the United States in the fleet of great nations, and it put Spain into outer darkness."—Sullivan, Our Times (1896), I: 322 (footnote). See also ibid., I: 116-21.

The American National Red Cross Society is organized, at the Manhattan Hotel.—N. Y. Times, My 4, 1898. See also ibid., My 11 and 16, 1898.

The anniversary of the Greater New York charter and Dewey's victory at Manila are jointly celebrated in New York.—N. Y. Times, My 5, 1898.

Theodore Roosevelt is sworn in, at Washington, "as Lieutenant Colonel of United States Volunteers to serve with the regiment of mounted riflemen, to be made up mainly of plainmen and rough riders." [Dr. Leonard Wood was Colonel of this regiment]. . .

"Col. Roosevelt's office was crowded to overflowing about noon to-day with an assemblage of cowboys, plainmen, college students, and ex-police men of the New York force, who are among those to join the command of which Mr. Roosevelt will be Lieutenant Colonel. Most of the men were mustered in yesterday. . .

"All these will leave here tomorrow afternoon for San Antonio, Texas, where the regiment is to rendezvous."—N. Y. Times, My 7, 1898. See also ibid., Ap 26, 1898.

The official title of the regiment was the First U. S. Volunteer Cavalry, "but," as Roosevelt explains, "for some reason or other the public promptly christened us the Rough Riders." At first we fought against the use of the term, but to no purpose; and when finally the Generals of Division and Brigade began to write in formal communications about our regiment as the "Rough Riders," we adopted the term ourselves."—Roosevelt, The Rough Riders (1899). For interesting notes regarding the organization and enlistment of the regiment, see ibid. See also My 12.

A San Antonio news item reads: "Three hundred and forty cowboys from New Mexico and thirty-nine society leaders from New York are the latest acquisitions to the Roosevelt riders. Among the men from the East are Craig Wadsworth, one of the best polo players in America; Basil Ricketts, a son of the late Gen. Richard E., who has served two years' apprenticeship on a Colorado cattle ranch; Hamilton Fish, Jr., another polo player; Horace Deveraux of Colorado Springs and the Princeton football team; William Tiffany of New York, a social favorite and a leader of cowboys, who can boast of a long experience on western ranch and range; Kenneth Robinson of the Knickerbocker Club; Reginald Ronals, half back on the Yale football team, and Hollister, the Harvard sprinter.

"There will be about fifty of these college and club men in all, but their wealth and influence will secure them no special consideration in the regiment. One of them may get a Lieutenant's commission, and two or three are likely to be made non-commissioned officers, but the rest will serve as troopers on a perfect equality with the rest of the men."—N. Y. Times, My 13, 1898.

Puccini's "La Bohème" is produced for the first time in New York, at Wallack's Theatre, by a company of Italian singers.—Krehbiel, Chapters of Opera, 285.

Congress passes an act authorizing the U. S. army officers in Cuba, during the war with Spain, to issue "subsistence, medical, and quartermaster's supplies to . . . inhabitants of the Island of Cuba, who are destitute of adequate food or clothing, whom they receive the same." The act also provides that the president and the commanding officers may furnish "to the Cuban people such arms, ammunition, equipments, and military stores and supplies as they may require in order to increase their effective fighting force in the existing war against Spain."—Laws of U. S. 55th cong., 2d sess., chap. 345.

Refugees from Puerto Rico arrive at New York.—N. Y. Times, Ma 21, 1898.

Pres. McKinley issues a second call for 75,000 volunteers.—Laws of U. S. (1897-99), 1772-75.

Puccini's "Manon Lescaut" is sung for the first time in New York, at Wallack's Theatre.—Brown, III: 359; N. Y. P. Bulletin (1927), 886.

The United Constructor Richardson Hobson, with the aid of seven seamen, sinks the American collier "Merimac" across the entrance to Santiago Harbour, in an attempt to shut in the powerful Spanish fleet under Admiral Cervera.—N. Y. Times, Je 5 et seq., 1898.

See Jl 3.

The troops of the U. S. defeat the Spaniards at Las Guasimas. Sergeant Hamilton Fish, Jr., New York, of the "Rough Riders," is killed, at the very moment to profit by the troop's active service.—Roosevelt, The Rough Riders (1899), 94-95.

In this month, ten vacation schools and 24 vacation playgrounds were opened, the first in the city.—Palmer, The N. T. Pub. School, 288.

San Juan Hill and El Caney are captured by the Americans. Roosevelt's Rough Riders and the 71st Regiment of New York distinguish themselves in the assault.—N. Y. Times, Jl 2 et seq., 1898. See also Roosevelt's The Rough Riders (1899).
In this year, the corruption in New York City became almost as bad as in 1894 (p. 23), when the Lexow investigation was held, and the legislature again determined to investigate, and for this purpose sent to the city a committee, which was generally known as the "Mazet Committee." Gustavus Myers thus describes its work and the results: "This body's prestige suffered from the charge that its investigation was not impartial. Moreover, it was generally felt by the public that its work was inefficiently carried on. Nevertheless, it produced a considerable array of facts showing the existence of gross maladministration.

"It was disclosed that every member of the Tammany Society or of the organization's executive committee, held office, or was a favored contractor. Over $700,000 of city orders went to favored contractors without bidding. Various city departments were 'characterized by unparalleled ignorance and unfairness.' The payrolls in some of the most important departments had increased $1,500,000 between July 1, 1898, and September 1, 1899, and the employees had increased over 1,000, excluding policemen, firemen and teachers. The testimony proved the increasing inefficiency and decentralization of the Police and Fire Departments. It further proved the existence of a ramified system of corruption similar to that revealed by the Lexow Committee.

"The disclosures attracting the greatest public attention were those relating to the Ice Trust, the Ramapo project, and Mr. Croker's relations to the city government. On April 14 the Committee exposed a conspiracy between the Ice Trust and the Dock and other departments of the city government, to create and maintain a monopoly of New York's ice supply. Six days after the exposure, Mayor Van Wyck, as he subsequently admitted in his testimony before Judge Gaynor, acquired 5,000 shares, worth $50,000, of the Ice Trust stock, alleging that he paid $75,000 in cash for them; but although urged to substantiate this statement, did not produce proof that he actually paid anything. It was shown conclusively before the committee that the arrangement between the Ice Trust and the city officials was such as to compel the people to pay 60 cents a hundred pounds, and that the trust had stopped the sale of five-cent pieces of ice, practically cutting off the supply of the poor. Many other Tammany officials were equally involved. Proceedings were begun some time after, looking to an official investigation of the Ice Trust's affairs, and charges against Mayor Van Wyck. Two of the former, and the latter were finally dismissed by the Governor in November, 1900.

"In August, the committee uncovered the Ramapo scheme. The Ramapo Water Company, with assets of 'at least the value of $5,000,' sought to foist upon the city a contract calling for payment from the city treasury of an enormous amount in annual installments of about $511,000, in return for at least 200,000,000 gallons of water a day, at $70 per million gallons. This was proved to be an attempt toward a most gigantic swindle. Had not Controller Celere exposed and frustrated the scheme, the Tammany members of the Board of Public Improvement would have rushed the contract to passage.

"Mr. Croker's testimony threw a flood of light upon his political views and standards as well as his powers and ambitions—'boss.' He acknowledged that he had a powerful influence over the Tammany legislators at Albany, whose actions he advised, and that he exercised the same influence upon local officials. He readily conceded that he was the most powerful man he knew of.

"Mr. Croker also admitted that judicial candidates were assessed in their districts. In fact, some of the Judges themselves named the respective sum in their committee. But Croker added that he had been asked for $10,000 for his nomination for a vacant half-term in the Supreme Court. Other judicial candidates, it was understood, paid from $10,000 to $15,000 for nominations. Mr. Croker maintained that the organization was entitled to all the judicial, executive, administrative—a brief, all offices—because 'that is what the Tammany boss paid for the ticket.' Mr. Croker refused to answer many questions tending to show that he profited by a silent partnership in many companies which benefited directly or indirectly by his power. He declined to answer the
1909—question whether $140,000 of the stock of the Auto-Truck Company had been given to him without the payment of a dollar; it was his 'private affair.'

"We are giving the people pure organization government," he said. He referred to the thoroughness of discipline in the Wigmans, and stated that the only way to succeed was to keep the whip in hand over his henchmen. It took "a lot of time," and he had to work very fast at it." Tammany was built up, he said, not only upon the political principles it held, but upon the way its members sustained one another in business. "We want the whole business if we can get it;" 'to the party belong the spoils;' we win, and we expect everyone to stand by us; I am working for my pocket all the time," were some of Mr. Croker's answers, most of them told in anything but grammatical English.

"The general work of the committee's work would have been far more effective and free from charges of partizan bias, if Thomas C. Platt, the Republican 'boss,' had been summoned concerning his alleged political connection with the great corporations and financial interests, as Mr. Croker had been. "Apparent is the disclosures made no deep impression on the city administration, for matters went along pretty much as before."—In Memoriam Tammany Hall (1917), 358-59, citing the stenographic minutes of the investigation.

—The Dongan Charter (1856), the Montgomery Charter (1751), and other original New York City documents, are repaired, under the supervision of the N. Y. Public Lib., at the request of stenographer Bird S. Coler, and are deposited in the library for safe-keeping.—See Library correspondence with Bird S. Coler.

—The removal of the Croton distributing reservoir on Fifth Ave. between 40th and 42d Sts. was begun by the contractor, Eugene Lentilom, and preliminary work was started on the foundations of the N. Y. Public Library (see My 19, 1897). The removal of the reservoir was finished in 1901.—Lydenberg, Hist. of N. Y. Pub. Lib., 425 et seq.; Scientific Am., LXXXII: 1521: bronze tablet in 42d St. entrance of library; L. R. K., III: 595; another tablet that was formerly over the entrance to the old reservoir, and are now in the library (one on the wall of the south corridor on the first floor, and one in the pavement of the inner court). The cornerstone of the library was laid on Nov. 10, 1902 (q. v.).

—In 1899, the old stone block-house at the northern end of Central Park, a relic of the War of 1812, was filled with rubbish and closed to the public.—44th Ann. Rep., Am. Socn. & Hist. Pres. Soc. (1899), 10.

—In this year, the University Club moved from the Jerome residence at 26th St. and Madison Ave. (see N 22, 1883) to its present site at the north-west corner of 54th St. and Fifth Ave. The new building was designed by McKim, Mead & White and is considered the finest club-house in the world.—Alexander, Hist. of Univ. Club, 125 et seq.; L. R. K., III: 975.

—At the Academy of Design, the north-west corner of Fourth Ave. and 23d St. (see 1898), was demolished in this year.—L. R. K., III: 975. Stone from the building was used in the R. C. Church of Our Lady of Lourdes at 142d St. and Convent Ave. (see My 18, 1902). The 23d St. site is now covered by part of the Metropolitan Life Insurance Building.

—In this year, the Mail and Express published A Pictorial Description of Broadway, from the Battery to 89th St. This panorama is of special interest as showing the great changes which had taken place in the upper end of Broadway in the preceding 25 years.—See description of Pl. 147, III: 719-20 (note).

—Mayor Van Wyck, in his second annual message to the common council, says: During 1898, "A sharp halt had to be called in the extravagant use of Municipal credit which during the year 1897 had characterized the financial administration of practically all of the public corporations consolidated into the present city. The financial condition of the new City of New York in its first year of Consolidation demanded that a temporary period of recuperation be afforded before new public improvements could be begun. This period was dutifully observed by the City. Since January 1, 1898, not one dollar has been added to the net funded debt of the city on account of public improvements undertaken subsequent to that date, though in some cases it was found necessary to authorize the issue of bonds in the year 1898, to provide funds for the liquidation of liabilities incurred prior to that year, but for which no bonds had been previously authorized.

"The financial scheme of the Charter, so far as it related to making provision for the operating expenses of the city during the year 1898 was peculiar. Each municipal corporation about to become a part of Greater New York was directed to prepare a budget of its expenses for the year 1898 just as though it was to continue its separate and independent existence, unaffected by the decreed consolidation. The sum total of these budgets then became available to the Board of Estimate and Apportionment of the new City of New York to appropriations to be made by that Board for the use of the departments and offices created by the Charter. If the aggregate of these budgets were found to be insufficient to provide for the proper conduct of the city government during the year 1898, the Charter authorized the issue of special revenue bonds redeemable from the tax levy of 1899 to provide for whatever deficiency might chance to remain.

"The total of the appropriations made by the Board of Estimate and Apportionment for expenditure in 1898 was $77,559,327.7. The aggregate sum of the budgets prepared by the ninety-five municipal corporations which were consolidated fell short of this amount by $1,175,638.88, due principally to the fact (which had apparently been overlooked by the Charter Commissioners) that in many instances the fiscal year of these corporations did not correspond with the calendar year 1898, and that funds had, therefore, been provided by them only for portions of that year. This financial scheme, while it has proved workable, is open to one serious objection. By throwing the deficiencies of the consolidated budgets for 1898 into the tax levy of 1899, the Budget of the current year was also shown as a deficit created by this expedient."

"The financial situation of the city during the year 1898 has been such as to restrict public improvements within very narrow limits. The same restrictions will not, however, exist to so great an extent during the current year, and the many improvements which the public have a right to expect will receive careful consideration."—Proc. Bd. of Ald. (1899), 1: 82-96.

—Mr. Francis J. Chase, Architect, selected Oriental, porcelains, and Greek art works belonging to Thos. B. Clarke were sold at the Am. Art Galleries for $508,104.65.—A Plan, etc., op. cit.

—Congress authorizes the acquisition for the new custom-house of the Bowing Green site, selected by the secretary of the treasury (see Jt. 2, 1892) under the act of Sept. 14, 1888. The limit of cost of the building is fixed at $5,000,000.—Am. Rep., Supervising Archt., U. S. Treas. Dept., 50-52. The cost of the site was $2,244,977.—Ibid. (1906), 82. Title having been vested in the government in this year, the work of demolishing the row of dwellings (mostly converted into steamship offices) on the south side of Bowing Green commenced about Feb. 1, 1900. Cass Gilbert was appointed architect, as the result of a competition in which the leading architects of the country took part (see My 2), and the new custom-house was to be a monumental structure. Cass Gilbert wrote a letter (Dec. 8, 1901) to the author from Cass Gilbert; and Am. Rep., Supr. Arch't (1900), 55, 106. See also Harper's Weekly, XXIII: 457. Regarding the further development of the property, see 7, 1902, and 1906. See L. R. K., III: 974, and descrip. of Pl. 156-a, III: 839.

—Congress authorizes a Pan-American Exposition to be held in 1901.—Laws of U. S., 51st cong., 3d sess., chap. 420.

—It is enacted by the legislature that the board of supervisors in the county of Queens shall cease to function after this year, and that the powers now vested in that board shall be hereafter vested in the municipal assembly of the city of New York.—Laws of N. T. (1899), chap. 74.

—The Windsor Hotel, on the east side of Fifth Ave. between 46th and 47th Sts., is destroyed by fire, with the loss of about 20 lives.—N. T. World, Mr 15, 1899. See also view in Harper's Weekly, XXIII: 209.

—A house on the south-east corner of Oliver and Oak Sts., which during the Revolution was occupied by British soldiers and as a storehouse for American ammunition, and later was the residence of Gov. George Clinton, has just been demolished.—N. T. Times, Mr 15, 1899.

The "work of remodeling the ground plan of the Grand Central Station" is to be commenced immediately. "The alterations to be made will be extensive and costly. The transformation will be carried on with little obstruction to the ordinary business of the station; consequently nearly a year's time will be consumed in the work. The most important change will be the removal of the partition walls between the outgoing and incoming train sheds, mak-
ing one enormous station—the largest, it is believed, in existence.

Mar. 25 Forty-second street end of the . . . There will be separate ticket booths for the New York Central, the New Haven and Hartford, and the Harlem Railroads.

The waiting room will open upon a concourse about fifty feet broad, extending the stations from Vanderbilt to Depeve Avenues. In order to make room for this concourse about two car lengths of the tracks in the station will be removed. Passengers, after leaving the waiting room, will cross this concourse to reach departing trains, and passengers from incoming trains will be able to make their way to the streets without passing through the waiting rooms. Connected carriageways will be built on Forty-second Street and on Vanderbilt Avenue, similar to the arrangement on the Thirty-fourth Street side of the hotel Waldorf-Astoria.

"The baggage room will occupy practically the same space that is taken up now by the New York Central waiting room. It will be on a level with the street and not in the basement, as was originally planned. The two tracks nearest to the baggage room will be used exclusively for baggage cars, which will be backed into the station and filled just prior to the departure of each train. There will be a large restaurant under the waiting room. The latter room, it is asserted, will contain 1,000 more square feet than that of the big south terminal station in Boston."

—N. Y. Times, My 25, 1899.

See also ibid., Ap 17, Je 11, and Jl 12, 1899. See O 23.

The common council passes a resolution requesting Mayor Van Wyck to appoint a committee to extend a welcome to the commander, officers, and crew of the U.S. steamer "Raleigh," the first cruiser of Dewey's victorious squadron to return to New York.—Proc., Bd. of Ald. (1899), I: 816. See Ap 15.

The rapid transit commission asks the legislature to pass an act empowering it to contract for the construction and operation of an underground road by means of private capital. The bill passed the legislature, but, after a public hearing on May 3, it was vetoed by the mayor. This veto ended the plan to appeal to private capital in aid of rapid transit. Soon afterward, Mayor Van Wyck, in his public utterances, committed his administration to the building of an underground rapid transit road.—Ann. Cyclop. (1899), 560–61. See N 12.

The corner-stone of the "Second Church of Christ, Scientist, 2 Borough of Manhattan, City of New York," is laid on this Easter Sunday, at the south-west corner of Central Park West and 65th St. This church was organized in October, 1891 (q. v.), and the building was the first one of this religious denomination erected on Manhattan Island.—Information supplied by Mr. Chas. E. Heitman, Christian Science Com. on Publication of the State of N. Y. See also Arch't, of 1899, 514.

15 The U. S. cruiser "Raleigh," the vessel of Dewey's fleet to fire the first gun at Manila, arrives at New York. On April 17, she came up to the city and was welcomed by Mayor Van Wyck, who extended to Capt. Coglian and his men the freedom of the city. This reception was followed by a naval procession in which the "Raleigh" proceeded as far as Grant's tomb, and, after saluting it with 21 guns, returned to her station off the Battery.—Ann. Cyclop. (1899), 564.

19 's restaurant at 26th St. and Fifth Ave, open since 1876 (q. v.), is to be finally closed on this day.—N. Y. Times, Ap 14, 1899; L. M. R. K., III: 978. See Ap 26, 1900.

May 1 Bridge by the D. A. R. to mark the site of the first presidential mansion on the grounds of Washington, at No. 1 Cherry St, is unveiled.—N. Y. Times, My 2, 1899.

2 The following twenty leading architects are invited to submit plans for the new custom-house to be erected on Bowling Green: James B. Baker, Francis H. Kimball, Cady, Berg & Coo, Clinton & Russell, Robert W. Gibson, Israels & Harder, Babb, Cook & Willard, Cartière & Hasting, H. J. Hardenbergh, Kim, Mead & White, George B. Post, Bruce Price, Casgil, Towbridge & Livingston, George Martin Huss, and Howard, Cashwell & Morgan, of New York; Peabody & Stearns and Shepley, Rutan & Coolidge, of Boston; D. H. Burnham & Co., and Henry Ives Cobb, of Chicago. The programme of the competition was sent to the architects in June, and the competitors had until Sept. 15 to submit their designs. Cass Gilbert was the winner of the competition. —N. Y. Times, My 3, 11, Je 23, 5, 24, 25, 26, 29, O 4, 25, N 3, 4, and 18, 1899.

The Manhattan Club moves from the Stewart mansion (see Mr 1, 1890) to its present headquarters, the Jerome house at 26th St. and Madison Ave. (see 1899).—N. Y. Times, Je 7, 1913; Watsons, Hist. of the Manhattan Club, 83–85; L. M. R. K., III: 950.

Additional documents (see Mr 25, 1898) relating to Colonial New York, presented by Gerard and Evert Bancker, early surveyors of N. Y. City and State, are sold by Henkels, Phila., auctioneer, for the estate of the late Jas. A. Bancker. These include early manuscript surveys, printed broadsides, early newspapers, books, early American portraits, prints, etc. The catalogue of these items (a copy of which is in the author's collection) comprises Part V of Henkels' Cat. No. 824. The Bancker manuscripts now in the N. Y. Pub. Library were acquired at this sale. For a list of the most interesting of these, see descrip. of Pl. 46A-b, I: 358–60. The catalogue, however, pp. 201–3, lists many others, not acquired by this library. Among them are:

―Plan of the Ground as laid out to be Railed Round the King's Statue, drawn by Gerard Bancker. [No date.] Foro.

―Plan of St. George's Ferry, made the 19 Aug., 1774, by Gerard Bancker. Foro.

―Plan of the Ground in the South Ward of the City of New York, which has lately been taken in as part of the Battery. Surveyed Sept. 8, 1775, by Gerard Bancker. Foro.

The city acquires by condemnation proceedings the land bounded by Edgecombe and Bradhurst Aves., 145th and 150th Sts. This was developed as Colonial Park.—Prerogivist, Record of Real Estate. See F 28, 1894.

A mass meeting is held in Cooper Union to demand that the proposed subway be owned by the city.—N. Y. Times, My 18, 1899.

The legislature authorizes the mayor of any city of the first class in the state having a population of over 1,000,000 "to issue a license to any adult blind person, for the vending of goods or newspapers, or the playing of musical instruments, on such public thoroughfares and in such places as said license may designate." Such license is to be free and "only to a person who is a citizen of the United States, and has resided for three years consecutively in the city in which he makes application."—Laws of N. Y. (1899), chap. 631.

The Automobile Club of America is organized at the Waldorf-Astoria.—N. Y. Times, Je 8, 1899. See also ibid., Je 21, 1899. It was incorporated during this year. It made its headquarters at the Waldorf-Astoria until Nov., 1901, when it removed to 753 Fifth Ave. In 1907, the club removed to its new building in West 54th St.—Records of the club. It now occupies a club-house at 12 E. 53d St, opened in April, 1925.—N. Y. Times, Ap 26 and 29, 1925.

The bronze statue of Chester Alan Arthur, by George E. Bissell, unveiled at the northeast corner of Madison Square. Ellum Root delivers the principal address.—N. Y. Times, Je 14, 1899; Cat. of Works of Art Belonging to the City, 119–40.

Automobiles are prohibited from Central Park, because they "might frighten horses and otherwise be a disfigurement or annoyance."—N. Y. Times, Je 30, 1899. See also ibid., N 21, 1899.

The old custom-house on Wall St. (formerly the merchants' exchange) is leased by the U. S. to the National City Bank for $3,625,000.—N. Y. Times, Jl 4 and 9, 1899; Ann. Rep., Supervising Arch't (1902); 1903; see also ibid. (1892), 108 (1898), 351 (1899), 571 and L. M. R. K., III: 925. However, the custom-house remained here until 1907 (q. v. O 1), when it moved to its new quarters at the foot of Broadway, and the bank did not occupy the old building until 1907 (q. v. D 19).

Corinthus Vanderbilt died at his residence, No. 1 West 57th St.—

1899

N. T. Times, S 13, 1899.

28

A reception to Admiral Dewey is held, at an expense to the city of $150,000. It consisted of a naval review and welcome off

Tompkinsville on the 28th; a naval parade with escort up North

River on the 29th; a reception on land by the mayor, and a land

parade of U. S. navy, army, and state militia, on the 30th.—Official Souvenir Program, etc. (in N. Y. P. L.).

S 23

It was erected by the Natl. Sculpture Soc., at the suggestion of Chas. R. Lamb, architect, its 2d vice president. Thirty members of the society executed the details of the sculpture, etc., all but one being New Yorkers.—Am. Arch., LXVII: 11, 10. See illustration.

Oct.

In this month, the Boer War broke out between Great Britain and the Transvaal. Peace was finally concluded on June 1, 1902;—Hazen, Europe since 1815, 541-44. See also My 12 and D 8, 1900.

23

Electric cars begin running on the Third Ave. surface line between 66th St. and Harlem Bridge.—N. T. Times, O 23 and 24, 1899; Ann. Cyclop. (1899), 694.

"Exposition Station" of the Grand Central Station (see Mr. C. W. Remsen), commenced.—N. T. Times, O 24, 1899. See O 18, 1900.

Nov.

The first annual automobile parade takes place from the

Waldorf-Astoria through Madison Ave., Fifth Ave., St. Nicholas Ave., Morningside Parkway, and Riverside Drive to Claremont, and back. Besides automobiles, the parade included several other types of vehicles.—Ex. Post, N 4, 1899.

6

"Shelburne Holmes," a drama, is produced by Wm. Gillette, is produced for the first time.—Sullivan, Our Times (1926), I: 221.

15

The rapid transit commissioners adopt the form of a contract for building the rapid transit tunnel or subway and invite contractors to submit bids, on Jan. 15, 1900, for the construction and operation of the road. "The letter of invitation to contractors required that every proposal should be accompanied by a certified check upon a National or State Bank, payable to the order of the Comptroller, for $150,000, and that within ten days after acceptance, or within such further period as might be prescribed by the Board, the contract should be duly executed and delivered. The amount to be paid by the city for the construction was $250,000, and an additional sum not to exceed $4,750,000 for terminals, station sites, and other purposes. The construction was to be completed in onehalf, and a part of the sum due to the contractor was fixed at fifty years, with a renewal, at the option of the contractor, for twenty-five years at a rental to be agreed upon by the court, not less than the average rental for the ten preceding ten years. The rental for the fifty-year term was fixed at an amount equal to the annual interest upon the bonds issued by the city for construction and 1 per cent. additional, such 1 per cent. during the first ten years to be contingent in part upon the earnings of the road."—Interborough Rapid Transit (The Subway) in N. T. (pub. by L. R. T. Co., 1904), 18-19. Cf. Ann. Cyclop. (1899), 561. See also Bd. of Rapid Transit R. R. Com'ts, Contract for Construction and Operation of Rapid Transit R. R. with supplemental agreements to Nov. 24, 1903, 183-222. See, further, Ja 16, 1900.

12

The Marconi Wireless Telegraph Co. of America is founded, "for the purpose of exploiting Marconi patents and all other patents of the group east of 171° W. L., and the U. S. relinquishes in favour of Germany all claims to Upolu, Savaii, and other islands in Samoa west of 171° W. L.—U. S. Treaties, Conventions, etc. (1910), II: 1259-97.

Several prominent men, including Alfred G. Vanderbilt, Albert

R. Shattuck, and Harry Payne Whitney, have secured licenses from the police board to drive steam automobiles.—Ex. Post, D 6, 1899.

The centennial anniversary of the death of George Washington is commemorated in St. Paul's Chapel, the public schools, the Jewel mansion, and at Delmonico's, by various patriotic societies. Flags are displayed at half mast on the city hall and other public buildings, and minute guns are fired from Castle Williams on Governor's Island.—Ex. Post, D 4, 13, 14, 1899.

The new court-house of the appellate division of the supreme

court, at 24th St. and Madison Ave. (see Ap 16, 1866), is formally opened. James Brown Lord was the architect.—Ex. Post, D 21, 1899; L. M. R. K., III: 573. See also Harper's Weekly, XLII: 329. The exterior of the building was adorned with sculpture.—Cat. of Works of Art Belonging to the City.

Antonio Scotti makes his New York début, at the Metropolitan

Opera House, in "Don Giovanni." —Krehbiel, Chapters of Opera, 297; Brown, Ill: 476.

The city acquires by condemnation proceedings the land on

the south side of W. 66th St., between Central Pk West and Columbus Avenue. Here the armory of the First Battalion of Field Artillery was afterwards built.—Prendergast, Record of Real Estate (1914), 139.

30

"Exposition Station," at the end of this year, as to whether Jan. 1, 1900, or Jan. 1, 1901, should be considered the beginning of the twentieth century, was decided rightly in favour of 1901.—Sullivan, Our Times, I: 12. See, further, D 26, 1900.

1900

In this year, the Commonwealth of Australia was created by

the federation of the six Australian colonies, New South Wales, Queensland, Victoria, South Australia, Western Australia, and Tasmania. It was inaugurated on Jan. 1, 1901.—Hazen, Europe since 1815, 532-34.

In this year, the "Boxer Rebellion" against foreigners and

foreign ideas broke out in China, and many missionaries, their families, and Chinese converts, were massacred.—Hazen, Europe since 1815, 689-99.

In this year, antitoxin for diphtheria and the X-ray were just

coming into use.—Sullivan, Our Times (1926), I: 61.

In this year the U. S. sent Wm. H. Taft and four others as

a commission to set up civil government in the Philippines, began the work of fixing the permanent relations between Cuba and the U. S., and devised a form of civil government for Porto Rico.—Sullivan, Our Times (1926), I: 175-79.

The population of Manhattan Island is 1,895,033—11th U. S. Census Bulletin (1910).

Early in this year, the first housing exhibition held in New

York City took place, under the auspices of the tenement-house

committee of the Charity Organization Society (see 1898). It was held in the old Sherry building on Fifth Ave. and lasted for

two weeks, during which time it was visited by many thousands of people. The object was to arouse the community to a knowledge of existing tenement conditions. The exhibit consisted of models, drawings, and photographs, showing the evils of present conditions, model tenements in America and Europe, suburban tenements and working people's cottages, model lodging-houses and working men's hotels, parks, playgrounds, libraries, baths, cooking schools, etc., as well as maps and charts showing density of population, death rates, poverty and disease statistics, etc. One model, made of cardboard, showed all the tenement-houses on the block bounded by Chrystie, Forthyn, Canal, and Bayard Sts.

In connection with the exhibition, the committee held an architectual competition for the best designs of model tenements on lots of 25, 50, 75, and 100 ft., the programme for which was prepared by the present authors, the designs were submitted, and the first prize ($500 and the carrying out of the design) was awarded to R. Thomas Short, of the firm of Hard and Short.

The exhibition resulted in the appointment by Gov. Roosevelt of the "state tenement house commission" of 1900 (see Ap 4) and the passage of the tenement-house law of 1901 (q. v., Ap 12).—De Forest & Veiller, The Tenement House Problem, I: 111-16.
Mayor Van Wyck, in his annual message to the board of aldermen, gives a detailed account of the city's financial condition, the proceedings in reference to the new bridges to be constructed over the East River between Manhattan and Brooklyn and Manhattan and Queens, the bonds to be issued for various public improvements proposed by the Board, etc.

The Board of Rapid Transit Commissioners have during the year past prepared plans for the construction of an underground railroad, commencing at the City Hall Park and extending into the Borough of The Bronx, and, in conformity with the statute, have published notice calling for bids for the building and operation of the road. It is earnestly to be hoped that the outcome of the negotiations for this work will be satisfactory, and that the day is now near at hand when this much-desired public improvement will be available to the City. — Proc., Bd. of Ald. (1900), I: 12:16.

The Society for the Preservation of Scenic and Historic Places and Objects adopts a resolution recommending the purchase by the city of the Morris (or Jumel) manion, on 166 St., formerly Washington's headquarters,— 5th Ann. Rep., Am. Socn. & Hist. Pres. Soc. (1900), 22. See Je 2, 1900, and Mr 6, 1901.

The contract for the construction of the New York City Rapid Transit Tunnel, or "Subway" (see N 15, 1899), is awarded to John B. McDonald, one of the two bidders.—N. Y. World, Ja 16 and 17, 1900.

"To secure the performance of the contract by Mr. McDonald the city required him to deposit $100,000 in his cash as security for construction, to furnish a bond with surety for $7,000,000 as security for construction and equipment, and to furnish another bond of $1,000,000 as continuing security for the performance of the contract. The city in addition to this security had, under the provisions of the Rapid Transit Act, a first lien on the equipment, and it should be mentioned that at the expiration of the lease and removals (if any) the equipment is to be turned over to the city, pending an agreement or arbitration upon the question of the price to be paid by the city. The contract (which covered about 200 printed pages) was minute in detail as to the work to be done, and sweeping powers of supervision were given the city through the Chief Engineer of the Board, who by the contract was made arbiter of all questions that might arise as to the interpretation of the plans and specifications. The city had been fortunate in securing for the preparation of plans the services of Mr. William Barclay Parsons, one of the foremost engineers of the country. For years as Chief Engineer of the Board he had studied and developed the various plans and it was he who was to superintend on behalf of the city the completion of the works as accepted by the Board. The specifications had been made for the capital necessary to carry out the contract. After its acceptance, Mr. McDonald not only found little encouragement in his efforts to secure the capital, but discovered that the surety companies were unwilling to furnish the security required of him, except on terms impossible for him to fulfill."

"At this critical point, Mr. McDonald sought the assistance of Mr. August Belmont. It was left to Mr. Belmont to make the final analysis, and avert the failure which impending... Mr. Belmont looking through and beyond the intricacies of the Rapid Transit Act, and the complications of the contract, saw that he who undertook to surmount the difficulties presented by the attitude of the surety companies must solve the whole problem. It was not the ordinary question of financing a railroad contract. He saw that the responsibility for the entire rapid transit undertaking must be centered, and that a compact and effective organization must be planned, which could deal with every phase of the situation."

Mr. Belmont without delay took the matter up directly with the Board of Rapid Transit Railroad Commissioners, and presented a plan for the incorporation of a company to procure the security required for the performance of the contract, to furnish the capital necessary to carry on the work, and to assume supervision over the whole undertaking. Application was to be made to the Supreme Court to modify the requirements with respect to the sureties by striking out a provision requiring the justification of the sureties in double the amount of liabilities assumed by each and reducing the minimum amount to be taken by each surety from $500,000 to $25,000. The new corporation was to execute as surety a bond for $4,000,000, the additional amount of $1,000,000...
to be furnished by other surities. A beneficial interest in the bonds
required from the sub-contractors was to be deposited with the
city as further security for the performance of the contract. The
plan was approved by the Board of Rapid Transit Commissioners,
and pursuant to the plan, the Rapid Subway Construction
Company was organized. The Superior Court granted the applica-
tion to modify the requirements as to the justification of surities
and the contract was executed February 21, 1900. . .

"The incorporators of the Rapid Subway Construction Company
were Charles T. Barney, August Belmont, John B. McDonald, Walter G. Oakman, and William A. Read."—Inter-
boro Rapid Transit (The Subway) (pub. by J. R. T. Co.,
1904), 15-20, 31. See also Bd. of Rapid Transit R. R. Com'n,
Contract for Construction and Operation of Rapid Transit R. R. with
supplemental agreements to Nov. 24, 1903, 2-182, 225-52.

Wm. J. Gaynor criticized the contract, stating that the sum
which the city was to pay the contractor for constructing the sub-
way ($35,000,000) was far too high, and that the profit which the
city was to receive for the 50-year lease was "paltry as a return for
such a valuable property, the greatest revenue producing municipal
railroad in the world." In addition, he said: "The statute under
which our rapid transit commission's act could scarcely be better
drafted to work to the disadvantage of the community. The
fundamental wrong of it is that, while the city constructs at its own
expense, the public work when completed is not at the city's im-
mmediate disposal, but is subject to the highest charges for a period
of years. The statute permits a contract to do the work and take a
lease for 50 years, with a renewal of 25 years, to be put up bids at
the spot. That it is impossible for such a method to result
otherwise than disadvantageously to the community is manifest.
Not to mention other reasons, many would bid for the contract
to construct who know nothing of operating railroads and do not want
to invest in that business, and many would bid for a completed subway
railroad who are not contractors and have no facilities
for constructing it. For one who would bid in advance for the
combined contract to construct and operate for a term of years,
many would bid for the contract to construct only, and many others
for the lease only."—Municipal Affairs (1901), 433 et seq. See Mr
24, 1900, and Mry 6, 1902.

The Bider and Drider for Jan. 20 and Feb. 19, 1900, and Jan. 5,
1901, contained three articles with the respective titles "Reform
in Our Street Traffic Most Urgently Needed," "Suggestions for the
Management of Carriages at Entertainments," and "Rules of the
Road Revised." These, together, were published in a pamphlet,
having an introduction by Wm. Phelps Eno, dated Feb. 1, 1902,
under the general title: Suggested Rules and Reforms for the Manage-
ment of Carriages at Entertainments, designed to Mitigate Accidents and
Confound, Delay and Blackades. A copy of this pamphlet is filed in
N. Y. P. L. The suggestions contained in these articles form part of
the traffic regulations later adopted and still in force.

Feb.

21 Miss Olga Nethersole and her managers are arrested in New
York for producing "Sapho." Commenting on it, the Evening Post
said: "It is not necessary to soil the columns of this paper with a
particular account of the sickly sentimentality of Mr. Daudet's
book or the reeking compost of filth and folly that the crude and
frivolous Mr. Clyde Fitch has dug out of it, with which to mire the
stage. It is enough to say that this heavy and foul rigmarole of
lust, sap-headed sentiment, and putrid nonsense tells a vulgar,
commonplace, and tiresome story about a harlot and a fool, showing
how, in a curial way, they fascinated each other, how the fool cloue
to the harlot, and how the harlot, having bounteed the fool, runs away
with a criminal rogue just out of prison. Into details of the
relations between these cattle those commentators may enter who
have a taste for muck and who can deliver expert opinions upon it." The
Preis, however, said: "There is nothing shocking in it, and the
rush to see it may stop when this fact is discovered, but it deserves
some support for its own sake."—Sullivan, Our Times (1926),
I: 518.

N. Y. University receives a gift of $100,000 to erect a "Hall of
5 Fame for Great Americans." In October, "twenty-nine names were
chosen, of which those receiving most votes of the judges were:
George Washington, 971; Abraham Lincoln, 96; Daniel Webster,
96; Benjamin Franklin, 945; Ulysses S. Grant, 942; John Marshall,
917; and Thomas Jefferson."—Sullivan, Our Times (1926), II: 578-19.

The N. Y. Times publishes a detailed statement that the sum
of $350,000 is paid annually by the gambling-house keepers of

5000

917; and Thomas Jefferson."—Sullivan, Our Times (1926), II: 578-19.

The N. Y. Times publishes a detailed statement that the sum
of $350,000 is paid annually by the gambling-house keepers of
the city to the "gambler-house commission," which is said to be
composed of two state senators, a representative of the pool-room
proprietors, and the head of one of the city departments. According
to the account, this commission receives and passes upon applica-
tions, establishes the tariff to be paid by the applicants, and super-
vises the collections. McFarland, Meary, May 9, 1900; Myers, Hist. of
Tammany Hall (1917), 288-99. "Later, in the same month, the
Grand Jury handed down a presentment arraigning the city officials
for the way enjoyed by the criminal and vicious classes.

"Neither the Grand Jury's presentment nor the Times's detailed
statements had the slightest effect on the conduct of the city admin-
istration."—Ibid., 289.

After a long controversy, congress passes the Gold Standard Act
declaring the gold dollar to be the standard unit of value. This
"marked the death of 'free silver' in the United States."—Sullivan,
Our Times (1926), I: 519.

From March 19 to 26, the books, prints, and other art collections
of the late Augustin Daly were sold at the Am. Art Galleries for
$186,900.—A Plan, etc., op. cit.

21 At the request of the mayor, aldermen, and councilmen, the
board of estimate and apportionment appropriates $5,000 "for
celebrating by a beautiful public ceremony the beginning of the
work on the Rapid Transit Railroad."—Min., Bd. of Estimate and
Apportionment (1900), I: 25-50, 521.

Ground is broken in front of the city hall for the new tunnel or
"subway" for the construction of a continuous bronze tablet is placed
over the spot.—See invitation of Mayor Van Wyck to the ceremony
in N. Y. P. L; N. Y. Times, Mr 24 and 25, 1900; Rapid Transit
(pub. by Ch. of Commerce), 210-21. In one year the first section of
the Subway was completed, to Broadway and 135th St.—"The
Tunnel Through N. Y.," by John B. McDonald, in Munsey's Mag.,
My 1901. It was opened to the public in 1904 (q. v., O 27). See also
Nov 12, 1902.

"The Carnegie Steel Co. is incorporated at Trenton, N. J., with
the "enormous capitalization" of $160,000,000.—Sullivan,
Our Times (1926), I: 519.

Wireless messages are sent by Marconi from England across the
Channel to France.—Towers, Masters of Space, 214.

Admiral Dewey, in an interview to a World reporter, announces
his candidacy for the presidency. This caused a sensation when it
was published in the World the next morning.—Sullivan,
Our Times (1926), I: 509-11.

As a result of the tenement-house exhibition (see 1900), the legis-
lature authorizes the governor to appoint a tenement-house com-
mission "to make a careful examination into the tenement houses in
cities of the first class; their condition as to the construction, health-
fulness, and safety of the building; the sanitary conditions of the
residences; and the health, education, savings and morals of those
living in tenement houses, and all other phases of the so-called
tenement house question in these cities that may affect the public
welfare." The commissioners are to serve without salary and are
required to make a detailed report to the legislature. The sum of $10,000 is
appropriated for expenses.—Laws of N. Y. (1900), chap. 279.

On April 16, Gov. Roosevelt appointed the commission. It
organized on April 20, and Robert W. de Forest was elected chair-
man. On April 26, Lawrence Veiller was appointed secretary, and
later Edward W. Whitney was chosen counsel and Winthrop E.
Dwight associate counsel.

In the course of its investigations, the commission prepared a
history of tenement-house reform in New York from 1834 to 1900,
and a "Report of the tenement inspection and fire department
reports, and investigated the summary of laws in the leading American cities, a report on housing conditions
in 27 of the largest cities, and a report on conditions in Europe.
It consulted important city officials and obtained an expression
of their views, inspected tenements in the course of construction in
New York, investigated typical blocks of tenement-houses in
Manhattan, the Bronx, Brooklyn, Queens, Richmond, and Buffalo,
and a special examination by the fire department into the records
of the fire department to determine the causes of fires in
10 tenement-houses. Early in June, 1600 circulars containing a list of
47 questions and asking for recommendations were sent out, and
the commission thus received suggestions of great value. In October, a
hearing was held in Buffalo, and in November and December seven
hearings were held in New York, at which many persons testified.
The commission made its report to the legislature on Feb. 18,
1901, submitting the draft of a new tenement-house law for cities
THE MODERN CITY AND ISLAND: 1876–1909

Chronology:

1900
- of the first class and recommending the creation of a separate tenement-house department for the city of New York. The law was passed on April 12, 1901 (p. 9), and the tenement-house department was created under the amended New York charter (see Apr 22, 1901).

1913
- The Tenement House Commissioners, 6,682 new law tenements were erected in Manhattan, housing about 728,884 people. —Letter from the author to Walter C. Martin, tenement-house commissioner, Ap 8, 1926.

1917
- The house of representatives, by a vote of 240 to 15, adopts a resolution favoring a constitutional amendment for the election of U.S. senators by direct vote of the people, instead of through the legislatures. The senate did not concur until June 12, 1911. Thereupon the amendment was submitted to the states, was ratified by the necessary number, and election of senators by state legislatures ceased on May 11, 1913. —Sullivan, Our Times (1926), I: 521.

1923
- A new automobile road-plan in America takes place, between Springfield and Babylon, L.I., over a course of 50 miles. There were nine participants, and the race was won by A.L. Riker in a Riker electric in 2 hours, 32 minutes. —Dooneil, Romance of the Automobilists, 1923.

1924
- Workmen at the Cornell Dam at Croton, N.Y., strike for an advance from $1.25 to $1.50 a day. —Sullivan, Our Times (1926), I: 523.

1926
- Gov. Roosevelt approves an act of the legislature “to authorize the appointment of a commission to inquire into the local government of the city of New York.” The act provides for the appointment by the governor of a commission to report such legislation as it deems advisable. —Laws of N. Y. (1926), chap. 496. For the legislation that resulted, see Ap 22, 1901.

1928

1930
- The legislature authorizes the board of estimate and appropriation to appropriate $50,000 “to aid in the erection of a monument in the borough of Brooklyn, City of New York, in memory of the martyrs who perished in the prison ships in New York harbor during the war of the revolution, owing to their patriotic fidelity in the cause of the colonists. Such money to be expended by the Prisonship Martyrs Monument Association of the United States, a corporation created under the laws of the state of New York, under the direction of the governor of this state and the secretary of war of the United States.” —Laws of N. Y. (1900), chap. 617. See N 14, 1908.

1932
- The legislature passes “An Act to authorize the city of New York to pay to soldiers, sailors and marines of the United States army and navy during the late war with Spain, who were in the employ of the city or any of its departments at the time of their enlistment, the salary or per diem compensation to which they would have been entitled if they had remained in the employ of the city.” —Laws of N. Y. (1900), chap. 644.

1934
- The city begins to acquire by condemnation proceedings the title to land for the Queensboro Bridge, afterwards built from Second Ave. and 60th St., Manhattan, to Crescent and Jane Sts., Queens.—Precedent, Record of Real Estate (1914), 129. See N 15, 1900, and F 23, 1901.

1936
- The Fifth Avenue Hotel and the Madison Square Theatre are sold at auction to Wm. P. Eno for $4,255,000; as soon as their present lease expires they are to be razed and an office building erected upon the whole site. The price paid is the largest ever given for a piece of New York City real estate. Delmonico’s property at Fifth Ave. and 26th St. (see Apr 18, 1899) was disposed of at the same sale for $650,000.—N. Y. Times, Ap 27, 1900. See My 4, 1901.

1938
- The legislature incorporates the American Institute of Music in the city of New York.—Laws of N. Y. (1900), chap. 691.

1940
- As a Volkswagen of official representatives from the South African Republic and the Orange Free State, are about to arrive in the United States “for the purpose of cultivating the sympathy of the American people in the heroic struggle of the Boers against the forces of Great Britain.” (see May 16, 1899, the common council passes resolutions extending a welcome to the delegates and tendering to them “the assurance of the earnest sympathy of the people of The City of New York in their noble struggle against the aggression of the powerful Government of Great Britain.”) It also recommends the appointment of a committee of 100 citizens to welcome the delegates, resolves to confer upon them the freedom of the city, and authorises the appointment of a committee of 30, fifteen from each board, to act in cooperation with the committee of 100.—From original among “Approved Papers, Municipal Assembly, 1900,” in city clerk’s record-room.

1942
- The eight-hour day receives further official impetus by the passage of a bill by the house of representatives making this the legal number of hours on government contracts.—Sullivan, Our Times (1926), I: 523.

1943
- The “Insular Decisions” are handed down by the supreme court, making the adjustments whereby the U.S. is enabled to possess and administer dependencies.—Sullivan, Our Times (1926), I: 650.

1944

1945
- The U.S. army commission, appointed to investigate yellow fever, and composed of Drs. Walter Reed, James Carroll, Jesse W. Lazear, and Aristides Agramonte, arrives at Havana. The experiments of Reed and his colleagues proved the truth of the theory propounded by Dr. Carlos Finlay of Havana, that the disease is spread solely by the female Stegomyia mosquito. On Feb. 4, 1901, their epochal report was read before the Pan-American Medical Congress at Havana. Thereupon, Dr. Wm. C. Gorgas, chief sanitary officer in Havana, initiated a campaign to destroy this species of mosquito, and within a few months he had completely exterminated yellow fever there. In 1904, Gorgas was put in charge of the sanitation of the Panama Canal Zone, and after much controversy with officials who disagreed with him concerning the cause of the disease, he was permitted to use the methods he had developed at Havana, as a result of which 1905 saw the last case of yellow fever in Panama.

1946
- “Estimates vary as to the relative importance of the contributions of Gorgas, Reed, and Finlay. . . . It will serve if we consider the three coequal. Finlay developed the theory; Reed confirmed it; and Gorgas built his work upon it.” —Sullivan, Our Times (1926), I: 524.

1947
- Wm. K. Vanderbilt, Jr., drives his French automobile from Newport to Boston and back, 160 miles, in 3 hours, 57 minutes.—Sullivan, Our Times (1926), I: 525.

1948
- In the international athletic games at Paris, America wins 16 out of 21 contests.—Sullivan, Our Times (1926), I: 525.

1949
- King Humbert I of Italy is assassinated by Gaetano Bresci, an anarchist; his son ascends the throne as Victor Emmanuel III.—N. Y. Times, Jul 30 and 31, 1900; Hazen, Europe since 1815, 394. See Aug 12.

1950
- The ancient weathercock on the steeple of St. Paul’s is taken down. The steeple is to be painted and a new vase put up.—Eve. Post, Jul 31, 1900.

1951
- A great meeting in memory of the late King Humbert I is held at Carnegie Hall under the auspices of the Italian United Societies.—N. Y. Times, Aug 13, 1900.

1952

1953
- The Hamburg-American liner “Deutschland” completes a run from New York to Plymouth in 5 days, 11 hours, 45 minutes.—Sullivan, Our Times (1926), I: 526.

1954
- Over 5,000 Italians parade in honor of the late King Humbert, and solemnly high mass for the repose of his soul is celebrated in old St. Patrick’s Cathedral in Mott St.—N. Y. Times, Aug 24, 1900.

1955
- Galveston, Texas, is almost completely destroyed by a cyclonic hurricane. “This catastrophe led to the devising of the Commission of City Government,” which subsequently was adopted July 1, 1901.
by many cities, some adding to it the 'City Manager' plan.'— New York Times (1926), I: 526.

"At a session of the British Assn. for the Advancement of Science, at Bradford, Eng., Sir Wm. H. Preece announces that he has found it possible to convey audible speech at an "eight mile without wire." This was "a first hint of the radio."—Sullivan, Our Times (1916), I: 528.

18 The first 'direct primary' is held, in Minneapolis. It was described as "the greatest political proposition ever introduced into American politics."—Sullivan, Our Times (1926), I: 24, 65, 528.

19 The Republic Theatre, erected by Oscar Hammerstein on the north side of 42d St., just west of Seventh Ave., is opened, with James A. Herne's "Sag Harbor."—Brown, III: 621-22.

20 An Anti-Imperialist meeting is held at Cooper Union. Amon Phelps Stokes presides, and Carl Schurz makes an address—Stokes Records, III: 81; N. Y. Times, S 29, 1900.

21 "Richard Croker's circular asking for contributions [to aid in the election of Democrats in November] was sent out yesterday to all city officials who owe their places to Tammany Hall.

"While there is no request for specific sums in the circular, the officials of the departments consult generally with their superiors or some person in political power as to the amount which should be sent to Mr. Croker in compliance with the request. The sum agreed upon is usually 5 per cent. of the yearly salary of each official. Some prominent office-holders who have other sources of revenue outside of "Commission," contracts, interest on speculative, or lucrative receiverships, are expected to contribute more in proportion than the clerks and subordinate officials.

"The city officials will receive their salary checks for the month of September to-day, and in less than two days their subscriptions are expected to be in the treasury of Tammany Hall. In large departments the commissioners and deputies have quietly sent word around that all subscribers will be required to do their duty.

"The organization expects every man to make a contribution of about 5 per cent. of his salary this year.

"The usual system adopted is for some official in each department to agree to hold himself responsible for the collection and delivery of the money to the Tammany treasury. As each official pays his assessment his name is checked off the roll, and if he does not pay it is reported to him that cash is expected, and if this does not prove effectual the Wiskinicke is sent around with the 'blacklist' to make collections. Any man who refuses is booked for severe discipline or the loss of his job. Few Tammany men ever refuse.

"The amount of money which will be paid to Mr. Croker as Chairman of the Finance Committee is variously estimated by the politicians.

"An expert figured for the New York Times reporter last evening that about $10,000,000 of the yearly payrolls of the city departments were subjected to a 5 per cent. assessment. This would bring in to the Tammany treasury $500,000 from city officials alone. Large contractors are also expected to contribute liberally, and every politician who derives a revenue indirectly from the city must contribute. From these sources it was estimated that at least $500,000 more would be contributed, so that Tammany Hall would have not less than $1,000,000 to spend in the campaign. All candidates for public offices are also expected to contribute liberally."

22 "Some Things Richard Croker Has Said and Done" (pub. by City Club of N. Y., July, 1901), 14-16, citing N. Y. Times, S 29, 1900.

23 Oct. A fragment of the monument, containing the inscription, erected at the north-terminus of Alexander Hamilton by the St. Andrew's Society in 1806 (q.v., D 2, a), is presented to the N. Y. Historical Society by Mrs. John King Van Rensselaer. The monument was removed about 1820 because it was considered an incitement to deluding, and this slab was discovered in 1833 in a junkshop by Hugh Maxwell, president of the St. Andrew's Society, who purchased it and presented it to his friend James Gore King—N. Y. H. S., Donor Book, O 15, 1902; N. Y. Daily Tribune, F 9, 1901; descip. of A. Pl. 20-3, Vol. Ill. Cf. N. Y. Times, J 27 and 30, 1901.

24 Wm. Jennings Bryan, Democratic candidate for president, arrives in New York City on a tour of the state.—Eve Post, O 15 and 16, 1900. He returned on Oct. 27, and there were several demonstrations in his honor, including a great meeting at Madison Square Garden. A monograph on Amon Phelps was delivered, and Bryan, D. B. Hill, Bourke Cockran, and Sen. Wellington made addresses. —N. Y. Times, O 28-30, 1900; Stokes Records, III: 82-84.

The new union waiting-room in the Grand Central station (see Mr 25 and O 23, 1899) is opened to the public. This replaces the separate waiting-rooms formerly used by the N. Y. Central, the N. Y. & Harlem, and the N. Y., New Haven & Hartford Railroads.—N. Y. Times, O 29, 1900.

An explosion in Tarrant & Co's wholesale druggist building at Nos. 280 and 282 Greenwich St. destroys it and nine adjacent buildings and injures many people.—Eve Post, O 29 et seq., 1900.

The first automobile show in America is opened at Madison Square Garden. It is conducted by the Automobile Club of America, and there are 66 exhibits. The machines were shown in motion, on a wood stage. The show closed on Nov. 10.—Doo- little, Romance of the Automobile Industry, 164-65, 378.

"The Republicans hold a great "Sound Money Parade" in New York City.—N. Y. Times, N 4, 1900.

Wm. McKinley and Theodore Roosevelt, Republicans, are elected president and vice-president, defeating Wm. J. Bryan and Adlai E. Stevenson, candidates of the Democrats, Silver Republicans, and the People's Party.—McKen, National Conventions and Platforms, 330-81.

"Floradora" is produced for the first time in America, at the Casino Theatre. After a year's run there, it was transferred to the New York Theatre, where it continued for several months. Over 500 performances were given.—N. Y. Times, N 13, 1900; Brown, III: 506, 612.

"If each commissioner of highways is directed to remove the Dewey arch at Fifth Ave. and 24th St. (see S 28, 1899).—From original resolution among "Approved Papers, Municipal Assembly, 1900," in city clerk's record-room.

The common council passes "An Ordinance to provide for the construction of a new bridge over the East river between the boroughs of Manhattan and Queens. The bridge is to extend from about the foot of 60th St. across Blackwell's Island to Charles St., Queens.—From original among "Approved Papers, Municipal Assembly, 1900," in city clerk's record-room. See F 21, 1901.

Bishop Potter, at the direction of the "Convention of the Episcopal Church of the Diocese of New York," appeals in a long letter to Mayor Van Wyck to correct the abuses in the police department. He declares that there is a "virtual safeguard of vice" in the city because of the "base complicity of the police" with the "lowest forms of vice and crime."—N. Y. Tribune, N 17, 1900.

Commenting on Bishop Potter's letter, Gustavus Myers says: "It was the psychologic moment for such an action, and it produced immediate results. Mr. Croker paused in his preparations for his usual trip to England long enough to give orders to put down the irregularly compensated commissioners, and then carry his mandate into effect, or at least to make some satisfactory show of doing so. He went further than this, for his orders included a general ukase to the law-breakers of the city to 'go slow,' or, in other words, to observe, until further advices from headquarters, a certain degree of moderation in their infractions of law and their outrages upon decency."—Myers, Hist. of Tammany Hall (1917), 289. See also N. Y. Times, N 16-18, 1900.

The first official trial trip of an electric train in New York takes place, on the Second Ave. elevated line of the Manhattan Railway Co., when a party of invited guests is taken up the road from 67th St. for about a mile and a half.—Street Railway Journal, Vol. XVI, No. 48, p. 1194. See D 30, 1901.

At ten sales held at various times between this date and April 20, 1900, the books, portraits, and manuscripts, relating to American and English literature in the collection of Thos. J. McKee were sold at The Anderson Galleries.—Sales list, Anderson Galleries.

A building 12 or 15 storeys high is to be erected on the famous "flatiron" at Broadway, 23rd St., and Fifth Ave.—Eve Post, N 26, 1900. See also N. Y. Times, Mr 3, 1901. The building was erected in 1902 (q.v.), and was 20 storeys high.

The new immigration buildings on Ellis Island, built to replace the destroyed by fire in 1897 (q.v., Je 15), will be ready for occupancy by Dec. 15. They were designed by Boring & Tilton of New York.—N. Y. Times, D 3, 1900.

Lieut. Winston Spencer Churchill, M. P., arrives at New York to deliver a series of lectures throughout the United States and Canada on the Boer War (see O, 1899).—Eve Post, D 8, 1900. His first lecture was delivered at the Waldorf-Astoria on Dec. 12, where he was introduced by Mark Twain.—N. Y. Times, D 13, 1900.

With Gov. Roosevelt officiating, the cornerstone of the soldiers'
1900 and sailors’ monument, at Riverside Drive and 89th St., is laid, Dec., ground having been broken on September 20. The monument was designed by Charles W. and Arthur A. Stoughton and Peter E. Dulany. — N. Y. Times, S 20 and D 20, 1900; L. M. R. K., III: 964. It was unveiled on May 30, 1902 (p. 5).

22 Louise Homer makes her New York début, at the Metropolitan Opera House, in “Aida.” — Krehbiel, Chapters of Opera, 299.

26 The common council resolves to appoint a joint committee of 12 “to make all necessary arrangements for the proper celebration of the commencement of the twentieth century.” The resolution is passed with the following preamble: — Whereas, On December 31, at midnight, a century of superb accomplishments, in science and the arts of civilization, will come to an end, thus marking the completion of a cycle of time in which the human race has lifted itself to heights of strength and glory, undreamed of in preceding ages; and

“Whereas, At the moment when the Nineteenth Century will have terminated, a new century will be born whose possibilities will be greater than its magnificent inheritance; and

“Whereas, The nations of the earth will then survey with retrospective pride the miracles of science which have beautified the cities of the world, which have drawn the nations of the earth into a closer union, which have leashed the elemental forces of nature, which have weighed the sun and analyzed the constituents of the materials of matter, and which have decreased the sum of human suffering; and

“Whereas, The nations of the earth, not forgetful of the fact that the century which will then have passed has seen the advent of the steamship, the railroad, the telegraph, the telephone, the Roentgen Ray and wireless telegraphy, nevertheless turn their faces toward the dawn of the Twentieth Century with unshaken faith in the continued progress of mankind and with an unaltering belief that the wonders of the future will transcend in value all the treasures of past knowledge and attainment; and

“Whereas, The people of The City of New York are confident that the Twentieth Century will bring to our beloved country pre-eminence in the generous arts of peace and triumph in any struggle which may be thrust upon us in defence of our national rights and honor; and

“Whereas, The inventiveness of the human mind, displayed in the construction of death-dealing agencies, will, in the not distant future, make war impossible and hasten the coming of the day when international disputes will be adjusted by arbitration.” — From original resolutions among “Approved Papers, Municipal Assembly, 1900.”

29 Fritz Scheff appears for the first time in New York, at the Metropolitan Opera House in “Fidelio.” — Krehbiel, Chapters of Opera, 299.

31 In the close of the nineteenth century and the beginning of the twentieth is celebrated in City Hall Park, with fireworks, music by Sousa’s band, songs by the United German Singing Societies and the People’s Choral Union, and an address by Randolph Guggenheimer. The city hall is decorated with flags and electric lights, and has this inscription over the main entrance: “1900—welcome—1901. 20th Century.” — Ann. Cyclop. (1900), 485. 1901

— Between 1901 and 1905, the six volumes of the Ecclesiastical Records of the State of New York were published, under the supervision of Hugh Hastings, state historian. The active work of translation, arrangement, etc., was conducted by the Rev. Edward T. Corwin, who also prepared an index, which appeared in 1916.

— In this year there was published privately General Ordinances of the City of New York under the Greater New York Charter. The volume was compiled and annotated by George Whitfield Brown, Jr., of the New York Bar.

— In this year, A Landmark Hist. of N. Y., by A. Ulmann, was published.

— About this time, “the movement began that was to transform Fifth Avenue from a residential thoroughfare into a shopping street beside which the vaunted glories of London’s Bond Street and Paris’s Rue de la Paix seem dim.” — Maurice, Fifth Ave., 259.

— The cable traction system was changed in 1901 to an electrically equipped system on the Broadway, Columbus Ave. and Lexington Ave. lines of the Metropolitan Street Railway Co. The last cable was taken out May 25. — Street Railway Jour., XVI: 830; XVIII: 681.

— Hamilton Fish Park, bounded by Stanton and Houston, Pitt and Sheriff Sts. (see Je 22, 1897), is opened to the public. — Rep., Dept. of Parks (1902), 35-36; L. M. R. K., III: 970.

In this year, the Star Theatre (see Mr 26, 1883) was demolished and a business building erected on the site. — Brown, II: 343; L. M. R. K., III: 986.

This day marks the beginning of the twentieth century. — See Jan. D 31, 1899; and D 31, 1900.

— The great Texas oil boom is started by the discovery of a well at Beaumont, which spouted 200 feet into the air. It took nine days to bring it under control. Ex-Mayor Samuel M. Jones, of Toledo, who saw the well at this time, said: “It is the greatest oil well ever discovered in the United States. Its advent means that liquid fuel is to be the fuel of the twentieth century. Smoke, cinders, ashes, and soot will disappear along with war and other evidences of barbarism. During the next few years we will see locomotives passing through Coriscana using oil for fuel, and ocean-going steamers will be using it, too.” — Sullivan, Our Times (1926), I: 596.

In his annual message, Mayor Van Wyck informs the common council that the budget of 1900 was $5,769,705.41 more than that of 1899, and that the budget of 1901 is $4,351,767.57 over 1900. Increases are due largely to mandatory legislation in regard to teachers’ salaries and other school matters.

In addition, he says: “In February, 1900, the Board of Rapid Transit Commissioners awarded a contract for the building of a system of underground rapid transit, extending from the City Hall, in the Borough of Manhattan through that borough and into the Borough of The Bronx. . . . During the year 1900 therefore a system of Rapid Transit which has been long promised to the people of the city and so long looked forward to, has taken definite shape and its completion has been assured by the execution of a contract for the doing of the necessary work and by the assumption on the part of the City of an aggregate indebtedness of $36,000,000, the amount necessary to carry out and complete the proposed system according to the plans and specifications adopted by the Board of Rapid Transit Commissioners.”

“It is further gratifying to call attention to the fact that work under the proposed contract has been commenced promptly in various parts of the city, and is steadily progressing. It still remains for the City to provide such an addition to the system already adopted as will insure an adequate and complete system of underground rapid transit between the boroughs of Manhattan and The Bronx and the Borough of Brooklyn. While the demand for rapid transit may proceed from boroughs or localities in the city, the benefits to be derived from it are shared by the city as a whole. During the year 1900 the Board of Rapid Transit Railroad Commissioners have taken up and given consideration to proposed plans for this necessary extension to the Borough of Brooklyn. There is every reason to believe that the formalities required by law as prerequisite to the laying out of a route and the awarding of a contract for doing the work will be complied with during the current year.” — Proc. Bd. of Ald. (1901), I: 62-85.

Queen Victoria dies after a reign of nearly 64 years, and is succeeded by her son, the Prince of Wales, who ascends the throne as Edward VII. — Cross, Hist. of Eng. and Greater Brit. (1905), 1071-72.

Puccini’s “La Tosca” is given for the first time in New York, at the Metropolitan Opera House. — Brown, III: 483; N. Y. P. L. Bulletin (1905), 901.

The billion dollar U. S. Steel Corporation is incorporated in New Jersey. — Am. Dict. of Dates, II: 71. Its formation was officially announced on March 2 by J. P. Morgan & Co. — Ibid.

By an act of the legislature the bi-partisan board of four police commissioners of New York City is abolished, and the department is put under one commissioner to be appointed by the mayor. — Laws of N. Y. (1901), chap. 331; Ann. Cyclop. (1901), 388-89.

Secretary Root approves the plan for the construction of a bridge across the East River by way of Blackwell’s Island from the foot of 69th St. on Manhattan Island to Long Island at Ravenswood. The bridge is to be constructed on the cantilever principle, is 1150 feet wide and 5710 feet long, and is to cost $5,740,000. — Am. Cyclop. (1901), 391. A bill authorizing maps dated by the year 1905, filed in the bureau of typography, borough president’s office, as maps Nos. 4125 and 4126; also maps Nos. 141 and 221 in real estate bureau, comptroller’s office. See O, 8, 1908.
Mr 4

Wm. McKinley is re-inaugurated president; Theodore Roose-
velt is the new vice-president.—N. Y. Times, Mr 5, 1901.

6 The legislature passes a law "to permit library corporations in the
city of New York to convey their property to the New York
public library, Astor, Lenox and Tilden foundations."—Laws

20, 558. The following is a summary of the Vm.
formally political Maying.

The board of public improvements votes to purchase the Morris

12 Andrew Carnegie offers to give the city 65 branch library build-
ings, the average cost of each to be $80,000, if the city will furnish
the sites and provide for the maintenance of the libraries. On April
26, the legislature authorised the board of estimate to take advan-
tage of the offer, and Mr. Carnegie's gift was formally accepted on
July 17.—Laws of N. Y. (1901), chap. 580; N. Y. P. L. Bulletin
(1901), 85-86, 95-96; Ann. Cyclop. (1901), 389; Lydenberg, Hist.
of the N. Y. P. L. (1921).

20 News arrives in the U. S. that Brig.-Gen. Frederick Funston has
captured Emilio Aguilando, leader of the Filipino rebellion. The
news was received with "almost hysterical jubilation."—Sullivan,
Our Times (1921), II, 340.

19 Emperor William of Germany, dedicating an army barracks,
thus enjoins his troops: "You ... must be ready, day and night
... to spill your blood, if need be, for your king and his house.
... If ever ... this town should rise ... against its king in
disobedience and insubordination, then the Alexander Grena-
diers will hasten to the protection of their king, and, with their
bayonets, soon teach the insolent a good lesson. ... May valor,
loyalty, and unquestioning obedience be the virtues which distin-
guish this regiment. Its deeds will then meet with the approval of
me, its king and master. ... Devotion to king and fatherland
must be scaled with blood and life. ... We shall always be the
victors. ... For there is a mighty Ally, that is the eternal God in
Heaven.

The speech was widely criticised as tending to incite revolt.—Sullivan,
Our Times (1921), II, 557.

A number of anti-Tammany organizations meet at the Waldorf-
Astoria to "formulate a plan of action for the coming Mayoralty
election." A "Committee of Sixty" is appointed to manage the
campaign.—N. Y. Times, F 9 and Mr 30, 1901. On April 18, the
anti-Tammany Democrats held a mass meeting at Carnegie Hall
and nominated Hon. John J. Pershing to aid in the fight against
Richard Colker.—Ibid., Ap 15 and 19, 1901. The Citizens' Union
also joined in the movement.—Ibid., Ap 23, 26, and 30, 1901.
These organizations united in the nomination of Seth Low for
mayor, and he was elected on Nov. 5 (q.v.). See also My 10.

A law in relation to tenement-houses in the city of the first class,
drafted by the tenement-house commission of 1900 (q. v., Ap 43), is
passed by the legislature.—Laws of N. Y. (1901), chap. 334. Af.
This law was amended on April 25 so as to include in the class of existing
tenements those whose plans were filed on or before April 10 and
whose excavations shall be begun before June 1.—Ibid. (1901),
chap. 555.

The corner-stone of the new hall of records is laid on the plot
bounded by Chambers, Centre, Elin, and Reade Sts. John R.
Thompson.—N. Y. Times, Apr 18, 1901; Ann. Cyclop. (1901); 595; L. M. R. K., III: 574. See O 10, 1902.

The Greater New York charter is amended in several important
respects. The bicameral municipal assembly is changed to a single
board of aldermen; the terms of mayor, comptroller, and borough
presidents are reduced from four years to two, and the mayor is
made eligible for re-election; the mayor's power of removal, hereto-
to exercised in the borough presidents for months after entry to office, is now unlimited; the "Board of Public Improvements" is abolished and its powers
transferred in most part to the presidents of the boroughs; the last
named officials are added to the membership of the board of esti-
mate and apportionment, which now will be composed of elective
officials only, the corporation counsel and the president of the de-
dpartment of taxes and assessors no longer being members; the
powers of the borough presidents are further increased in that a
board of buildings in each borough displaces the present centralized
department of buildings, also in that the departments of sewers
and highways are abolished and that work transferred to the
boroughs, also in that the powers of the commissioner of public
buildings, lighting, and supplies, so far as they relate to public build-
ings, are transferred to the borough heads; the commissioner of
water supply now has his headquarters transferred to the greater
water, gas, and electricity; local improvement boards are given more
power, inasmuch as approval by the borough president and by the board
of estimate and apportionment is all that is requisite to the begin-
ing of proceedings for local improvements; there is a time limit of
six weeks within which action on bond issues and grants of franchises
must be taken by the board of aldermen; a tenement-house depart-
ment is created; single heads instead of commissions are to admin-
der departments in the future.—Laws of N. Y. (1901), chap. 466;

The Outlook editor deems most of these changes important and
desirable. Concerning the amendment first named he says: "It
appears quite clear that the reasons for two chambers in State
and Nation do not apply in a city where the legislature is rather
a business than a political body." The amendment last named is
spoken of as meeting with "almost universal favor." The amend-
ment open to most question he declares to be that reducing the
length of terms.—Outlook, Ap 13, 1901, 440-41.

Full-grown trees from Westchester County are transported to
the grounds of Andrew Carnegie's new residence, occupying the
block front on Fifth Ave., between 97th and 91st Sts. The house
was built from designs of Charles F. McKim, and Willard.—N. Y. Times,
Apr 28, 1901; L. M. R. K., III: 948.

The Pan-American Exposition at Buffalo is formally opened.
—N. Y. Times, My 2, 1901. It closed on Nov. 2.—Ibid., N 3, 1901.

The work of tearing down the old Stock Exchange building on
Broad St. (first occupied by the exchange in 1865, q. v., D 9) is
begun to make room for the new edifice designed by Geo. B. Post.
The business of the exchange is transferred temporarily to the
 Produce Exchange on Beaver St.—"The New Stock Exchange,"
by John Rodemeyer, in N. Y. Stock Exchange, Vol. I. See also
corner-stone of the new exchange was laid on Sept. 6 (q.v.), and
the building was first occupied on April 22, 1903 (q.v.).

Soon after this date, the old Delmonico building at 26th St.
and Fifth Ave. (see Ap 26, 1900) became the Café Martin.—N. Y.

The Northern Pacific panic occurs on the N. Y. Stock Exchange,
in which the price of shares rise from $120 to over $1000. "It was
the climax of a dramatic battle in which Edward H. Harriman
fought against James J. Hill and J. Pierpont Morgan for control
of the road."—Sullivan, Our Times (1921), II, 557.

The Greater New York Democracy (anti-Tammany Demo-
crats) organizes at the Hoffman House and pledges itself to work for
the following objects:

"To establish a clean and business-like City Government.

"To secure to all Democrats a voice in the nomination of can-
didates for public office.

"To destroy the 'one-man' power, under which our great city
has been degraded, most of our public officials debarred, and all
of our taxpayers overburdened by the reckless squandering of the
public monies.

"To abolish the practice now in vogue in nearly all public de-
partments of exacting unlawful tribute from citizens transacting
business with them, and of utilizing the powers vested in the head
departments in furthering and influencing private and personal
terest to the detriment of the public interest.

"To utterly root out, and wipe out, the vile partnership
between those in control of our City Government and the criminal
clases.

"To discontinue the cruel practice of heads of city departments
who, while maintaining and even increasing the compensation of
high salaried subordinates, have the audacity to cut the city laborers
by half time, thus allowing them only 50 per cent of their com-
paratively scanty wages.

"To rescue the Democracy from the dishonest Tammany Hall
has brought upon it, by forming a permanent Democratic organiza-
ition, broad and liberal in its policy, which will truly represent
the sentiment of all honest Democrats of this city."—N. Y. Times,
My 11, 1901.

The city acquires by condemnation proceedings the land at
12th Ave. and W. 53d St. Here De Witt Clinton Park was de-
The corner-stone of the present Mt. Sinai Hospital at 100th and 101st Sts., on Fifth Ave., is laid.—*N. Y. Times*, May 22 and 23, 1901; tablet in entrance of building. The new hospital was dedicated on June 11, 1901.—*N. Y. Times*, June 11, 1901.

July

Mr. Rockefeller has placed at the disposal of a body of prominent medical men $200,000 to be available for immediate expenditure by an association incorporated under the name of 'The Rockefeller Institute for Medical Research.' The home of this institute, with such laboratories, staff, and equipment as may be found necessary, will be located in this city...—*N. Y. Times*, July 15, 1901.

At the end of the first year, Mr. Rockefeller promised the additional sum of one million dollars toward the building of a laboratory and the support of the work for the next nine years. From 1901 to 1904 the funds of the Institute were applied only in the form of grants to support the work of investigators in different parts of the world. In 1904, anticipating the completion of its own laboratory, the Institute leased a small building, formerly a part of the Nursery and Child's Hospital, at No. 127 East Fifty-second Street, and gave it a simple equipment for research in pathology, physiology, and chemistry. Here the first investigations conducted by the Institute were begun, under the direction of Dr. Simon Flexner...—*Rockefeller Inst. for Med. Research. Hist. Organization and Equipment* (1911), 5-7. In 1906 (q. v., May 11), the Institute opened its own buildings along the East River from 65th to 67th St.

The Columbia University Club is organized by about 200 alumni; it was incorporated in the following month.—*Hist. of Columbia Univ., 1845-85*. The club at first occupied a room at the Royal York Hotel, 47th St., but soon leased the building at 41 W. 36th St.—*Columbia Alumni News*, F 15, 1918; L. M. R. K., III: 937. In 1903 (q. v., Oct.), it moved to Madison Sq.

The stallion 'Creecus' makes a trotting record of 2:03 2/4 at Columbus, Ohio.—*Sullivan, Our Times* (1926), I: §60.

On this date and on June 6, 1902, the city acquired by condemnation the land at 60-78 Lexington Ave. (west side, between 20th and 21st Sts.), where the armory of the 66th Regiment was afterwards built.—*Prendergast, Record of Real Estate* (1914), 139.

The building of the American Geographical Society, at 15 West 81st St., designed by Howells and Stokes, is opened. This society, which was organized in 1872, with Geo. Bancroft as president, was incorporated April 13, 1874; and its first home, at 11 W. 29th St., was opened Nov. 28, 1876. Its present building at Broadway and 156th St. was occupied May 1, 1911.—Minutes of the council meetings of the society; *Statement of the Object and Organization of the Am. Geog. Soc.* (1877); *Bulletin of the Soc.* (1905), XXVIII: 22.

The largest ship in the world at this time was the newly-built "Celtic." It was 700 ft. long and had a tonnage of 37,700.—*Sullivan, Our Times* (1926), I: §52.

The corner-stone of the present Stock Exchange (see May 1), is laid.—*N. Y. Times*, S 19, 1901. See Ap 22, 1902.

The common council passes resolutions denouncing the shooting of Pres. McKinley and expressing hope of his recovery.—*N. Y. Times*, S 11, 1901.

Vice-Pres. Roosevelt is sworn in as president, and immediately issues a proclamation appointing Sept. 19, the day of McKinley's funeral, as a day of mourning and prayer.—*N. Y. Times*, S 15, 1901.

The City Club of New York issues a pamphlet entitled *Ten Months of Tammany*. "What are you going to do about it?" Where there is so much smoke is there no fire? It gives details of the inefficiency and corruption of the Tammany officials, the alliance between vice and crime and the police, the extravagance under the Tammany régime, etc. It contains the following preface: "This record of ten months of Tammany rule from the 1st of December, 1900, is enough. No sane man can read this record and fail to see that the Tammany administration is extravagant, careless of the welfare of the people, and corrupt. This pamphlet is not presented as legal proof; but the plain facts stated in it, after all allowance has been made for possible errors, cannot be made square with any other explanation than that the Tammany administration is all that its enemies say."

"Again and again Police Commissioner Murphy declares that gambling and open violations of law shall be stopped, and nothing happens.

"Again and again he assures us that gambling and pool-selling have been stopped, and hard on the heels of his assurances countless gambling-houses and pool-rooms are found in full operation.

"Again and again he bravely declares that he, and only he, will be the head of the police department, and openly turns over his most important powers to York and Deveny.

"And what of Deveny. Read about him. He is the last and best representative of Tammany. If you can stomach Deveny, your wholeblood is far gone, and your sense of humor is finished.

"We have a mayor to run the city, and keep things straight. What has he said about all these scandals, in his administration? Very little, except to say that Deveny was the best chief of police that New York ever had. What has he done about them? Nothing. He appointed the men who make the scandals. He is responsible in law and in fact for the conduct of city affairs. And he does nothing.

"The conditions are blacker than under Tweed. He and his gang stole directly from the city. Croker and his gang know a better trick than that. Pay-rolls are increased in length and in amount; policemen pay for appointment, for promotion, and for transfer; corporations, ice-companies, guarantee companies, in which the Tammany wharf is interested, are at the city's business and favors from the city departments; other corporations, using the streets or the wharves, pay for peace and privileges; violators of law, practically helpless in the hands of the police, pay for peace and privileges; merchants, from the peanut-seller to the largest wholesaler, pay for peace and privileges. We all pay for peace and privileges, because we want to be let alone in the only pursuit that is worth the making of money. And so we become slaves to those who rob us.

"You don't even dare to speak sharply to a policeman when he deserves it. Much less would you risk the loss of money by standing on your rights as an American citizen with the building department or the health department. Perhaps your fathers fought in the Revolution, but you have not the courage of the few brave Irishmen in the police force and the street cleaning department, who, risking the loss of place, and perhaps danger to life and limb, have dared to speak out.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1901

The instances given in the following pages are only a few of those arising in the time covered. They rest on no man's opinion.

They are facts. Are they not enough to convince the patriotism and the manhood of this town that Tammany must go?—From copy of pamphlet in N. Y. P. L.

The construction of the Manhattan Bridge, which extends across the East River from the Bowery at Canal St., Manhattan, to Nassau and Bridge Sts., Brooklyn, is begun.—Report, Dept. of Bridges (1912), 269. Gustav Lindenthal was the engineer and Henry F. Hornbostel the architect.—L. M. R. K., III: 926, which, however, erroneously states that the bridge was begun in 1905.

Santos-Dumont flies in a dirigible airship from St. Cloud, around the Eiffel Tower, and back, in 30 minutes.—Sullivan, Our Times (1926), I: 592.

Yale University celebrates the 200th anniversary of the founding of the college.—The record of the celebration (1902).

Nov.

Seth Low, supported by the Republicans, the Citizens' Union, and the Greater New York Democracy (see My 10), is elected mayor over the Democratic candidate, Edward M. Shepard. The entire "fusion" ticket is successful in the boroughs of Manhattan, Brooklyn, and Richmond, although in Queens and The Bronx a part of their ticket chooses the Democratic candidate, William E. Brown, as their president.—N. Y. Times, N 6 7, 1901; Ann. Cyclop. (1901), 395.

The scandals of Mayor Van Wyck's administration were conspicuous issues of the campaign of 1901. But there were two particularly noteworthy features pressed by the reformers in their indictment of Tammany. One of these issues, which made so deep an impression upon the public mind, especially in the densely populated part of New York City, was the blatant immorality under which young girls of the tenderest age were often decaying into lives of shame. The question thus presented was neither that of the "suppression of vice" nor that of how people could be made virtuous by mandate of law. The question, as put to voters, was whether a system under which a corrupt, money-making combination of vicious lawbreakers with police and other officials should be allowed to continue unchecked.

"Nominated for District Attorney of New York County by the anti-Tammany forces, Mr. [William Travers] Jerome's speeches on these existing conditions made a keen impression and excited the deepest feeling, especially among the people of the East Side. Intimate questions of taxation and arrays of figures proving an exorbitant budget and the waste of public funds could not make the same appeal to their indignation as the portrayal of conditions menacing their home life and polluting their environment. The facts thus spread forth caused the most intense resentment against Tammany. . . ."

Another important issue of the municipal campaign of 1901 was the scandal growing out of the charges that William C. Whitney, Thomas F. Ryan, W. L. Ellms, P. A. B. Widener, Thomas Dolan and others had derived the stock certificates of the Metropolitan Street Railway Company of New York City of tens of millions of dollars. Whitney and Ryan were credited with being among the chief financial powers long controlling 'Boss' Croker; and by means of his control of Tammany Hall, and in turn New York City, securing franchises, privileges and rights of enormous value. This control was often equally true of the New York State legislature; subsequent developments, in fact, demonstrated that in years, in which the Legislature was dominantly Republican and therefore could not be ordered by Mr. Croker, both Republican and Democratic legislators were corrupted by the Metropolitan Street Railway Company, or by agents acting for it.

"Mr. Jerome made proude public promises that if he were elected District Attorney he would press investigation. . . ."

"Mr. Jerome's denunciations and promises aroused great enthusiasm and large expectations; they had much effect in contributing to the result of the campaign, for it was popularly realized that while Tammany leaders accumulated their millions of dollars, yet back of these leaders, and secretly operating through them, were magnets of great financial power with their tens or hundreds of millions of dollars acquired largely by means of financial and industrial power over corporations which were the instruments of the various kinds. The electorate well knew that comparatively small grafters were numerous, but now it had the promise that the large spoliators, hitherto immune, would be exposed and prosecuted, if possible."—Myers, Hist. of Tammany Hall (1917), 290-95, and authorities there cited.

The cornerstone of the new building for the Chamber of Commerce (see Je, 1885) is laid, on the site on Liberty St. between Nassau St. and Broadway.—N. Y. Times, N 9, 1901; Ann. Cyclop. (1901), 395. See N 11, 1902.

A white marble monument is erected on Fort Washington Ave. at 183rd St., to mark the site of Fort Washington. It is the gift of James Gordon Bennett of the Empire State Society of the Sons of the American Revolution. Aazhar H. Sawyer delivers the address.—7th Ann. Rep., Am. Soc. & Hist. of So. (1902), 19-20, 85-102; Cat. of Works of Art Belonging to the City, 195.

In 1902, the society published an octavo volume entitled Fort Washington. An account of the identification of the site . . . the erection and dedication of a monument . . . New, 16, 1901 . . . with a history of the defence and reduction of Mount Washington, by Reginald Pelham Bolton. Part III of this work is a chapter by Edw. Hagan on "Fort Washington and its related Fortifications." Bolton's contribution forms Part IV, and is in 15 chapters.

The Hay-Pauncefote treaty regarding the neutrality of the Panama Canal is signed at Washington. Ratifications were exchanged on Feb. 21, 1902, and the treaty was proclaimed on Feb. 22.—U. S. Treaties, Conventions, and International Acts (Washington, 1910), I: 782-84.

A monument in honour of Robert Fulton is unveiled in Trinity Churchyard on the site of his grave.—N. Y. Times, D 6, 1901.

The first transatlantic wireless signal, the letter "S," is received from England by Marconi at St. Johns, N. F.—Gibson & Cole, Wireless of To-day, 93-96; Sewall, Wireless Telegraphy, 18-20.

The first of the 37 strands for the first of the four cables for the new bridge across East River, Manhattan, was laid on March 19, 1901. . . .

The Broadway Tabernacle on the north-east corner of Broadway and 54th St. has been completed and dedicated.—N. Y. Times, D 19, 1901. On Dec. 30, the trustees purchased a site for a new church edifice at the n. e. cor. of Broadway and 60th St.—Ibid., D 31, 1901. See My 2, 1902.

The first train of the new third-rail electrical system, inaugurated by the Second Ave. elevated branch of the Manhattan Railway Co. (see N 22, 1900), is run over the line from South Ferry to 129th St.—N. Y. Times, D 31, 1901.

1902

In this year, the first conversation by long-distance underground cable was transmitted, from New York to Newark, a distance of 10 miles.—Ann. Rep., Am. Tel. & Tel. Co. (1914).

In this year, the General Education Board was founded by a contribution from Mrs. Potter Palmer, and the Metropolitan Life Insurance Co. of New York. It was chartered by congress in 1903, its object being defined as "the promotion of education within the United States of America without distinction of race, sex, or creed." In 1905, Mr. Rockefeller gave $10,000,000 as a permanent endowment; in 1907, he added a further sum of $52,000,000, and, in 1909, another $10,000,000.—Ayers, Seven Great Foundations, 41-50; N. Y. Herald, F 8, 1907.

In this year, New York State published the Calendar of Council Minutes, covering the executive minutes of the New York colonial council from 1668 to 1783. It was prepared by Berthold Fernow.

In this year, New Amsterdam and Its People, by J. H. Innes, was published.

In this year, The Battle with the Slums, by Jacob A. Riis, was published.

In this year, Manhattan had 40 improved parks and public squares, with names, covering 1,413,853 acres; six unimproved parks, with names, covering 16,473 acres; four improved unnamed public places or parks, covering 0.229 acres; seven unimproved unnamed parks, covering 27,713 acres; and two parks then in process of condemnation, covering 5,921 acres, making a total of 1,415,209 acres. Besides these there were 15 parkways, streets, driveways, plazas, etc. in Manhattan, under the jurisdiction of the department of parks.—Ann. Rep., Dept. of Parks (1902), 63-67.

During this year, the viaduct over West 96th St. on Riverside Drive was completed; the buildings were removed from the site of De Witt Clinton Park (52d to 54th St., Eleventh Ave. and the Hudson—see My 13, 1901); Win. H. Seward Park (bounded by
To the
Rector, Church Wardens and Vestrymen of Trinity Church

Gentlemen:
The recent announcement of the history that on
February 28, next, the work at St. John's Chapel, Varick Street,
will be abandoned, and the natural inference which follows,
that the church building will be demolished, comes as a
surprise and shock to the community, saddening
the hearts of those who reverence the ancient monuments
of our city, and believe in the uplifting power of venerable
traditions and accumulated efforts, and the refining and enrich-
ing influence of dignified and beautiful architecture.

Since this action was taken, many questions have been publicly raised as to the adequacy of the reasons for a step of
such grave importance, affecting, more deeply perhaps
than had been realized, the feelings of the community and the
civic pride in a building which by common consent, ranks
second only to St. Paul's Chapel, among the very few remaining
monuments of our past. These questions will, we doubt
not, receive your further thoughtful consideration.

In our country there exists no public tribunal charged with the care of our national monuments, and
upon you, therefore, as sole trustees, devolves, in this case,
a double responsibility, a responsibility which we believe
you fully appreciate and will wisely discharge.

PETITION TO TRINITY VESTRY ASKING THAT ST. JOHN'S CHAPEL, VARICK ST., BE SPARED.

SEE NOV. 22, 1908 (PP. 2071-72).
The work of deepening and widening the Ambrose Channel and the channels between Sandy Hook and Staten Island was continued during the year.—Ann. Rep., Dept. of Commerce and Labor (1902), 247.

In this year, the "Flattoon" (or Fuller) building at Broadway and 23d St. (see N. 26, 1900) was built from designs by D. H. Burnham & Co. It is 20 stories high.—Engineering Rec., Vol. 45, No. 15, p. 296; Fuller Building, New York (1902). See L. M. R. K., III: 967, and descrip. of Pl. 168, III: 874.

In this year, the Blair building, designed by Carrère & Hastings, was erected at the n. e. cor. of Broad St. and Exchange Place.

—Descrip. of Pl. 159-b, Vol. III.

In this year, the United States Hotel, at the s. e. cor. of Fulton and Pearl Sts. (formerly Hill's Hotel or "Holt's Foley"—see Ma 3, 1873) was demolished, and a new building was begun on the site. This was completed early in 1903, and became known as No. 38 Fulton St.—L. M. R. K., III: 981; Abstracts of Wills, VI: 206. See also Weitenkampf, The Enco collection (1925), item 144.

In this month, the Carnegie Institution of Washington was founded by Andrew Carnegie with an endowment of $10,000,000 in certificates yielding 5% annually. In addition to this Mr. Carnegie increased the endowment by a further gift of $2,000,000, and in 1911 he gave an additional $10,000,000. Its object, as stated in the articles of incorporation, was "to encourage in the broadest and most liberal manner investigation, research, and discovery, and the application of knowledge to the improvement of mankind."—Ayres, Seven Great Foundations, 11-17.

Mayor Seth Low sends his first message to the board of aldermen, saying: "I welcome you to your honorable duties as the legislative body of The City of New York. The interests with which you are called upon to deal are worthy of the best services of any body of men. I congratulate you that it is your privilege to assume these duties at a time when the eyes of the city and of the whole United States are centered upon you. I beg to assure you of my hearty co-operation in all your efforts to serve the city well. . . . At the present time it is not possible for me to discuss the affairs of the City in a way to be of value; but, at your first meeting in February, I shall hope to send you a message dealing with such matters as may then call for decision.

At this moment I wish, especially, to say a word through you to the people. It is within recent years a system has gradually been developed, in connection with the administration of the City, that calls for the illegitimate payment of money at every turn. To the historic phrase 'black-mail,' which originated when robber barons openly demanded money as the price of letting people alone, have been added, as words of similar evil omens the new and expressive terms 'shake-down' and 'rake-off.' Against such an iniquitous system, in all its forms, this administration is at open war, and I bespeak the co-operation of the people of the city to bring it to an end.

"If during the next two years any citizen or any employee of the City pays money illegitimately, either to avoid injury or inconvenience, or to secure his rights, he will do it because he wants to, and not because he must. No one, from the largest corporation to the poorest citizen, need pay one dime protection from harm, or to secure just treatment at the hands of the City government. No laborer, or other employee, need part with one cent of his salary to any one, either in or out of the City government. The whole force of the Administration will be exerted, continuously, aggressively, and in every possible way, to prevent and to punish this sort of iniquity. Any one asked to make an improper payment for any reason, is to report the fact to the Mayor to be sure of protection and redress. Persons having business relations with the City, who meet with unreasonable delay in any department, are asked to report to the Mayor without hesitation. By itself, and without the aid of the people and of the City employees, the Administration can do little more than make this offer. With the co-operation of the people and of the City employees, the whole foul system can be broken up.

"It is only those who despair of securing good government in the United States who will believe that the practices I have alluded to can endure. It is only the enemies of democracy who believe that these things are inevitable. I ask for the co-operation of the people and of the employees of the City in destroying this iniquitous system, for the city's and for democracy's sake."—Proc., Bd. of Ald. (1902), I: 12-13.

The announcement is made that Richard Croker has selected Lewis Nixon as his successor as leader of Tammany Hall. "When the educated Mr. Nixon assumed what he styled the leadership of Tammany Hall, not only seasoned politicians of all grades but also the sophisticated smiled skeptically. Tammany district leaders maintained in public an air of profound gravity and obedient acquiescence which caused general amusement. And when Mr. Nixon solemnly discussed his plans for the improvement of Tammany Hall, he was popularly regarded as an innocent. Even when Mr. Croker, as an apparent token of good faith, made Mr. Nixon chairman of the Tammany Finance Committee, few considered his appointment seriously; he was generally dubbed 'the phantom leader'. Having attended to Mr. Nixon's installation, Mr. Croker sailed abroad to his estate at Wantage; to all nominal appearances he had severed himself from Tammany politics. 'This comedy lasted but a few months' "(see My 14).—Myers, Hist. of Tammany Hall (1917), 295-96.

The board of aldermen resolves "That the two rooms [Nos. 8 and 9] on the main floor of the City Hall heretofore and recently occupied by the Clerk of the Board of Aldermen he and the same building set aside and assigned to the use of his Honor the Mayor and the Clerks and Attaches of the Board of Estimate and Apportion, the westerly room to be for use by the former and the one next adjoining easterly thereto to be for use by the latter."—Proc., Bd. of Ald. (1902), I: 202.

The Woman's Hospital has purchased, for $250,000, 24 lots in West 19th and 110th Sts., just south of the Cathedral of St. John the Divine, as the site for a new building. The present property of the hospital, at 49th and 50th Sts., Lexington and Park Aves., is to be sold to the N. Y. Central for $450,000.—N. Y. Herald, F 11, 1902. The new hospital was opened on Dec. 5, 1906.—N. Y. Daily Tribune, D 6, 1906; L. M. R. K., III: 956.

The 71st Regiment armory, at 34th St. and Park Ave. (see 1892), is completely destroyed by fire; the Park Avenue Hotel opposite is partially destroyed, and 18 people are killed.—N. Y. Herald, F 22 and 23, 1902. The armory was rebuilt in 1904 (q.v., Ap 30).

Prince Henry of Prussia, lieutenant of the Kaiser, arrives at New York on the "Kronprinz Wilhelm" on a visit to the United States. He is saluted by the harbour fouts and welcomed by Mayor Low, the German ambassador, military and naval officials, and crowds of citizens. After visiting the Navy Yard and Governor's Island, he was entertained by the Deutscher Verein, and then went by train to Washington to call on Pres. Roosevelt.—N. Y. Herald, F 24, 1902. The city's official reception took place on Feb. 25 (q.v.).

Mayor Low formally receives Prince Henry of Prussia at the city hall and confers upon him the freedom of the city. In the evening, the prince was entertained at dinner by the mayor at the Metropolitan Club; and later he attended a gala performance at the Metropolitan Opera House.—N. Y. Herald, F 26, 1902. On Feb. 26, he lunched at Sherry's with 100 "Captains of Industry" from all over the country, reviewed a parade of 6,000 German-Americans, and met 1,000 representatives of the Sinking Funds at a banquet given in his honour at the Waldorf-Astoria. He then left for Washington to begin his tour through the country.—Ibid., F 27, 1902.

Mayor Low sends a message to the board of aldermen in which he gives an account of the financial condition of the city and calls to their attention other matters of importance. He says in part:In four years the amount of the Sinking Funds, in connection with taxation, has offset approximately $60,000,000 of long-term bonds actually issued. Of this sum $35,000,000 represents permanent debt redeemed, and the remainder appears in the increase of the Sinking Funds. As a matter of fact, the Sinking Funds grow at the rate of $15,000,000 a year, and the rate of growth is constantly accelerating. The Sinking Funds have in turn kept down the net debt, and permit the issue of additional bonds for public improvements, but the burden of taxation for installments of permanent debt and on account of interest grows apace with
THE ICONOGRAPHY OF MANHATTAN ISLAND

1902

---

1872. In scarcely any year up to the present time, the annual rate of increase of the gross debt . . . In scarcely any year up to 1902 does the amount of bonds falling due appreciably exceed even the present annual accumulation of the Sinking Funds, and this rate of accumulation is constantly growing. In other words, in fifty years, the time for which the longest city bonds are made to run, even at the present annual rate of increase, the increase of the Sinking Funds would redeem $750,000,000 of debt, without regard to the capital of the Sinking Funds; whereas, at the present time, the gross funded debt of the city is only $416,000,000, and the net permanent funded debt a little less than $206,000,000. It is evident that here is something that calls for the most careful study . . . the taxpayers of the present generation are entitled to some relief from this partially unnecessary burden, which is already so needlessly heavy, and which, unfortunately, grows heavier year by year.

In the course of my examination into the present financial condition of the city, I have been directed to the recent public discussion of the effect upon the city of the constitutional limitation upon its debt. . . . The general impression made upon me by my study of the situation is, that the city’s resources are marvellous. On the other hand, it is also clear that the demands upon these resources are fully proportionate to the greatness of the city.

While not attempting at this time to consider in detail the needs of the city, there are three or four main lines of expenditure which must command the careful consideration of the authorities.

First of all, in importance, I place the question of providing adequate school accommodations for the children of the city. . . . It is idle to improve the material conditions of the city, if it is to be done at the expense of leaving many thousands of its children in ignorance of the best years of their lives.

"Next in importance as a problem affecting the future is the question of our water supply. . . . When the Croton Dam is completed provision will have been made for the storage of water on the Croton watershed upon a scale adequate to supply the present needs of Manhattan and The Bronx for an estimated period of four months without regard to rainfall. . . . The supply of Brooklyn, on the other hand, is already inadequate for its needs. . . . The need of an increased water supply for Brooklyn, therefore, is both immediate and urgent.

The natural way in which to meet the pressing need is to carry the present Brooklyn system further down Long Island. . . .

The recent administration has fixed the main lines upon which the improvement of inter-borough communication must proceed for a period of years to come. Plans have been prepared, and in course of construction across the East river. These bridges are now known as 'Bridge No. 2,' 'Bridge No. 3,' and 'Bridge No. 4,' respectively. These numbers relate to the order in which the construction of the bridges has been authorized, and not to their geographical relations to one another. . . . It is evident that the city authorities are in a position to carry forward all of these bridges as rapidly as possible. In particular, no effort will be spared to secure the early completion of Bridge No. 2, for it is clear that adequate relief for the existing Brooklyn Bridge cannot be had so quickly in any other way as by the opening of this second highway across the East river. [See Mr. 18]

On the other hand, it is impossible to suppose that the present conditions prevailing at the Manhattan end of the Brooklyn Bridge are to remain unmodified during the twenty months which it is estimated must intervene before the completion of Bridge No. 2. The conditions at the Manhattan end of the Brooklyn Bridge involve not only the danger of life and limb, but they amount to a public scandal . . . the principal difficulty seems to . . . come from the presence upon the same loop used by the surface cars, of the cars of different lines, so that the people who gather during the rush hours are animated by conflicting purposes. Some want to reach the cars of one line and some of another. . . .

"The recent city administration also gave its approval to a plan, proposed by the Rapid Transit Commission, for the construction of a tunnel to be used for furnishing railroad communication between the subway system of Manhattan at the New York end of the tunnel, the Brooklyn Bridge, and the Long Island Railroad Depot. This undertaking has proceeded up to the point where all the necessary legal consents have been obtained, and it will shortly come before the city authorities for the appropriation that will make it possible. The city should certainly insist upon a uniform rate of fare over all subway lines constructed with the city’s money. . . .

"There remains a subject not less important than any other, the duty of increasing the small laboratory funds which exist in the various parts of the City at the moment of consolidation still remain in force still, for the most part; and no effort has been made to adapt these ordinances to the changing conditions of the City’s life. . . ."—Proc., Bd. of Ald. (1902), II: 1142-84.

The rights granted to the National Historical Museum to use the old hall of record as soon as the records are removed to the new building (see D, 1897) are rescinded. On May 20, the old hall was leased to the museum at a nominal sum.—Proc., Bd. of Ald. (1902), II: 1352-63; Ordinances, etc., App’d by the Mayor (1902), V: 160. See O 10.

The board of aldermen passes "An ordinance, naming the bridges crossing the East river." This provides that: 1, the "New York and Brooklyn Bridges shall be designated as the Brooklyn Bridge;" 2, the "new East River Bridge shall be designated as the Williamsburg Bridge;" 3, "Bridge No. 3, crossing the East River, shall be designated as the Manhattan Bridge;" and 4, "Bridge No. 4 crossing the East river shall be designated as the Blackwell’s Island Bridge."—Proc., Bd. of Ald. (1902), II: 1596-70.

"About this time ping-pong had the vogue that Mali Jung came to learn it in 1908 and the cross-word puzzle in 1914."—Sullivan, Our Times (1916), I: 572.

The executive committee of the N. Y. Historical Society addresses a memorial to Mayor Low requesting that steps be taken for the publication of the "Minutes of the Common Council of the City of New York from 1675 to 1776" and offering to suggest the names of gentlemen who will be willing to supervise the editing of the documents. —N. Y. Hist. Soc. Proc., Min. (1903), 174-76. To this proposal the Mayor acceded. After action by the Board of Estimate, he addressed a message to the Board of Aldermen requesting them to pass a resolution authorizing the work. This action was taken by the Aldermen on February 10, 1907. Their resolution provided that the committee, already named by the Mayor, and consisting of members of the Historical Society, should have the editorial control of the work. They were: Herbert L. Osgood, Frederic W. Jackson, Robert H. Kelby, Hiram Smith.—M. C. O. I: iv. The Minutes were published in 1905 (q.v.).

The will of Cecil Rhodes, which was made public on this day, gives $10,000,000 to provide 100 scholarships for American youths at Oxford University.—Sullivan, Our Times (1926), I: 570.

The Department of Parks is authorized to transfer the property of the aquarium (formerly Castle Garden) to the N. Y. Zoological Society.—Laws of N. Y. (1901), chap. 441. The transfer was made on July 1.—Ann. Cyclop. (1902), 421; Ann. Rep., Dep’t of Parks (1902), 51.

Nicholas Murray Butler is formally installed as president of Columbia University.—Hist. of Columbia Univ. 186-91.

The World, as part of a campaign against the "Beef Trust," prints some "Prices That Stagger Humanity." They are sirloin steak, 24c.; lamb chops, 18c.; pork chops, 18c.; ham, 18c.—Sulli- van, Our Times (1926), I: 572.

The Plaza Hotel property has been acquired by the New York Life Insurance Co.—N. T. Times, May 2, 1902.

The Inter-Borough Rapid Transit Co. of New York City is incorporated with a capital of $35,000,000.—N. T. Times, May 7, 1902. See also ibid, May 24, 1902. The "Inter-Borough Rapid Transit Company, the operating railroad [subway] corporation was formed by the interests represented by Mr. Belmont, he becoming president and active executive head of this company also, and soon thereafter Mr. McDonald [see Ja 16, 1902] assigned to it the lease or operating part of his contract with the city, that company thereby becoming responsible for the equipment and operation of the road [subway], Mr. McDonald remaining as contractor for its construction. . . .

"The incorporators of the Interborough Rapid Transit Company were William H. Baldwin, Jr., Charles T. Barney, August

Occasionally these terrible disasters in history occur when the town of St. Pierre, Martinique, with its entire population of about 30,000 people, is totally destroyed by the eruption of Mount Pelee. There is also an eruption of Mount La Soufrière at St. Vincent, British West Indies, in which two-thirds of the island is laid waste, and about 2,000 lives are lost. Congress appropriated $500,000 for the relief of Martinique, and expeditions were sent out at once. — N. Y. Times, 1903.

Lewis Nixon (see Ja 15) resigns as leader of Tammany Hall because he is too much hampered by a "kitchen cabinet" headed by Andrew Freedman and by the continued interference of the absent Mr. Croker. On May 22, the leadership of Tammany was put in the hands of a triumvirate composed of Chas. F. Murphy, Daniel F. McMahon, and Louis F. Haffen. — *Myers, Hist. of Tammany Hall* (1917), 296-98. See, further, S 19.

The Comte de Rochambeau and other French delegates to the unveiling of the Rochambeau statue in Washington, D. C., land at New York from "La Touraine" and put up at the Waldorf-Astoria. Before leaving for Washington on May 20, they visited various parts of the city, received delegates from patriotic societies, and attended the annual dinner of the Union League Club. — *N. Y. Times*, May 18-20, 1902. They were formally welcomed by the city on May 27.— *Ibid.*, My 27-30, 1902.

The corner-stone of the R. C. Church of Our Lady of Lourdes is laid in 1425 St., between Amsterdam and Convent Aves., on the original site of Hamilton Grange. — *N. Y. Times*, May 19, 1902; L. M. R. K., III: 916. Stone from the old building of the National Academy of Design, Fourth Ave. and 87th (see 1869) was used in this church, the design of the old 23d St. façade being closely followed in the church edifice.—Records of the church.

The Cuban Republic is formally inaugurated, with Tomas Estrada Palma as first president, and the U. S. military governor, Gen. Leonard Wood, transfers the control of the island to the new government. — *N. Y. Times*, May 20 and 21, 1902.

The soldiers' and sailors' monument on Riverside Drive (see D 15, 1900), is unveiled. — *N. Y. Times*, My 31, 1902. See also L. M. R. K., III: 964.

The Boer War (see O, 1899) comes to an end. A treaty of peace is signed by Great Britain and the Boers, by which the Transvaal and the Orange Free State lose their independence and become colonies of the Union of South Africa. — *N. Y. Times*, May 25, 1902.

In 1906, self-government was granted to the Transvaal, and in 1907 to the Orange River Colony, and this was followed in 1909 by the establishment of the South African Union.— *Ibid.*, 544-45.

During July—October, the immigrant station at Ellis Island was reorganized. The holders of the money, baggage, and catering privileges, who had been doing business for ten years, were ousted for alleged irregularities, and were replaced by new concessionaires. — *Ann. Cyclop.* (1902), 427; *N. Y. Times*, Ji 2, S 26, O 1 and 19, 1902.

Prof. Brander Matthews, in the *International Monthly*, predicts that simplified spelling will make progress "like that of a glacier, as certain as it is irresistible."— *Sullivan, Our Times* (1926), 1: 576.

The city acquires by condemnation proceedings land at 76th St. near East River. Here John Jay Park was afterwards developed. — *Prendergast, Record of Real Estates*, 511 L. M. R. K., III: 970.

Part of Thomas Jefferson Park, between 111th and 114th Sts., First and Pleasant Aves., is opened. — *N. Y. Times*, Ji 12, 1902; *Ann. Cyclop.* (1902), 422. When the park was entirely finished, it was maligned by the New York Times, Oct. 7, 1902.— *Rep., Dept. of Parks* (1906), 55; L. M. R. K., III: 973.

Bids for building an extension of the subway under the East River to Brooklyn are called for by the board of rapid transit commissioners. On July 24, the contract for building, equiping, and operating the extension was awarded to the Rapid Transit Subway Construction Co. (see Ja 16, 1900). John B. McDonald, as contractor of the company, "assumed the general supervision of the work of constructing the Brooklyn extension; and the construction work of both the original subway and the extension has been carried on under his direction."— *Ann. Cyclop.* (1902), July 443; *Interborough Rapid Transit (The Subway)* in N. Y. (pub. by I. R. T. Co., 1904), 21. See N 12.

The board of estimate and apportionment is requested to authorize the comptroller to issue special revenue bonds to the additional amount of $52,000 for the purpose of defraying the cost of making necessary repairs to the City Hall, in the Borough of Manhattan.— *Proc., Ed. of Ald.* (1902), III: 423. See N 25.

The municipal art commission approves the plans of Wm. Aug. Martin Aiken for alterations to the interior of the city hall. These call for an expenditure of more than $12,000. In the basement sev- eral small offices under the main entrance will be made into one for a large marriage bureau. That room will be domed, as President Cantor has desired. The walls in the offices of the City Record will be torn down, making much more room. On the main floor the rotunda and corridors will be repaired and the stone work renovated. In the Mayor's office various doors and passages that are of little use will be torn out. The wall between the Mayor's office and the anteroom will be torn down, making an arched way, with much more space for receptions. The gaudy wallpaper and ceiling in the Mayor's office will be removed and a white enameled ceiling and walls will be substituted, bringing back the appearance of the building as near as possible to the original Colonial style. The hangings and furnishings of the rooms will be in harmony with the decorations. Various small walls and partitions in the City Clerk's office will also be removed, making more room. In the second floor the walls and decorations in President Cantor's offices will be treated similarly to those of the Mayor's office. White enameled decorations will be used in all cases, and in every way possible the Colonial appearance of the original building will be revived. Partitions will be removed, making a spacious room, which can be used for receptions and hearings, at which the Borough President would preside.

"Little is to be done," says Mr. Caldwell, Council Chamber and the Chamber of the Board of Aldermen at present. President Cantor hopes to obtain an additional appropriation and have these rooms, two of the finest in the building, altered in keeping with the proposed color scheme of the other rooms. — *N. Y. Times*, Ji 18 and Ag 13, 1902. See also Ann. Report, Art Com. (1902), 27, 37, 44, 45; 51, 541 (1903), 9-10. See, further, N 25.

The San Francisco Examiner describes the sensation caused in Saratoga a few days ago by Mrs. Adolph Ladenburg when she rode through the streets astiride instead of side-saddle.— *Sullivan, Our Times* (1926), II: 577.

The three-fold leadership of Tammany Hall (see My 14) is Sept. abolished, and Chas. F. Murphy becomes "boss" of the organization. — *Myers, Hist. of New York*, 1: 398.

"That portion of the Tombs still standing will be emptied of its inmates this week and pass out of commission as a place of confinement for prisoners awaiting trial on criminal charges. They will be removed to the new structure on Centre Street, now practically completed, after which steps will be taken for the immediate removal of the remaining portion of the old structure in its rear. — *N. Y. Times*, S 49, 1902; L. M. R. K., III: 973. See My 24, 1897.

The Belasco Theatre, on the north side of 42d St., west of Broadway, is opened with Mrs. Leslie Carter in "Du Barry."— *N. Y. Times*, S 30, 1902. Longacre Square was thus inaugurated as the new theatre district of Manhattan Borough, and the great increase in the number of theatres in this city began. On Oct. 16, 1907, Belasco's first theatre, the Stuyvesant, was opened at 115 W. 44th St.— *Ibid.*, O 17, 1907. In 1910, its name was changed to the Belasco, and, at the same time, the name of the old Belasco Theatre was changed to the Republic.—Information from the office of the Belasco Theatre, My, 1926.

The charter of the International Navigation Co., which was Oct. incorporated in New Jersey, Oct. 6, 1833, for the issue of a stock of $5,000,000, is amended, changing the name to the International Mercantile Marine Co. and increasing the capital stock to $120,000,000. The new company is a combination of six steamship lines—the White Star, the American, the Red Star, the Leyland, the Atlantic Transport, and the Dominion lines. The combination was brought about by J. Pierpont Morgan & Co.—*N. Y. Times*, O 2, 4, 19, and 31, 1902.

Electric service on the Sixth Ave. Elevated R. R. is started between Rector and 58th Sts.— *N. Y. Times*, O 2, 1902.
The foundations of the new custom-house, at Bowling Green Oct. (see Mr. 2, 1899), having been built during 1901 and 1902, the cornerstone is now laid.—N. Y. Times, O 8, 1902. During this year, the foundations were completed, and the superstructure was completed to the level of the first floor.—Ann. Rep., Supervising Archts., U. S. Treasury Dept. (1902), 97. On June 6, 1902, Congress extended the limit of cost of the building to $4,500,000.—Ibid. (1904), 55. The building was not ready for the interior finish until June 30, 1904.—Ibid. (1904), 55. Regarding the completion of the building, see Je 1, 1906, and O 1, 1907.

The city grants a franchise authorizing the construction, maintenance, and operation of the tunnel extension and station of the Pennsylvania R. R.—Inscription on tablet on wall of the entrance to the Pennsylvania Station; “Pennsylvania R. R. Tunnels: Terminal Structures,” in Papers and Discussions, Am. Soc. of Civil Engineers, XXXVII: 620-614. The tunnel extension was begun on June 10, 1905 (q.v.), and the station on May 1, 1904 (q.v.), from designs by McKim, Mead & White.

As the old hall of records (originally the “New Goal”—see Mr. 1, 1758) has been declared unsalvageable, Justice Lestevint of the supreme court agrees to order the demolition of the building to make way for the subway station at the Brooklyn Bridge terminus.—Proc., Bd. of Ald. (1902), IV: 274, 326, 339-40, 381, 1224. The historic building was closed on Dec. 27, 1902 (q.v.), and torn down in March, 1903 (q.v.). See also D 30, 1897, Mr. 11, 1902, and J 5, 1903.

Woodrow Wilson is inaugurated president of Princeton University, his home.—N. Y. Times, 97, Nov. 21, 1902.

The cornerstone of the N. Y. Public Library, on Fifth Ave. between 40th and 42d Sts. (see 1899), is laid. The ceremonies consist of an invocation by the Rev. W. R. Huntington of Grace Church, an address by Hon. John Bigelow, president of the library, the laying of the stone by Mayor Seth Low, and a benediction by Archdeacon Farley.—N. Y. Herald, N 11, 1902; Lydenberg. Hist. of N. Y. Public Library, 83-84; L. M. R. K., III: 957. The building was completed in 1909 (q.v.).

The Chamber of Commerce building, at No. 65 Liberty St. (see N 8, 1901), is formally opened and dedicated by Pres. Roosevelt. James B. Baker is the architect. It is built in the Renaissance style, and between the columns are statues of Hamilton, De Witt Clinton, and John Jay.—N. Y. Times, N 11 and 12, 1901; 42nd Ann. Rep., Ch. of Com. (1901-2); L. M. R. K., III: 925. See also view and description in Architectural Rec., XIII: 66-68.

Ground is broken at State and Pearl Sts., just below Bowling Green, for the Brooklyn extension of the subway (see Ja 16 and Mr 24, 1901; Jl 21, 1902).—N. Y. Times, N 13, 1902.

Ambassador Canillon lays the corner-stone of the French Hospital of the city of the French at No. 450 W. 34th St. by the French Benevolent Society.—N. Y. Times, N 19, 1902. It was formally opened in 1904, by Ambassador Jusserand.—Ibid., N 13, 1904.

Wm. Martin Aiken, consulting architect for the borough of Manhattan, writes to Mayor Low: “In accordance with the request made to me from your office to report upon the requirements and the cost of furnishings appropriate to the remodeling of the City Hall Building, I beg leave to submit the following:

“Whereas the foundations of the present building were laid on or about the 16th day of May, 1803, and furthermore that the City of New York was the first capital of the Federated Colonies, and furthermore that as the City of New York was the capital of the State of New York prior to the choice of the City of Albany; therefore, it has seemed expedient and desirable to incorporate in this report the recommendation that gradually, between the present time and upon such date in the month of May, 1903 as may be found to coincide most accurately with the laying of the corner stone of the present building the interior fittings of this building be brought into harmony with the characteristics of the original design.

“In order to do this in a consistent, dignified and harmonious manner, I recommend the appropriation of from fifteen to twenty thousand dollars... for this purpose; since the following variety of items are included in the estimates and are the result of careful bidding by most reliable dealers, a certain margin has been indicated to permit of a choice of design and material, viz.: Electric light fixtures, rugs and carpets, hangings, furniture, clocks, fireplaces, parquet floors, modeling, tablet, picture hanging, decoration of Governor’s Room and Council Chamber, relining old gas fixtures.

Inscribed in the top coping of the front wall I find the names of those originally interested in the construction of this building.

It is proposed that these tablets now be taken down and reset in the walls of the main corridor in the first story, with an additional tablet descriptive of the present work upon the building. I find furthermore that certain flagstaffs upon the building are of serious and continual detriment to the roof. I therefore recommend that the objectionable flagstaffs be removed, that the most eminent sculptor obtainable be commissioned to design and execute in bronze a monumental scobe, appropriately inscribed and supporting a suitable mast, to be erected on the terrace in front of the City Hall, and that it be dedicated on this anniversary.—Proc., Bd. of Ald. (1902), Vol. IV, Pt. 2, pp. 179-71. See, further, D 9.

The tablets mentioned by Aiken were removed from the coping of the city hall in May, 1903 (q.v.). See also 1814.

Henry Ford, in his new 70 horse-power racing-car, makes an unofficial record of a mile in 1:01.4, on the Grosse Point track, Detroit.

Sullivin, Our Times (1926), I: 759.

Wm. Martin Aiken (see N 25) reports that the following work is being done, under his supervision, on the city hall: “In the basement additional accommodations are being provided for the City Marshal’s office, for the City Record office, and for the Grand Army and the Marriage rooms. In the first story a new lobby is being formed for the Mayor’s reception room by throwing in together two parallel corridors; the Mayor’s office being transferred from the south front to the southwest corner; and the enlarged accommodations for the Mayor’s Secretaries and immediate clerical force. At the east end of the building the business offices of the City Clerk are being so arranged as to give better accommodation for the transaction of business. In the rotunda the iron treads of the main staircase are being removed and new marble treads substituted. The private staircase at west end of the building is being extended that it may be made more available for the use of the President of the Borough and for better connection between the offices of the Mayor, those of the President, and the Council-Chamber—in which the various boards have their executive sessions. At the west end of second story corridor an enlarged lobby is being formed, to give a waiting room for those persons having business with the President of the Borough and his clerical force. Rooms for the President, his Secretary and clerical force are also being provided; also enlarged accommodations in the centre north front for the Municipal Art Commission.

Marconi announces the transmission of three messages from Cape Breton across the Atlantic to England, via one from the governor-general of Canada to King Edward VII; one from the commander of the “Carlo Alberto” to King Victor Emmanuel III; and a third to the London Times from its special correspondent. See also description of P. 109, III: 585.

The new east wing of the Metropolitan Museum of Art, at W 82d St. and Fifth Ave., constituting the main entrance and central portion of the general plan for the development of the building, is opened to the public. This plan, designed by the late Richard Morris Hunt, was accepted by the trustees of the museum in Nov., 1895 (q.v.). The work was carried out by his sons, Richard H. and Joseph H. Hunt.—N. Y. Times, D 22 and 23, 1902; Ann. Rep., Dept. of P’s (1902), 273; Howe, Hist. Met. Museum of Art; L. M. R. K., III: 957.

The board of aldermen appropriates $50,000 for defraying the cost of refurbishing and redecorating the interior of the city hall.—Proc., Bd. of Ald. (1902), Vol. IV, Pt. 2, p. 2153.

The old hall of records is closed.—N. Y. Times, D 27, 1902; 27 Ann. Cyclop. (1902), 428. The historic building was demolished in 1907 (q.v., J 6 and Mr)

The freedom of the city is conferred on Dr. Adolfo Lorenz, the great Austrian “dry” surgeon.—N. Y. Tribune, D 31, 1902; Ann. Cyclop. (1902), 428.
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876–1909

1901—In this year, Chas. Fitzmorris’s record for a world round trip (see Jl 21, 1901) was broken by Henry Frederick, who made the journey in 54 days, 7 hours, 2 minutes.—Sullivan, Our Times (1926), I: 559.

In this year was published C. H. Pierce’s New Harlem, past and present. The story of an amazing civic wrong, now at last to be righted. With a review of the principles of law involved in the recovery of the Harlem lands by W. P. Teller and H. De Pauwatting.

By this city, the city had taken steps to provide twelve new public baths, all situated in the more crowded tenement districts. Eight new playgrounds also had been opened.—De Forest & Veller, The Tenement House Problem, I: 227.

In this year, the Hotel Martha Washington, for the exclusive accommodation of women, was opened, on land bought for the purpose in 1901, running through the block from 30th St. to 29th St., east of Madison Ave. Excavations for the building began on Sept. 15, 1901.—Hotel Martha Washington (pamphlet).

Jan. A plan for sharing profits with employees, one of the first in industrial corporations, is announced by the U. S. Steel Corporation.—Sullivan, Our Times (1926), I: 51.

The Interborough Rapid Transit Co. (see My 6, 1902) leases all the property of the Manhattan Railroad Co. (see S 30, 1879), for 999 years, beginning April 1, 1903.—Ch. of Com., State of N. Y., Rapid Transit in N. T. City and in Other Great Cities, 49. This lease assured "harmonious operation of the elevated roads and the subway system, including the Brooklyn extension."—Inter- borough Rapid Transit (The Subway) in N. T. (pub. by L. R. T. Co., 1904), 21.

The Union Club (see Ap 25, 1855) opens its new club-house at the n. e. cor. of Fifth Ave. and 51st St. The club has never been incorporated.—Club Book (1912); and see L. M. R. K., III: 399.

Mayor Low, in his second annual message to the board of aldermen, said: "The pleasure of taking the control of the operation which the administrative branch of the City government has received from the Board of Aldermen. In one or two instances only, matters have been delayed where prompt action seemed to be desirable; but, for the most part, your action has made possible the orderly and efficient conduct of the City’s business, without delay and without embarrassment. I take the more pleasure in making this acknowledgment, because I think that the public does not fully understand how much you have done to facilitate the City’s business. . . ."

"In my message to your Honorable Board dated March 4, 1902, I called attention to some of the great problems of the City which had already forced themselves upon my mind. . . . It was my purpose clearly to show that the City could not be expected to make it impossible to carry on the enterprises to which it was already committed and at the same time to supply the things essential for its current life. A more puzzling problem never confronted an administration. The City was threatened, on the one hand, with a large and continual increase of taxation, certain to be detrimental to its welfare; and, on the other, with the stoppage, at this very critical period of its development, while it is practically being rebuilt, of the public improvements upon which both its present and future prosperity largely depend. I am happy to be able to say that, by the hearty co-operation of the Comptroller and the Mayor, a way has been found to rescue the City from this dangerous situation and to secure for it at the same time both lower taxes and a larger credit.

"It is next, to the progress made during the year, with the transportation problems of the City. Early last spring the President of the Pennsylvania Railroad Company called upon me to say that his road would be glad to apply for a franchise to connect the boroughs of Manhattan and Queens by tunnel under the Hudson river and the East river, and under the surface of the Borough of Manhattan with their main line in New Jersey, provided such a franchise would be had, upon satisfactory terms, that would assure the company of permanent control of it. It was so evident that no company could afford to spend the vast sum of money involved in creating such a terminal in New York except upon assurance of permanent control, that I caused a bill to be prepared authorizing the city to grant such a franchise upon the condition that the pay- ment to be made to the City for the enjoyment of it should be periodically readjusted at intervals of twenty-five years. This rule now applies to all such franchises. . . . from this application of the Pennsylvania Railroad the City has obtained two advantages of literally incalculable importance. First of all, by the granting of the franchise, the City is assured of uninterrupted communication by another railroad with the West and South of the United States, with all that that implies. Similar communication by trolley cars with other railroad terminals in New Jersey is also assured by the grant of the franchise to the New York and New Jersey Railroad Company. And, next—which is of hardly less importance—the shaping of the entire underground railroad development of the City has now been lodged in a single department; that is to say, it has been placed under the oversight of the Rapid Transit Commission. As a result, there is now a single body capable of harmonizing this development and of providing plans for it that are in the public interest. . . ."

"The Brooklyn Tunnel is another transit matter that has been successfully dealt with during the year. Not only was it contracted for at $1,000,000 when it was expected to cost $8,000,000, but the smaller figure was on the basis of an initial lease of thirty-five years, instead of fifty years, as in the case of the first subway. . . .

"The Chief Engineer of the Rapid Transit Commission is now preparing plans for an East Side route for the municipal subway, with an extension through Jerome avenue, and also for carrying the subway down Broadway, from Forty-second street to the Battery. In addition, the route for a second tunnel for Brooklyn is under consideration. . . ."

"It is a striking fact that the surface and elevated roads of The City of New York carry more passengers, every year, than all the steam railroads of North and South America combined. . . . It is certainly true that, outside of rush hours, very much greater accommodation can be, and should be, given; but nobody is sanguine enough to believe that, during the rush hours, the situation can be importantly relieved except by the addition of new transit facilities. . . ."

"In the meanwhile unfinished bridges across the East river are being carried to completion as rapidly as possible. . . ."With the completion of these bridges [Williamsburg, Manhattan, and Blackwell’s Island Bridges] and the projected tunnels, say within the next five years, there will be thirty railroad tracks between Manhattan and the boroughs of Brooklyn and Queens, where now there are but four. With the completion of the subway system for Manhattan and The Bronx, upon the lines indicated, the facilities for traveling north and south, already great, will be at least doubled. . . ."

"One other subject calls for consideration in this message. The year 1902 has seen the laying of the cornerstone of the New York Public Library and the opening of the new wing of the Metropolitan Museum of Art. The second Carnegie branch has been opened during the year, and a number of sites have been secured upon which other branch libraries are already in course of construction. During the last session of the Legislature a law was passed providing for the creation of a new corporation in the Borough of Brooklyn, to be known as the Brooklyn Public Library, which was authorized to absorb the present Public Library of Brooklyn and the old Brooklyn Library on Montague street, which is a private corporation. . . .—Prec., Bd. of Ald. (1901), I: 2–15.

The work of tearing down the old hall of records is begun.—N. Y. Times, Jan. 6, 1903.

From Jan. 23 to 31, inclusive, the paintings, porcelains, silver, rugs, tapestries, books, mezzotints, art furniture, etc., belonging to the estate of Henry G. Marquand, were sold at the Am. Art Galleries for $704,250.—A Plan, etc., in art, Feb. 6, 1903.

John D. Rockefeller’s gift of $7,000,000, to be used in research for tuberculosis serum, is announced.—World Almanac (1904), 129.

The “Department of Commerce and Labor” is created by act of congress.—Laws of U. S., 27th cong., 2d sess., chap. 552.

Mayor Low sends to the board of aldermen a message discussing the affairs of some of the City departments. He states: "I ask your attention to the fact that the City grows in population at the rate of 100,000 people every year. This means that, by the 1st of January, a city as large as Baltimore had been added to the population of New York as our population stood on the day when the Greater New York came into being, on January 1, 1898. The addition of this multitude of people . . . has naturally increased the demands upon the City government, in every direction. . . . During this same interval of five years, more than..."
THE ICONOGRAPHY OF MANHATTAN ISLAND

1903

$1,500,000 of the City's growth in income—and more than $1,000,-

000 of it in 1902 alone—has been locked up in the sinking funds, where it was not needed. If this income had been available for current expenses, as it should have been, it is clear that the City's needs could have been more fully met without increasing taxation.

The police are as brave a force as any city could wish; neither do they lack efficiency in other directions. The police problem, however, is exceedingly difficult. Fundamentally considered, the problem is how to effect a complete change in the morale of a force numbering nearly eight thousand officers and men; how to substitute in this large body of men, for the idea of protecting each other no matter what the other may do, the ideal of protecting the city that may oppose, without wrongdoing by one, the force; and the end to be achieved is to make it impossible, by reason of the public opinion of the force itself, for any member of the force, high or low, to use his position for the purpose of private gain.

It may as well be said frankly that such results cannot be obtained in a single year, or in two; but only by a slow process of education which shall involve such an elevation of standards, both in the force itself and in the community, as has already taken place in the City, for example, as to nursing in the City hospitals and in the matter of street cleaning. . . . It ought to be possible, however, even in a short time, for a Commissioner who is the open foe of corruption in the force to show that there are divisions in it which favor corruption, and although undisputed without the police officers who are responsible being brought promptly and sharply to book; it ought to be possible to make the large number of men in the force who desire better things feel that they can afford to be honest and upright; it ought to be possible to make such an effective contrast between an administration of the department that aims to enforce the laws, reasonably and honestly, and one that winked at the sale of law, as to lead the City to wish for the former whenever it is suffering from the latter.

"Something of all this was accomplished by Commissioner Partridge during his year of service, and he has certainly made it much easier for his successor to accomplish the rest. Commissioner Partridge broke up the 'red light district' on the East Side, with its revolting 'cadet system'; he drove out of business a number of the worst resorts in the City; he showed that under this administration promotions and appointments are made for merit, and for no other cause. By reducing details, by various adjustments within the Department, and by new appointments, he succeeded in adding, during the year, four hundred men to the effective patrolling force of the Department; and this with a budget not substantially larger than in 1902.

"From every quarter, since the retirement of Commissioner Partridge, I get testimony of the valuable work he has done. Much, however, yet remains to be accomplished, and that I hope General Greene will be able to do. His record since the first of January certainly encourages that hope. Blackmail in the Department must be smitten root and branch, whatever interests may suffer in the meantime. Citizens who pay blackmail, and officers who take it, must be made to feel that such money withers every hand that touches it. I heartily approve the policy of General Greene in holding the officers rather than the men responsible for the low morale and the misdeeds of the force. I must, however, remind the citizens again, as I did a year ago, that if they wish blackmail to be abolished they must themselves show courage in refusing to pay it and must co-operate with the officials who are trying to stamp it out. . . ."

"The Department of Street Cleaning. When I asked Dr. Woodbury to accept the position of Commissioner of this Department, I said to him that it seemed to me the real problems of the Department lay in the field of final disposition; that anybody who was interested in controlling men could do the work; but that the City of New York, was at least twenty-five years behind the times in the disposition of its waste. . . ."

"The City's waste may be considered under three heads: (1) garbage, (2) ashes, (3) house waste, such as old paper, bottles and the like. . . ."

The first result achieved by Commissioner Woodbury by effecting this better separation of garbage from ashes and house waste was the successful stoppage of dumping at sea during the whole of last summer. Thus, for the first time in many years, the sea beaches were clean during the bathing season.

"The second result was no less valuable. The percentage of garbage in the ashes and house waste having been reduced to a negligible quantity, this material could safely be used for filling in low-lying land, or land under water. By permit from the Board of Health, the Commissioner of Street Cleaning was enabled to use large quantities of this material in filling in land under water at Riker's Island. Besides the saving thus effected in towing, during the year 1902, thirty-five acres of good upland were made. I have heard the value of this upland estimated at $10,000 per acre. When the work that has been begun is completed, Riker's Island will have acres larger than Blackwell's Island, and the value of it to the City of New York, measured by its usefulness, will be incalculable. . . ." The privilege of picking over the waste at the various City dumps in the Borough of Manhattan was sold, in 1901, for $89,000. Early in 1902, a new contract was made at the rate of $107,000. Commissioner Woodbury immediately conceived the idea that by making suitable arrangements for burning what was valued in this waste three results would follow: first, a better opportunity for saving what is valuable would be afforded; second, the most bulky part of what has heretofore been taken out to sea would be very much reduced in bulk; and, third, most of the residuum, being clean ash, would have a value either for filling or as a fertilizer. Acting upon authority granted to him early in the year, he erected on the pier at the foot of West Forty-seventh street a furnace which consumes all the house that was burned in the district lying between Thirty-seventh and Seventy-sixth streets, Sixth avenue and the Hudson River. He sold the privilege of picking over the waste brought to this furnace at eighty cents per load. . . . But this is not all. The residuum is a clean non-mineral ash which is given to the Park Department, where it is used for fertilizing purposes. Again, the heat generated at the furnace is valuable for power and it is expected that this process can be carried on in the City's plant more easily, and also to bring in a moderate income to the City. . . ."

"Workmen engaged in tearing down the Hall of Records [see Ja] yesterday began to pry away the bricks of the first floor. Soon after noon . . . the dungeons where Revolutionary patriots had suffered were unseamed, and for the first time in nearly a century and a half the rays of sunshine burst into the gloomy vaults, lighting up the holes in which nothing was ever known except suffering and despair. By to-day the entire tier of six among the gloomiest prison places in existence will be laid open to the free air. The doorways connecting the dungeons in years gone by were closed with heavy doors of oak, which swung from ponderous lintels of the same wood. All of those doors have disappeared, but the lintels still remain, firmly imbedded in the partition walls which they preserved."—N. Y. Times, F 24, 1903. See also N. Y. Tribune, F 16 and 25, 1903.

The demolition of the hall of records (formerly the jail), to make way for the projected approach to the Brooklyn Bridge (see O 10 and D 27, 1902), is completed. —Real Estate Record & Guide, Mr. 14, 1903. See Mr 1, 1757; also L. M. R. K., III: 575; descrip. of Pl. 97, III: 589; and 8th Ann. Rep., Am. Sociey & Hist. Pres. Soc. (1903), 15-56. The site of the old prison, at the eastern border of City Hall Park, is marked by a tablet.—Peterson, Landmarks of N. Y., 34, 39.

A farewell meeting is held in the Y. M. C. A. building, at the s. w. cor. of Fourth Ave. and 235 St., prior to its demolition. —60th Ann. Rep. of the Y. M. C. A., III: 956.

The legislature authorises the issuance of bonds to an amount not exceeding $1,000,000 for the improvement of the Erie canal, 7 the Oswego canal and the Champlain canal," provided the bond issue is approved by the people at the general election in November. —Laws of N. Y. (1903), chap. 147. The issue was ratified by the voters, on Nov. 3.—Am. Dist. of Dates, II: 85.

Andrew Carnegie gives $1,000,000 to erect a temple of peace for the Hague Court of Arbitration.—Sullivan, Our Times, I: 389.
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876–1909

1903

The statement in the foregoing paragraph is erroneous. As late as 1897, the first Jewish cemetery in the United States is erroneously, as will be seen by consulting the Chronology under Jl 27, 1655; F 22, 1665; S 29, 1677; 1682; D 17, 17295; and 1677, Addenda, Vol. VI. The actual date of acquisition of this land by the Jews of New York for cemetery purposes was 1682 (q.v.).

The novelist Wilkie, II., the longest ship in the world, arrives in New York from Cherbourg on her maiden voyage. She is 906 ft. in. long and has a tonnage of 26,000.—Sullivan, Our Times (1926), p. 589.

The new Stock Exchange on Broad, Wall, and New Sts. (see My 1, 1904) being finished, the brokers moved into it on this day. George B. Post was the architect. The pediment of the Broad-st. façade contains 11 white marble figures, by J. Q. A. Ward, typifying American commerce and industry.—N. Y. Times, Ap 23 and 24, 1903; "The New York Stock Exchange," by John Rodeneyer, in N. Y. Stock Exchange, Vol. I. See also L. M. R. K., III: 925; and descript. of Pl. 159-b, III: 842.

May
In accordance with a resolution adopted by the city council on Dec. 20, 1886, by the board of aldermen Jan. 17, 1889, and approved by Mayor Gilmore, two stone tablets, one on each side of the front door, as portions of the façade over the second-storey windows on the south front wall of the city hall, and are placed on the wall of the west corridor leading to the mayor's office. At this time alterations were being made in the interior of the building (see N 25 and D 9, 1902). A marble tablet recording the event is placed in the wall near them.—4th Ann. Rep., Am. Scenic & Hist. Soc. (1899), 10; 6th Ann. Rep. (1904), 55–56. In the summer of 1913, all these were transferred to the east end of the basement corridor. This was during the extensive remodelling paid for by Mrs. Sage and supervised by the art commission. The two tablets from the façade bear the names of the building committee and principal workmen, including sculptor and supervising architect, who were in the city hall at the time the city hall was finished (see summary under 1814).

New Hampshire, after 48 years of complete prohibition, substitutes a system of licenses.—Sullivan, Our Times (1926), p. 590.

The corner-stone of the new Broadway Tabernacle is laid at the n. e. cor. of Broadway and 56th St. (see D 30, 1901).—N. Y. Times, My 3, 1901; L. M. R. K., III: 928. The church was dedicated by Bishop John H. Vincent on July 4, 1905. Three years later (Feb. 19, 1906), the old church edifice, on the n. e. cor. of Broadway and 54th St., was sold to Rogers, Peet & Co.—Ibid., F 20, 1906.

The legislature directs the board of estimate and apportionment "to consider, and, on or before the first day of June, . . . by its resolution to determine whether the building known as the county court house, now erected in the city hall park in the borough of Manhattan in said city, affords accommodations suitable and adequate for the proper transaction therein of the official business of the special and trial terms of the supreme court of the state of New York, appointed to be held in the county of New York, and of the city court of the city of New York, and of the commissioner of jurors." If the question is not decided in the affirmative, the mayor is to appoint a "court house board" composed of five members who shall "proceed with all convenient speed to select and locate a site, south of the southerly line of Franklin street, extended to the Hudson river and the East river, for a new court house, for the use of the special and trial terms of the supreme court in the first judicial district and of the city court of the city of New York and of the commissioner of jurors." The said board was, in its first meeting, in 1876, and was a portion of the city hall park as the site for such court house. Nothing in this act contained shall authorize the erection of a building in said city hall park, however, unless the brown-stone building so-called, and the fire-engine house, so-called, shall be removed therefrom, and the present county court house shall either be removed or shall be remodelled or enlarged and used as a portion of the building to be erected under the provisions of this act; and no building which shall, under the provisions of this act, be erected in said city hall park shall, in any event, occupy a larger superficial area therein than the aggregate area occupied by the present county court house, the said brown-stone building, the fire-engine house and the building formerly used for the register's office. After the site has been decided upon and the land has been acquired, the board is authorized to proceed with the erection of the building.—Law of N. Y. (1902), chap. 336. On May 29, the Department of Buildings published in the "Kaiser," a report by Hon. Francis M. Scott and Hon. P. Henry Dougro, supreme court justices, and Mr. L. L. Delafeld appeared, and stated that the county court house was inadequate for the supreme and city courts. A resolution to declare the building adequate was thereupon rejected.

"Min. Bk. of Estimate and Apportionment (1903), I: 1141, 1215.

The legislature states that it is "proceeding with the act providing for a separate statement of the value of land in assessments of real estate and for the publication of the annual record of the assessed valuation of real estate in the city of New York."—Law of N. Y. (1903), chap. 455.

The legislature authorizes the governor to appoint a commission of five members "to investigate the alleged cost of construction of a sewer or sewers in the state of New Jersey and the discharge therefrom of sewage into the waters of New York bay," and provides $2,000 for its expenses.—Law of N. Y. (1903), chap. 539. See My 25, 1906.

The city observes the 250th anniversary of the foundation of the civic government of New York. Besides Mayor Low, four former mayors, Smith, City, Jr., Edward Cooper, Franklin Delano, and Robert A. Van Wyck, take part in the ceremonies.—N. Y. Herald, My 27, 1903.

The board of estimate and apportionment unanimously adopts a resolution in favour of purchasing the block bounded by 160th and 162nd Sts., Edgecomb Ave., and Junius Terrace, including the Roger Morris and Junius mansion (see My 6, 1901)—6th Ann. Rep., Am. Soc. of Civil Engineers (1904), 57. See further, O 20.

Subscriptions to the amount of $44,786 having been raised in 1891 (see N. Y. Herald, Mar. 25, of that year), for erecting a statue to the memory of Gen. Wm. Tecumseh Sherman, it is unveiled on this Memorial Day.—N. Y. Times, My 31, 1901. It is an equestrian statue in gilded bronze, by Augustus St. Gaudens, erected by the citizens of New York under the auspices of the Chamber of Commerce, at the 59th St. and Fifth Ave. entrance of Central Park.—Gat. Works of Art Belonging to the City, 163. See also descript. of Pl. 161-b, III: 843.

The construction of the tunnel extension of the Pennsylvania R. R. (see O 9, 1902) is begun. The two tunnels under the North river and the four tunnels under the East river were built by shields driven from each side of the respective rivers. The last tunnel was connected on Sept. 24. The North river was joined on Oct. 9, 1906; and the last on the East river, on March 18, 1908. These were the first tunnels for standard railroad trains constructed under these rivers.—"Pennsylvania R. R. Tunnels: Terminal Structures," in Papers and Discussions, Am. Soc. of Civil Engineers, XXXVII: 802–814; inscription on tablet in the wall of the entrance to the Pennsylvania Terminal.

The present "Grand Central Terminal" owes its inception to a grant, on this day, from the city of the sub-surface rights to the space below most of the streets between Lexington and Madison Aves., 42d and 47th Sts. The N. Y. Central purchased all the land that it did not already own from 43d to 50th St., and from the western limits of the old terminal eastward to Lexington Ave., and also all the remaining property between Park and Madison Aves., from 47th to 50th Sts. After much preliminary work on tracks, etc., the "Grand Central Palace" on Lexington Ave. was converted into a temporary station, and the demolition of the old Grand Central Station began in 1910, without interruption to traffic. The new station, designed by Warren and Wetmore, architects, and Reed and Stern, engineers, was opened in 1913.—see N. Y. (1903), chap. and Ann. Rep.; Ec. Post Day, 1913 (New Terminal Supp.), F 1, 1913; "The Greatest R. R. Terminal in the World," in Mansley's Mag., XLV: 27; descript. of Pl. 169-b, III: 852.

The first report of the "Tenement House Dept. of the City of N. Y." covers the period from Jan., 1902, to this date. Eight volumes carry the sequence to 1914. It is a very important set of volumes, and has had a great influence to do with the demolition of tenements in the larger cities of the United States. In this month, "Boston adopted the automobile as an adjunct to the policing of a scattered residence district."—Sullivan, Our Times (1926), p. 592.
The first Pacific cable is opened, and Pres. Roosevelt and Gov. Taft in the Philippines exchange messages.—Sullivan, Our Times (1926), I: 594.

16 A new requires by condemnation proceedings land is First Ave. and E. 35th St. Here General's Park was developed.—Prendergast, Record of Real Estates L. M. R. K., III: 571. See 1905.

20 Joseph Pulitzer agrees to give the trustees of Columbia University the sum of $1,000,000 for the establishment and maintenance of a school of journalism as one of the professional schools of the university and promises an additional million when the school has been in successful operation for three years.—Hist. of Columbia Univ., 1754-1904, 235-60.

Pope Leo XIII dies, and a newspaper remarks: "It seems almost incredible that he should have looked on Napoleon at the zenith of his power, and should have held a high place in European affairs when Queen Victoria was a girl." The new pope was elected on Aug. 4 and became Pius X.—Sullivan, Our Times (1926), I: 595. A new statue of John Ericsson, by Jonathan S. Hartley, is unveiled at the Battery.—N. T. Times, Aug. 3, 1901.

24 "Lou Dillon" breaks the world's record by trotting a mile in two minutes, at the Reading track, Mass.—Sullivan, Our Times (1916), I: 593, 594.

The first automobile to cross the continent, a Packard car later called "Old Reliable," completes its journey from San Francisco to New York in 21 days.—Sullivan, Our Times (1916), I: 593, 595.

Samuel P. Langley makes an unsuccessful attempt to fly in a heavier-than-air machine.—Sullivan, Our Times (1926), I: 594. See D 17.

The Columbia University Club moves from 41 W. 36th St. (see Ag 1901) to 15 Madison Sq. N. York.—Columbia Alumni News, F. 1918; L. M. R. K., III: 572. For next move, see May 6, 1902.

An interesting relic of old Grace Church has just been secured by the Rev. Dr. Huntington and placed within the inner wall of the present church edifice, near the entrance. It is the original corner-stone of the first Grace Church, which was built in 1806 on the corner of Broadway and Rector Street, the site now occupied by the Empire Building. . . . The stone was secured from the N. Y. Historical Society.—N. Y. Times, Aug. 16, 1903.

16 All is nearly ready at Madison Square Garden for the arrival of the Salvation Host of Elijah the Restorer, otherwise John Alexander Dowie, who are moving on this city, 4,000 strong from several points of the compass in a great crusade against the unredemed of New York. By the time early rising citizens of the city are getting through their breakfasts this morning eight trainloads of crusaders fresh from Zion will have been unloaded at least as many stations and will crowd the street cars on their way to the Garden rendezvous.—N. Y. Times, O. 16, 1903. Dowie and his "army" arrived in the morning and held their first meeting in Madison Square Garden.—Ibid., O. 17, 1903. Many people flocked to hear him and his followers, and on Oct. 19, when he proclaimed himself "Elijah the Restorer," there was a storm of hisses and jeers hurled at him in a roar that lasted a full minute. On Oct. 21, his audience of 15,000 was so hostile that the police persuaded him to close the meeting abruptly.—Ibid., O. 22, 1903. Thereafter there was little trouble. He ended his campaign at the Garden on Nov. 1, by baptizing 79 persons, and most of his "army" then left for Zion. Dowie and his leaders, however, remain to hold meetings at Carnegie Hall from Nov. 2 to Nov. 8, when they, also, returned to Zion.—Ibid., N. 9, 1903.

The Alaskan Boundary Tribunal at London votes to sustain all but one of the American claims in the dispute over the Canadian-Alaskan boundaries.—Sullivan, Our Times (1926), I: 596.

The Hudson Theatre, at 139 W. 44th St., opens with Ethel Barrymore in "Cousin Kate."—N. Y. Times, O. 20, 1903.

Dan Patch breaks the world's racing record at Memphis by going a mile in 1:46.8.—Sullivan, Our Times (1926), I: 596.

The City Club, in urging the re-election of Mayor Low, says: "Mayor Low's administration is conceded by all fair-minded persons acquainted with the city's history to have been the best that the city has known. Every department has been bettered and several have been revolutionized. The organized lawlessness that prevailed in the Police Department, and to a less extent in every other department, under Tammany control, has given place to order and efficiency. In the Police Department there are now left but four of the twelve Inspectors and four of the thirty-five Manhattan Captains of the old régime. 'Grafting' has been well-nigh destroyed, and the former alliance between crime and the police has been broken. The Health Department has eliminated small-pox, and reduced the death rate from 20 to a fraction above 18. For schools $14,000,000 were appropriated in one and one-half years, against $8,904,424 in four years under Tammany. The streets have been kept clean, and during one year (1902) nearly as many miles of streets were paved as during the last four years of Tammany administration. Six new parks and seven play-grounds have been opened, against the gains of Tammany. Three public baths in Manhattan and two in Brooklyn are being built, against but one for the whole city under Tammany. In the Charities Department the chronic embezzlement of funds belonging to widows, orphans and the needy has been stopped; while, instead of the stale bread and other unfit food given to the city's dependents, wholesome and nourishing food is now provided, and with saving in cost. The work of the Recreation House Department has been excellent. The Fire Department has reduced the average loss per fire to $804, against $1,046 in 1901. The Water Department has stopped frauds and effected a yearly saving of $803,739. The Dock Department has increased the general wharfage collections $23,17 per cent., without any increase in rates. The Law Department collected in one year arrearages of personal taxes aggregating two million and one-half times the entire amount collected by Tammany in the four previous years. Tunnels and bridges are being constructed which will enormously increase the transportation facilities of the greater city, and a municipal ferry will soon be installed for travel between Staten Island and Manhattan. The administration has secured for the city $25,000,000 a year from new franchises, which is 60 per cent. of the total amount now received from the city's 100 local railroads, the franchise tax being at its full value, as required by law, tax payments have been reduced in every section of the city, except the Fifth Avenue district, and a borrowing capacity of $100,000,000 is handed over to the next administration.—Statement by the City Club of N. Y. as to Candidates for Municipal Offices, O. 22, 1903, in N. Y. P. L.

George B. McCellan, candidate of the Democratic party, is Nov. elected mayor.—N. Y. Times, N. 3, 1903. See further, N. 7, 1905.

The Republic of Panama is proclaimed. The United States recognized it on Nov. 6.—World Almanac (1904), 150.

Adelina Patti (Baroness Cederstrom) begins her farewell tour of America with a concert at the Academy of Music, N. 18-20, 1903. The tour lasted about four months, during which time she gave 40 concerts. On March 12, 1904, she sailed from New York on board the "Lucania."—Klein, The Reign of Patti, 339-60; N. Y. Daily Tribune, M. 13, 1904. For Patti's first appearances in New York, see My 11, 1902, and N. 24, 1902.

The corner-stone of the present building of the New York Historical Society, on Central Park West, between 76th and 77th Sts. (see F 24, 1891), is laid. Designs, by York & Sawyer, architects, were selected after a competition.—N. Y. Times, N. 18, 1903; Kelby, N. Y. Hist. Soc. (1905); L. M. R. K., III: 597. The building was dedicated on Nov. 20, 1906 (g.v.).

A treaty is signed by the U. S. and Panama giving the U. S. the right to build a Panama canal.—Sullivan, Our Times (1926), I: 597.

Enrico Caruso makes his American début at the Metropolitan Opera House, as the Duke in "Rigoletto."—Krehbiel, Chapters of Opera, 327-30.

A bronze statue is erected by the Knickerbocker Chapter, by D. A. R., on the site of the Robert Murray house on Fourth Ave., near Greenwich St. It was here that his wife, Mary Lindeley Murray, on Sept. 15, 1776 (g.v.), is supposed to have entertained Gen. Howe and his officers until the American troops under Gen. Putnam escaped.—N. Y. Times, N. 26, 1903; Cat. of Works of Art Belonging to the City, 160. See also L. M. R. K., III: 951.
1903 The discovery of the new element, radium, by M. and Mme. Curie, is announced.—Sullivan, Our Times (1926), I: 600.
7 The Colony Club for women is organized.—Club Book (1917).
9 An ordinance is signed by the mayor creating "a City Commission for preparing a comprehensive plan for the beautifying and development of the City." It is to consist of "the present Borough Presidents" and such additional persons as the mayor shall determine.—Proc., App'd by Mayor (1903), VI: 727. This became known as the "N. Y. City Improvement Commission."—See description of Pl. 163, III: 843-44, and Pl. 169-a, III: 851. See, further, Ja 1, 1905.
16 Employment of women ushers by the Majestic Theatre is described as "a brand-new job for the sex."—Sullivan, Our Times (1926), I: 598.
24 The first successful aero-plane flights are made by Orville and Wilbur Wright, at Kill Devil Hill, North Carolina.—Early Hist. of Airplane (pub. by Dayton-Wright Airplane Co.), 6, 9-15.
28 The Williamsburg Bridge (see My 27, 1895), extending across the East River from Clinton and Delancey Sts., Manhattan, to Roebling and 5th Sts., Williamsburg, is opened for traffic.—Rep., Com't of Bridges (1912). It is the largest suspension bridge in the world, and cost $12,000,000.—N. Y. Times, D 20, 1903. Mr. John Roebling, chief engineer of the New East River Bridge Commission, had charge of the design and construction of the bridge.—Letter to the author (dated D 21, 1922) from Wm. Wirt Mills, commissioner of public and structures.
26 After much legal and religious controversy, Wagner's "Parsifal" is produced for the first time in America, at the Metropolitan Opera House.—Krehbiel, Chapters of Opera, 330-35.
30 Nearly 6000 lights are lost in the Iroquois Theatre fire at Chicago.—Moss, A. L., Almanac (1915), 131. "This disaster led to a new theatre code in practically every American city, calling for fire-walls, more numerous exits, unobstructed alleys, asbestos curtains, non-inflammable scenery, the covering of all lights, and doors opening outward."—Sullivan, Our Times (1926), I: 599-600.
31 During the year 1903, immigration records were broken, 857,046 persons being admitted.—Sullivan, Our Times (1926), I: 600.

1904

 Fifteen companies which started in the early days of the automobile were still in existence in 1925. Over a thousand that started had failed. The fifteen that lasted to 1925 are as follows, with the dates of their first cars:

- Ford .................. 1896
- Pierce-Arrow ........... 1901
- Olds .................. 1897
- Cadillac ............... 1902
- Studebaker ............ 1898
- Overland .............. 1902
- Locomobile ............ 1899
- Packard ............... 1902
- Franklin .............. 1900
- Buick ................. 1903
- Peerless .............. 1900
- Ford .................. 1903
- Stearns ............... 1900
- Maxwell ............... 1904
- Apperson .............. 1901

—Sullivan, Our Times (1926), I: 484.

 By this year, automobile accidents had increased to such an extent, that "New York State passed a law providing for a maximum rate of ten miles an hour in closely built-up districts; fifteen miles an hour in villages or cities outside the congested zones; and twenty miles an hour as the maximum elsewhere. The example set by New York was shortly thereafter followed by Kansas, Kentucky, and other States."—Sullivan, Our Times (1926), I: 498-501.

 From 1904 to 1909 were published in London, in four volumes a Report of American manuscripts in the Royal Institution of Great Britain, the work of the Historical Manuscripts Commission, of England. These volumes, prepared by B. F. Stevens, of London, are a calendar of 58 bound manuscript volumes and four cases of 1904 rolls. The materials pertain mostly to the Am. Revolution, and more than half fall within the year 1782 and 1783.

 In this year, the first volume of A History of the United States and its People, by Elroy McKendree Avery, was published. Six more volumes were issued up to 1910, after which publication ceased. The work was intended to consist of 12 volumes. The illustrations in these volumes are from important contemporary pictures and documents—the most comprehensive collection of such material ever published.

 By the year 1904, a great improvement was made in lighting the city,—some 16,000 old gas lamps in Manhattan and The Bronx being changed to mantle lamps; progress was also made in developing the arc lighting along the main avenues and streets.—Message of Mayor McClellan, Ja 4, 1909.

 During 1904-1909, about 35 miles of new wharfage space were constructed by the city, increasing the area of the piers from 3,000,-

 ---The bell in use at this time in the Reformed Dutch Church at Third Ave. and 1221 St. was "the first within the bounds of Har-

 ---lation: The Modern City and Island: 1876-1909 2055

 American

 of the United States

 and the Bronx being changed to mantle lamps; progress was also made in developing the arc lighting along the main avenues and streets.—Message of Mayor McClellan, Ja 4, 1909.

 "New era of which we have any knowledge." It was the only relic of the old name church erected in N. Y. (in., Mr. 29), and has the following inscription: "AMSTERDAM, anno 1734,—ME FECTI." (There is no name in this inscription.) A communication published in the Metropolitan Times in January, 1863, stated that it contained $20 worth of gold and $20 worth of silver.—Riker, Revised Hist. of Harlem (1904), 325. See also 1734; Reformed Low Dutch Church of Harlem, by Titon, 43-45; L. M. R. K., III: 935.

 In this year, the St. Nicholas Club (see J 2, 1877) removed from 386 Fifth Ave. to 7 W. 44th St.—L. M. R. K., III: 939.

 The Madison Square Theatre (see S 15, 1891), adjoining the Fifth Avenue Hotel on West 24th St., is finally closed.—N. Y. Sun, F 28, 1904. For history of this playhouse, see L. M. R. K., III: 938. The Fifth Avenue building now covers the site.

 Mayor Godkin sent B. and B. a letter as his first personal message to the board of aldermen, saying in part: "I intend at this time to do no more than to generalize on certain municipal matters, because I purpose later to submit to you a detailed statement of the condition and the needs of the several departments of the City government.

 "For many years the popular interest seems to have been con-

 this. But I believe that the public mind has been so absorbed with these evident as well as vital questions as to ignore the equally vital, if not as apparent, problem of municipal finance.

 "As the incidence of taxation for the support of the municipal government is shifted to the people as a whole, the questions of the City debt, the cost of government and of the system of taxation under which we live are of great concern and should be of the very first interest to every citizen.

 "A wider knowledge of our financial system can bring nothing but good to the City. A greater interest on the part of the tax-

 "In rapidity growing municipality, whose debt margin is constitutionally limited, there ought to be some fixed fiscal policy which should, in its general features, govern all administrative regard-

 "In gauging the financial capacity of the City when embarking upon new enterprises, material necessities should first be met.

 "New York must be made healthy and clean before it is made beautiful.

 "The administration is confronted with a most difficult problem because of the inadequacy of the present school accommodations. The solution of this problem cannot wait on our convenience.
January 1904

"Provision for an additional water supply is a subject demanding prompt attention."

4 An extensive observation of the moral conditions of the great cities of Europe and America has convinced me that this City is better than any of them. Nevertheless, we cannot boast if its moral state falls below the standard which should be set for the metropolises of our country. . . A cosmopolitan city like New York cannot be conducted on the same plan as a provincial town. Every attempt to so conduct it will fail and will result in a disrespect of law.

5 "Some evils can be eradicated and some cannot. Some evils, unhappily, are incident to human nature itself. But they should not be allowed to parade before the public, and no partnership should be permitted between those charged with the suppression of vice and those who live by law-breaking. In the endeavor to accomplish anything in this direction, spasmodic effort can avail little. Only constant vigilance can produce satisfactory results. The methods employed should not be sensational, or for the purpose first of winning applause, but earnest and sincere, so as to be thorough and permanent in their effect.

6 "I am convinced that it is no unreasonably critical spirit which has for years been charging that officials high in the Police Department have connived at the maintenance of certain public evils for their own profit."

7 "A vigorous and persistent effort will be made to sever any such relations between law-breakers and those sworn to enforce the law."

8 "I appeal to all our citizens, and especially to those who supported my candidacy, to aid in purging the Department of such men and practices."

9 In this other department, everything desired cannot be accomplished at once. Intelligent effort directed to one evil at a time must before long result in a general improvement.

10 "The vast majority of the members of the police force are worthy of our confidence. Their lives are not easy, whether considered morally or physically. Contact with crime does not tend to individual improvement."

11 The City Club formally dedicates its new building at 55 West 44th St.—N. Y. Times, Jan 12, 1904; L. M. R. K., III: 917.

12 The corner-stone of the Times building at 42d St. and Broadway is laid.—N. Y. Times, Jan 19, 1904; L. M. R. K., III: 968. Later in the year, the name of Longacre Square, bounded by Broadway and Seventh Ave., 45th to 47th Sts., was changed to Times Square.—18th Ann. Rep., Am. Scien. & Hist. Pres. Soc. (1913), 180; L. M. R. K., III: 970.

13 The first wireless press message is transmitted across the Atlantic.—Gibson & Cole, Wireless of To-day, 284.

14 A fire in Baltimore destroys $70,000,000 in property. It extends over 30 acres, comprising 75 blocks, with 2,500 buildings. (World Almanac, 131.) On the invitation of the Baltimore Stock Exchange, while the fire was still raging, the author's firm, Howells and Stokes, undertook to design a new building for the exchange. The designs to be completed within two weeks and the work of construction to be started at once. As a matter of fact, work on the new building was actually begun before the ruins of the configuration had ceased to smoulder, and the Stock Exchange was the first new building in the burnt over area to be occupied.

15 The first tunnel under the Hudson from Manhattan Island to Jersey City is completed, and W. G. McAdoo, builder of the tunnel, Cha. M. Jacobs, chief engineer, and a party of other officials make an inspection trip through it on flat cars drawn by cable.—N. Y. Herald, Mr 10 and 12, 1904; N. Y. Daily Tribune, Mr 12, 1904. The "tubes" were finished in 1903.—Ibid., S 59, N 1 and 2, 1902.

16 The board of aldermen passes an ordinance establishing a "Mayor's Bureau of Weights and Measures."—Proc., Bd. of Ald. (1904), 1: 626-30, 724-39, 896-76.

17 The department of parks is authorized to construct an extension to the Metropolitan Museum of Art at a cost not to exceed $1,000,000.—Ibid., S 47, N 19, 1904, chap. 168. The north wing of the Museum building (E) was built under this law. McKim, Mead & White were the architects.—Howe, Hist. of Met. Museum of Art. See Je 17, 1907.

April, 1904

18 Andrew Carnegie establishes a fund of $5,000,000 to provide for those who risk their lives for others, and for the widows and orphans of those who sacrifice their lives for others. This fund became known as the "Hero Fund."—N. Y. Herald, Apr 15, 1904.

19 At various times between this date and Oct. 10, 1906, the city acquired the land comprised in Chelsea (Alexander Hamilton) Park, bounded by Ninth and Tenth Aves., 27th and 28th Sts.—Pendergast, Record of Real Estate, 969. The demolition of the buildings on the site began in 1906, and the park was opened in 1907 (q. v.)—Ann. Rep., Dept. of Parks (1907), 56; L. M. R. K., III: 963.

20 The corner-stone of the new 6th Regiment armory, on the west side of Lexington Ave. between 25th and 26th Sts., is laid by Mayor McClellan.—N. Y. Herald, Apr 24, 1904; L. M. R. K., III: 923. The building was completed in 1906. Hunt & Hunt were the architects.—Tablet on interior wall.

21 An act is passed to assess and pay the damages sustained by owners of land in Twelfth Ave., between 125th and 135th Sts., by reason of the construction of the Riverside Drive viaduct.—Laws of N. Y. (1904), chap. 573.

22 The corner-stone of the present 71st Regiment armory, at the s. e. cor. of 34th St. and Park Ave., is laid on the site of the one destroyed on Feb. 22, 1902 (q. v.).—N. Y. Times, My 1, 1904; tablet in armory; L. M. R. K., III: 923; descrip. of Pl. 165-b, H. H. P. III: 929. The regiment took formal possession on Feb. 21, 1907.—N. Y. Times, F 22, 1907.

23 Congress creates a commission of seven to construct the Panama Canal.—Sullivant, Our Times (1906), 1: 457.

25 The commissioner of parks is authorized to transfer the custody of the Morris or Junell mansion (see D 28, 1903) to the local branch of the Daughters of the American Revolution, or to the Colonial Dames of America, for the establishment of an historical museum.—Laws of N. Y. (1904), chap. 601. See 1907.

15 On this date and on June 20, the heirs of Thomas Gardner (see June 22, 1801) sold Fraunces Tavern to the N. Y. Society of the Sons of the Revolution.—Liber Deeds, LXXXIII: 478-80; Section 1; L. M. R. K., III: 978; descrip. of Pl. 167-b, III: 820; Gy. Sun, My 19, 1904, and 19th Ann. Rep., Am. Scien. & Hist. Pres. Soc. (1905), 36. In 1906 (q. v., Ag), the building was completely restored from designs by Wm. H. Merriese.

26 The excursion steamer "General Slocum" is burned in the East River; 1,200 lives are lost.—N. Y. Herald, Je 16-26, 1904. See S 15, 1967.

28 As guests of John McDonald, contractor for building the Subway, Mayor McClellan, the members of the rapid transit commission and others take the first tour of the completed tunnel. For view of the two flat-cars which carried them, at City Hall Station, see P 75, Vol. V. In the picture, from left to right on front row are, John H. Starnin, Mayor McClellan, Alexander E. Orr (pres. of the commission) and second row, C. V. Forbes, Cha. Stewart Smith (behind post), Woodbury Langdon; third row, H. H. van Lennep, Paul D. Cravath, Richard Delafeld; standing (holding cigar), Mr. McDonald. Others in the party: Geo. S. Rice (acting chief engineer); E. P. Bryan (vice pres., Interborough Rapid Transit Co.); S. L. F. Deyo (chief engineer of the construction company), Cha. A. Coffin (pres., Gen. Electric Co.); President Underwood of the Erie R. R. etc.—N. Y. World, and Herald, JI 20, 1904.

29 The contractors for the rapid transit tunnel (Subway) under Battery Park exhume, at a point 20 ft. west of the centre line of State St. and 87 ft. north of the centre line of Bridge St., the monument erected by the common council in 1818 (see Je 25, 1817) to mark the site of the old Post House, at the west bastion of Fort George.—N. Y. Times, Jul 31, 1904; 10th Ann. Rep., Am. Scien. & Hist. Pres. Soc. (1905), 57-60. The monument was reset, in its present location, in 1907.—Kelley, Historical Guide to N. Y. City, 19.

The Hotel Astor, on Broadway between 44th and 45th Sts, is 5

1904

15 Apr.
In this year, the city began special classes for crippled children in the schools; in 1906, two schools for crippled children were established as private institutions and taken charge of by the board of education.—*Message of Mayor McClellan*, Ja 4, 1909, p. 55.

In this year, the removal of the line of telephone poles on West St., Tenth and Eleventh Aves., and Broadway, marked the disappearance of overgrown weeds in the Borough of Manhattan. An invention of Prof. Popin, of Columbia University, was put into practice before this time, greatly facilitated the operation of telephone wires in underground tubes or conduits.—*Message of Mayor McClellan*, Jan. 2, 1905, p. 6.

In this year, St. Gabriel's Park, bounded by First and Second Aves., 35th and 36th Sts., was opened to the public.—*Rep. of Park Com. (1906)*, 43; L. M. R., III: 971. See City Chron. illus.

In this year, Tiffany & Co. (see 1874, 1879) opened its new building at the n.e. cor. of Fifth Ave. and 171st St. —*New York Daily News* building at No. 32 Park Row, *The Times* moves into its new building, bounded by 42nd St., Broadway and Seventh Ave., designed by C. L. W. Eidlitz and Andrew C. MacKenzie, architects, the corner-stone of which was laid by Bishop Potter on Jan. 18, 1904 (q.v.). In less than ten years these quarters were too small for the expanding business of this newspaper, and another printing and publishing building was erected at 317 W. 43rd St., and named "The Times Annex." The eastern hall was occupied on Feb. 2, 1913; and the completed structure (Nos. 217 to 229) in 1924.—*The N. Y. Times: Its Spirit and Its Growth, 1851–1924 (pamphlet)*, 20–21; *11th Ann. Rep., Am. Socn. & Hist. Pres. Soc. (1916)*, 153.

Mayor McClellan, in his second annual message to the board of aldermen, says in part: "We must congratulate ourselves on the resourceful condition of the finances of the City, but the study of the figures emphasizes one feature which calls for special attention, and, if possible, remedy. As taxes for the year are imposed and collected in the fall, it is necessary, in order to make payments from the beginning of the year until the taxes are in, to issue Revenue Bonds in anticipation of their collection. In other words, we live through the following months on credit. Theoretically, the operation of this process means the redemption of the Revenue Bonds as the taxes come in, thereby finally balancing the budget and the treasury. Practical operation and experience show a far different result.

The practice of living on borrowed money from January to October costs the City annually $2,000,000 in interest, adding to the burden of taxation. A cure for this, for the accumulation of uncollected taxes and for the other weaknesses of our financial system must be had by legislation."

"I am in favor of municipal ownership and operation of an electric lighting plant to light the streets, parks and public buildings of New York."

I do not believe that government should engage in any service which can be done better or as well by private enterprise, or should invade business fields in competition with the legitimate trade of the citizen. Where service rendered by private corporations is unsatisfactory, either because of its inferiority or excessive cost, it becomes the province of government to take control of that utility for its own uses. The prices which the City is compelled to pay for gas and electric light are out of proportion with the cost of operation in other cities that they must be extortionate. No relief is in sight, as there appears to be an absence of real competition... we have the right to the free use of the conduits in which to place wires for the transmission of electrical currents. This right removes from the discussion a large element of expense, and seems to leave it open to the City, even if it should not build its own generating plant, to perhaps secure in the open market the electrical current, conveying it if necessary, from localities outside the City or State..."
THE ICONOGRAPHY OF MANHATTAN ISLAND

1905
Jan. 2

"I do not apprehend that the matter of purchasing the lamps and poles now in use or, if that is inadvisable or unprofitable, supplying others in their stead, would offer any serious problem.

In connection with this subject, it is suggested that still another economy may be effected by the utilization of the waste and refuse collected by the Street Cleaning Department, for this, it is urged by competent authority, will very likely generate all the current needed for lighting in streets, avenues, parks, docks and public buildings of the entire city.

The experience of many cities and towns in England, Scotland and Wales has demonstrated that their lighting has been made possible by employing their mixed refuse as fuel for the making of steam, which in turn is utilized in the generation of electric currents.

The numerous evidences of the City's amazing development which give so much satisfaction to the people, suggest at the same time important plans for the future. Our trade, commerce and population grow at a rate that makes calculations on the future of New York mount into stupendous figures. The progress of to-day must make provision for the greatness of to-morrow. The rapid transit system planned but four years ago has already been taken, and we have been put to new projects to keep pace with our expansion.

Yet there is another problem quite as important, if not as constant in the public mind as that of transportation. Health and the safety of property—two essentials to municipal advancement—demand adequate supply of pure water. When we have reached the limit of our supply, we have reached the limit of our growth. . . .

Expenditures now to secure our supply will, I feel confident, be regarded as judicious and economical investment when the city of four millions shall have attained ten million inhabitants. . . .

Since we are at the advantage of being supplied from distant watersheds and piping it down from the higher levels up-State, the water should be made to earn its own passage. Experts have estimated that many millions of horse-power may thus be created and put to many uses to bring revenues to the city. Only an insignificant part of this power, for example, would be needed to provide the energy to light the city with electricity.

This problem is vital to the other boroughs as it is to Manhattan and the Bronx.

"Although large appropriations have been expended in almost every variety of improvement and extension, and will be continued on a generous scale, the water supply and service of Brooklyn do not, in consequence, measure up to the standard required for that rapidly growing borough. Manhattan and the Bronx are better provided and this fact alone will meet the future demands, enormous as their consumption is, amounting to 577 million gallons a day. Although Brooklyn's supply has been increased 113 million gallons daily during the past year, its consumption has correspondingly increased 134 million gallons per day.

Brooklyn's needs are partially supplied by private enterprise. As far as matters more than half the territory of Queens Borough and almost the whole of Richmond Borough are similarly supplied. The increasing demand of the citizens of those two boroughs for the enlargement and improvement of their water supply service may ultimately result in their being entirely supplied by the City.

Incidental to the subject of water supply service is the high-pressure fire-service system, whose installation was authorized less than a year ago. Insurance interests and business interests generally may be gratified to learn that the Department of Water Supply expects to have it ready for operation during the present year (1905). Its necessity was so apparent that I recommended its installation in this borough in the territory in which the dry goods district and the lofty office buildings are located, and on Governors Island, in the Borough of Brooklyn, and appropriations were granted accordingly.

We may derive satisfaction from the fact that in the first year of this administration more money has been appropriated and expended for school buildings, and more sitting have been contracted for than in any previous year in the history of The City of New York.

The opening of the Rapid Transit Subway and the demonstration of its success is a cause for congratulation to the public of this city.

The necessity for further subway facilities, notably on the East Side, where transportation lines are now almost overwhelmed by the crowds of the rush hours, must be kept continually in mind and provided for as promptly as possible. . . .

The administration of the Tenement House Department has effected notable progress in the enforcement of thorough and uniform enforcement of the Tenement House Law. The object held paramount in this work has been the bettering of the condition of the poor without undue hardship to the property-owners affected by the requirements of the law and necessities of modern sanitary and moral advancement among the multitudes sheltered in these swarming habitations. Discrimination and favoritism have been avoided as the method of making the improvements involve neither injustice nor hardship.

"The practical elimination of the social evil, with its deadly moral contamination, from the homes of the people is a most important and beneficent effect of the work of this department. The improvement of physical conditions has included special attention to provisions for the erection and maintenance of adequate fire-escapes upon tenement-houses to minimize the danger to life from fire in non-fireproof structures used for this purpose. Light and ventilation for living rooms to conform with the provisions of the law received attention as of scarcely less importance in life and health-giving results. . . .

"In the Department of Parks conditions were found presenting greater and peculiar difficulties in the execution of our plans.

"In the thickly settled parts of the City the need of new parks and playgrounds, and the proper care of the established popular pleasure grounds were both pressing and important questions. In the outlying districts the improvement of the splendid areas of park territory provided for the future could not be ignored. It was found that the policy had apparently been to neglect the conservation of existing valuable and important park features to lavish attention and expenditure on new projects. Even in this direction, however, great discrepancies were found between that which had been proclaimed as completed work and that which was really in an efficient and practical condition. Substantial progress has been made all over the City in remedying this state of affairs. . . .

"In morale and efficiency the Police force of The City of New York stands any similarity in the world. In many respects it is an inferior organization, and the wonder is that it executes so well the infinite variety of tasks thrust upon it. The force has not increased proportionately with the population, property value and needs of the five boroughs. It is almost impossible, therefore, to afford the people of this City at all times the fullest measure of police protection to which they are justly entitled. . . .

"The disparity of great importance is immediately 35,000 families. It is estimated, having vacated their homes on Manhattan Island, owing to the construction of railroad terminals, bridges and lesser improvements, the most of them having sought the outlying districts of Brooklyn, Queens and The Bronx.—has increased police necessities elsewhere. To meet these, constant drafts have been made upon the main force in Manhattan, and this means, in its fullest significance, lessened police protection for that borough. These drafts must continue with the completion of bridges, terminals and subways, all of which will require police assistance for the regulation of traffic and the protection of the traveling public.

"Another drain upon the regular patrol force is in the demand for special assignments, which is legitimately increasing year by year. The Slocum disaster taught the necessity for detailed policemen to accompany the excursion boats in the sumer. Separate assignments are also required for recreation piers, parks, playgrounds for the children, night schools, concerts, baths, theatres, the regulation of street traffic and the increasing number of nearby summer resorts, and to that extent they tax the regular force at the expense of our two largest boroughs.

"The three-platoon system which has been adopted during the year has justified the expectations and hopes of its friends and advocates. It increases the patrol force by one-third during the day, when most needed. . . .

"A Bureau of Street Traffic Regulation was established by the Police Department in July, which is rendering valuable service in enforcing the Rules of the Road adopted by your Honorable Borough.

"The general testimony is that there has been a decided improvement in the movement of street cars and vehicular traffic, and that pedestrians are assured far greater safety. There has
Chronology: The Modern City and Island: 1876-1909

1905

1. A marked decrease in the number of accidents to the latter in the congested districts and at dangerous crossings.

2. "The work of the Municipal Civil Service Commission is of growing importance. The code of rules in force under the Civil Service Law and the City Charter has been gradually extended in operation, in compliance with the point of the law to govern all appointments, promotions or other changes of status, whether temporary or permanent, in 98 percent of the public service, excepting elective officers, heads of departments, principals and teachers in the schools. This comprehensive system is not a creation of statute laws alone. It is incorporated in the Constitution of the State and has been accepted as a permanent part of our public policy."

3. "The most important object to be sought, in my judgment, is to improve the examination system itself. The common-sense methods lately introduced are steps well taken in that direction. Capacity and fitness for the service required are the real questions to be determined, and it is quite impossible to do this by a purely academic standard. Better results would follow if the opportunity for candidates to compete were offered more frequently. Entrance to the City service should not be barred for such long periods as the present practice involves. This is not democratic, as the principle of competition in itself essentially is, and it is not businesslike.

4. "The efficiency of the Fire Department has been largely increased during the year 1904, not only by the addition of 419 firemen, but also by the repair of an old fire-boat, the building of a new one and various improvements of that character.

5. "Precautions taken by the City Government to prevent the recurrence of such a disaster as the Iroquois Theatre fire in Chicago, in December, 1903, have evidently been effective, for the insurance companies have dimmed the risk of such an event by reducing the rate of insurance in a marked degree.

6. "The most pressing need of this Department at the present time, and of a part of the City, is the extension of the paid Fire Department system throughout the more thickly settled sections of the boroughs of Richmond and Queens."

7. "Additional storage reservoirs in the Croton water-shed (see O 29, 1892) are recommended to the aqueduct commissioners by J. Waldo Smith, chief engineer. He emphasizes that the fact "that the creation of additional storage in the Croton Valley will not in the least degree add to the flow of the Croton River; but, by saving water which would be wasted over the New Croton Dam, will add about 1.5 cubic feet per day to be safely drawn for the supply of the city." The Aqueduct Commissioners Report on advisability of constructing Additional Reservoirs in the Croton Watershed (1905).

Feb.

1. Work is begun on the Brooklyn anchorage of the Manhattan Bridge, spanning the East River from Canal St., Manhattan, to Nassau St., Brooklyn. Work was begun on the Manhattan anchorage in April—Ann. Rep., Dept. of Bridges (1912), 47. On Dec. 31, 1909, the bridge was formally opened for traffic by Mayor McClellan. Its length is 6,618 ft; the final cost was $26,572,900.

2. Ibid. See also N. Y. Herald, Jan. 1, 1910.

3. The Hon. Robert B. Roosevelt, uncle of Pres. Roosevelt, invites to his residence, at No. 57 Fifth Ave., the representatives of various patriotic and historical societies, "with a view to effecting an organization for the purpose of celebrating in 1909 the three hundredth anniversary of the exploration of the Hudson River by Henry Hudson in 1609." A committee is appointed to request Mayor McClellan and Gov. Higgins to name committees of citizens of the city and state of New York to act jointly in arranging for such a celebration. These officials selected 150 gentlemen, who constituted the "Hudson Ter-Centenary Joint Committee."
The first meeting of the committee was on Dec. 16. Later, it was decided to combine this committee with the "Fulton Centennial Committee," which had been appointed to arrange for the celebration in 1907 of the first practical application of steam to navigation, and to hold the joint celebration in 1909. The two committees were therefore merged, in 1906 (g.t., Aug. 7), into the Hudson-Fulton Commission. Official Min. of Hudson-Fulton Celebration Comm., I: iii, vi-vii, 7-14.

Mar.

4. The Colony Club is incorporated. Its club-house at 120-124 Madison Ave. was completed in 1907 (p.v., Mr. Sub, from designs by McKim, Mead & White—Club Book, L. M. R. K., III: 937.

Theodore Roosevelt is reinaugurated as president.—N. Y. Daily Tribune, Mr. 5, 1905.

5. The Columbia University Club moves into its new club-house at 18 Gramercy Park at the s.w. cor. of Irving Pl. and 20th St.—Columbia Alumni News, F. 7, 1918; L. M. R. K., III: 937. On Feb. 1, 1918, it moved from Gramercy Park to its present location at 4-16 W. 43d St. (formerly the Hotel Renaissance.)—Ibid., F 15, 1918.

6. The Hippodrome, on the east side of Sixth Ave. between 43d and 44th Sts., is opened. It has an immense stage, and is finished with the most complete machinery for presenting elaborate spectacles, including a huge stage under the lower level. The Tribune, Ap 12 and 13, 1905; L. M. R. K., III: 948.

7. Henry Phipps, John W. Arbuckle, Chas. S. Brown, Robert W. de Forest, George E. Gordon, Elgin R. L. Gould, Wm. S. Hark, George B. McClellan, Chas. A. Moore, John S. Phipps, Chas. S. Smith, Isadore Strauss, Alfred T. White, Myles Tierney, and their associates are incorporated "by the name of 'Phipps houses' for the purpose of providing tenement or other housing accommodations for the working classes in the city of New York or in other cities of the state of New York or elsewhere."—Laws of N. Y. (1905), chap. 269.

8. The Y. Juvenile Asylum moves from 175th St. and Amsterdam Ave. (see 1852) to Chauncey, N. Y.—Ann. Rep., N. Y. Juv. Asylum (1905), 20. It is still there.—Am. Medical Directory (1925), 1046. The old asylum building, abandoned and sold at this time, was subsequently demolished.—Letter to the author from the superintendent. See also L. M. R. K., III: 955.

10. At five sales held between this date and April 12, 1907, the library and collection of Americana belonging to Wilberforce Eames were sold at auction.—From list of important sales held at The Anderson Galleries.

21. The terms of the mayor, comptroller, and borough presidents of Greater New York are increased to four years.—Laws of N. Y. (1905), chap. 613.

11. An act is passed by which the mayor is authorized to appoint three commissioners, to be known as the "Board of Water Supply of the City of New York," to whom is entrusted the duty of ascertaining, with all possible speed, what sources exist and are most available and best for securing an additional supply of pure and wholesome water for the city of New York, of acquiring lands and of constructing the necessary reservoirs, dams, and aqueducts.—Laws of N. Y. (1905), chap. 724. See Je 9.

12. The legislature authorizes New York City to utilize its water supply "for the purpose of generating electric current for the use of municipal purposes."—Laws of N. Y. (1905), chap. 734.

13. The legislature fixes the rates at which electric current shall be sold in and to the city of New York.—Laws of N. Y. (1905), chap. 732. and 731. It also fixes the price at which gas shall be sold to the city.—Ibid. (1905), chap. 736.

14. The legislature creates a commission of gas and electricity, with power to "regulate the prices of gas and electricity, and certain other electric services" and to supervise "gas, electric light and other electric corporations." The sum of $600,000 is appropriated for the use of the commission.—Laws of N. Y. (1905), chap. 737.

15. Mayor McClellan appoints J. Edward Simmons, Charles N.
More than 200 people, mostly writers of fiction, tender a dinner Dec. at Delmonico's to Mark Twain on his 70th birthday. The speakers include Andrew Carnegie, Wm. Dean Howells, Brander Matthews, George W. Cable, Kate Douglas Wiggin, Richard Watson Gilder, Henry van Dyke, John Kendrick Bangs, Amelia E. Barr, Hamilton W. Mahie, Carolyn Wells, Irving Bachelor, Rex Beach, F. Hopkinson Smith, and Agnes Repplier.—*N. Y. Daily Tribune*, D 6, 1905.

The corner-stone of the Engineers' Club at No. 32 W. 40th St., opposite Bryant Park, is laid.—*N. Y. Daily Tribune*, D 27, 1905.

1906

Many amendments to the Greater New York charter have been enacted at every session of the legislature since 1901 (q.v., Ap 22), and there have been numerous decisions of the courts construing its provisions. The most notable changes have been in the direction of the further concentration of power over municipal affairs in the board of estimate and apportionment. "By an amendment made this year, the entire procedure in reference to the acquisition of title to lands for public purposes was remodeled and a new system established. Commissioners of estimate and assessment in these proceedings are no longer appointed. Instead, the courts name three persons who shall be commissioners of estimate, and at the same time designate the number of one of them to act as commissioner of apportionment. The commissioners of estimate are required to determine the damage to property taken, while the commissioner of assessment assesses the property in the same manner as was done under the former system. The commissioner of apportionment then subdivides the assessed value of the property required, takes the result, and apportions it to the right parties."—*N. Y. Daily Tribune*, D 6, 1906.

In this year, the Society of Iconophiles published *An Index to the Illustrations in the Manuals of the Corporation of the City of New York, 1841-1870*. The introduction sketches the life of Valentine, and describes a set of the Manuals. It was written by William Loring Andrews. The Index was compiled by Richard Hoe Lawrence, who was secretary of the society. The index proceeds as follows: Plates and maps to a full set in the order of the annuals; maps and plans of the city of New York and vicinity; miscellaneous maps; facsimiles, letters, signatures, documents, broadsides, and certificates. There is also a general index. The edition of this useful guide to the illustrative matter in the Manuals was limited to 250 copies. See also 1841.

In this year, a special school for backward and defective children was established in Public School 120, Manhattan.—*Message of Mayor McClellan*, Ja 4, 1906, p. 55.

In this year, Thames Street, which was ceded to the city by Nicholas Bayard in 1749 (q.v., Mr 10), was closed, and a new Thames St. about nine feet wider was opened, the south line of which is about six feet north of the old line of the street. The change was made with the request and consent of the "Numerous Tenants of Eleven Broadway" (a New York corporation), which, on March 2, through the "Local Board of the Bowling Green District," petitioned the board of estimate and apportionment, and agreed to convey to the city its property in the bed of the new Thames St., in exchange for the land in the bed of old Thames St. from Broadway to Trinity Place and the land in the bed of Temple St. from old Thames St. to Cedar St. The purpose of the change was to create a plot wide enough for development between Trinity Churchyard and the new street. The city agreed to the exchange, and the two deeds were recorded on May 24. The "Trinity Building" (No. 111 Broadway) was erected at the south-west corner of the new Thames St. and Broadway, extending westerly to Trinity Place, and the "U. S. Realty Building" (No. 115 Broadway) was erected on the north-west corner. These two buildings are owned by the Trinity Buildings Corporation.—*Letter to the author* (dated D 30, 1925) from R. G. Babcock, president of U. S. Realty and Improvement Co.; *Liber 99*, Section I, of *Gazettees*, pp. 493, 498; *L. M. R. K.*, III: 1910.

The south wing of the west façade of the American Museum of Natural History was in process of building from 1906 to 1908.—*Growth of the Bldg., of the Am. Museum of Nat. Hist.* (1911).

In this year, Henry James wrote rambling reflections under the title "New York Revisited," which were published in *Harper's Mag*, for Feb, Mar, and May; and also about the city of Washington, for the *North Am. Review*, May and June.

---

2060 THE ICONOGRAPHY OF MANHATTAN ISLAND

Chadwick, and Charles A. Shaw, as the board of water supply, organized under the authority of the law of June 3 (q.v.)—*Catshill Water*, 1905-15, 15. See O 57.

The Fulton Centennial Committee," consisting of 100 citizens appointed by Mayor McClellan to arrange for celebration, in 1907, the first use of steam in navigation, organizes at the city hall and elects Wm. McClellan chairman and James H. Kennedy secretary.—*N. Y. Tribune*, Jl 14, 1905; *World Almanac* (1908), 401. This committee and the "Hudson Ter-Centenary Joint Committee" (see F 15) were later merged into the Hudson-Fulton Celebration Commission (see Ap 27, 1906).

Aug. St. Thomas's E. Church, at the w. cor. of Fifth Ave. and 52d St. (see Ap 3, 1852), is almost totally destroyed by fire.—*N. Y. Herald*, Ag 9, 1905. On Nov. 21, 1911, the cornerstone of a new building, designed by Cram, Goodhue & Ferguson, was laid on the same site. See N 22, 1911, for the construction of the new edifice, services were held in a temporary wooden structure built within the ruins; this was first used on Oct. 4, 1913. The new church was consecrated on April 26, 1916.—*Ibid.*, N 25, 1923.

The 145th St. Bridge, extending across the Harlem River from Lenox Ave. and 145th St., Manhattan, to Exterior St. and 149th St., Bronx (see Jl 11, 1895), is opened to traffic.—*N. Y. Times*, Ap 13, 1905; *Annals of Bridges* (1912). See also Message of Mayor McClellan, Ja 4, 1905, p. 61.

The Hotel Gotham, on the south-west corner of Fifth Ave. and 55th St., is opened. His & Whites's were the architects.—*N. Y. Daily Tribune*, O 1, 1905; L. M. R. K., III: 799.

Oct. Plans of the board of water supply (see Je 9) for bringing water to New York; City from the Catshill Mountains are approved by the board of estimate and apportionment. In May, 1906, they were approved by the state water supply commission.—*Rep. of the Ed. of Water Supply*, O 12, 1917, p. 4. See Mr, 1907.

De Witt Clinton Park, bounded by the Hudson River and Fourth Ave., between 52d and 54th Sts., is formally opened to the public.—*Rep., Dept. of Parks* (1906), 555; L. M. R. K., III: 966. See My 15, 1901, and 1902.

Prince Louis of Battenberg arrives at New York with a fleet of six British cruisers, and is enthusiastically welcomed. During his stay he was officially received by Mayor McClellan at the city hall, attended a banquet at Delmonico's, went to the horse-show at Madison Square Garden, and to the Lambs' "gambol," gave a ball on board his flagship to about 4,000 people, and dined at the house of Mrs. Astor. He sailed on Nov. 20.—*N. Y. Daily Tribune*, N 10-21, 1905.

Several thousand Jews parade through the streets of the lower East Side in public mourning for their massacred brethren in Russia.—*N. Y. Daily Tribune*, N 24, 1905. On Nov. 26, a meeting was held to encourage the plan for arming the Jews in Russia for self-defense.—*Ibid.*, N 27, 1905. Another mourning parade was held on Dec. 4.—*Ibid.*, D 5, 1905. About $2,000,000 was raised through out the U. S. for the relief of the sufferers.—*Ibid.*, N 19, 13, 15, D 3 and 22, 1905.

Special services are held in the various synagogues of the city "in commemoration of the 250th anniversary of the landing of Jews in the United States."—*N. Y. Daily Tribune*, N 26, 1905.

The 250th anniversary of the Jews in the U. S. (that is, the founding of a Jewish community in New York City in 1657) is also celebrated by addresses in Carnegie Hall.—*N. Y. Daily Tribune*, D 1, 1905.
In his annual message to the board of aldermen, Mayor Mc-

Claran says in part: "A great advance has been made during the
past twelve months toward solving the problem of a satisfactory and
economical scheme of public lighting The Board of Estimate and Appo-
intment has authorized the purchase for sites for the erection of electric lighting plants in the boroughs of Man-
hattan and The Bronx, boroughs of Brooklyn and Queens and the
borough of Richmond."

"In this connection, mention should be made of the success
which has attended the establishment of an incinerator under
the Williamsburg Bridge by the Department of Street Cleaning, for
the double purpose of disposing of its rubbish waste and of thereby
obtaining an electrical current sufficient to light the Williamsburg Bridge. The plant daily destroys 1,500 cubic yards
of waste, and in such destruction develops an energy equivalent to
400 horse power per hour, which is translated into 150 kilowatts of
electricity. Thus an electrical current is generated which is more than
sufficient to light the whole bridge structure."

The board of Estimate is able to report that during the
year just closed contracts were let for twenty-one new school buildings
and thirty-one new additions to old school buildings, which,
when completed, will furnish 55,050 sittings. During the year
26,750 sittings were provided.

"Striking evidence of what New York is doing for the immigrant
through its night schools is found in an enrollment of 47,429 non-
English speaking persons of the total registered of 91,976 in the
high schools and seventy-two elementary schools maintained for
those who cannot attend day school."

"In humanitarian progress New York has outstripped any other
municipal corporation in the record for the year. The new Bellevue
Hospital is at last under way. Willard Parker Hospital is about
completed. Provision has been made for the new buildings which
North Brother Island has so long needed. Our hospital service has
been extended by Fordham Hospital and Harlem Hospital, the
contagious disease hospital in Brooklyn and the hospital for con-
valves who have been admitted to Coney Island. Sites have been acquired for a
sanitarium for consumptives up-State, and a tuberculous sanitarium on
Staten Island. A new training school for nurses has been ordered for
Bellevue."

The administration has provided for the removal of the Kings
County Penitentiary, and for a reformatory institution on Hart's Island.

"The ferry which the City owns and operates between the Bor-
oughs of Manhattan and Richmond has been running more than two
months. This ferry, taken over by the City because private enterprise
had failed to provide satisfactory service, seems to be accom-
plishing what was sought."

"The City of New York is rich beyond all others in the extent
and character of its shore front. Within its limits or directly con-
tiguous thereto, are many miles of ocean beaches practically none
of which is owned by the public. Provision must soon be made
by the City towards securing fresh-air homes for children and conv-
avescent patients from the City hospitals, as well as breathing
spaces for the whole people."

"I know of no more ideal location for such fresh-air resorts than one
of the beaches on the Long Island shore."

"I believe that a considerable saving can be effected in some
departments by reducing the number of so-called department orders,
and by buying such supplies for longer periods at public letting.
I shall insist that the city acquire hands to so estimate their require-
ments that the City may get full advantage of competition."

The city acquires by condemnation proceedings the land
bound by Broadway, Hamilton Place, and 13th St. Here
Montefiore Park was developed.—Prendergast, Record of Real

The U. S. Government purchases, for $1,660,111, the
land bounded by Eighth and Ninth Aves., 31st and 32nd Sts., as a site
Dept. (1910), p. 418. The building was begun in 1911 and
opened in 1914. McKim, Mead & White were the architects.—30th Ann. Rep.,
In 1915, it cost $7,419,042.

From Jan. 17 to 27, the collection of Heber R. Bishop, deceased,
consisting of paintings, Oriental porcelains, bronzes, lacquers,
Japanese swords, ivory carvings, and rugs, was sold at the Am. Art
Galleries, yielding $422,019.75. His splendid collection of jades was
bequeathed to the Metropolitan Museum of Art.—A Plan, etc.,
op. cit.

"England," the first of the marble statues representing the
two nations, is placed in position on the north front of the new custom-
house at Bowling Green.—N. Y. Daily Tribune, F 1, 1906.

The legislature passes a law to terminate immediately the use
of streets, avenues, and public places, in the Borough of Man-
hattan, by railroads operated by steam locomotive power at grade.
It supplements the Rapid Transit Act.—Laws of N. Y. (1906),
chap. 109. Notwithstanding this law, steam locomotives are still
in use (1926) on Eleventh Ave.

The city acquires the land at 25th St. and East River on which
to build a nurses' training school.—Prendergast, Record of Real
Estate (1914), citing Liber Deeds, 123, p. 366.

Earthquake and fire destroy the greater part of the city of San
Francisco. About $20,000,000 was immediately raised throughout
the country for the relief of the sufferers. New York City sent over

In the following year, the author's firm, Howells and Stokes, designed and
built in San Francisco, a practically earthquake proof skycraper
office-building for the Royal Insurance Co. A heavy iron mesh netting was built into the outer walls of this building, similarly to
wire-netting in wire glass, so that in case of an earthquake the
masory would be held together and prevented from shaking loose.
The legislature authorizes the governor to appoint three com-
missioners "to confer with the governor and the legislature of the state
of New Jersey, or the duly designated representatives thereof,
who shall purchase the land and buildings on the Hudson river
from the city of New York to the state of New Jersey at the just
price of the two states." The sum of $1,000 is appropriated for the ex-
penses of the commission.—Laws of N. Y. (1906), chap. 260.

On May 7, 1907, the legislature directed that the commission, "to-
gather with the bridge commissioner of the city of New York and
an additional member to be appointed by the mayor of the city of
New York, shall confer with the governor and the legislature of the
state of New Jersey or the duly designated representatives thereof,
for the purpose of fully investigating the project of the construction
of one or more bridges over the Hudson river from the city of New
York to the state of New Jersey at the joint expense of the two
states." The act provides that the legislature thereupon including proposed legislation in furtherance thereof. It appropriated $5,000 for expenses. Ibid. (1907), chap. 319. See also ibid. (1908), chap. 218.

The city is authorized to agree with the trustees of Columbia
University for the filling in of the land under water fronting upon
Riverside Park from 116th to 120th St. and for its use as an athletic
field and playground for the college.—Laws of N. Y. (1906), chap.
104. Designs for this development were prepared by Henry Horn-
bostel, but were never carried out.

On this day and on May 23, the city acquired the land comprised
in the municipal playground for children at 50th St. and Tenth
Ave.—Prendergast, Record of Real Estate, citing Liber Deeds, 116,
p. 27, and ibid. 115, p. 27. A new city park, which the city acquired by condemnation proceedings, is comprised
in the municipal playground for children at 184 Cherry St. (86.10 x 214.2 feet).—Prendergast, Record of Real Estate, citing Liber Deeds, 105, p. 37. An
undated map showing eight playground sites on the lower East Side is
filed as map No. 47 in real estate bureau, comptroller's office.

The members of the " Hudson Ter-Centenary Joint Committee"
(see p. 15-1907) and of the "Hudson Ter-Centenary Commission, "" the latter being incor-
porated by the legislature as the "Hudson-Fulton Celebration
Commission," whose object is "the public celebration or commemora-
tion of the Ter-Centenary of the discovery of the Hudson River by
Henry Hudson in the year sixteen hundred and nine, and of the
first use of steam in the navigation of said river by Robert Fulton
in the year eighteen hundred and seven, in such manner and form,
whether permanent or temporary, as may be found appropriate by
the said commission," the sum of $25,000 is appropriated by the state
for the celebration, and New York City is authorised to provide
further sums. The duration of the corporation shall be ten years.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1906—Laws of N.Y. (1906), chap. 315; Official Min. of Hudson-Fulton Celebration Comm., I: 79-84. The commission organized on May 4
27 with Gen. Stewart L. Woodford as president, and thereafter conducted arrangements for the celebration.—Ibid., I: iii-iv, 86-92.

The Rockefeller Institute for Medical Research (see Je 2, 1901) formally opens its own buildings, consisting of a laboratory, an animal house, and a power house, extending along the East River from 65th to 67th St. The buildings were designed by Messrs. Shepley, Rutan and Coolidge of Boston.

The land had been conveyed to the Institute by Mr. Rockefeller in June, 1904.—N. Y. Times, May 12, 1906; Rockefeller Inst. for Med. Research, Hist., Organization & Equipment (1911), 7. "In 1907, the work of the Institute was placed on a permanent endowment basis by a gift from Mr. Rockefeller of $2,620,610 as an endowment fund. During the same year, the Board of Directors were invited to submit a plan, which had been maturing since the foundation of the Institute, for an important extension of the field of medical research, namely a means of studying human disease in its clinical aspects, under conditions as near as possible to laboratory standards of exactness and efficiency. The acceptance of this plan was accompanied by a pledge of $500,000 in 1908 for the erection of a Hospital [at 65th St. and the East River]. This sum was augmented by the grants amounting to $790,000 and a balance of $277,457.67 remaining unspent from the pledge of 1902. Messrs. York and Sawyer of New York City were chosen as architects. The cost of the Hospital building and equipment was about $900,000. On October 17, 1910, the new Hospital and Isolation Pavilion were formally opened and patients were admitted for treatment.—Ibid., 7-8.

Gov. Higgins signs the Elderberg bill permitting the separate construction and operation of rapid transit lines in N. Y. City.—Laws of N. Y. (1906), chap. 472; Harper's Popular Encyclop. of U. S. Hist., Vol. IX.

Free School No. 1, the parent of the public school system of New York City (formerly at Tryon Row and Chatham St., where the municipal bldg. now stands—L. M. R. K., III: 940), celebrates its 100th anniversary, in its present building in Henry St., between Catherine and Oliver Sts.—N. Y. Daily Tribune, May 18, 1906.

The direct state tax in New York is abolished for the first time in 65 years by the passage of the Page mortgage-recording tax bill, entitled "An Act to amend the tax law in relation to the taxation of mortgages of real property."—Laws of N. Y. (1906), chap. 533; Harper's Popular Encyclop. of U. S. Hist., Vol. IX.

The city of New York, being authorized by the State Legislature to appoint five commissioners, at least three of whom shall be sanitary engineers, whose duty it shall be to continue the work of the New York Bay pollution commission, established in 1903 (q.v., My 11), and to extend the work as follows:

(a) To make further investigations into the present and probable future sanitary condition of the waters of New York bay and other bodies of water within or adjacent to the several boroughs of New York city and neighboring districts;
(b) To consider and investigate the most effective and feasible means of permanently improving and protecting the purity of the waters of New York bay and neighboring waters, giving particular attention to the following subjects:

1. Whether it is desirable and feasible for New York city and the neighboring counties to cooperate upon a general plan or policy of sewage and sewage disposal which will protect the waters of New York bay and vicinity against unnecessary and injurious pollution by sewage and other wastes;
2. Whether methods of collecting and disposing of the sewage and other wastes which pollute, or may eventually pollute, the waters contemplated in this act are most worthy of consideration;
(c) Whether it is desirable to establish a sewage district in order properly to dispose of the wastes, and adequately protect the purity of the waters, contemplated in this act, and, if so, what should be the limits and boundaries of this sewage district;
(d) What would be the best system of administrative control for the inception, execution and operation of a plan for sewage and ultimate sewage disposal, of a metropolitan sewage district; whether it should already exist in the County or Counties or other existing units of government, by the establishment of separate and distinct sewage districts and permanent commissions in each state, by one interstate metropolitan sewage district and commission to be established by agreement between the two states, this agreement if necessary to be ratified by congress, or by other means.

May 19. To cooperate with any duly authorized body or commission having similar authority in the state of New Jersey, in the joint investigation and consideration of the various subjects specified in this act.
4. To submit a detailed report to the mayor on or before Feb. 1, 1909.

The city is authorized to raise $150,000 for the expenses of the commission.—Laws of N. Y. (1906), chap. 635. See also ibid. (1908), chap. 432. The reports of the "Metropolitan Sewage Commission," appointed as provided in this act, were published in 1910, 1912, and 1914.

The legislature passes an act "to provide for a better arrangement, indexing and preservation of the records, documents, books, maps and papers, deposited or filed in the office of the clerk of the county of New York."—Laws of N. Y. (1906), chap. 681.

The post-office section of the new custom-house (see O. 7, 1902) is opened.—Letter of Dec. 8, 1911, to the author from the architect, Cass Gilbert. Up to this year, the aggregate cost of the custom-house, appropriated by congress, was $719,477.—Ann. Rep., Supervising Archt., U. S. Treas. Dept. (1906), 82.

The First Presbyterian Church, at Fifth Ave. and 11th St., celebrates the 200th anniversary of the "organization of the first Presbyterian in America," N. Y. Daily Tribune, May 20, 1906.

The common council appropriates $4,285 for labour and material for "painting, cabinet and carpenter work, ornamental plaster work," etc., in the city hall, including "the redecorating and re-furnishing of certain rooms in the said building known as the three (3) Governor's rooms."—Ord., etc., App'd by Mayor (1906), 230. Bernstein & Bernstein, who made the alterations in the governor's room, attempted to restore it to its original design, but the work was so badly done that it prompted a gift made by Mrs. Sage in 1908 (q.v.) for the room's correct restoration. See also Ap 2, 1907.

A tablet marking the site of the provost prison, which was unveiled in 1901 in the old hall of records and which since the tearing down of that building has been lying in a stone vault, was conveyed to the Mary Washington Colonial Chapter, D. A. R., on a short column of rough grey stone under the trees just south-east of the city hall.—N. Y. Daily Tribune, Je 21, 1906.

Excavating for the Singer building at 149 Broadway, on the n. w. cor. of Liberty St., is begun. The building was practically completed by May 1, 1908. It was when completed the highest office building in the world. Engineering was the architect.—Sears' Hist., of Singer Bldg. (1908); L. M. R. K., III: 986; descrip. of Pl. 163, III: 846.

Stanford White, the New York architect, is killed by Harry K. Thaw, on the roof of Madison Square Garden.—N. Y. Daily Tribune, Je 26, 1906.

Congress authorizes contracts for the enlargement, extension, remodelling, or improvement, of the assay office (see 1899), including necessary changes, alterations, and repairs incident thereto. The cost is not to exceed $150,000.—Statutes at Large, XXXV: 774; Ann. Rep., Supervising Archt., U. S. Treas. Dept. (1909), 206. An extension was built on Pine St. in the rear of the Wall St. building, and was occupied in 1912. The old building on Wall St. (originally the U. S. Branch Bank) was demolished in 1915, its huge façade being taken down and stored in the attorney general's office, and stored on a lot on the upper East Side belonging to the Metropolitan Museum. Here it remained until 1931, when it was re-erected by Grosvenor Atterbury as the southern façade of the "American wing" of the Museum. The present building on the Wall St. site was erected by York & Sawyer in 1917-8, as a wing of the new assay office on Pine St.—Ibid. (1917), 1491 (1912), 115 (1917), 279; Verplanck, The Site of the Assay Office (1921); descrip. of Pl. 57: I: 430 and Pl. 166, III: 848; L. M. R. K., III: 924, 975.

Capt. Alfred Dreyfus is completely vindicated of the charges preferred against him in 1894 (q. v., O), and is promoted to the rank of major in the French army.—Hazen, Europe since 1815, 363.

The city acquires from Wm. C. Schermerhorn the land comprising the playground at 65th St. and First Ave.—Prendergast, Record of New York Estates, fourth Am. ed., p. 463.

During August and September of this year, Francies Tavern was entirely reconstructed by the Sons of the
The festivities in commemoration of Henry Hudson

The Netherlands people have had a gloomy remembrance of the end of the two great men, Piet Hein and Henry Hudson, for two centuries. The date of Hudson's death is observed in New York as a state holiday. In the year 1848 a movement was started to erect a monument in his memory. This was not completed until 1875. The present monument is the work of the sculptor, William A. Vandervest.

Hudson Fulton Celebration Commission

In New York on 26 Sept. 1909, in the presence of the representatives of the United States of America, the Kingdom of the Netherlands, the Province of New York, the City of New York, and the People of the United States of America, a monument was unveiled in memory of Henry Hudson and the explorers who accompanied him on his voyage of discovery.

Address from the Netherlands Hudson-Fulton Celebration Committee Presenting a Replica of the "Half Moon" to the Hudson-Fulton Celebration Commission on Sept. 25, 1909. See pp. 2077-78
THE MODERN CITY AND ISLAND: 1876-1909

1906

Aug.

Revolution to conform to its original design. The eastern wall was completely removed, together with the first, fourth and fifth storey walls on the Pearl and Broad St. sides, leaving most of the brickwork of the second and third storeys on the Pearl and Broad Sts. sides supplied in storey and tiers. During this process, the architect (Wm. H. Meserveau) came to the conclusion that the Broad St. wall was originally of small yellow Dutch brick and the Pearl St. wall of a larger sized red brick, and he followed this diversity in his reconstruction. "In rebuilding the tavern all of the original material that could be identified was retained. This comprised some of the little yellow Dutch brick work of the second and third stories on the street side and some of the red brick work of the same stories on the Pearl street side. To complete the Broad street wall and the yellow brick trimmings, about 15,000 bricks were imported from Holland, it having been found impossible to get them anywhere else. The first floor was raised again to its former level [see Jl 1892]. The celebrated 'Long Room' was reconstructed according to its original dimensions, and the old, hewn, oak floor timbers which were under it when Washington stood in the original 'Long Room' were replaced, as were the original timbers in the tier above. The old hewn beams also still exist in the hall way and in the floor and ceiling of the second and third stories on the Pearl street side.

"In handling the roof, the gabled roof of the eighteenth century was not restored, but it has been rebuilt after the style of the present roof of the Philipse Manor Hall in Yonkers. . . . The present roof of Fraunces' Tavern is not a typical hip roof, but has sloping sides, terminating in a square platform surrounded by a balustrade."—12th Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1907), 68-73; description of F. L. 167-b, III: 830; L. M. R. K., III: 978. See also N. Y. Tribune, S 18, 1906; N. Y. Sun, Mr 15, 1907; N. Y. Times, Mr 17, 1907; Pendant, A Sketch of Fraunces Tavern (1919). 10

The common council appropriates $2,000 for repairs and alterations to the mayor's suite of offices in the city hall.—Ord., etc., App'd by Mayor (1906), 296.

William Jennings Bryan arrives in New York from abroad and receives a popular reception. In the evening, a great meeting in his honour was held in Madison Square Garden at which from 12,000 to 15,000 people were present.—N. Y. Daily Tribune, Ag 31, 1906.

Sept.

The north tube of the Pennsylvania tunnel is opened. This is the largest submerged tube in the world.—N. Y. Herald, S 9, 12, and 13, 1906. See O 9.

"New York is the electric city. It is probably the most brilliantly illuminated city in the world. If this is the age of electricity, the American metropolis is probably the queen of the age. Figures recently compiled show that she consumes four times the amount of electric current used by the greater city of London, and she far out-distances all other cities of Europe or America. While this is due in a large part to the generous use of electricity for street and building illumination, an important factor also is the tremendous growth in the use of the current to talk business at night.

"The number of signs that make the night sky of New York luminous has increased fully 60 per cent., according to the city authorities, within the last year. Over the twenty-two square miles in Manhattan Island there are some three thousand electric signs of all sizes and descriptions. To make up their glaring talk and to voice with illumination signs and windows that formerly lay dark and dead, so less than one hundred thousand lights are set sparkling, each night all over the island.

"In size and character these signs vary according to the size, position and nature of their audience. The largest illuminated sign in the world is aglow all night. It shoots out to almost a million commuters who read it within a radius of twenty miles; the smallest are scattered broadcast over the East Side and other similar districts, whose name is shown with six or even four bulbs the sign of the humble cobbler or bookbinder.

"To supply with current the signs of New York the generating plant of a good sized town would be continuously required. More than ninety per cent. of all the electric bulbs that spell out the night legends of Manhattan are rooted in the mains of one supply company. In some buildings which still maintain private electrical plants it is even thought wise to keep the ponderous machinery running into the night to keep the sign illuminated. . . ."

"The maintenance of the great array of electric signs that have sprung up all over New York within the last few years has created a new employment—that of the 'signjack.' To one signjack, who climbs to dizzy heights on steeple or flagpole in cases of rare emergency, a score of signjacks are employed day in and day out in a trade no less perilous, if less spectacular. These men, trained to climb and swing at startling elevations, man the cornices of the metropolitan skyscrapers, in bad winds and bad weather, and pursue the constant work of replacing the electric bulbs that are growing dim. . . ."

"There is considerable skill required in plotting out the best effects to be obtained from designs, monograms or even plain lettering at certain heights and angles over the moving street throns to which the sign must talk. Often it has been discovered, after careful experimenting, that more clear and striking effects are obtained for the largest and most remote illuminated signs by the smallest and least powerful electric light bulbs. On the other hand, it has often been found most advisable to place large and powerful lights on letters suspended just over the heads of the night crowds.

"The most remarkable single tract of night illumination in the world is in Broadway, from 45th Street up to 46th Street. In this district alone current for nearly forty thousand globes in use for illuminated signs is furnished. This glittering trail along upper Broadway, the 'Great White Way,' is celebrated all over the world."—N. Y. Daily Tribune, S 22, 1906.

The Verdi monument, by Pasquale Civitelli, in Sherman Square at Broadway and 72d St., is unveiled and presented to the city by the Italian residents.—N. Y. Herald, O 13, 1906. See also Cat. of the Works of Art Belonging to the City, 185.

The new Madison Square Presbyterian Church, at the n. e. cor. of Madison Ave. and 24th St., is dedicated. It was designed by Stanford White.—N. Y. Herald, O 15, 1906; L. M. R. K., III: 931.

The Knickerbocker Hotel, at the s. e. cor. of Broadway and 42d St., is opened.—N. Y. Herald, O 24, 1906.

Chas. E. Hughes, Republican, is elected governor of New York State, defeating his Democratic opponent, Wm. R. Hearst.—N. Y. Daily Tribune, N 7, 1906.

A tablet placed by the children of the City History Club on the granite monument on the immense commanding McGowen's Pass, in the north-west part of Central Park, is unveiled and dedicated. It commemorates the fact that British troops occupied this location on Sept. 15, 1776 (q. v.), and evacuated it Nov. 21, 1783 (q. v.), and that here, beginning Aug. 18, 1814 (q. v.), the citizens of New York built Fort Clinton to protect the city in the War of 1812.—N. Y. Times, N 24 and 25, 1906; 14th Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1907), 74, 227-41.

The Cavalieri makes her American début at the Metropolitan Opera House in Giordano's "Fedora."—Krehbiel, Chapters of Opera, 342.

The city acquires by condemnation proceedings the land comprising the playground on E. 101st St., between Second and Third Aves.—Prendergast, Record of Real Estate.

The "Lady Chapel," behind the high altar of St. Patrick's Cathedral, is first used for mass. The architect was Charles T. Mathews.—Farley, Hist. of St. Patrick's Cathedral, 163-70.

1907

In this year, the five volumes comprising The Church Catalogue—of books relating to the discovery and early history of North and South America, forming a part of the library of E. D. Church, were published. They were compiled and annotated by George Watson Cole.

In this year, American Engravers upon Copper and Steel, by David McNeely Staufier, was published (Grolier Club imprint) in
The reservation for parks of certain portions of the water front not adapted to commercial purposes.

The widening of Fifth Ave. by abolishing the stoop line and taking 10 to 15 feet from the sidewalks.

The widening of the roadway of 42d St. 60 ft., thus making it 100 ft. wide for a distance of 300 ft. east and west of Fifth Ave.; the sidewalks to pass in an arcade under the first story of the buildings, and the centre of 42d St. to be depressed and pass under Fifth Ave.

The commission recommends a diagonal approach to the Blackwell's Island Bridge from Second Ave. to 57th St.; that the streetcar tracks on 57th St. be depressed under Fifth Ave., and that 60th St. be widened by 100 feet.

Other changes proposed are these:

The extension of Riverside Drive in a south-easterly direction to West End Ave., thus making a continuous direct route from the drive to West End Ave., south on West End Ave. to 59th St., and thence through Central Park to the approach to Blackwell's Island Bridge.

The extension of Madison Ave. in a south-easterly direction from 23d St. to a point at or near the junction of Fourth Ave. and the north side of Union Square, thus furnishing a continuous thoroughfare to the lower part of the city by Fourth Ave., Lafayette Place, and Etna St.

The widening of 14th St. from Broadway to Fourth Ave.

The extension of Irving Place south to meet Fourth Ave., so as to present a connection south through Lafayette St. or the Bowery.

The extension of Seventh Ave. southward; Varick St. northward, and Sixth Ave. southward, so as to add to the facilities for north and south traffic; also the widening of Varick, Christopher, and West 32d Sts.

The drawings illustrating the report were made under the direction of Whitney Warren.—N. Y. City Improvement Com. (1907). See also descripts. of Pl. 161, III: 844, and of Pl. 169-9, III: 851.

France passes a law definitely separating church and state.—Hazen, Europe since 1815, 768-71.

Mayor McClellan sends his annual message to the board of aldermen, saying in part: "The problem of providing the constantly increasing population of the City with safe, comfortable, and at the same time, rapid means of transportation, between the business and residential centres of the various boroughs, is one to which I have given a great deal of time and study."

"Relief obviously lies in increased subways and bridges, and a more extensive and better arranged system of terminals. The City's engineers have struggled with this difficult situation during the past year, with most gratifying results. New subway routes have been laid out and bids will be advertised for this month.

"The time has come to add a new railway line southwardly, nearly a long way off, relief from the Blackwell's Island and Manhattan bridges is happily closer. During the interim it is my intention to do everything possible to relieve the present arduous conditions, and the work is already being carried on by me.

"The connection of the tubes under the East river will be a great factor in this work, making the actual service of this tunnel a matter of a comparatively short time.

"In the meantime, everything possible has been done to increase the carrying capacity of both bridges.

"The capacity of the Brooklyn Bridge local trains has been increased 9,000 passengers, or 25 per cent., per hour during the rush hours, a result attained by adding an extra car to each train, by improvements in operation, and by the addition of staircases at terminals. Bridge local trains, consisting of five cars, are now being successfully operated during rush hours for the first time in the history of the bridge. During the rush hours 300 trolley cars per hour are being operated, against 250 cars last year. This is an increase in capacity of about 1,500 passengers an hour."

"The service of the Brooklyn trolley cars crossing the Williamsburg Bridge has been increased about 50 per cent., over last year, the cars crossing in an hour during rush hours against a maximum of 140 an hour last year. The New York City Railway Company is now running 1,750 cars per day against 1,025 per day last year."

"Remarkable progress has been made by the Engineers of the Board of Water Supply in laying out the routes for the aqueduct which will ultimately bring the waters of the Catskill Mountain streams into all the boroughs of the City.

"The locations of dam sites for the Ashokan Reservoir have been
The Modern City and Island: 1876-1909

1907

THE CHRONOLOGY.

Jan. 7

finally determined, and the most economical capacity and the elevation of the full reservoir line have been definitely fixed. Topographical surveys of the reservoir basin of about 16,000 acres have been made, and the land surveys necessary for the condemnation of the entire area completed. Preliminary surveys have also been made in the Rondout and Schoharie waterareas and on the aqueduct line, and the surveys of the land necessary for Kensico and Hill View reservoirs have been completed.

"The last stone of the new Croton Dam was laid on January 17 last, practically completing this structure. The gates in the dam were closed in November, 1905, since which time all the water flowing from the Croton river has been made available for the use of the City. This has not occurred before since the introduction of water from the Croton river, in 1842.

"The west basin of the Jerome Park Reservoir was practically completed during the year, and water from this source has been in continuous use since summer...

"I especially desire to call the attention of your Honorable Board to the very advantageous terms which the City has succeeded in making with the gas companies during the past year. I believe this to be due chiefly to the project recommended in my last annual message for the construction and operation by the City of a municipal lighting plant. These plans can be consummated at any time, but I deem it inadvisable to proceed with them at this juncture when the City has made an even more economical arrangement for its lighting with the gas companies.

"The condition of the animals in the Central Park Menagerie has, of course, been so bad that I recommend the consolidation of this menagerie with that in Bronx Park, both to be under the control of the New York Zoological Society. In spite of the efforts of the Park Commissioner to prevent disease, many of the animals in Central Park are afflicted with tuberculosis, and those which have escaped are so inadequately housed as to be in constant danger of acquiring incurable maladies. Such conditions constitute a menace to the health of the animals, and what is of even greater importance, are a growing menace to public health. The hippopotami should be removed to Bronx Park, where there is ample space for their proper keeping, and a sufficient number of hardy animals retained in Central Park for the entertainment and instruction of visitors.

"I also recommend that the buffalo in Prospect Park, which cannot long survive the conditions under which the City is now compelled to keep them, be turned over to the Federal authorities and placed with the herd which the Government is now gathering in the West...

"Notwithstanding the liberal policy of the City in the matter of public education, the number of children on part time in our schools has increased the year.

"The explanation of this, in view of the large appropriations made, is difficult. The factor most to be reckoned with appears to be the constant shifting of population. When the Manhattan approach to the Williamsburg Bridge was being prepared, a number of these houses were demolished, the inhabitants of these houses, and a large number of their relatives, friends and neighbors, removed to the Brownsville section of Brooklyn and to parts of The Bronx and Queens.

"These conditions are not easy to grapple with, but the Board of Education is making every effort to solve the problem, and in this work has my hearty support.

"During 1906, contracts were awarded for 18 new buildings and for 23 additions to old buildings, to contain 37,950 additional sittings. The number of sittings actually provided during the year in 20 new buildings and in 39 additions was 46,698.

... The number of schools under the jurisdiction of the Board of Education during the year was 510-3 training schools for teachers, 19 high schools, 485 elementary schools, 2 grammar schools and 24 technical schools...
in New York, at the Metropolitan Opera House, with Olive Frem-1907,22 "in the title role. On Jan. 24, the directors of the Metropolitan Opera and Real Estate Company resolved that the opera was "objectionable and detrimental to the best interests of the Metropolitan Opera House" and prohibited its repetition.—Kreibiehl, 

Chapters of Opera, 345 et seq.

The sale, at the Am. Art Galleries, of H. S. Henry's collection of 29 paintings by the Barbizon masters yields $152,800.—A Plan, etc., op. cit. Another sale of Mr. Henry’s Barbizon masterpieces was held at the same place on Feb. 4, 1910, and realized $255,750.—Ibid.

The "N. Y. Times, F 23, 1907, of its circulation, the largest in the world—"Ibid." The Metropolitan Opera House for the first time. The singers include Ferrari, Homer, Caruso, and Scotti.—N. Y. Times, F 12, 1907.

Mar. The Colony Club (see Mr. 1905) formally opens its building at 130 Madison Ave., of which Stanford White was the architect.—N. Y. Times, Mr. 12, 1907; L. M. K., III: 937. In 1916, the club moved to its present location on the n. w. cor. of Park Ave. and 62d St.—Ibid.

The New York Club moves into its new clubhouse at 20 West 40th St. opposite the Public Library.—N. Y. Times, Mr. 17, 1907.

For the first time, the changes of residence, the years, 1906-1907, are announced in the "N. Y. Times, F 1, 1906.

The first contract for the construction of a portion of the Catskill aqueduct (see O 27, 1905) is let.—Rep. of the Bd. of Water Supply, O 12, 1917, p. 4. See, further, Je 20.

Apr. District-Attorney Jerome makes a series of raids on the pool-room of the city. "He discovered the existence of a pool-room syndicate, which, according to reports, had a revenue from pools of about $8,000,000. It was further discovered that these profits were shared by certain prominent politicians, among them a well-known State senator. These discoveries for a time practically put an end to the operation of poolrooms in New York City."—New International Year Book (1907), 563.

The board of aldermen authorizes the appropriation of $7,000 for "repairing, redecorating and furnishing the third (3) Governor's room in the City Hall."—Proc., Bd. of Ald. (1907), II: 30. See also Je 9, 1906.

On this and the following days, the furniture and household decorations belonging to the estate of the late Stanford White were sold at his residence, No. 121 E. 21st St., under the direction of the American Art Ass'n, and brought $125,804. The sale attracted a large number of bidders, including many prominent citizens.—N. Y. Times, Je 1, 6, 7, 1907, Ap 11.

On April 11 and 12, his ancient and modern paintings were sold at Mendelssohn Hall, 40th St. near Broadway. Another sale of Mr. White's valuable artistic property took place on Nov. 24, 25, 26, 27, and 29, at the Am. Art Galleries, and his antique marble and stone mantels, sarcophagi, fountains, and other architectural objects were sold on Dec. 7 and 9, at the Terminal Warehouse, corner of 25th St. and Eleventh Ave.—From catalogues of sales, in N. Y. P. L.

The collection of autographs belonging to Hon. John S. Crimmins is sold at auction.—From list of important sales courtesy of The Anderson Galleries.

The Russell Sage Foundation is incorporated "for the purpose of receiving and maintaining a fund or funds and applying the income thereof to the improvement of social and living conditions in the United States of America." The incorporators are Margaret Olivia Sage, Robert W. de Forest, Cleveland H. Dodge, Daniel C. Gilson, John M. Glenn, Helen Gould, Gertrude M. Rice, Louise L. Schuyler, and their associates.—Laws of N. T. (1907), chap. 140. Its endowment consists of $10,000,000 donated by Mrs. Russell Sage.—Ayres, Seven Great Foundations, 67-71.

Anna T. James, a Quakeress of Philadelphia, establishes the Jameson Fund, with an endowment of $1,000,000, for helping the negro rural schools of the South. It was incorporated, on Nov. 20, 1907, as the Negro Rural School Fund, Anna T. Jameson Foundation. —"Fourteen Years of the Jameson Fund," in South Atlantic Quarterly, XXII: 195-201.

The "Bureau of Municipal Research" is incorporated, with the following stated purposes:

(1) To promote efficient and economical government;
(2) To promote the adoption of scientific methods of accounting and of reporting the details of municipal business, with a view to facilitating the work of public officials;
(3) To secure constructive publicity in matters pertaining to municipal problems;
(4) To collect; (5) To classify; (6) To analyze;
(7) To correlate; (8) To interpret; (9) To publish facts as to the administrative procedures of the municipal government. The methods of the Bureau of Municipal Research (1907), in N. Y. P. L. This organization had been started, in 1906, under the name "Bureau of City Betterment"—"Ibid."

The faculty and students of City College take formal leave of their old building at the e. cor. of Lexington Ave. and 23d St., and take possession of their new group of buildings on St. Nicholas Terrace.—N. Y. Times, My 5, Je 14, 1907; L. M. K., III: 939. See also 60th Ann. Reg. of the College (1908-9). See Je 21. The new buildings were not dedicated, however, until May 14, 1908 (q.v.). The old building is now (1926) used by the college as a branch and is known as the "Commerce Building."

The 300th anniversary of the landing of the first permanent English settlers in America is celebrated on Jamestown island.— N. Y. Herald, May 7, 1907.

Between this date and June 5, the shot-tower, erected on Beek- man St. in 1856 (.v., D 18), was demolished to make room for an addition to the Metropolitan building.—N. Y. Sun, Je 2, 1907; descript. of Pl. 155-56, III: 777.

The city acquires title, by grant and condemnation proceedings, to the land at 168th St. and Fort Washington Ave. There the armory of the 2nd Regiment of Engineers was afterwards built.—Prendergast, Record of Real Estate (1914), 139.

The Public Service Commissions Law is passed. This creates two public service commissions in the state, displacing the rail- road commission, gas commission, state inspector of gas meters, and, in New York City, the rapid transit commission established by the act of 1891 (q.v., Ja 31). The commission for the First District is given jurisdiction in the four counties comprising the city of New York, and the Second District is given jurisdiction in the remainder of the state. The commission for the First District has complete control over the rates, operation, and transfer of public service corporations, including surface, elevated, and subway railroad companies, and gas and electric companies in New York City.—Laws of N. Y. (1907), chap. 429; Whitney, N. Y. C. Pub. Service Comm. (1909).

The new Harlem Hospital at Lenox Ave. and 136th St. is officially opened.—N. Y. Times, Je 16, 1907.

The department of parks is authorized to construct extensions to the Metropolitan Museum of Art at a cost not to exceed $750,000 a year for 10 years.—Laws of N. Y. (1907), chap. 517. Wings F, G, and H were built under this law. McKim, Mead & White were the architects.—Howe, Hist. of Met. Museum of Art. For earlier wings (E), see Mr 23, 1904.

The first sod on the line of the Catskill aqueduct (see Mr. 27), is turned by Mayor McClellan near Garrison.—Rep. of the Bd. of Water Supply, O 12, 1917, p. 4. See Ag 31.

An act to authorize the appointment of a commission to inquire July into the local government of the city of New York and its charter, and to suggest legislation thereon, becomes law.—Laws of N. Y. (1907), chap. 600. "This commission reported late in November. I suggested many changes in the charter, the most important of which was the alteration in the functions and powers of the Board of Aldermen. It recommended also the reconstruction of the Board of Education by a reduction of its members to 15, instead of 46. The general tendency of the recommendations made by the commission was in the direction of more home rule for the city, with less interference in the government on the part of the State Legis- lature."—New International Year Book (1907), 564.
The commissioner of bridges is authorized, subject to the approval of the board of estimate and apportionment, to provide for the erection of a "Municipal Building" upon land already acquired for the extension of the Manhattan terminal of the Brooklyn Bridge.—Laws of N. Y. (1907), chap. 670.

The following twelve architectural firms were invited to submit designs in competition: J. Stewart Barney, Carrère and Hastings, Clinton and Russell, J. H. Freedlander, Cass Gilbert, Heins and La Farge, Hoppin and Koen, Howells and Stokes, H. R. Marshall, McKim, Mead & White, Trowbridge & Livingston, and Warren and Wetmore. The conditions governing the competition were issued on Dec. 12, 1907, and the twelve designs were submitted to the department of bridges on April 15, 1908. They were judged by a jury selected by the competitors themselves, and, early in May, 1908, the design of McKim, Mead & White was chosen. —Correspondence in files of Howells and Stokes; letter to the author from Wm. Wirt Mills, commissioner of plant and structures (D 13, 1925); Proc., Bd. of Ald. (1909), 1: 113–14. See also Nims, "Municipal Bldg. of the City of N. Y.", in Proc., Mono. Engineers of City of N. Y. (1913), 285–302. Cass Gilbert withdrew from the competition and was succeeded by the architectural firm of Helme and Huberty.

The last design eliminated was that of Howells and Stokes. As their design, if not actually the prototype of the present upward tapering type of skyscraper with highly accentuated vertical lines, at least marked an important step in this direction, and has had a far-reaching effect upon the design of the modern skyscraper, it has been reproduced as PL 78, Vol. V. The only earlier modern building known to the author which shows any indication of this tendency is the West St. building, at 90 West St., designed by Cass Gilbert and erected in 1906. Recent prominent examples of this general type are the Bush Terminal building, at 132 W. 42d St., designed by Helme & Corbett and erected in 1916–17; the American Radiator building, designed by Raymond M. Hood and erected at 40 W. 40th St. in 1923–24; and the Chicago Tribune building, designed by John Mead Howells and Raymond M. Hood and erected in Chicago in 1924. On the same plate with the municipal building design is shown a design for a skyscraper submitted by the author in the competition held in 1922 for the Chicago Tribune building. This design is reproduced as illustrating a new departure in the architectural treatment of skyscrapers in which the windows are "woven" into a design in polychrome terra cotta.

The construction work on the municipal building was begun in 1909 (9 v., Aug.), and the building was completed in 1914.—L. M. R. K., III: 974. See also A. Pl. 29-b, Vol. III, and description, III: 885.

The last horse stages are taken off Fifth Avenue and are replaced by motorbuses.—From the records of the Fifth Ave. Coach Co. and the president. See 25 Aug.

The public service commission (see 6) began a public inquiry into the rapid transit companies of Manhattan, Brooklyn, and The Bronx, especially into the management of the Interborough Metropolitan System, which includes practically all the traction companies of Manhattan. "The testimony showed that the elevated roads were not being operated to their full capacity and that the companies could save considerable by the use of motor cars. The witnesses were unanimous that the public was suffered to run a much greater risk of injury than was necessary; and there is considerable reason to believe that the great extension of the subway systems is beyond the need of the people, and is being put forward with a view to the extension of the elevated systems." —From the testimony of the documents of the commission, 125–165.

The construction work on the municipal building was begun in 1909 (9 v., Aug.), and the building was completed in 1914.—L. M. R. K., III: 974. See also A. Pl. 29-b, Vol. III, and description, III: 885.

1907

The reconstructed Fraunces Tavern (see Ag, 1906) is formally opened by the Sons of the Revolution.—N. Y. Times, D 5, 1907.

Kelley, 46. See also descrip. of Pl. 167-4, III: 850.

Although Mayor McClellan rules, as presiding officer at a meeting of the aldermen from the borough of Manhattan, that John F. Ahearn (see D 9) has been removed from the office of borough president for the remainder of his four-year term, the aldermen overrule him and elect Mr. Ahearn to fill the vacancy.—N. Y. Times, D 20, 1907. See D 26.

Mayor McClellan declines to admit John F. Ahearn (see D 19) to the deliberations of the board of estimate and apportionment. "The Chair believes," said the mayor, "that the election of John F. Ahearn by the Aldermen . . . to fill the vacancy in the office of the President of the Borough of Manhattan, was contrary to the intent of the law, and that, therefore such vacancy still exists."

—N. Y. Times, D 21, 1907.

The president of the art commission announces to the public that the governor's room in the city hall is to be restored so as to "to make it possible the room to be reconstructed. This is made possible by a gift of $25,000 for the purpose from Mrs. Russell Sage.—N. Y. Times, D 31, 1907.

1908

In this year, Mrs. Russell Sage gave a considerable sum to be expended in the planting of rhododendrons on the East Drive of Central Park. The north and south sections were also given a fund of $35,000 for the restoration of the governor's room in the city hall to its original design.—Message of Mayor McClellan, Ja 4, 1909, p. 98. In 1912, Mrs. Sage gave an additional $25,000 for the restoration of the rotunda and dome of the city hall, and this work, together with the renovation and reconstruction of other parts of the building, was done between Dec., 1912, and Feb., 1913, from designs by Governor Astor, architect, under the direction of the art commission.—N. Y. Times, Ja 12, 1913. See also Arch. Rec., XXXIX: 511-35; descrip. of Pl. 97, III: 588.

At this period, eight recreation piers, with music, were open each summer. In May, 1908, the Cedar St. promenade was open to the public. This was the first attempt in New York "to utilize the roof of the sheds along the bulkheads for this purpose. . . . This promenade extends along the overwater front [North River] from Cedar to Albany Street . . ."—Message of Mayor McClellan to the Bd. of Ald., Ja 4, 1909, p. 70.

In this year, the shot-tower at 63-65 Centre St., erected in 1855 (Pl. II, O), 1912, was demolished.—Data supplied by Mr. Christopher C. Tracy, sup't. of the tower for over 35 years; descrip. of Pl. 135-9, III: 777.

In this year, the Union Theological Seminary began the erection of a new group of buildings covering the block between Broadway and Claremont Ave., 120th and 122nd Sts. It was dedicated on Nov. 27-29, 1910.—Dedication of the New Bldgs. of the Union Theol. Sem. (N. Y., 1910); L. M. R. K., III: 941. This group was designed by Allen and Collins of Boston, who won first place in an architectural competition.

Kelley says in part: "In spite of the most rigid economy the budget has grown from $130,421,506.66 for the year 1907 to $145,572,266.17 for the year 1908. This increase of $13,150,760.51 is due almost entirely to the increased cost of City government caused by two reasons. First: The enactment by the State Legislature of laws interfering with the local regulation of our expenditure, thus entailing upon the City every year large manditory increases to which it must submit. Second: The constantly increasing volume of the City's business and the higher prices which it has been forced to pay for its supplies . . .

The citizens of this City must bear in mind that if they demand from the municipality, schools, docks, bridges and ferries, as well as adequate fire and police protection, the public must pay for them. As long as the City continues to give the public increased facilities and improvements, the expense account of the City must continue to grow. By economizing in every direction we may keep down the amount of the increases, but we cannot prevent incurring a greater expenditure year by year. I believe, Jan., however, that if all manditory legislation were done away with and the City were left to manage its own affairs without the State forcing it to pay large sums every year over which it has no control, it could keep its annual increases down to a very much smaller figure than at present. . . .

"The time has now arrived, in my judgment, for the municipal authorities to proceed in the matter of the Fifth avenue widening. By such widening I mean the removal of all obstructions and encroachments beyond the building line, the curtailment of the outer line of the sidewalks by about seven and one-half feet on either side of the avenue, and the consequent enlargement of the roadway by about fifteen feet.

"During the past few years several cases have been prosecuted in the courts for the purpose of testing the City's right to demand the removal of these encroachments. The decisions of the courts have uniformly upheld the contention of the City that all obstructions beyond the building line are illegal, and the way is therefore now open for the authorities to compel the removal of these encroachments. I have accordingly instructed the Corporation Counsel to have prepared the necessary surveys and maps showing all the encroachments beyond the building line on either side of Fifth avenue from Twenty-third street north as far as the present congestion. The corporation counsel finds that Forty-second street is so great, in view of the large traffic across town at that point, that it would seem necessary to meet the situation by lowering the level of a part of Fourth-street so that the east and west traffic will pass under Fifth avenue, leaving the north and south traffic on Fifth avenue unimpeded. This matter could be taken up as part of the work to be done at the time of the widening of Fifth avenue. . . .

"In last year's message reference was made to the concentration of large office buildings on Manhattan Island and the effect of these structures upon the rapid run off of storm water and the consequent overtaxing of the sewers.

The tendecy to concentrate large numbers in such buildings, during the working hours is not abating, but in a more marked degree, and involves problems even more serious than those already noted. It is said that two office buildings in one small block in lower Broadway will accommodate fourteen thousand people, while on adjacent blocks are two great buildings which will contain nearly as many more. This army of working men and women will arrive in the morning and leave at night within a very brief space of time, and the congestion in the streets as they go to and from the different transportation lines will present a very serious problem. It would appear that any additions to our transit facilities that do not take into account the relief of this congestion will not be thoroughly effective; in other words the transportation problem of each section of the City must be worked out in its relation to that portion of the traffic which will begin or end in the office district of the Borough of Manhattan.

"There is no general ordinance in existence at the present time which specifically applies to the licensing of public automobiles. Under an order of the Supreme Court the Bureau of Licenses is now issuing licenses to such vehicles under the general ordinance relating to public backs and cabs. This ordinance, however, was never intended, in my opinion, to apply to automobiles and fails to regulate their use in proper fashion. I recommend, therefore, the adoption of an ordinance which will apply directly to these vehicles. At the same time I believe that some provision should be made for licensing all sight-seeing automobiles which, at present, pay no fee whatsoever to the City. . . .
"I think it also most important that the following regulations should be adopted in regard to the use of all automobiles, both public and private, within the City:"

"First—That all automobiles should be equipped with adequate mufflers, which never should be cut out within the limits of the built-up portions of the City."

"Second—That, except for the first ten seconds after starting the engine of an automobile, no smoke should be allowed to come out of the exhaust pipe. It is wholly unnecessary and is simply an evidence of carelessness and incompetency."

"Third—That the use of acetylene headlight within the built-up portions of the City should be prohibited. The use of these lights is very dangerous and has resulted in causing many accidents by dazzling pedestrians and drivers of vehicles coming in the opposite direction. These lights are unnecessary on the City street, and I understand that responsible drivers, of their own volition, refuse to use them."

"Among the many difficult problems of municipal government, there is none, to my mind, of greater importance than that of the proper maintenance of streets, roadways, parkways and pavements. In a city so largely given over to traffic as ours, the solution of this question is not easy. I question if any municipality in the world has spent more money or given more study to the street problem than New York. In spite of this, and the energy and unselfish assistance of civic bodies like the Merchants' Association, in independently grappling with problems, the solution of which properly belongs to City officials, results have been far from satisfactory. This is partly due to the care of contracts in repairing and replacing surfaces, the neglect of City officials entrusted with the supervision of their work to compel them to live up to the letter of their contracts, the necessary tearing up of roadways for sub-surface improvements, and the great increase in heavy trucking, have all combined to bring about conditions to which I am not surprised to find the great body of our citizens discontented."

"Under the energetic administration of the new Commissioner of Public Works, Mr. Thompson, many of the evils which brought about these deplorable conditions have disappeared, and steady improvement is noticeable. Nevertheless, we are far from where we should be in matters of street administration, and it is with great pleasure that I inform your Honorable Board that the Chief Executive of the greatest of the old cities, the Prefect of the Seine, recently informed Mr. Colin M. Ingersoll, Chief Engineer of the Department of Bridges, who went to Paris at my request to study materials and methods employed there in roadways and pavements, of the intention of the French Government to call an international congress during the present year for a discussion of this important subject."

"The City of Paris is largely using wood block pavement, laid on a concrete base. The blocks are made from the native woods of France treated in an inexpensive manner. The municipality has its own plant for the manufacture and treatment of the wood blocks and for redressing blocks which are used in pavement repairs. The methods there in use, if employed here, would permit of wide competition for contracts to lay wood block pavements, as against the present time limited competition confined practically to owners of patented processes. The wood block pavements, notwithstanding the heavy traffic of Paris, last six or seven years, are easily repaired and practically noiseless."

"The serious question of the maintenance of macadam roadways is receiving consideration abroad, as here, on account of the wear by automobiles which, taking their power from the road, destroy the roadway surface much quicker than in the case of ordinary vehicular traffic. To counteract this effect, experiments are being made abroad with a tar covering for macadam roadways. These experiments have been very successful. The tar covering is not expensive, and is applied by means of tank machines drawn by horses. It forms a thin coat of binding material on the roadway surface which, for some time, or year due to automobile traffic, is free from dust, and effects a saving in cost of maintenance, as the roadway so coated does not require to be frequently watered. Several of the roadways in the Bois are treated by this method and the artistic effect of the parkway is not marred."

"As the use of automobiles for heavy trucking is becoming extensive, the time has arrived when the City should define the maximum limit of size and weight of machines which may be used on its streets, and the character of tires with which machines shall be equipped."

"The trolley car service over the Williamsburg Bridge has been increased about 7 per cent. over last year."

"The design for the proposed Hendrick Hudson Memorial Bridge has been approved by the Art Commission."

"The main span has more than twice the length of any other masonry arch ever constructed."

"Plans are ready for the filtration of the Croton water supply. Sanitary and engineering authorities are agreed that filtration is an ultimate necessity. In spite of constant vigilance, the protection of a watershed of 360 square miles is annually becoming more difficult, expensive and uncertain. The only real safety lies in filtration."

"In its efforts to safeguard the watershed the City has negotiated with Mount Kisco on a plan for the disposal of its sewage, which was adopted by a vote of the people of Mount Kisco at the special election last fall. Mount Kisco is to put in a new sewage system at its own expense and The City of New York is to provide the sewage disposal plant, at an estimated cost of $200,000. By this arrangement a conspicuous menace to our water supply and a demonstrated source of communicable diseases will be eliminated."

"Under an agreement between the City and the Kings County Lighting Company the 4,500 open-flame 16 candle-power gas lamps in Brooklyn are being displaced by mantle lamps of 60 candle-power, and before the end of this month the last open-flame lamp will have been removed from New York. Extensions of the gas and electric lighting system in all the boroughs have kept pace with our growth, preserving to New York its prestige as the best lighted city in the world."

"As the municipal improvement of the waterways of Manhattan Island, begun in 1870, is practically complete, the City has found it advisable for the purpose of increasing the facilities for transatlantic trade, to build nine piers between the twenty-eighth and Sixty-fifth streets, South Brooklyn. The approach to these will allow the largest vessels to dock."

"Central Park is being rehabilitated as rapidly as the finances of the Department of Parks will permit. Spring will show what has been accomplished by the treatment of the soil on the east side of the park and this work will be continued until a complete restoration has been accomplished. The park drives have been thoroughly repaired and the bridle roads have received much attention. A modern water supply and irrigation system between Fifty-ninth and Seventy-second streets and between Ninety-seventh and One Hundred and Tenth streets, has been contracted for and the work will be finished at the close of this year. The re-paving of Fifth avenue, between Nineteenth and One Hundred and Tenth streets, is in progress and will be half finished at the close of this year."

"Work proposed for the coming year includes the construction and improvement of playgrounds between One Hundred and Thirty-sixth and One Hundred and Thirty-eight streets, St. Nicholas terrace and Amsterdam avenue; the planting of St. Nicholas and Colonial parks, the improvement of John Jay Park and the Corlears Hook Park extension, the improvement and laying out of Chelsea Park and the construction of Colonial Park between One Hundred and Forty-fifth and One Hundred and Fiftieth streets. Most important of all, however, will be the further improvement, reconstruction and restoration of Central Park."

"During the year just ended the Metropolitan Museum of Art has made gratifying progress in the work it has accomplished, in the number and importance of its acquisitions, and in its power to attract the public. The recorded number of visitors during the year has been close upon 800,000. Its educational opportunities have been placed at the disposal of the public to a greater extent than ever before and teachers and pupils, both of the public schools and of private institutions and colleges, have been quick to take advantage of them."

"During the summer there were unavoidable delays in the construction of the extension of the building on Fifth avenue, but good progress has been made in the last months, and there is now a prospect that it will be completed in the early summer. Work is also well under way on the new wing which is to be erected back of this extension. This new wing is intended primarily to contain the great Hoentschel collection of objects illustrating the decorative arts of the Gothic period and the eighteenth century in France,
which the museum owes to the generosity of its President, Mr. J. Pierpont Morgan.

"The City is to be congratulated on the fact that owing to the generosity of Mrs. Sage, and the discovery in possession of the New York Historical Society, of John McComb's original drawings of the plans of the City Hall, it will be possible to restore the Governor's room as it was when the building was completed in 1812 to 1813. [The McComb drawings were purchased by the N. Y. Hist. Soc. in 1898, through Mr. Jos. Sabin, from Mrs. Edward S. Wilde, the granddaughter of McComb.—Descrip. of Pl. 75, I: 460.]

"There are nearly a hundred of these drawings, all executed by McComb himself, and in an excellent state of preservation. They, of course, cover the construction of the entire building, but there is one on a section running from north to south, which cuts directly through the Governor's room, showing the vaulted ceiling which the room originally had, and the style of decoration at the ends. The windows in the room, in fact, the windows throughout the entire building, have evidently never been changed. Mrs. Sage's gift of $25,000 will, I believe, cover the entire cost of the work of restoration...

"My recommendation of last year that all architectural work outside of the minor work of the departments be awarded after competition, the contestants to select their own jury, has been followed, the most conspicuous instance being the new municipal building, the competition for which is now under way.

"Too much care cannot be exercised, in my opinion, in keeping all municipal work in the Island to the highest standard. The work of the Art Commission in this respect is well known to you. The jurisdiction of this Commission now extends to all work involving the expenditure of $250,000 or over. It has been my constant aim to assist the Commission in every way possible, with what excellent results is shown by the plans for the new armories for the Second Battery and the Twenty-second Regiment, the new penitentiary, the South ferry and Staten Island ferry terminals, the Chelsea improvement and the Hendrie Memorial Bridge at Spuyten Duyvil.

"I desire to call the attention of your Honorable Board to the excellent work inaugurated during the year by the Municipal Art Commission in completely cataloguing the art works of the City. This work I am informed will be completed next month...

"Work on the New York Public Library has gone on without serious interruption. The marble structure is complete and the interior work, which will cost $1,153,000, has been started...

"Plans have been approved and architects selected for a new penitentiary for all of the boroughs, on Riker's Island, at an estimated cost of $4,000,000. Pending its completion only such minor repairs as are necessary will be done at the Penitentiary on Blackwell's Island. A new building for the Penitentiary at the Kings County Penitentiary are now in successful operation at Blackwell's Island Penitentiary, the output being used by the Departments of Charities and Education...

"In no branch of the City Government have more satisfactory results been achieved during the year than in the Health Department. The report of the Bureau of Vital Statistics shows a marked falling off in the number of deaths, and the increased rigor of the sanitary inspections has kept disease among children and adults down to a figure encouragingly below the figures of 1906.

"The provisions of the Sanitary Code have been rigorously enforced. New sections regarding the supervision of lodging houses, meat and poultry, milk, and the sale of cocaine have been added, and numerous arrests and prosecutions have been made for violation of these sections. For spitting in public places alone 1,784 arrests were made...

"There has been a great decrease since 1906 in the building of new tenements, particularly in Manhattan. Two-thirds of the new building work of the whole City last year was done in Brooklyn, where the number of new buildings was 2,113 in the first nine months of 1907, as compared with 2,604 for the corresponding period of 1906. Fewer new buildings has not decreased the work of the Tenement House Department to any considerable extent, however, for the reason that only 15 per cent. of the force is detailed to new building work...

"Three new fireboats—the 'Thomas Willett,' the 'James Duane' and the 'Corinthus W. Lawrence'—were launched. The 'Willett' and the 'Duane,' named for the first Mayor of New York and the first Mayor after the Revolution, will be in service in a few weeks, while the 'Lawrence,' named after the first elected Mayor, will be under steam in a few months.

"Ten fire companies have been established in territory hitherto protected by the volunteer companies, while eight companies have been added to the regular service in Manhattan, The Bronx and Brooklyn. The uniformed force has been increased by 445 men...

"While this city has the best fire protection in the world, more men and more apparatus must be added to the Department....

"It is now ten years since the consolidation of the four counties comprising the present City of New York was accomplished. The results may not be all that were dreamed of by the fathers of consolidation, but they have been satisfactory in the main, and, if it is to be hoped, may be brought nearer to perfection by a new Charter designed to correct the faults which experience has shown in the old.

"This much at least, can be said: That all the five boroughs have benefited by the union which has made New York the largest single city of the world. Few citizens would care to destroy the centralization of power which, working through the great departments, has provided the best of police and fire protection, pure and regular water supply, cleanliness of streets and safeguarding of public health, a greater and better school system, and, in short, progress along all lines of municipal government.

"The history of these ten years has shown that the faults which remain in our methods of city government are not due to the consolidation of numerous boroughs, but that we are not practicing such centralization was not provided. These are the faults which a new Charter must remedy.—Proc., Ed. of Ald. (1908), I: 14-45.

"The East River tunnel connecting the Bowling Green station of the subway with Borough Hall, Brooklyn, is opened.—N. Y. Herald, Jan. 9, 1908.

"The University Heights Bridge across the Harlem River at 207th St., Manhattan, is opened.—Report, Dept. of Bridges (1912), 281-82; Message of Mayor McClellan, Jan. 4, 1909, p. 65. See also L. M. R. K., III: 926.

"The 12-storey Parker building, at the s. e. cor. of 19th St. and Fourth Ave., is destroyed by fire, and several adjoining structures are injured. The loss is about $35,000. Three men are killed and 40 injured.—N. Y. Times, Jan. 11, 1908.

"From this day to Feb. 15, 1908, the Groller Club held, at its clubhouse, No. 29 E. 12th St., a notable exhibition for early American engravings upon copper.—See catalogue in N. Y. P. L.

"Debussy's opera 'Pélèas et Mélisande' is performed for the first time in New York, at the Manhattan Opera House, with Mary Garden as Mélisande.—Krehbiel, Chapters of Opera, 393 et seq., N. Y. P. L. Bulletin (1905), 363.

"The erection of the new building for the Hudson, between New York and New Jersey, is opened.—N. Y. World, F 26, 1908. See Jl 19, 1909.

"The Fifth Avenue Hotel, which opened on Aug. 13, 1899 (q. v.), closed on this day and was soon after torn down.—N. Y. World, Ap 5, 1908; records of the Title Guarantee & Trust Co.; L. M. R. K., III: 978; descrip. of Pl. 141b, III: 710.

"The legislature directs the governor to appoint a commission of 15 members, "to be known as the New York charter commission, to inquire into the local government of the city of New York, and the counties contained therein with power to investigate the manner of conducting and transacting business in the several departments, boards and offices thereof, the effect and working of the charter of Greater New York and the acts amendatory thereof and supplementary thereto, and of any and all other acts relating to said city, and to suggest such legislation as it may deem advisable with respect thereto."

"The city board of estimate and apportionment is to appropriate $50,000, or less as shall be necessary, for the expenses of the commission.—Laws of N. Y. (1908), chap. 114. See Mr 8, 1909.

"The city is authorized to lease Ward's Island to the state for 50 years, at an annual rent of one dollar, on condition that the state "will construct within ten years from the passage of this act a modern hospital for the care and treatment of the insane in accordance with plans and specifications for the improvement and erection of buildings which shall have been submitted to the board of estimate and apportionment of the city of New York and approved by it."—Laws of N. Y. (1908), chap. 139.
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876–1909

1908

Dr. Frederick A. Cook, of Brooklyn, claimed that, on this day, he discovered the North Pole. After Peary's return in 1909 (p. 1, v. 6, p. 6), Cook's claims were pronounced fraudulent.—Eve. Post, S. 1, 1909. See S. 1, 6, and 21, 1909. Peary's discovery of the actual pole seems to have been confirmed by the observations of the Byrd and the Amundsen expeditions in May, 1926.

The high pressure fire service is put into successful operation. The area covered by it is bounded by Chambers St., 234 St., North River, Broadway, Fourth Ave., and The Bowery. There are two pumping-stations, one at Gausevoort and West Sts., and the other at Oliver and South Sts.—Message of Mayor McClellan, Jan. 4, 1909.

Gov. Hughes signs the anti-racetack gambling bills.—Laws of N. Y. (1908), chap. 506 and 507.

21

23

The new ferry-house at the Manhattan end of the old Staten Island ferry is begun. It was designed to form part of a uniform structure extending from the Governor's Island ferry slip to Broad St.—625 feet. Between Whitehall and Broad Sts., the site of the old 39th St. ferry to Brooklyn, three new ferry slips were built, and a new ferry-house, costing $648,000, was nearly completed.—Message of Mayor McClellan, Ja 4, 1909, p. 69.

The first public school in this city for deaf-mutes is opened.—Sept. Message of Mayor McClellan, Ja 4, 1909, p. 55.

A city ordinance is passed changing the name of Blackwell's Oct. Island Bridge (see F 23, 1901) to Queensboro Bridge.—Proc. App'd by Mayor (1908), 473. See also L. M. R. K., III: 926. The bridge was opened on March 30, 1909 (p. 6).

26

The keel of the replica of the "Half Moon" (see Ap 23) is laid at Amsterdam.—Official Min. of Hudson-Fulton Celebration Com., II: 97–105.

3 Wm. H. Taft and James S. Sherman, Republicans, are elected Nov. president and vice-president. The Democratic candidates were Wm. J. Bryan and John W. Kero.—Am. Dict. of Date, 91.

3 Chas. E. Hughes is re-elected governor of New York State, over his Democratic opponent, Lewis S. Chanler.—N. Y. Tribune, Nov. 5, 1908.

17 At five sales held between this date and April 7, 1909, the books, manuscripts, bookplates, and autographs belonging to Henry W. Poor were sold at auction.—From list of important sales, held at The Anderson Galleries.

14 The congregation of St. John's Chapel is officially notified that Trinity vestry has decided to close the chapel on Feb. 1, 1909, and to transfer the work of the parish to St. Luke's. This announcement resulted in a popular demonstration by persons under such rules and regulations as may be hereafter adopted by the department of parks over and across Morningside park, in the said city, at or near the intersection of West One Hundred and Sixteenth street, between Morningside avenue east and Morningside avenue west, borough of Manhattan, at the expense of the city.—Laws of N. Y. (1908), chap. 462. The elevator was never built.

22 The legislature appropriates an additional $150,000 for the use of the Hudson-Fulton celebration commission.—Laws of N. Y. (1908), chap. 466.

25 The legislature appropriates $500 "For expenses of removal of remains of former governor George Clinton from Washington, and the turning over of same at Kingston."—Laws of N. Y. (1908), chap. 466. The removal of Clinton's remains from Washington to Kingston was made a part of the celebration of the 250th anniversary of the founding of Kingston, and authority to make the transfer was secured upon the application of Clinton's descendants.—"The Clinton Obsequies," in Old Ulster, IV: 205–14.

28 The body of George Clinton, first governor of New York State, and of persons, in whose burial grounds, in which he was interred, was exhumed by a parade of 5,000 men to the governor's room of the city hall, where it lay in state until 4 p.m. and was visited by about 40,000 people. The bells of the town-churches tolled during the day, the city hall was draped in black, and the flags were at half mast. On May 29, the remains were taken to Kingston, where they were re-buried with impressive ceremonies on May 30.—N. Y. Daily Tribune, May 29–31, 1908; "The Clinton Obsequies," in Old Ulster, IV: 205–14.

12

The protest from outside the parish culminated in a notable memorial, which was made public on Dec. 16, 1908, and which was signed by some of the most distinguished citizens of New York, including President Roosevelt, Secretary Root, Mayor McClellan, ex-Mayor Low, and Joseph H. Choate. This protest (see PL 79, Vol. V) read, in part, as follows:...
The recent announcement of the vestry that on February 1 next the work at St. John's Chapel, Varick street, will be abandoned, and the natural inference which follows, that the church building will be demolished, came as a surprise and shock to the community, saddening the hearts of those who reverence the ancient monuments of our city and believe in the up-lifting power of venerable traditions and accumulated effort and the refining and ennobling influence of dignified and beautiful architecture.

"Since this action was taken many questions have been publicly raised as to the adequacy of the reasons for a step of such grave importance, affecting so deeply perhaps than had been realized the feelings of the community and the civic pride in a building which, by common consent, ranks only second to St. Paul's Chapel among the very few remaining monuments of our past. These questions will, we doubt not, receive your further consideration.

"In our country there exists no public tribunal charged with the care of our national monuments, and upon you therefore as sole trustee devolves in this case a double responsibility, a responsibility which we believe you fully appreciate and will wisely discharge."

The Municipal Art Commission, the Fine Arts' League, the American Scenic and Historic Preservation Society, the N. Y. Chapter of the American Institute of Architects, the Architectural League, and other bodies, also adopted resolutions on the subject, and the rectors of the Protestant Episcopal parishes throughout the city as well as the clergyman of other denominations preached sermons upon it.

At Trinity vestry had denied both of their petitions, the congregation finally appealed to the courts, on the ground that under the law of 1814 they were voters in Trinity parish, and that the closing of St. John's and the relinquishment of the membership to the free-church of St. Luke's deprived them of their franchise rights. They obtained an injunction restraining the vestry from closing the church. Trinity finally and asserted that itself, while regular parishes would be discontinued at St. John's and transferred to St. Luke's Chapel, St. John's would be made the centre of evangelistic work to meet the needs of workers employed in the warehouses and factories of that section. On April 14, 1909, Supreme Court Justice O'Gorman handed down a decision vacating the injunction obtained by the congregation, and declaring that the vestry had power to close the church if it chose to do so, but the popular sentiment against its abandonment and removal was so great, that Trinity took no further action at this time.—The Case of St. John's Chapel (1909); The Petition of the Congregation of St. John's Chapel, to The Recto, Church Wardens and Vestrymen of Trinity Church (pamphlet in N. Y. P. L.); Sun, D 17 et seq., 1903; N. Y. Tribune, N 24, 26, 30, D 4, 5, 6, 8, 9, 16 et seq., 1903; 14th Ann. Rep., Am. Soc. Fine Arts, 1899; Pastors and Officers of Trinity by Dr. John P. Peters, in Independent, F 18, 1909; Harper's Weekly, F 20, 1909; The Case Against Trinity, by Ray Stannard Baker, in Am. Mag., LVIII: 2-16; Outlook, XC: 82-531; XCI: 97-98; descript. of PL 106-3, III: 608.

The matter thus rested until Sept., 1911, when the board of estimate and apportionment voted $7,000,000 for the widening of the last thoroughfare to West Broadway and Franklin St. As soon as it became known that the plans adopted for the widening of Varick St. to 100 feet would necessitate the removal of the porch and tower of St. John's, the N. Y. Federation of Architects, the Am. Institute of Architects, the Architectural League, the American Scenic and Historic Preservation Society, and other organizations, protested to the city government with a view to secure such modifications of the plan as would save this historic building. The city finally agreed, in 1914, to allow a projection of the porch over the sidewalk, in accordance with plans prepared by Mr. Stokes and submitted by a committee, and an appropriation of $17,000 was made to cover the expense of this work, which involved the underpinning of the tower. The Trinity trustees promised to maintain the church and its chapel for three years and at that time to give those interested an opportunity to buy the edifice and thus to assure its preservation. However, the money for the purchase of the church was never raised, and in 1918, amid public protest, the building was demolished.—17th Ann. Rep., Am. Soc. Fine Arts, 1912, 146-47; (1913), 145-47; (1915), 110, 210-22; (1916), 147-48; (1917), 191-94; (1919), 149-50; The Threatened Demolition of Saint John's Chapel in New York, by Rawson W. Haddon, in Am. Architect, CLI: 3-35, Sun, My 26, 1913; N. Y. Times, My 7, 1913, and S 15, 1918; descript. of PL 106-3, III: 608; L. M. R. K., III: 913.

Massenet's "Le Jongleure de Notre Dame" is performed for the first time in America, at the Manhattan Opera House.—N. Y. P. L. Baltein (1905), 852.

The 500th anniversary of the birth of John Milton is celebrated at the Church of the Ascension, Fifth Ave., and 109th St. The speakers are Hamilton Wright Mabie, Pres. Butler of Columbia, and Richard Watson Gilder, and more than 700 guests are present, including Pres. Finley of C. N. Y., Wm. Dean Howells, Kate Douglas Wiggin, and other distinguished citizens. In the evening, exercises were held at Columbia University.—N. Y. Daily Tribune, D 10, 1908.

The National City Bank moves into the old custom-house (originally the merchants' exchange) on Wall St., recently remodeled for the use of the bank by McKim, Mead & White.—N. Y. Daily Tribune, D 20, 1908; L. M. R. K., III: 915; descript. of PL 152-3, III: 772. See J 3, 1899.

In this year, the History of the City of New York in the Seventeenth Century, by Mrs. Schuyler Van Rensselaer, was published in 2 vols. In this year, the art commission published a Catalogue of the Works of Art Belonging to the City of New York.

In this year, John C. Van Dyke issued a book descriptive of the city, entitled The New York. A Commentary on the Place and the People, illustrated with 123 plates by Joseph Pennell.

Among the curious and interesting New York City ordinances on the books are the following: "No bicycle shall be allowed to proceed in any street of the city by inertia or momentum, with the feet of the rider removed from the pedals," and no bicyclist "shall remove both hands from the handle-bars, or practice any trick or fancy riding in any street."

No street peddler shall "incur any street, avenue or highway for a longer period than thirty minutes at any one time on any one block," or "stand in front of any premises, the owner of or the lessee of the ground floor thereof objecting thereto," or blow a horn or other instrument to give notice of his approach, or cry his wares on Sundays, or before 8 a.m. or after 9 p.m. (except Saturdays), or within 250 ft. of any school, court-house, church, or hospital between 8 a.m. and 4 p.m."

The number of organ-grinders is limited to 500, and they may not play on Sunday or on other days before nine or after seven, or within 250 ft. of "any dwelling house or other building, when directed or requested by an occupant thereof not to so perform."

No person shall "from any window or open space situated in any story of a house above the street floor, which window or open space is visible from the street, or from the sidewalk on the opposite side of the street, exhibit to the public . . . any pantomime performance of puppet or other figures, ballet or other dancing, comedy, farce, show with moving figures, play or other entertainment of the stage or dramatic performance, or of that nature."

"No person shall drive any horse before a sleigh or sled . . . unless there shall be a sufficient number of bells attached to the harness of such horse and sleigh or sled to warn persons of his approach."

"Every horseless coach, carriage or cab shall be equipped with a bell to be used to signal its approach to pedestrians and to other vehicles."

All "horses, swine or neat cattle found at large" shall be taken to the public pound.

No automobile or other vehicle "wearing chains over the tires of their wheels" and no motor vehicle "which emits from the exhaust muffler thereof offensive quantities of smoke or gas or disa-
CHRONOLOGY: THE MODERN CITY AND ISLAND: 1876-1929

1909
greeable odor(s) shall be allowed in the public parks.—Cosby, Code

of Ordinances of the City of N. Y. (1909).

— In this year, there were 2,000,000 persons (estimated) living in tenements. Of these 947,065 (estimated) were living in the 15,739

"New York tenements" which had been erected since the passage of the Tenement House Law of 1901 (p. vi, Ap. 13)—50 Rep., Tenen-

ment House, 101.

— At this time, there still stood in front of the following residences formerly occupied by mayors of this city the so-called "lamps of

honor," which for many years it had been the custom to erect as a

mark of distinction: that of Mayor Wickham, at Lexington Ave.

and 39 E. 79th St.; Mayor Strong, at 12 West 57th St.; and the mayor then in office, McClellan, at No. 10 Washington Square North. Mayor Van Wyck declined the hon-

our, believing the lamps served no useful purpose.—The House

Beautiful, XXV: 58 (which states that there were nine such resi-

dences, but names only the above four). To these may be added

that of Mayor Hewitt, No. 9 Lexington Ave.

— In this year, the governor's room in the city hall was restored to its original design under the direction of the art commission from

designs by Grosvenor Atterbury and his associate John Ably Tomp-

kins. The expense was defrayed by Mrs. Russell Sage (see 1908).—

Arch. Rec., XXXIX: 474—495 N. Y. Sun, Apr 18, 1912. The room,

after its reconstruction, is shown on A. Pl. 21-f, Vol. III. See also

— In this year, the Metropolitan Life Insurance Co. building and
tower (see 1890) were completed, occupying the block bounded by

Madison and Fourth Aves., 23d and 24th Sts. The total height of the
tower is 700 ft. The architect was Napoleon LeBrun.—

Met. Life Bldg. (pub. by the company). See also L. M. R. K., III:

967, and descrip. of Pl. 168, III: 850.

— Columbia University, as it appeared in this year, is shown on

Pl. 170, Vol. III.

— In this year, Joseph Pennell, etcher, lithographer, illustrator, and

author, was elected a National Academician. He died April 23,

1926, at his residence in Brooklyn.—Fielding, Dict. of Am. Painters,

etc. (1916), 278 N. Y. Times, Apr 24, 1916.

— At this time, Howard Pyle was at the height of his fame as a

painter and illustrator. He died in 1911.—Fielding, Dict. of Am.

Painters, etc. (1916), 291; see also Helen W. Henderson, A Looiter in

Jan.

4

— In his annual message to the board of aldermen, Mayor

McClellan gives a summary of the progress made by the city during

the first two years of his administration. He says, in part: "The City

Budget for 1909, exclusive of the County Budgets and the item for
the deficiency in the collection of taxes, exceeds the City Budget for
1904 by $45,483,044. This is a great sum, and if there were reason to
believe that the expenditures of the City must continue to increase at the same rate, there might be cause for alarm. There is, however, no ground for such fear, if the same care continues to be exercised in estimating City expenses and preparing the Budget.

... "The last five years has been a period of development and ex-

pansion rendered necessary by the expansion of the territory of the

old City of New York from sixty-two square miles to three hundred

and twenty-seven, and the extension of City methods and con-

veniences over a large part of this vast area. 

— While the increase in expenditure has been very great, the growth in the actual value of real estate, together with certain

changes in financial methods, have reduced the average tax burden

on the true value of property below what it was before or immedi-

ately after consolidation.

— Criticism of the work of obtaining an additional water supply

in the Catskill Mountain shed should not be that it is extravagant

and unnecessary but that The City of New York should have begun

the work long before it did. We should be actually getting water

now from the Catskills or some equally good source. Our shortage
to-day would be far more serious but for the plentiful rainfall of

1907.

— The water shortage danger is an ever increasing one, not only

because of the demands of a constantly increasing population, but

because of the indications of a diminution in the abnormally abund-

ant rainfall of recent years. On account of this situation the City

is not only hastening the construction of the Catskill Aqueduct be-

tween Ashokan Reservoir and the Croton watershed, but is work-

ing on the temporary development of a supply from sources east of

the Hudson River. 

— The Catskill supply and the Suffolk County well system, will, when fully developed, furnish without doubt to the localities which are situated 1,000,000,000

gallons of water daily. With as much of the present supply as will

then remain safe for use, the City of New York will have a daily

supply of 1,500,000,000 gallons.

— While the installation of the high pressure system has been the

conspicuous accomplishment in the direction of fire protection,

the natural units of fire-fighting have not been neglected. The un-

iformed force has been increased in the last five years from 2,974

officers and men to 4,410, an increase of 46 per cent. In the same

period twenty-four new engine companies, twenty-four hook and

ladder companies and seven hose companies have been organized

and seven single companies in service have been reorganized and

added to the list of double companies, which now number twenty-

six. The hose companies which include those now specially drilled
to handle the high pressure service, so that there is now in Greater

New York a combined force of 249 engines and hook and ladder

companies.

— During this administration nineteen new apparatus houses have

been built and sixty-four old houses have been altered and

repaired, with sanitary improvements for the benefit of the force.

New houses are in course of construction and thirteen others are

being rebuilt. A new and well equipped repair shop offers every

advantage for the quick repair of hose and other apparatus.

— The paid system has been carried into Rockaway Beach, Far

Rockaway, Jamaica, Richmond Hill, Flushing and College Point

in the Borough of Queens, reducing the number of volunteer com-
nies to forty-two. Of the original fifty-seven volunteer companies in

Richmond only thirteen remain, the paid service being now

general in that Borough.

— Since January 1, 1904, the lighting of the City has been almost
equally changed. The first decided improvement was made in

1904, when some 16,000 of the old gas lamps in Manhattan and

The Bronx were changed to mantle lamps. A beginning was also

made in adding to the arc lighting along the main streets. This was

somewhat difficult on account of the high prices demanded, but

early in 1905 prices were reduced by statute, and since then this

work has gone on rapidly.

— I especially desire to call the attention of your Honorable

Board to the work of the Health Department during the past

five years. There is no other Department of the City government

the operations of which are of such vital concern to our people.

Since 1903 the work of this Department has increased tremendously,

but the results achieved more than justify the expenditures of

money that have been made.

— In 1903 there were 997 employees in the Department of

Health. There are now 2,531. 

— During the first eleven months of the present year the death rate

was the smallest ever known in our history. It is only one

percent. The County House Department, the Charities Department, the Street Clean-

ing Department and Bellevue and Allied Hospitals, to give each

its share in this. The functions of these Departments ally them
closely with the Department of Health, and much of what the
In the Department of Charities, the Department of Health and Bellevue and Allied Hospitals a constant war has been waged against the education and work that has been done, notably through the recent tuberculin exhibit at the Museum of Natural History, has been of incalculable benefit to our people.

"Dr. Robert Koch, who, in 1882, definitely placed tuberculosis in the group of infectious, communicable and preventable diseases, has recently paid our City one of the greatest compliments it has ever received. He stated that the conditions in the campaign against tuberculosis in New York City are almost ideal."

"Two years ago Dr. Robert Gibson, a Bacteriologist of the Health Department, perfected a method of concentration of diphtheria antitoxin, which has been in use by the Department, and which has proved so valuable that it has now been adopted by all manufacturers, as well as by all the City and State laboratories in the United States, and is beginning to be used abroad. During the past year this method has been still further perfected by Dr. E. J. Bauhaf. These processes have been of great importance in the administration of antitoxin and reflect great credit upon the Department."

"The City of New York receives its supply of milk from six different States, New York, New Jersey, Pennsylvania, Vermont, Massachusetts and Connecticut. About 200 farms and dairies ship milk to the City. Before 1905 the control of the milk supply was purely local and consisted of the inspection of the shops where milk was sold at retail. Since that date a system of inspection of the farms and dairies has been instituted, with the result that no dairy or creamery can now ship milk to New York City unless it has conformed to the sanitary requirements of the Department of Health.

"Since 1905 a vigorous campaign against mosquitoes has been waged on Staten Island by the Board of Health, under the direction of Dr. Alvah H. Doty, Health Officer of the Port."

"Department of Public Charities."

"The past five years have seen progress of a most gratifying nature in this Department. Improved methods of operation have been introduced and many new buildings have been erected, until to-day it is one of the best equipped departments of the City government, both in plant and personnel."

"Not only has Commissioner Hebberd arranged adequately to meet the demands of the present time, but also the demands of the future. For the first time we have to-day a topographical number of the Island, and the maps and plans that have been made, looking to the ultimate development of the Island as a hospital park, have been approved by the Art Commission. When these plans are carried to consummation, I question if any municipality in the world will have a hospital park approaching it in location and facilities.

"Through the generosity of Mrs. Russell Sage, the income of $700,000 is being used to build up the very important pathological work of the City Hospital and the City Home, Manhattan."

"As a result of the work of the past five years it may be stated that the Department of Public Charities is, in plant, equipment and administration, in better condition than ever before in its history."

"New York City is traditionally liberal in the matter of public education. During the past five years the demand on it for this purpose have grown at a greater rate than ever before in our history. It has been the constant aim of the Board to return to the community, not only in facilities for obtaining education, but in actual education, full value for every dollar expended. As Mayor of the City, I am very proud of what has been accomplished in this direction during the past five years. There is no such thing as being satisfied with the work of a department of this character."

"Since 1904, the new sites acquired number 179, not including 11 sites authorized to be acquired. Ninety-six new buildings and 134 additions to existing buildings have been erected in this time, providing 226,532 seats. In addition to this, 14 new buildings and 35 additions providing 45,380 seats, are under contract.

"The number of lecture centres has been increased from 143 in 1904 to 178 in 1905, and the number of lectures delivered from Jan. 4,665 to 5,572. The attendance at these lectures has grown in proportion."

"I regard the erection of the new municipal office building, which is part of the general scheme of extension of the Manhattan terminal of the Brooklyn Bridge, as one of the important projects the City has ever undertaken. This building is to cost approximately $8,000,000, and when completed will house almost all of the City Departments. The various Departments which it has been decided to place in this building are to-day paying $245,591.46 annual rental. Not only will this rental be saved each year, but it is calculated that ample accommodation will be found in the building for many of the principal courts. It is too early to say just how large a saving will be accomplished, but it may be possible to care for so many of the courts that the construction of a new court house will be unnecessary.

"The design selected is for a twenty-five-story building, surrounded by a tower ten stories in height. The total height of the building, including the tower, will be 559 feet, the third highest office building in the city.

"More than two-thirds of the Corporate Stock authorized for the Department of Correction during this administration will go toward the construction of the penitentiary on Riker's Island. It will provide for 3,000 men and 500 women prisoners and will be the largest institution of its kind in this country. The concrete prison is six floors high, will enclose nearly twenty acres, covering nearly all the north end of the island. The architects spent a year in the study of the best designed and best conducted prisons of America and Europe, and it is believed that the result will represent the highest type of prison that the science of criminology has developed. Every provision for the keeping of discipline and health has been considered.

"Riker's Island by its location assures to the penitentiary the most perfect hygiene conditions. The plan of the prison buildings will fully meet the two essential requirements of health and economic supervision and control. The City of New York will have, not only the largest, but the most perfect institution for the care and cure of criminals.

"Before the close of the year 1905 it is expected that the great transatlantic lines will move from their present piers and be concentrated in the half mile of water-front extending south from West Twenty-third street on the North River, and known as the Chelsea section. The lines which will be accommodated within the section include the Cunard Steampship Company, the Compagnie Generale Transatlantique, together with the lines of the Inter-American Mercantile Marine, the White Star, Red Star, American and Atlantic Transport lines. These rentals will increase the City's revenue $60,000 a year."

"The Brooklyn water-front, from Twenty-eighth street to Thirty-sixth street, has been bought by the City and plans have been prepared for eight modern steamship piers which will be the largest in the City.

"In conjunction with the Department of Highways, an exterior street has been begun between Sixty-fourth and Eighty-first streets, East River, a distance of 4,606 feet, of which 812 feet of the sea wall is complete and in use. This improvement will permit the use of the water-front between these points now cut off by the bluffs on the banks of the river, and outlets will be provided at various streets so as to make it readily accessible for vehicles."

"About 8,000 feet of street along the easterly end of Riker's Island, forming a basin within which the Department of Street Cleaning is depositing the City's refuse. When this filling is completed about 150 acres of made land belonging to the City will be available for use.

"At North Brother Island about 1,900 feet of concrete retaining wall has been built, in the rear of which it is intended to deposit filling in a manner similar to that at Riker's Island. These four acres of made land are designed for the use of the Department of Health.

"A lease has been made to the Central Railroad of New Jersey of land under water easterly of Third avenue, in the Borough of The Bronx, for a freight terminal. At this end of the Harlem River are now clustered the freight yards of the Pennsylvania Railroad Company, the New York Central and Hudson River Railroad Company, the Erie Railroad Company, the New York, New Haven and Hartford Railroad Company, the Lehigh Valley
CHRONOLOGY THE MODERN CITY AND ISLAND: 1876-1909

1909

Railroad Company and the Central Railroad Company of New Jersey, part of which are located upon private property and part leased from the City. The [Dock] Department has recommended that Congress be asked to provide a navigable channel commencing at a point about opposite One Hundred and Twenty-fifth street, Harlem River, and extending along the northwesterly side of Randall's Island. At the present time this passage is not navigable, but if this improvement could be effected, a shorter route will be furnished to vessels plying between the Hudson and Harlem Rivers and Long Island Sound, and the probabilities of disaster in the vicinity of Hell Gate would be lessened by affording vessels a direct instead of a circuitous route around Wards Island, where strong currents are encountered. This would also save a distance of three and one-half miles and nothing of the congestion at the freight terminals in the lower part of Manhattan Island. . . .

Eight recreation piers, with music, are open each summer. Last May the Cedar street promenade was opened to the public. This is the first attempt in this City to utilize the roofs of the sheds along the bulkheads for this purpose, and the experiment has proven a great success. This promenade extends along the northerly water front from Cedar to Albany street, and was much used during the hot summer nights by the residents in the lower section of the City.

The total new wharfage room made during the past five years has been about 207,000 linear feet, or about thirty-five miles, increasing the area of the piers about three million square feet, including the construction of fifty-one piers and twenty-one new platforms, and extending down to lower Twenty-ninth or lower Thirty-first streets.

During the past five years a very considerable addition has been made to the area of Riker's Island by utilizing the ash collections to as great an extent as possible. The original acreage of the island, when acquired by the City, was 89; to this 63 acres have been added, and 144 additional acres are to be made in this manner. The total future area of the island will be 295 acres, much of which will be used in connection with the penitentiary.

The new [Police] Headquarters Building at Grand and Centre streets is nearly finished and will be occupied this year.

Five years of effort have brought the regulation of traffic from the experimental stage to a condition which calls for little improvement. In this important branch of police work New York has now surpassed the foreign cities which had been considered the leaders. It adds to the credit of the various men who have bettered the system when it is remembered that New York's topography makes its traffic regulation a very difficult problem.

Traffic regulations are now in force until midnight at Herald square, Times square, Columbus circles, and at the intersection of Sixty-second street and Broadway and Broadway and Fourteenth street, as well as formerly the regulation of traffic ceased at 6.30 p.m. The importance of the regulation of traffic at these congested points at night is clearly shown by the number of requests for similar regulation which the Department receives from congested points further north.

The process of widening Fifth avenue, an improvement absolutely necessary to relieve congestion, has been slow, not because of legal or engineering phases, but because the administration has considered it only fair to give to the property owners and tenants of the avenue every reasonable opportunity to prepare for what may be, to some of them, a radical change. The avenue has been widened 15 feet between Forty-third and Forty-second streets, and it is respectfully suggested to your honorable body the adoption of an ordinance requiring taximeters to be tested by the City. Within a year it has become evident that the taximeter, with its supposedly exact measurement of distance and time, is a popular appendix of public vehicles. It is, however, subject to error as any other mechanical device and should be inspected.

A system of test is used in some European cities and it seems time that New York adopted means to protect users of cabs from overcharge through design or accident.

"The office of Commissioner of Licenses has grown in importance since its establishment nearly five years ago. It supervises not only intelligence offices for domestic servants, but labor agencies, shipping agencies, stenographers' bureaus, agencies for supplying technical and clerical positions, theatrical agencies and nurses' registries. . . ."

"The extortion and immorality complained of have been practically eliminated as a result of the strict system of inspection and regulation to which employment agencies are now subject. . . ."

"Penage, in so far as labor agents in New York City are responsible, has been generally eliminated, and the fact that complaints regarding it from various parts of the country have been greatly reduced is in large measure due to the strict supervision of the City labor agencies here. The evils of the padrone system, so extensive a few years ago, have been reduced to a minimum. . . ."

". . . From January 1, 1904, to January 1, 1908, plans were filed for 17,836 new tenements, containing 221,801 apartments, or accommodations for over 570,000 people. . . ."

"An important phase of the Department's work is the structural alteration of the 90,000 or more tenements in existence when the law went into operation, to give them in some measure a share in the benefits of the better lighting, ventilation and sanitation required for new buildings. . . ."

"The establishment of the Board of Water Supply, the acquisition of the Staten Island and Thirty-ninth street ferries and the extension of the paid Fire Department into the Boroughs of Queens and Richmond are largely due to the work of the Municipal Civil Service Commission. . . ."

"Among the more important changes in the examining department may be noted the holding of examinations for promotion once a year only, avoiding the expense and confusion of holding them whenever called for by the various departments; the establishment of a uniform system of examinations in all Departments of the City government; the requirement that candidates for promotion shall file application for examination; the establishment of a promotion bureau under the responsible charge of a designated Examiner; the system of numbering the papers of candidates to prevent the Examiners who rate the papers from knowing the examination numbers; the absolute protection of examination papers unopened and in process of rating; the absolute verification of signatures and statements; the appointment of monitors from the non-competitive class allowing the employment of advanced students of the higher educational institutions; the refusing consideration of appeals which are not based on a reasonable charge of error, and the obtaining of information, in non-competitive examination, as to the candidates' fitness instead of relying upon the unverifiable statements of the candidates themselves. . . ."

"The public has come to a better appreciation of the Civil Service Law and its enactions. Schools of instruction have been established in political headquarters and elsewhere and the opportunities for intelligent study of the qualifications of City employees grow continually. Several of the leading newspapers devote space every day to information in regard to pending examinations. . . ."

"New York now has 7,222 acres of parks, or about three and two-fifths per cent. of its 204,318 acres. . . ."

"Of the total park acreage, 353 acres were placed under the jurisdiction of the Park Department during the last five years. These include Chelsea Park, 58 acres added to Bronx Park; Kissena Park, Greenpoint, Amersfort, Highland and McLaughlin parks in the Borough of Brooklyn, and several small unnamed parks as well as desirable additions to parks already existing. . . ."

"The first section of the new North Wing of the Metropolitan Museum of Art will be opened on January 4 by an exhibition of German contemporary art, sent here by a special commission officially appointed by the German Government. The new Central Wing is to accommodate the Hoentschel Collection and other collections of decorative art, will be finished during the early part of the year. . . ."

"The annual numbers of submissions acted upon by the Art Commission has doubled during the last five years. . . ."

"The Charter makes the Art Commission, in a manner, guardian of the existing works of art owned by the City, which comprise 453 portraits, sculptural objects and mural decorations. The collection of portraits dates from 1790, but until the investigation by
1099

1909. the Art Commission practically nothing was known as to the time
and manner of their acquisition, and in many cases the artists were
unknown. . . .

"So far as it has been in my power I have followed the policy
declared in the last municipal campaign, that municipal operation
of public utilities should be resorted to only when private owner-
ship fails to render satisfactory services. It was this policy which
resulted in taking over the Staten Island Ferry and the Thirty-
ninth Street Ferry and the private water companies of Staten
Island. In operating these ferries at a loss the City is carrying out
ele one of its responsibilities to a part of its people. . . ."—Proc.,

19. The 100th anniversary of the birth of Edgar Allan Poe is con-
memorated in Columbia University and N. Y. University. A
bridal bust of Poe, by Edmund T. Quinn, is also unveiled in Poe
Park, Fordham Heights, with appropriate exercises.—N. Y. Daily
Travels, Ja 20, 1909.

Feb. Reginald Pelham Bolton writes concerning "Inwood Hill
Park": "For 50 years the picturesque and beautiful Hill of Inwood,
forming the northern extremity of Manhattan Island, has re-
mained a terra incognita to the great majority of New Yorkers,
and is almost as completely unknown to the officials of its various
departments as it has been to the residents of the Borough of Man-
hattan. The few property owners, who, following the lead of the
late William Thompson, built charming residences amid the leafy
woods of the hillside of its Hudson River front, were as desirous of
preserving its beauties as they were of maintaining their seclu-
sion. At that period, the tax on public improvements of any kind were initiated or carried out upon or around Inwood Hill.
The old Bolton Road, planned and laid out by the brothers
John and Curtis Bolton in 1817, remained the only means of access
to the summit, as indeed it is to-day, and the operation of that
drive or portion of the same roadway which ran parallel with the
Hudson, extending as far as the McCreery property, was never
cleared around the hill to meet the upper portion, as had been origi-
nally intended.

"A few extensions of its were planned by property owners on
the east side of the hill, and were drawn on maps which were used
in the sub-division of the property of the late Isaac M. Dyckman.
These included an avenue known as Prescott av, extending north-
westward from Dyckman st and planned to follow a sinuous course
through the woods, down the valley, which in Colonial times was
known as 'The Clove,' to the bend of the old Spuyten Duyvil
Creek at what is now known as 'Cold Spring Hollow.' . . .
The scattered residents on the hill top and along its westery slope
provided their own road repairs, their own water supply, and their
own public and private gas lighting. It thus came about, that in
recent times the still unsanitary nature of the Hill, and the large
concentration of the late Andrew H. Green, who realized its magnificent possibilities for public park property, and whose expressed opinion led to the recent widespread desire to secure a large part of its natural beauties, its scenic advantages and its
historic associations, for public use and enjoyment.

"It is not inappropriate here to refer to the fact that the hill
not only possesses the last remains of the wild woodlands which
once covered Manhattan Island, but that within them are hidden
the actual rock shelters which once formed the abodes of the original
Manhattanites, from which were taken, only a few years ago,
unmistakable evidences of Indian habitation, and around
which may to-day be seen immense mounds of oyster and clam
shells which formed the kitchen-middens of primeval man. When,
therefore, interest began to be evoked in the subject of the Hudson
Ter-Centennial Celebration, attention was drawn to the fact that
within the confines of the Borough of Manhattan there still existed
a priceless treasure of relics of bygone times and of the primeval
inhabitants, which the great metropolis would feel it a duty to
preserve. These were found to be directly associated with the
advent of Henry Hudson, by reason of his conflict with the natives
then resident in the Indian strongholds frequented by the
settlers of Spuyten Duyvil hill, and, in every proba-

Shall preserve to all future generations a reminder of the original
character of Manhattan Island. Certainly no more appropriate
memorial of the great event of the discovery of this part of the
world by Hudson could be found than the preservation in the form
of a park of this beautiful locality. . . .—Record and Guide,
F 6, 1909.

Feb. 12. The 100th anniversary of the birth of Abraham Lincoln is
elaborately celebrated.—N. Y. Daily Tribune, F 12 and 13, 1909.

A municipal lodging-house, at 432 East 25th St., with accom-
mmodations for 1,000 men and 100 women, is opened.—N. Y. T.
Herald, F 16, 1909.

Side doors in subway cars are tried as a means of handling
passengers more efficiently during rush hours.—N. Y. T. Herald,
F 17, 1909.

By the amended "State Law," the state flag is declared to be
"blue, charged with the arms of the state," done in the colors for-
merly prescribed.—Laws of N. Y. (Consolidated, 1909), chap.
f.

The sale of modern paintings and Chinese porcelains, belonging
to the estate of Henry Gracie, deceased, on Feb. 25-27, at the
Am. Art Galleries, yielded $794,445.—A Plan, etc., 26 cit.

Wm. H. Taft is inaugurated as president.—N. Y. Daily Tribune,
Mar. 4 and 5, 1909.

The commission appointed in 1908 (p. e., Ap 13) to prepare a
new charter for New York City makes its report to the legislature.
The proposed charter contained many modifications from the
one now in force. . . . It is much briefer in form, including only
702 words, while the former contained 1980. The changes proposed
are in general in the direction along which municipal government has moved in the last few years. The

principle is followed of reducing the number of elective administrative officers and of putting into separate hands the power to appropriate and the power to spend money, and to concentrate power and responsibility in as few hands as possible. The commission proposed that the borough presidents . . . shall cease to have admin-

istrative functions and shall devote their entire time to the
financial work on the Board of Estimate and Apportionment. The
administrative work is to be given to the heads of departments, responsible to the Mayor and to bureaus, some of which are to be
under the Board of Estimate and Apportionment and some under
the various departments. The Board of Aldermen is to be sup-

plemented by a council of thirty-nine members to serve without pay. Perhaps the most radical feature proposed is the abolition of the street cleaning department and the placing of the work of that
department, as well as the work of repairing the streets, care of
sewers and the like, which has been under the charge of the borough
presidents, under a newly created department of street control.
This is a large part of the duties of the former council in many respects more limited than those possessed by the Board of Aldermen, although in some
respect they are greater. The power to grant franchises is to rest exclusively in the hands of the Board of Estimate and Apportion-
ment, and the Council is to have extended ordinance-making authority. The keeping of the State accounts is greatly simplified.
The office of coroner is abolished and many minor changes are
made, among them the creation of a uniformed Superintendent of
Police subject to removal by the Police Commissioner. Certain
provisions of the proposed charter met with severe criticism, espe-
cially those relating to the abolition of the Board of Aldermen.
No action was taken during the year toward its acceptance or
rejection." It was referred to a legislative committee for investiga-
tion.—New International Year Book (1909), 485, 573.

The board of aldermen passes a resolution appropriating
$900,000 for the Hudson-Fulton celebration.—N. Y. Daily Tribune,
Mr 10, 1909.

Gov. Hughes signs a law designating Oct. 12 as a legal holiday, to
be known as "Columbus Day."—New International Year Book
(1909), 572-73.

Theodore Roosevelt sails from New York for Africa to hunt big
game and to collect specimens for the Smithsonian Institution
in Washington.—N. Y. Daily Tribune, Mr 23 and 24, 1909.

From March 29 to April 14, an exhibition was held by the
Lawyers Title Insurance and Trust Co., at 160 Broadway, of rare
views of Old New York.—See cat., in N. Y. P. L.

The Queensboro Bridge, extending across the East River, 50
between Second Ave. and 60th St., Manhattan, and Crescent and
Jane Sts. on the Long Island side, is opened for pedestrian traffic.
Construction work on the new municipal building (see JL 20, Aug. 1907) begins. The building was completed in 1914.—Letter from the Supt. of Bridges to the architects; Engineering Rec., N, 1910; L. M. R. K., III: 974. Cf. A. M. P. 29-9, Vol. III.

The Payne-Aldrich tariff bill is signed by Pres. Taft.—World Almanac (1910), 168.

An exhibition is held in the Lenox Branch, N. Y. Pub. Library, Sept. of prints, books manuscripts, etc., relating to Henry Hudson, the Hudson River, Robert Fulton, and steam navigation. See cat., in N. Y. P. L.

A report that Dr. Frederick A. Cook discovered the North Pole on April 21, 1908 (p. 9.), reaches New York.—Eve. Post, S 1, 1909. See S 6 and 21.

An official trial of the “Clermont” is made and proves a success.—Official Min. of Hudson-Fulton Celebration Com., II: 1491. The French fleet arrives at New York to participate in the Hudson-Fulton celebration.—N. Y. Times, S 20, 1909.

The British parliament passes a law creating the South African Union, a federation composed of Cape of Good Hope, Transvaal, Orange Free State, and Natal.—Hazen, Europe since 1815, 544-45.

The official Hudson-Fulton exhibition at the Metropolitan Museum of Art is opened, and a public reception is held.—Hudson-Fulton Celebration, 1909.

Dr. Frederick A. Cook arrives at New York and receives an ovation.—Eve. Post, S 21, 1909. On Oct. 15, the city conferred its freedom upon Dr. Cook, but when Admiral Peary arrived at New York and convinced its citizens that Cook’s claims were fraudulent, the aldermen voted that their action in conferring the freedom was “premature,” and demanded that Cook return it.—Eve. Post, O 15, 1909; N. Y. Times Mag., J 9, 1911.

The Atlantic fleet arrives for the Hudson-Fulton celebration.—Eve. Post, S 22, 1909.

The Holland Society gives a banquet at the Waldorf-Astoria in honour of the Netherlands delegates to the Hudson-Fulton celebration.—Hudson-Fulton Celebration, 1909, II: 844-48.

The great Hudson-Fulton celebration, held under a naval parade formed by the remains of the “Half Moon” and the “Clermont.” A column of war-ships, representing the United States, England, Germany, France, Italy, Argentina, Dutch, and Mexico, is anchored in the Hudson, and extends from 42d St. to Spuyten Duyvil, while 800 other vessels are anchored along the shores.

At 10:30 a. m., the “Half Moon,” manned by Commander Lam representing Henry Hudson and Dutch sailors dressed in the costumes of Hudson’s time, and the “Clermont,” with the Rev. C. S. Bullock impersonating Robert Fulton, Miss Evelyn Bullock acting as Harriet Livingstou, Fulton’s fiancée, and others as Fulton’s guests, were escorted from the Kill van Kull by a squadron consisting of torpedo boats, submarines, naval militia vessels, and other craft. During the morning and early afternoon, the thrilla manoeuvred along the northern shore of Staten Island and the Bay Ridge shore of Long Island, being welcomed at Stapleton by a Richmond committee and at Bay Ridge by a Brooklyn committee.

Meanwhile, the great merchant fleet, consisting of almost every type of vessel, was assembling in the Lower Bay. At about 1 p. m., the “Half Moon,” in tow of the “Fred. B. Dalzell,” and the “Clermont” under her own power, took their places at the head of the parade, and the whole procession, presenting an impressive spectacle, then steamed up the Hudson. When the line of warships was reached, the “Half Moon” and the “Clermont” turned to the eastward and proceeded between the ships and the Manhattan shore, while the rest of the parade turned to the west and continued between the ships and the Jersey shore, in order to sail around the war vessels. The “Half Moon” and the “Clermont” were saluted
THE ICONOGRAPHY OF MANHATTAN ISLAND

as they passed the men-of-war, and they finally dropped anchor in front of the "water gate" and official landing which had been constructed at 110th St., amid the cheers of thousands, the booming of cannon, and the music of the band on the reviewing stand.

Hon. S. P. van Eeghen, president of the Netherlands Hudson-Fulton Commission, then formally presented the "Half Moon" to Gen. Stewart L. Woodford, president of the American committee, together with an engrossed and illuminated address and a book containing the names of the Netherlands commission and of the donors. Capt. Jacob W. Miller, chairman of the naval parade committee, next presented the "Clermont," and Dr. Jokichi Takamine, representing the Japanese residents of New York, announced the gift of 2,100 cherry trees from Japan to be planted along Riverside Drive. Gen. Woodford made appropriate replies to all these addresses.

In the evening the war-fleet was illuminated, and there was an elaborate display of fireworks.—N. Y. World, S 26, 1909; Hudson-Fulton Celebration, 1909 (4th Ann. Rep. of Hudson-Fulton Celebration Comm., 1910), I: 198-245. The naval parade is shown on Pl. 172, Vol. III, and the arrival of the "Half Moon" and the "Clermont" at the water gate appears on Pl. 173, Vol. III. A photographic panorama of Manhattan Island made from Woodcliff, N. J., at about this time is reproduced as Pl. 173-o, Vol. III.

The Hudson-Fulton celebration continued until Monday, Oct. 11, and was marked by numerous and brilliant festivities in the cities and towns along the Hudson, including parades, pageants, banquets, dedications, etc. Each borough of Greater New York held its own celebration. The principal other events connected with Manhattan Island or with the city as a whole were as follows: religious services on Sept. 25; the laying of the cornerstone of the Hudson memorial monument on Spuyten Duyvil Hill, the dedication of the Palisades Interstate Park, and an official reception to foreign delegates at the Metropolitan Opera House, on Sept. 27; an historical land parade and the unveiling of a tablet on the N. Y. U. building in Washington Square, in honour of seven public school teachers who taught under Dutch rule, on Sept. 28; an official banquet at the Hotel Astor, aeroplane flights over the harbour by Wilbur Wright—the first successful aeroplane flights in the neighbourhood of Manhattan Island—and the dedication of a bust of Robert Fulton in the "Hall of Fame" of N. Y. U. and of tablets marking the site of Fort Amsterdam, the "first line of defence" on Washington Heights in 1776, a bastion of the old city wall, and the site of Fort Tryon, on Sept. 29; a military parade on Sept. 30; a naval parade up the Hudson from Spuyten Duyvil to Newburgh on Oct. 1; a series of festival parades by public school children, a naval site at Columbia University, and a night carnival procession, on Oct. 25 a spectacular flight by Wilbur Wright from Governor's Island to Grant's Tomb and return and a banquet by the Pilgrim Society in honour of the British admirals on Oct. 4; and the unveiling of the Verrazano monument in Battery Park on Oct. 6.—N. Y. World, S 27 et seq., 1909; Hudson-Fulton Celebration, 1909 (4th Ann. Rep. of Hudson-Fulton Celebration Comm., 1910), I: 198-456, 476-97, 709-14; II: 852-72.

The Metropolitan Museum of Art (see S 20), the N. Y. Public Library (see S —), the American Scenic and Historic Preservation Society, and other organizations, held exhibitions and receptions, for which see ibid., I: 174-97; II: 715-19; and List of Institutions holding Free Exhibitions under the auspices of or in cooperation with the Scientific, Historical and Art Committees of the Hudson-Fulton Celebration Commission.
